600 PROCESSES
601 .Treatment by living organism
602 ..Including plant or animal of higher order
603 ..Including collecting or storing gas (e.g., fuel, carbon monoxide, etc.)
604 ...And reusing oxidant
605 ..Anaerobically, with subsequently aerobically treating liquid
606 ..Adding enzyme or releasing same by treating microorganism
607 ..Dividing, treating, and recombining liquid
608 ..Regulating floating constituent
609 ..Including dewatering sludge
610 ..Including adding ancillary growth medium for microorganism
611 ...For or with specific microorganism
612 ..And regulating temperature during biological step
613 ...Digesting sludge
614 ..Controlling process in response to stream constituent or reactant concentration
615 ..Utilizing contact surfaces supporting microorganism (e.g., trickling filter, etc.)
616 ...Particulate media
617 ....In bed form
618 .....And rehabilitating or regenerating same
619 ...Rotating contactor
620 ..Aerobic treatment
621 ...Recirculating to prior step
622 ....Of separated liquid
623 ....Of sludge or separated solid
624 .....And returning to or withdrawing from diverse treating zones
625 .....Treating outside mainstream
626 .....To mainstream oxygenation (e.g., activated sludge, etc.)
627 ......Utilizing specific oxidant, other than air alone (e.g., oxygen-enriched air, ozone, peroxide, etc.)
628 ......Utilizing mechanical aeration means
629 ...And internally circulating the liquid
630 ...And anaerobic treatment
631 ..And additional treating agent other than mere mechanical manipulation (e.g., chemical, sorption, etc.)
632 .Treating by enzyme
633 .Extracting utilizing solid solute
634 .Liquid/liquid solvent or colloidal extraction or diffusing or passing through septum selective as to material of a component of liquid; such diffusing or passing being effected by other than only an ion exchange or sorption process
635 ..Liquid/liquid or gel type (i.e., jellylike) chromatography
636 ..Including cleaning or sterilizing of apparatus
637 ..Including regulating pressure to control constituent gradient at membrane or to prevent rupture of membrane
638 ..Including ion exchange or other chemical reaction
639 ..Including prior use of additive (e.g., changing pH, etc.)
640 ..Passing through membrane in vapor phase
641 ..Utilizing plural diverse membranes
642 ..Extracting water from brine utilizing liquid/liquid solvent or colloidal extraction
643 ..Utilizing liquid membrane (e.g., emulsion) in liquid/liquid solvent or colloidal extraction
644 ..Diffusing or passing through septum selective as to material of a component in liquid/liquid solvent or colloidal extraction
645 ...Biological fluid (e.g., blood, urine, etc.)
646 ....Hemodialysis
647 .....Maintaining critical concentration(s)
648 ...Including regenerating or rehabilitating the extracting liquid in liquid/liquid solvent or colloidal extraction
649 ..Diffusing or passing through septum selective as to material of a component of liquid
650 ...Filtering through membrane (e.g., ultrafiltration)
651 ....Removing specified material
652 ....Hyperfiltration (e.g., reverse osmosis, etc.)
653 .....Utilizing specified membrane material
654 ......Synthetic resin
655 ......Cellulosic
656 .Chromatography
657 ..Utilizing rotating column
658 ..Utilizing paper or thin layer plate
659 ..Including liquid flow diversion
660 .Ion exchange or selective sorption
661 ..By passing through suspended bed
662 ..And liquid testing or volume measuring
663 ..Including diverse separating or treating of liquid
664 ...By distilling or degassing
665 ...By making an insoluble substance or accreting suspended constituents
666 ....Utilizing organic agent
667 ....Utilizing aluminum, calcium, or iron containing agent
668 ...By chemically modifying or inhibiting dispersed constituent
669 ...Prior to ion exchange or sorption
670 ..Including rehabilitating or regenerating exchange material or sorbent
671 ...Of oil sorbent material
672 ...Fractional, selective, or partial type
673 ...Utilizing gas, water, or chemical oxidizing or reducing agent
674 ...Utilizing organic regenerant
675 ...Rehabilitating or regenerating in diverse zone or chamber
676 ....Continuous cyclic process
677 ...Using conserved or recirculated fluid
678 ...Including liquid flow direction change
679 ..Utilizing exchange or sorbent material associated with inert material
680 ...Including oil sorbent
681 ..Removing ions
682 ...Radioactive
683 ...Anions
684 ....Metal complexed (e.g., chromate, ferricyanide, chlorplatinate, etc.)
685 ....Including cation
686 .....Utilizing mixed bed or amphoteric material
687 ...Calcium or magnesium (e.g., hardness, water softening, etc.)

PROCESSES
.Ion exchange or selective sorption
..Removing ions
688 ...Heavy metal
689 ..Sorbing water from diverse liquid
690 ..Sorbing organic constituent
691 ...From aqueous material
692 ....Utilizing synthetic resin
693 .....Oil removed
694 ....Utilizing activated carbon
695 .Using magnetic force
696 .Preventing, decreasing, or delaying precipitation, coagulation or flocculation
697 ..Utilizing inorganic phosphorus agent
698 ..Utilizing organic agent
699 ...Phosphorus containing
700 ....Nitrogen containing
701 ...Acrylic polymer
702 .Making an insoluble substance or accreting suspended constituents
703 ..Effecting flotation
704 ...Including chemical addition (with or without bouyancy gas)
705 ....Chemically specified precipitant, coagulant, or flocculant
706 .....And significant characteristic of the bouyancy gas, other than mere addition of same
707 ......Generating gas in situ
708 ..Including emulsion breaking
709 ..Controlling process in response to stream condition
710 ..Treating the insoluble substance
711 ...For recovery of a treating agent
712 ..Including recycling
713 ...Of separated solids
714 ..Seeding
715 ...Utilizing sludge or floc blanket
716 ..Including step of manufacturing inorganic treating agent
717 ...In situ
718 ..Including degassing
719 ..Including chemical reduction
720 ...Of chromium material
721 ..Including oxidation
722 ...Of iron or manganese material
723 ..Utilizing precipitant, flocculant, or coagulant, each with accelerator or with each other or plural precipitants, flocculants, or coagulants
724 ...Regulating pH
725 ....Utilizing organic precipitant
726 ...Sequential introduction
727 ....Including organic agent
728 ...Including organic agent
729 ..Utilizing organic precipitant
730 ...From natural source or chemical modification thereof
731 ....Starch
732 ...Synthetic polymer
733 ....Acrylic
734 .....Nitrogen containing (e.g., amine, azo, etc.)
735 ....Nitrogen containing (e.g., amine, azo, etc.)
736 .....Derived from alkyl halide or epihalophydrin reactant
737 ..Including temperature change
738 ..Including agitation
739 .Including controlling process in response to a sensed condition
740 ..Density or specific gravity sensing
741 ..Pressure sensing
742 ..Temperature sensing
743 ..pH sensing
744 ..Level sensing
745 ..Turbidity or optically sensing
746 ..Electrical property sensing
747 .Including geographic feature
748 .Utilizing electrical or wave energy (directly applied to liquid or material being treated)
749 .Chemical treatment
750 ..Including degassing
751 ..For disposal as a solid product
752 ..Plural spaced feedings
753 ..Utilizing halogen or halogen containing material
754 ...Chlorine or bromine containing
755 ....Organic
756 ....Hypochlorite
757 ..By chemical reduction
758 ..By oxidation
759 ...Utilizing peroxy compound (e.g., hydrogen peroxide, peracid, etc.)
760 ...Utilizing ozone
761 ...Liquid phase high temperature and pressure (e.g., "wet air", etc.)
762 ....Catalytic
763 ...Catalytic
764 ..Destroying microorganisms
765 ..Including liquid recirculation
766 ..Including temperature change
767 .Separating
768 ..Including treating separated solids
769 ...Destroying cake or solid component
770 ...Including drying (e.g., by squeezing or heating, etc.)
771 ....By gas contact
772 ...Washing with a fluid other than the prefilt
773 ..Including preliminary conversion to liquid state
774 ..Including temperature change
775 ...Thermal diffusion
776 ..Skimming
777 ..Including precoating filter medium with filter aid
778 ...With or by addition to prefilt
779 ..Discharging residue to prefilt
780 ..Including movement of filter during filtration
781 ...Centrifugally extracting
782 ....Blood
783 ...Rotating belt
784 ...Rotating drum
785 ...Cleaning filter utilizing wave energy (e.g., vibrating, pulsating, etc.)
786 ...Of particulate bed (e.g., fluidized or moving bed, etc.)
787 ..Cyclonic, or centrifugal (e.g., whirling or helical motion or by vortex, etc.)
788 ...Introducing liquid tangentially
789 ...Isolating layer
790 ..Dividing and recombining
791 ..Rehabilitating or regenerating filter medium
792 ...Particulate bed
793 ....Reverse flow
794 .....Including addition of diverse fluid
795 ......Expanded bed
796 ....Includng mechanical agitation
797 ...By diverse fluid
798 ....Reverse flow
799 ..Filtering immiscible liquids
800 ..Utilizing gravitational force
801 ...Including change of mainstream flow direction
802 ....Utilizing parallel separation passages
803 ...Including specified feature of settled solids removal
804 ...And additional diverse separation

	PROCESSES
	.Separating
805	..And recirculating liquid
806	..Plural separating
807	..Utilizing particulate bed
808	..Including specified pressure change
85	WITH ALARM, INDICATOR, REGISTER, RECORDER, SIGNAL OR INSPECTION MEANS
86	.Material level or thickness responsive
87	.Responsive to fluid flow
88	..Meter-controlled cyclic systems
89	...With time control
90	.Fluid pressure responsive
91	.Position or extent of motion
92	.Test valve
93	.In effluent conduit
94	.Transparent
95	..Sight glass
96.1	CONSTITUENT MIXTURE VARIATION RESPONSIVE
96.2	.With membrane
97	FLOW, FLUID PRESSURE OR MATERIAL LEVEL, RESPONSIVE
98	.Fluid current controlled cyclic system
99	.Prefilt deverting to drain by prefilt accumulation
100	.Flow cut-off requiring reset
101	.Proportionate feed means
102	.Programming plural units
103	.Diverse sensing means
104	..Responsive to material level
105	..With control for auxiliary liquid inlet
106	.Filter cleaning
107	..Rotary movement of filter or mechanical cleaner
108	..Backwash or blowback
109	.Discharge of treated material
110	..With separator inlet control
111	..Responsive to prefilt accumulation or filter clogging
112	..Heavier constituent
113	...By weight of solids
114	...By treated liquid accumulation
115	...With lighter constituent outlet control
116	..Permitted by filtrate accumulation
117	..Check valve controlled
118	...Non-closing, e.g., sand valve
119	...Float type
120	.Vent control
121	.Float
122	..Controls movable separator
123	..Controls valve
124	...Controls flow between two separators
125	...Separator between float and valve
126	...Float in separate rehabilitating fluid tank
127	...Additional fluid inlet control
128	...Float in receptacle other than that of separator
129	....In flow between inlet and separator
130	.Fluid pressure responsive by-pass
131	..By movement of separation medium
132	..With additional separation or treating means
133	..In inlet and outlet closure header
134	.Plural elements controlled
135	..Including manually controlled element
136	.Check valve
137	.Maintaining stream pressure or flow
138	WITH TIME CONTROL
139	.Of additional fluid
140	..Preparation for treating operation
141	WITH PROGRAM ACTUATOR
142	.Plural treating units or sections sequentially controlled
143	AUTOMATIC CONTROL
144	.Responsive to vibration or unbalance
145	.Responsive to rotation
146	..Controlled cover latch
147	..Controlled discharge means
148	.Container movement operated
149	.Thermal
150	WITH GAS-LIQUID SURFACE CONTACT MEANS
151	.With separator
153	STRUCTURAL INSTALLATION
154	.Flume stream type
155	..Plural or diverse screens
156	..Fluid stream or residue operated
157	...Revolving cylindrical strainer
158	..With cleaner for movable strainer
159	..With cleaner and means to remove residue therefrom
160	..Endless belt strainer
161	..Revolving strainer
162	..Fixed strainer
163	.Grated inlet surface drain
164	..Flat grating at surface level
165	...With subsurface weep means
166	..Concentric guard ring or rib
167	.Closed circulating systems
168	..Lubrication
169	..Aquarium or swimming pool
170	.Geographic
171	.Machinery
172	.Ancillary to storage tank
173	COMMINUTING
174	.Cylindrical strainer
175	WITH HEATER OR HEAT EXCHANGER
176	.Thermal diffusion
177	.With treating fluid addition
178	..With mechanical agitator or movable separator
179	.With mechanical agitator or movable separator
180	.Vapor or gas removal
181	.Flow line connected in series with distinct separator
182	.Diverse separators
183	..Common casing coaxial with heater
184	.For filter
185	..Imbedded or between filter media
186	..External of casing
187	.Within gravitational separator
188	WITH GAS SEPARATOR
189	PLURAL CHAMBERS WITH MOVEMENT OF GRANULES THEREBETWEEN
190	WITH EXTERNAL SUPPLY MEANS FOR REGENERATING MEDIUM, E.G., WATER SOFTENING SYSTEM
191	.With pump, injector or siphon
192	WITH PRELIMINARY CHEMICAL MANUFACTURE
193	WITH PRECOAT ADDING OR APPLYING MEANS
194	RECIRCULATION
195.1	.Serially connected distinct treating or storage units
195.2	..With semipermeable membrane, e.g., dialyzer, etc.
195.3	..With sediment recycle means directly to main stream
195.4	...Means is baffle slot
196	.Of filtrate
197	.From bottom of separator
198.1	WITH MEANS TO ADD TREATING MATERIAL
198.2	.Chromatography
198.3	..Thin layer, e.g., plate, etc.
199	.Spaced along flow path
200	.Plural distinct separators
201	..Serially connected
202	...Diverse type
203	..Filters
204	...Sectional chamber press type
205	.With distinct reactor tank, trough or compartment
206	..Chemical holder in series with separator

	WITH MEANS TO ADD TREATING MATERIAL
	.With distinct reactor tank, trough or compartment
207	..Within gravitational separator
208	...With mechanical agitator
209	.Directly applied to separator
210	..To interior of moving filter, e.g., drum
211	...Through separator supporting rotary shaft
212	...With stationary casing closure feature
213	...With coaxial rotary impeller or distributor
214	...With stationary mount for movable distributor
215	...With effluent dividing means
216	..Moving filter medium
217	...Drum
218	..Gas removed from closed tank
219	..With mechanical agitator
220	..Submerged fluid inlet
221.1	...With outlet at surface, e.g., froth flotation, etc.
221.2	....And gas injecting means other than by mechanical agitation
222	MAGNETIC
223	.With additional separator
224	SECTIONAL CHAMBER PRESS TYPE
225	.With residue removal or liquid agitation
226	.With porous filler
227	.Medium clamped in joint
228	..With spacing frame
229	..Imperforate base recess in plate
230	.With repair or assembling means
231	.Plates or frames
232	WITH REPAIR OR ASSEMBLING MEANS
233	.Piercing or closure knock out means
234	.Removable treatment part with normally disabled flow controller
235	.Placement of container opens flow controller
236	.Sliding or rolling on guide means
237	.Hoist or handle means
238	..Hand manipulable
239	CONVERTIBLE
240	.Filter having selectively usable flow connector means
241	WITH MOVABLE SUPPORT
242.1	.Float
242.2	..With aerating means
242.3	..With oil water skimmer
242.4	..With oil water sorption means
243	ELECTRICAL INSULATING OR ELECTRICITY DISCHARGING
244	PORTABLE RECEPTACLE WITH HOOD OR CLOSURE
245	.Attached variable flow controller
246	.Limited opening cover
247	FILTRATE SPLASH PLATE AND/OR DEFLECTOR
248	WITH DRIP, OVERFLOW OR CONTENT DRAINING FEATURE
249	BRACKET OR LEG SUPPORT FOR STATIC SEPARATOR ASSEMBLY
250	.Leg
251	COMBINED
252	SERIALLY CONNECTED DISTINCT TREATING WITH OR WITHOUT STORAGE UNITS
253	.Parallel
254	.With by-pass
255	.Cascade
256	.One unit inside another
257.1	.With storage unit
257.2	..Having membrane
258	.With pump, gas pressure or vacuum source
259	.Diverse
260	..Including multiple operation unit
261	..One unit supports another
262	..On different levels
263	PARTICULATE MATERIAL TYPE SEPARATOR, E.G., ION EXCHANGE OR SAND BED
264	.Selective units or compartments
265	.With gravitational separator
266	.With spaced non-particulate separating means
267	.Trunnion mounted casing
268	.Gravity flow of particles type
269	.With rehabilitation means
270	..Movable means for particle pickup and redeposit
271	..Surface traversing type
272	...Rotating on stationary axis
273	...Moving fluid distributor
274	..Including means to apply gas to bed
275	..Backwash or blowback means
276	...With mechanical agitator or residue remover
277	...Flow controller external of closed casing
278	....Multi-way valve unit
279	...With embedded fluid distributor
280	..With agitator
281	..With access opening to normally closed casing
282	.Removable cartridge or hand-manipulated container
283	.Pervious divider between and contacting beds
284	.Spaced beds
285	.Embedded baffle
286	..Vertical
287	.Within flow line or flow line connected closed casing
288	..Conduit through bed, inlet and outlet at same end of casing
289	..With particular liquid receiving means or foraminous bed retainer
290	.With multi-layer beds
291	.Particular liquid receiving means or foraminous bed retainer
292	..Hood or top protector type
293	..Floor type, e.g., false bottom
294	DIVERSE DISTINCT SEPARATORS
295	.Including a filter
296	..Including liquid as a separating medium
297	..Moving filter medium
298	..With mechanical residue or sediment mover
299	..Including constituent trapping feature
300	...Alternate filters and traps in series
301	....Plural traps
302	...Flow-line valve upstream of separator
303	...Cut-off sediment trap
304	...Tangential flow, spiral or convolute baffle
305	...Baffle preceding or within sediment trap
306	....Deflecting prefilt from filter medium
307	...Downstream of filter medium
308	...Directly communicating with tubular filter interior
309	....Attached to filter element
310	...Lateral trap
311	...Downflow inlet, upflow through filter medium
312	...Sediment discharge means
313	....Valve controlled
314	..Spaced filters
315	...One within another
316	...One adjacent inlet or outlet conduit
317	...Including non-self-supporting medium
318	...Incompatible shapes
319	.With agitator

DIVERSE DISTINCT SEPARATORS
320 .With baffle perpendicular to flow direction
321.6 CASING DIVIDED BY MEMBRANE INTO SECTIONS HAVING INLET(S) AND/OR OUTLET(S)
321.61 .Membrane secured with adhesive of specified composition
321.62 .Antithrombogenic membrane
321.63 .Rotating mechanical agitator adjacent membrane
321.64 .Plural diverse structured membranes within a single casing
321.65 .Permeated liquid quantity measurement or control
321.66 .Energy recovery from treated liquid
321.67 .Membrane movement during purification
321.68 ..Nontranslatory rotary
321.69 .With membrane cleaning or sterlizing means (other than by filter movement or rotating agitator)
321.7 ..Solid cleaning material (e.g., balls)
321.71 .Dialyzer with dialysate proportioning means
321.72 .Each section having inlet(s) and outlet(s)
321.73 ..Noncoiled nonannular cross section tube
321.74 ..Coiled membrane
321.75 ..Planar membrane
321.76 ...Spiral flow
321.77 ..Pleated membrane
321.78 ..Cylindrical membrane
321.79 ...Plural cylindrical membranes all connected for parallel flow
321.8 ....All cylindrical membranes are parallel
321.81 .....With embedded baffle
321.82 .Noncoiled nonannular cross section tube
321.83 .Coiled membrane
321.84 .Planar membrane
321.85 ..Spiral flow
321.86 .Pleated membrane
321.87 .Cylindrical membrane
321.88 ..Plural cylindrical membranes all connected for parallel flow
321.89 ...All cylindrical membranes are parallel
321.9 ....With embedded baffle
322 PLURAL DISTINCT SEPARATORS
323.1 .Filters
323.2 ..Tubular
324 ..Movable separating elements
325 ...Planetary
326 ...Drum type on parallel axis
327 ...Plural cleaners and plural movable elements
328 ...Pivotally mounted sections
329 ...Relatively movable
330 ...Connected for group operation
331 ....Spaced filter wall type, e.g., multiple hollow leaves
332 ..With residue removal or liquid agitation
333.01 ...Backwash or blowback
333.1 ....Sequential backwash
334 ...Alternating filter and residue remover
335 ..In series for prefilt flow
336 ...Tortuous path
337 ...Nested units
338 ....Concentric filter elements
339 ...Internal flange supporting filter element
340 ..Parallel filters with flow controller
341 ...Individually controlled for removal with common receiver
342 ..One element within another
343 ..Alternating oppositely opening liquid distributors
344 ..Abutted alternating medium and pan type receiver
345 ..Radial or radially connected to central header
346 ..Spaced wall-type filters
347 ...Central header
348 FILTER
349 .Pulsation dampener or gas trapping
350 .With movable means to compress medium
351 ..Actuating means external of closed casing
352 ..Internal spring
353 .Free cleaning means, e.g., loose abrading particles
354 .Medium, cleaner or agitator moved by fluid
355 ..Cleaner
356 ..Medium flexed
357 .Relatively movable members interleaved for cleaning
358 .Imperforate drum, medium on arc, chord or end
359 .Movable medium
360.1 ..Centrifugal extractor
360.2 ...With inward flow of feed component
361 ...With individual article container or support
362 ....Container or support reversible
363 ...With adjustable rotation stabilizer
364 ...Casing, shaft and filter unit gyratorily mounted
365 ...Shaft and filter unit gyratorily mounted
366 ....Gyratory mounting above filter
367 ...Filter gyratorily mounted on shaft
368 ...With rotation brake
369 ...Discharging residue
370 ....Secondary motion of filter medium
371 ....With variable flow controller
372 ....By residue engaging means
373 .....Fixed
374 .....Rotatable
375 ......Pivoted
376 .....Axially reciprocable
377 ...Internal work distributor
378 ...Including filtrate receiving means having plural filtrate outlets
379 ...Including filtrate receiving trough adjacent top discharge
380.1 ...Rotating element construction
380.2 ....Laundry
380.3 ....Horizontal axis
381 ....Inwardly extending partitions
382 ....Top filtrate discharge
383 ..Separate agitator
384 ..Vibrator and unidirectional motion filter medium
385 ..With plural motion
386 ..Rolls or confining members contacting residue
387 ..Unrollable
388 ..Vibrating or longitudinally reciprocating
389 ...Longitudinally moving prefilt type
390 ..Mounted on movable valve element
391 ..With cleaning means
392 ...Fixed position or attached valve blocking means
393 ...Backwash or blowback and additional cleaner
394 ...Discharging inside, e.g., internal-type drum
395 ...With filter-driven valve means
396 ...Solid cleaner, e.g., scraper
397 ....With plural outlets from filter casing

	FILTER
	.Movable medium
398	..Within sealed enclosure
399	...Movable casing
400	..Belt type
401	...Superimposed on additional moving support
402	..Drum type
403	...Internal feed
404	...Annular segmented compartment
405	.Movable prefilt distributor
406	.Vacuumized filtrate receiver
407	.With residue removing means or agitation of liquid
408	..Diverse, e.g., combined agitators, scrapers, aeration blowback
409	..Fluid cleaning
410	...Air pump type
411	...Backwash or blowback
412	....Liquid pulsator
413	..Fixed filter medium and movable stirrer or cleaner
414	...With plural outlets from filter casing
415	...Nontranslatory rotary
416.1	.With pump, gas pressure, or suction source
416.2	..For aquarium or swimming pool
416.3	..For drinking water
416.4	..For fuel system
416.5	..For lubricating or oil treating system
417	.Alternating oppositely opening liquid distributors
418	.With flow controller for material being treated
419	..Attached to or within portable prefilt receiver
420	..Selective directive flow relative to filter
421	...Pivoted prefilt deflector
422	...Plural outlets from filter casing
423	....Attached unitary plural passage header
424	...Multi-way valve
425	....Backwash
426	.....Encased
427	...Backwash
428	..Combining or dividing flow passages with filter in combined passage
429	..Filter coaxial with valve seat or valve stem
430	...Filter surrounds valve
431	...Filter fixed to valve seat, opposed to valve head
432	..Filter in valve body recess
433.1	.Divided filtered, and unfiltered liquid passages
434	..Recombining
435	.Within flow line or flow line connected close casing
436	..Vented
437	..Central internal liquid receiver, e.g., tube
438	...Imperforate central liquid tube
439	....Axial flow through filter element
440	...Inlet and outlet at same end
441	...Attached to casing
442	....Head and base connected
443	..Inlet and outlet at same end
444	...Filter suspended from head
445	..Clamped in casing joint
446	..Axially aligned inlet and outlet
447	...Laterally removable
448	...Single open-end-type filter element
449	...Pipe end attached closed casing, e.g., faucet
450	..Gasket within casing or spaced removable end members
451	..Internal fixed shoulder supporting filter element
452	...Single open-end-type filter element
453	..Filter element clamped between closure and end wall
454	..Filter element attached to closure
455	.Receptacle and modified spacing surface or support for filter medium
456	.Prefilt flow distributor or diverter
457	.With central pervious tubular receiver
458	..Plural concentric receivers
459	.Pipe or plate attached type
460	..Attached to open end of pipe
461	...Spaced wall-type element
462	...Pipe is connection to plate
463	...Inserted holder
464	.Portable receptacle draining type
465	..Cooperating handles on receptacle and drainer
466	..Receptacle spout
467	...Within receptacle proper
468	...Spaced from spout discharge
469	..On or adjacent receptacle upper edge
470	.Handled
471	..Ring type
472	.Vented
473	.Resting on supporting receiver, e.g., portable
474	..At upper edge of filtrate receiver
475	...Filter offset in cover
476	...Telescoped receivers or receiver sections
477	..Resting on internal stop or surface
478	...Unitary filter medium and radially expandable retainer
479	...Inner separate retainer
480	....With contractor for expandable retainer
481	...Longitudinal retainer or guide, (e.g., reflex coffee maker)
482	..At lower end or prefilt receiver
483	.Supported, shaped or superimposed formed mediums
484	..Medium within foraminous supporting container or sheath
485	..External cage-type support
486	..Spaced wall type, e.g., hollow leaf
487	...Concentric, convolute or pleated
488	..Abutted or superimposed members
489	...For series flow
490	....Integral or coated layers
491	.....All fibrous
492	...Alternating dissimilar
493.1	..Pleated
493.2	...Bonded end caps
493.3	...Rectangularly shaped
493.4	...Spirally formed
493.5	...Filter element
494.1	..Convolute
494.2	...Metal
494.3	...With edge spacer
495	..Single ring or closed frame type
496	..Bound, fused or matted, e.g., porous shapes, sponges, etc.
497.01	..Cylindrical, conical, or trough shape
497.1	...Helically wound
497.2	...Filter blank
497.3	...Conical
498	..Perforated or grooved plates
499	..Screens, e.g., woven
500.1	.Material
500.21	..Semipermeable membrane
500.22	...Isotropically pored
500.23	...Hollow fiber or cylinder
500.24	...Antithrombogenic coating or membrane
500.25	...Metal containing
500.26	...Glass
500.27	...Organic

	FILTER
	.Material
	..Semipermeable membrane
	...Organic
500.28	....Cyclic
500.29	.....Cellulosic
500.3	......Cellulose acetate
500.31	.......Cellulose diacetate
500.32	.......Cellulose triacetate
500.33	.....Homocyclic
500.34	......Styrene
500.35	....Acrylate
500.36	....Alkene other than vinyl
500.37	....Amine
500.38	.....Amide
500.39	......Imide
500.4	....Carbonate
500.41	....Sulfone
500.42	....Vinyl
500.43	.....Acrylonitrile
501	..Sterilizing or neutralizing agent containing
502.1	..Sorptive component containing
503	..Diverse granular or fibrous
504	...With adhered coating or impregnant
505	...Including fibers
506	..Coated or impregnated, e.g., adhesively bound
507	...Fabrics
508	...Fibrous
509	....Inorganic
510.1	..Porous unitary mass
511	LIQUID AS SEPARATING MEDIUM
512.1	TANGENTIAL FLOW OR CENTRIFUGAL FLUID ACTION
512.2	.Multiple cyclone
512.3	.With movable means affecting flow
513	GRAVITATIONAL SEPARATOR
514	.Portable invertible, e.g., milk and cream separator
515	..Selective withdrawal of constituents
516	..Resilient deformable isolator
517	...Hinged to handle
518	..Sectional isolator
519	.Material supply distributor
520	..Rotatable
521	.Superposed compartments or baffles, e.g., parallel plate type
522	..Each with lighter constituent discharge
523	.Mechanical constituent mover
524	..Diverse serial
525	..Scum sediment removal
526	..Endless belt or chain
527	..Rectilinearly movable supporting means
528	..Horizontally rotating scraper
529	...Polygonal container and correlating mover
530	...Tank rim-supported carriage
531	...Elevatable scrapers
532.1	.Heavier constituent trap, chamber, or recess
532.2	..Septic tank
533	..Closure or valve controlled discharge
534	...In sloping recess
535	....Downstream of separator
536	...In side wall of separator
537	...With discharge means for two or more lighter constituents
538	.Lighter constituent trap
539	..Gas vent or bypass
540	..With discharge port
541	ADJUNCTS
542	MISCELLANEOUS

CLASS 212 TRAVERSING HOISTS

DECEMBER 1990

146 HAVING MEANS TO PREVENT OR DAMPEN LOAD OSCILLATIONS
147 .Antisway
148 ..By triangulation of cables on movable boom
149 HAVING MEANS TO SENSE A RANDOMLY OCCURRING CONDITION TO CONTROL STOPPING OR DISABLING MEANS
150 .And means to calculate moment produced by load
151 .Responsive to boom overtravel or proximity to powerline
152 .Hoisting stops upon load being elevated to a predetermined position
153 HAVING RANDOM CONDITION SENSOR TO REGULATE INDICATOR, ALARM, OR CONTROLLER
154 .Senses crane tilt
155 .And means to calculate moment produced by load
156 .Sensor regulates counterweight or counterbalancing means
157 HAVING MECHANICAL INDICATOR
158 .Weight indicator
159 HAVING MEANS TO ACTIVATE OR REGULATE MOTOR
160 .Remote control or dual control positions
161 .Cyclic operation
162 .Manual fluid valve actuator
163 ..And plural fluid motors
164 ...Controlled by common actuator
165 .In control cab
166 CLOSURE REMOVER
167 WITH HAUL-IN LINE
168 WITH MEANS TO PROJECT LOAD ENGAGER BEYOND END OF BOOM
169 GROUND WHEEL OPERATED
170 HAVING CLUTCH OR VARIABLE SPEED TRANSMISSION
171 .Traveling bridge
172 .Power takeoff
173 .Variable speed transmission
174 .Including means to selectively couple plural hoist functions to common power shaft
175 HAVING MEANS FACILITATING ASSEMBLY OR DISASSEMBLY
176 .Of sectional vertical support for boom
177 .Of boom sections
178 .Of counterweight from hoist
179 .Of traversing hoist from support
180 ..Vehicle support
181 ...And having motor to swing boom
182 ADJUSTABLE TO TRANSPORT OR NONUSE POSITION (E.G., COLLAPSIBLE
183 .Crane boom supported by foldable or collapsible tower
184 ..Extensible tower of relatively sliding sections
185 ..Hydraulically actuated or sectionally hinged tower
186 .Collapsible inverted "V" frame supports boom rigging
187 .Collapsible or foldable boom
188 ..Vertically swinging boom having pivoted sections
189 .Ground-engaging stabilizing means (e.g., outrigger)
190 FLOATING OR SHIP MOUNTED
191 .Including counterweight or means to compensate for list, trim or skew of vessel
192 .Having horizontally and vertically swinging boom
193 ..Cable actuated horizontally and vertically
194 ...Plural booms
195 HAVING COUNTERWEIGHT OR COUNTERBALANCING MEANS
196 .Counterweight movable relative to load support
197 ..Along rectilinear path
198 ...On wheeled carriage
199 HAVING BOOM SHIFTABLE VERTICALLY ALONG A LINEAR PATH
200 .Movable along nonvertical rectilinear path
201 .Length of hoisting cable between boom and load decreases automatically as boom is raised
202 .Vertically spaced fastening means along boom support
203 .Fluid actuated
204 .By mounting on vertically extensible support
205 TRAVELING BRIDGE
206 .Having operator support
207 .Flexible
208 .Having vertically adjustable track
209 .Supporting second traveling bridge
210 .Having plural trolleys
211 .Having vertically or horizontally swinging boom on bridge or trolley
212 .Having horizontally swingable track- or load-rotating means on trolley
213 .Having load engager mounted for guided vertical movement beneath trolley
214 .Motor fixed to bridge-supporting structure
215 .Trolley-mounted motor having cable shift
216 .Bridge-mounted motor
217 ..Hoist motor
218 .Having vertical supporting legs (e.g., gantry)
219 ..Overhanging end
220 ..Having specific engager for load
221 .Having specific engager for load
222 HAVING SNUBBER OR BOOM BACKSWING STOP
223 HAVING HORIZONTALLY SWINGING BOOM OR BRIDGE
224 .Boom mounted for guided horizontal translation (e.g., trolley mounted)
225 .Having trolley thereon
226 ..Having vertical support remote from pivot (i.e., swinging bridge)
227 ..And vertically swinging
228 ..And means acting independently of hoist mechanism to shift trolley
229 .And boom position lock
230 .Extensible by movement of boom or boom segment along longitudinal axis thereof
231 ..And vertically swinging
232 .And vertically swinging
233 ..Plural booms
234 ..With adjacent load-supporting rack
235 ..Including means for sluing boom as it is swung vertically
236 ..Including plural actuating means converging toward boom tip to effect both horizontal and vertical swinging
237 ..Including means to swing boom vertically
238 ...Fluid actuated ram
239 ...Flexible cable
240 ....Having passage for luffing cable through boom supporting member
241 ....Human or animal powered
242 ..Having specific engager for load
243 ...Grab
244 ..Ambulant or portable
245 .And means to swing boom horizontally

	HAVING HORIZONTALLY SWINGING BOOM OR BRIDGE
	.And means to swing boom horizontally
246	..Including flexible member driving gear or pulley having axis collinear with boom pivot
247	..Gear drive
248	...Including rack or worm
249	..Human or animal powered
250	.Having fluid ram directly actuating load cable or sheave therefor
251	.Having specific engager for load
252	.Having passage for hoist cable through boom supporting member
253	.Having specific bearing structure
254	.Ambulant or portable
255	HAVING VERTICALLY SWINGING BOOM
256	.And compensating means to maintain horizontal movement of load
257	.And trolley
258	.Protruding laterally from vehicle
259	.Having specific engager for load
260	.Having means to swing boom vertically
261	..Fluid actuated ram
262	..Flexible cable
263	...Human or animal powered

CLASS 213 RAILWAY DRAFT APPLIANCES

DECEMBER 1990

1 R MISCELLANEOUS
1 A ..One-shot shock absorber
1.3 COMBINED COUPLER AND ELECTRIC CONNECTOR
1.6 .With additional circuit-making or breaking means
2 LOCOMOTIVE AND TENDER
3 .Locomotive to tender
4 .Movable to inoperative position
5 ..With drawbar-lifting means
6 .Pocket type
7 CUSHIONED
8 .Continuous
9 .Combined with car end buffer
10 .Single center sill
11 .Bolster-positioned
12 .Radially movable
13 ..Vertically
14 ...Combined horizontally
15 ..Truck-controlled
16 ..Hand-controlling devices
17 ...Combined uncoupling levers
18 ..Swing head
19 ...Centering devices
20 ..Centering devices
21 ...Drawbar carriers
22 .Combined spring and friction
23 ..Preliminary spring
24 ...Shoes and wedges with casings
25 ..Springs only on draft
26 ..Differential spring compression
27 ...Rotating friction elements
28 ..Rotating friction elements
29 ..Interengaging friction springs
30 ...Plate springs
31 ..Friction casings
32 R ...Shoes and wedges
32 A .....Plural spring
32 B .....Retaining means on draft gear barrel
32 C .....Draft gear assembly
33 ....Interleaved friction plates
34 ....Compound wedges
35 ..Central friction post
36 ...Shoes and wedges
37 ..Transversely movable friction element
38 ...Transverse springs
39 ....Inwardly movable
40 R .Springs
40 D ...Interlocking parts
40 S ...Special
41 ..Varying resistance
42 ..Tension
43 ..Fluid
44 ..Multiple
45 ...Tandem arrangement
46 R ....Separate springs for buff and draft
46 A ......Draft rod through cushion
47 ....With yokes
48 .....Opposed overlying plungers
49 ...Parallel arrangement
50 .Cooperating parts fixed to car
50.5 ..Draft key retainers
51 ..Draft sills
52 ...Parallel-spring arrangement
53 ...Tandem-spring arrangement
54 ..Cheek plates
55 ...Tandem-spring arrangement
56 ..Individual-follower stops
57 ...Combined bolster casting
58 ..Striking block
59 ...Resilient
60 ...Combined drawbar carrier
61 ..Drawbar carrier
62 R .Drawbars
62 A ...Rotatable couplers
63 ..Extensions
64 ..Connections to cushion
65 ...Friction casings
66 ...Links
67 R ...Yokes
67 A .....Special
68 ....Longitudinally divided
69 ....Drawbar connections
70 .....Hooded
71 ......Pivotal
72 .....Pivotal
73 CONTINUOUS
74 RADIALLY MOVABLE
75 R COUPLINGS
75 A ..Operated by trackside mechanism
75 B ..Mine car
75 TC ..Toy train
75 D ..Magnetic
75 GT ..Glass table
76 .Combined car and air train line
77 .Counterpart
78 ..Link or bar type
79 ...Selective coupling element
80 ....Beveled link and swing catch
81 .....Arrowhead type
82 ....Hook and link
83 .....Bails
84 ....Hook and link combined
85 ....Headed link and shouldered slot
86 ....Pin and link
87 .....Swing pin
88 ...Hook and catch
89 ....Pivoted hooks
90 .....Horizontally swinging
91 ...Beveled link and swing catch
92 ....Arrowhead type
93 ...Hook and link
94 ....Bails
95 ...Hook and link combined
96 ...Headed link and shouldered slot
97 ....Rotary head or link
98 ...Pin and link
99 ....Swing pins
100 R ..Interengaging hooks and knuckles
100 W ....Willison coupler
101 ...Arrowhead type
102 ....Plural
103 ...Transversely sliding bill
104 ...Horizontally swinging
105 ....Miller hooks
106 .....Movable bill
107 ....Star wheel
108 ....Plural
109 ....Janney type
110 .....Always in coupling position
111 .....Auxiliary and emergency
112 ......Transition construction and devices
113 .....Plural-tailed knuckles
114 .....Pinless knuckles
115 .....Knuckle openers
116 ......Springs
117 ......Gravity
118 ....Knuckles
119 ......Combined locks
120 ....Vertically movable and horizontally rotatable
121 ....Vertically movable and tilting
122 ....Vertically sliding
123 ....Pivotally-attached member
124 ....Pivoted or rotatable
125 ......Lock-operated
126 ....Vertically sliding locks
127 ....And rearwardly swinging
128 ....Vertically swinging levers
129 ....Vertically swinging locks
130 ....Horizontally sliding locks
131 ......Lock-operating
132 ....Continuing movement
133 ....Horizontally rotating shaft
134 ....Pivoted levers

	COUPLINGS
	.Counterpart
	..Interengaging hooks and knuckles
	...Horizontally swinging
	....Janney type
	.....Knuckle openers
	......Lock-operating
	.......Continuing movement
135	........Sliding
136	.........Vertically
137	.......Separate movement
138	........Rotating and sliding
139	.....Gravity locks
140	......Knuckle-attached
141	......Vertically swinging
142	.......With lock set and anticreep
143	.......With lock set
144	.......With anticreep
145	......Vertically sliding
146	.......With lock set and anticreep
147	.......With lock set
148	.......With anticreep
149	.....Horizontally sliding locks
150	.....Horizontally swinging locks
151	.....Contour
152	.....Knuckle and head interengagement
153	.....Vertical disengagement prevention
154	.....Guard-arm construction
155	.....Knuckle and knuckle pins
156	.....Knuckle-pin bottom retainers
157	.....Detachable ears
158	.....Lifter and lock-hole closures
159	.....Uncoupling devices
160	......Emergency
161	......Selectively movable
162	......Pull rods, chains or ropes
163	......Interengaging levers
164	.......Vertically swinging
165	......Vertically swinging
166	......Rotating horizontal shafts
167	.......Journaled to coupler head
168	.......Directly connected to lock
169	.......Horizontal link to lock
170	.......Vertical link to lock
171	......Brackets
172	...Vertically swinging
173	....Vertical hook
174	...Rotating
	.Link or bar type
175	..Hook and catch
176	..Beveled link and wing catch
177	...Arrowhead type
178	..Hook and link
179	...Pivoted hook
180	....Multiple
181	...Bails
182	..Headed link and shouldered slot
183	...Pivoted head
184	...Rotating head or link
185	..Beveled link and sliding catch
186	...Arrowhead type
187	..Beveled link and fixed catch
188	..Pin and open link
189	...Automatic pin moving
190	....Swing pin
191	.....To coupling position
192	...Pin supports
193	....Tilting pin
194	....Gravity
195	.....Combined link lifters and supports
196	......Rollers
197	.....Pivoted latches
198	......Pin-attached
199	......Stirrups
200	....Spring
201	.....Combined link lifters and supports
202	.....Horizontally sliding
203	......Link-operated
204	.....Pivoted
205	...Link lifters and supports
206	....Opposed car
207	....Levers
208	..Links
209	...End opening
210	...Handled
211	.Uncoupling devices
212	..Central control
213	..Operable from car top or side
214	...Rotating vertical shaft
215	..Operable from car top only
216	..Rotating vertical shafts
217	..Flexible
218	..Vertically swinging lever
219	..Rotating horizontal shafts
220	CAR-END BUMPERS OR BUFFERS
221	.Resilient
222	..Car platform type
223	..Fluid
224	SIDE-TRACK PUSH RODS

CLASS 215 BOTTLES AND JARS

DECEMBER 1990

1 R	MISCELLANEOUS
1 B	..Wooden vessels
1 A	..Drinking straw
1 C	..Plastic
2	BOTTOM FILLED
3	EJECTING
4	.Siphon type
5	..Spring controlled
6	COMPARTMENT
365	CONTENT INDICATING
366	.Interior of receptacle
367	.Poison
10	NESTING
11.1	NURSING BOTTLES AND NIPPLES
11.2	.With temperature responsve indicator
11.3	.Collapsible liner or wall
11.4	.With valve for liquid
11.5	.With vent or valve for air
11.6	.With cover
12.1	MULTILAYER BARRIER STRUCTURE
12.2	.Coating or lamination
13.1	.Insulating material between spaced wall panels
14	NONREFILLABLE
15	.Air trap
16	.Ejecting
17	.Guard or valve type
18	..Valves
19	...Single type spring controlled
20	...Single type float controlled
21	...Single type gravity controlled
22	....Separate disconnected weight
23	....Pendant weight
24	....Pivoted
25	...Multiple type
26	..Guards
27	...Integral with the container
28	...Cap
29	...Fasteners
30	..Separate neck
31	NECKS
32	.Breakable
33	..Stoppers
34	...Multiple
35	..Stopper fasteners
36	...Spring
99.5	GOBLET TYPE
200	CLOSURES
201	.Having warning means or means impeding closure removal (e.g., child proof)
202	..Barbed
203	..With exhibitive feature
204	..Receptacle opening sealed by each of plural closures
205	..Closure at or forms receptacle base
206	..Having registerable indicia to facilitate closure removal
207	..With key actuated lock
208	..Multi-directional turn or twist type
209	..Closure removal includes receptacle deformation
210	..Closure removal includes receptacle tilting
211	..Closure or closure portion engagingly enters receptacle opening
212	...Expandable
213	...With movable closure removal obstacle
214	...Closure guided in simultaneous turning and reciprocating movement, e.g., threaded
215	..With provision for opening tool
216	..Flexible locking member integral with or attached to closure
217	..Closure guided in simultaneous turning and reciprocating movement, e.g., screw threaded
218	...Closure threaded to receptacle and/or rotatable closure removal obstruction
219	...Encompassing closure removal obstacle and closure engaging for concurrent movement
220	....Axially movable closure removal obstacle or obstacle portion
221	...Closure removal obstacle movable to unobstructive position
222	...Quick removal, e.g., bayonet
223	..Closure guided in sequential turning and reciprocating movement
224	..Snap-type closure
225	...With movable closure removal obstacle
226	.Substitute closure having means to remove original closure
227	.With structure for removably holding an article or material
228	.Combined or convertible
229	..With straw
230	.Including visual indicia
231	.Provided with means to purposely depress or contact receptacle contents
232	.Retained by bonding or adhesive means
233	.With hardenable liquid or plastic seal
234	.With liquid seal at closure seat on receptacle
235	.Closure pivoted about receptacle opening
236	..Pivoted at right angle to plane of closure
237	..With fastening means
238	...Cam type
239	...Closure mounted on lever-actuated yoke
240	....With specific closure structure
241	.....Yoke-receiving slot or hole
242	....Lever bears directly on closure
243	...Screw-type clamp or threaded
244	...Spring type
245	....Catch or hook type
246	.Shrinkable closure, fastener or seal
247	.Self-sealing, piercable-type closure
248	..With vent and air filter means
249	..With frangible cover portion
250	.Frangible member or portion
251	..Outer closure breaks or tears away to expose second closure
252	..Twist off motion frees reusable closure
253	..About line or point of weakness
254	...Tear strip
255	....With nonintegral actuator, e.g., attached pull ring
256	....Line of weakness extends circumferentially of receptacle mouth opening
257	..With cutting or tearing means, e.g., wire or string rip cord
258	.Closure removal causes portion thereof to remain with receptacle
259	.Gas passes through a liquid
260	.With pressure responsive valve
261	.Barrier permeable to gas and impermeable to liquid
262	.With vacuum breaker
263	.Nonresealable, nonremovable closure
264	.Applied from within receptacle
265	..Plural closures
266	..Ball type
267	..With manipulator
268	...Wire
269	.Having an inflatable member
270	.With pressure-responsive seal
271	.Closure expands responsive to internal receptacle pressure

	CLOSURES
272	.Cap type with manually actuated means to contract depending skirt part
273	.With separate applied fastener to hold closure in closed portion
274	..Ring type
275	...Contracting
276	...Screw
277	..Cap-type fastener
278	...Bound or tied
279	..Expanding fastener
280	..Clamping fastener
281	...Inclines to interrupted threads
282	....Spring-type clamp
283	...Screw actuated
284	...Lever actuated
285	....Bail
286	...Bail type
287	...Spring
288	....Coil
289	....Closure engaging spring arm hinged to receptacle or support thereon
290	....Spring clip traverses closure, with depending ends thereof diametrically gripping receptacle exterior
291	...Flexible tie
292	..Disk exerts radial force against cup-shaped closure within receptacle mouth or neck
293	.With attached nonintegral spring-type clamping fastener engaging exterior receptacle surface
294	.Stopper with attached, nonintegral clamp means engaging interior receptacle surface
295	.With means to facilitate closure removal
296	..Stopper-type closure
297	...Piercing-type closure extractor
298	...Disk-type closure with finger-engageable projection
299	...Permanently secured in stopper cavity
300	....Cavity extends circumferentially of stopper surface
301	..Actuated by downwardly applied force
302	..Tool engaging means or closure or receptacle
303	..Separate opening means associated with closure
304	...Lever-type, pry-off means
305	..Hand or finger engageable projection
306	.Retainer, e.g., closure tethered to receptacle
307	.Receptacle interior communicable with exterior with closure in applied position, e.g., vented
308	..Communicating through a filter
309	..With separate inlet and outlet passages
310	..Communicable through small, openable aperture in disk-type closure
311	..With valve
312	...Ball type
313	...Rotary type
314	...Screw actuated
315	...Spring actuated
316	.Cap type
317	..Resilient distortion of closure skirt holds it in closed position
318	...Push on, twist off
319	...Specifically designed to accommodate plural sizes
320	...Combined with stopper structure
321	...Closure and receptacle having preformed, coacting configurations
322	..Slidable transverse to receptacle opening axis
323	..Skirt made of separate strip bent into cylinder
324	..Crimped flange or skirt portion
325	...Closure portion engagingly enters receptacle mouth
326	...Flexible material, e.g., paper or foil
327	...Crimp deforms seal against receptacle
328	...With vertical corrugation, e.g., crown cap
329	..Removably attached to receptacle by relative rotation between keepers, e.g., screw threads or lugs
330	...With means to prevent unintentional rotation in closure releasing direction
331	...Projection engages keeper to stop rotation in closure applying direction
332	...Keeper has vertically and horizontally extending slots, e.g., bayonet
333	...Keeper formed by bend in bead encircling lower edge of cap skirt
334	...Keeper formed only on inner wall of double wall cap or consists of separate member on cap
335	...Keeper consists of separate member on receptacle
336	...Keeper consists of tab or strip struck from cap skirt
337	...Cap skirt impressed with circumferential inclined keeper indent, or with circumferentially spaced keeper indents
338	...Keeper shaved from inner surface of cap skirt
339	...Keeper formed by inward facing beads spaced along lower edge of cap skirt
340	...Keeper formed by horizontal flange projecting inward from lower edge of cap skirt
341	..With identifiable, integral or separate gasket, seal or liner
342	...Spring biased
343	...Depending sealing rib engages receptacle top
344	....Integral with closure
345	....Rib on seal ring
346	...Seal locks closure to receptacle
347	...Distinct layers
348	...Foam
349	...Disk
350	....Closure structure retains disk
351	....Annular depending deformation on closure engages disk
352	...Ring
353	..Having flaired skirt
354	..Closure portion engagingly enters receptacle mouth
355	.Stopper type
356	..Removably attached to receptacle by rotation, e.g., screw threaded or lugged
357	...Interrupted threads
358	..Expanding type
359	...Cam or lever actuated
360	...Screw actuated
361	...Stem operated
362	...Permanently deformed
363	..Disk type
364	..Composite
100 R	ATTACHMENTS
100 A	..Handles
100.5	.Condensate or drip collection
101	.Clip

10.61 R	..Webs, strands or sheets
10.61 A	....Godets
10.63	..Shoes
10.65	.Fluent material
10.67	.With article or material support
10.69	..Conveyer
10.71	...Plural heating zones
10.73	..Article or material manipulator (e.g., pressure applicator)
10.75	.Inductive heating systems
10.77	..With automatic control
10.79	.Inductors
10.81	.Electrodes
50	METAL HEATING (E.G., RESISTANCE HEATING)
51	.Chain
52	..Methods
53	.Rail bond
54	..Arc weld
55	..Resistance weld methods
56	.Wire, rod or bar bonding
56.1	..Of wire leads
56.21	...By microbonding
56.22	...Methods
57	..Butt bonding (e.g., welding)
58	..Methods
59.1	.Of cylinders (e.g., pipes and tubes)
60 R	..Electric arc
60 A	....Rotatable tube welders
60.2	...Tube sheet welding
61	...Methods
61.1	..Having internal support means
61.11	...With forming means
61.12	...With cleaning means
61.13	...With edge guidance means
61.2	..Utilizing high frequency resistance heating
61.3	..With edge guidance means
61.4	..With adjustable electrode means
61.5	..With condition responsive control of the welding process
61.6	..Using three or more electrodes
61.7	..With cooling means
62	..Helical seam
63	..Rotary transformer part
64	..Container (e.g., cans)
65	..Nonrotary electrode (e.g., oscillating)
66	..Inside electrode
67	..Resistance heating methods
68	.Cutting or disintegrating (e.g., machining engraving)
69.1	..Electric arc
69.11	..Electric spark machining
69.12	...Wire cutting
69.13	...Circuits
69.14	...Dielectric composition and purification
69.15	...Electrodes
69.16	...Gap spacing control
69.17	...Methods
69.18	...Pulse
69.19	...Safety circuits
69.2	...Vibrating electrodes or workpiece
70	...Hand-type tools
71	.Liquid electrode
72	.Nonatmospheric environment at hot spot (e.g., resistance weld under oil, vacuum)
73	..Slag (e.g. submerged arc)
73.1	...Including electroslag welding
73.11	....For coating
73.2	...With granular flux supply
73.21	....For deposition welding
74	..Gas supply (e.g., by ingredient of electrode, by external source)
75	...Nonconsumable electrode (e.g., atomic hydrogen)
76.1	.For deposition welding (e.g., coating or building up)
76.11	..With cooling means
76.12	..Of multiple distinct layers
76.13	..By spark discharge
76.14	..By electric arc
76.15	...With nonconsumable electrode
76.16	...Plasma
76.17	..By resistance heating
77	..Cutting edges of tools
78.01	.For bonding with pressure (e.g., resistance welding)
85.1	..Brazing or soldering
85.11	...Utilizing induction heating
85.12	...Utilizing radiant energy
85.13	....Methods
85.14	...With filler metal in circuit
85.15	....Methods
85.16	...Electrically heated tool (e.g., electrodes, heaters, etc.)
85.17	...Furnaces or enclosures
85.18	...Wire lead bonders
85.19	...Machine for predetermined operation
85.2	...Fluxes or solders
85.21	...Solder preforms
85.22	...Methods
78.02	..By solid-state bonding (e.g., diffusion)
78.11	..Honeycomb
78.12	...Methods
78.13	..With additional heating device
78.14	..With work cleaning means
78.15	..With work cutting means
78.16	..With work deforming means (e.g., tube sealing)
79	..With conveyer for workpiece
80	...Spot bond
81	..Roller electrode
82	...Roller moves over work
83	...Methods
84	...Electrode structure
86.1	..By spot bonding
86.21	...With hand-manipulative portable devices
86.22	...With separately applied pressure and heat
86.23	...With welding pressure controlled by the work support
86.24	...With work orientation means
86.25	...With significant electrode support
86.31	....Having cooling means

	METAL HEATING (E.G., RESISTANCE HEATING)
	.For bonding with pressure (e.g., resistance welding)
	..By spot bonding
	...With significant electrode support
86.32	....Having magnetic force actuated electrode
86.33	....Having adjustment means
86.41	.....With condition responsive control means
86.51	......Responsive to pressure
86.61	.......By force balancing
86.7	.....For predetermined welding operation
86.8	....Having interchangeable welding electrodes
86.9	...For one-face welding
87	...Multiple spot type
88	...Electrode positionable along fixed bus bar (e.g., reaction bar type)
89	...Fluid pressure actuated electrode
90	...Plier or tong type
91.1	...With condition responsive control of the welding process
91.2	...Methods
91.21	....Of welding through insulation
91.22	....With additional heating to same spot
91.23	....With work deforming
92	....Current limitation (e.g., by interposed insulation)
93	.....By localized projection
94	.....By interposed button
95	..Percussive
96	...Methods
97	..Flash
98	...Stud
99	....Methods
100	...Methods
101	..Butt
102	...Extended seam
103	...One part fed
104	...Methods
105	....Preparation of edges
106	....By use of a bridging member (e.g., splice plate)
107	....End or edge to surface
108	..Systems of current supply
109	...With indicator (e.g., recorder)
110	...Controlled in response to current, voltage or temperature
111	...Repeat or interrupted current systems (e.g., multiple welds, multiple-heated weld)
112	...Stored energy discharge (e.g., inductive)
113	....Condenser discharge
114	...With space-discharge tube control (e.g., thyratron, ignitron)
115	...Synchronous switching on and off
116	...With transformer
117.1	..Methods
118	...Particular material (e.g., dissimilar, aluminum)
119	..Electrodes (e.g., structure)
120	...With cooling
121.11	.By Arc
121.12	..Using electron beam
121.13	...Welding
121.14	....Methods
121.15	...Deposition (e.g., Sputtering)
121.16	...Melting
121.17	....Methods
121.18	...Cutting
121.19	....Etching or Trimming
121.2	.....Methods
121.21	...Chamber
121.22	....Sealing
121.23	....Monitoring
121.24	...Nonvacuum environment
121.25	...Shaping
121.26	....With focusing
121.27	....With electrode or gun structure
121.28	...Position control
121.29	....Swept or scanned
121.3	....Condition responsive
121.31	...Workpiece position control
121.32	....Condition responsive
121.33	...With fluid supply (e.g., shielding gas or coolant)
121.34	...Power Supply
121.35	...Methods
121.36	..Using plasma
121.37	...Melting
121.38	....Methods
121.39	...Cutting
121.4	....Etching
121.41	.....Methods
121.42	.....Rate control
121.43	.....With chamber
121.44	....Methods
121.45	...Welding
121.46	....Methods
121.47	...Spray coating
121.48	...Plasma torch structure
121.49	....Cooling system
121.5	....Nozzle system
121.51	....Gas supply system
121.52	....Electrode structure
121.53	....Consumable electrode
121.54	...Control systems
121.55	....Gas supply
121.56	....Arc positioning
121.57	....Arc ignition
121.58	...With work holder
121.59	...Methods
121.6	..Using laser
121.61	...Beam energy control
121.62	....Condition responsive
121.63	...Welding
121.64	....Methods
121.65	...Melting
121.66	....Methods
121.67	...Cutting
121.68	....Etching or trimming
121.69	.....Methods
121.7	....Hole punching
121.71	.....Methods
121.72	....Methods
121.73	...Shaping
121.74	....With mirror
121.75	....With lens
121.76	...Multiple beams
121.77	....With sing source
121.78	...Beam position control
121.79	....Path adjustment
121.8	....Swept or scanned
121.81	....Condition responsive
121.82	...Workpiece position control
121.83	...With monitoring
121.84	...With fluid supply
121.85	...Method
121.86	...Chamber
122	..Control of arc direction
123	...Magnetic
124.01	..With ignition by retraction
124.02	..With gap control
124.03	...By arc voltage
124.1	..With automatic positioning of arc
124.21	...Including work cutting
124.22	...In response to work shape
124.31	....Having carriage supported by work
124.32	....Having variable welding head travel rate (e.g., gravity feed)
124.33	....Having electrode angle control
124.34	....By using probe means
124.4	...In response to work position

METAL HEATING (E.G., RESISTANCE HEATING)
.By Arc
..With automatic positioning of arc
124.5 ...In response to the transfer rate of the weld metal
125.1 ..With predetermined welding operation
125.11 ...For closed path welding (e.g., circumferential welding)
125.12 ...For oscillating electrode welding
126 ...Vertical work (e.g., horizontal seam in vertical wall)
127 ..Spot arc bonding (e.g., arc riveting)
128 ..With working of bonding metal (e.g., by peening)
129 ..Brazzing or soldering
130.01 ..Including circuits for monitoring arc parameters
130.1 ..Including arc-power supplies
130.21 ...With automatic output control (e.g., shortcircuit, infrared)
130.31 ....Responsive to arc voltage only
130.32 ....Responsive to arc current only
130.33 ....Responsive to both arc voltage and arc current
130.4 ...With arc ignition and stabilization arrangements
130.5 ...With predetermined time variation of arc voltage or current (e.g., programmed)
130.51 ....Pulsating or periodic output
132 ...Remote control
133 ...With generator (e.g., gas engine driven)
134 ....Electric motor driven
136 ..Welding
137 R ...Process
137 PS .....Power supply
137 WM .....Weld metal composition
137.2 ..With consumable electrode device
137.31 ...Gun
137.41 ....Having fume extractor
137.42 ....Having gas flow limiting shape (e.g., gas diffuser)
137.43 ....Having spatter shield
137.44 ....Having integral electrode guide
137.51 .....With flexibility
137.52 .....With wear resistant liner
137.61 ....Having filler electrical contact structure
137.62 ....Having cooling means
137.63 ....Having supply connection means (e.g., quick disconnect)
137.7 ...Rate control
137.71 ....Circuits
137.8 ...Including filler wire deforming
137.9 ...Supply cables (e.g., for current, shielding gas, coolant)
138 ..Electrode holder (e.g., spring biased tong)
139 ...Plural adjustable electrodes (e.g., hand torch)
140 ...Spring jaw (e.g., sprung by electrode)
141 ....With separate actuator
142 ...Plunger jaw (e.g., screw actuated)
143 ....Spring biased
144 ...Positive grip
145.1 .Weld rod structure
145.21 ..Nonconsumable
145.22 ..Flux cored
145.23 ..Flux coated
145.31 ...Partially
145.32 ...With wire wrap
145.41 ..Nonmetal cover
146.1 .Weld rod composition
146.21 ..Nonconsumable
146.22 ..Nonferrous
146.23 ..Containing nickel, chromium, and iron
146.24 ..Metal deoxidizer or denitrogenizer
146.3 ...Particulate
146.31 ..Particulate
146.32 ...Alloying
146.41 ....Nickel or chromium
146.51 ...Containing carbide
146.52 ...Shielding
147 ..With eye shield
148 .Bonding
149 .With forging or shaping (e.g., of powder)
150 R ..Upsetting
150 V ....Riveting
151 ...Anvil electrode
152 ...Simultaneous with heating
153 ..Bending or twisting
154 ..Subsequent to heating
155 .Endless strip
156 .Rods and bars
157 .Rivets
158 .Work holders
159 ..Rotating supports
160 ..Mandrels (e.g., anvil)
161 ..Clamp
162 .Methods
200 HEATING DEVICES
201 .Combined with diverse-type art device
202 ..Vehicle or vehicle component
203 ...Windshield or window
204 ...Steering device
205 ...Motor or engine
206 ....Manifold
207 ....Carburetor
208 ....Radiator or cooling system
209 ..Electrical devices
210 ...Crystal or other vibratory device
211 ..Apparel
212 ..Bed covering (e.g., blanket)
213 ..Static structure (e.g., building pavement, etc.)
214 ..Vending, dispensing or display device
215 ..Shoe machinery
216 ..Printing or reproduction device
217 ..Chair, bed or other body-supporting means
218 ..Table or cabinet
219 ..Mirror
220 ..Light means
221 .Tool or instrument
222 ..Hair heaters
223 ...Singeing apparatus
224 ...Electrolytic
225 ...With heated clamp means (e.g., hand-held)
226 ...With heated casing
227 ..Hand-manipulative
228 ...With heat distribution means (i.e., heat applied to extended area)
229 ...With heated tip or other heat concentration means (i.e., heat applied to localized area)
230 ....With tip cooling, clamping or lighting means
231 ....Convertible
232 ....Internal arc-type heating unit
233 ....Tip in electrical circuit
234 .....Work in circuit
235 .....With transformer secondary
236 ....Coil or loop-type heating element
237 .....Integral with tip
238 .....Detachable tip
239 ......Threaded
240 ...With power supply, voltage or current control, or connection and/or disconnection means
241 ....With thermal control means
242 ...Supports

HEATING DEVICES
243 .Combined with pressure application means
244 ..Rotatable
245 ..Sole plate type pressure application means (e.g., flatiron)
246 ...Combined with stand
247 ....With complementary electrical connector means to external circuit terminating in stand
248 ...With condition-responsive indicator
249 ...Convertible
250 ...With power supply, voltage or current-control means
251 ....Thermally responsive
252 .....Adjustable
253 .....Comprising fusible metal, expansible liquid or bar means
254 ...With heating unit structure
255 ....Plural heating units
256 ...With electrical circuit completion or terminal structure
257 ....Automatically operated
258 ...With heat storage, exchange or reflector means
259 ...Supporting devices
260 .Resistive element igniter type
261 ..With blower, suction or other ignition facilitating means
262 ..With current control or external circuit connection or disconnection means
263 ...Automatic
264 ....Thermally responsive
265 .....Bimetallic or other flexible means
266 ...Resilient means
267 ..With housing casing or support means for igniter unit
268 ..With source of power or current
269 ..With indicating means
270 ..With igniter unit structure

Class 392 is an integral part of Class 219 as shown by the position of this box. This Class 392 provides for electrical resistance heating devices.

383 .Electric arc type devices
384 ..With perforating or disintegrating means
385 .Combined with container, enclosure or support for material to be heated
386 ..Portable or mobile
387 ...Food conveying type (e.g., lunch box)
388 ..With means whereby material to be heated may be passed continuously through heated area (e.g., conveyor)
389 ..Revolving enclosure
390 ..Muffle-type enclosure
391 ..Oven type
392 ...Combined with additional material support
393 ...Oven performs plural diverse functions
394 ...With plural ovens
395 ...With plurality of separate heating units
396 ....Of diverse construction or functioning in diverse manners
397 ....Of different resistive values
398 ....Selectively energized
399 ...With heat energy transfer, distribution or accumulator means
400 ....By convection
401 ...With steam generating means
402 ...With casing or support for heating unit or units
403 ....Retractable or detachable (from heated enclosure)
404 ....Hinged or adjustable (within the heated enclosure)
405 ....Including heat energy reflecting or directing means
406 ...With resistance heating means surrounding heating area
407 ....Embedded within or between walls of container
408 ...With resistance heating unit or units fixed enclosed by or located within heating area
409 ...With heating unit structure or composition
410 ....With plural section heating element
411 ....With infrared generating means
412 ...With current or voltage control or regulating means
413 ....Automatically responsive to condition of heating area
414 ...With switch or other external circuit completing means
415 ..Deep well
416 ...Convertible
417 ...With plurality of separate heating units
418 ...With adjustable position heating unit or units
419 ...With current control or external circuit opening or closing means
420 ..Crucible or furnace type (i.e., adapted to hold meltable material)
421 ...Melting pot
422 ...With plural separate heating units
423 ...With protection means for heating unit or switch
424 ...With resistance heating element surrounding or embedded within walls of container
425 ...With current or voltage control means
426 ...With significant heating unit structure or composition
427 ....Container comprises resistance heating element
428 ..Plural containers
429 ..With vessel and stand
430 ...With heat storage or transfer means
431 ...With pressure generating or maintaining means
432 ...Vessel separable from stand
433 ...With heating unit unitary with or attached to the stand
434 ....Adjustable relative to vessel or stand
435 ...With external electrical circuit connection or disconnection means
436 ...With heating unit attaching or support means
437 ....Immersible
438 ..With vessel
439 ...With heat storage or transfer means
440 ...With pressure generating or maintaining means (e.g., pressure cooker)
441 ...With temperature or current control means
442 ....Adjustable
443 ..Exposed horizontal planar heating surface (e.g., hot plate type)
444 ...With stowaway or concealing means
445 ...With plural individual heating units or elements
446 ....Selectively activated
447 ....Detachable or interchangeable
448 ...With electrical voltage or current regulation or control means
449 ....Thermally responsive

HEATING DEVICES
.Combined with container, enclosure or support for material to be heated
..Exposed horizontal planar heating surface (e.g., hot plate type)
...With electrical voltage or current regulation or control means
....Thermally responsive
450 .....In direct contact with material to be heated
451 ...With external circuit connection or disconnection means
452 ....Automatically operated
453 ....With circuit condition indicating means
454 ...Convertible (e.g., acts as heating unit for oven)
455 ...Self-supported heating unit adapted to furnish material support
456 ....Adjustable to shape of material to be heated
457 ...Heating unit embedded within or unitary with material support
458 ...With housing, casing or support means for heating unit
459 ....Combined with material support surface
460 ....With thermal insulation or ventilating means
461 ....With heat energy reflecting or deflecting means
462 ....With heat energy storage, transfer or exchange means
463 ....With heating unit attachment or securing means
464 ...Planar heating surface or particular material or structure
465 ...With heating unit structure
466 ....Comprising plural resistive elements
467 ....With element-attaching or supporting means
468 ....With resistance element structure or material
469 ..Cylindrical or roller-type support for material to be heated
• 470 ...With plural heating units
471 ...With external electrical circuit completion means
472 .Plural functions simultaneously or convertible
473 ..To nonheating device
474 ..To diverse-type electric heating device
475 .With plural heat utilization means (single heater)
476 .Plural separate heating devices
477 ..With common power supply or current control means
478 ..With unitary housing, support or casing means
479 ..Diverse type (each electric)
480 ..Selectively activated
481 .With protective means for heater
482 .With power supply and voltage or current regulation or current control means
483 ..Controlling or regulating plural separate distinct heating resistance elements(i.e., one control system for all elements)
484 ...Of diverse resistance characteristics or value
485 ...With total current or power limiting means
486 ...Selectively, sequentially or alternately
487 ....With indicator means
488 ..With voltage limitation, conversion or adapting means
489 ..Combined manual and automatic regulating or control means
490 ..Automatic regulating or control means
491 ...Combined (e.g., electro-mechanical and thermal)
492 ...Comprising timing or cycling means
493 ....Electro-mechanical
494 ...Thermally responsive
495 ....Thermomagnetic
496 ...Pressure responsive
497 ...Comprising voltage and/or current measuring and comparing or combining means
498 ....Including follow-up servo means
499 ....Including bridge means
500 ...Including electron or glow-discharge tube means
501 ...Including semiconductor means (e.g., transistor)
502 ...Utilizing light-sensitive and/or responsive means
503 ...Inductive reactor means (e.g., auto transformer)
504 ...Comprising variable resistance means
505 ....Comprising nonlinear or negative temperature coefficient resistance means
506 ...With signal or indicating means
507 .With current connection and/or disconnection means (e.g., switch)
508 ..Plural means intermittently or selectively operated
509 ..Automatically operated
510 ...Thermally responsive
511 ....With auxiliary heating means for thermal switch means
512 ....Comprising linearly expansible metal
513 ....Comprising expansible fluid (e.g., alcohol or mercury)
514 ....With solenoid means
515 ....Adjustable means
516 ....Insertable into or in direct contact with heated material
517 ....Fusible link
518 ...Responsive to weight, position or presence of body to be heated
519 ...Including electromagnetic relay means
520 .With heater-unit housing, casing or support means (e.g., frame and single sheet)
521 ..Including or comprising holding or support means for material to be heated
522 ..Housing, casing or support performs plural diverse functions (e.g., window)
523 ..Housing, casing or support insertable into material or space to be heated (e.g., immersion type)
524 ..Comprising hinged or separable compartment (e.g., waffle iron type)
525 ...With plurality of or sectional heating means
526 ..With means for attaching housing or casing to an external device (e.g., magnetic or vacuum)
527 ...Body-supported (e.g., human body)
528 ..Flexible or resilient (e.g., warming pad)
529 ...Cloth or other fabric
530 ..With heat storage or transfer means (vanes) •
531 ..With thermal insulation or cooling means
532 ..With open frame or grid-type support
533 ..Portable (e.g., with handle)

	HEATING DEVICES
	.With heater-unit housing, casing or support means (e.g., frame and single sheet)
534	..Rigid tubular housing, casing or support (e.g., flattened tube)
535	..Specially formed or adapted to fit material to be heated (e.g., a pipe)
536	..With heating unit mounting or attaching means
537	...Plural units combined with single casing housing or support
538	.With heating unit structure
539	..Comprising plural separate and distinct resistive elements
540	..With heat storage or transfer means (e.g., fins or plate)
541	..With terminal or connector means (e.g., to external circuit means)
542	..With resistive-element attaching, securing or electrical insulation means
543	...Comprising coating printed or deposited on core sheath or support means
544	...Element embedded within or completely surrounded by core, sheath or support means
545	...Resistive element interwoven with fabric support
546	..Core, sheath or support means for heating element
547	...Comprising material to be heated
548	...Of particular construction or material
549	....Flexible
550	....Sectional or interconnectable insulator means
551	....Gasket or wafer-type insulator means
552	..Heating element structure
553	...Of particular construction and/or material (e.g., infrared generator)

560	FLOATING CONTAINER
561	CONTAINER HAVING RECONDITIONED OR RECONDITIONABLE END WALL
562	VEHICLE MOUNTABLE TANK
563	.With baffle
564	.Compartmented
565	STATIONARY TANK
566	.Toroidal (i.e., doughnut shaped)
567	.Elevated (e.g., municipal water tank)
568	COCKTAIL SHAKER
569	MILK CAN
570	PAINT TRAY
571	DRAIN PAN OR DRIP PAN
572	.With article drying support (e.g., dish-rack pan)
573	.For a vehicle
574	TABLE DISH (E.G., PLATE, BOWL, PLATTER, ETC.)
575	.Compartmented table dish
576	SMOKING STAND
1.5	FREIGHT CONTAINERS
2	COAL RECEPTACLES
2.1 R	ENVELOPE FOR ELECTRIC LAMP OR SIMILAR DEVICE
2.1 A	..TV tube
2.2	.With evacuating stem or valve
2.3 R	.Partly of conducting material
2.3 A	...TV tube
3	HIGH-PRESSURE-GAS HOLDERS
3.1	THERMAL MATERIAL
3.2	OUTLET OR JUNCTION BOX TYPE
3.3	.Wall, floor, or panel mounted
3.4	..Concrete, lath or plaster engaging means
3.5	..In opening
3.6	...Opposed engaging means
3.7	.With adjustable parts
3.8	.With closure
3.9	.With support
3.92	..Sectional receptacle
3.94	.Sectional receptacle
4.01	SECTIONAL
4.02	.Electrical housing
4.03	.Extension
4.04	.Barrel-shaped container
4.05	..Formed of thermoplastic material
4.06	..Comprising only two similar cup-shaped sections
4.07	...Separable sections
4.08	..Knockdown
4.09	...Separable sidewall and end walls
4.11	....Sidewall formed of separable stave-like parts
4.12	.Tank for fluids
4.13	..Formed of thermoplastic material
4.14	..Vehicular fuel tank
4.15	...Removable aircraft fuel tank
4.16	..Knockdown
4.17	...Bolted construction
4.21	.Container formed of only two similar sections
4.22	..Sections hinged together
4.23	...Hinge integral with sections
4.24	..Identical halves
4.25	...Hemispherical sections
4.26	.Stacked or aligned similar sections
4.27	..Sections are container units
4.28	.Knockdown
4.29	..Sidewalls vertically hinged to each other
4.31	..Sidewalls slide vertically to engage each other
4.32	..Sidewall slides horizontally to engage the base
4.33	..Removable fastening element
4.34	...Retaining pin extends through aligned openings in knuckle-like elements
6	.Folding
7	..Fastening members
8	.Telescoping
9.1	FLACCID WALL MATERIAL PERMANENTLY UNITED WITH A SKELETAL FRAMEWORK
9.2	.Collapsible or foldable framework
9.3	..Laterally collapsible or foldable
400	WITH SEPARABLE LINER OR ENCASEMENT
401	.Skeleton encasement (i.e., outer lattice work)
402	.Including shield for liner
403	."Flexible" or "flaccid" liner
404	..Supported at open terminus (e.g., bag, sack)
405	..Plate or tray-type (e.g., foil ash-tray, paper dish)
406	...Plural stack or nest
407	..With liner supply
408	.Erected liner for erected container
409	..With liner lifter mechanism
410	..Nonmetallic liner
411	..Prefilled "can"-type
412	..."Hot", "cold", "insulated" chest-type
413	....With specified liner retainer
414	FILAMENTARY WOUND BARRIER STRUCTURE
415	MULTILAYER BARRIER STRUCTURE
416	.Folded single blank-type
417	..Including coated layer
418	..Plural lamina blank
419	..Metallic blank
420	.Evacuated space between layers
421	..With intermediate insulating means
422	...Fluent material
423	...Plus distinct reflector means
424	..With intermediate reflector means
425	..Layer-space-layer only
426	.Fluid-filled space between layers (fluid other than "dead" air)
427	..Compartmented dish or tray (e.g., baby server)
428	..Water or steam
429	.Intermediate fluent mass layer (e.g., powder, loose hair, particles, etc.)
430	.Separate edge-bridge (e.g., "breaker-strip")
431	..Spaced wall-contacting
432	...With fastener means
433	....Pronged bridge
434	.Separate resilient fastener
435	.Specified structure for relative layer movement
436	..Articulated layer members
437	..Distinct nonlayer member
438	...With corrugated layer
439	...Plural slip elements
440	..Corrugated layer
441	.Including a corrugated layer
442	..Metallic corrugation
443	..Coextensively bonded
444	.Intermediate foamed-in-situ layer
445	.Specified spacer means (nonlayer)
446	..Adjacent an open and/or neck-like portion
447	...And a closed-end spacer
448	..Resilient
449	.Pliant wrapper supported by content
450	.Including a foil layer
451	.Including asbestos filler
452	.Including a batt layer
453	.Coextensively bonded self-sustaining layers
454	.Specified coated or impregnated layer (e.g., dipped, sprayed)
455	..External
456	..Specified plural coatings
457	..Specified nonmetal coating
458	...Compatible with food content
459	...Hot water boiler-type

MULTILAYER BARRIER STRUCTURE
460 .Including flaccid veneer-like layer (e.g.,cloth, paper)
461 .."Plastic" (e.g., polyethylene, rubber, latex, etc.)
462 ...Within erected blank
463 ..Within erected blank
464 .Intermediate self-sustaining panel
465 .Including specified barrier aperture fitting (e.g., flange, bung)
466 .Double-walled barrel or drum-type
467 .Refrigerator cabinet-type
468 .Plural self-sustaining layers
469 .Spaced walls
470 LINING PER SE
17.1 LEG OR LAP SUPPORTED
17.2 .Bail ear engaging or integral therewith
17.3 .With pail encircling band or ring
475 POLE OR ROD SUPPORTED CONTAINER
476 WALL SUPPORTED CONTAINER
477 .Recessed wall mounting
478 .Container pivotally attached
479 ..Container pivots through or over wall
480 .Detachably supported container
481 ..Separate support means secured to wall
482 ..Container has hook means engaging wall upper edge
483 ..Suction cup or magnetic support structure
484 IN GROUND, NONTANK CONTAINER (E.G., METER BOX, GARBAGE CAN, ETC.)
485 WIRE CONTAINER
486 .Compartmented
487 ..Dish holding (e.g., dish rack)
488 ...Dishwasher rack
489 .Adjustable or contortable wall provides multiple configurations of use (i.e., alternative shapes)
490 .Spiral sidewall
491 .Rigid wire bent to form portion of bottom wall and sidewall
492 ..Blank
493 .Wall formed of flexible wire cloth (e.g., screen wire)
494 .End wall structure
495 ..Nonwire bottom (e.g., sheet metal, wood, plastic, etc.)
23.2 HORIZONTALLY ATTACHED RECEPTACLE SETS
23.4 .Detachable
23.6 .With stacking feature
23.8 .Integral
23.83 ARRANGEMENTS OF PLURAL RECEPTACLES
23.86 .At least one combined or convertible
500 COMPARTMENTED CONTAINER
501 .Intercommunicable compartments
502 ..With externally operable means for establishing and blocking communication
503 .Compartments accessible from different planes
504 ..Accessible from parallel, opposing planes
505 .Compartments of differing vertical extent
506 .Substantially concentric compartments
507 .Cells (i.e., identical or similar compartments each intended to hold a single item)
508 ..Egg carrier
509 ..Bottle case
510 ...Removable partition
511 ...Wire partition
512 ...Cells formed by apertures in a horizontal plate
513 ...Cells formed by upwardly opening cup-like or cylindrical members
514 ...Cell bottom includes structure intended to engage inverted bottle mouth
515 ...Case includes structure to receive bottles individually or packaged (e.g., six packs, etc.)
516 ...Molded in one piece
517 ....Blow molded
518 ....Cells have bottle locating finger-like members
519 ....Case bottom configured to stack on top of bottle in underlying case
520 .Compartments fold together
521 .Compartment in closure
522 ..Closure compartment only accessible when closure is in its open configuration
523 .Closure for compartment
524 ..Separate closure for each compartment
525 ..Closure permits access to one compartment while blocking access to another
526 ..Closure has means to engage compartment forming elements (e.g., forms seal between closure and compartment)
527 .Compartment forming element includes a bottom wall
528 .Compartment insert
529 .Compartment partition is movable or removable
530 ..Flexible partition provides a variable volume
531 ..Hinged partition
532 ..Vertical partition received in groove or notch in the container
533 ...Plural partition-receiving grooves or notches
534 ..Vertical partition horizontally slidable
535 ...Horizontal rod extends through opening in partition
536 ....Including spring means biasing the partition
537 ....Including screw threaded interengaging means on rod and partition
538 ....Including locking means engaging the rod
539 .....Frictional locking means
540 ....Including locking means engaging the container
541 ...Partition has reciprocating locking member acting between partition and sidewall
542 ....Locking member received by means on or in container sidewall
543 ...Partition includes means to slidably engage the upper edge of container sidewall
544 ...Partition slides along guide means (e.g., groove, track, etc.) on or in container sidewall
545 ....Partition includes releasable means locking it in position
546 .....Guide means has spaced apertures or ribs to receive the locking means
547 ......Locking means includes a gear-like member which engages the spaced apertures or ribs
548 .....Partition locking means is engaged with the guide means by rotation
549 ...Partition slides along guide means (e.g., groove, track, etc.) on or in container bottom wall
550 ....Partition includes releasable means locking it in position
551 ..Extendable partition

COMPARTMENTED CONTAINER
.Compartment partition is movable or removable
552 ..Intersecting partitions
553 .Compartment partition is stiff and fixed in position
554 ..Horizontal partition
555 ..Partition and walls molded or cast together
556 ...Configured for use as a food service tray
557 ..Partition one-piece with and folded from a container wall
558 TILTABLE FRONT PANEL FOR DRAWER OR TRAY (E.G., FILE DRAWER HAVING HINGED FRONT PANEL)
559 COMPRESSOR OR FOLLOWER PLATE FOR DRAWER OR TRAY
200 CLOSURES
201 .Thermal releaser or actuator
202 .With condition responsive vent or valve
203 ..Responsive to pressure
204 ...In each of plural passages
205 ...Liquid trap or seal
206 ...Manually adjustable
207 ...Rupturable
208 ...Having relatively movable closure and receptacle rim parts
209 ...With flexible, resilient vent closing member
210 .Key controlled
211 .Motor driven
212 .Combined or convertible
213 .Convex or concave closure conforms to curvature of opening to be closed
214 .With separately applied sealing means for indicating unauthorized closure movement
215 .With heat insulating insert or captive air space
216 .Floating closure
217 ..With liquid gasket
218 ..Sectional, relatively moveable
219 ..With surface water receiver, e.g., drain
220 ..With support for aground closure
221 ..With gasket means intermediate closure rim and receptacle
222 ...Attached to closure
223 ....Magnetic means urges gasket towards receptacle
224 ....Mechanical means urges gasket towards receptacle
225 ....Fluid filled gasket
226 ....Resilient foam or stuffed gasket
227 ..With vent means
228 .Having liquid or semi-liquid gasket
229 .Closure penetrated through intersecting slits
230 .Magnetic
231 .With vacuum breaker or manually operable vent
232 .Having inflatable gasket or packing
233 .Externally adjustable plug or gasket
234 ..Closure carried gasket and expander means
235 ...Screw actuated
236 ....With retainer
237 ....With wedging expander
238 ...Cam actuated
239 ..Fluid pressure
240 .With seal means biased by internal pressure
241 .Face plate type
242 ..With closure for face plate opening
243 .External and internal bar or closure
244 ..Closure mounted for swinging, e.g., hinged
245 ..Plural operators
246 ..Spring biased operator
247 ..Eccentric operator
248 ..Sectional bar
249 ..Bar tethered to closure support
250 ..Integral bar and operator
251 ..Bar and operator removable with closure as a unit
252 .Pivotally or slidably mounted semispherical hood-type closure
253 .Closure members having alignable openings
254 .Secondary closure within parameter of primary closure
255 .Closures interconnected for common opening movement
256 .Superposed closures for common opening
257 ..Destructible outer closure
258 ..Destructible inner closure
259 ..Hinged
260 .With closure opening arrangements or means, e.g., opening devices
261 ..Opening means comprises explosive charge
262 ..Operator actuates closure in its opening or closing movement, e.g., foot pedal
263 ...Hinged closure
264 ....Biasing means
265 ..Frangible member or portion
266 ...About line or point of weakness
267 ....With cutting device
268 ....Non-removable member or portion
269 .....Gripping means attached to or integral with member or portion, e.g., pull tab
270 ....With gripping means, e.g., pull tab
271 .....Provided with vent
272 .....Rivet connection between pull tab and removable portion integral with pull tab
273 .....Rivet connection between pull tab and removable portion integral with removable portion
274 .....Adapted for engagement with special tool, e.g., slotted key
275 ......With strip or tool guide
276 ....Line of weakness extends circumferentially of receptacle mouth
277 ...With cutting, punching, or cutter accommodating means
278 ....Puncturing tool serves as closure
279 ....Wire, string, or like, e.g., rip cord
280 .....About seam
281 ..Released by axial or radial pressure
282 ...Closure tilts on fulcra portions or rocker points
283 ....Hinged closure
284 ..Special tool or tool engaging means
285 ...Attached raising or pry-off means
286 ....Repositionable about closure periphery
287 .Closure adaptable for various sizes or openings
288 .Removable closure guided in rotary movement, e.g., screw
289 ..Threads formed or altered upon application of closure
290 ..With means to hold closure in a full or partially open position
291 ..Swinging and rotary
292 ...Biased
293 ..Quick removal, e.g., bayonet
294 ...Elliptical closure flange or passage mouth
295 ...With biased gasket or packing

CLOSURES
.Removable closure guided in rotary movement, e.g., screw
..Quick removal, e.g., bayonet
296 ...Interrupted threads
297 ...Keyhole slot
298 ...Radially inwardly and outwardly extending interlocking lugs
299 ....With anti-friction means
300 ...Locking lug engages "L" or cresent-shaped keeper slots
301 ...Lugs engage cammed keeper
302 ....Biased or resilient lugs
303 ..With valve or vent means
304 ..With packing or gasket
305 .Warped cover flexed into operative position
306 .Removable closure retained by resilient distortion of preformed configuration, e.g., detent
307 ..Interlocking means internal of passage mouth, e.g., stopper-type closure
308 ..With gasket or packing
309 .Removable closure retained by ductile type in situ deformation, e.g., crimp
310 ..With gasket or packing
314 .Crossbar carries closure and serves as closure fastener
315 .Having means for securing or retaining closure in its closed position, e.g, fastening devices
316 ..With internal pressure-condition release
317 ..Tilting handle fastens while pouring
318 ..Handle attached
319 ..Ring type
320 ...For applying radial pressure, e.g., contractable bands encircling member
321 ....Lever operated
322 ..Comprising "U" shaped or bifurcated members, e.g., pivoted bails
323 ..Elongated members (e.g., leaf spring, radiating arms) acting between face of closure and opposed abutments or walls of the container
324 ..Clamps, clips, hooks or latches
325 ...Screw actuated
326 ...Biased
327 ..Threaded member, e.g., stud, bolt or screw
328 ...With retainer
329 .Mounted for compound movement
330 ..About container carrying bail
331 ..Swinging and sliding
332 ..Multiple plane swing
333 ..Swings about multiple pivots
334 .Mounted for swinging, e.g., hinged
335 ..With means holding closure in open position
336 ..About pivot at right angle to plane of closure
337 ..Hinge members formed integrally with closure and closure support
338 ...Complementary hinge elements frictionally interlocked
339 ...Flexible hinge
340 ...Hinged formed by overlapping reentrant flanges on closure and closure support
341 ...Hinge element deformed in situ
342 ...Complementary hinge elements interlocked by separate member
343 ....Pintle
344 ..With gasket or packing
345 .Closure guided in reciprocating movement
346 ..Having means securing closure against movement
347 ...Cammed keeper
348 ..Spring biased
349 ..Having antifriction means
350 ..Flexible closure
351 ..Closure encompasses passage mouth
352 .Removable closure retained by friction
353 ..With closure guiding means
354 ..Closure received by upwardly opening trough at passage mouth
355 ..Passage mouth received by downwardly opening channel in closure
356 ..Closure flange embraces passage mouth
357 ...With gasket or packing
358 ..With gasket or packing
359 .Removable closure retained by adhesive or fusion means
360 .Closure controls vent in receptacle
361 .Sealing or closing means for vent or filling opening
362 ..By crimping
363 ..Nonmetallic
364 ..By application of hardenable material
365 ...With contents shield
366 .Vent means at closure, closure support juncture
367 .Vent means in closure
368 ..With reservoir for vent discharge
369 ..Antispattering cover
370 ...Screen
371 ..With filter
372 ...Screen
373 ..With means to prevent escape of contents through vent
374 ...Tortuous passage
375 .Tethered closure
376 .Ornamental
377 .Transparent
377.1 ..Percolator top type
378 .Having gasket or packing
379 .With disparate support for displaced closure
380 .Having structure to stack or nest when not in use
62 BLANK
62.1 .Corner fold
600 END WALL STRUCTURE
601 .Having an outlet or inlet opening (e.g., bunghole, etc.)
602 .Transparent
603 .With weight or counterweight
604 .One-piece side and end wall
605 ..With support structure
606 ...One-piece with container
607 ..End wall formed as a one-piece grid or mesh structure
608 ..Contoured end wall (e.g., curved, corrugated, ribbed, etc.)
609 ...Pressure responsive contour
610 .Joint or seam between sidewall and end wall
611 ..End wall and sidewall of dissimilar materials
612 ..Adhered (e.g., welded, cemented, soldered, bonded, etc.)
613 ...Plastic end wall or sidewall
614 ..Including a packing element (e.g., gasket)
615 ..Interlocked joint
616 ...Joint includes separate reinforcing element
617 ...Sidewall received in a channel in the end wall
618 ...Sidewall includes both a ledge-like area receiving the end wall and means engaging the outer surface of the end wall

END WALL STRUCTURE
.Joint or seam between sidewall and end wall
..Interlocked joint
619 ...Joint bent or rolled outwardly
620 ...Joint bent or rolled inwardly
621 ...Sidewall and end wall have interlocking grooves
622 ..Joint includes separate fastener (e.g., rivet, nail, screw, etc.)
623 ..Contoured end wall (e.g., curved, corrugated, ribbed, variable thickness, etc.)
624 ...Pressure responsive contour
625 .Removable bottom wall (i.e., not a closure)
626 .Multi-layer end wall structure
627 ..Spaced layers
628 .Support structure
629 ..Movable on container (e.g., adjustable)
630 ..Removable support structure
631 ..Fixed support structure provides alternate container orientations (e.g., angled bottom support areas)
632 ..Cushioned support structure
633 ..Support formed by downward extension of sidewall
634 ..Chime (i.e., supporting ring circumferentially attached to sidewall)
635 ..Support and bottom wall are of one-piece construction and attached to sidewall
636 ..Support attached to bottom wall
637 ..Support formed by rod or wire encased in bead folded under bottom wall
638 ..Sidewall, bottom wall and support are separate elements and attached at a common joint
639 SEPARATE REINFORCING ELEMENT
640 .Open end edge reinforcing means
641 ..Edge (e.g., rim, lip, brim, etc.) bent or rolled around a reinforcing element
642 ..Edge encompassed by U-shaped reinforcing element
643 ..Molded container including separate edge reinforcing element
644 ...Embedded element
645 .Molded container with embedded reinforcing element
646 .Externally attached sidewall reinforcing element
647 ..Spaced element supports container (e.g., cradle, end frame, etc.)
648 ..Circumferential band or belt
649 ...Handling ring or collar
650 ..Longitudinal element
651 .Internally attached reinforcing element
652 ..Extending between adjacent walls
653 ..Attached to and extending between opposite walls across the container
654 ..Circumferential
655 OPEN END EDGE CUSHIONING MEANS
656 ONE-PIECE, REINFORCED OPEN END EDGE
657 .Flange
658 .Bead
659 .Molded
660 SIDEWALL STRUCTURE
661 .Having an outlet or inlet opening (e.g., bunghole, etc.)
662 .Transparent wall or portion
663 ..Sight glass
664 ..Instrument casing (e.g., for a meter, etc.)
665 ..Two or more walls
666 .Collapsible wall feature
667 ..Wall permanently deformed when collapsed
668 .Skeleton framework
669 .Contoured sidewall (e.g., curved, corrugated, ribbed, variable thickness, etc.)
670 ..Corrugated
671 ...Axially extending only
672 ...Circumferentially extending only
673 ...Circumferentially and axially extending
674 ..Embossed
675 ..Molded container
676 .Apertured sidewall (e.g., hole, slot, etc.)
677 .Sidewall seam or joint
678 ..Adhered (e.g., welded, cemented, soldered, bonded, etc.)
679 ...Butt welded joint
680 ...Overlapped
681 ..Including packing element (e.g., gasket)
682 ..Interlocked joint
683 ...Separate strip-like element
684 ....Slide connector (e.g., "C" shaped rigid strip)
685 ....H-shaped connector
686 ....Exterior circumferential clamping band
687 .....With interior circumferential backup band
688 ....Exterior strip and interior strip secured together by transverse connector:
689 ...Joint bent or rolled
690 ...Including tab on one edge which passes through slot on other edge and is bent
691 ...Snap-type (i.e., secured by resilient distortion)
692 ..Joint includes separate fastener (e.g., rivet, bolt, screw, etc.)
693 ...Removable fastener
85 R ATTACHMENTS
85 A ..Expanding bell type
85 B ..Expanding; flexible wall or partition
85 CH ..Cover holders
85 D ..Hand implement
85 E ..Handle shield
85 F ..Filling fitting
85 H ..Receptacle holders
85 K ..Bumpers
85 P ..Valve protectors
85 SP ..Spouts
85 S ..Tank systems
85 TC ..Transformer casings
85 V ..Single valve
85 VR ..Vapor recovery (tank system)
85 VS ..Vapor saving (tank system)
86.1 .Filling member
86.2 ..Automotive type
86.3 ...With anti-siphon means
86.4 ..Nonrefillable
87.1 .Disinfectant device
87.2 ..Spray
88.1 .Fire prevention
88.2 ..Screen (flame arrester)
88.3 ..By inert gas
89.1 .Pressure relief means
89.2 ..Frangible pressure relief means
89.3 ...With cutting means
89.4 ..Fusible pressure relief means
90 .Scrapers
90.2 .Drinking, e.g., mustache guards
90.4 ..Splash or spill inhibiting
90.6 ..Lip guards
91 BAIL EARS
92 .Wire

CLASS 221 ARTICLE DISPENSING

DECEMBER 1990

1 PROCESSES
2 WITH RECORDER, REGISTER, INDICATOR, SIGNAL OR EXHIBITOR
3 .Audible
4 .Dispenser part position or adjustment indicator
5 ..Article selection indicator
6 .Empty source indicating means
7 .Dispenser operated register
8 .Dispenser operated display device
9 AUTOMATIC CONTROL
10 .Of supply to dispenser
11 ..By replacing depleted stack with a similar stack
12 .Of article releasing outlet closure
13 .Of discharge assistant operation
14 ..In response to depletion of supply
15 WITH TIMING OR DELAY MECHANISM
16 .Dashpot restrained discharging means
17 WITH EMPTY SUPPLY SOURCE RESPONSIVE MEANS
18 .Having motion inhibitor for discharge means
19 ..Latch means
20 ...On follower
21 WITH DISPENSER MALFUNCTIONING RESPONSIVE MEANS
22 SUBSEQUENT ARTICLE SEPARATING MEANS ACTUATED BY ARTICLE REMOVAL
23 .Article operated discharge assistant
24 SIMULATIONS
25 PROGRESSIVELY DESTROYED CELLULAR MAGAZINE-TYPE SUPPLY SOURCE
26 WITH ARTICLE TEARING OR DEFORMING SUPPLY RETAINING MEANS
27 CAPTIVE ARTICLE TYPE
28 .With means to remove articles from point of use
29 .Slidable relative to supporting guide
30 WITH CUTTER OR PUNCH
31 .To form outlet opening
32 ..Tear strip type
33 CONCURRENT SEPARATION AND DISTORTION OF FLEXIBLE ARTICLE (E.G., NAPKIN HOLDERS)
34 .Plural sources, stacks or compartments
35 ..Oppositely faced dispensing outlets
36 .By ejecting means
37 ..Actuated by source container section movement
38 ..Interleaved folds
39 ..Preliminary motion in direction away from outlet
40 ..Compound motion of ejecting means
41 ..Stationary guide or abutment cooperating with leading edge of article
42 ..Rotary
43 ...Friction roller
44 .Adaptable to use with different size articles
45 .With casing or support
46 ..With removable supply magazine
47 .With presentation of non-coextensive or distorted fold
48 ..By cooperation of interleaved folds
49 ...Refill package
50 ...With starter strip
51 ...Feeding from concave side of a stack of folded or arcuate articles
52 ...With follower
53 ...With means to relieve stack pressure
54 ....Movable
55 ..By stationary guide or abutment acting on non-coextensive folds
56 .With follower
57 ..With replenishment interlock
58 ..Spring form
59 ..Spring biased
60 ...Pivoted
61 .With separate replenishment or access inlet means
62 ..Pivoted container component
63 .Deformation by non-coextensive outlet opening
64 WITH FLEXIBLE SUPPLY CONTAINER WALLS
65 WITH COLLAPSIBLE OR TELESCOPING SUPPLY CONTAINER WALLS
66 ARTICLE DELIVERY DEPENDENT UPON INSERTION OF REPLACEMENT ARTICLE
67 DISPENSING FROM STAGGERED STACKS
68 PLURAL DISPENSING STACKS FORMED FROM SINGLE SOURCE
69 CELLULAR MAGAZINE TYPE
70 .Rolled or folded web type magazine (e.g., flexible pin strips)
71 ..With means for feeding web for dispensing
72 ...Article release by magazine movement
73 ....By stripping off surface adhered articles
74 ...With ejector
75 .With article movement from cell to cell
76 .Conveyer type
77 ..Multiple strand conveyer
78 ...With ejector
79 ..With means to remove article from cells
80 ...Stationary ejector
81 ...Interrelated with means to advance cell position
82 ..With gravity discharge from cells
83 ...With outlet closure operator and interrelated magazine advancing or locking means
84 ...Flexible conveyer belt carried cell structure
85 ....Having horizontal article carrying run
86 ...With relatively movable cell or component thereof
87 .With non-gravity means to remove articles from cells
88 ..Single ejecting means for all cells
89 .Articles discharged by relative movement of cell structure components
90 ..Pivoted shelf or door
91 ..Sliding closure common to plural cells
92 PLURAL SOURCES, STACKS OR COMPARTMENTS
93 .Dispensing from plural sources by single actuation
94 ..With selection of number of sources
95 ..Single discharge means successively loading from plural sources
96 .With fluent material dispenser
97 .With non-dispensing compartment
98 ..Movable or removable relative to dispensing compartment
99 ...Sliding drawer
100 ...Hinged
101 ..Movable or removable common wall
102 ..Used article compartment
103 .Each entirely depleted in order
104 ..Replacement source or stack movement relative to discharge means
105 ...Pivotal movement about a fixed axis
106 ...Rectilinear movement
107 ..Feeding from subsequent source or stack prevented by articles in discharge path
108 ...By article presence or absence responsive means
109 ....Progressive release of multiple gates for three or more sources or stacks

	PLURAL SOURCES, STACKS OR COMPARTMENTS
	.Each entirely depleted in order
110	..Serially activated discharge assistants
111	..Articles present in dispensing stack block subsequent stack
112	.Dispensing from sources sequentially
113	..Sources rotate relative to common outlet
114	..By individual interrelated segregating means
115	...Axially spaced
116	...Alternately
117	....With oppositely faced outlets
118	....From relatively stepped sources
119	.Rotatably mounted or endless belt carried source assembly
120	..Axially spaced sets of peripherally arranged sources
121	..Relative to common outlet
122	...With means assuring alignment of source and outlet
123	.With discharge means for each source
124	..Separate discharge means for each source
125	...With lockout means
126	...With common selector element
127	....Selection by actuator manipulation (i.e., actuator is selector)
128	.....By reverse manipulation
129	...Electrical control
130	...Superposed dispensers
131	...Dispensers in juxtaposed alignment
132	...Annularly arranged dispensers
133	.With common discharge outlet
134	WITH MEANS TO SELECT INTERMEDIATE ARTICLES FROM STACKS
135	WITH ARTICLE TREATMENT
136	.With igniting means
137	..Match striker
138	...Positively actuated striker
139	...Ignition by manual removal of match
140	...Ignition by discharge assistant forcing match against igniter
141	....Axial movement of match
142	....Transverse movement of match
143	..Electrical
144	...Including vacuum or draft producing means
145	....Pump or fan
146	....Stack or chimney
147	...Heater energized by dispensing operation
148	..With interrelated flint lighter and dispenser operation
149	...Movement of container part initiates operation
150 R	.With cooling or heating
150 HC	...Heating and cooling combined
150 A	...Heating
151	WITH MEANS FOR BLOCKING OR DISABLING EJECTOR OR RELEASER
152	.By engagement with slot, notch or protuberance
153	.Motor operated
154	WITH LOCK, LATCH, OR SEAL FOR CONTAINER AND/OR SUPPORT
155	WITH TRANSPARENT INSPECTING OR VIEWING MEANS
156	WITH ORIENTING
157	.Segregation of aligned articles according to orientation
158	..With recombining of articles
159	..With return to supply
160	...Within confines of, or overlying supply container
161	....By means movable relative to terminal outlet
162	.....Rotary wheel or brush
163	.Selective separation from supply
164	..By movable lifting means engageable with aperture, groove, enlargement or depression in article
165	...Head only of headed article
166	...By individual picker finger
167	..Rotatable or oscillatable means
168	...With agitator or exit clearing means
169	...With multiple traveling shaped outlets
170	....Outlets formed by pins
171	.By manipulation of successive individual articles
172	..Gravitating articles contacting fixed abutments
173	..By positive rotation of articles
174	SUPPLY FEED MEANS TO DISPENSING HOPPER
175	WITH STACK FORMING MEANS
176	.From stack source
177	.Pivoted hopper
178	.Movable chute or part thereof
179	..Within hopper
180	...Oscillating pivoted chute section
181	...Axially movable
182	.Member rotatable or oscillatable about inclined axis
183	.Agitator carried by or interrelated with discharging means
184	..Rigidly connected
185	AMBULANT OR BODY SUPPORTED
186	SUPPLY CONTAINER MOVABLY MOUNTED FOR DISPENSING
187	.With means for moving separated article transversely
188	.Pivotally mounted supply container
189	..Relative to stationary article trap
190	.Vertical motion to separate articles
191	DISPENSER DELIVERING TO STATIONARY ARTICLE SUPPORT FOR MANUAL REMOVAL
192	.With article elevation to raised support
193	.With article motion retarding baffle at inlet to support
194	.Articles released for gravity deposit in or on support
195	..By discharge assistant
196	...Movable segregating chamber
197	WITH SUPPLY CARTRIDGE OR CONTAINER REMOVABLE FROM ENCLOSING CASING
198	.With follower operating in cartridge or container
199	COMBINED OR CONVERTIBLE
200	WITH MEANS TO AGITATE, VIBRATE OR JAR ARTICLES IN SUPPLY CONTAINER
201	.Three or more agitators or discharge assistants in series
202	.Rigidly mounted on or incorporated in discharge assistant
203	..Rotary
204	.By movement of container section
205	..Pivoted wall section
206	WITH QUANTITY PRESELECTION MEANS
207	.Variation by adjustment
208	WITH DISCHARGE ASSISTANT
209	.Cooperating with movably mounted supply container
210	.Article adhering or gripping type
211	..Suction carrier
212	..Magnetic
213	..Impaling
214	...With means to strip articles from impaling means
215	....Cam-operated stripping means
216	....Stationary abutment
217	..With endless or rotary article gripper carrying means
218	...Endless belt carrier

WITH DISCHARGE ASSISTANT
.Article adhering or gripping type
..With endless or rotary article gripper carrying means
219 ...Having cam-operated pivoted jaw type gripper elements
220 ..Having spring form, resilient gripper elements
221 .Multiple, simultaneously acting and circumposed (e.g., cup dispensers)
222 ..Rotary
223 ..Oscillating
224 .Plural or combined with manipulating means
225 ..Three or more
226 ..Follower
227 ...With follower disabling, retracting or releasing means
228 ...With source container cover related ejector
229 ....Cover controlled ejector
230 ...With interrelated actuators
231 ...With rotary ejector
232 ...With reciprocating (including oscillating) ejector
233 ..Means removing article from movable segregating chamber
234 ...Mechanically interconnected with segregating chamber
235 ...Spring pressed or gravity actuated finger
236 ..Separately acting in series
237 ...All rotary
238 ...All reciprocating (including oscillating)
239 .Delivering segregated articles to holddown means
240 .Acting on fold or non-coextensive part
241 .With size adjusting means
242 ..Magazine
243 .Lost motion actuation and/or yieldable wall
244 .Self-compensating for decreasing supply
245 .With return stroke inhibitor (i.e., full-stroke mechanism)
246 .Segregation by sliding movement of cover relative to container
247 .Ejector with relatively movable outlet closure
248 ..Mechanically linked to or locked by ejector
249 ...Closure moves ejector
250 ..Opened by dispensed article
251 .With separate holdback means
252 .With plural article outlets
253 .Endless belt carried
254 .Movable through hopper to separate and elevate articles
255 .Article retained by discharge assistant for manual removal
256 ..With pocket for retaining article
257 ...Having means facilitating article removal
258 .Motor-operated
259 .Surface contact only (i.e., friction)
260 .Deformable discharging element
261 .Ejector cooperating with article direction changing deflector
262 .Compound motion
263 .Having movable segregating chamber (i.e., trap chamber)
264 ..Axial inlet and outlet
265 ...Rotary
266 ..Single inlet-outlet
267 .Segregation by ejection through resilient-type outlet
268 .Reciprocating (including oscillating)
269 ..With integral outlet closure
270 ..With retractable pusher element
271 ..Spring biased to discharging position
272 ..Relatively movable actuator
273 ...Cam
274 ...Lever or link
275 ...Gearing
276 ..Spring biased
277 .Rotary
278 .Fluid pressure
279 .Follower
280 ..With cooperating interior deflector
281 WITH SEPARATE INLET FOR REPLENISHMENT OR ACCESS
282 WITH CASING OR SUPPORT
283 .Bracket or suspension supported
284 .Weighted base or support
285 .Base or support for angular disposition of supply container
286 .With spaced casing
287 WITH REMOVABLE CONTAINER ENCLOSING SUPPLY
288 TILTABLE CONTAINER WITH TRAP
289 MECHANICAL RELEASE OR SEPARATION OF ARTICLES
290 .With additional article manipulating means
291 ..Article inversion
292 ..Rectilinearly reciprocating
293 ...Interrelated releaser and manipulating means
294 .Delivering segregated articles to holddown
295 .Latch released, article weight-operated
296 .Dispensing plural articles
297 .Multiple, simultaneously acting and circumposed controllers
298 .Separately acting series controllers
299 .Plural integral transversely acting controllers
300 ..Three or more
301 ..Pivoted
302 WITH FRANGIBLE ELEMENT FOR OUTLET
303 WITH DISPENSING-TYPE OUTLET
304 .Adjustable size
305 .Folded flat blank type
306 .With closure for outlet
307 .Resilient
308 ..Plural series
309 ..Having slot facilitating grasping of article
310 ..Plural spring biased or resilient fingers
311 WITH DEFLECTOR FOR PARTIALLY SEPARATING ARTICLE
312 R MISCELLANEOUS (E.G., INTERIOR ARTICLE GUIDING MEANS)
312 A ..Articles on rod
312 B ..Magazine charging
312 C ..Special dispensing packages
################################
DIGEST
################################
DIG 1 Storage retrieval

1 PROCESSES OF DISPENSING
590 .Molten metal
2 CHECK CONTROL
3 GAS OR VAPOR DISPENSING
4 .With nongaseous material dispensing
5 .With cutter or punch
6 .Parallel connected, serially used
591 MOLTEN METAL DISPENSING
592 .With heating or cooling
593 ..Heating
594 .Flow controllers or assists
595 ..Fluid pressure assist
596 ..Piston displacement
597 ..Closure
598 ...Movable about an axis
599 ....Perpendicular to flow
600 ...Reciprocating transverse to flow
601 ...Stopper operator structure beneath receptacle
602 ...Stopper operator structure above receptacle
603 .Gaseous fluid engages molten metal
629 .Submersible dipper or trap chamber
604 .Tilting receptacle
605 ..Teakettle type
606 .With subjacent flow guide
607 ..Unattached
14 CUTOFF OPERATED BY SELECTIVELY PRESET VOLUME OR RATE OF FLOW-RESPONSIVE MECHANISM
15 .With means to prevent change of setting during discharge
16 .Operating cycle including reset to starting position
17 .Moving cutoff operating element with variable initial position
18 ..Having plural revolutions
19 ...Plural dials
20 ..Cutoff by valve closing
21 .Cutoff by single trapped volume
22 .Cutoff set after discharge begins
23 WITH RECORDER, REGISTER, INDICATOR, SIGNAL OR EXHIBITOR
24 .Register with shutter
25 .Plural
26 ..Two or more volume devices
27 ..Register and signal
28 ..With common operating means
29 .Plural scale
30 .Recorder
31 .With motion ratio adjusting means and/or relatively adjustable scale and pointer
32 .With zero-setting mechanism
33 ..Operating cycle including reset to zero
34 ..With means to prevent zero setting during discharge
35 ..With means to prevent discharge prior to zero setting
36 .Totalizer for successive dispenser cycles
37 ..Varying cycles or quantities per cycle
38 ..Reciprocating (including oscillating) dispenser part
39 .Audible
40 .Flow and/or overflow type
41 .Position or extent of motion indicator
42 ..Selection from plural outlets, valves or traps
43 ..Comprising an adjustable stop or stops
44 ..Scale and pointer, with detents
45 ..Flexibly connected indicator and dispenser element
46 ..Common screw means for indicator element and dispenser part
47 ..Indicating element rigidly carried by movable dispenser element
48 ...Pivoted or rotary dispensing part
49 ...Slidable indicator element projecting from container
50 ....Scale or container
51 .Float-level indicators
52 AUTOMATIC CONTROL
53 .Involving conveying conduit jacket and/or inert atmosphere (including vacuum) providing means
54 .Temperature responsive or soluble controller
55 .Constant weight, volume or pressure control by output
56 .Delivery from source controlled by quantity in discharging receiver
57 .By weight, volume or pressure of a second dispensed material
58 .By the weight of the material in the supply container
59 .Cutoff operated by rate of flow responsive mechanism
60 ..Single complete revolution of controller element
61 .Of dispensers with fluid pressure discharge assistance
62 ..Float-controlled pressure liquid
63 .Motor control
64 .Material level control
65 ..Full and/or empty interlock
66 ..Empty container cutoff
67 ..Float-operated flow controllers
68 ...Plural
69 ...For vent only
638 INCLUDING TIMER
639 .For timing dispensing period
640 ..Of beverage or beverage component dispenser
641 ...Including electrical timing circuit
642 ..Of discharge assistant
643 ...Rotary
644 ..And means for timing the period between dispensing cycles
645 ...Of aerosol dispenser
646 ....Including electrical timing circuit
647 .....And mechanical timing element
648 ......And battery power supply
649 .For aerosol dispenser
650 .For plant or animal feed dispenser
651 .For wash cycle ingredient dispenser
652 ..Movably mounted ingredient container
71 VOLUME OR RATE OF FLOW METERING
72 .With meter bypass, gas separation, antisyphon priming
73 .With hose pressure relief or maintenance
74 HOSE OR OTHER MOVABLE DISCHARGE GUIDE INTERLOCKS AND INTERCONNECTIONS
75 .Switch or motor control and discharge controller actuator
77 WEIGHING
78 SIMULATIONS
79 .Firearms
80 WITH CUTTER AND/OR PUNCH
81 .To form dispensing opening in container
82 ..With discharge assistant
83 ..Mounted for relative motion
83.5 ...With sleeve or rest for container cut
85 ..For cutting plural openings
86 ...With sleeve or rest for container cut
87 ..With container-destroying means
88 ..With sleeve or rest for container cut
89 ..With nonfriction fit means to secure discharge guide to container
90 ...Abutment for container interior
91 ...Screw
92 COLLAPSIBLE WALL-TYPE CONTAINER
93 .With additional article-holding means
94 .Plural container and/or compartment

COLLAPSIBLE WALL-TYPE CONTAINER
95 .With wall-collapsing means
96 ..With interconnected flow controller or closure operating means
97 ..Plural types
98 ...Winding and roller types
99 ..Winding type
100 ...With casing or support
101 ..Roller type
102 ...Plural roller
103 ..Clamping type
104 ..Twisting type
105 .With casing or support
106 .Combined
107 .Nonmetallic
108 DRIP, LEAKAGE OR WASTE CATCHING OR DISPOSAL
109 .Return to main supply
110 ..Valved
111 ..With enclosing cover
113 WITH ILLUMINATOR OR BURNER
576 INKWELL
577 .With support (i.e., inkstand)
578 .Including nongravity feed to dip well
579 ..Spillover type
580 ..Including discharge assistant supporting and movable with dip well
581 ...Diaphragm-type discharge assistant
582 ...Biased for resetting
583 .Including dip well filled by immersion into supply
584 .Tiltable to fill dip well
585 .Barometric
586 ..Including base supporting removable inverted container
587 ...And valve or base-opened closure
588 ..Dip opening below peak level of supply
589 ...Including closure or valve for dip well outlet
129 PLURAL SOURCES, COMPARTMENT, CONTAINERS AND/OR SPACED JACKET
129.1 .Cabinet-type dispenser for single mixed drinks
129.2 ..One ingredient operates dispensing means for another
129.3 ..With ingredient charge measuring
129.4 ...Plural measured charges in single drink
130 .At least one nondispensing
131 ..Jacketed
132 .Three or more diverse sources
133 .Measured discharge from one and indeterminate flow from another
134 .Interconnected discharge volume varying means
135 .With discharge assistant for each source
136 ..Single, operable on material from all sources
137 ..Unitary reciprocating
138 ..Two or more rotary or swinging
139 ...Co-axial
140 ....Vertical axis
141 .....Single plane
142 ...Parallel axes
142.1 .Hand manipulable shaker type
142.2 ..Selection by relative movement between containers or containers and casing
142.3 ..Containers removable from base or casing
142.4 ..Selection as a result of container shape, configuration or arrangement
142.5 ..Container within container concentrically arranged
142.6 ..With common selector
142.7 ...Interconnected relatively movable closures
142.8 ...Bodily slidable closure
142.9 ...Axially rotary closure for axial outlets
143 .Packing or stacking arrangements
144 .Rotatably mounted assembly
144.5 .With selecting means
145 .With common discharge
146.1 WITH HEATING OR COOLING MEANS
146.2 .Heating only
146.3 ..Having an aerosol
146.4 ..By steam
146.5 ..By electrical energy
146.6 .Cooling only
147 WITH REFILL PREVENTING MEANS
148 WITH CLEANING MEANS
149 .Element extending through dispenser outlet
150 ..Operated by resilient container walls
151 ..Extending inwardly through container outlet
152 WITH CONVEYING CONDUIT JACKET AND/OR INERT ATMOSPHERE (INCLUDIND VACUUM) PROVIDING MEANS
153 WITH LOCK OR FASTENING SEAL
154 INSPECTION DEVICES
155 .External gauge tubes
156 .Sight openings
157 ..Graduated for level determination
158 .Graduated transparent container or trap
159 .Transparent flow-line section
160 MOVABLY MOUNTED SUPPLY CONTAINER
161 .Vibratory (i.e., for agitation of container contents)
162 .Moving relatively to trap, impeller or valve to cause discharge
163 .Adjustable relatively to discharge assistant to vary the discharge volume
164 .Tiltable
165 ..For refilling or changing cartridges or containers
166 ..For gravity discharge
167 .Rotatable
168 ..Vertical axis
168.5 ...Circumferentially arranged measuring or trap chambers
169 ..Peripheral discharge
170 ...With trap chambers
171 ...With sleeve-type discharge controller
172 ...With annular outlet
173 WITH CASING OR SUPPORT
174 .Pole or extension
175 .Body carried and/or operated type
608 .Ambulant
609 ..With assembly or disassembly feature
610 ...Dispensing means detachably carried upon vehicle
611.1 ..With guide or guide line marker
611.2 ...Mortar applying machine
612 ..With height adjustment
613 ..Dispensing means driven or controlled by surface contact
614 ...Ground wheel operated discharge controller
615 ...With variable transmission
616 ...With clutch
617 ...Fluid flow discharge
618 ...Plural ground wheel driven discharge assistants in series
619 ...Ground wheel driven vibrator or jarring means
620 ...Rotary motion of ground wheel to reciprocating, oscillating, or linear motion
621 ....Fluid pump
622 ...Endless conveyer
623 ...Ground wheel driven rotary discharge assistant or rotary agitator
624 ....With adjustable discharge controller

	WITH CASING OR SUPPORT
	.Ambulant
	..Dispensing means driven or controlled by surface contact
	...Ground wheel driven rotary discharge assistant or rotary agitator
	....With adjustable discharge controller
625	.....Sliding gate or shutter
626	..Motor operated dispensing means
627	...Power take off
628	..Manually actuated fluid pump
179	.With pedal-controlled discharge means
179.5	.Removable for discharge
180	.Bracket or suspension supported
181	..For bottom discharge
182	.Enclosing cover for actuating parts of discharging means
183	.Jacketed
184	.Extended sidewall base
185	.For bottom discharge
186	.Foot piece or rest
187	WITH WICK OR ABSORBENT MATERIAL FEED
188	WITH FLUID TRAP SEAL FOR INLETS OR OUTLETS (E.G., VENTS)
189	WITH STRAINER, FILTER, SIFTER, FLAME ARRESTER OR FORAMINOUS GUARD
190	WITH MATERIAL TREATMENT OR CONDITIONING MEANS
191	WITH TOOL OR IMPLEMENT HANDLE
192	COMBINED
630	FLUID FLOW DISCHARGE
631	.Fluid flow generated by manually actuated working member
632	..Flexible working member
633	...Bellows or bulb
634	..Telescoping supply container
635	.Pressurized aerosol container
636	.From movable trap chamber
637	.Open blast
195	WITH GAS AGITATION
196	JARRING AND/OR VIBRATING
196.1	.Hand manipulable shaker type
196.2	..Movable outlet element
196.3	...Pattern-type outlet with hole clearers
196.4	...Caged outlet element
196.5	..Guided or restrained internal element
197	.Movable or conveyer-type trap chamber
198	.Single outlet bounded by plural vibrating members
199	.Bottom forming member reciprocable (including oscillatable)
200	.Member reciprocable (including oscillatable) transversely of material flow
201	.Discharge rotor is actuator for vibratable wall
202	.Supply container wall flexing
203	..Flexible wall
204	SIPHON COMBINED WITH DISCHARGE ASSISTANT
205	NONGRAVITY FEED TO TRAP OF VACUUM, GRAVITY, OR MANUAL REMOVAL TYPE
206	RESILIENT WALL
207	.Supply container delivering to receiving chamber
209	.Fluid pressure generating pump or pulsator and/or removable flexible wall closures
210	.With container handle or handgrip
211	.Internally extending outlet pipe
212	.With flow controllers or closures
213	..Resilient wall actuated
214	.Wall deflecting means
215	.Nonmetallic
216	AGITATOR AND/OR EJECTOR OPERATING ON MATERIAL IN EITHER (1) CONVEYER-TYPE DISCHARGE ASSISTANTS HAVING TRAP CHAMBERS OR TRANSVERSE GROOVES, OR (2) MOVABLE TRAP CHAMBERS
217	.Mounted on or in conveyer or movable trap chamber
218	..Radially movable ejector in rotary conveyer or trap chamber
219	...Double-ended ejector
220	.Meshing conveyer trap or groove and ejector rotor
221	.Cam-operated agitator or ejector
222	.Pivoted ejector
223	..With pivoted striker
224	.Ball or roller form agitator or ejector
225	.Resilient ejector
226	AGITATOR FOLLOWED BY DISCHARGE ASSISTANT AND/OR INTERCONNECTED DISCHARGE CONTROLLER
227	.Three or more in series
228	.Flexible or pivoted agitator carried by assistant or controller movable about an axis
229	.Axially aligned, with axially rotary and longitudinally movement
230	.Biasing means constitutes agitator
231	.Free engagement-type connection
232	.Connection through eccentric carried by rotary assistant or controller
233	.One rotary and one reciprocating (including oscillating)
234	..Reciprocating, nonpivoted
235	...Rotary agitator
236	.All rotary
237	..Relatively rotatable rings and/or plates
238	..Parallel axes
239	..Coaxial
240	...Helix or vane agitator and terminal element
241	...Agitator and terminal screw, helix, or vane
242	...Agitator rigidly mounted on succeeding device
243	.All reciprocating (including oscillating)
244	..Relatively movable in parallel planes, nonpivoted
245	..Pivoted and nonpivoted reciprocating elements
246	..Reciprocable axially of outlet
247	..Pivoted only
248	...Unitary
249	FLOATING PISTON WITH PLURAL OR ALTERNATE DISCHARGE
250	.With discharge volume varying means
251	WITH DISCHARGE ASSISTANT (E.G., IMPELLER, PUMP, CONVEYER, MOVABLE TRAP CHAMBER, ETC.)
252	.Plural
253	..With material-operated differential piston
254	..Three or more in series
255	..Pumps only
256	..Follower combined with casing enclosed impeller
257	...Interconnected with movable nozzle
258	....Utilizing fluid pressure and/or motor
259	....Follower and impeller coaxial or parallel and interconnected
260	...Follower and impeller coaxial or parallel and interconnected
261	....Utilizing fluid pressure and/or motor
262	...Utilizing fluid pressure and/or motor
263	..Utilizing fluid pressure and/or motor

WITH DISCHARGE ASSISTANT (E.G., IMPELLER, PUMP, CONVEYER, MOVABLE TRAP CHAMBER, ETC.)
.Plural
264 ..Rotors with concentrically arranged sets of axial trap chambers
265 ..In sets
266 ...With selecting means
267 ...With common discharge volume varying means
268 ....Variable capacity rotors
269 ...Container wall sections carrying set units
270 ...With interior material discharge guides between units
271 ...Rotary
272 ....Opppositely directed
273 ....Coaxial only
274 .....Spaced units
275 ...Reciprocating (including oscillating)
276 ....Unitary
277 .....Pivoted
278 ..Alternatively usable
279 ...Movable or removable baffles or covers for nonused assistant
280 ..Single outlet formed by plural discharge assistants
281 ...Parallel rolls
282 .With discharge volume varying means
283 ..Plural
284 ..Trap chambers in series
285 ..Source and assistant relatively adjustable axially of source outlet
286 ...Sleeve-type discharge controller for outlet
287 ..Adjustment in relatively movable actuator
288 ..Interchangeable, removable or selectively usable discharge assistant or element thereof
289 ...Reversible
290 ..Adjustable deflector for conveyer-type discharge assistant
291 ..Retractable projections
292 ..Interconnected radially movable adjusting means for plural rotor projection or traps
293 ..Rotor having plural adjustable parts of rotor form
294 ...Substantially coextensive disks and/or rings, axially rotary adjustment
295 ...Axially adjustable
296 ....Disk with axially projecting pins
297 ....Cup rotor with horizontal axis
298 ....Groove or trap rotor slidable through discharge channel
299 .....With channel blocking means
300 ......With nonrotary sleeve
301 .....Rose washer bearing
302 ....Material passage parallel to axis of rotation
303 ....Groove or trap blocking means
304 .....Axial pocket trap
305 ..Movable or conveyer-type trap chamber with capacity varying means
306 ...Single inlet-outlet, adjustable bottom
307 ...Wall with straight line movements
308 ....Screw adjusting means
309 ..Adjustable stroke pump piston, pulsator or follower
310 ..With discharge controller
311 ...Rotor with discharge controller
312 ....Discharge passage between drum-type rotor and controller
313 .....Biased controller
314 .....Reciprocating nonpivoted controller
315 ....Cup rotor with horizontal axis
316 ....Sectional discharge controller
317 ....On container side of rotor
318 .With bypass or return to supply
319 .Displacement type
320 .With movable nozzle interconnected therewith
321 ..With material supply container and discharge assistant casing
322 .Movable element actuator projection through outlet
323 .With container handle or handgrip
324 ..With material supply container and discharge assistant casing
325 .Insertable cartridge or removable container
326 ..With follower
327 ...Part of cartridge or removable container
328 .With material discharge guide on container side of discharge assistant
329 .Removable or movable depending cups for rotors
330 .With plural material outlets
331 ..Of different types
332 .With vent passage for movable trap chamber
333 .Motor operated
334 ..Fluid motor
335 .Actuated by pressure of or suction on material to be dispensed
336 .With biasing means for discharge assistant and/or its casing
337 ..Joint sealing bias only
338 ...Movable encasing wall
339 ..For oscillating discharge assistant
340 ..For reciprocating piston on follower-type impeller
341 ...Biasing means within material chamber or passage
342 .With scraper or wiper for or carried by discharge assistant
343 .With retractable projections
344 .Movable or conveyer-type trap chamber
345 ..With striking or clearing means
346 ...Not part of the supply container outlet
347 ...Plural and/or interconnected with gate at point of trap reentry to supply
348 ...Sectional
349 ...Yielding
350 ....Pivoted
351 ....Reciprocating
352 ....Brush
353 ..Barometric or angle of repose
354 ..With relatively movable cutoff carried by trap chamber
355 ..With cutoff interconnected with trap chamber for operation
356 ..Dipping trap chamber, nonrotary, nonendless belt
357 ...Compound movement
358 ...Oscillating
359 ..With relatively movable actuator
360 ...Intermittent rotary
361 ..Reciprocating (including oscillating) conveyer-type trap chamber
362 ...Oscillating
363 ....Single inlet-outlet
364 .....Pivot lying in chamber rim
365 ...Plural concentric enlargements on stem
366 ...Single inlet-outlet
367 ..Rotary conveyer-type trap chamber
368 ...Single inlet-outlet
369 ....Scoop type
370 ...Axial inlet and outlet

	WITH DISCHARGE ASSISTANT (E.G., IMPELLER, PUMP, CONVEYER, MOVABLE TRAP CHAMBER, ETC.)
	.Movable or conveyer-type trap chamber
371	..Endless belt carried
372	.With material supply container and discharge assistant with casing (e.g., supply container and pump)
373	..Fluid pressure discharge
375	..With antileak or antisiphon means or full-stroke mechanism
376	..With plural-point inlet to casing
377	..Inlet trap (e.g., sump)
378	..Aligned discharge assistant, actuator, container and nozzle
379	..Telescopic outlet and/or discharge-assistant casing inlet
380	..Valve outlet
381	..Movable discharge assistant casing
382	..Internally extending outlet pipe
383	..Container-mounted pump or pulsator
384	...With piston holding means
385	...Pump or pulsator casing within supply container
386	.Container with follower
386.5	..Nonrigid follower
387	..Valved outlet, movable discharge guide and/or gas vent
388	..With side wall filling opening
389	..Fluid pressure actuated
390	..Screw actuated
391	..Intermittent grip-type actuator
392	..Ribbon-type follower and/or stand actuator
393	..Scoop type
394	.Fluid pressure
395	..Liquid pressure
396	..With pressure limiting means
397	..With pressure fluid relieving means
398	..Telescopic container and/or outlet
399	..With gas pressure supplying reservoir
400.5	..Simultaneously operative material discharge valve and pump or pulsator operating member
400.7	..Unitary mounting for fluid pressure inlet and material outlet
400.8	...With pump or pulsator
401	..Container-mounted fluid pressure generating pump or pulsator
402	...With piston or pulsator holding means
402.1	..Valve actuated by nozzle or through valve outlet
402.11	...With actuation disabling means
402.12	...With discharge orifice contamination guard
402.13	...With container end overcap having actuator
402.14	...With means to hold valve open
402.15	...With container-carried actuating lever
402.16	...With bypass for filling or charging
402.17	...With external selector of flowpath
402.18	...Separate inlets for gas and material in duct to valve
402.19	...Alternative flowpath to valve when inverted
402.2	...Pressure lock trap chamber
402.21	...Tilting nozzle
402.22	....Nozzle inner end valve headed
402.23	....Valve stem in nozzle
402.24	...Nozzle sliding in or flexing seal ring
402.25	...Rod actuator pushed through valve outlet
403	.Film accumulating type
404	.Compound motions
405	.Discharge of material from top of supply
406	.Deformable discharging elements
407	..Biased
408	.Conveyer type with deflector
408.5	.Agitator rigidly mounted on movable closure
409	.Reciprocating (including oscillating)
410	.Rotary
411	..Central discharge
412	..Helically arranged projections (e.g., screws)
413	...Screw with terminal outlet only
414	..Peripheral surface material contact
415	.Endless belt
416	SIPHON
420	DROP FORMERS
421	.Grooved closure and/or container neck or outlet
422	.With valve
423	WITH FILM ACCUMULATING MATERIAL REMOVERS
424	WITH MATERIAL RETURN TO SUPPLY
424.5	SUPPLY CONTAINERS WITH TRAPS
425	.With trap chamber cutoffs
426	..Plural traps, nonserial
427	...Single rotary cutoff member
428	...Interconnected discharge controllers
429	....For simultaneous discharge
430	...Of different capacities
431	..With plural discharge
432	...Plural level discharge volume varying
433	....Independent discharge controllers
434	..With discharge volume varying means
435	...With means to prevent adjustment during discharge
436	...Trap chambers in series
437	...Barometric or angle of repose
438	...With means to change trap chamber volume
439	....Movable cutoff of cutoff seat carrying elements
440	....Having straight-line motion
441	..With container handle or handgrip
442	..With vent passage for trap
443	..With bypass or free-flow adjustment
444	..Single inflow-outflow trap passage
445	..Nonrigidly interconnected cutoffs
446	...Free engaging element carried by one cutoff
447	...Both reciprocating, nonpivoted
448	..With relatively movable actuator
449	..With biasing means
450	..For both inlet and outlet
451	...Rigidly interconnected or unitary cutoffs
452	....Rotary and/or pivoted only
453	....Axially slidable only
454	.With tiltable container trap only
455	..Supplementary trap
456	..Single discharge passage forming trap
457	.Barometric or angle of repose trap chamber
457.5	HAND MANIPULABLE SHAKER WITH REVERSE OUTLET PASSAGE
459	STATIONARY AGITATOR
460	FUNNEL-TYPE OUTLET
461	.Movably interconnected
462	.Integral
463	ROCKABLE OR WEIGHTED
464	INTERNALLY EXTENDING OUTLET PIPE
465.1	WITH CONTAINER HANDLE OR HANDGRIPS
466	.Plural handles
467	..Detachable
468	.Vent in handle
469	.Movable handle interconnected with flow controller or closure
470	.Handle and actuator for flow controller or closure juxtaposed for one-handed manipulation

WITH CONTAINER HANDLE OR HANDGRIPS

.Handle and actuator for flow controller or closure juxtaposed for one-handed manipulation

471 ..Nonpivoted actuator reciprocable lengthwise of handle

472 ..Pivoted actuator

473 ...On handle

474 ...Generally lengthwise of handle

475 .Handle as spout, spout holder or guard

475.1 .Handle and spout for hot liquid decanters (e.g., coffee servers)

476 SPACED, ALTERNATELY SEATED FLOW CONTROLLERS OR CLOSURES FOR SINGLE OUTLET

477 RETARDED OR DELAYED ACTION FLOW CONTROLLERS OR CLOSURES

478 WITH PLURAL OPENINGS OR DISCHARGE GUIDES

479 .Coterminous (barometric)

480 .Hand-manipulable shaker, diverse-type openings (e.g., dredge top)

481 .Having flow controllers or closures

481.5 ..With movable flexible or remotely connected vent pipes

482 ..Plural and/or single for plural openings

483 ...Interlocked controllers and/or closures

484 ...Interconnected for operation and/or integral

485 ....For plural dispensing outlets

486 .....Variable number exposed and/or variably opened

487 ....Nonrigidly interconnected

488 ..For single passage into which plural passages merge

489 ...Screw-type flow controller or closure

490 SLITTED RESILIENT DIAPHRAGM OR NIPPLE

491 OUTLET ELEMENT OPERATED BY PRESSURE OF CONTENTS

492 .Axially slidable tube, sleeve, or apertured cap

493 ..Axial discharge

494 .Spring form, resilient or compressible flow controller or closure

495 .Reciprocable, nonpivoted

496 ..With biasing means

497 ...With additional means to hold against motion

498 SNAP-ACTING OUTLET ELEMENT

499 .Axially movable tube, sleeve, or apertured cap

500 GRAVITY OR INERTIA OPERATED MOVABLE OUTLET ELEMENTS

501 MOVABLE OUTLET ELEMENT ACTUATOR PROJECTING THROUGH DISCHARGE GUIDE

502 SECTIONAL FLOW CONTROLLER OR CLOSURE

503 .Interconnected for relative motion

504 MOTOR OPERATED OUTLET ELEMENT

505 WITH RELATIVELY MOVABLE ACTUATOR FOR OUTLET ELEMENT

506 .Plural flow controllers or closures

507 .Annular, outlet surrounding actuator

508 .For swingable elements in receptacle interior

509 .For nonrotary outlet element reciprocable axially of discharge opening

510 OUTLET ELEMENT IN ONE WALL, ROD ACTUATOR THROUGH CONTAINER INTERIOR AND ANOTHER WALL

511 WITH RESILIENT BIASING MEANS FOR OUTLET ELEMENT

512 .Joint sealing bias only

513 .For movable tubes, sleeves, or apertured caps

514 ..Axially slidable only

515 .For elements having plural, diverse motions

516 .For rotary elements

517 .For pivoted and swingable elements

518 .For elements reciprocable axially of discharge opening

519 AXIALLY ROTARY AND LONGITUDINALLY MOVABLE TUBES, SLEEVES, OR APERTURED CAPS

520 .Axial discharge

521 ..Axial sationary closure plug

522 AXIALLY SLIDABLE TUBES, SLEEVES, OR APERTURED CAPS

523 .Sectional, telescoping

524 .With telescopic guide pin

525 .Axial discharge

526 MOVABLE MATERIAL DISCHARGE GUIDE

527 .Foldable, bendable, collapsible or flexible

528 ..Closure type

529 ..With flow controller or closure

530 ..Nonuse securing means

531 .Closure type

532 ..With additional flow controller, closure or seal

533 .Swingable

534 ..Into container recess

535 ..From container interior

536 ..With flow controller or closure

537 .With flow controller or closure

538 NONUSE HOUSING OR SECURING MEANS FOR DISCHARGE GUIDES

539 .Reversible to extend into or out of container

540 OUTLET SEATED IN CONTAINER RECESS

541 WITH FRANGIBLE ELEMENT FOR OUTLET

542 WITH PACKING-TYPE SEAL FOR OUTLET

543 WITH SINGLE STRAND, CORD OR WIRE CONNECTOR FOR REMOVABLE OUTLET ELEMENTS

544 WITH FLOW CONTROLLER OR CLOSURE

545 .Plural and/or carried by separably attached element

546 ..Cap carried axial plug

547 .With interior material guide or restrictor

548 .Rotary, axially

549 ..With axial longitudinal motion

550 ...And additional pivotal motion

551 ...Nonapertured screw cap

552 ...Screw plug or disc

553 ..Apertured sleeve or cap, nonaxial discharge

554 ..Plug

555 ..Between fixed plates or flanges

556 .Pivoted

557 ..Pivot axis parallel to axis of outlet opening

558 ..Bail type

559 .Reciprocatory

560 ..Arcuate path

561 ..Between fixed plates or flanges

562 .Cap

563 .Plug

564 WITH INTERIOR MATERIAL GUIDE OR RESTRICTOR

565 SIFTER, SPRINKLER OR PLURAL OPENING PATTERNS

566 NOZZLES, SPOUTS AND POURING DEVICES

567 .With separable attaching means

568 ..Screw

569 ..Abutment for container interior

570 ..Rim mounted, interengaging groove and bead or flange

571 .Antidrip

572 .Integral with container walls

573 .Reinforced or with container-connected brace

	NOZZLES, SPOUTS AND POURING DEVICES
574	.With folded seam

DIG 1	Tie hanger
DIG 2	Holders and clamps
DIG 3	Reversible hanger
DIG 4	Hooks

101	CARRIED BY ANIMATE BEARER
44.5	.Hod
103	.Fish or game stringer or holder therefor
148	.Liquid-holding receptacle carried by, or formed as structural part of, carrier
149	.Receiver holding butt end of rifle or shotgun stock
150	.Sling attached to rifle or shotgun
151	.Convertible to, or usable as, different device or different type of carrier
152	..Watch carrier
153	..Backpack or component thereof
154	...Forming tent or component thereof
155	...Forming seat or component thereof
156	...Forming bed or litter or component thereof
157	.Article or person supported by plural bearers
158	.Carrier for person
159	..In upright or sitting position
160	...Two attaching means (e.g., straps, etc.) crossing different shoulders
161	....And seat mounted on or formed as part of framework or rigid shield
162	.Including or carrying a reel
163	.Mounted on or formed as part of belt buckle
164	.Watch attaching means extending circumferentially of wrist
165	..And supporting different article
166	..Means retaining watch if primary attaching means fails
167	..Means connecting watchcase to end of attaching means for motion about axis transverse to wrist
168	..Separate fastener securing watch pin or bail bar to middle portion of attaching means
169	..Fingers gripping watchcase at spaced points on periphery thereof
170	..Receiver disposed around watchcase
171	..Separate spacer or positioner between wrist and watch or attaching means
172	..Cord-type attaching means
173	..Separate decorative means secured to attaching means
174	..Curved arm hinged to watchcase and biased by separate means toward wrist clasping position
175	..Expandable strap
176	..Attaching means tightener other than buckle with pivoting tongue
177	..Separate fastener securing watch pin or bail bar to end of attaching means
178	..Multiple ply strap
179	..Rigid or semirigid band or arm
180	.Watch attaching means secured to watchcase pin
181	.Head supported
182	.Article or carrier attached to garment by means entering hole therein
183	.Including magnet
184	.Including towing means attached to person
185	.Article supported on upper end of elongate stanchion rotatably or swingably mounted on attaching means
186	.Canopy support
187	..Plural stanchions holding canopy
188	..Attaching means looped around neck or crossing shoulder
189	...Rigid attaching means
190	...Two flaccid attaching means crossing different shoulders
191	.Article held by receiver
192	..Handgun receiver usable on either side of torso
193	..Handgun receiver having vertically extending side edges spaced apart or separable for withdrawal of handgun therebetween
194	..Receiver attached to clothing by opposed means gripping gathered material
195	..Receiver supported for movement around torso by rigid means fixed on belt
196	..Means for ejecting article or moving it to accessible position
197	..Receiver rotatably or swingably mounted on attaching means
198	...Handgun receiver
199	...Closable receiver
200	...Receiver holding end of rod-like article
201	..Rigid support or attaching means looped around neck or crossing shoulder
202	..Flaccid attaching means looped around neck or crossing shoulder
203	...Cartridge receiver directly attached to, or formed as part of, shoulder or neck engaged attaching means (e.g., bandoleer, etc.)
204	...Single attaching means crossing both shoulders and extended circumferentially of torso under arms
205	...Carrier having single shoulder or neck engaged attaching means with flaccid receiver directly attached thereto or formed as part thereof
206	...Receiver held on one side of chest (e.g., shoulder holster, etc.)
207	...Shoulder or neck engaged attaching means held in aperture in receiver wall
208	...Carrier having single shoulder or neck engaged attaching means and attaching means extending circumferentially of torso
209	...Two attaching means crossing different shoulders
210	....And framework or rigid shield
211	.....And attaching means extending circumferentially of torso
212	.....Load-distributing web extending between vertical frame members
213	....Knapsack supported by two upstanding, elongate members having lower ends thereof supported by torso
214	....Flaccid strap-type holding means extending across or about article
215	....And attaching means extending circumferentially of torso
216	.....With receiver removably attached to means extending circumferentially of torso
217	..Attaching means engaged with finger
218	..Attaching means engaged with hand
219	..Attaching means extending circumferentially of wrist
220	...Freely suspended receiver
221	...Attaching means tightener
222	..Attaching means extending circumferentially of limb
223	..Plural receiver pockets formed by strip attached to backing at spaced points
224	..Receiver permanently mounted on or formed as part of torso-encircling carrier
225	...Metallic receiver

	CARRIED BY ANIMATE BEARER
	.Article held by receiver
	..Receiver permanently mounted on or formed as part of torso-encircling carrier
226	...Receiver hanging below belt
227	...Superposed pockets
228	...Fabric cover flap flexed between open and closed positions
229	...Holding article in concealment (e.g., money belt worn under clothing or having hidden pocket, etc.)
230	..Receiver held in clothing pocket
231	..Receiver shaping means
232	..Receiver holding knife, bayonet, sword, or ice pick
233	...Components separate to facilitate cleaning
234	..Receiver holding axe, hatchet, or splitting wedge
235	..Receiver closing means
236	...Flap flexed between open and closed positions
237	....Plural flaps on same receiver
238	....Handgun receiver
239	....Cartridge receiver
240	....Receiver removably attached to torso-encircling belt
241	...Hinged to receiver
242	..Retainer or positioner for article held by receiver
243	...Handgun receiver
244	....Retainer extending into trigger guard opening
245	...Located in receiver
246	...Flaccid retainer for receiver formed of rigid or semirigid material
247	..Opposed article gripping means
248	...Formed of wire or rod
249	..Article held in perforation in receiver wall
250	..Flaccid strap-type holding means extending across or about article
251	..Article held in ring or tube
252	..Clip or hook attaching receiver to support means on bearer
253	..Apertured member or loop attaching receiver to belt
254	.Article suspended by resiliently stretchable hanger
255	.Carrier component positioned in aperture in article or in retaining loop mounted thereon
256	..Tongue secured to separate support means on bearer
257	.Flaccid attaching means looped around neck or crossing shoulder
258	..Means for adjusting loop size or hanger length of attaching means looped around neck
259	..Two attaching means crossing different shoulders
260	...Article-suspending hanger on each side of torso
261	...And framework or rigid shield
262	....And attaching means extending circumferentially of torso
263	....Load-distributing web extending between vertical frame members
264	..Strap cushion or positioner located at shoulder
265	.Rigid support or attaching means looped around neck or crossing shoulder
266	..Yoke-type carrier
267	.Attaching means extending circumferentially of wrist or limb
268	.Article held by hook
269	.Clip or hook attaching article carrier to support means on bearer
270	.Article supported on horizontally extending member
271	.Rigid means fixedly mounted on article and detachably connectable to support means on bearer
272	.Rigid means connecting carrier components
273	VEHICLE ATTACHED
274	.Golf cart
275	.Seat associated
276	.Steering wheel or support column therefor
277	.Holder for sheet, card, or document
278	.Holder for diverse smoking items or materials (e.g., matchbox attached to ash tray, etc.)
279	.Intercommunicable carriers
280	.Dumpable receiver
281	.Slidable receiver
282	.Pivotable or rotatable receiver
29.5	.Railway
30 R	.Bicycle
30 A	...Handlebar attached
31	..Convertible and combined
32 R	..Receivers
32 A	....Rear wheel straddling
33 R	...Collapsible frame
33 A	.....Collapsible, handlebar attached
34	...Wrapper
35	...Forward reach supported
36	...Handlebar supported
37	..Spring holders
38	...Frame
39	..Bracket
40	...Folding
41	...Handlebar supported
42	..Hooks
42.01	.Convertible
42.03 R	.Combined with or supported by a bumper
42.03 A	...Receptacle
42.03 B	...Bicycle type
42.04	..Impact receiving carrier and/or article
42.05	..Displaceable bumper
42.06	..Wheel or tire carrier
42.07	..Platform type or rack
42.08	...Pivoted
309	.Carrier associated with vehicle roof or trunk lid
310	..Carrier having structure to facilitate loading (e.g., rollers, tracks, angled sides, etc.)
311	..Carrier mounted within vehicle compartment
312	...On sun visor
313	...For clothes hangers
314	..Removable carrier collapsible for storage
315	..Carrier with locking means
316	..Carrier having wind deflecting means
317	..Carrier and mounting therefor extend across half or less of vehicle
318	..Flexible carrier
319	..Carrier attached to carrier
320	..Expandable carrier
321	..Carrier having means to adjust position or attitude
322	..Single bar-type article supporting means removably attached exteriorly and transversely of vehicle
323	...Having opposed gripping elements to clamp supported article
324	..Carrier having article retaining means
325	..Carrier comprises plurality of spaced members

	VEHICLE ATTACHED
	.Carrier associated with vehicle roof or trunk lid
	..Carrier comprises plurality of spaced members
326	...Members fixedly attached to vehicle surface
327	..Article supporting portion of carrier contoured to conform to contour of vehicle surface
328	..Having enclosure or cover means
329	..Carrier to vehicle attaching means releasably engages the vehicle proximate the edge of the roof or trunk lid thereof
330	...Carrier adjustably connected to rigid support intermediate carrier and attaching means
331	...Attaching means is an individually acting clamp
42.11	.Straddle type
42.12	.For rim, tire or wheel
42.13	..Combined with rack or receptacles
42.14	...Nested
42.15	..Plural
42.16	...One supported solely by another
42.18	...With loop type or retainer
42.19	...With rim clamping means
42.2	..With cover or casing
42.21	..Movably mounted
42.23	..Underslung
42.24	..Wheel hub or hub opening engaging type
42.25	..With antitheft means
42.26	..Rim and/or tire gripping
42.27	...Expanding
42.28	....Swingably mounted
42.29	....Rectilinearly movable
42.3	...Movable laterally of tire rim plane
42.31	.Mud guard attached, i.e., fender
42.32	.Platform attached, e.g., running board type
42.33	..Upright retaining wall
42.34	...Flexible or collapsible
42.35	....Movable below platform
42.36	....Lazy tong type
42.37	..Article impaling
42.38	..Article clamping type
42.39	...Strap fastener
42.4	..Holddown
42.41	.Underslung
42.42	.Complementary
42.43	.Laterally projecting shelf type
42.44	..Movably mounted
42.45 R	.Bracket type
42.45 A	...Clothes hanger
42.46 R	.Suspended
42.46 A	...Clothes hanger

CLASS 225 SEVERING BY TEARING OR BREAKING

DECEMBER 1990

1 METHODS
2 .With preliminary weakening
3 .Longitudinally of direction of feed
4 .Transversely of continuously fed work
5 ..Progressively to or from one side edge
6 SEVERING BY MANUALLY FORCING AGAINST FIXED EDGE
7 .With other type severing means
8 .With timer-released means for preventing work feed-out
9 .Including means to effect bias cut
10 .With feed-out of predetermined length from work supply
11 ..Including means to select or adjust feed-out length
12 ..Including feed-out stop for manually pulled work
13 ...Stop abuts work edge or work-mounted article
14 ...With feed-out of lead-end to aid initial grasping
15 ..Merely to provide lead-end for manual grasping
16 ..Manually operated feed-out mechanism
17 .With indicator
18 ..Indicates length to be severed from supply
19 .With blade-edge guard
20 ..Movable
21 .Work stripped from blade by relatively movable means
22 ..Including movable blade
23 .With means to move work toward or into severing position
24 ..With means to strip adhering work therefrom
25 .With work-immobilizing paster surface
26 ..With finger-access opening
27 .With means to hold pad or stack of individual sheets
28 ..With means to separate severed end of stub from supply package
29 ..With changeable blade-edge contour
30 ...Slidable notcher
31 ..Blade slidable along plane of work surface
32 .Zigzag-folded supply package
33 .Separate blades usable alternatively or sequentially on same work supply
34 .Plural supply sources
35 ..On turret-type support with single blade
36 ..With movable blade registrable selectively with each source
37 ..With plural blades
38 ...With individual blade for each source
39 .With housing for work supply
40 ..Liquid-, gas-, or light-tight work passage
41 ..With inspection window or transparent panel
42 ..With mounting means for housing
43 ..Blade on pivoted closure for housing
44 ..Sectional telescoping housing
45 ...Including removable cap or sleeve enclosure for spooled work supply
46 ..Including special support for wound supply package
47 ...Bearing or trunnions to engage package core
48 ..Single blank container
49 ...Blade unitary with container
50 ...With closure fastener
51 ..With brake or tensioner
52 ...Restricted or restrictable work outlet
53 ..With finger-access opening to facilitate work feed-out
54 ..With internal guide
55 .Blade carrier bodily and slidably supported on running length work
56 .Blade mounted on hand-held wound package
57 ..With lead-end stripper for tacky adhesive work
58 ..By resiliently embracing outer circumference of package
59 ..Work supply nonrotatably wound on flanged spool
60 ...Circumferentially movable blade radially retained by beaded or grooved flanges
61 ...Blade carrier supports hollow spool for rotation
62 ...Flange edge notched to provide or coact with cutter
63 ...With clamp for lead-end of strand-type work
64 ....Strand clamped against flange
65 ..By resiliently engaging package ends or interior of core
66 ..Blade carrier supports package for rotation
67 .Movable blade continually biased toward wound web supply package
68 ..Including temporary bias-disabling means
69 ..Including stripper to separate lead-end from package
70 ..Weight of bodily movable package contributes to blade-biasing force
71 ..Blade slidably guided
72 .Blade movable to severing position by moving work
73 ..With simultaneous application of brake or clamp
74 ...Applied to running length work
75 ....Opposed movable jaws
76 .Wound package bodily biased toward fixed blade
77 .With fixed blade and support for wound package
78 ..Body- or belt-attached
79 ..With brake applied to supply package
80 ..With guide spaced from blade edge to provide lead-end therebetween
81 .With work-abutment stop
82 .With brake or clamp
83 ..Thread cutter and clamp attachment for sewing machine presser foot
84 ..Applied to running length work
85 ...Spaced from blade edge to provide lead-end therebetween
86 ....Blade manually movable to expose lead-end
87 ..Manually applied, spring returned
88 .With guide for running length work
89 .Blade manually movable to or from severing position
90 .With means to facilitate lead-end grasping
91 .Blades or severing devices
92 ..Adjustable blade-edge contour
93 BREAKING OR TEARING APPARATUS
93.5 .Including means to apply thermal shock to work
94 .Combined with preliminary weakener or with nonbreaking cutter
95 ..Successively actuated sharp and dull tools
96 ..Preliminary weakener
96.5 ...With means to apply moment of force to weakened work
97 .Plural breakers
98 .Conveyer diverter for moving work
99 ..Plural divergent work paths

	BREAKING OR TEARING APPARATUS
100	.Work-parting pullers (bursters)
101	..Relatively movable clamps
102	.Axial twisters
103	.Movable breaking tool
104	..Breaking tool intermediate spaced work supports
105	...Clamping supports
106	.Web restrainer

CLASS 226 ADVANCING MATERIAL OF INDETERMINATE-LENGTH

DECEMBER 1990

1 PROCESSES
2 .Involving registration of material
3 ..Involving lateral registration
4 .Involving plural feeding means
5 .Involving stripping from conveyer
6 .By engaging material modifications
7 .By fluid current
8 .Intermittently or interruptedly
9 CONTROL MEANS RESPONSIVE TO INDICIA CARRIED BY AUXILIARY RECORD (E.G., TAPE OR CARD)
10 WITH MATERIAL-RESPONSIVE CONTROL MEANS
11 .Responsive to break or depletion
12 .For threading device
13 .For flywheel
14 .For festooner
15 .To position material laterally
16 ..With control of longitudinal movement
17 ..By roller pair engaging web margin
18 ..By shiftable material support
19 ...Laterally movable support
20 ....Responsive to photocell detection
21 ...Pivotally mounted roller
22 ....Responsive to pneumatic detection
23 ....Responsive to material-contacting element
24 .To regulate longitudinal movement of material
25 ..Responsive to overload
26 ..Responsive to weight of accumulation
27 ..Registration
28 ...Of continuously moving material
29 ....By means to vary speed of material momentarily
30 .....By means to vary speed of feed roll
31 ......By ancillary power source
32 ...By means to change feeding movement of intermittent feed stroke
33 ...By means to discontinue movement of material
34 ..By means to vary engagement of feed means with material
35 ...Feed means moved out of engaging position
36 ..By ancillary feed means
37 ..By disconnectable connection in drive train
38 ..By means to retard material movement
39 ...By material contact
40 ...By variable-ratio transmission
41 ...Coaxially shiftable pulley cones
42 ..By variable speed power source
43 ...To stop and/or start movement of material
44 ..Responsive to dancer detector
45 .Detector means
46 WITH INTERLOCK MEANS
47 .And means to initiate operation of part
48 WITH RANDOMLY ACTUATED STOPPING MEANS
49 SELECTIVELY REVERSIBLE MATERIAL MOVER
50 .By optional moving means
51 .By optional drive trains
52 MEANS TO ENGAGE LONGITUDINALLY SPACED MODIFICATIONS IN MATERIAL
53 .Such means produces the modifications
54 .Alternately selectable prongs
55 .Prong operable intermittently to prevent longitudinal material movement (e.g., registration pins)
56 ..With means to disable restraining operation of prong
57 ..With positive actuator to project and to retract prong
58 ..With resilient means to urge prong toward material
59 .With additional means to restrict material movement
60 ..Fluctuation damping means
61 ...By flywheel
62 .Reciprocating or oscillating claw or finger
63 ..Serial sequentially operated claws
64 ..With means to change path or extent of claw movement
65 ...Range changer
66 ....To stop material movement
67 ..On longitudinally reciprocated carrier
68 ...Claw pivotable on carrier
69 ..On two rotated carriers
70 ..On carrier pivoted about a fixed axis
71 ...Claw pivotable on carrier
72 ...Claw radially slidable on carrier
73 ..Claw slides on and pivots about fixed stud
74 .Pins on flexible belt or chain
75 ..With means to effect supplementary pin movement
76 .Rotating sprocket (e.g., pin-wheel)
77 ..For concatenated material
78 ..Circumferentially opposite pins engage looped material
79 ..With laterally adjustable sprocket(s)
80 ..With means to disengage material from prong(s)
81 ...By supplementary movement of prong(s)
82 ..With means to retain material on prong(s)
83 ...Retainer and sprocket relatively displaceable
84 ....Roller retainer
85 ...Roller retainer
86 ..With additional means to support material
87 .Including detail of prong shape or construction
88 WITH MEANS TO TEMPORARILY DEFORM MATERIAL LATERALLY (E.G., FOR STIFFENING)
89 SHIFTABLE PART ALLOWING HAND LOADING
90 .With shiftable roller
91 THREADING DEVICE
92 .With means to pull lead-end
93 WITH ADHERENCE OR ATTRACTION OF MATERIAL TO ADVANCING MEANS
94 .By electrostatic force
95 .By pneumatic pressure
96 .By adhesive nature of material
97 BY FLUID CURRENT
100 WITH ALARM, SIGNAL, OR INDICATOR
101 CONVERTIBLE
102 COMBINED
104 BY FESTOONER
105 .With means to shift girt with respect to festoon and conveyer
106 .With means to hold material on girt
107 .With means to feed girt to conveyer
108 PLURAL MATERIAL-MOVING MEANS
109 .With plural paths for material
110 ..Alternately usable
111 .With means to independently vary mover speed
112 .Continuous feed from serial sequentially operated feeders
113 .With bight former
114 ..With pivotal former-support
115 .With intermittent material-mover
116 ..Including auxiliary material-mover for starting
117 ..And continuous material-mover
118 .With intermediate storage
119 ..By means to direct material in sinuous path
120 BY INTERMITTENT (INTERRUPTED) MATERIAL-MOVER
121 .Stored material-movement-derived energy provides moving force

BY INTERMITTENT (INTERRUPTED) MATERIAL-MOVER
122 .With means varying the material speed during movement
123 .Cyclical unequal movements
124 .Comprising constantly rotated roll on reciprocating or oscillating carrier
125 .Including material abutment
126 ..Movable with material
127 .Manual material-mover (e.g., dispenser)
128 ..With means to clamp material during dwell
129 ..With means to limit increment of advance
130 ...With means to disable operation of limit means
131 ....Time-controlled
132 ...Plural selectable limit means
133 ...With means to adjust limit means
134 .Unicyclic mover
135 ..Plural means to select increments of advance
136 ..With means to adjust increment
137 .Adjustable feeder
138 ..Operative-controlled, machine-powered adjustment
139 ..Adjustable feed increment
140 ...By means to vary material-engagement of recessed roll
141 ...By means to change length of feeder travel
142 ....Comprising variable-throw crank
143 .With means to effect feed and retrograde movement
144 .With overtravel preventer
145 ..Intermittently acting
146 ..And retrograde movement preventer
147 .With retrograde movement preventer
148 ..Unidirectionally rotating roll
149 ..Positively actuated to grip
150 ...By hydraulic or electrical means
151 ..Yieldingly biased
152 .Comprising material-moving roll
153 ..Recessed roll
154 ..With means to disengage roll from material
155 ...Continuously rotating roll
156 ..Unidirectional
157 ...Ratcheted roll
158 .Comprising reciprocating or oscillating material-mover
159 ..With means to retard movement of advancer carrier
160 ..On pivoted carrier
161 ..With means to disable material-mover
162 ..With means to move grip element into material engagement
163 ...Comprising link positively connected to element
164 ....Which link effects material-advancing movement
165 ...Comprising camlike surface
166 ....Which surface effects material-advancing movement
167 ..With spring-biased grip element
168 BY ORBITALLY TRAVELING MATERIAL-ENGAGING SURFACE(S)
169 .With start-facilitating means
170 .On endless belt or chain
171 ..With cooperating surface
172 ...Comprising endless belt or chain
173 ..With gripper(s) mounted thereon
174 .With control or adjustment means
175 ..To vary diameter of roll
176 ..To vary bite of contacting pinch members
177 ...Infinitesimally variable
178 ..To vary speed of material-advancer
179 ..For shifting roll(s) axially
180 ..For shifting roll(s) angularly
181 .Comprising rotary pinch pair
182 ..Including radial material-engaging surface
183 ..Including means to ensure arcuate engagement
184 ..Tapered roll or bite
185 ..Including equal-diameter coaxial rolls
186 ..Yieldable bite
187 ...Roll axis resiliently urged
188 .With drive means
189 .Plural spaced apart rolls (e.g., guide rolls)
190 .Including details of roll or mount
191 ..Roll surface radially movable
192 ...And axially movable (e.g., centering rolls)
193 ..Irregular friction surface (e.g., roughened)
194 ..Bearing or support
195 WITH MEANS TO RETARD MATERIAL MOVEMENT (E.G., "TENSIONER")
196 STATIC GUIDE
197 .Turning bar
198 .Resiliently urged
199 .Adjustable
200 MISCELLANEOUS

CLASS 227 ELONGATED-MEMBER-DRIVING APPARATUS

1 WITH RANDOMLY ACTUATED STOPPING OR DISABLING MEANS
2 WITH CONTROL MEANS RESPONSIVE TO SENSED CONDITION
3 .Responsive to work feed means
4 .Responsive to position of work support or anvil
5 .Work-responsive
6 ..Position of work
7 ...Control initiates driver-actuation
175 SURGICAL STAPLERS
176 .With magazine
177 ..Including biasing means
178 .Multiple driving means
179 ..Tubular driving path
180 .With cutting means
181 .With means to position a mating-member in alignment with driver
182 .With means to prevent partial drive cycle
8 WITH INTERLOCK MEANS
9 EXPLOSIVE-TYPE DRIVING MEANS
10 .With plunger
11 .With protective shield
12 STRETCHING TOOL WITH MEANS TO FASTEN FLACCID WORK TO RIGID BASE
13 .Including mechanical means to apply force to stretching tool
14 WITH MEANS TO CEMENT WORK OR MEMBER
15 WITH MEANS TO POSITION "MATING-MEMBER" IN ALIGNMENT WITH DRIVER
16 .Strip-type "mating-member"
17 .With means to form "mating-member"
18 .Comprising feed means for "mating-member"
19 WITH MEANS TO ASSEMBLE PLURAL PIECES OF WORK
20 .With means to deform work
21 ..Including cutting means
22 ..Including means to rotate work
23 ...With die-shaping means
24 ...With end-inserting or clamping means
25 ..Means to buckle flaccid work
26 .With means to place member between workpieces (e.g., dowels, etc.)
27 .With drilling or punching means
28 .With means to sequentially secure layers (e.g., heels, etc.)
29 ..With work clamp
30 .With driver acting through clamp jaw
31 .Bight attaching means (e.g., buttons, etc.)
32 ..Including means to insert member in bight
33 ...With member-forming means
34 ...After member is applied to a workpiece
35 ....Single pointed member
36 ....With work feed means
37 ..With work feed means
38 ...With means to actuate driver
39 .Work conveyer means
40 ..Including common means to shift and clamp work
41 ..Pivoted work carrier
42 ...Plural pivotal axes
43 ..Including means to align member-aperture with member
44 ..Endless conveyer
45 ...Including magazine-type work supply means
46 ...With reel-type work supply means
47 ....Including work cutting means
48 ..Including magazine-type work supply means
49 ...With means to rotate work
50 ...With means to move assemblage to fastener station
51 WITH MEANS TO HEAD MEMBER
52 .Driver or heading means located within tubular work
53 .Common tool to drive and head member
54 .Pointed or edged tool
55 .Heading tool extends within hollow portion of member
56 ..Simultaneously used heading tools
57 ..With work feed means
58 ..With means to form opening in work for member
59 ...Heading means also acting as opening former
60 ..With pilot pin
61 .Anvil
62 ..Die
63 WITH MEANS TO WITHDRAW MEMBER
64 WITH MEANS TO SHAPE WORK OR CUT PRODUCT
65 .Buckling of flaccid work
66 .Deforming means with rectilinear reciprocating motion
67 .Means to form opening in work for member
68 ..Driver also acting as punch
69 ..Rotatable cutting tool
70 ..Plural cutting tools (e.g., awls, etc.)
71 ...For dual openings
72 ...With pivoted tool carrier
73 ..Including work-feeding means
74 ...Cutting tool having work-feeding motion
75 ....With pivoted tool carrier
76 .Cutting means
77 WITH MEANS TO DEFORM MEMBER REMOTE FROM THE WORK SURFACE AFTER WORK PENETRATION
78 SELECTIVE ALTERNATIVE APPLYING MEANS
79 WITH MEANS TO CUT MEMBER AFTER PENETRATION
80 .From material of indefinite length
81 DRIVING MOTION OF DRIVER HAS COMPONENT IN DIRECTION OF MOVING WORK (I.E., FLYING DRIVER)
82 WITH MEANS TO FORM MEMBER PRIOR TO PENETRATION OF WORK
83 .Deflector
84 .With means to vary length of members
85 .With offset tools to deform members (e.g., bending, drawing, etc.)
86 ..With cutting edge on driver
87 ..With driver acting through offset tools
88 ...Including retractable forming bar
89 ....With movable member-holder
90 ....Pivoted
91 ...Including diverse means to sever and apply member
92 .With opposed tools to form member (e.g., forging, swaging, etc.)
93 .Severing means sole member former
94 ..Including plural diverse severing operations
95 ..With feed means for concatenated members
96 ...Pivoted feed means
97 ..Severing means moves member to driver
98 ..With reciprocating member carrier to driver
99 WITH MEANS TO CONVEY WORK OR PRODUCT RELATIVE TO DRIVING STATION
100 .Interrelated conveying and driver-actuating means
101 ..With means to move both the conveyer and a driver carriage
102 ..With means to vary timed relationship between conveyer movement and driver-actuating means

WITH MEANS TO CONVEY WORK OR PRODUCT RELATIVE TO DRIVING STATION
.Interrelated conveying and driver-actuating means
103 ..Plural conveying means
104 ..With compound movement of work holder
105 ..With rotary movement of work holder
106 .Work holder moves in curved path
107 WITH MEANS TO MOVE OR GUIDE MEMBER INTO DRIVING POSITION
108 .With work-penetrating clenching tools
109 .Adaptable to dispense different sizes or quantities of members
110 .With positionable driver
111 ..Including means to move driver carriage
112 .Fluid-contact member-feed means
113 .Magnetic member-feed and/or holding means
114 .Including means other than the driver to separate leading member from a supply
115 ..Interrelated separator elements
116 ..Rectilinear motion
117 ..Rotary
118 ...Oscillating separator
119 .With means to assure correct orientation of member(s)
120 .Including supply magazine for constantly urged members
121 ..With means to prevent partial drive cycle
122 ..With means to cut jammed member
123 ..With removable or resiliently urged (antijam) noseplate
124 ..With interrelated driver and work clamp
125 ..With means to disable urging means
126 ...By lock means
127 ..With magazine closure
128 ...Pivoted magazine cover
129 ..With means to actuate driver
130 ...Fluid pressure means
131 ...Magnet or solenoid
132 ...Spring
133 ...Inertia means
134 ..Spring-retracting means
135 .Including carrier feed means for a plurality of members
136 ..With means to feed strip-type carrier
137 ..Rotary
138 .Driver actuates member-feed means
139 .With means to guide member
140 WITH MEANS TO SUPPORT MEMBER AND/OR WORK RELATIVE TO DRIVER
141 .Driver moves work, member held stationary
142 .With means to vary the length of the tool stroke
143 .With means to move elements of tool-pair during driving
144 ..Pivoted tool element
145 .Curved driver path
146 .Spring-actuated driver
147 .Impact-type driver
148 .Comprising means to angularly orient member
149 .Bias-type member holder
150 .Means to guide moving work
151 .Work immobilizer
152 ..Means to clamp work
153 ...Interrelated with driver-actuation
154 .Work support
155 ..Including clenching means

CLASS 228 METAL FUSION BONDING

DECEMBER 1990

101	PROCESS
102	.With condition responsive, program or timing control
103	.With measuring, testing, indicating, inspecting or illuminating
104	..Nondestructive testing
105	..Using optical viewing means (e.g., microscope)
106	.Using a compliant cushioning medium
107	.Using explosive energy
108	..Specific rate of explosive burn or approach of preforms
109	..Critical spacing between preforms
110	.Using high frequency vibratory energy (e.g., ultrasonic)
111	..With treating other than heating
112	.Using dynamic frictional energy
113	..Inertia type
114	..With treating other than heating
115	.Using only pressure (e.g., cold welding)
116	..With pretreating of work
117	..Cold rolling
118	.Using bond inhibiting separating material
119	.Repairing, restoring or renewing product for reuse
120	.Mechanically joining metal/nonmetal and bonding to the metal
121	.Bonding nonmetals with metallic filler
122	.Metal to nonmetal with separate metallic filler
123	..Semiconductor-type nonmetallic material
124	..With treating
125	.With removing or reshaping of filler material or flash after bonding
126	.Encasing a rodlike core within a substantially coextensive tube by complete bonding therebetween
127	..Thermally induced pressure weld
128	..With mechanical interlock
129	..By bending planar part to form tube around rodlike core
130	...Progressively
131	..By fitting rodlike core within tube
132	...Joining through filler
133	....Preplacing solid tubular filler
134	....Applying molten filler from top reservoir
135	.With supplementary mechanical joining
136	..Deforming of work part
137	...Lock seaming
138	...Attaching of bridge or tie member
139	..Using separate fastener
140	...Threaded fastener
141.1	.With shaping
142	..Corner mitering
143	..Of multilayer tube from single web
144	..And edge joining of one piece blank or strip
145	...To form helically seamed tube
146	...Progressively bending and joining
147	....Forming indefinite length member
148	.....Sheathing, cable or wire
149	...Uniform thickness thin blank or strip
150	....Elongated seam
151	.....Butt joining
152	...Irregular thick blank or strip
153	..Lap joining of parts of nonplanar surfaces
154	...For telescoping sleeve
155	..Subsequent to bonding
156	...Drawing elongated member through die
157	...Spreading or expanding work between bond joints (e.g., honeycomb or heat exchanger making, etc.)
158	...Rolling
159	...Removing of material
160	....By cutting
161	.....Producing internal cavity, aperture, or opening
162	.....Abrading
163	....By melting
164	..Prior to bonding
165	...Forming channel, groove, or aperture for reception of filler material
166	....Elongated seam
167	....Planar intersecting channel walls
168	....Annular seam
169	.....Having U-shaped or curved cross-section
170	...By cutting
171	....Producing opposed complementary matching bonding surface
172	....Abrading
173.1	...By deforming
173.2	....Pressing first work part against second work part
173.3	....Preforming work faying surface
173.4	....Tube or frame member
173.5	....Rod, bar, or wire-like object
173.6	....Sheet material
173.7	.....Continuously feeding sheet material
174	...Forming channel, groove, or aperture
265	..With concurrent bonding
175	.Plural diverse bonding
176	.Combined
177	.Alternative bonding
178	.Plural joints
179	..Of electrical devices (e.g., semiconductors)
180.1	...Simultaneous bonding of multiple joints (e.g., dip soldering of printed circuit boards)
180.2	....Component terminal to substrate surface (i.e., nonpenetrating terminal)
181	..Honeycomb structure
182	..Of mechanical article
183	...Heat exchanger structure
184	...Pressure vessels, tanks, and container-type structures
185	..Noncoextensive lamina to common base in regular pattern
186	..Preliminary sealing of joints
187	..Separate successive bonds at different temperatures
188	..Including nonmetallic base
189	..Using bridge or spacer
190	..Of concurrently bonded stacked laminae
191	.With disassembling of bonded joint (e.g., desoldering)
192	.Chain link
193	.Diffusion type
194	..Using intermediate diffusion facilitating material
195	..With incipient melting of bonding surface
196	.Autogenous fusion
197	..With diffusion of atoms or nuclear particles
198	.Chemical reaction produces filler material in situ
199	.With subsequent treating other than heating of bonded parts and/or filler material
200	..Cooling under particular conditions
201	..Cleaning
202	...Chemical
203	.With pretreating other than heating or cooling of work part of filler prior to bonding and any application of filler
204	..Applying porous or capillary feed material

	PROCESS
	.With pretreating other than heating or cooling of work part of filler prior to bonding and any application of filler
205	..Cleaning
206	...Chemical
207	....Applying flux
208	..Applying preliminary bond facilitating metal coating
209	...Chemical deposition
210	...Mechanically secured
211	..Chemical
212	.With clamping or holding
213	..And unclamping
214	.With protecting of work or filler or applying flux
215	..By confining filler
216	...Using backup means
217	..Using getter
218	..Using gas, vapor, vacuum, or reactive flame
219	...Gas or vapor
220	....Reducing gas
221	...Vacuum
222	..Using cooling means (e.g., heat sink or barrier)
223	..Applying flux
224	...Flux affixed to or incorporated with filler
225	.Plural filler applying
226	..Diverse fillers
227	.Plural heat applying
228	..And applying pressure
229	..Separate and distinct heating of work and filler
230	..Diverse heating
231	..Including post heating
232	..Including preheating
233	.Critical pressure
234	..And critical temperature or heating
235	...Roll bonding
236	..Including specific rate of applying
237	..Including particular mode of applying
238	.Critical temperature or heating
239	..Including specific rate of applying
240	..Including particular mode of applying
241	...By exothermic reaction
242	.Including particular mode of applying heat or pressure
243	..Pressure
244	.Feeding unfused filler into fusing contact with work part
245	.Preplacing solid filler
246	..Particular size or shape
247	...Indefinite length
248	..Applied in powdered or particulate form
249	..Joint interposed
250	...Butt
251	...Lap
252	...Coextensive sheet
253	...Attaching filler to work part
254	....Adherent solid layer or coating (e.g., pretinned)
255	....Mechanically secured
256	.Applying or distributing fused filler
257	..By gravity
258	..By capillary action
259	..By immersing in stagnant pool
260	..Using pumped stream or jet
261	..Using spray
262	..With agitating or vibrating (e.g., using ultrasonic energy)
263.11	.Using critical metal filler or work part
263.12	..Nonmetal or nonmetal with metal film
263.13	..Nickel or cobalt
263.14	..Ferrous metal
263.15	...Steel
263.16	....And nonferrous metal
263.17	..Aluminum or magnesium
263.18	..Copper or nobel metal
263.19	..Refractory metal
263.21	...Titanium or zirconium
264	PROCESSES OF DISASSEMBLING BONDED SURFACES PER SE (E.G., DESOLDERING)
1.1	MEANS TO APPLY VIBRATORY SOLID-STATE BONDING ENERGY (E.G., ULTRASONIC, ETC.) TO WORK
2	INCLUDING MEANS TO PROVIDE HEAT BY FRICTION BETWEEN RELATIVELY MOVING SURFACES
2.5	EXPLOSIVE WELDING MEANS
3.1	MEANS TO BOND BY APPLYING ONLY PRESSURE (E.G., FOR COLD WELDING, ETC.)
4.1	WITH MEANS TO JUXTAPOSE AND BOND PLURAL WORKPIECES
4.5	.Wire lead bonder
5.1	.Witn means to treat workpieces (e.g., cutting, deforming, etc.)
5.5	.Including compliant cushioning medium
5.7	.Strip leading end to trailing end bonder
6.1	.Plural discrete workpieces
6.2	..With electrical connection made at joint
7	WITH MACHINE PART RESPONSIVE TO TEMPLATE OR PATTERN OR TO INDICIA CARRIED BY AUXILIARY RECORD (E.G., TAPE, CARD, ETC.)
8	WITH CONTROL MEANS RESPONSIVE TO SENSED CONDITION
9	.Work-responsive (e.g., temperature, orientation of work, etc.)
10	..Presence of work
11	...To control feed of filler
12	.Responsive to position of work carrier
13	WITH MEANS TO CUT OR SEPARATE WORK, FILLER, FLUX, OR PRODUCT
14	.Plus means to apply cut filler or cut flux to work
15.1	WITH MEANS TO DEFORM WORK, FILLER, OR FLUX PORTION BEFORE FUSION
16	.By a funnel-shaped conduit (e.g., welding bell, etc.)
17	.By roller means
17.5	.Comprising means forming one-piece blank into a tubular shape
17.7	..Helical tubular shape
18	COMBINED
19	WITH MEANS TO REMOVE, COMPACT OR SHAPE APPLIED FLUX OR FILLER
20	.By fluid blast or suction
21	.With shield or guide for removed material
22	.Including wiper
23	..Comprising endless wiper
24	INCLUDING REPETITIVE IMPACT FUSION-BONDING MEANS
25	INCLUDING APPLICATOR MOVABLE DURING FUSION
26	.Including "flying" applicator engaging moving work
27	.With lateral oscillation along path of seam
28	.Reciprocatory or oscillatory motion
29	.Orbital or plane curvilinear motion
30	..Cf roller applicator
31	...With associated bath of liquid flux or filler
32	.Means to move applicator
33	INCLUDING MEANS TO APPLY FLUX OR WORK, OR TO SUPPLY FLUX OR FILLER TO APPLICATOR
34	.With means to skim dross

	INCLUDING MEANS TO APPLY FLUX OR WORK, OR TO SUPPLY FLUX OR FILLER TO APPLICATOR
35	.By brush, wick or pad
36	.By partial or total immersion of work or applicator into liquid
37	..Flowing flux or filler (e.g., wave former, etc.)
38	..With means to roll or orbit work portion
39	..With means to mask or stop work
40	..Comprising work immersion
41	.Solid flux or solid filler
42	.Gaseous flux
43	.Moving work
44.3	INCLUDING MEANS TO FORCE OR CLAMP WORK PORTIONS TOGETHER DURING BONDING
44.5	.Comprising tube aligning means
44.7	.Work portion comprises electrical component
45	INCLUDING MEANS TO MOVE OR GUIDE APPLICATOR
46	WITH MEANS TO COOL WORK OR PRODUCT
47	WITH MEANS TO HANDLE WORK OR PRODUCT
48	.Including means to rotate cylindrical work
49.1	.Including means to orient work or position work portion relative to another work portion
49.2	..Means to rotate work and to position work about a different axis
49.3	..Pipe joint aligner
49.4	..Sheet aligner
50	SEAM BACKUP MEANS
51	METALLIC HEAT APPLICATOR (E.G., SOLDERING IRON, ETC.)
52	.With means to handle flux or filler
53	..With means to heat applicator
54	.Tip or head alloy or polymetallic structure
55	.Adjustable or detachable head or tip
56.1	SPECIALIZED POT
56.2	.Having means to treat flux or filler
56.3	SOLDER FORM
56.5	WITH SIGNAL, INDICATOR, GAUGE, OR STOP
57	MISCELLANEOUS

58	APPARATUS FOR BONDING BATTERIES (I.E., PLURAL CELLS)
59	HEAT SHIELD
60	TUBE END CLOSING
901	PROCESS OF BONDING BATTERIES
902	USING FLAME
903	METAL TO NONMETAL
904	WIRE BONDING

100	PAPERBOARD BOX
101	.Variable volume
102	.Tamper indicating
103	.Convertible
103.1	.Combined with drinking tube (e.g., straw)
104	.Elevated bottom wall included in a one-piece box construction
105	.Edges of rectangular bottom wall are at 45 degrees to edges of rectangular stock material
106	.Including a plygonal bottom wall and a curved side wall
107	.Including a sector-shaped wall (e.g., pie-shaped, semicircular, etc.)
108	.Including a polygonal, nonrectangular wall
108.1	..Collapsible along supplemental fold line
109	..Octagonal
110	..Hexagonal
111	..Trapezium-shape
112	..Trapezoidal
113	...Three or more trapezoidal walls (e.g., truncated pyramid-shaped box)
114	....Including a side wall which slants upwardly and outwardly
115	..Triangular
116	...Three or more triangular walls (e.g., pyramid-shaped box)
117	.Automatic bottom (i.e., multipart bottom wall forms automatically during erection of collapsed box)
117.01	.Collapsible along supplemental fold line
117.02	..Separate end cap contains the side walls in collapsed configuration
117.03	..Including anti-collapse feature
117.04	...Flat anti-collapse element overlies supplemental fold line
117.05	..Two opposed side walls and the bottom wall fold upon themselves
117.06	...Bottom wall collapses outwardly
117.07	..Two opposed side walls fold inwardly and downwardly
117.08	...Two other opposed side walls fold outwardly and downwardly
117.09	.Lifting or suspending element (e.g., handle)
117.11	..Element portion or extension crosses all or part of the box bottom
117.12	..One-piece with the box
117.13	...Box includes hand-receiving aperture
117.14	....Handle elements or portions located above the box top include aligned, hand-receiving apertures
117.15	.....A handle element or portion extends through a hole or gap in the box
117.16	....Hand-receiving aperture extends through a box side wall
117.17	.....Apertured side wall includes a downwardly folded extension of itself
117.18	...Box includes aperture for rod-like support
117.19	..Detachable
117.21	..Wire
117.22	..With provision for positioning element in a nonuse location
117.23	..Single lifting or suspending element
117.24	...Element extends through a hole or gap in the box
117.25	....Element extends through hole in the each of two opposed side walls
117.26	...Element secured to opposed side walls
118	.With detachable product-information band
119	.With drainage feature
120	.With venting or ventilation means
120.1	..Live animal shipping box (e.g., chick box, etc.)
120.01	.Plural
120.02	.Compartmented
120.03	..Including independently operable closures for at least two compartments
120.04	...A closure includes a folded flange which forms a partition when the box is closed
120.05	..Partition includes securing means for a closure
120.06	..Partition detached from box blank
120.07	..Partition made of plastic
120.08	..Partition unitary (i.e., of one-piece construction) with and folded from a box wall
120.09	...Relatively movable compartments
120.11	...Partition includes adjoining walls of tubular box sections
120.12	...Oblique partition
120.13	...Partition folded from a downwardly extending side wall extension
120.14	...Partition cut and folded from a box wall
120.15	....Side wall
120.16	....Bottom wall
120.17	...Partition folded from bottom wall
120.18	...Partition folded from a side wall
120.19	....Including a nonunitary, horizontal partition (i.e., in addition to the unitary partition)
120.21	....Unitary partition is horizontal
120.22	..Curved partition
120.23	..Oblique partitions folded from a single sheet of material
120.24	..Parallel partitions folded from a single sheet of material
120.25	...Including a nonunitary transverse partition (i.e., not of one-piece construction with the parallel partitions)
120.26	...Including a transverse partition which is part of the single sheet of material
120.27	....The parallel partitions are cut and folded from the transverse partition
120.28	....The transverse partition is horizontal
120.29	..Perpendicular partitions are part of a single sheet of material
120.31	..Collapsible compartments formed by partitions permanently attached to each other
120.32	..Horizontal partition
120.33	..Including partition retaining means which is not unitary with the partition
120.34	...Retaining means includes channels or grooves for ends of the partition
120.35	..Oblique partition
120.36	..Nonunitary, intersecting partitions
120.37	..Self-sustaining container-like compartment-forming structure
120.38	..Partition folded from an entire sheet of material separate from the box
121	.Including two or more separate access openings
122	.Including an access opening in a side wall intended to permit lateral insertion or removal of content
122.1	..Contents gravity fed to access opening
122.2	.Including an access opening in the box bottom

PAPERBOARD BOX

123 .Tiltable side wall provides enlarged access opening in box top
123.1 .Nonunitary peelable closure or securing element (i.e., not of one-piece construction with the box)
123.2 .Including tearing or breaking means for opening a nonunitary closure or releasing a nonunitary securing element (i.e., the closure or securing element is not of one-piece construction with the box)
123.3 ..Tearing or breaking provides hinged reclosure element
124 .With closure for an access opening
125 ..With means for securing closure element in an open configuration
125.01 ..Nonunitary closure (i.e., not of one-piece construction with the box)
125.02 ...With means to bias closure into closed position
125.03 ...Closure has secondary use (e.g., as an eating utensil)
125.04 ....Pour spout
125.05 ...Separately operable, superposed closures for one access opening
125.06 ...Closure adjustable for different size access openings
125.07 ...Closure mounted for compound movement
125.08 ...Closure mounted for swinging movement (e.g., hinged)
125.09 ....Plug-type closure
125.11 ....Including a nonunitary hinge (i.e., not of one-piece construction with the box or closure)
125.12 ...Laterally slidable closure element (i.e., slides across access opening)
125.13 ...Closure secured to open box end by frame or ring
125.14 ...For an access opening extending through a nonunitary box end-closing element (i.e., the element is not of one-piece construction with the box)
125.15 ...For an access opening formed by a cut-out in a box wall
125.16 ...Including a gasket
125.17 ...Plug-type closure
125.18 ...Tethered closure
125.19 ...Closure includes a depending flange or tab which extends along an adjacent box wall
125.21 ....With a nonunitary securing element (i.e., not of one-piece construction with the box)
125.22 .....String, cord, or ribbon
125.23 .....Nonunitary securing element on closure engages nonunitary securing element on box (i.e., securing elements not of one-piece construction with the box)
125.24 ....Threaded
125.25 ....Flange or tab overlaps rolled container rim or bead
125.26 ....Flange or tab interlocks with downwardly extending flange or tab on box
125.27 ....Flange or tab interlocks with horizontal flange or tab on box
125.28 ....Flange or tab extends through opening in box material
125.29 ....Closure includes slit or aperture to receive a projection from a box wall
125.31 ....Flange or tab extends between two layers of box material
125.32 ....Flange or tab extends into box interior
125.33 ...Closure bonded to box
125.34 ....Including a flexible sheet bonded to one or more closure flaps
125.35 ....Bonded to box rim or adjacent flange
125.36 ...Closure interlocks with horizontal flange on box
125.37 ..Including a nonunitary securing element for a closure (i.e., element is not of one-piece construction with the box)
125.38 ...String, cord, or ribbon
125.39 ...For securing two or more closure flaps in place
125.41 ....Securing element extends through the outer of two overlapping closure flaps
125.42 ..One-piece box construction includes a closure useable as a pour spout (e.g., gable-top carton)
126 ..Foldable wall extension (e.g., closure flap)
127 ...Two opposed extensions have folded confronting flanges
128 ...Including means for biasing extension into closed position
129 ...Telescoping closure formed from plural extensions
130 ...Including stop to limit opening movement of closure
131 ...Closed extension includes fixed and movable portions joined at a hinge line.
131.1 ...Access opening cut out of a foldable wall extension
132 ...Overlapping extensions bonded together
133 ....Including a sealing web formed by partial delamination of a wall extension
134 ....Including embossing or scoring to enhance the bond
135 ....Including means to restrain inward movement of inner extension during bonding
136 ....Extensions bonded by means of a cohesive or pressure sensitive type adhesive
137 ....Extensions of adjacent box walls hingedly attached together
138 ...Extensions of adjacent box walls hingedly attached together
139 ....Three extensions form a pocket to receive fourth extension
140 ....One extension extends along an adjacent box wall
141 ...Extension includes a depending flange or tab which extends along an adjacent box wall
142 ....Two or more extensions include a depending flange or tab
143 .....Each of two opposed extensions includes flanges or tabs depending from two opposite edges
144 ....Flange connected to two box walls by a foldable web
145 ....Plural flanges interconnected to form a skirt
146 .....Box wall or portion thereof pivots with extension during opening of the box
147 ....Flange or tab folded to extend along two or more box walls
148 ....Flange or tab includes slit or aperture to recieve a projection from a box wall

	PAPERBOARD BOX
	.With closure for an access opening
	..Foldable wall extension (e.g., closure flap)
	...Extension includes a depending flange or tab which extends along an adjacent box wall
149	....Flange or tab extends through opening in box material
150	.....Opening extends through a wall extension
151	....Flange or tab extends between two layers of box material
152	....Flange or tab extends into box interior
153	.....Including means for securing flange or tab in closed position
154	....Extension includes two or more depending flanges or tabs
155	...Plural extensions mechanically interlocked with each other
156	....One extension interlocks with at least two others
157	.....The one extension projects through an opening in each of the others
158	....One extension projects through two separate openings in another extension
159	...Extension formed of two or more thickness of box material
160	...Access opening includes a rim for supporting a wall extension
160.1	..Hinged closure includes material cut from a box side wall (e.g., cigarette box)
160.2	..Including means to facilitate the application of an opening force to the closure (e.g., pulltab, thumb notch, etc.)
161	.A box wall includes box material cut from another box wall
162	.Window or transparent portion
163	.Horizontal, outwardly extending bottom flange
164	.Different height side walls
165	.A side wall includes a horizontally or downwardly extending panel attached along a horizontal fold line which is spaced above the box bottom
166	..Separate reinforcing member located within fold
167	..Panel forms a hollow side wall or side wall portion
168	...Hollow side wall has a nonrectangular cross section
169	..Panel forms planar, horizontal flange or flap spaced from box bottom
170	...Flange or flap includes a portion of a folded corner connector (i.e., "corner fold" or "corner flap")
171	..Panel is located outside the box
172	..Panel include a folded flap or tab which overlaps an adjacent box wall (e.g., side wall or bottom wall)
173	...One or more flaps combine to cover entire bottom wall
174	...Flap or tab overlaps an adjacent side wall
175	....Flap or tab is coplanar with a downwardly extending panel of the adjacent side wall
176	....Flap or tab underlies a downwardly extending panel of the adjacent side wall
177	..Panel has opening or notch to receive a portion of a folded corner connector (i.e., "corner fold" or "corner flap")
178	..Panel or panel portion projects into an opening or notch in the box material
179	...Opening or notch located in folded corner connector (i.e., "corner fold" or "corner flap")
180	..Panel or panel portion is located between two layers of box material
181	..Panel secured in folded position by a separate fastening device (e.g., adhesive tape, staple, etc.)
182	..Panel secured in folded position by a heat weld or adhesive, per se
182.1	.Box includes straight side walls and rounded corners
183	.Bottom wall includes a folded extension of a side wall
184	..Extensions of adjacent side walls foldably attached together
185	..Plural extensions mechanically interlocked with each other
186	.Adjacent side walls connected by a folded web unitary with both (i.e., "corner fold")
187	..And by a laterally folded extension which is unitary with only one of the side walls (i.e., "corner flap")
188	..Tab-like member on web extends through opening in box material
189	..Web secured in folded position by a separate fastening device (e.g., adhesive tape, staple, etc.)
190	.A side wall includes a folded lateral extension of an adjacent side wall (e.g., "corner flap")
191	..Extension forms hollow, upstanding corner element
192	..Each of two adjacent sidewalls has a folded lateral extension where they join
193	..Folded extensions of opposed side walls overlap one another
194	...And are mechanically interlocked with each other
195	..Extension projects into an opening in the box material
196	...Extension projects into two or more separate openings
197	...Extension includes a downwardly opening slit or notch
198	..Extension secured in folded position by a separate fastening device (e.g., adhesive tape, staple, etc.)
198.1	.Adjacent side walls connected only by a separate securing element
198.2	.Miscellaneous joint construction
198.3	..Including separate securing element
199	.Separate reinforcing element
40	.Wrappers
19	.Slide
20	..Dispensing
23 R	.Multiple

CLASS 231 WHIPS AND WHIP APPARATUS

1	WHIP MACHINES
2.1	WHIP
3	.Convertible whips and canes
4	.Lashes
5	.Lash and snap fastenings
6	.Caps, buttons and joints
7	.Electric prod

CLASS 232 DEPOSIT AND COLLECTION RECEPTACLES

DECEMBER 1990

1 R MISCELLANEOUS
1 A ..Combined mail and food box
1 B ..Laundry holders
1 C ..Newspaper holders
1 D ..Money, coin, check, memo holders
1 E ..Wall receptacle
2 BALLOT BOXES
3 .Ball
4 R SAVINGS BOXES
4 D ..Drawer bottom release
5 .Inspection
6 .Frame fastenings
7 FARE BOXES
8 .Ticket punching and canceling
9 .Multiple coin slot and runway
10 .Ticket and change
11 .Ticket, car
12 .Receivers
13 .Illumination
14 .Change gates
.Collection devices
15 ..Safety receptacles
16 ...Auxiliary
17 LETTER BOXES
18 .Ticket registers and recorders
19 .House
20 ..Collection and delivery
21 ...Compartment
22 ..Door or window jamb
23 ..Inside fastener
24 .Compartment
25 ..Cooperative closures
26 ...Distributing guide
27 .Collection and delivery
28 .Pivoted receiver
29 .Auxiliary, cooperating
30 .Collection devices
31 ..Safety receptacles
32 ...Auxiliary
33 .Package clips and pockets
.Signals
34 ..Sight
35 ...Door-controlled
..Sound
36 ...Door-controlled
.Indicators
37 ..Door-operated
38 .Frame construction
39 .With supports
41 R MILK RECEPTACLES
41 A ..With locking means
41 B ..Leave empty and receive full
41 C ..With turnstile
41 D ..Once openable and locked upon closure
41 E ..With neck lock
42 .Door or window jamb
43 .Funnel filler
43.1 SEPARATE INLET AND OUTLET OPENINGS
43.2 .With removable receiving chamber
43.3 .With means for moving the deposited matter within the receptacle
43.4 .With horizontally aligned inlet and outlet openings
43.5 .With support
44 CLOSURES AND CHUTES
45 .Letter box
46 ..Nameplate
47 ..Pivoted trap
48 ...Double
49 ...Pocket
50 ....Bottomless
51 ....Integral door
52 ...Turnstile
53 ..Discharge
54 ..Guard fingers
55 .Coin trap
56 ..Endless carrier
57 ..Pivoted
57.5 ...Refunding
58 ...Cooperating chute closure
59 ....Multiple trap
60 ...Rotatable
61 ....Turnstile
62 .Gravity reverse checks
63 .Serrated shelves
64 COIN DELIVERERS (E.G., FOR DUMPING INTO COLLECTOR'S HAND)
65 .Swingable or tiltable delivering element
66 ..With controlled discharge outlet

CLASS 234 SELECTIVE CUTTING (E.G., PUNCHING)

DECEMBER 1990

1 METHODS
2 .Comprising utilization of a pattern
3 ..And modification of the pattern or its effectiveness
4 WITH TYPE-WIDTH AND INTER-WORD-SPACE TOTALIZER OR INDICATOR (I.E., FOR JUSTIFICATION)
5 .Embodying exchangeable sub-assembly unit for font change
6 .Embodying means to facilitate error correction
7 .Embodying means to tabulate or to adjust line length
8 .Embodying means to insert justification symbol
9 ..With means to effect selection of justification tools
10 ...With means to insert justification symbol at other than end of line
11 .Embodying means to drive totalizer
12 .."Unit-Wheel" type of counter
13 WITH MEANS TO IMPOSE PROGRAMMED CONTROL OF AUXILIARY-OPERATION
14 .Embodying means to change code
15 .Embodying means to afford choice of programs
16 .Embodying means to shift control between plural input sources
17 ..Diverse sources
18 .Embodying means to effect selection or shift or skip of field
19 ..With change in feed of pattern or work
20 .For start or stop of control from given input source
21 .For stopping after predetermined number of operations
22 WITH MEANS TO IMPOSE RANDOMLY ACTUATED CONTROL OF AUXILIARY-OPERATION
23 .Embodying means to detect order of occurrence of input data
24 ..Zero suppression or insertion
25 .Embodying means to detect indicium in work or pattern
26 ..With group number control of recording
27 ...With control of feed of pattern and/or work
28 ..With means to control feed
29 ...Control of pattern feed
30 .Stopping means
32 ..Upon detection of machine defect or misoperation
33 ...With means to check on tool actuation
34 ....With verifier (data comparator)
35 WITH INPUT MEANS COMMON TO TOOL SELECTOR AND PRINTER
36 .Step by step printer
37 ..On same workpiece
38 WITH NONSELECTIVE CUTTING OR PUNCHING MEANS
39 .Work sizing or cyclic (e.g., feed hole) punching
40 WITH SORTING MEANS OR COPY HOLDER
41 CONVERTIBLE
42 PLURAL TOOL FIELDS
43 .With means to select a given field
44 ..By manually settable means
45 .With independent manual input means
46 NOTCHING OR SLITTING MEANS
47 .Notching
48 ..Uniform depth
49 MEANS FOR CUTTING MOVING WORK
50 .Flying cutter
51 EMBODYING UNICYCLIC TOOL ACTUATING MEANS
52 WITH INTERLOCK BETWEEN TOOL ACTUATOR AND SELECTOR
53 WITH MEANS TO ESTABLISH CONTROL PATH, FROM ONE OF A PLURALITY OF INPUT SOURCES, TO TOOL SELECTION MEANS
54 .Diverse input sources
55 WITH MEANS TO STORE AND RETRIEVE INPUT DATA AFTER REMOVAL OF INPUT-IMPULSE
56 .With read-out in different order
57 .With optionally settable means to clear storage upon read-out
58 .With serial read-out from storage
59 WITH MEANS TO INITIATE TOOL SELECTION BY SENSING PATTERN INDICIA OR CONFIGURED MACHINE ELEMENT
60 .Means to sense cyclically movable machine element
61 ..Serial number punching of work
62 .With repeated sensing of same pattern field
63 .Pattern indicia carried by work
64 ..Processed work as pattern for following work
65 .Including plural input means, jointly effective
66 .Serial read-out from full bank of pattern-sensers
67 .With means to modify effect of pattern data
68 ..By inversion of pattern data
69 ..Code conversion
70 ...Combinational-code to or from one-hole-code
71 ..Means for timing the tool actuation
72 ..Means for transposition, shift or suppression of field
73 ...By adjustable electrical means
74 .By a senser with more than two output signals
75 .Pattern or senser in motion during sensing
76 .Sensing by tool directly engageable with pattern
77 ..Tool actuation blocked by pattern
78 ..Tool actuating force transmitted by pattern
79 .With means to feed pattern or pattern sensing means
80 ..With means to adjust pattern position or feed, or senser
81 ..Senser moves tool into position to receive actuating force
82 ..Senser controls effectiveness of actuating force to selected tool pair only
83 ...Senser actuates tool
84 ..Interposer movable by senser
85 ...Integral or fixed thereto
86 ...Biased interposer and senser
87 ..Senser controls application of power to interposer
88 ...Connects or disconnects interposer linkage and cyclically movable actuator
89 .Pattern or record and/or sensing means per se
90 WITH MEANS TO CAUSE DELAYED ACTUATION OF SELECTED TOOL
91 .With plurality of selecting means sequentially controlled by one input means
92 WITH OPTIONALLY SETTABLE MEANS TO CLEAR TOOL SELECTION
93 .Effective on portion of tool field
94 WITH SPECIFIC MEANS TO SELECT A PLURALITY OF TOOLS (I.E., COMBINATIONAL CODING MEANS)
95 .Successively
96 .With means to change or facilitate change of code
97 .Coded interposer
98 ..Differentially positioned
99 ...Turret of interposers

CLASS 235 REGISTERS

DECEMBER 1990

1 R	MISCELLANEOUS
1 A	..Shutters
1 B	..Game counters
1 C	..Numeral wheels
1 D	..Casings
1 E	..Toy cash registers
1 F	.."Fugitive one" mechanism
2	CASH REGISTERS AND RECORDERS
3	.Check printing
4	CASH RECORDERS
5	.Manual
7 R	CASH REGISTERS
7 A	..Refund devices and coin change
6	.Departmental
8	.Key set
9	..Crank operated
10	..Drawer operated
11	..Motor operated
12	.Key operated
13	..Detail adders
14	..Differential mechanism
15	...Key coupled
16	...Lost-motion mechanism
17	.Checks
18	..Balls
19	.Dial
20	..Independent indicator
21	..Lever operated
22	.Drawer-operating mechanism
23	.Indicator mechanism
24	..Shutters
25	..Tablet droppers
26	.Key arresters
27	.Key locks
28	.Lid registers
33	FARE REGISTERS
29 R	.Multiple
29 A	...Fare register seal
30 R	.Cab-fare indicating
30 A	...Meter preparation
31 R	.Ticket delivery
31 T	...Issue and print
32	.Registering boxes
34	.Dial and cylinder
35	.Belt
36	.Parallel axes
37	..Cylinder
38	..Dial and hand
39	..Disk
40	.Single axis
41	..Concentric disk
42	..Cylinder
43	..Dial and hand
44	.Operating devices
45	..Electric
46	..Punch
47	.Resetting
48	..Direction indicator
49	.Hundreds indicator
51	VOTING MACHINES
50 R	.Recording
50 A	...Recording and registering
50 B	...Voting machines, recording
52	.Assembly
53	.Check operated
54 R	.Key set
54 A	...Interlocks, voting machines
54 B	...Endorsed candidate lockout
54 C	...Primary voting mechanism
54 D	...Cumulative interlocks for voting machines
54 E	...Independent voting mechanism
54 F	...Voting machines, electric
55 R	.Key operated
55 A	...Interlocks; voting machine
55 C	...Primary lockouts
55 E	...Independent voting mechanism
56	.Vote counters
57	REGISTERING BALLOT BOXES
375	SYSTEMS CONTROLLED BY DATA BEARING RECORDS
376	.Operations analysis
377	.Time analysis
378	..Price determination
379	.Banking systems
380	.Credit or identification card systems
381	..With vending
382	..Permitting access
382.5	...Changeable authorization
383	.Mechanized store
384	.Transportation
385	.Inventory
386	.Voting machine
400	ORDNANCE OR WEAPON SYSTEMS COMPUTER
401	.Bombing
402	..Toss
403	.Torpedo director
404	.Aiming
405	..Mechanical computation
406	...With tabular chart, scale, or graph
407	..Compensating for weapon movement (e.g., tilt)
408	.Projectile flight time - fuse setting
409	.Parallex compensation
410	.Coordinate conversion
411	.With target tracking means
412	..Position or course prediction
413	..Calculating speed and direction
414	.Range finder
415	..With range rate change
416	..Range prediction
417	.Ballistic factor determination
418	.Hand adjusted scale mechanism
419	RECORD CONTROLLED CALCULATORS
420	.Machine control
421	.Multiplying
422	.Dividing
423	.Subtraction
424	.Item distribution
425	.Sorting and accounting
426	.Relay- or contact-type storing or accumulating
427	.Differential mechanism, synchronous
428	.Differential mechanism, stop set
429	.Translators
430	.Key operators
431	.With data comparing
432	.With printing
433	..With paper feeding
434	.With punching
435	CODED RECORD SENSORS
436	.Readout control
437	.Error checking
438	.Testing
439	.Particular sensor structure
440	..Multiple sensor
441	..Electrical contact
442	...Perforated
443	....Static sensed
444	..Electromechanical
445	...Perforated record
446	....Sensing element in continuous contact with record
447	....Array
448	...Raised or depressed portions on record
449	..Magnetic
450	...Strengthen or diminish field or flux
451	..Capacitive
452	..Pneumatic
453	..Mechanical
454	..Optical
455	...Light level control
456	...Multiple column code
457	...Holographic
458	...Perforated record

	CODED RECORD SENSORS
	.Particular sensor structure
	..Optical
	...Perforated record
459	....Stationary
460	.....Matrix of cells
461	....One dimensional scan
462	...Bar code
463	....Bar width detection

CLASS 236 AUTOMATIC TEMPERATURE AND HUMIDITY REGULATION

DECEMBER 1990

1 R	MISCELLANEOUS
1 A	..Burner controls not elsewhere classified in class
1 B	..Zone control for heating and cooling medium
1 C	..Heating and cooling controls
1 D	..Stoker controls
1 E	..Multistage controls
1 EA	...Multiple valve staging
1 EB	...Single valve staging
1 F	..Piezoelectric crystal and other electric unit temperature controls
1 G	..Heat conserving damper control
1 H	..Burner controls with automatic cutoff
2	INCUBATOR TYPE OF HEATER
3	.Electric
	.Thermostatic
4	..Expanding fluid
5	..Expanding solid
6	BROODER TYPE OF HEATER
7	SADIRON TYPE
8	ATOMIZER TYPE OF BURNER
9 R	COMBINED HEATER AND APARTMENT CONTROLLED
9 A	..Combined heating and apartment control with heating medium circulation control
10	HOT-AIR FURNACE
11	.Air and fire control
12.1	MIXING FLUID OF DISSIMILAR TEMPERATURE
12.11	.Mixing valve with temperature motive means
12.12	..Having electrical motive means
12.13	.Including bypass
12.14	.Fluid from only one supply is controlled
12.15	.Including separate relatively movable valve for each fluid supply
12.16	.having oscillating or reciprocating valve
12.17	..Valving member moves about an axis
12.18	...Tubular valve member
12.19	...Axially spaced flow control faces
12.2	..Tubular valve member
12.21	..Axially spaced flow control faces
12.22	..Seats face outwardly
12.23	..Ports closed by valve action
13	.Plenum type
14	COMBINED BOILER AND FURNACE CONTROLLED
15 R	FURNACE CONTROLLED
15 A	..Domestic oven controls
15 BR	..Commercial furnace controls
15 BA	...Solid fuel burning
15 BB	...Product and furnace temperature sensor
15 BC	...With conveyor thru furnace
15 BD	...Air and fuel control
15 BE	...Recuperator, gas turbine, melting furnace
15 BF	...Specialized furnace or heater, e.g., crystal growing
15 BG	...Timer or program
15 C	..Furnace controlled responsive to pressure
15 E	..Furnace controlled responsive to combustion products composition
16	COMBINED DRAFT AND CHECK CONTROL
	EXCHANGE HEATERS
17	.Pressure-operated
	.Thermostatic
18	..Expanding fluid
19	..Expanding solid
20 R	CLOSED FLUID HEATERS
20 A	..Top burner control
21 R	.Safety cut-out
21 B	...Water heater control with excessive temperature cutoff
22	.Radiator type
	.Combined thermostat and flow controlled
23	..One valve
24	..Two or more valves
24.5	.Flow and pressure controlled
25 R	.Flow controlled
25 A	...Flow responsive valve controlling fuel
26 R	.Pressure-operated
26 A	...Gas burner controls
26 B	...Pressure responsive means controls draft
26 C	...Pressure responsive elements per se
26 D	...Pressure responsive means controls forced draft
26 E	...Pressure responsive means controls oil burner
26 F	...Pressure responsive means controls fluid coupling
27	..With balancing pressure chamber
28	..Stroke retarding
29	..Relay, puppet
30	..Bourdon type
31	..Float
	.Thermostatic
32	..Expanding fluid
33	..Expanding solid
34	COOLING RADIATOR
34.5	.Bypass
35	.Air control
35.2	..Shutters
35.3	...Servomotor
36	HEATING RADIATOR
37	.Combined radiator and apartment controlled
38	.Air control
	.Exhaust operated
	..Fluid-operated motor
39	...Aspirator
40	..Thermostatic
41	...With trap
	.Thermostatic
42	..Expanding fluid
43	..Expanding solid
44 R	HUMIDITY CONTROL
44 A	..Humidity control per se
44 B	..With evaporator cooling spray
44 C	..Humidity and temperature control
44 E	..With electrical conductive element
45	DRAFT-OPERATED
46 R	WITH TIMING ELEMENT
46 A	..Diverse sensor
46 B	..Stoker control
46 C	..Controlled diverse means
46 D	..Domestic oven
46 E	..Hot air furnace
46 F	..Timer other than clock
47	HIGH AND LOW TEMPERATURE ALTERNATE
48 R	SNAP-ACTING
48 A	..Including a permanent magnet
49.1	VENTILATOR TYPE
49.2	.Responsive to fire or smoke
49.3	.Electrically actuated
49.4	.Pneumatically actuated
49.5	.Mechanical linkage actuated
50	LIQUID VALVE
51	DISTANCE-ADJUSTED
52	FLOAT-OPERATED
	TRAPS
	.Float valve
53	..Thermostatic air valve
	.Pressure-operated valve
54	..Thermostatic pilot
	.Thermostatic
55	..With float-controlled pilot
56	..Expanding fluid
57	...Bourdon type
58	...Wafer type
59	..Expanding solid
60	...Conduit

AIR-RELIEF VALVES
.Radiator type
..Thermostatic
61 ...With pressure control
62 ...With separate float
63 ...Expanding float
64 ...Expanding fluid
65 ....Float-operated
66 ...Expanding solid
67 MOTORS
.Relay
68 R ..Auxiliary heater
68 A ....Heated expansible chamber vaporizer liquid injected by thermostat
68 B ....Auxiliary heater applied to main temperature sensing means
68 C ....Auxiliary heater applied to control device away from main temperature sensor
68 D ....Thermo-controlled pilot burner operates a heat motor to actuate main fuel valve
69 ..Pyrometer galvanometer
70 ...With beating element
71 .Balanced
72 ..Thermostatic relay
73 .Continuous drive
74 R .Electric
74 A ...Electric motor driven pump
75 ..Reciprocating or oscillating
76 ..Step-by-step
77 ..Vibrating arm
78 R ..Relay
78 A ....Plural control elements
78 B ....Plural temperature sensors
78 C ....Reversible motor
78 D ....Proportional control
.Fluid-operated
79 ..Relay
80 R ...Shunt
80 A .....Airplane
80 B .....Plural main valves
80 C .....Plural temperature sensors
80 D .....Pure fluid
80 E .....Plural pilots by single actuator
80 F .....Diaphragm biased open by line pressure
80 G .....Piston-type valve operator
81 ...Snap-acting
82 ...Compound
83 ....Snap-acting
84 ...Electric
85 ...Pressure-operated
...Thermostatic
86 ....Expanding fluid
87 ....Expanding solid
88 .Magnetic release
89 ..Safety cut-out
90 .Thermal release
THERMOSTATIC
91 R .Hot and cold
91 A ...Nonhabitable enclosure, e.g., incubator
91 B ...With oil burner
91 C ...With diverse sensor, e.g., humidity, pressure
91 D ...Heating and cooling
91 E ...Plural room or plural outside thermostat
91 F ...With at least one temperature sensor for temperature modifying media
91 G ...Current modifying sensor
92 R .With pressure control
92 A ...Combined with fuel gas pressure regulator
92 B ...Refrigeration expansion valves
92 C ...Pressure- and temperature-actuated relief valves
92 D ...Pressure- and temperature-actuated valves associated with carburetors
93 R .In fluid controlled
93 A ...Expanding fluid
93 B ...Shower heads
94 .With indicator or alarm
.Flue or heater attached
95 ..Expanding fluid
96 ..Expanding solid
97 .Cooled element
98 .Fluid transmission
99 R .Expanding fluid
99 A ...Nontemperature sensor
99 B ...Nonvalving device
99 C ...External and internal sensors
99 D ...Heat shield
99 E ...Plural temperature sensors
99 F ...Pivoted valve
99 G ...Lever
99 H ...Liquid fuel feed
99 K ...Wax thermostat
99 J ...In flow line
100 ..Float or piston operation
101 R .Expanding solid
101 A ...Plural inlets or outlets
101 B ...Plural thermostats
101 C ...Thermostat with I.C.E.
101 D ...Coil thermostat
101 E ...Compound lever
102 ..Concentric elements
103 ..Conduit
104 ..Fire pot

323 ...Swinging clip
324 ...Wedge
325 ...Bevel slide
326 ....Reversed lap
327 R ...Twin jaws
327 A .....Two-part, with lock
328 ....With wedge
329 ...Diagonal
330 ....Integral
331 .Transverse slide
332 ..Screw-operated
333 ..Horizontal wedge-operated
334 ..Vertical wedge-operated
335 .Abutting screw point
336 .Rail brace
337 ..Vertical slide
338 .Clamps
339 ..Gauge
340 ..Multiple face
341 ..Cam adjustment
342 ..Nut type
343 ..Anchors
344 ...Vertical face
345 ...Vertical shank
346 ...Ratchet
347 ..Bevel guide
348 ..Internal arm
349 ..Spring
350 ..Integral with tie
351 ..Clip type
352 ...Double
353 ...Vertical wedge
354 ...Horizontal wedge
355 ..Hooks
356 ...Pivoted
357 ...Twin
358 ....Through bolt
359 ....Single pivot
360 ..Lever
361 ..Wedges
362 ...Parallel
363 ...Aligned
364 ...Flange
365 ...Locks
366 .Spikes
367 ..Interlock
368 ..Bent
369 ..Split end
370 ..Plug
371 ..Socket
372 ..Screw
373 ...Sockets
374 ..Socket and wedge
375 ..Lock
376 ..Ratchet
377 .Bolt anchors and sleeves
378 .U-bolts and clips
379 FOOT GUARDS
380 .Switch point
381 .Wheel-depressed
382 DEADENING NOISE

DIG 1 Track structure assembled by gluing

CLASS 239 FLUID SPRINKLING, SPRAYING AND DIFFUSING

DECEMBER 1990

1 PROCESSES
2.1 .Of weather control or modification
2.2 ..Snowmaking
3 .Including electrostatic charging
4 .Vibratory or magneto-strictive projecting
5 .Of fuel injection
6 .Involving slow diffusion
7 .Including centrifugal force or spattering
8 .Including mixing or combining with air, gas or steam
9 ..And additional dissolving or entraining of material in liquid stream
10 .Including dissolving or entraining in liquid stream
11 .Of discharge modification of flow varying
12 ..Involving drinking or ornamental fountains
13 .Including heating or cooling
14.1 WEATHER CONTROL
14.2 .Snowmaking
690 ELECTROSTATIC TYPE
690.1 .Induction charging
691 .With automatic safety feature
692 .With electrogasdynamic generator in spray device
693 .Spray device recovers unused particles
694 .With cyclical movable support
695 .Plural spray devices
696 .Having plural exit openings
697 .Fixed member deflects exiting material
698 ..Forward of nozzle
699 .With impeller (e.g., vibrator)
700 ..Rotary
701 ...With spray portion intercept member
702 ...With axially spaced impeller surfaces
703 ...Dish- or cone-shaped impeller
704 .With fluid entrainment
705 ..With air outlet forward of material outlet
706 ..With charging electrode mounted on spray device
707 ...Extending forward of material outlet
708 .Pressurized spray material
16 FOUNTAINS OR DRINKING TUBES AND STRAWS
17 .Ornamental
18 ..With illuminating means
19 ...With ground distributing means (e.g., lawn sprinklers)
20 ...With recirculating means
21 ..With reversible feed and waste chambers
22 ..Fluid pressure discharging means (e.g., aspirating)
23 ...Liquid pump, pulsator or follower
24 .Drinking
25 ..With or for attachment to faucet
26 ...Swivelly mounted single outlet means
27 ...Swingable into or out of deflecting position
28 ..With catch basins
29 ...With flow line valve
29.3 ....Portable, or with self-contained liquid holder
29.5 ....Leg or foot actuated valve operator
30 ...Extensible or flexible bubbler nozzle
31 ..Converging jets or bubblers (e.g., bubble cups)
32 ...With self-closing discharge valve
33 ..Portable drinking tubes and straws
34 SLOW DIFFUSERS
35 .With empty or refill signal or indicator
36 .Garment or body attached
37 .Gravity flow of liquid from supply holder
38 ..Free drip to open holder
39 ..Barometric flow to secondary holder
40 ...Drip discharge from secondary holder
41 ....To porous distributor to atmosphere
42 ...Porous distributor to atmosphere
43 ..To porous distributor exposed to atmosphere
44 .With wick or absorbent means removing liquid from holder
45 ..Serially arranged wicks or absorbent means
46 ...With means for drip escape from casing
47 ..Nonuse housing or casing arrangement (e.g., stored in supply)
48 ...Reel-type storage
49 ..With flow varying means
50 ...Relatively movable wick and supply for discharge or adjustment
51 ..With means for drip escape from holder
51.5 ..In housing having multiported wall spaced from absorbent means
52 .Reel or spool type support means
53 .Liquid supply in absorbent or porous media only
54 ..Rigid solid form media
55 ..With enclosing casing
56 ...Pad type
57 .With support for porous or apertured encasing means
58 .With means to adjust casing porosity or openings
59 ..By alignment of apertured members
60 .Solid form vaporizable material
61 WITH SELECTIVE PROPORTIONING OR CORRELATED FLOW FOR PLURAL FLUIDS
62 .Having traversing motion responsive means
63 WITH CUTOFF OR FLOW VARYING MEANS OPERATED BY MEANS RESPONSIVE TO DISCHARGED FLUID (E.G., GROUND MOISTURE SENSING)
64 .With overriding second control means
65 .By level or weight in testing receiver
66 SERIALLY OPERATED DISTRIBUTION MEANS
67 WITH SELECTIVELY PRESET FLOW CUTOFF OR INITIATING MEANS
68 .By rate of flow or volume means
69 .By programming means
70 .Timer means
71 WITH SIGNALS, INDICATORS, RECORDERS, METERS OR CHANGEABLE EXHIBITORS
72 .Audible
73 .Position or extent of motion indicator
74 .With spray material quantity or flow indicating means (e.g., sight gauge)
75 WITH VISCOSITY OR TEMPERATURE RESPONSIVE CONTROL MEANS
76 WITH PRESSURE OR FLOW EQUALIZATION MEANS TO PLURAL DISTRIBUTORS
77 ORCHARD-TYPE MOBILE DISTRIBUTOR COMPRISING FLUENT DISCHARGED INTO GASEOUS CONVEYING CURRENT
78 .With current directing louvers
79 WITH MEANS FUSING SOLID SPRAY MATERIAL AT DISCHARGE MEANS
80 .Plural supply means for solid spray materials
81 .Electric arc, spark plug or induction heating
82 .Nozzle with molten pool holder
83 .Wire or rod type supply
84 ..Moving feeder for fusible wire or rod
85 .With supply holder for fusible material (e.g., pulverulent solids)

86 INJECTION NOZZLE HAVING CAPILLARY TYPE FEED PASSAGES
87 INJECTION NOZZLE HAVING PLUNGER OR VALVE CONTROLLED BY PRESSURE BEYOND NOZZLE OUTLET (E.G., COMPRESSION PRESSURE OPERATED)
88 UNITARY INJECTION NOZZLE AND PUMP OR ACCUMULATOR PLUNGER
89 .Accumulator plunger biased to discharge fluid
90 .Plunger interconnected or mounted bypass
91 .Plunger interconnected or mounted valve (e.g., outlet valve)
92 .Fluid operated plunger motor
93 FLOW REGULATOR OPERATED CONCURRENTLY WITH INTERMITTENT FLUID PUMP
94 .Plural motor surfaces on flow regulator (e.g., opposed)
95 UNITARY INJECTION NOZZLE AND VALVE WITH CONTINUOUSLY INTERMITTENT OPERATOR
96 INJECTION NOZZLE OPENED BY RELIEVING SUPPLY (E.G., ACCUMULATOR TYPE)
97 PATTERN CONTROL BY SYNCHRONIZING FLOW REGULATOR MEANS WITH CYCLICALLY MOVING DISTRIBUTOR
98 .Plural outlets with abutment operated flow diverter
650 CONTAINER FOR NON-FLUID MATERIAL, AND SCATTERING MEANS
651 .With loading or loading facilitating means
652 .Scattering by direct manual movement
653 .Body supported
654 .With means generating or supplying gaseous mixing current
655 ..Laterally extending scatter unit
656 .Scatterer fed by plural containers
657 .Container tilted for discharge (e.g., dump truck, etc.)
658 .Scattering means is flail
659 .Scattering means has to and fro movement (e.g., vibratory, etc.)
660 .With overload release or relief
661 .With means for mounting on tractor
662 .With feature relating to liquid material
663 .Convertible or combined
664 .Ambulant container and laterally extending scatterer
665 .Including means varying scatter pattern of rotating scatterer
666 ..Adjustable deflector
667 .Plural, rotary scatterers, on intersecting axes or coaxial and counter-rotating
668 .Hopper and gravity discharge to scatterer receiving material peripherally
669 ..Scatterer at least partially within hopper
670 .Drive from vehicle motor power take off
671 .Including raking type conveyor moving material toward scatterer
672 .Including driven conveyor or follower feeding material horizontally towards scatterer
673 ..Plural scatterers receiving material axially
674 ..Feed means outside of primary supply container
675 ..Screw conveyor
676 ..Including movable gate, barrier or valve upstream of scatterer
677 ..Speed varying means for driven scatterer or feed
678 ..Limit means stopping feed
679 ..Rotating scatterer receiving material peripherally
680 ...Rotating feed or strewing unit (e.g., beater, etc.) upstream of scatterer
681 .Rotating scatterer
682 ..Plural
683 ..Including agitating means
684 ..Including specific driving means
685 ...From ground wheel
686 ...Manual or pedal
687 ..Scatterer receives material axially
688 ...Scatterer has radially directed tube
689 .Scatterer is tubular or in surrounding housing
99 WITH MEANS CAUSING INTERMITTENT INTERRUPTION OF SUPPLY TO DISTRIBUTOR MEANS (I.E., ON-OFF)
100 .Ground wheel controlled intermitter
101 WITH MEANS FOR FLUCTUATING FLOW OR PRESSURE OF FLUID SUPPLIED TO DISTRIBUTOR MEANS
102.1 WITH MEANS TO VIBRATE OR JIGGLE DISCHARGE
102.2 .By electric transducer (e.g., piezoelectric crystal)
103 NOZZLE CARRIED APERTURED SHIELD AND COLLECTOR
104 WITH CLEANING MEANS, DRIP COLLECTING, WASTE DISPOSAL OR SOIL PREVENTING GUARDS OR SHIELDS
105 .Soil preventing gas shield
106 .Nozzle cleaner, flusher or drainer
107 ..With means for enlarging spray openings beyond normal operating position
108 ...With separate fluid reacting surface
109 ....Reduction of fluid pressure affects opening (e.g., self-draining showers)
110 ..With separate drain or access opening
111 ...Absence of fluid pressure opens drain
112 ..With diverted system fluid or nonspraying fluid for cleaning
113 ...System fluid diverted
114 ..Solid scraping or clearing member
115 ...Member and nozzle mounted for relative motion
116 ....Member is in flow line
117 .....Member moves through spray opening
118 ......By fluid pressure
119 ..Return or reverse flow from outlet
120 .Waste disposal or drip collecting
121 ..Drip cup or trough
122 ...Combined with deflector
123 .Solid scraping or clearing member
124 WITH SYSTEM FLUID RELIEF OR RETURN TO SUPPLY
125 .Recirculation within nozzle (e.g., burner nozzle cooling)
126 .By pressure responsive means (e.g., to sump or atmosphere)
127 .Return from liquid pump outlet to supply holder (e.g., tank filling, mixing or pump unloading)
127.1 REACTION MOTOR DISCHARGE NOZZLE WITH JACKETED OR HOLLOW PORTION FOR COOLING FLUID FLOW
127.3 .With subsequent mixing in main discharge stream in or downstream of nozzle
128 WITH HEATING OR COOLING MEANS FOR THE SYSTEM OR SYSTEM FLUID
129 .Employing waste heat or exhaust gases
130 .Vehicle mounted heater and spray device
131 ..With plural fluids through outlet means
132 .In terminal element (e.g., injection nozzle cooling)

	WITH HEATING OR COOLING MEANS FOR THE SYSTEM OR SYSTEM FLUID
	.In terminal element (e.g., injection nozzle cooling)
132.1	..Heat exchange fluid
132.3	...Cooling of terminal element
132.5	....Coolant is spray fluid or is added to spray fluid
133	.Spray terminal carrying member carriers heater
134	..With additional upstream heating means
135	.Heating means
136	..Vapor generator
137	...Plural fluids through outlet means
138	....One an aspirating fluid for discharge
139	..Spaced jacket or compartment for heating fluid
140	WITH MEANS MOVABLY MOUNTING SUPPLY MEANS FOR DISCHARGING CONTENTS
141	.Rotating tank type
142	WITH AGITATION OF SUPPLY MEANS
143	.Gas agitation
144	.Movably mounted tank or tank part (e.g., vibratory type)
145	POROUS OR EXTERNAL WICK DISCHARGE MEANS
152	BODY OR ANIMAL CARRIED
153	.Body contour feature
154	.Hand manipulated discharge means
146	WITH MOBILE TANK-TYPE SUPPLY MEANS
147	.Ground traversing wheel-form supply tank
148	.With means replenishing system supply
149	.With means movably mounting supply container relative to its support
150	.With spray deflecting or compressing means (e.g., striping)
151	..By gas stream means
155	.Operational means interconnected with ground traverse
156	..Ground wheel operated discharge means or controller
157	...Ground wheel operated pump
158	....Gas pressure pump
159	.Spray boom or bar type distributor
160	..With motor means imparting movement to distributor during use
161	...Plural bars or booms
162	...Plural spray heads individually mounted for motion
163	..Plural diverse bars or booms
164	..Adjustable distributor
165	...Extensible or telescoping boom
166	...Plural sections articulated or pivotally mounted
167	....Symmetrically disposed outboard of carrier
168	.....With central section
169	...Flexible coupling section to distributor
170	..Having means to selectively control discharge paths
171	.Aircraft carried
172	.Vehicle drawn or carried
173	..Track guided (e.g., rolling stock)
174	...Locomotive cab type attachments
175	..With flexible coupling section
176	.Adjustable distributor
722	MOBILE DISTRIBUTOR
723	.Irrigation device
724	..Open pond or ditch type supply
725	...Floating distribution means
726	..Nozzles spaced along mobile pipeline
727	...Including additive supply means
728	...Center pivot
729	....With noncircular coverage
730	....Including means allowing articulation of adjacent pipe sections
731	.....With means to delect misalignment
732	...Including means allowing articulation of adjacent pipe sections
733	....With means to detect misalignment
734	...Trail tubes
735	...Propelling means
736	....Reel take-up
737	....Prime mover
738	....Fluid motor or spray fluid operated
739	...Guided translating distributor
740	....Supply line traversing means
741	...Wheel mounted for rotation about longitudinal axis of pipeline
742	...Longitudinal movement of pipeline
743	..Propelled or guided translating distributor
744	...Propelling means
745	....Reel take-up
746	....Intermittent grip or inching type
747	....Fluid motor or spray fluid operated
748	...Supply line traversing means
749	....Hydrant coupling
750	.Track or guideway
751	..Overhead type
752	..Reciprocating
753	...With extensible support
754	.Jet directed toward or along supporting surface (e.g., lawn rakes)
193	DISTRIBUTOR HAVING OVERFLOW DISCHARGE (E.G., WEIR TYPE)
194	.Escape to fluid conveying current
195	FLEXIBLE FLOW LINE OR OUTLET STORAGE OR RETRIEVAL MEANS
196	.Flow control responsive to flow line, outlet or storage means movement
197	.With retrieval facilitating means
198	.Reel and ground supported frame
200	WITH FIXED SUPPORT FOR OR GROUND INSTALLED SUPPLY MEANS (E.G., STATIC CONSTRUCTIONAL INSTALLATIONS)
201	.Embedded or buried sprinkler
202	..Street curb installed
203	..With sprinkler head elevating means
204	...Elevating means responsive to flow of spray fluid
205	....With spring assisted retraction
206	....Distributor continuously moves during spraying
207	.Multiple spray heads connected for serial flow
208	.Building features
209	..Overhead or ceiling mounted supply conduit
210	.Moving (non-ground traversing) distributing means
211	SIMULATIONS
214	SLINGER OR SPLASHER; OR DEFLECTOR ROTATED RELATIVE TO EFFLUENT
214.11	.With addition of other fluid downstream of distributor
214.13	..Distributor motion caused by fluid flow
214.15	..Plural fluid outlets from distributor
214.17	..With combining of fluids and subsequent distribution
214.19	..One of relatively axially movable concentric flow paths continuously rotating
214.21	..With pump or interior guide vanes for fluid
214.23	...Adjustable or deformable
214.25	.With combining of diverse fluids at or upstream of distributor
215	.With separate pump or movable conveyer means delivering to distributor

	SLINGER OR SPLASHER; OR DEFLECTOR ROTATED RELATIVE TO EFFLUENT
	.With separate pump or movable conveyer means delivering to distributor
216	..Bowl-like rotating sleeve conveyer
217	...And scoop delivering to distributor
218	..Endless belt conveyer
218.5	..Screw or spiral conveyer
219	.Slinger or splasher dipping into or immersed in supply
220	..Horizontal axis rotary distributor
221	..Submerged impeller type splasher or slosher
222	.Spray apertured casing spaced about distributor
222.11	.Nozzle delivers fluid to deflector
222.13	..Nozzle continuously moves
222.15	...Deflector causes movement
222.17	..Fluid actuated deflector
222.19	...Plural streams to unitary deflector
222.21	...Eccentrically mounted
223	.Disc impeller type or bowl-like slinger or deflector
224	..Disc or impeller type
225.1	DISTRIBUTOR CONTINUOUSLY MOVES RELATIVE TO SUPPORT DURING SPRAYING
226	.With supply holder or plural substance mixing
227	.Compound motion of distributor or terminal member about plural axes
228	.Sediment collector or internal diverter baffle
229	.Wriggler or flexible distributor
230	.With impact motive means
231	.Including deflector
232	..Movable during operating cycle for pattern control
233	..Deflector causes movement of distributor
236	.With undulating or irregular cam track for noncircular pattern control
237	.Spray fluid motor drive means (not reaction)
238	..By weight of accumulated fluid
239	..Continuously operative rectilinearly reciprocating motor
240	..Rotary motor drive (e.g., turbine type)
241	...With step-by-step advance motion
242	...Reciprocating or oscillating distributor
243	.Multiple distributors supported for relative motion or on different axes (one may be stationary)
244	..One distributor drives another
245	..Coaxially arranged distributors
246	.Distributor with diversely shaped or oriented terminal members or outlets
247	..Adjustable or shiftable terminal member
248	..Groups of terminal members or outlets spaced along axis of rotation
249	..Circumferentially alternating diverse terminal members or outlets
251	.Reaction-type nozzle motive means
252	..With brake, lock or retarder
253	..Terminal members adjustable simultaneously or radially swinging
254	..Filter bed type or fluid seal
255	..Oscillating or reciprocating distributor
256	..Control of speed or axis of rotation shiftable (manual valves excluded)
257	...Variable outlet aperture size
258	...Varying jet to change tangential reaction component
259	..With binding preventing means or seal
260	...Distributor vibrating or jarring means
261	..Support details for moving distributor
262	..With flow controller
263	.Fluid motive means
263.1	.Electric motive means
263.2	.Power takeoff from another device
263.3	.Transmission details
264	.Support details for moving distributor
265	..Adjustable standard or support
265.11	REACTION MOTOR DISCHARGE NOZZLE
265.13	.With retractable noise suppressing stream divider
265.15	.With erodible, frangible or fusible nozzle part
265.17	.With addition of secondary fluid upstream of outlet
265.19	.With means controlling amount, shape or direction of discharge stream
265.23	..Fluid jet for stream deflection
265.25	..Plural controlled outlets
265.27	...Selective total discharge through diversely shaped or directed outlets
265.29	....Controller moves into fluid path from position closing one outlet
265.31	....Axially moved discharge portion opens side outlet
265.33	..Radially outermost flow defining wall adjustable
265.35	...Nozzle aiming adjustable
265.37	...Radially inwardly movable wall
265.39	....At least three pivoted flaps form outlet
265.41	.....With adjustable upstream flow path portion
265.43	....Resilient or deformable wall
266	TERMINAL OUTLET MEANS CONNECTED IN SERIES FOR THROUGH FLOW
267	.Terminal outlet means in or on flow line coupling
268	.With casing or support
269	.With flexible or articulated flow line section
270	NOZZLE WITH AIR SUPPLY MEANS TO OPERATOR
271	WITH NOZZLE OR FLOW LINE ATTACHED PENETRATING MEANS
272	.Piercing connection to supply means
274	WITH MEANS OPERATED BY ART DEVICE
284.1	LIQUID SPRAYER FOR TRANSPARENT PANEL (E.G., WINDSHIELD)
284.2	.Headlamp
273	WITH GROUND OR VERTICAL SURFACE SUSTAINED SUPPORT MEANS
275	.Support and deflector unit forms base for supply conduit or terminal outlet member
276	.Ground or object penetrating support
279	.Supply passage configuration forms stand
280	.Pole, stand or extension carried head
280.5	..Adjustable support
281	...Extensible
282	.Wall or bracket mounting
283	..Bracket-type support
285	.Flow controller and ground support interconnection
288	WITH SOLID MEANS AS GUARD OR PROTECTOR
288.3	.Bumper or guard protects distributor
288.5	..Arcuate or circular
289	COMBINED OR CONVERTIBLE
290	INCLUDING SUPPLEMENTAL GAS SHAPING OR SHIELDING JET
291	.Air shield surrounds projected airstream (i.e., air gun)
292	.Angularly adjustable as to point of convergence

INCLUDING SUPPLEMENTAL GAS SHAPING OR SHIELDING JET
293 .Gas-driven rotatable jet orifice carrier
294 .And additional downstream liquid nozzle
295 .On one side only of spray orifice
296 .Plural sets of gas jet orifices
297 ..One or more sets selectively usable
298 ..Jets coupled to turn stream about longitudinal axis
299 .Noncircular supplemental orifice (e.g., special shape)
300 .Adjustable gas flow directing or controlling means
301 ..Rotatable port-carrying member effects flow control
302 INCLUDING SUPPLY HOLDER FOR MATERIAL
303 .Plural holders for diverse materials
304 ..Two or more spray-material holders
305 ...Choice of any one material only
306 ...And mixing beyond outlet
307 ...And carrier fluid supply
308 ..Holder for carrier fluid
309 .And frangible seal rupturing means
310 .To be mixed, dissolved or entrained in a flowing liquid stream prior to discharge
311 ..Gas addition upstream of spray nozzle outlet
312 ..Diverse discharge outlets for mixed and unmixed fluids respectively
313 ..Follower-type holder and stream egress means in juxtaposition
314 ..Mixing beyond liquid stream outlet
315 ..Holder within terminal element carrying member
316 ..Unitary outlet means and holder
317 ..Branching flow and recombining in terminal member
318 ..Aspirating discharge nozzle
319 .Moving solid surface supplying material beyond carrier fluid outlet
320 .Follower in holder
321 ..Floating or biased piston
322 ...Fluid pressure actuated
323 ..Collapsible or flexible follower (i.e., non-rigid)
324 ..Screw actuated
325 .Conveyer for fluent solid in holder
326 .Temporary storage in wick or pad
327 .Resilient holder wall
328 .Collapsible or foldable supply holder
329 .Moving solid surface engages material to be sprayed
330 ..Diaphragm and flexible wall gas pump combined
331 ..Enclosing casing about moving surface
332 ...Motor-operated
333 ...Separable pump with holder mount or securing means
334 ...Articulated or plural point ingress to pump
335 .Three or more spray fluids (e.g., induction of ambient air)
336 ..One a fluent solid
337 .Fluid pressure discharge means
338 ..Material atomized in holder (e.g., nebulizer)
339 ..Liquid inlet port to submerged gas tube
340 ..Pressure reducer at holder outlet
341 ...Relatively adjustable gas and liquid streams
342 ...Auxiliary trap, articulated or plural point inlet to eduction tube
343 ...And diffuser or baffle means (e.g., sudser or foamer)
344 ...Modified flow path in eduction tube
345 ...Discharge from upended or tilted holder (e.g., by gravity feed to reducer)
346 ...Holder coupled to gas supply source
347 ...Flow control by venting pressure fluid to atmosphere
348 ....Fluid pressure in carrier supply line is vented
349 ...Interconnected pump means and conduit closure or valve
350 ...Measured or trapped quantity for discharge
351 ...Motor-operated gas pump
352 ...And supply replenishing means
353 ...Plural valves actuated by common operator
354 ...Including valved eduction tube or closure means
355 ...Holder carried or mounted gas pump
356 ....Flexible wall gas pump encases liquid holder
357 ....Telescoping holder or casing
358 ....Multiple outlet
359 ....Having means to lock plunger or pump
360 ....Pump casing within supply holder
361 ....Unitary mounting for eduction tube and air pump
362 .....Flexible wall gas pump
363 ....Flexible wall gas pump
364 ...Parallel pressure flows to holder and pressure reducer
365 ....Branched flow from main stream to holder
366 .....Air and liquid flow paths combine upstream of spray outlet
367 .....Unitary mounting for pressure fluid inlet and liquid outlet
368 ....Air and liquid flow paths combine upstream of spray outlet
369 ...Air and liquid flow paths combine upstream of spray outlet
370 ....And baffle, diffuser or flow separating means (i.e., nebulizer)
371 ....Concentrically arranged flow paths
372 ..Gas passage from gas space in holder through fluid outlet means
373 ..Means to pressurize contents of holder
374 .Hand-manipulable shaker or jiggler type
375 .Including handle or handgrip for supply container and attached outlet
376 ..Gravity discharge hand carried
377 ...Upending or tilting for discharge
378 ...Handle grip and flow controller juxtaposed
379 .Gravity flow from holder (e.g., hopper type)
380 MOTOR OR SPRAY FLUID OPERATED CONTINUOUSLY MOVING DISCHARGE MODIFIER
381 .Spray fluid operated
382 ..Deflector or whirler
383 ...Rotating whirler
389 ...Pivoted on axis transverse to flow
390 PLURAL INTERCHANGEABLE DISCHARGE MODIFIERS, OUTLET ARRANGEMENTS OR COUPLING MEANS
391 .Selectively arrangeable outlet means
392 ..Movably mounted multi-terminal outlet carrying member
393 ...Member rotates on axis transverse to flow path
394 ...Member rotates on axis longitudinally of flow path
395 ...Member reciprocates transversely of flow path
396 .Discharge modifier upstream of terminal outlet
397 .Selective coupling means for head or nozzle

397.5	DISTRIBUTOR HAVING THERMAL EXPANSION JOINT, DIFFERENTIALLY EXPANDING MATERIALS OR INSULATION
398	COMBINING OF SEPARATELY SUPPLIED FLUIDS (I.E., PLURAL FLOW PATHS)
399	.Including whirler device to induce fluid rotation
400	..Three or more fluids
401	..Axially adjustable valve with fluid conducting stem
402	..Plural serially arranged whirlers for same or for mixed fluids
402.5	..Adjustable or selective whirl inducing means
403	..Whirling of fluid prior to or at point of addition of second fluid
404	...Discrete whirler means for each fluid
405	...Fluid in outer of concentrically arranged paths is whirled
406	....Mixing at or downstream of terminus
407	.And valving means controlling flow for combining
408	..By terminal ejection valve
409	...Liquid storage means proximate to ejection outlet
410	...Fluid pressure operated valve (mixed or unmixed)
411	....By gas pressure
412	..Motor or fluid pressure operated valving means
413	..Valving means for each of diverse fluids
414	...Multiway valve or single operator for plural valves
415	....For successive valve control
416	...Relatively movable concentric flow paths effect valving
416.1	...For three or more diverse fluids
416.2	...Plural valves for same fluid
416.3	....Parallel
416.4	...Concentric flow paths
416.5	..Concentric flow paths
417	...Relatively movable flow paths
417.3	...Valving means for central fluid
417.5	..Discrete flow paths for diverse fluids
418	.At or beyond outlet
419	..With partial preliminary mixing
419.3	...Two of three disparate fluids premixed
419.5	...Induction of ambient air
420	..Including movable means for varying point of convergence
421	..Including peripheral or annular outlets at junction of opposed coaxial fluid paths
422	..Combining of three or more separate fluid streams
423	..Concurrent or concentric flow means
424	...Flow means of one fluid surrounds the other at outlet
424.5	....Plural passages discharge one fluid to other
425	.....To outer fluid at outlet
425.5	.....Ambient air aspirated through inner flow path
426	..Streams meet at right angles
427	.Serially arranged mixing zones (i.e., of same or mixed fluids)
427.3	..Additions of fluid in zones spaced along flow path
427.5	...At least three diverse fluids
428	.Combining of three or more separate streams
428.5	.Liquid flow induces atmospheric air (e.g., faucet aerator)
429	.Plural inlets to one stream from another
430	..Three or more inlets to one stream from other
431	...Normal to entered stream
432	.Including additional dispersing plate or obstruction in mixing chamber
433	.Fluid streams have angular junction
434	..Streams meet at right angles
434.5	..One fluid discharges into other in concentric conical portion of outer conduit
435	VALVED FAUCET HAVING CONTRACTING CHAMBER JET FORMING MEANS
436	SELECTIVELY USABLE OR VARIABLE DIVERSE TERMINAL OUTLETS
437	.Outlet formed between parts mounted for relative movement
438	..Axially movable component
439	...Deflector and outlet forming means combined
440	....Two or more concentric annular outlets
441	....Central and concentric annular outlets
442	.By selection of coupling means
443	.And valve controlling flow
444	..Valving means for each flow path
445	...Valved faucet with selective terminal flow paths to discharge (e.g., high or low velocity draft cocks)
446	...Integral or rigidly interconnected valving means
447	....At least one flow path always open
448	....Central flow path
449	.....And surrounding ports (peripheral)
450	ADJOINED CONTIGUOUS ELONGATED SPRAY CONDUITS (E.G., PARALLEL CONDUITS)
451	TERMINAL OUTLET FORMED BETWEEN PARTS MOUNTED FOR RELATIVE MOVEMENT
452	.Spray fluid pressure responsive discharge modifier
453	..Axially reciprocating closure deflector-type modifier
454	...Gravity seated tapered plug
455	.Laterally movable outlet part
456	.Axially movable outlet part
457	..Moved by rotatable flow conducting terminal member part
458	...Radially outer and axially movable part
459	..Spring biased nonrotatable controller within discharge guide
460	..Peripherally fluted or grooved member
461	FLOW DEFLECTING OR ROTATION CONTROLLING MEANS
462	.And filtering or screening means
463	.Fluid rotation inducing means upstream of outlet
464	..And fluid pressure responsive flow modifying means
465	..And adjustable flow modifier requiring separate insertable tool
466	..Serially arranged whirlers
467	..And serially arranged deflector
468	..Whirl chamber transversely offset to single in-flow path (i.e., tangential inflow
469	...Having a central post-like member
470	....And flow passage in post
471	...Having valved inlet
472	..Peripheral and central flow paths in whirler upstream of single terminal outlet
473	...Coaxial valving means and central port
474	..Annular egress outlet formed between whirler and casing
475	...And centrally ported whirler

FLOW DEFLECTING OR ROTATION CONTROLLING MEANS
.Fluid rotation inducing means upstream of outlet
476 ..Having flow modifier and external operator therefor carried by nozzle
477 ...Selective diverse paths to or through terminus
478 ....One path avoids whirler action
479 .....Adjustable between positional limits
480 ......Relatively axially movable flow modifier
481 ....Rotary, axially movable
482 ...Axially aligned nozzle, modifier and stem
483 ....Slotted, ported or grooved modifying member
484 .....Member having rotary motion for adjustment
485 ......And motion longitudinally of the axis of rotation
486 ..Single planar spiral perpendicular to flow path
487 ..Axially extending spiral-type flow passage or diverter
488 ...Having a solid core
489 ...In or on flow-passage walls
490 ..Integral whirler and terminal head (e.g., terminal nut)
491 ..Apertured cap surmounts whirler organization
492 ...Whirler is cup-like insert with tangential inlets
493 ...Downstream end of core member slotted to form whirl passages
494 ...Whirler is slotted or apertured flat disc or plate
495 ....Deformed plate
496 ....Slot in disc face
497 ....Multiple angular passages through disc
498 .Unitary deflector with multiple fingers or serrated edges
499 .Chamber-like deflector
500 .Serially arranged deflecting surfaces
501 ..Surfaces of spiral or helical form
502 .Plural deflectors arranged edgewise to stream
503 ..Pivoted into and out of discharge path
504 .Deflector apertured for flow
505 .Deflector movably or removably mounted relative to outlet
506 ..Deflector is closure
507 ..Mounted for movement into and out of deflecting position
508 ...Bail-type pivoting means
509 ...Plate means oblique to or on one side of flow path
510 ....Exteriorly arranged of flow member
511 .....Rotated into deflecting position
512 ...Positioned transversely across flow path
513 ..Adjustable to alter degree of deflection
514 ...Axially movable deflector
515 ....Supported exteriorly of flow outlet
516 ..Resilient securing means
517 ..Spring form deflector
518 .Deflector and terminal flow element
519 ..Resilient or deformable
520 ..Plural outlets to deflector
521 ..Deflector on one side of flow path
522 ...Multiple or discrete deflecting surfaces
523 ...Dished or arcuate deflector
524 ..Transverse planar or dished surface type
525 FLOW LINE OR NOZZLE ATTACHED OR CARRIED HANDGRIP OR HANDLE
526 .Pistol grip type
527 ..Single trigger for plural valve actuators
528 ...For sequentially opened valves
529 .Finger- or hand-attached or worn (e.g., spray glove)
530 .Sleeve-type grip
531 .And hook-like holder
532 .Spray pole type
533.1 FLUID PRESSURE RESPONSIVE DISCHARGE MODIFIER* OR FLOW REGULATOR*
533.2 .Fuel injector or burner
533.3 ..Having flow regulator* for reciprocating piston engine
533.4 ...With means to vary or pulse flow within engine cycle
533.5 ....Upstream of flow regulator*
533.6 ...Manually adjustable
533.7 ...Regulator* upstream of outlet port opens in direction of flow
533.8 ...Regulator* biased to closed position by a fluid
533.9 ...Spring type or biased regulator*
533.11 ...With antifriction, guide or seal means for flow regulator*
533.12 ...With discharge modifier*
533.13 .Resilient or deformable terminal outlet
533.14 ..Outlet carried by or formed in a disc
533.15 .On-off only
536 SIMILAR TERMINAL MEMBERS IN MULTIPLE ARRANGEMENTS
537 TERMINAL MEMBER AND VALVE PART MOVE AS UNIT
538 .Rotatable unit
539 ..Having axial movement
540 ..Disc type
541 .Axially movable unit (reciprocating)
542 CONDUIT OR NOZZLE ATTACHED IRRIGATION-TYPE DECELERATOR
543 ONE FLUID STREAM IMPINGES UPON AOTHER (I.E., CONVERGING)
544 .Orifices in recessed face
545 .Directly opposed outlets
546 INCLUDING MEANS MODIFYING DEFORMABLE TERMINAL OUTLET
547 DISTRIBUTOR OR NOZZLE IN CIRCUMFERENTIAL WALL OF FLEXIBLE SUPPLY LINE
548 UNITARY PLURAL OUTLET MEANS
549 .Plural outlets each supplied by different fluid
550 .Plural separable nozzles on spray pipe
551 ..And flow control for each nozzle
552 .Insert at terminus forms plural streams
553 .Having interior filter or guide
553.3 ..Foraminous or apertured member
553.5 ..Plural fluid directing means
554 .Axial or superposed members arranged to form axially spaced outlets
555 ..Stacked plates
556 .Arranged in plural groups or rows
557 ..All groups identical
558 ..Concentric or coaxial groups
559 ...In concavo-convex face
560 ..Three or more dissimilar groups
561 .Three or more dissimilar outlets
562 .And flow regulation or control of outlets
563 ..Sequential control of outlets
564 ...Bi-dimensional control
565 .Branched flow line type
566 .All in a single straight line
567 .All in a concavo-convex face
568 .Slit or slot-like apertures
569 INCLUDING VALVE MEANS IN FLOW LINE
570 .Line flu$ d operated
571 ..Flow direction responsive valve

	INCLUDING VALVE MEANS IN FLOW LINE
	.Line fluid operated
572	..Downstream flow to outlet closes valve
573	.And fluid to gas expansion effecting means (e.g., aerosal type)
574	.Serially arranged valves (e.g., trap or wet flow line)
575	.And filter, sifter or screen
576	.Flexing flow conduit or sheat unseats valve
577	.Unhinged tilting type
578	.Relatively movable remotely arranged operator for controller (e.g., Bowden wire)
579	.Movable terminal flow member controls valve
580	.Requiring separate insertable tool for adjustment
581.1	.Rotary valving
581.2	..Including axial movement
582.1	...Stem or operator extends through flow conduit
583	.Reciprocating
584	..Injection nozzle type
585	...Electro-magnetically operated
586	..Transverse to flow path
587	TERMINAL MEMBER ADJUSTABLY OR SHIFTABLY CONNECTED TO FLOW CONDUIT
588	.Flexible coupling section
589	RIGID FLUID CONFINING DISTRIBUTOR
589.1	.Fluidic oscillator
590	.Having interior filter or guide
590.3	..Foraminous or apertures member
590.5	..Plural fluid directing means
591	.Including flow passage liner (e.g., wear liner)
592	.Flat and tapered
593	..One wall only tapered to direction of flow
594	..And remaining opposite side walls converging
595	..And superposed curved discharge edges
596	.Orifice in separable disc or plate
597	.Elongated orifice in terminal member
598	..Oblique to direction of flow
599	..Oval or elliptical
600	.Assembly or disassembly feature
601	.Orifice shapes
602	MISCELLANEOUS (E.G., RESILIENT NOZZLE)
	******************************
	DIGESTS
	******************************
DIG 1	Pattern sprinkler
DIG 2	Scarfing torches
DIG 3	Fluid amplifier
DIG 4	"O"-ring

DIG 23	Screens

CLASS 241 SOLID MATERIAL COMMINUTION OR DISINTEGRATION

DECEMBER 1990

PROCESSES
1 .By operations other than force of contact with solid surface
2 .With cell rupturing or liberation of contained liquids
3 .With solidifying, consolidating or shaping
4 .Laminated or fibrous mineral material
5 .By utilizing kinetic energy of projected or suspended material
6 .Cereal and other seeds or seed parts
7 ..With operation to detach or loosen adhering hull portion
8 ..With application of fluid to, or heating or cooling of, whole seed
9 ..With separation or classification
10 ...With recombination or recirculation of separated parts
11 ...Successive alternate separation and comminution steps
12 ..With application of fluid
13 ..Plural successive comminuting operations
14 .Selective or differential comminution of mixed or bonded solids
15 .With application of fluid or lubricant material
16 ..To aid dispersion or prevent chemical reaction, deliquescence, agglomeration or frothing
17 ..With additional heating or cooling
18 ..Gas or vapor
19 ...To classify or separate material
20 ..Liquids added to classify or separate material
21 ..Liquids added to make pulp or suspension
22 .Application of solids to material
23 .With heating or cooling of material
24 .With classification or separation of material
25 .Combined
26 .By contact between relatively moving portions of material
27 .Subjecting material to impact by moving comminuting surface
28 .Wood and similar natural-fibrous vegetable material
29 .Plural successive comminuting operations
30 .Miscellaneous
APPARATUS
31 .With explosion preventing or relieving means
32 .With overload release means
32.5 .With sink drain stopper interlock
33 .With automatic control
34 ..Of feed of material
35 ...By speed or torque of comminutor drive
36 ..Of comminutor drive
37 ..Of comminuting surface contiguity
37.5 .With means to protect operator from injury
38 .Including means applying fluid to material
39 ..Fluid comminutor type
40 ...Stationary abutment impact only
41 ..Plural fluid applying means on same material
42 ...With plural comminuting zones
43 ..With plural comminuting zones
44 ...Parallel material flow type
45 ...Horizontal fluid current past successive comminuting zone
46 R ..Liquid submerged comminuting zone
46 A ....Garbage disposers
46 B ....Vertical axis
46.02 ...With material feed means
46.04 ...Including adjustable component
46.06 ...By cooperating members
46.08 ....Including centrifugally driven striking member (i.e., hammer mill)
46.11 ....Including impeller-type agitating means
46.13 ....Reciprocating or oscillating
46.15 ....Including roller or roller-like member (e.g., ball, cylinder, etc.)
46.17 ...By rotating impeller-type agitating means
47 ..Gas swept comminuting zone
48 ...With recirculation of gas to comminuting zone
49 ...Gas borne material applied to screen
50 ....Elevating fan on comminutor shaft
51 ....Screen forms part of comminuting surface
52 ...With return of removed oversize material to comminuting zone
53 ....Suction applied above and coaxially of comminuting member or members
54 ...Horizontal gas current though rotary drum
55 ...Comminuting element or comminuting element attached, gas moving means
56 ...Gas moving means and rotary comminuting element on same shaft
57 ...Local application within comminuting zone
58 ...Suction applied above and coaxially of comminuting member or members
59 ...With non-automatic gas flow control means
60 ..Applied subsequently to comminuting
61 ...With recirculation of material to comminuting zone
62 ..Applied prior to comminuting
63 .With simultaneous control of interrelated feed, drive and/or surface positioning means
64 ..Control of feed and surface positioning means only
65 .With temperature modification of material
66 ..Temperature modification of comminuting member
67 ...Thermal fluid within or carried by moving comminuting member
68 .With separation or classification of material
69 ..Comminuted material discharge permitting screen
70 ...Screen partition or end wall in rotary drum
71 ....Plural partitions or end walls
72 .....Series flow of material
73 ...Arcuate screen concentric with rotary comminuting member
74 ...Annular screen above or surrounding comminuting zone
75 ..Parallel material flow through plural comminuting zones and/or separators
76 ..Series material flow only through plural alternate comminuting zones and separators
77 ..Comminuting zone interposed between plural separators
78 ..Separator interposed between plural comminuting zones
79 ..Separator in discharge from comminuting zone
79.1 ...By adhesion, electric field force, specific gravity, or chemical change

	APPARATUS
	.With separation or classification of material
	..Separator in discharge from comminuting zone
79.2	...Rotating comminutor combined with a sifting device
79.3	....Sifting device rotates
80	...Oversize return to comminuting zone
81	..Separator in feed to comminuting zone
82	.Projected material trap chamber
82.1	.Helical pusher inside tube moves material toward perforated member
82.2	..With means to vary particle coarseness
82.3	..Wherein the perforated member is other than flat
82.4	..With series of axially aligned rotary knife blades
82.5	..With rotary knife before member
82.6	...Tube having configured interior surface
82.7	..With rotary knife after member
83	.Comminuting surface provided with openings to permit discharge of material
84	..Cooperates with moving comminuting surface or member
84.1	...Loose cylinder or sphere
84.2	...Travelling roll surface or member
84.3	...Oscillating surface or member
84.4	...Rectilinearly reciprocating surface or member cooperates with rotary comminuting member
85	...Rotary comminuting surface having openings cooperates with moving surface
86	...Cooperates with rotary member comminuting
86.1	....Material thrown against perforated surface by centrifugal force
86.2	....Comminutor mounted for movement relative to rotating support member
87	....Screen or screen elements move during comminution
87.1	....Offset fingers on stationary surface and on rotary member
88	....Provided with special comminuting surfaces or characteristics
88.1	.....Perforation bounded by sharp edge
88.2	.....And auxiliary imperforate surface (e.g., breakerplate)
88.3	......Three or more serially acting alternate perforate and imperforate surfaces
88.4	.....Spaced parallel bars (e.g., "grate")
89	....Hinged or dumping type screen or support
89.1	....With means to change or adjust comminuting position of screen or screen element
89.2	....Removable or interchangeable screen or screen portion
89.3	....Stationary concave surface
89.4	....Stationary flat circular surface
91	..Rotating comminuting surface having openings
92	...Radial comminuting face
93	...Outer peripheral comminuting face
94	..Reciprocal comminuting surface having openings
95	..Stationary comminuting surface having openings
96	.Oversize rejection by comminuting surface
97	.With recirculation of material to comminuting zone
98	.With agitator
99	.Bottle breakers
100	.With independent removable or detachable material receiver or receiver engaging means
100.5	.Combined with sink drain
101 R	.Combined or convertible
101 A	...Unbalers with fluffer and blower
101 B	...Mill and mixer
101 C	...Animal powered mill
101 D	...Plural materials
101 M	...Mobile crusher
101.1	..Convertible to non-comminuting apparatus
101.2	..Combined with non-comminuting means
101.3	...With means to indicate condition of apparatus, work or product
101.4	...Prior shaping means (e.g., quartering)
101.5	...With material handling other than to or from comminuting zone
101.6	....And means to mix plural materials
101.7	...Ambulent supporting means
102	.Comminuting surface deformable by contact with material
103	.Rolls frictionally driven and supported by relatively moving surfaces (e.g., ball chasers)
104	..With additional diverse type of comminutor
105	..Plural comminuting zones
106	..Frictional drive surface on horizontal axis
107	.Plural rotary or oscillatory surfaces cooperate with common surface (e.g., chasing mills)
108	..With additional diverse type of comminutor
109	..With material feeding mechanism or control
110	..Plural surfaces move across common surface
111	..Outer peripheral contact of common surface by plural surfaces
112	...With surface cleaner or scraper
113	..Plural surface cooperate with each other
114	..Radial faces of plural rotary surfaces cooperate with common surface
115	..Plural sets of plural surfaces cooperating with plural common surfaces
116	...Coaxial rotors radially arranges on same side or common surface axis
117	..Common surface moves during comminution
118	...With planetary movement of plural surfaces
119	...With material moving or discharge means
120	...Positively driven plural surfaces
121	...Plural surfaces forcible away from common surface
122	....Common surface rotates on horizontal axis
123	..Planetary movement of plural surfaces
124	...With material moving or discharge means
125	...Compounded planetary movement
126	...Positively driven plural surfaces
127	...Forcible away from common surface
128	....Pivotally mounted for forced movement
129	.....Centrifugally urged toward contact
130	......With centrifugal force modifying means
131	....Centrifugally urged toward contact

APPARATUS

.Plural rotary or oscillatory surfaces cooperate with common surface (e.g., chasing mills)
..Planetary movement of plural surfaces
...Forcible away from common surface
132 ....With means in addition to weight of plural surfaces for urging surfaces toward contact
133 ....Rotors independently forcible away from common surface
134 .Parallel material flow through plural comminuting zones
135 ..With unitary or interconnected feed mechanisms or controls for plural zones
136 ...Interconnected means forcing material against moving comminuting surface or surfaces
137 ..All comminuting zones of loose grinding body type
138 ..All comminuting zones of rotary striking member type
139 ..All comminuting zones of cooperating surface type
140 ...All comminuting zones of compound movement type
141 ...All comminuting zones of rotary surface type
142 ....Circumferential or tangential material flow only
143 .....All cooperating surfaces rotate
144 ......Rotary surfaces of separate zones coaxial
145 ......Simultaneous adjusting or positioning of separate surfaces
146 ....Axial or radial material flow only
147 ...All comminuting zones of reciprocating surface type
148 ....Oscillating surface
149 ....Vertical rectilinear movement
150 .....Annularly mounted moving surfaces
151 ..All comminuting zones of single surface zones
152 R .Series material flow only through plural comminuting zones
152 A ...Various types of comminuting zones
153 ..All comminuting zones of loose grinding body type
154 ..All comminuting zones of rotary striking member type
155 ..All comminuting zones of cooperating surface type
156 ...All comminuting zones of compound movement type
157 ...All comminuting zones of rotary surface type
158 ....Circumferential or tangential material flow only
159 .....All cooperating surfaces rotate
160 .....One surface of each couple nonrotary
161 ....Axial or radial material flow only
162 .....Common axis of rotation
163 ......Horizontal axis
164 ...All comminuting zones of reciprocating surface type
165 ....Vertical rectilinear movement
166 .With comminuting member cleaner or scraper
167 ..Contacting working surfaces of rotary comminuting member
168 .Hand support comminutor
169 ..Reciprocating cooperating comminuting surfaces
169.1 ..Rotary tool
169.2 ..Masher or pestle
170 .Loose grinding body comminutor (e.g., ball or rod mills)
171 ..With feed and/or discharge
172 ..With independent means moving or guiding the material and/or grinding bodies in receptacle
173 ...Rotary grinding body pusher (e.g., ball chasers)
174 ....Horizontal axis
175 ..Compound movement receptacle
176 ..Rotating receptacle
177 ...Tiltable axis of rotation
178 ...Roller supported receptacle
179 ..Receptacle structure
180 ...With non-axial opening
181 ...With lifting or distributing at extremity of receptacle
182 ...With lining
183 ....With lifting or distributing characteristics
184 ..Grinding bodies
185 R .Rotary striking member (e.g., hammer mills)
185 A ...Pump and rotary disintegrator
186 R ..With feed and/or discharge mechanism or control
186 A ....Screw feed
186.1 ...With distinct plural paths to striking member
186.2 ...With means to regulate feed or discharge
186.3 ....Including means to alter direction of flow
186.4 ...Rotating or oscillating feeder
187 ..With moving cooperating surface or member
188 R ..Axial and/or radial flow of material
188 A ....Pin disc comminutor
189 R ..Circumferential or tangential flow
189 A ....Reversible rotary mills
190 ...With intermeshing impact members
191 ..Rotor structure
192 ...With striking member adjusting means
193 ...With loosely mounted striking member
194 ...Striking member pivoted to rotor
195 ..Striking members or hammers
196 ...Loose ring type
197 ...With attached wear member
198 R .Cooperating comminuting surfaces (e.g., jaw crushers)
198 A ...Single roll jaw crushers
199 ..Batch type (e.g., mortar and pestle)
199.1 ...With means to move batch container or support
199.2 ....Intermittent movement of support interrelated with movement of cutter or knife
199.3 .....Rectilinearly reciprocating knife
199.4 .....Rocking knife
199.5 ....Uni-directional movement of support
199.6 .....With means to feed or discharge batch
199.7 .....With revolving tool
199.8 .....With rectilinear reciprocating tool
199.9 ...Stationary container or support
199.11 ....With rectilinear reciprocating tool
199.12 ....With rotary tool
200 ..Endless belt type comminuting surface or surfaces
201 ..Compound movement comminuting surface or surfaces
202 ...With feeding and/or discharging mechanism or control
203 ...Rotary component
204 ....Circumferential or tangential flow of material
205 ....Rotating and reciprocating surface
206 ....With moving cooperating surface

	APPARATUS
	.Cooperating comminuting surfaces (e.g., jaw crushers)
	..Compound movement comminuting surface or surfaces
	...Rotary component
207	....Gyratory or planetary movement
208	.....Eccentric drive sleeve within gyratory member
209	.....With upper guide or support for gyratory member
210	......Unbalanced weight drive
211	......Gyratory member yieldinly mounted
212	......Upper gyratory drive
213	......Bottom shaft adjusting means
214	.....Eccentric shaft gyratory drive
215	.....Eccentric gyratory sleeve below gyratory member
216	.....With gyratory member sealing means
217	...Unitary comminuting member and eccentric strap
218	....With moving cooperating surface
219	...Comminuting member pivoted to oscillating supporting link
220	..Rotary surface or surfaces
221	...Circumferential or tangential flow of material (e.g., roll mills or roll and concave mills)
222	....With material feed and/or discharge mechanism or control
223	.....Endless belt conveyer
224	.....Hopper
225	......With roll or rotary material agitator
226	....With material retaining means at axial end of rotary surface
227	....Both cooperating surfaces rotate (e.g., roll mills)
228	.....Internal comminuting surface
229	.....Surfaces rotate in same direction and/or mounted on non-horizontal axis
230	.....Adjustably or yieldably mounted rotary surface
231	......Hydraulic or pneumatic mounting and/or axially yieldable or adjustable
232	......Pivoted roll support
233	.......Adjustable pivot
234	......Both rotating surfaces adjustable or yieldable
235	.....Cooperating non-smooth surface characteristic
236	......Intermeshing
237	....With non-rotary surface moving means
238	....With plural alternatively usable nonrotary surfaces and/or retractable rotor projections and/or adjustably or yieldably mounted rotary surface
239	....Non-rotary surface adjustable or yieldable relative ot rotary surface
240	.....Sectional non-rotary surfface having independently adjustable or yieldable parts
241	.....Radially of rotary surface
242	....Cooperating non-smooth surface characteristics
243	.....Intermeshing
244	...Axial and/or radial flow of material (e.g., disk mill or cone and shell mills)
245	....With feed and/or discharge mechanism or control
246	.....Axially mounted rotary propeller or screw
247	......Horizontal axis
248	.....Hopper supply
249	......Subjacent shaking shoe or receptacle
250	....With moving cooperating surface
251	.....Both cooperating surfaces rotate
252	......Non-coaxial or eccentric
253	......Vertical axis
254	....With rotary surface axis non-coaxial or e centric relative to non-rotary surface axis
257 R	....Vertical axis
257 G	......Garbage disposer
258	.....Rotary shaft supported above rotary comminuting member
259	.....Adjustable rotary member
259.1	....With means vary space between surfaces
259.2	.....By fluid
259.3	.....Surface yieldably held in position
260	....Cooperating non-smooth surface characteristics
260.1	.....Worm or screw comminutor
261	.....Intermeshing
261.1	.....Conoidal surface
261.2	.....Opposed, fat coaxial surfaces (e.g., disk mill)
261.3	......Having plural angularly related land and groove
262	..Reciprocating surface or surfaces
263	...Parallel motion
264	...Oscillating comminuting surface
265	....With feed and/or discharge mechanism or control
266	....With moving cooperating surface
267	....Link and eccenric type actuator
268	....Serial pivoted links type actuator or link with lever type actuator (e.g., toggle type)
269	.....Means actuating pivot of serial links
270	...Vertical rectilinear movement (e.g., stamp mills)
271	....With feeding and/or discharging mechanism or control
272	....With means to rotate moving surface on non-comminuting stroke
273	....Gravity projected surface only
273.1	.Multi-barbed comminuting face (e.g., grater)
273.2	..On radial face
273.3	..Cylindrical
273.4	..Stationary curved face
274	.Stationary comminuting surface or material bed
275	..Centrifugal projection of material
276	..Conveyer material forcing mans (e.g., scroll type or locomotive stroker type)
277	.Rotating comminuting surface
278 R	..Internal or radial comminuting face
278 A	....Internal comminuting face
279	..with means to support material for rotation during comminution
280	..With means to force material toward periphery of comminuting surface
281	...Means engaging sides of column of material
282	...Radially arranged rectilinearly reciprocating follower
282.1	..Elongated edged member
282.2	...Detachably secured to a rotary element
283	.Reciprocating comminuting surface
284	.Mutual attrition or compression comminutors
285 R	.Comminutor mounting means, frames or other normally stationary structure

	APPARATUS
	.Comminutor mounting means, frames or other normally stationary structure
285 A	...Removable or displaceably housing section
285 B	...Rotor type; pivoted housing section
286	..With mans to adjustably or yieldably mount normally stationary comminuting element
287	...Pivotally mounted
288	....Self-adjusting (e.g., universal mounting)
289	....Yielding
290	...Yieldingly mounted
291	.Comminuting elements
292	..with balancing means
292.1	..Edged blades extending radially
293	..Cylindrical or frusto-conical (i.e., peripheral comminuting face)
294	...Sectional or separable surface element
295	....Annular sections
296	..Disklike comminuting surface (i.e., radial comminuting face)
297	...Plural comminuting faces
298	...Prefabricated assembled surface sections or parts
299	..Annular internal comminuting face
300	..Wear face to backing connections
300.1	..Plural stationary edged blades
301	.Miscellaneous

CLASS 242 WINDING AND REELING

1	MISCELLANEOUS
1.1 R	STATOR WINDING
1.1 A	..Continuous shuttle type
1.1 E	..Guide and end turn shapers
2	BALL OR MASS WINDING
3	SPHEROIDS
4 R	RING WINDING
4 A	..Flexible shuttle
4 B	..Rigid circular shuttle
4 BE	...With eccentric coil
4 C	..Core holder
5	.Armatures
6	.Taping and insulating
7.01	COMPOSITE OBJECT MAKING
7.02	.Method
7.03	..Electrical conductor or armature
7.04	.Circumferentially wound armature
7.05 R	.Transverse slot wound armature
7.05 A	...Rotatable armature core type
7.05 B	...Rotatable shuttle type
7.05 C	...Compound movement type
7.06	.Electrical conductor
7.07	..Electromagnet or electrical coil
7.08	...Including taping or insulating
7.09	...Sequential windings
7.11	...Simultaneous windings
7.12	...Windings control responsive to electric property or work
7.13	...Having planar winding turn increment
7.14	...Apparatus includes driven, shiftably related core support and guide members
7.15	....Drive for rotating core and traversing guide
7.16	.....Adjustably preselectable winding step
7.17	..Electrical connector or terminal making machine
7.18	...Including support for winding material supply holder
7.19	.Localized winding
7.21	.Hollow object
7.22	..Pail or pipe
7.23	..Taped
16	SPOOLERS
17	.Multiple
18 R	BOBBIN AND COP WINDING
18 A	..Alternate, successive dual wind
18 B	..Anti-bounce
18 G	..Glass winding
18 CS	..Change speed
18 AA	..Air actuation
18 DD	..Drum drive
18 EW	..End wind
18 PW	..Preliminary wind
18.1	.Ribbon breakers (i.e., means to prevent coil crowding)
19	.Cutting devices
20	.Sew machine shuttles
21	..Cutting devices
22	..Stops
23	..Disk type
24	..Thread pressers and pads
25 R	.Wire
25 A	...Alternate or successive wind
26	.Symmetrical layers
26.1	.Building mechanism (e.g., ring-rail type)
26.2	..Warp wind (i.e., full-traverse mechanism)
26.3	...Means to vary traverse mechanism
26.4	..Weft wind (i.e., short-traverse mechanism)
26.41	...Preliminary or bunch winders
26.42	....By auxiliary cam means
26.43	....By traverse-controlling means
26.44	.....With means to control gain mechanism
26.45	...Means to vary service traverse and/or gain
26.5	.Full traverse mechanism shifted in one direction
27	.Cone wind
27.1	..Preliminary or bunch winders
28	..Detectors and stops
29	...Thread break or exhaust
30	...Load
31	..Quick traverse
32	..Multiple
34	..Pressers and shapers
35	..Spindles and appurtenances
35.5 R	.Multiple
35.5 A	...Removing full and supplying empty bobbins
35.5 T	...Turret type
35.6 R	.Reserve thread uniting
35.6 E	...End finder
36	.Detectors and stops
37 R	..Thread break or exhaust
37 A	....Knotter
38	...Doubling machines
39	..Load
40	...Doubling machines
41	.Ejectors
42	.Doubling machines
43 R	.Quick traverse
43 A	...Counter rotating fingers
43 B	...Air jets
43 M	...Magnetic
43.1	..By means to vary traverse mechanism
43.2	..By drum guide means
45	.Tension devices
46	.Spool and bobbin lifters
46.2	.Driving connections
46.21	..Modified bobbin or cop
46.3	..Cop tube
46.4	..Clutch
46.5	...Centrifugal
46.6	..Resilient head
46.7	..Resilient socket
46.8	...Coil spring
47	CORDAGE
47.01	.Unidirectionally moving coils
47.02	..With seal for coil support means
47.03	..With threading means
47.04	..Interdigitated composite rotating surface
47.05	...Rigid cages
47.06	...Elements pivot on axis parallel to rotating axis
47.07	...Independent radially moving elements
47.08	..Plural drums
47.09	...Single run contacting
47.1	....Planetating
47.11	.....Helically grooved drum
47.12	..With lateral material-traverser
47.13	...Axially moving element
47.5	.Storage on sheaves
48	.Cutting devices
49	.Detectors and stops
50	.Cards, boards and forms
51	.Heddle and seine needles
52	.Tatting shuttles
53	.Hank and skein winding
54 R	REELING AND UNREELING
54 A	..Antenna reel
54.1	.Magnetic wire recorders only
54.4	.Slivers or rovings
55	.Fabrics (i.e., web-like material)
55.01	..Storage on sheaves
55.1	..Fibrous webs
179	..Web carrying machine-convertible information
55.16	...Folded part of web wound into spiral coil

	REELING AND UNREELING
	.Fabrics (i.e., web-like material)
	..Web carrying machine-convertible information
55.17	...Unidirectionally moving coil(s) for winding and unwinding
55.18	....Unwinding from center
55.19 R	.....While winding onto outside
55.19 A	.......Endless tape cartridge
55.21	....Winding into center
180	...Including support for additional webroll or roll holder
181	....And transfer means therefor
182	...Including low inertia bin or vacuum chamber
183	....Loop condition responsive operation control
184	.....By electrical summing or comparison means
185	.....By pneumatic condition sensing
186	...Web condition responsive operation control
187	....By shift of convolution-engaging member
188	....By sensing of differentiated web portion
189	....By web-induced shift of tension or guide member
190	.....To control electrical operation
191	....Responsive to web-pull-induced reel velocity
192	...Convolution-engaging drive for web-roll or reel
193	...Coaxial reel-pair
194	....Including cartridge
195	...Including leader discrimination
196	...Variable ratio reel drive
197	...Including cartridge
198	....Dissembly disabled reel or assembly initiated operation
199	....Which encloses reel-pair
200	.....With simultaneous or alternative reel drive coupling
201	...Plural or alternative reel drive
202	....Simultaneously operative
203	.....Including drive motor for each reel
204	....Including synchronized brake
205	....Cinematic
206	...Reel drive for association with linear drive
207	....Continuously controlled for accommodation to linear web advance
208	....Including operation coordinating means
209	...With linear drive
210	...Component for association with linear drive
55.2	..Delivery-roll holders (e.g., dispensers)
55.3	...Multiple roll
55.42	....Vertical axis of rolls
55.53	...With container
55.54	...Vertical axis of roll
55.55	...With deodorant-containing mandrel
56 R	..Cutting devices
56 A	....Turret type
56 B	....Transverse cut on reel
56.1	...And single wind-up reel for plural webs (e.g., condenser winders)
56.2	...Longitudinal severing
56.3	....Positionally related tool and wound-package surface
56.4	....And severed-fabric separating
56.5	.....By deflecting means
56.6	....And transverse cutter
56.7	....With slitter drive means
56.8	...Perforator or notcher
56.9	..Multiple reel-simultaneous operation
57	..Detectors and/or stops
57.1	...With means to shift web roll axially (i.e., web registry)
58	..Web roll supply (e.g., plural-roll support for reverse-web storage)
58.1	...Web uniting
58.2	....New roll moved
58.3	....Expiring web moved
58.4	....New web end moved
58.5	....Splice preparing means
58.6	...Conveying roll to position
59	..Lapped or butted lengths of sheet-length material
60	..Bandage rolling
61	..Cards, boards and forms
62	..Cloth (i.e., special for textile material)
63	..Automatically contracting reel
64	..Revoluble reel carriers
65	..Friction-drum drive
66	...Multiple drum
67	..Belt reels
67.1 R	..Winding machines
67.1 D	....Drawing boards and tables
67.2	...With feeding rolls
67.3 R	...With supply roll or rolls
67.3 F	.....Fabric stretcher
67.4	...With reversing means
67.5	...With diameter compensation
68	..Supporters and holders
68.1	...Driving stubs for cores
68.2	....Contractile stubs
68.3	...Core and single stub
68.4	...Core and opposed stubs or sockets
68.5	...Cores
68.6	....Means to reinforce end(s)
68.7	...Peripheral roll-supports
71	...For camera spool(s)
71.1	....Within magazine
71.2	.....Double spoon
71.3	....Winding keys
71.4	....Rapid winders
71.5	.....Automatic
71.6	....Rewinding feature
71.7	....Daylight film holders
71.8	...Special for strip material (e.g., spools for flange(s))
71.9	....Adjustable heads (i.e., axially positionable flanges)
72 R	...Contractile or expansible
72 B	.....With inflatable means
72.1	....Axially slidable cam
73	....Lengthwise of spool
73.5	...Intermediate roll support (e.g., for awnings)
74	..Web fasteners (i.e., means to attach web to spool)
74.1	...Releasable clamp
74.2	....Spring-urged
75	..Tension devices
75.1	...Belt or roller driven reel
75.2	...Drag on running web
75.3	...Slack tensioner
75.4	...Supply roll brake
75.41	....Peripheral strap or belt
75.42	.....Tension controlled
75.43	....Tension controlled
75.44	.....Electrical control
75.45	....Diameter controlled
75.46	....Weight controlled
75.47	....Revolutions or speed controlled
75.5	...Speed and/or torque control of reel
75.51	....Electrical control means
75.52	.....Photoelectric
75.53	....Hydraulic control means
76	..Guards and guides
223	.Fishing rod reel

	REELING AND UNREELING
	.Fishing rod reel
224	..Spinning reel (i.e., axial unwinding)
225	...Motor driven
226	....Spring motor
227	...Spool rotatable to wind
228	....With guide shiftable between wind and unwind positions
229	....Spool pivotal between wind and unwind positions
230	...With winding guide on rotor rearward of spool
231	....Guide shiftable on rotor
232	.....Guide shifted to wind position by rotor drive
233	......Guide shifted to unwind position by discrete manual operator
234	...With winding guide on rotor forward of spool
235	....Rotor drive shifts guide to unwind and wind positions
236	....With manual actuator to shift guide to unwind position
237	.....Actuator forward of rotor
238	.....With line snubber shifted by remote actuator
239	......Rotor and snubber shifted axially
240	.......Guide shifted radially
241	...With level-winding mechanism
242	....Eccentric cam reciprocates spool
243	...With brake
244	....Continuously applied
245	.....Between spool shaft and frame
246	.....Between spool and spool shaft
247	....Positive
248	.....Defines home position of reel part
249	..With drive mechanism
250	...Motor driven
251	....Spring motor
252	.....Motor actuated in response to pull on line
253	.....With independent manual drive
254	.....With spring charger
255	...Multiple drive ratios
256	...Ratchet-type drive
257	...With disengageable positive drive components (e.g., a clutch)
258	....With alternative yieldable mechanism
259	....Axially engaged
260	.....Coaxial of spool
261	......Reengageable responsive to drive rotation
262	....Reengageable responsive to drive rotation
263	....Gear pair
264	...With yieldable drive coupling (e.g., friction or fluid clutch)
265	....Variable by crank manipulation
266	.....Variable within distinct range(s)
267	....Between drive shaft and crank
268	....Between drive shaft and gear
269	....Coaxial with line take-up
270	.....Axially applied
271	......By center pin
272	...With feed roller
273	...With level winding
274	....Line shifts along rotatable cam bar
275	....Line traction guide wheel
276	....Manually shifted guide
277	....Drive mechanism oscillates guide
278	....Drive mechanism reciprocates guide
279	.....Reversely threaded screw
280	......Guide shiftable between wind and unwind positions
281	......Guide has line removal opening
282	...Alternative right or left side drive
283	...Hand crank feature
284	....Collapsible or extensible
285	..With brake
286	...Unwinding speed regulator (e.g., anti-backlash brake)
287	....Line tension responsive actuator
288	....Magnetic
289	....Centrifugal
290	...Spool bearing brake
291	...Manual pressure control
292	....Radially applied
293	.....Rolling contact
294	.....Separable attachment
295	...Connected to spool by one-way clutch
296	...Adjustable pressure pawl (e.g., braking clicker)
297	...Positive
298	....One-way
299	....With disabler
300	.....Rotation responsive
301	...Radially engaged
302	...Axially engaged
303	....Coaxial with spool
304	....On adjustable lever
305	..With unwinding indicator (e.g., bell or flashing light)
306	...Clicking indicator (e.g., flexible pawl and toothed member)
307	...Spring biased pawl
308	....Plural spring sections
309	..With line unwinding limiter
310	..Frame or static component
311	...Spinning reel frame
312	...Frame disassembly feature
313	....Hinged frame section
314	....Rotated joint
315	.....Threaded
316	...Reel support (e.g., reel foot)
317	...Stub shaft support (e.g., fly casting reel)
318	....With spool retainer feature
319	...With line or water shield
320	...With lubrication feature
321	...With bearing feature
322	..Spool or spool shaft feature
323	..Reel attachment
77	.Reels
77.1	..Made for spaced turns of material
77.2	..Wire fabricated
77.3	..Sheet material fabricated
77.4	..Bolt connections
78	..Metal working
78.1	...Sheet metal coiling
78.3	....Blockers (i.e., means to attach strip to core)
78.6	....Uncoilers
78.7	.....Cradle type (e.g., peripherally supported coil)
78.8	.....With free-end grasping and/or inserting
79	...Coil conveying
80	...Multiple
81	...Coil strippings
82	...Revoluble-coiler
83	...Receptacle
84	...Retractile arm
84.8	..Tape measure type (i.e., springless)
85	..Carriers
85.1	...Nonrotatable strand-carrier
86	...Hose
86.1	....Double strand
86.2	....Wheel-supported
86.3	.....Traction-driven
86.4	....Trundle (e.g., flange-wheel)
86.5 R	...Vehicle-mounted
86.5 A	.....Water skiing reels
86.51	....Mine locomotive type
86.52	....For web material
86.6	....Traction-driven
86.61	.....With traverse guide

	REELING AND UNREELING
	.Reels
	..Carriers
	...Vehicle-mounted
	....Traction-driven
	.....With traverse guide
86.62	......Manual or line
86.63	.......With brake
86.64	.....With brake
86.7	....With brake
86.8	....With manual or line traverse guide
94	...Trundle reels (e.g., flange-wheel)
95	...Wheel-attached (i.e., secured to vehicle wheel)
96	...Hand or body
99	...Brakes
100	..Clothesline type
100.1	...Double strand
100.2	...Weight-actuated rewind
103	..Nailing or stapling machine type
104	..Line driers
105	..Box strap
106	..Bracket supported
107	..Spring-drum type
107.1	...Double strand
107.11	....Strand supported
107.12	.....With releasable lock against return bias
107.13	....Parallel strand
107.14	.....Vertical axis of drum
107.15	......With brake
107.2	...With strand engaging stop
107.3	...With brake
107.4 R	...With unwinding lock
107.4 A	.....Vehicle motion sensitive inertia mass
107.4 B	.....Reel acceleration sensitive
107.4 C	.....Reel body movement
107.4 D	.....Rewinding responsive
107.4 E	.....Time delay
107.5	...With spring adjustment
107.6	...With lock against return bias
107.7	....With release (e.g., window shade type)
110	..Contractile (i.e., radially adjustable reel)
110.1	...Multi-part, with common actuator
110.2	....Axial link actuator
110.3	...Radially slidable, independently
115	..Knockdown or collapsible
116	..Separable disks or heads
117	WINDING DRUMS AND SAND REELS (I.E., DRUM STRUCTURE, PER SE)
118	BOBBINS AND SPOOLS (I.E., PER SE)
118.1	.Open-work structure
118.11	..Resilient
118.2	.Resilient
118.3	.Cop-tube type (i.e., headless or single-headed tube)
118.31	..Reinforcing feature
118.32	..Tube material feature
118.4	.Double-headed spool
118.41	..Plural spools axially connected
118.5	..Head(s) adjustable along axis
118.6	..Head connections (e.g., bolted)
118.61	...Inserted head joint
118.62	....Screw connection(s)
118.7	..Spool material feature
118.8	...Sheet stock
125	.Thread fasteners and guides
125.1	..Strand end attachers
125.2	...Outer end
125.3	....Permits unwinding
127	SKIEN HOLDERS
128	UNWINDING DEVICES
129	COIL HOLDERS (E.G., HOLDER FOR ROLL OF WIRE)
129.1	TAKE-UPS
129.2	.Lever type
129.3	.Rewind type
129.4	.Counterweight type
129.5	SUPPORTERS FOR STRAND MATERIAL HOLDERS
129.51	.Opposed stub-shafts
129.53	..With guide(s)
129.6	.Shaft supported at both ends
129.62	..With guide(s)
129.7	.With axial-position retainer for holder
129.71	..With retainer-spindle
129.72	..With guide(s)
129.8	.With brake for holder and/or strand
130	.For bobbins (i.e., commercial-type strand packages)
130.1	..With spindle modified for conical bobbin
130.2	..Vertically suspended spindle
130.3	..Pinboards (i.e., bobbin-storage trays)
130.4	..Skewer
131	..Creels
131.1	...Warp type
132	..Receptacle or trough
134	.For spools (i.e., domestic-type strand packages)
136	..Carrier attachments
137	..Receptacles
137.1	...With guide eye
138	...Single spool
139	..Stands
140	..Thread guards and guides
141	.For twine
146	..Receptacle
147 R	TENSION DEVICES

442	.Watch or clock type
442.2	.Copyholder with writing machine engaging means
443	.Musical instrument supported
444	.Body supported
444.1	.Including transparent viewing portion
445	.Inverted book-type holder
446	.With book leveling means
447	.Holder pivots to operative position
447.1	.Mounted on wall or art device
447.2	..Clamped to support
448	.Adjustable operative size
449	..Vertically adjustable supporting ledge
450	.With article receiving aperture
451	.With article gripping means
452	..Top
453	..Bottom
454	.With adjustable inclination
455	..Prop maintains surface in adjusted position
456	...Notch or cavity engaging
457	..Pivoted to base or stand intermediate edges
458	.Rotatable
459	.Folded blank
460	.Knockdown or collapsible
461	..With housing for collapsed components
462	..Pivoted link
463	..Folding leg
464	...Plural
465	...With brace
465.1	.Of wire
466	MIRROR OR PICTURE TYPE
467	.Adhesive, magnet or suction cup
468	.With spring-actuated clamping of front and back
469	.Stand
470	..Hanger alternative
471	..Handle alternative
472	..Foldable
473	..With groove or notch receiving lower margin of mirror or picture
474	..Mirror or picture pivots
475.1	.Bracket
476	..Mirror or picture position adjustable
477	...Adjustment by selectively engaging projections and recessions
478	....Spring biased
479	...Pivotal connection
480	....With linearly sliding movement
481	....Ball and socket type
482	.....Threaded socket
483	.....Coil spring bias
484	.....With additional pivotal connection
485	....Parallel and perpendicular pivot axes
486	....Parallel pivot axes
487	....Perpendicular pivot axes
488	..Plural fingers hold mirror or picture at edge
489	.Suspended
490	..Plural hooks engage mirror or picture at edge
491	...With spring
492	..With reel for winding cord
493	..With cord retainer
494	..With additional lower support
495	..Adjustable
496	...With selectively engaging projections and recessions
497	..Detachably engaging hook or headed nail
498	...Engaging eye or closed loop
37.3	CUTLERY TYPE
37.6	.Bracket
511	STAFF TYPE
512	.Plural staff
513	..Coplanar
514	.Angularly adjustable
515	..In plural planes
516	...By joint having spherical element
517	..Gravity biased
518	.Alternatively mountable (stand/bracket, etc.)
519	.Stand or base
520	..Inclined staff
521	..Rotatable staff
522	...Driven
523	..Having staff retaining or centering means
524	...Plural means, vertically spaced
525	....Including pivoted, staff-engaging supporting legs
526	.....Engagement is responsive to weight or thrust of staff
527	....Including plural, staff-engaging adjusting screws
528	..Folding
529	..Knockdown
530	.Ground inserted
532	..Having nonuse accommodation for insertable member
533	..Folding or knockdown
534	.Bracket
535	..Having selective mounting or receiving means
536	..For mounting upon surfaces of intersecting planes
537	..Attached by vacuum or magnetic means
538	..Inclined staff
539	..Vertical staff
540	..Double clamp
541	...Cylindrical support
48.1	EAVES TROUGH

	EAVES TROUGH
48.2	.Wall bracket
49	PIPE OR CABLE
50	.Neon tube
51	.Tool cord or tube
52	..Tool attached
53	.Train coupling type
55	.Antifriction element
56	.Extending through plate
57	..Interjoist
58	.Suspended
59	..Adjustable vertically
60	..Flexible
61	..From overhead or messenger cable
62	..Pipe rings or clamps
63	..Cable suspension clamps
64	...Automatically releasing
65	.Brackets
66	..Rod guard
67	..Angle cock type
67.5	..Divided knob or cleat
67.7	..Double arm
68.1	..Plural pipe or cable
69	...With bridle ring
70	..Adjustable
71	..With support penetrating means
72	..Beam clamped
73	..Interlocked bracket and support
74.1	..With ring or clamp
74.2	...Resilient gripping clip or clasp
74.3	...Flexible encircling band
74.4	...Separable
74.5	...Cleat
75	HOSE AND/OR NOZZLE TYPE
76	.Hand, ground and ladder supported
77	.Ladder attached
78	..With carrier
79	.Receptacle attached
80	.Stands
81	..Pivoted standard
82	..Swinging clamp
83	..Plural leg
84	...Swinging clamp
85	...Ground inserted
86	....Swinging clamp
87	..Ground inserted
88	...Swinging clamp
89	.Racks
90	..Folded hose
91	...Link supported
92	....Swinging or folding link
93	.....Simultaneously movable

149	...Adjustable
150	...Knockdown or folding
151	...Attached and detachable legs
152	...Of sheet material
153	...Of wire
154	...With clamp or hold-down
155	.Convertible to cane
155.1	..Handle becomes support surface
155.2	..Radially hinged support arms
155.3	...Slidable extensor
155.4	..Foldable or detachable longitudinal sections
155.5	..Intermediately pivoted sections
156	.Ground inserted
370	.Stand-mounted depending links carry support surface
371	.Tilting support surface
372.1	..Biased
393	..With incremental horizontal adjustment
394	...Ends raised differentially
395	...Concurrent with tilting
396	..Ends raised differentially
397	..With incremental adjustment about fixed horizontal pivot
398	..Tiltable with understructure
158	.Standard type
160	..Flexible
161	..Adjustable vertically
162.1	...Counterbalanced
404	...With force multiplying means
405	....Screw and nut
406.1	.....With rotation prevention disabler
406.2	......Weight or load responsive
407	...Notch or cavity engaging latch
408	....Biased latch
409	.....Support carried release
410	...Canted clutch collar
411	...Settable clamp
412	....Wedge actuated

STAND
.Standard type
..Adjustable vertically
...Settable clamp
413 ....Set screw actuated
414 ...Constant friction brake
159 ..Sectional
415 ..Support surface revolves or rotates about vertical axis
416 ...And moves lineally
417 ...Self-returning to normal facing position
418 ...With means to limit or inhibit rotation
157 .Adjustable vertically
419 ..With horizontal adjustment
420 ...On inclined guide or slide
421 ..Toggle or link
422 ..Geared
423 ..Notch or cavity-engaging retainer
424 .Horizontally movable support surface
425 ..Revolves or rotates about vertical axis
429 ..On slide or guide
430 ...Roller or ball
163.1 .Plural leg
163.2 ..Including suspended support
164 ..Crossed legs
431 ...All legs intersect at common center
432 ...Support surface detachably or slidably connected to leg
165 ..Knockdown
166 ..Folding
167 ...Vertical pivots
434 ...With folding support arms
435 ....Centrally diverging
168 ...Legs pivoted to head
169 ....Simultaneously movable
170 ...Legs pivoted to standard
171 ....Simultaneously movable
436 ...Laterally
439 ...Legs collapse against underside of support surface
172 ..Adjustable for various sized articles
173 ...Pivoted legs
440 ..Interbraced support surface and legs
440.1 ..At least two legs form unitary structure
174 .Of sheet material
175 .Of wire
176 .Article support
177 ..Heads
178 ...Adjustable
179 ....Universally
180 .....Leveling means
181 .....Ball and socket
182 ......Self leveling
183 ....On vertical and horizontal axis
184 ....On double horizontal axis
185 ....On single horizontal axis
186 ....On vertical axis
187 ...Article attaching means
188 .Leg attaching connections
188.1 .Understructure
188.2 ..Elevating or leveling device
188.3 ...Self-positioning
188.4 ...Screw threaded
188.5 ...Telescoping
188.6 ..Folding
188.7 ..Radiating leg type
188.8 ..Leg or foot
188.9 ...Tip or shoe
188.91 ...Brace
200 BRACKETS
200.1 .On extensible column mounted between opposed surfaces
201 .Plural, for single article
202.1 ..For swinging receptacle
205.1 .Specially mounted or attached
205.2 ..By mechanically interlocking fabric (e.g., velcro)
205.3 ..By adhesive
205.4 ...Bridged by diverse anchoring means
205.5 ..By vacuum
205.6 ...Bridged by diverse anchoring means
205.7 ...Including resilient means acting against atmospheric force
205.8 ...Including vacuum maker or breaker
205.9 ....Including valve or port
206.1 ...Including diverse abutment; e.g., brace, fulcrum
206.2 ...Including annular vacuum cup
206.3 ...Including plural vacuum cups
206.4 ....Vertically spaced
206.5 ..By magnet
207 ..Vertically or horizontally
237 ..Roof
208 ..Window
209 ...Radiator bracket
236 ...Shelf or scaffold type
210 ..Ladder
211 ...Hook type
238 ...Shelf or scaffold type
212 ..Faucet
213 ...Hook type
213.1 ..On closure hinge
213.2 ..On receptacle
213.3 ..On radiator
213.4 ...Radiator clamped
214 ..On horizontal rod or bar
215 ...Hook type
216.1 ..Including support piercing or cutting means
216.4 ...Including diverse mounting or attaching means
217.1 ...Weight causes means to engage support
217.2 ...Plural means engaging in different directions
217.3 ...Strike out, e.g., spur, barb, etc.
217.4 ...Threaded shank
218.1 ...Of wire
218.2 ....Single piece
218.3 .....Piercing or cutting means at each end
218.4 ..Post or column attached
219.1 ...Plural distinct post or column engaging means
219.2 ...At top of post or column
219.3 ...Traversing post or column
219.4 ...Including saddle
220.1 ..Corner
220.2 ..Interlocked bracket and support
220.3 ...Aperture board
220.4 ....Bracket engages plural apertures
221.1 .....Horizontally and vertically spaced apertures
221.2 .....Vertically spaced apertures
221.3 ...Resilient catch or latch
221.4 ....Plural, oppositely acting resilient members
222.1 ...Including manually movable or removable latch, retainer or keeper
222.2 ...Interlocked by angular motion
222.3 ....By rotation
222.4 ...Keyhole slot
223.1 ....Including keeper or retainer
223.2 ....Plural, differently directed slots
223.3 ...Including spaced, diverse engagements
223.4 ...Tongue and groove
224.1 ....Longitudinally stepped or tapered
224.2 ....Stepped or tapered sidewalls
224.3 ...Including socket or sleeve
224.4 ...Tongue and aperture
225.1 ...Including open slot
225.2 ...Including hook
225.31 ..Clamped to support

	BRACKETS
	.Specially mounted or attached
	..Clamped to support
227	...Hook type
228	...Beam clamped
229	...With article clamp
230	...Cylindrical support
231	....Flexible clamping band
231.1	...Tension element extends through support
231.2	...By expanding clamp
231.3	...By cam or wedge
231.4	...By sliding jaw
231.5	...By pivoted jaw
231.6	...By separable jaw
231.7	...By C-clamp
231.8	...By resilient clip
231.9	..In aperture of support
231.91	..By wall anchor
232	.Radiator
233	..Suspended radiator
234	..With rod-supported hook
235	.Shelf or scaffold type
239	..Projecting pin type
240	..Swinging or folding
240.1	...Stored in housing
240.2	...With floor engaging prop
240.3	...Removable and foldable entity
240.4	...Shelf support swings vertically
241	..Adjustable
242	...To vary shelf angle
243	...Vertically
244	....Sliding
245	.....Clamping
246	......Self-acting
247	..Of sheet material
248	...Single blank
249	..Of wire
250	..Shelf holding means
251	.Rod type
252	..Combined curtain rod and shade roller
254	...Independent bracket
255	....Plural rod
256	.....Adjustable
257	....Adjustable
258	.....In two directions
259	.....Laterally
260	......Step-by-step
253	...Plural rod
261	..Curtain rod
262	...Independent bracket
263	....Plural rod
264	....Mounted on opposing walls
265	....Adjustable
266	..Shade roller type
267	...Independent bracket
268	....Mounted on opposing walls
269	....Adjustable
270	.....In two directions
271	.....Laterally
272	......Step-by-step
273	..Awning head rod
274	.Adjustable
276	..Plural joint
277	...Lazy tong type
278	...Vertical and horizontal pivots
279	....With sliding joints
280.1	....Counterbalanced
281.1	....With parallel arms
282	...Vertical pivots
283	....With vertical adjustment
284	...Horizontal pivots
285	...Single vertical pivot and sliding joints
286	...Single horizontal pivot and sliding joints
287	...Horizontally and vertically sliding joints
288.1	..Single joint
288.3	...Ball and socket type
288.5	....Including mechanically actuated tension or locking member
289.1	...Vertical pivot
289.3	....Self-returning
290	....Hook type
291	...Horizontal pivot
292.1	....Counterbalanced
293	....Retractable
294	....Hook type
295.1	...Vertically sliding
296	....And rotatable
297.1	....Counterbalanced
297.2	....Bracket projects from vertical slot or channel
297.3	....Step-by-step adjustment
297.5	....Canted clutch collar
298	...Horizontally sliding
299	...In arcuate path
300	.Of sheet material
301	..Hook type
302	.Of wire
303	..Hook type
304	.Hook type
305	..Article clasping
306	..Article releasing
307	..Slidable
308	..Foldable
309.1	.Article holding means
309.2	..Pin or spindle
309.3	..Vacuum
309.4	..Magnetic
310	..Base engaging
311.2	..Receptacle type
311.3	...Inverted receptacle
312	...Neck engaging
312.1	...Uper rim or lip engaging
313	...Clamp
314	..Socket
315	..Ring
316.1	..Clamp
316.2	...Wedging or camming
316.3	....Self-actuating
316.4	...Sliding jaw
316.5	...Pivoted jaw
316.6	...Separable jaw
316.7	...Clip
316.8	..Horizontally spaced elements
317	SUSPENDED SUPPORTS
318	.Receptacle or bowl
320	.Releasable for lowering
321	..Clutch type
322	..Hook type
323	.Adjustable
324	..Pivoted parts
325	...Weights counterbalance
326	...With telescoping tubes
327	..Vertically
328	...Cord supported
329	....Reel
330.1	.....Spring
331	....With counterweight
332	....Pulley brackets
333	...Telescoping tubes
334.1	....Spring reel counterbalanced
335	.....With clutch in tubes
336	....Clutch
337	.....Friction
338	....Rotary brake
339	.Hook type
340	..Bar supported
341	..Swinging
342	.Fittings
343	..Ceiling attachment
344	..Centerpiece attachments
345	CANOPIES
345.1	SCUFF PLATE OR BUMPER

346	SUPPORTING BASES
346.1	.Coaster or caster cup
347	.Signal rod
348	.Radiator
349	.Rotatable
351	PROPS AND BRACES
352	.Automobile
353	.Clothesline
354.1	.Adjustable length
354.2	..Held in adjusted position by flowable granular material
354.3	..Threaded adjusting or locking member
354.4	...Locking member movable transversely of direction of adjusting movement (e.g., set screw)
354.5	..Held in adjusted position by transverse pin in registering apertures
354.6	..Held in plural discrete positions
354.7	...One-way locking (e.g., ratchet)
357	.Heads and bases
362	.VACUUM HOLD-DOWN
499	TIE DOWN
500	HOLD-DOWN
501	.For furniture-type leg
502	..Hollow leg entering
503	.Vehicle-mounted; for vehicle appurtenance
503.1	..For seat
504	.Paperweight type
505	.Looping or straddling
506	.Integral with article
507	.Post-mounted
508	..Stake post
509	..Vertically spring biased
510	CLASP-DOWN
363	VACUUM

CLASS 249 STATIC MOLDS

1 IN SITU CONSTRUCTION ENGINEERING TYPE OR BUILDING TYPE-MOLD OR FORM
2 .Forming road, side walk, or curb in situ
3 ..Including stake or stake mounting means
4 ...Form having spaced walls defining mold space
5 ....Including spacer cooperating with stake means to maintain walls apart
6 ...And means to align forms end-to-end
7 ...Means includes removable wedge engaging stake
8 ..Integral curb and gutter by mold having three spaced form walls
9 ..Joint forming means and adjuncts per se
10 .Forming hydraulic and earth control type product in situ
11 ..Culvert, waterway, pipe, or tunnel
12 ...Culvert and header wall
13 .Forming building structure
14 ..Stair
15 ..Providing surface facing on product, or existing structure, e.g., veneer, etc.
16 ..Forming barrier having simulated plural modules
17 ..Chimney
18 ..Barrier or sustainer, e.g., wall, joist, etc.
19 ...Including means to connect mold to existing building structure
20 ....Progressive molding type
21 .....Mold includes end plate
22 .....Mold forms spaced walls, or hollow wall
23 ....Means connecting flange of structural beam to support mold
24 .....Adjustable centering mold, or mold having adjustable support
25 .....Latch or clamp means including movable element engaging flange
26 ...Plural barriers, or plural sustainers, or barrier and sustainer mold
27 ....Intersecting barriers or sustainers, e.g., monolith
28 ....Floor or ceiling with joist mold
29 .....Including means to adjust joist mold size
30 .....Including reinforcement support means
31 .....Utilizing spaced cores of unitary construction transverse to joist
32 ......Cores directly abutting
33 ...Planar wall mold having opposed spaced panels
34 ....On footing or forming wall and footing
35 ....Panel including means or having shape to form recessed surface in major face of wall
36 ....Including means for forming spaced oposed walls or hollow wall
37 .....Means forming spaced hollow vertical shafts in wall
38 .....Utilizing tie means for connecting formed opposed walls, i.e., preform uniting
39 ....Including means transverse to panel to form opening through major face of wall, e.g., door, window, etc.
40 ....Including panel spacing means extending between and through panels, e.g., tie rod
41 .....Having weakened area to aid severing
42 .....Spacer means within mold cavity having plural threadedly fastened sections
43 .....Including sleeve surrounding spacer means engaging opposed faces of panels
44 .....Panel having plural adjoining sections
45 ......Including fastening means coacting with spacer means to secure sections together
46 .....Including wedge means engaging spacer means
47 ....Panel having plural adjoining sections and means to secure together
48 ...Column
49 ....Molding surfaces overlapping for adjustment
50 ...Beam or girder
51 .Post in situ
52 INCLUDING STATIC MEANS ON MOLDING DEVICE TO PRODUCE GROOVE OR DEPRESSION IN PRODUCT TO FACILITATE BREAKING OR CUTTING
53 R WITH STATIC GAGE, LEVEL, PLUMB, OR SCALE MARKINGS, ETC., ON MOLDING APPARATUS
53 M ..Mortar
54 DENTAL PROSTHODONTIC TYPE
55 HAVING SURFACE SHAPED TO SIMULATE A PRODUCT OF NATURE
56 FORMING VEHICULAR WHEEL
57 FORMING RING TYPE PRODUCT
58 FORMING RECEPTACLE AND DISPARATE PORTION, E.G., CUP AND HANDLE, TOILET STOOL, ETC.
59 FORMING HELICAL OR THREADED PRODUCT
60 FORMING GRID OR LATTICE TYPE PRODUCT
61 INCLUDING DESTRUCTIBLE FEATURE
62 .Destructible by heat or fusion
63 MOLD INCLUDING CORE AND MEANS TO REMOVE CORE
64 .Plural cores
65 HAVING INFLATABLE ELEMENT
66.1 INCLUDING MEANS TO APPLY FORCE TO REMOVE OR RELEASE PRODUCT FROM MOLD
67 .Pin or sleeve means
68 ..Having actuating means
69 .Tray-like mold including grid
70 ..Means mounted on or integral with tray-like mold
71 ..Means mounted on or integral with grid
72 ...Multi-part central longitudinal grid member
73 ...Plural movably mounted levers
74 .Means moves mold bottom through upstanding mold walls
75 ..Means is bell-crank type lever arrangement
76 ..To remove or release plural products
77 .Scraper
78 INCLUDING ELECTRIC HEATING MEANS
79 INCLUDING MEANS WITHIN SURFACE TO CONFINE HEAT EXCHANGE MEDIUM
80 .Mold part of particular material
81 .Mold having plural mold cavities or plural molds with community feature
82 INCLUDING MEANS TO ADJUST MOLD VOLUME DURING MOLDING
83 UNITING PREFORM WITH MOLDING MATERIAL
84 .Preform functions as partition means
85 .Preform supported by partition and preform projects within mold cavities
86 .Rail or railway type preform

UNITING PREFORM WITH MOLDING MATERIAL
87 .Lining or coating a machine type-bearing or friction surface, e.g., babbitting
88 ..Including adjustable feature or preform centering means
89 .Pipe bell uniting to male end of pipe
90 .Mold supported by and girdles preform
91 .Including means other than mold surface to support preform
92 ..Food product
93 ..Means located outside mold cavity
94 ...Preform also supported by hole or recess in mold wall
95 .Split mold clamps and supports preform
96 .Preform supported by hole or recess in mold wall or surface
97 ..Hole extends through mold wall
98 FORMING PRODUCT HAVING JOINT OR COUPLING
99 .Lapped interfitted facing, alternating reversing identical facing, or keyways
100 ..Tubular facing connected end to end, e.g., bell or spigot, etc.
101 .Tongue and groove on same product
102 PROVIDING SUBSTITUTION OF ALTERNATIVELY USED PARTS
103 .Part having intelligence
104 .Part having intaglio or cameo effect
105 INCLUDING STATIC FILLING MEANS IN CONTACT WITH MOLD CAVITY
106 .Sink head or hot top
107 .Means includes single material inlet communicating with plural feed passages leading to single cavity
108 .Means is separable funnel or hopper
109 .Having inlet to cavity at or near bottom of cavity
110 .Means include single material inlet communicating with plural cavities
111 INCLUDING SOLID HEAT CONDUCTOR OR INSULATOR, I.E., CHILL OR INSULATOR
112 INCLUDING REMOVABLE OR MOVABLE LINER
113 .Foraminous
114.1 INCLUDING COATING OR ADHERENT LAYER
115 .Parting layer
116 .Super-imposed metal layers
117 CONTAINER-TYPE MOLDING DEVICE
118 .Plural molds having common means to actuate a part of each mold
119 .Plural article forming mold, or molds with community feature
120 ..Including support, stand, or rack
121 ..Including lid
122 ..Including core
123 ...Common to plural mold cavities
124 ...Removably connected to mold surface
125 ...Integral with removable mold surface or forming partition
126 ..Vertically stacked mold
127 ..Mold or mold part of flexible material to facilitate product removal
128 ...Removable partition
129 ..Having unitary partition common to and defining plural mold cavities
130 ...Partition includes means providing communication between cavities
131 ...Partition removable without mold disassembly
132 ...Intersecting partitions
133 ..Constructed to include an ambient air space
134 .Of named component
135 ..Metal
136 .Mold bottom movable through upstanding mold walls to aid product removal
137 .Having means enabling rotation of molding device, e.g., rocker, pivot, etc.
138 ..Forming stereotype
139 .Including means securing molding device to detachable, separate and distinct support
140 .Forming module having spaced intaglio or cameo areas on major face of module
141 .Including auxiliary port for transmission of fluid, i.e., vent or drain
142 .And an inner removable core to form recess or opening
143 ..Fence post
144 ..Having inner and outer shells forming conduit-type product, receptacle-type product, or module
145 ...Plural intersecting cores to produce product having intersecting passages
146 ...Including non-molding means engaging internal portion of core to retain core spaced throughout its length
147 ....Means is secured to core and engagable with a keeper opening in a wall of the molding device
148 ....Means is exterior of and spanning molding space, e.g., tie bar, etc.
149 .....Core spaced from bottom of mold cavity
150 ...Inherently resilient core frictionally retained in position by its expansive or contractive force
151 ...Core slidably removably engaging a hole in the wall of the molding device
152 ...And means to expand or contact shell or core
153 ....By bending or flexing molding face
154 .Having opposed complementary arcuate surfaces with terminating end wall to for
155 .Adjustable, forming different size or shaped product
156 ..By change of number of mold surfaces
157 ..By overlapping molding surfaces
158 ..By mold wall movable transversely between walls of mold
159 ..By means adjusting angular displacement of adjoining mold walls
160 .Having plural mold sections
161 ..With means to move section
162 ...Means moves opposed sections simultaneously toward and away from each other
163 ..Removable means to maintain assembled, i.e., knockdown
164 ...Peripherally encircling means
165 ...Wedge, pin, or bolt means
166 ....Including locking means to prevent removal of wedge, bolt, or pin, e.g., nut, etc.
167 ...Means include permanently associated movable element, e.g., clamp
168 ..Each with fastening means
169 ...Movably secured to section
170 ..Hinged sections
171 ...Plural section hinged to common section
172 ....Bottom section
173 .Longitudinally split, resilient cylindrical mold having means to maintain in a contracted position
174 .Forming ingot
175 CORE (INTERNAL MOLD)

	CORE (INTERNAL MOLD)
176	.Plural spaced cores having community feature
177	.Including means for attaching core to a support
178	.Including means to expand or contract core
179	..Means bends or flexes molding face of core
180	..Means simultaneously moves plural molding sections of core
181	...Rotary means
182	..Rotary means, e.g., turnbuckle, etc.
183	.Of resilient material capable of flexure to aid removal of core from product
184	.Of plural sections
185	..Hinged sections
186	..Including frictionally secured means
187.1	MOLD ELEMENT
188	.In situ construction engineering or building type
189	..Form panel
190	...Including tie rod or means for positioning tie rod
191	....Including means to connect plural panel sections also mount tie rod
192	...Including means to connect abutting panel sections
193	....Consisting of shaping and retaining means disposed between sections
194	....Angularly arranged panel sections
195	....Pivoted means on one section engaging projection or recess of other section
196	....Means reciprocably engages apertures in each panel section
197	.Sink head or hot top
198	..Including means permitting change in relative position of sink head or hot top on mold
199	..Including means reflecting heat to surface of melt
200	..Hollow for confining a heat producing or heat retaining medium
201	..Including internal, diverse, perimetric layer
202	..Adjuncts
203	.Grid, e.g., ice tray type
204	.Closure, e.g., top, stools, etc.
205	MISCELLANEOUS MOLD ADJUNCTS
206	.Splash control element
207	.In situ construction engineering or building type
208	..Curb or step support
209	..Arch-like centering, e.g., culvert, tunnel, bridge, arch, etc.
210	..Barrier or sustainer type
211	...Including means to attached to flange of beam
212	...Adjustable support for dome shaped core
213	..Including tie
214	...Having weakened area to facilitate breaking
215	...Coiled or twisted wire
216	...Having means to maintain panels spaced apart
217	....Shaping means removably mounted on tie
218	....Sheet metal
219.1	..Clamp or bracket, per se
219.2	...Waler type

251 ELECTRICALLY NEUTRAL MOLECULAR OR ATOMIC BEAM DEVICES AND METHODS
252.1 CALIBRATION OR STANDARDIZATION METHODS
253 GEOLOGICAL TESTING OR IRRADIATION
254 .With drill or drilling
255 .With sampling
256 .Well testing apparatus and methods
257 ..With casing collar detection
258 ..By interface of fluids
259 ..With placement of tracer in or about well
260 ...Tracer being or including radioactive material
261 ..With detector or detector circuit control
262 ..With particular detector signal circuit
263 ...With detector signal modulation or carrier wave
264 ...Having plural detectors
265 ..Plural detectors
266 ...With spacing or direction of detectors
267 ..With radiation control to detector
268 ..With well engaging means
269 ..With source and detector
270 ...Having neutron source and gamma detector
271 CODED RECORD AND READERS; INVISIBLE RADIANT ENERGY TYPE
281 IONIC SEPARATION OR ANALYSIS
282 .Methods
283 ..With collection of ions
284 ...For material recovery
285 .With plural, simultaneous ion generators
286 .Ion beam pulsing means with detector synchronizing means
287 ..With time-of-flight indicator
288 .With sample supply means
289 .With evacuation or sealing means
290 .Cyclically varying ion selecting field means
291 ..Circular ion path
292 ..Laterally resonant ion path
293 ..Alternating field ion selecting means
294 .Static field-type ion path-bending selecting means
295 ..With variable beam shifting field means
296 ..Plural diverse-type static path-bending fields
297 ...For causing complex ion path
298 ..Magnetic field path-bending means
299 ...With detector
300 ....With detector control or regulating
301 METHODS OF DETERMINING OIL PRESENCE, CONTAMINATION OR CONCENTRATION
302 RADIATION TRACER METHODS
303 .Radioactive tracer methods
304 METHODS INCLUDING SEPARATION OR NONRADIANT TREATMENT OF TEST MATERIALS
305 ELECTRON ENERGY ANALYSIS
306 INSPECTION OF SOLIDS OR LIQUIDS BY CHARGED PARTICLES
307 .Methods
308 .Including a radioactive source
309 .Positive ion probe or microscope type
310 .Electron probe type
311 .Electron microscope type
440.1 .Analyte supports
441.1 ..With air lock or evacuation means
442.1 ..With object moving or positioning means
443.1 ..With heat transfer or temperature-indication means
315.3 SOURCE WITH CHARGED PLATE-TYPE DETECTOR
316.1 WITH INFRARED OR THERMAL PATTERN RECORDING
317.1 .Thermal copying of documents
318 ..With image transfer device
319 ..With conveying means
324 CORONA IRRADIATION
325 .Charging of moving object
326 .Charging of objects
327.2 SOURCE WITH RECORDING DETECTOR
328 AUTOMATIC/SERIAL DETECTION OF SIMILAR SOURCES
329 RECORD PROJECTORS
330 INFRARED-TO-VISIBLE IMAGING
331 .Including liquid crystal detector
332 .Including detector array
333 .Including image tube type detector
334 .Including means for scanning field of view
335 CLOUD OR BUBBLE CHAMBERS
336.1 INVISIBLE RADIANT ENERGY RESPONSIVE ELECTRIC SIGNALLING
336.2 .Superconducting type
337 .With heating of luminophors
338.1 .Infrared responsive
338.2 ..Ferroelectric, ferromagnetic, photomagnetic types
338.3 ..Pyroelectric type
338.4 ..Semiconducting type
338.5 ..With means to analyze uncontained fluent material
339 ..With selection of plural discrete wave-lengths or bands
340 ..Methods
341 ...With irradiation of object or material
342 ...Locating infrared emissive objects
343 ..With means to transmission-test contained fluent material
344 ...Plural series signalling means
345 ...Plural beam/detector pairs
346 ....Plural temperature sensitive signalling means
347 ..With moveable beam deflector or focussing means
348 ...Controlled by signalling means
349 ..Plural signalling means
350 ...With periodic beam varying means
351 ..With periodic beam varying means
352 ..With temperature modifying means
353 ..With beam deflector or focussing means
354.1 .Signalling means controls incident radiation
356.1 .Flow metering
356.2 ..Using radioactive tracer
357.1 .Fluent material level signalling
358.1 .With means to inspect passive solid objects
359.1 ..Rectilinearly moving object
360.1 ..With relative movement means
361 R .With or including a luminophor
361 C ...Chemiluminescent detection
362 ..Methods
363.01 ..With radiant energy source
363.02 ...Body scanner or camera
363.03 ....With positron source
363.04 ....Emission tomography
363.05 .....With detector support
363.06 ....Using coded aperture
363.07 ....With distortion correction
363.08 ....With detector support
363.09 ....With calibration
363.1 ....With a collimator
364 ...With fluent source handling or collecting means
365 ...Ultraviolet light source
366 ..Plural electric signalling means
367 ..Plural or composite luminophor

	INVISIBLE RADIANT ENERGY RESPONSIVE ELECTRIC SIGNALLING
	.With or including a luminophor
368	..With optics
369	..With output system
370.01	.Semiconductor type
370.02	..Alpha particle detector
370.03	..Fission fragment/fissionable isotope detector
370.04	..Self-powered detector
370.05	..Neutron detector
370.06	..With discrimination
370.07	..With dose or dose rate measurement
370.08	..With imaging
370.09	...Using X-ray or gamma-ray source
370.1	..Position-sensitive detector
370.11	..With scintillator
370.12	..Of exotic material
370.13	...Containing cadmium telluride
370.14	..Of particular structure (e.g., MOS, PIN)
370.15	..With temperature control or compensation
371	..Methods
372	.Ultraviolet light responsive means
373	..With means to transmission-test contained fluent material
374	.Including a radiant energy responsive gas discharge device
375	..Methods
376	..With electroscopic indicators
377	...With charge generator
378	...With charge storage means
379	..With means to supply the gas
380	...Radioactive gas, or with gas-borne radioactive material
381	...With radioactive source
382	..With means to ionize the gas
383	...Emissive fluent type, or with transmissive fluent material
384	...Radioactive
385.1	..Plural chambers or three or more electrodes
385.2	...Spark chambers
386	..With a periodic electrode bias varying means
387	..With periodic electrode bias supply
388	..With indicator
389	.Including ionization means
390.01	.Neutron responsive means
390.02	..Radiographic analysis
390.03	..With dose measurement
390.04	..Composition analysis
390.05	...For moisture content
390.06	..Density/thickness/consistency analysis
390.07	..Spectrum analysis
390.08	...Using time-of-flight spectrometers
390.09	...Using diffractometers
390.1	..Including beam control
390.11	..Including a scintillator
390.12	..Position-sensitive
391	..Methods
392	..With indicating or recording means
393	.With radiant energy source
394	.Plural signalling means
395	.Methods
200	PHOTOCELLS; CIRCUITS AND APPARATUS
201.1	.Photocell controls its own optical system
201.2	..Automatic focus control
201.3	...Of a microscope
201.4	...Active autofocus
201.5	....With optical storage medium, e.g., optical disc
201.6	...Based on triangulation
201.7	...Based on contrast
201.8	...Based on image shift
201.9	..Light beam wavefront phase adaptation

203.1	..Following a target (e.g., a star or instrument pointer or other object) other than a pattern
203.2	...Target illuminated by artificial light source
203.3	...Self-luminous target
203.4	....Sun
203.5	....Cathode ray tube scanning
203.6	....Airborne target, or spaceborne target other than the sun (e.g., star or missile)
203.7	....With moving reticle in optical path
202	..Following a pattern (e.g., line or edge)
548	..Controlling web, strand, strip, or sheet
549	..Cathode ray tube
204	..Adjusting optical system to balance brightness in plural paths
205	..Controlling light source intensity
550	.Interference pattern analysis (e.g., spatial filtering or holography)
551	.Signal isolator
552	.Solid state light source
553	..Array or matrix
554	.Flame light source
206	.Photocell controlled circuit
206.1	..Having means to generate positional information in at least one plane of a target moving relative to one or more photodetectors
206.2	...Detection of positional information in two or more planes (e.g., azimuth and elevation; hour angle and declination)
206.3	....With moving reticle in optical path
555	..Including coded record
556	...Document verification or graph reader
557	...With means to position, direct, or detect record
558	..Steroplotters
559	..With circuit for evaluating a web, strand, strip or sheet
560	...Width or length
561	...Presence or position
562	...Defects
563	....With scanning
564	..With circuit for evaluating a fluent material
565	...With comparison
207	..Electron multiplier
208.1	..Plural photosensitive image detecting element arrays
208.2	..Plural photosensitive nonimage detecting elements
208.3	...With electronic scanning
208.4	...Used to switch an electrical circuit or device on or off
208.5	...With photodetector output ratioing other than by bridge or push-pull circuits
208.6	...With specific relative positional geometry of photosensitive elements (e.g., an annular photosensitive element surrounding a coaxially mounted photosensitive element)
210	..Bridge and push-pull circuits
211 R	..Special photocell
211 J	....Photosensitive junctions
211 K	....Photosensitive rheostats
212	...Self-generating type
213 R	...Light amplifiers
213 A	.....Switching circuits
213 VT	.....Vacuum tube circuits
214 R	..Electron tube circuits
214 P	....Photographic control
214 D	....Light dimmers
214 A	....Amplifier

	PHOTOCELLS; CIRCUITS AND APPARATUS
	.Photocell controlled circuit
	..Electron tube circuits
214 AG	....Automatic gain control
214 AL	....Ambient light responsive
214 B	....Ambient light desensitizing means
214 C	....Compensation
214 DC	....Digital circuitry
214 L	....Logarithmic/linear signal
214 RC	....Rate of change
214 SF	....Slave flash
214 SW	....Electronic switch
215	.Combined with diverse-type device
216	.Optical or pre-photocell system
227.11	..Light conductor
227.12	...Optical delay line
227.13	...Light pen
227.14	...Condition responsive light guide (e.g., light guide is physically affected by parameter sensed which results in light conveyed to the photocell)
227.15	....With detection of macroscopic break in fiber
227.16	....With detection of fiber microbend caused by parameter affecting fiber
227.17	....Causing polarization change in fiber
227.18	....Causing light spectral frequency/wavelength change
227.19	....With coherent interferometric light
227.2	...With imaging
227.21	...With light chopping or modulation
227.22	....Keyboard or other manual switch controlled
227.23	...With spectral frequency/wavelength discrimination
227.24	...With coupling enhancement means
227.25	....Fluid coupling
227.26	...With scanning
227.27	...With coherent interferometric light
227.28	...With specific configuration of light conductor components with respect to each other
227.29	...With specific illumination or viewing orientation of light conductor relative to viewed object (e.g., light normal to, and detector at 45 degree angle to, viewed object
227.3	...With variable orientation of light conductor relative to viewed object (e.g., goniometer)
227.31	...Side or edge illuminated light conductor or collector
227.32	...End illuminated light conductor with noncircular geometric crosssection
566	..Including coded record
568	...Digital information
569	....Card type
570	....Tape, drum or disc types
571	..Detection or web, strand, strip or sheet
572	...Material defects
573	..Fluent material in optical path
574	...Scattered or reflected light
575	...Plural paths
576	...Sample holder or supply
577	...Volume or level
221	..Controlled by article, person or animal
222.1	...Inanimate article
222.2	....Particle detection
223 R	....Conveyor or chute
223 B	......Bottles
224	....Article and light ray relatively moved during sensing
225	..Polarizing
226	..Color (e.g., filter or spectroscope)
228	..Integrating sphere
229	..Light valve (e.g., iris diaphragm)
231.1	...Actuated by dynamic external physical quantity
231.11	....Actuated by gauge element deflection
231.12	....Gyroscopes
231.13	....Shaft angle transducers
231.14	.....Incremental shaft readers, i.e., with means to generate increments of angular shaft rotation
231.15	......With plural gear driven discs
231.16	......Using phase difference of output signals from plural photodectors
231.17	......With means to indicate a complete shaft rotation
231.18	......Position indicating shaft encoders with means to generate a unique signal for each specific angular shaft position
231.19	....Pressure-responsive light valves
230	...Reflection type(e.g., mirror galvanometer)
232	...Light chopper type
233	....Rotary
578.1	..Plural light sources or optical paths
234	..Means for moving optical system
235	...Repetitious path
236	....Rotary motion
237 R	..Hoods, grating, baffles, diaphragms, masks
237 G	....Gratings (moire fringes)
238	.Temperature control of photocell
239	.Housings (in addition to cell casing)
396 R	WITH CHARGED PARTICLE BEAM DEFLECTION OR FOCUSSING
396 ML	..Magnetic lens
397	.With detector
398	.With target means
399	..Secondary emissive type
400	..With means to convey or guide the target
423 R	ION GENERATION
423 P	..Photoionization type
423 F	..Field ionization type
424	.Methods
425	.With sample vaporizing means
426	.Arc type
427	.Electron bombardment type
428	FLUENT MATERIAL CONTAINMENT, SUPPORT OR TRANSFER MEANS
429	.With temperature control
430	.With valve or pump actuator
431	.With cleaning means
432 R	.With irradiating source or radiating fluent material
432 PD	...Parent-daughter isotope separators
433	..Including a moveable-surface transfer means
434	..Including a gravity-type transfer means
435	..Including a flow-through transfer means
436	...Flow-enclosed radiation source
437	...Tortuous path type
438	...With a flow-modifying surface
453.1	SUPPORTS FOR NONSIGNALLING OBJECTS OF IRRADIATION (E.G., WITH CONVEYOR MEANS)
454.1	.With source support
455.1	..Source and object encasement (e.g., sterilizers)
458.1	LUMINOPHOR IRRADIATION
459.1	.Methods
461.1	.With ultraviolet source
461.2	..Biological cell identification
462.1	..Self-luminous articles
463.1	..Dials, pointers, gauges, and bands
464.1	..Pendants

	LUMINOPHOR IRRADIATION
	.With ultraviolet source
465.1	..Manual operators or luminous attachments therefor
466.1	..Covers, keys, or luminous attachments therefor
467.1	..Reticles, gun sights or with optical element
472.1	INVISIBLE RADIATION RESPONSIVE NON-ELECTRIC SIGNALLING
473.1	.Methods
474.1	.Optical change type
475.2	.Photographic type
482.1	..With radiation filter, modifier or shield (e.g., dosimeter badges)
483.1	.Luminescent device
484.1	..Requiring an additional energy source to cause luminescence
485.1	..With light excluding casing having an aperture
486.1	..With plural luminescent material or plural luminescent containing layers or areas
487.1	..With optical member or material to directly modify luminous energy
488.1	...Plural planer layer type
489	ION COLLECTORS
491.1	MEANS TO ALIGN OR POSITION AN OBJECT RELATIVE TO A SOURCE OR DETECTOR
492.1	IRRADIATION OF OBJECTS OR MATERIAL
492.2	.Irradiation of semiconductor devices
492.3	.Ion or electron beam irradiation
493.1	RADIANT ENERGY GENERATION AND SOURCES
494.1	.Plural radiation sources
495.1	..Including an infrared source
496.1	.With container for radioactive source and radiation directing or selectable shielding
497.1	..With means to move source between shielded and unshielded position
498.1	..With pivoted or rotatable radiation shield
503.1	.With radiation modifying member
504 R	..Ultraviolet or infrared source
504 H	....Hand-held
505.1	RADIATION CONTROLLING MEANS
506.1	.Shielded receptacles for radioactive sources
507.1	..Having plural storage compartments or plural nested receptacles
515.1	.Shields
516.1	..Garments
517.1	..Construction elements or building parts
518.1	..With neutron absorption material
519.1	..Flexible
522.1	SOURCE SUPPORTS
526	MISCELLANEOUS
	******************************
	CROSS-REFERENCE ART COLLECTIONS
	******************************
900	OPTICAL LIQUID LEVEL SENSORS
901	.With gap between light guide elements (includes open light path preset)
902	..With closed light path preset
903	...With prism contacting liquid
904	.With single light guide element to guide light in a continuous path
905	..With longitudinal irregularity
906	...With large scale longitudinal bend
907	...With portions of light guide coating or cladding removed
908	...With waveguide twisted about its longitudinal axis

CLASS 251 VALVES AND VALVE ACTUATION

1.1	BLOW-OUT PREVENTERS (I.E., COOPERATING SEGMENTS OF ANNULUS)
1.2	.Deformable annulus
1.3	.Radial reciprocating ram
3	PATTERN TRACER CONTROLLED ACTUATOR
4	TUBE COMPRESSORS
5	.Fluid pressure actuated
6	.Roller tube contacting element
7	.Perpendicularly reciprocating tube contacting element
8	..Screw actuated
9	.Pivoting tube contacting element
10	..U-shaped resilient bar or rod
11	HEAT OR BUOYANCY MOTOR ACTUATED
12	FLUID ACTUATED OR RETARDED
14	.Fluid and non-fluid actuators
15	.Compulsory cut-off after flow period
16	..Serial main line cut-off and manual valves (e.g., hydraulic "fuses")
17	...Interconnected motion
18	....Manual and pilot valves
19	..Auxiliary pilot valve overrides a first pilot valve
20	..Forced return of actuator to cut-off position
21	..Actuator connection released on opening of cut-off valve
22	..Control fluid released into closed build-up chamber
23	..Dashpot interconnects actuator and valve
24	.Venturi or line flow effect assisted
25	.Pilot or servo type motor
26	..Alternative pressure sources or pilot valve
27	..Servo failure responsive control of main valve
28	..Fluid actuated pilot valve
29	...With additional pilot valve control
30.01	..Electrically actuated pilot valve
30.02	...Main valve biased closed by fluid pressure
30.03	....Venting passage within movable main valve
30.04	.....Pilot valve movably mounted within or around main valve
30.05	....Fluid pressure sole means for biasing valve closed
31	..Double or oppositely acting motor units
32	..Latched pilot valve
33	..Choked pressure type servo motor
34	...With reverse flow prevenging (nonsiphoning)
35	...Variable choke passage according to valve position
36	...With separate dashpot or choked fluid retarding chamber
37	...With choke or restrictor in main line
38	...Pilot valve seated in motor or valve element
39	....Controls inlet to choke chamber
40	....Tilting pilot valve
41	...Remote pilot valve actuation
42	...Adjustable opening limit for main valve
43	...Main valve biased open by line pressure
44	....Differential reaction surface for line pressure
45	.....Diaphragm or bellows surface
46	....Diaphragm or bellows motor element
47	...With separate dashpot or choked fluid retarder
48	.Dashpot or fluid controlled retarder or timer
49	..Latch or trip releasing
50	..Line pressure connected dashpot or choke chamber
51	...With choke by-pass or relief means
52	...Chamber fills on closing of main valve
53	..Line connected open accumulating chamber
54	..Closed fluid circuit dashpot or choke chamber
55	..With choke by-pass or relief means
56	.Plural operations (e.g., lifting and rotating rotary valve)
57	.Fluid link or column actuator
58	.With mechanical movement between actuator and valve
59	.Rotary or oscillatory motor
60	.With adjustable limit stop for actuator
61	.Flexible wall expansible chamber reciprocating valve actuator
61.1	..Flexible wall valves fluid
61.2	..Coaxial actuator, seat and valve
61.3	...Valve between coaxial spring biasing means and actuator
61.4	...Coaxial spring biasing means between valve and actuator
61.5	...Actuator wall between valve and coaxial spring biasing means
62	.Piston type expansible chamber reciprocating valve actuator
63	..Unitary piston and valve
63.4	..Lost motion, abutment or resilient connection between actuator and valve
63.5	..Coaxial actuator, seat and valve
63.6	...Coaxial spring biasing means between valve and actuator
64	WITH NON-FLUID RETARDER
65	PERMANENT OR CONSTANTLY ENERGIZED MAGNET ACTUATOR
66	BIASED TRIP
67	.With second diverse control
68	.Electrical trip actuation
69	..Trip operated on failure of electric power
70	..With electrical resetting means
71	...Rotary electric motor
72	.Weight biased trip
73	.Fluid pressure trip actuation
74	.Mechanical movement trip actuation
75	WITH SNAP ACTION
76	IMPACT TYPE ACTUATOR
77	LOST MOTION BETWEEN ACTUATOR AND VALVE
78	.Lever
79	.Overload release
80	..Elastic
81	..Slip coupling between actuator and valve
82	.Check valve with external opening and closing means
83	..Spring
84	VALVE HEAD MOVABLY CONNECTED FOR ACCOMMODATION TO SEAT
85	.With yieldable connection
86	.With universal connection
87	.With single plane swing pivoted connection
88	.Rotatable only
89	WITH MEANS FOR BLOCKING OR DISABLING ACTUATOR
89.5	.Actuator, or blocking means, includes flow path joint
90	.Attachments
91	..Requiring modification of valve
92	..Acting on valve limit stop
93	...Mounted on valve actuator
94	.Fluid pressure biased latch
95	.Released by non-valving actuator motion
96	..Linear reciprocation of rotary handle

WITH MEANS FOR BLOCKING OR DISABLING ACTUATOR
.Released by non-valving actuator motion
..Linear reciprocation of rotary handle
97 ...Latch connects actuator to body through head
98 ..Pivoted handle
99 ...With spring
100 ..Rotation of reciprocating handle
101 .Latch manipulator mounted on handle or stem
102 ..Constrained linear motion
103 ...With pivoted latch
104 ...With latch rigidly associated with manipulator
105 ....Latch lug extends transversely to axis of manipulator
106 ...With transversely movable latch
107 ..With pivoted latch
108 ...Resilient latch and manipulator
109 ...With spring
110 ..With reciprocating latch
111 .Latch manipulator mounted on valve body
112 ..Set screw
113 ..Constrained linear motion of latch with rigidly associated manipulator
114 ..With pivoted latch
115 ...Resilient latch and manipulator
116 ...With spring
117 WITH RESTRICTOR IN PARALLEL TO MAIN VALVE
118 WITH MATERIAL GUIDE OR RESTRICTOR
119 .Aspirated stem drain
120 .Movable or resilient guide or restrictor
121 ..Adjustable guide or restrictor
122 ...Tapered metering plug
123 .Valve at point of greatest restriction
124 ..Venturi restrictor
125 .Drop forming restrictor
126 .Spiral guide or spiral restrictor
127 .Baffle or zigzag flow restrictor
128 WITH DETACHABLE ACTUATOR AND MEANS TO PREVENT LEAKAGE WHEN ACTUATOR IS DETACHED
129.01 ELECTRICALLY ACTUATED VALVE
129.02 .With means to bias valve open
129.03 .With nonelectrical actuator
129.04 .Remote or follow-up control system for electrical actuator
129.05 .Having means to produce digital pulses
129.06 .Having element dimensionally responsive to field
129.07 .Balanced valve
129.08 .Having means to produce proportional flow
129.09 .Solenoid having plural coils
129.1 ..Coils have common axis
129.11 .Rotary electric actuator
129.12 ..With limit control
129.13 ..With speed or braking control
129.14 .Freely rotatable ball valve
129.15 .Including solenoid
129.16 ..Having plate-shaped armature
129.17 ..Having diaphragm between coil and opening controlled
129.18 ..With means to adjust stroke of armature
129.19 ..Lost motion between valve and valve actuator
129.2 ..Mechanical movement between valve and solenoid
129.21 ..Coil surrounds valve port or flow line
129.22 ..Solenoid within flow line
142 WITH CORRELATED FLOW PATH
149 .Valve operated by joining flow path sections
149.1 ..Joining motion includes linear valve operating component
149.2 ...Valve rotatably or hingedly mounted
149.3 ...Valve motion is transverse to, or opposed to, the linear component
149.4 ...Joint includes screw thimble
149.5 ...Of rotatable flow path section
149.6 ...Motion opposed by valve spring
149.7 ....Contact only, or friction, joint
149.8 .Valve operated by motion of flow path
149.9 .Flow path joint interlocked with valve or actuator
144 .Tank
145 .Pipe side
146 ..Clamp type coupling
147 .Pipe end (terminal valve)
148 .Pipe coupling or union
150 ..Flexible or expansible
151 ..Non-rotatable conduit coupling
152 ..Valve seat and coupling element removable as a unit
143 .With mounting or support
153 .With particular outlet or inlet
154 ..Fluid deflecting means at outlet
155 ..Nozzle or spout
156 ...With receptacle accommodating feature
157 WITH MEANS TO INCREASE HEAD AND SEAT CONTACT PRESSURE
158 .With positive reduction
159 ..Seat pressed to valve
160 ..Rotary valve
161 ...Independent actuation
162 ...Cam or wedge
163 ....Encased
164 ...Screw
165 ....Non-reciprocating
166 .....With slip coupling
167 ..Bifaced
168 ...Screw
169 ...Toggle
170 .Seat pressed to valve
171 ..Packing pressed by gland
172 ..Fluid pressure
173 ...Butterfly valve
174 ..Spring
175 .Fluid pressure
176 .Spring
177 ..Pivoted valve
178 ...Bifaced
179 ...Terminal
180 ..Rotary valve
181 ...Plug
182 ....Expanding
183 ....Encased
184 .....At actuator end
185 ...Spring in fluid
186 ..Piston
187 .Separate actuators or actuator motion
188 ..Rotary valve
189 ..Piston with expansible packing
190 .Piston
191 ..Packing expands with closing
192 .Rotary valve
193 .Gate valve
194 ..Screw sole actuator of expander and valve
195 ..Bifaced
196 ...In both closed and open positions
197 ...Faces pressed by subsequently movable expander
198 ....With second expander
199 ....Face element directly contacts casing
200 ...Carried expander contacts valve casing
201 ....Pivoting expander
202 ...Faces or carrier contact stationary expander

WITH MEANS TO INCREASE HEAD AND SEAT CONTACT PRESSURE
.Gate valve
203 ..Cam or wedge
204 ...Moves with respect to head and seat
205 WITH SELECTIVE FLOW REGULATION
206 .Different sized bores in valve head
207 ..Rotary plug
208 .Rotary
209 ..Plug
210 SEQUENTIAL OPENING OR CLOSING OF SERIAL PORTS IN SINGLE FLOW LINE (E.G., ANTI-SCORING)
211 SERIAL ALTERNATELY CLOSED PORTS
212 RELATIVELY MOVABLE VALVE ELEMENTS FORM SINGLE PORT CLOSURE (E.G., IRIS DIAPHRAGM)
213 MECHANICAL MOVEMENT ACTUATOR
214 .Particularly packed or sealed
215 .Plural motions of valve
216 ..Screw threads in flow path
217 ..Valve head between actuator and screw
218 ..Encased
219 ...Threadlessly coupled to screw
220 ....Coupling socket in screw
221 ...Threads in removable sleeve
222 ....Sleeve removably in bonnet
223 ....Sleeve is bonnet
224 ....Sleeve flange mounted between body and bonnet
225 ..Threads in removable sleeve
226 ..Biased
227 ...Spring
228 .With pivoted valves
229 .Plural dissimilar mechanical movements
230 .Ratchet
231 .Lever
232 ..Train (plural serial)
233 ..Leverage variable during operation
234 ..Adjustable leverage
235 ..Swiveled
236 ..Biased
237 ...Sliding contact
238 ....Spring
239 ......Spring co-axial with valve arm
240 ......Spring stop on valve stem
241 ......Spring abuts valve stem guide
242 ...Spring
243 ....Co-acts with lever
244 ....Co-axial with valve stem
245 .....Spring stop on valve stem
246 .....Spring abuts valve stem guide
247 ...Weight
248 .Gear
249 ..Mutilated or Geneva gearing
249.5 ..Worm type
250 ..Rectilinear rack
250.5 ..Mating segments
251 .Cam
252 ..Co-axial or parallel axes
253 ...Biased
254 ....Bi-directional
255 .....Non-reciprocating
256 ....Encased
257 ..Encased with seal
258 ...Bi-directional
259 ...Cam is finger-like extension
260 ...Overhung crank type
261 ...Center crank type
262 ..Biased
263 ...Spring
264 .Screw
265 ..Plural thread
266 ..Non-reciprocating actuator
267 ...Internal thread
268 ....Inverted cup-shape
269 .....Separable actuator bushing
270 ...Removable guide
271 ....Resiliently mounted actuator
272 ...Biased
273 ..Internal thread
274 ..Encased
275 ...Biased
276 ....Spring
277 ..Biased
278 ...Spring
279 .Linkage
280 ..Toggle
281 BALANCED VALVES
282 .Reciprocating
283 .Rotary
284 LIMIT STOP
285 .Adjustable
286 .Rotary valve
287 ..Stop element on head
288 ..Stop element on actuator
289 VALVE ACTUABLE FROM PLURAL POSITIONS
290 PLURAL SELECTIVE NEUTRAL POSITIONS FOR VALVE OR ACTUATOR
291 DETACHABLE ACTUATOR
292 .Rotary valve
293 EXTENSION FOR ACTUATOR
294 FLEXIBLE ACTUATOR (E.G., BOWDEN WIRE; CHAIN)
295 PEDAL ACTUATOR
296 PLURAL MOTIONS OF ACTUATOR
297 WITH FRICTION DETENT
298 PIVOTED VALVES
299 .Terminal
300 ..Gate
301 .Gate
302 ..Bifaced
303 .Biased
304 ROTARY VALVES
305 .Butterfly
306 ..Head and/or seat packing
307 ...Adjustable
308 ..Head and stem connections
309 .Plug
310 ..Axial and radial bore
311 ...Lateral inlet and outlet
312 ..Retainer at actuator end
313 .Biased
314 .Seats and/or interface seals
315 ..Spherical head
316 ..Replaceable
317 ...Deformable material
318 RECIPROCATING VALVE
319 .Push or pull operator
320 ..Biased
321 ...Spring
322 ....Spring stop on valve stem
323 ....Spring abuts valve stem guide
324 .Piston
325 ..With internal flow passage
326 .Gate
327 ..Bifaced
328 ..Seats
329 ..Bodies
330 .Actuator controlled stem seal
331 .Diaphragm
332 .Diverse material seal at valve interface
333 .Particular head and seat cooperation
334 ..Elastic deformation
335.1 HERMETIC FLEXIBLE WALL SEAL FOR ACTUATOR
335.2 .Diaphragm
335.3 .Bellows
336 BIASED VALVE
337 .Springs and spring retainers
338 .Weight biased
339 VALVE ACTUATOR EXTENDING THROUGH FLUID INLET OR OUTLET
340 VALVE ACTUATOR SURROUNDING PIPE, INLET OR OUTLET

341	VALVE ACTUATOR IS VALVE CASING OR EXTENSION THEREOF
342	.Jointed or flexible wall
343	.Sleeve valve
344	..Flow passage in sleeve
345	..Rotary
346	.Plural motions of valve
347	.Reciprocating valve
348	.Biased valve
349	VALVE ACTUATOR IS INLET OR OUTLET
350	.Detachable tip
351	.Plural motions of valve
352	.Rotary
353	.Reciprocating spout
354	.Biased valve
355	WITH ACTUATION LUBRICATING MEANS
356	VALVE
357	.Removable seat engaging element
358	.Reinforced flexible material
359	.Seats
360	..Removable
361	...Mounted between casing sections
362	...Compression or tension retained
363	...With seal
364	..Head engaging gasket
365	..Retained by seat deformation
366	.Bodies
367	..Sectional
368	.Materials
369	MISCELLANEOUS
	###############################
	CROSS-REFERENCE ART COLLECTIONS
	###############################
900	VALVES WITH O-RINGS
901	CURTAIN TYPE VALVES
902	SPRINGS EMPLOYED AS VALVES
903	NEEDLE VALVES
904	SNAP FIT PLUG VALVES

1	MISCELLANEOUS
2	FIRE-EXTINGUISHING
3	.Foam or gas phase containing
4	.Gas generative, chemically
5	..Dry, combustion type
6	..Low temperature chemically interreactive
6.5	...Foam-stabilizant or colloid-stabilizant containing
7	..Carbonates or ammonium salts containing or pyrolytic
8	.Volatile or gas charged liquids containing
8.05	.Foam-stabilizant or colloid-stabilizant containing
601	FIRE RETARDING
602	.Having disparate function
603	.For living matter
604	.Material physically quantified
605	.Containing gas
606	.Intumescent
607	.For wood or cellulosic material other than textile
608	.For textile
609	.For solid synthetic polymer and reactants thereof
610	.Dispersion or colloidal system
611	..For dispersion or collodial system
8.3	PREVENTING CONTAMINANT DEPOSITS IN PETROLEUM OIL CONDUITS
8.51	EARTH BORING
8.511	.Emulsions
8.512	.Materials for controlling lost circulation
8.513	.Aqueous or gaseous fluids, containing organic components, other than emulsions, functioning other than to control lost circulation
8.514	.Aqueous or gaseous fluids containing organic and inorganic components
8.515	.Nonaqueous liquid (e.g., oil base drilling fluids)
8.516	.Materials for controlling lost circulation
8.551	WELL TREATING
8.552	.Well cleaning (including removal or prevention)
8.553	.Acidizing or formation destroying by chemical reaction
8.554	.Water flooding or treatment of the formation with surfactant
8.555	.Anticorrosion
8.57	LEATHER OR FUR TREATING
8.6	TEXTILE TREATING
8.7	.Organic sulphoxy compound containing
8.75	..Organic amine or amide containing
8.8	.Organic amine or amide containing
8.9	.Ether group containing
9	LUBRICANTS OR SEPARATANTS FOR MOVING SOLID SURFACES AND MISCELLANEOUS MINERAL OIL COMPOSITIONS
10	.Packages or heterogeneous arrangements
11	.Lubricating and foreign functions
12	.Rigid lubricants and bearings containing fluent lubricants
12.2	..Impregnated
12.4	..With fibrous components
12.6	...Organic fibrous components
13	.With fibrous carriers
14	..Organic carrier components
15	.Gas charged
16	.Solid-phase non-soap-forming inorganic or non-low-fusing components
17	..Soaps, organic-acid salts or soap-forming components containing
18	...Inorganic compounds or elements containing (except water)
19	....Free solid-phase metal containing
20	....Carbon, silica, or silicates and solid S, Se, or Te containing
21	....Carbon, silica, or silicates containing
22	.....Graphite or carbon containing
23	......With other inorganic components (except water)
24	....Solid-phase S, Se, or Te containing
25	..Inorganic compounds or elements containing (except water)
26	...Free solid-phase metal containing
27	...Carbon, silica, or silicates and solids S, Se, or TC containing
28	...Carbon, silica, or silicates containing
29	....Graphite or carbon containing
30	.....With other inorganic components (except water)
31	...Solid-phase S, Se, or Te containing
32	.Soaps, or organic-acid salts containing
32.5	..Phosphorus-containing - organic-acid salts containing
32.7 R	...S, Se, or Te containing
32.7 E	.....Phosphosulfurized alcohols, phenols, thio-alcohols and thiophenols
32.7 HC	.....Phosphosulfurized hydrocarbons
33	..Sulpho-organic-acid salts containing
33.2	...With salts or other organic acids
33.3	....With rubber, solid terpenes or derivatives or other non-hydrocarbons
33.4	...With rubber, solid terpenes or derivatives or other non-hydrocarbons
33.6	..Salts of organic-acids of other than C, H, and O containing
34	..Ammonia or nitrogen-base organic-acid salts containing
34.7	...With rubber, solid terpenes or derivatives or other non-hydrocarbons
35	..Aluminum or heavy-metal organic-acid salts containing
36	...With alkaline-earth or alkali-metal organic-acid salts
37	...With rubber, solid terpenes or derivatives or other non-hydrocarbons
37.2	....Inorganic components, rubber or compounds of other than C, H, and O
37.5	....Aromatic- or carbocyclic-acid salts containing
37.7	...Aromatic- or carbocyclic-acid salts containing
38	..Alkaline-earth or alkali-metal organic-acid salts containing
39	...Alkaline-earth metal organic-acid salts containing
40	....With alkali-metal organic-acid salts
40.5	....With rubber, solid terpenes or derivatives or other non-hydrocarbons
40.7	.....Inorganic components, rubber, or compounds of other than C, H, and O
41	...Alkali-metal organic-acid salts containing
42	....With rubber, solid terpenes or derivatives or other non-hydrocarbons
42.1	.....Inorganic components, rubber or compounds of other than C, H, and O
42.4	..With rubber, solid terpenes or derivatives or other non-hydrocarbons

	LUBRICANTS OR SEPARATANTS FOR MOVING SOLID SURFACES AND MISCELLANEOUS MINERAL OIL COMPOSITIONS
42.7	.Metal or base, linked by O, S, Se, or Te to carbon of organic radical compounds containing
43	.Rubber, solid terpenes or derivatives containing
45	.S, Se, or Te, organic compounds or solutions containing
46.3	..Inorganic components or elements (except S) or compounds of other than C, H, O, S, N, and halogen containing
46.4	...Metals or matal compounds containing
46.6	...Phosphorus or phosphorus compounds containing
46.7	....Se, Te, N, Halogen or other than C, H, O, S, and P containing
47	..Nitrogen compounds containing
47.5	...Oxygen, halogen or other than C, H, S, and N compounds containing
48.2	..Oxygen compounds containing
48.4	...Halogen or other than C, H, S, and O compounds containing
48.6	...Carboxyl compounds containing
48.8	..Halogen compounds containing
49	.Aqueous or inorganic components
49.3	..Aqueous
49.5	...Emulsions or colloid dispersions containing
49.6	.Compounds of other than C, H, O, N, and halogen containing
49.7	..Metal containing
49.8	..Phosphorus containing
49.9	...Nitrogen, halogen or other than C, H, O, and P containing
50	.Nitrogen containing
51	..Oxygen halogen or other than C, H, and N containing
51.5 R	...Oxygen containing
51.5 A	.....Amine-carboxylic acid or anhydride reaction products or mixtures
52 R	.Oxygen containing
52 A	...Polyoxyalkylene compounds
54	..Halogen or other than C, H, and O containing
54.6	...Carboxyl containing
55	..Artificially oxidized hydrocarbons containing
56 R	..Carboxylic acids or esters containing
56 S	...."Synthetic" ester is lube base or is present in substantial amounts
56 D	....Maleic, succinic or fumaric acids, anhydrides or their esters
57	...Carbocyclic or non-aliphatic compounds containing
58	.Halogen containing
60	PHYSICAL SEPARATION AGENTS
61	.Froth-flotation or differential adherence
62	HEAT OR SOUND INSULATING
62.2	ELECTROLYTES FOR ELECTRICAL DEVICES (E.G., RECTIFIER, CONDENSER)
62.3 R	BARRIER LAYER DEVICE COMPOSITIONS
62.3 T	..Thermoelectric
62.3 Q	..Organic
62.3 E	..Free element containing
62.3 S	...Selenium or tellurium
62.3 GA	..Group III element containing binary compound, e.g., Ga, As
62.3 ZB	..Groups II and V elements containing binary compound, e.g., zinc, bismuth
62.3 ZT	..Groups II and VI elements containing binary compound, e.g., Zn, Te
62.3 V	..Group VI element-containing
62.3 BT	...Containing Group IV element and oxygen, e.g., barium, titanium III oxide
62.3 C	..Binary alloy or carbide, e.g., Al, In, LiC
62.51	MAGNETIC
62.52	.Flaw detection or magnetic clutch
62.53	.With wax, bitumen, resin or gum
62.54	..Synthetic resin
62.55	.Free metal or alloy containing
62.56	.Iron-oxygen compound containing
62.57	..With scandium, yttrium, gallium, rare earth or actinide
62.58	..With boron, aluminum, thallium or indium
62.59	..With titanium, zirconium, silicon, hafnium, germanium or tin
62.6	..With Group I metal
62.61	...Lithium
62.62	..With Group II metal or lead
62.63	...Calcium, barium, strontium or lead
62.64	...Magnesium
62.9	PIEZOELECTRIC
567	DEFINED LIQUID DIELECTRIC DISPERSED IN DEFINED WEB OR SHEET
570	FLUENT DIELECTRIC
571	.Gaseous or gas-containing
572	.Metal- or insoluble component-containing
573	.Si-containing
574	.B-, P-, S-, Se-, or Te-containing
575	.N-containing
576	..O in N compound
577	...Nitro or nitroso compound
578	.O-containing
579	..Carboxylic acid ester
580	..Halogen-containing
581	.Halogenated polycyclic compound-containing
67	VAPORIZATION, OR EXPANSION, REFRIGERATION OR HEAT OR ENERGY EXCHANGE
68	.With lubricants, or warning, stabilizing or anti-corrosion agents or persistent gases
69	.With low-volatile solvent or absorbent
70	FROST-PREVENTING, ICE-THAWING, THERMOSTATIC, THERMOPHORIC, OR CRYOGENIC
71	HEAT-EXCHANGE, LOW-FREEZING OR POUR POINT, OR HIGH BOILING COMPOSITIONS
72	.With leak-stopping agents
73	.Organic components
74	..Metal compounds or inorganic components (except water)
75	...Organic compounds of nonmetals other than C, H, and O
76	...Carboxylic organic compounds containing
77	..Organic compounds of nonmetals other than C, H, and O
78.1	...Organic compounds of nonmetals other than C, H, O and N
78.3	....Organic Si containing compounds
78.5	....Organic P containing compounds
79	..Carboxylic organic compounds containing
79.1	ETCHING OR BRIGHTENING COMPOSITIONS
79.2	.Inorganic acid containing
79.3	..Fluorine compound containing
79.4	..With organic material
79.5	.Alkali metal hydroxide containing
80	DESCALING AGENT CONTAINING
81	.Deoxidant or free-metal containing
82	.Plant or organic material containing
83	..Tannin, bark, or bark extract containing

DESCALING AGENT CONTAINING
.Plant or organic material containing
..Tannin, bark, or bark extract containing
84 ...With inorganic compound or element (except water)
85 ....Inorganic matter other than alkali-metal hydroxides and carbonates and water
86 ..With inorganic compound or element (except water)
87 ...Inorganic matter other than alkali-metal hydroxides and carbonates and water
88 SWEEPING OR DUST OR PARTICLE ADHERENT
89.1 DETERGENTS (FOR USE ON SOLID MATERIALS)
90 .Packages or heterogeneous arrangements
91 ..Impregnated or coated with detergents
92 ..Separate soap containing and non-soap zones
93 ...Wrapped or encased soaps
94 .With chemical bleachant, oxidant, or reductant
95 ..Oxidant containing
96 ...Soap (water-soluble fatty acid or rosin) containing
97 ....Water-soluble inorganic B, Si, or P compound containing
98 ....Ammonia, amine, or nitrogen base compound containing (except proteins)
99 ...Water-soluble inorganic B, Si or P compound containing
100 ...Acidic
101 ....Nitric acid or aqua regia containing
102 ...Ammonia, amine, or nitrogen base compound containing (except proteins)
103 ...Alkaline
104 ...Solvent (physical or chemical) containing
105 ..Reductant containing
106 .Antiseptic, insecticide, or biocide containing
107 ..Soap (water soluble fatty acid or rosin) containing
108 .Soap (water-soluble fatty acid or rosin) containing
109 ..Water-soluble inorganic B, Si, or P compound containing
110 ...Ammonia, amine, or nitrogen base compound containing (except proteins)
111 ....Physical non-water solvent containing
112 .....Water insoluble abradant, wax or filler containing
113 ....Water-insoluble abradant, wax or filler containing
114 ...Physical non-water solvent containing
115 ....Water-insoluble abradant, wax or filler containing
116 ...Water-insoluble abradant, wax or filler containing
117 ..Ammonia, amine, or nitrogen base compound containing (except proteins)
118 ...Physical non-water solvent containing
119 ....Water-insoluble abradant, wax or filler containing
120 ...Water-insoluble abradant, wax or filler containing
121 ..Organic sulpho-compound containing
122 ..Physical non-water solvent containing
123 ...Water-insoluble abradant, wax or filler containing
124 ....Organic and inorganic type
125 ....Organic type
126 ...Hydrocarbon or halohydrocarbon containing
127 ....Non-hydrocarbon non-soap organic compound containing
128 ..Water-insoluble abradant, wax or filler containing
129 ...Organic and inorganic type
130 ...Organic type
131 ...Inorganic type
132 ..With other organic, plant, or animal matter or compound
133 ..With inorganic compound or element (except alkali-metal hydroxides and carbonates and water)
134 ..Shapes or structures
135 .Water-soluble inorganic B, Si or P compound containing
136 ..Acidic
523 ..Nitrogen base containing (except protein)
524 ...Heterocyclic
525 ...Amine or amide
526 ....Sulfur or phosphorus containing
527 ....Soluble carboxylic acid or salt
528 ....Quaternary or amine oxide
529 ....Hydroxy
530 ..Organic sulfoxy
531 ...Organic sulfate
532 ....Oxy
533 ....With acyclic sulfonate
534 ....With aromatic sulfonate
535 ...Aliphatic sulfonate
536 ....Unsaturated
537 .....With aromatic sulfonate
538 ....Non-oxo carboxylic
539 ...Aromatic sulfonate
540 ....With non-ionic wetting agent or fatty alcohol
139 ..Physical non-water solvent containing
140 ..Water-insoluble abradant, wax or filler containing
141 .Water-soluble cyanides or cyanates containing
142 .Acidic
143 ..Physical non-water solvent containing
144 ...Water-insoluble abradant, wax or filler containing
145 ..Water-insoluble abradant, wax or filler containing
146 ..With corrosion inhibitants
147 ...Compounds of elements other than C, H, O, N, S, Cl, Na, and K containing
148 ...Organic nitrogen compound containing
149 ....Thio organic compound containing
150 .....Thiazole nucleus containing
151 ...Organic sulphur compound containing
541 .Nitrogen base containing (except protein)
542 ..Heterocyclic
543 ...Optical bleach
544 ..Amine or amide
545 ...Sulfur or phosphorus containing
546 ...Soluble carboxylic acid or salt
547 ...Quaternary or amine oxide
548 ...Hydroxy
153 ..Physical non-water solvent containing
154 ...Water-insoluble abradant, wax or filler containing
155 ..Water-insoluble abradant, wax or filler containing
156 .Alkaline
157 ..Gas-generative
158 ..Physical non-water solvent containing
159 ...Water-insoluble abradant, wax or filler containing
160 ..Water-insoluble abradant, wax or filler containing

DETERGENTS (FOR USE ON SOLID MATERIALS)
549 .Organic sulfoxy
550 ..Organic sulfate
551 ...Oxy
552 ...With acyclic sulfonate
553 ...With aromatic sulfonate
554 ..Aliphatic sulfonate
555 ...Unsaturated
556 ....With aromatic sulfonate
557 ...Non-oxo carboxylic
558 ..Aromatic sulfonate
559 ...With non-ionic wetting agent or fatty alcohol
162 .Physical or chemical non-water solvent containing
163 ..Abradant, wax, cellulose ester, inorganic solid or filler containing
164 ...With oxygen organic compounds
165 ....With organic compounds of other than C, H, and O
166 .....With hydrocarbon solvents
167 ....With hydrocarbon solvents
168 .....Wax or cellulose-ester and abradant, inorganic solid or other filling containing
169 .....Wax or cellulose-ester containing
170 ..Oxygen organic compound containing
171 ...Organic compounds of other than C, H, and O containing
172 ..Non-hydrocarbon substances containing
173 .Aqueous
174 .Shapes or structures
174.11 .Perfume containing
174.12 .Enzyme containing
174.13 .Coated or encapsulated particle or liquid containing (other than spray dried detergents)
174.14 .Alkali metal inorganic carbonate containing
174.15 .Organo-silicon compound containing
174.16 .Organo-phosphorus compound containing
174.17 .Carbohydrate moiety containing
174.18 ..Carboxyl group containing
174.19 .Nonpolymeric compound having at least two free carboxyl groups containing
174.21 .Polyoxyalkylene compound containing
174.22 ..Two or more polyoxyalkylene compounds containing
174.23 .Polymer containing
174.24 ..Carboxylic acid anhydride, free carboxyl group, or salt thereof containing
174.25 .Water-insoluble inorganic compound containing
175 WATER-SOFTENING OR PURIFYING OR SCALE-INHIBITING AGENTS
176 .Packages or heterogeneous arrangements
178 .Deoxidant or free-metal containing
179 .Water-insoluble base-exchange agent containing
180 .Plant or organic material containing
181 ..With inorganic matter other than alkali-metal hydroxides and carbonates and water
181.1 GETTERS OR GAS OR VAPOR GENERATING MATERIALS FOR ELECTRIC LAMPS, ELECTRIC SPACE DISCHARGE DEVICES AND SIMILAR DEVICES
181.2 .Plural getter and/or gas or vapor generating materials
181.3 .Reactive compositions
181.4 ..Containing magnesium, alkali-metal or alkaline-earth metal or compound thereof
181.5 .Gaseous getters
181.6 .Metal or metal compound containing
181.7 ..Magnesium, alkali-metal or alkaline-earth metal
194 HUMIDOSTATIC, WATER REMOVIVE, BINDIVE, OR EMISSIVE

478 X-RAY OR NEUTRON SHIELD
500 ELECTRICALLY CONDUCTIVE OR EMISSIVE COMPOSITIONS
501.1 .Light sensitive
502 .Elemental carbon containing
503 ..With free metal
504 ..With carbide
505 ..With radioactive material
506 ..With metal compound
507 ...Titanium or zirconium compound
508 ...Aluminum compound
509 ...Magnesium, alkaline earth metal or rare earth metal compound
510 ..With organic component
511 ...Resin, rubber or derivative thereof containing
512 .Free metal containing
513 ..Iron group metal (Iron, Cobalt, Nickel)
514 ..Noble metal (Gold, Silver, Ruthenium, Rhodium, Palladium, Osmium, Iridium, Platinum)
515 ..Tungsten
516 .Carbide containing
517 .Radioactive material containing
518 .Metal compound containing
519 ..Iron group compound
520 ..Titanium or zirconium compound
521 ..Magnesium, alkaline earth metal or rare earth metal compound
492 INCANDESCENT MANTLE COMPOSITIONS
299.01 LIQUID CRYSTAL COMPOSITIONS
299.1 .Containing pleochroic dye
299.2 .Containing dopant salt
299.3 .Containing charge-transfer agents
299.4 .Containing nonchiral aligning agents
299.5 .Containing nonchiral additive having no specified mesophase
299.6 .Containing nonsteryl liquid crystalline compound of specified structure
299.61 ..Including heterocyclic ring
299.62 ..Including fused or bridged rings
299.63 ..Including fully saturated ring
299.64 ..Aryl ester of aryl acid having three benzene rings
299.65 ...Benzene rings linked by direct bond
299.66 ..Benzene rings linked by direct bond
299.67 ..Phenyl benzoate derivative
299.68 ..Including benzene rings bonded through azo, azoxy, or azomethine linkage
299.7 .Cholesteric liquid crystal composition containing a sterol derivative
582 LIGHT TRANSMISSION MODIFYING COMPOSITIONS
583 .Modification caused by energy other than light
584 .Inorganic crystalline solid
585 .Producing polarized light
586 .Displaying color change
587 .Infrared

	LIGHT TRANSMISSION MODIFYING COMPOSITIONS
588	.Ultraviolet
589	..Organic material
625	RADIOACTIVE COMPOSITIONS
626	.Treating radioactively contaminated material
627	..Reprocessing nuclear fuels
628	..By fixation in stable solid media
629	...Media is glass or ceramic
630	..Treating gas
631	..Treating liquid material
632	...By incineration, calcination, or evaporation
633	..For disposal by storage in confined space
634	.In form of sol solution or gel
635	..Including production of solid particles by chemical reaction
636	.Nuclear reactor fuel
637	..Actinide having nonactinide component
638	...Oxide component
639	...Carbon containing component
640	...Free metal or metal compound component
641	..Actinide nitrides only
642	..Actinide carbides only
643	..Actinide oxides only
644	.As a source of radiation or heat
645	..For tracing, tagging, or testing
646	.Luminescent
647	..Laser
301.16	ORGANIC LUMINESCENT MATERIAL CONTAINING COMPOSITIONS
301.17	.Scintillating or lasing compositions
301.18	..Heavy metal containing
301.19	.Inspection penetrant compositions
301.21	.Optical brightening compositions
301.22	..Heterocyclic compounds having an intercyclic acyclic methine linkage
301.23	...Triazines
301.24	...Thiazoles or oxazoles
301.25	..Azine containing
301.26	..Six-membered ring having one hetero-N-atom
301.27	..Azole containing
301.28	...Thiazoles or oxazoles
301.29	...Tri- or -tetrazoles
301.31	..Five-membered ring having four carbon atoms and one nitrogen atom
301.32	..Hetero-S-atom or hetero-O-atom containing
301.33	.With inorganic luminescent material
301.34	.Natural resin, cellulose or derivatives containing
301.35	.Synthetic resin containing
301.36	INORGANIC LUMINESCENT COMPOSITIONS WITH ORGANIC NONLUMINESCENT MATERIAL
301.4 R	INORGANIC LUMINESCENT COMPOSITIONS
301.4 S	..Sulfur containing
301.4 P	..Phosphorus containing
301.4 F	..Group IV element containing
301.4 H	..Compositions containing halogen, e.g., halides and oxyhalides
301.5	.Tungsten containing
301.6 R	.Zinc or cadmium containing
301.6 S	...Sulfur containing
301.6 P	...Phosphorus containing
301.6 F	...Group IV element containing
700	CHEMILUMINESCENT
182.1	HAVING UTILITY AS A REACTIVE MATERIAL IN AN ELECTROCHEMICAL CELL, E.G., BATTERY, ETC.
184	ABSORPTIVE, OR BINDIVE, AND CHEMICALLY YIELDIVE
185	PLUMBIFEROUS SULPHUR BINDANT OR MODIFIANT CONTAINING
186.1	OXIDATIVE BLEACHANT, OXIDANT CONTAINING OR GENERATIVE
186.2	.Composition containing two or more solid materials with defined physical dimensions, e.g., surface areas, volumes, etc., or process of producing said composition
186.21	.Plural oxidants
186.22	..Contains plural peroxides
186.23	...Organic peroxide
186.24	.Contains elemental material devoid of water
186.25	.Composition containing a stabilizer or a product in the form of a surface-modified, impregnated, encapsulated, or surface-coated article; or process of producing said composition
186.26	..Organic peroxide
186.27	..Inorganic peroxide
186.28	...Contains hydrogen peroxide
186.29	....With organic material
186.3	...Contains perborate
186.31	....With organic material
186.32	...Contains Group IA metal peroxide
186.33	..Contains Group VIIB or Group VIII metal or compound thereof
186.34	..Contains organohalogen compound as oxidant
186.35	...Chloroisocyanurate
186.36	..Contains free halogen or oxy-halogen acid type
186.37	...Contains alkaline earth metal
186.38	.Contains activator admixed with inorganic peroxide
186.39	..Contains heterocyclic compound
186.4	...Oxygen heterocycle
186.41	..Hydrogen peroxide
186.42	.Contains organic peroxide
186.43	.Contains inorganic peroxide
186.44	.Contains inorganic nitrogen containing compound
187.1	.Free halogen or oxy-halogen acid type
187.2	..Oxidant contains halogen other than chlorine
187.21	..Chlorine dioxide or monoxide
187.22	...With elemental chlorine
187.23	..Chlorite
187.24	...Hypochlorite
187.25	....Alkali metal hypochlorite
187.26	.....Sodium
187.27	....Alkaline earth metal hypochlorite
187.28	.....Calcium
187.29	......With alkali metal compound
187.3	......With alkaline earth metal compound
187.31	..Chlorate or perchlorate
187.32	..Hypochlorous acid
187.33	..Oxidant contains N-Cl bond
187.34	...Chloroisocyanurate
188.1	REDUCTIVE BLEACHANT, DEOXIDANT, REDUCTANT, OR GENERATIVE
188.2	.Sulfur containing reductant, bleachant, deoxidant, or generative
188.21	..Sulfite
188.22	...Hydrosulfite (dithionite)
188.23	....With organic additive
188.24	.....Contains nitrogen
188.25	.Hydrogen generating
188.26	.Hydride containing
188.27	..Contains Al-H bond
188.28	.Deoxidant or oxygen scavenging
189	CO, S, NEGATIVE ELEMENT, OR ACID, BINDANT CONTAINING
190	.With absorbents
191	.Basis-iron containing
192	.Alkali-metal or alkali-metal compound containing

193 AMMONIA, ALKALI OR BASE, BINDANT CONTAINING
302 COLLOIDS AND POTENTIAL COLLOIDS; CHEMICAL PROCESSES OF MAKING AND BREAKING: APPARATUS RELATED THERETO
303 .Including separations or comminutions by colloid functions
304 .Colloid (polyphase discontinuous dispersion) systems
305 ..Smokes, fogs, or gaseous primary dispersants
306 ..Liquid primary dispersants
307 ...Foams or gaseous primary dispersands
308 ...Organic major dispersants only
309 ....Inorganic major dispersands only
310 ...Water as major dispersant only
311 ....Organic major dispersands only
311.5 .....Bituminous dispersands
312 .....Oil or liquid dispersands
313.1 ....Inorganic major dispersands only
313.2 .....Silica
314 ...Dispersive or manipulative operations
315.01 .Gels, coagulates or dispersands
315.1 ..Organic
315.2 ...Inorganic material coated, impregnated or surface-modified with organic material
315.3 ...Carbohydrate or derivative
315.4 ...Carboxylic acid ester, acid or salt thereof
315.5 ..Metal silicate or clay
315.6 ..Silica
315.7 ..Alumina
318 .Potential dispersants, or dispersands with colloidization inhibitants
319 .Resolving colloids or inhibiting colloidization
320 ..Liquid primary dispersants
321 ...Foams or gaseous primary dispersands
322 ...Adsorbent or solid surface functioning treating substances
323 ....Organic and inorganic agents (except water)
324 ....Inorganic agents (except water)
325 ....Organic agents
326 ...Added nongaseous dissimilar treating substances
327 ....Added dissimilar solvents, bindants or liquid baths
328 ....Resolving aqueous-petroleum or aqueous-hydrocarbon systems
329 .....Organic and inorganic agents (except water)
330 .....Inorganic agents (except water)
331 .....Organic agents
332 ......Organic sulphoxy compound containing
333 ....Petroleum-sulphoxy compound containing
334 ....Organic amine, amide or N-base containing
335 ....Protein or carboxylic compound containing
336 ....Organic amine, amide or N-base containing
337 ....Carbocyclic or non-aliphatic sulphoxy or carboxylic compound containing
338 ....Organic amine, amide or N-base containing
339 ....With non-sulphoxy non-carboxylic non-amine compounds
340 ......Protein or carboxylic compound containing
341 ....Organic amine, amide or N-base containing
342 ....Carbocyclic or non-aliphatic carboxylic compound containing
343 ....With non-carboxylic non-amine compounds
344 ......Organic amine, amide or N-base containing
345 ......With elements other than C, H, and O
346 ...Vaporizing, heating or cooling
347 ....With mechanical treatment
348 ....With added component
349 ...Mechanically
350 .Gas-generating agent containing
351 .Wetting, emulsifying, dispersing or stabilizing agents
352 ..Organic and inorganic agents containing (except water)
353 ..Organic sulphoxy compound containing
354 ...Protein or carboxylic compound containing
355 ...Organic amine, amide or N-base containing
356 ..Protein or carboxylic compound containing
357 ..Organic amine, amide, or N-base containing
358 .Emulsification or liquid dispersant colloidization-inhibiting, emulsion-breaking or liquid dispersant colloids resolving agents
363.5 SOLIDS WITH SOLUTION OR DISPERSION AIDS
364 SOLVENTS
365 ANTI-INGESTIBLE OR DENATURED
366 .Alcohol type
367 SOAPS (ALKALI-METAL SALTS OF WATER-INSOLUBLE FATTY OR ROSIN ACIDS)
368 .Products
369 .Including saponification
370 ..With subsequent operations
372 GASEOUS COMPOSITIONS
373 .Carbon-oxide and hydrogen containing
374 .Nitrogen and hydrogen containing
375 ..Nitrogen from air or elementary nitrogen only and hydrogen from compounds
376 ...Hydrogen from hydrocarbons
377 ..From elementary nitrogen and hydrogen only or purification
378 R EXFOLIATED OR INTUMESCED
378 P ..Perlite
380 PRESERVATIVE AGENTS
381 .Anti-caking, separative or protective coatings or zones
382 ..Foams, liquids or fluids
383 ..Organic and inorganic matter containing
384 ..Organic compound containing
385 ..Inorganic compound or element containing
387 .Anti-corrosion
388 ..Organic compound containing
389.1 ...Component inorganic or organic comprising element other than C,H,O,N,S and halogen
389.2 ....Phosphorus containing
389.21 .....Nitrogen and/or sulfur in phosphorus compound
389.22 ......Pentavalent P except Hn + 2 Pn O(3)n + 1
389.23 .....Pentavalent P except Hn + 2PnO(3)n + 1
389.24 .....Trivalent P (e.g., phosphorus acid, phosphites, etc.)
389.3 ....Silicon containing
389.31 .....Organo silicon
389.32 .....Nitrogen containing (e.g., amino, etc.)
389.4 ....Boron containing
389.41 .....Organo boron
389.5 ....Chromium containing

	PRESERVATIVE AGENTS
	.Anti-corrosion
	..Organic compound containing
	...Component inorganic or organic comprising element other than C,H,O,N,S and halogen
389.51	....Lead containing
389.52	....Zinc or aluminium containing
389.53	....Nickel, iron, cobalt, copper, manganese, mercury or cadmium containing
389.54	....Molybdenum, arsenic, antimony, vanadium, bismuth, tungsten, selenium or tellurium containing
389.61	....Group II A metal containing
389.62	....Alkali metal or NH(4)+ containing
390	...Amine, amide, azo or nitrogen-base radical containing
391	....Sulphur organic compound containing
392	....Oxygen organic compound containing
393	...Phenol or quinone radical containing
394	...Nitrogen organic compound containing
395	...Sulphur organic compound containing
396	...Oxygen organic compound containing
397	.Anti-oxidants or chemical change inhibitants
398	..Plant or animal matters of unknown compositions
399	..Organic compound containing
400.1	...Component inorganic or organic comprising element other than C,H,O,N,S and halogen
400.2	....Phosphorus containing
400.21	.....Nitrogen or sulfur in phosphorus compound
400.22	......Pentavalent P, but not fully oxygenated
400.23	.....Pentavalent P, but not fully oxygenated
400.24	.....Trivalent P (e.g., phosphorous acid, phosphites, etc.)
400.3	....Silicon containing
400.31	.....Organo silicon
400.4	....Boron containing
400.41	.....Organo boron
400.5	....Chromium containing
400.51	....Lead containing
400.52	....Zinc or aluminium containing
400.53	....Nickel, iron, cobalt, copper, manganese, mercury or cadmium containing
400.54	....Molybdenum, arsenic, antimony, vanadium, bismuth, tungsten, selenium or tellurium containing
400.61	...Group II A metal containing
400.62	....Alkali metal or NH(4)+ containing
401	...Amine, amide, azo or nitrogen-base radical containing
402	....Sulphur organic compound containing
403	....Oxygen organic compound containing
404	...Phenol or quinone radical containing
405	...Nitrogen organic compound containing
406	...Sulphur organic compound containing
407	...Oxygen organic compound containing
408.1	NON-REACTIVE ANALYTICAL, TESTING INDICATING COMPOSITIONS
600	RADIATION SENSITIVE
182.11	COMPOSTIONS CONTAINING A SINGLE CHEMICAL REACTANT OR PLURAL NONINTERACTIVE CHEMICAL REACTANTS, I.E., NOT VIS-A-VIS
182.12	.Organic reactant
182.13	..For subsequent solid polymer treatment or preparation, e.g., crosslinking, grafting, curing, hardening, vulcanizing, etc.
182.14	...Reactant contains element other than C, H, O, or N
182.15	....Halogen
182.16	.....Bromine or iodine
182.17	....Sulfur
182.18	...Reactant contains ethylenic group
182.19	....Cyclic anhydride moiety
182.2	...Reactant contains isocyante (-N=C=O) or blocked isocyanate group
182.21	....Two or more reactants containing isocyanate or blocked isocyanate groups
182.22	.....Urethane (-N-C(=O)-O-C-) group
182.23	...Reactant contains oxygen
182.24	....Reactant contains plural hydroxyl groups
182.25	.....Three or more reactants containing plural hydroxyl groups
182.26	.....Reactant contains nitrogen
182.27	.....Reactant contains ether linkage
182.28	....Reactant contains carboxylic acid group or derivative thereof
182.29	..With stabilizer or inhibitor
182.3	..Reactant contains phosphorus, silicon, or sulfur atom, or contains metal-to-carbon bond
182.31	..Reactant contains phenolic, phenolic ether or inorganic phenolate group
182.32	.Inorganic reactant other than sulfur containing
182.33	..Reactant contains heavy metal
182.34	..Reactant contains nitrogen
182.35	..Reactant contains aluminum or phosphorus
183.11	CHEMICALLY INTERACTIVE REACTANTS (VIS-A-VIS)
183.12	.With stabilizer or inhibitor
183.13	.Organic reactant admixed with inorganic reactant
183.14	.Inorganic reactants only
183.15	..Calcium carbide precursors
183.16	..Contains carbonate or bicarbonate

10.5	METALLIC SPRING STRETCHER AND/OR COMPRESSOR (E.G., LEAF, HELICAL, OR COIL SPRINGS)
11	FLOOR JACK TYPE
12	.Rack and pinion or segment
13	.Screw
14	.Step-by-step traveling member
15	.Single-throw lever and bar
16	..Sliding bar
17	.Single throw lever
18	NAIL EXTRACTOR TYPE
19	.Hammer and anvil
20	.Screw
21	.Single throw lever
22	..Lever and pivoted jaw grip
23	..Multiple jaw grip
24	...Cam or wedge actuated
25	..Claw bar
26 R	...Hammer
26 E	.....Extensible fulcrum
27	...Pivoted fulcrum member
28	STAPLE PULLER
28.5	THILL-COUPLING JACK
29 R	PIPE OR ROD JACK
29 A	..Tie rod tensioner
30	.Lifter
31	..Reciprocating clutch
32	AXLE-LUBRICATING JACK
33	CAR JOURNAL BOX LIFTING
34	.Suspended lifter
35	CAR-PUSHER TYPE
36	.Pinch bar
37	..Rail clamping
38	..Pivoted wheel engaging member
39	DOOR BRACE
40	PRINTER'S QUOINS
41	.Screw
42	.Wedge
43	RAIL OR TIE SHAFTER
44	.Single throw lever
45	VEHICLE-BODY LIFTERS
46	.Lever and drum
47	.Cable hoist
48	..Vehicle attached drum
49	.Swinging side bars
50	..Single fixed pivot
50.1	RESILIENT TIRE-CASING SPREADERS
50.2	.Spreader and tire casing relatively movable or rotatably mounted
50.3	.Fluid pressure operated
50.4	.With tire casing support
134.3 R	METHOD OR APPARATUS FOR PLACEMENT OF CONDUCTIVE WIRE
134.3 PA	..Utility pole guide
134.3 CL	..Cable lashing
134.3 FT	..Conduit snakes
134.3 SC	..Submarine cable
134.4	.By fluid pressure differential in conduit (e.g., parachute sucked through conduit)
134.5	.Tractor for pulling wire (e.g., battery-powered)
134.6	..Step-by-step type (e.g., by camming against messenger)
134.7	.Sectional members for fishing
199	PORTABLE IMPLEMENTS OR APPARATUS FOR TENSIONING FLEXIBLE MATERIAL OR FOR EXTRACTING STUMPS OR POLES
200	.Material comprises resilient floor covering (e.g., carpet)
201	..Including fluid or spring driven cylinder
202	..Including force transmitting cable and driven, rotatable, cable engaging drum
203	..Including driven, rotatable, floor covering engaging and pulling drum
204	..Including screw drive
205	..Including rack and pinion, or pinion segment, drive
206	..Including ratchet bar and driving pawl drive
207	...Having plural, disparate, driving pawls
208	..Including rotatable, pulley wheel element and cable
209	..Including force transmitting, hand held and operated, lever
210	...With means attached thereto for sequentially, gripping, shifting, and releasing bar component
211	...With floor covering clamping means attached to lever
212	...Having linearly shifting, guided component attached thereto
213	.Including rotatably driven drum for engaging either material or force transmitting cable
214	..Plural drums or drum with plural distinct sections
215	...Juxtaposed to material or cable at single locus
216	..Having pressure element spaced therefrom to confine material or cable thereagainst
217	..Having ratchet wheel and interengaging pawl for driving drum
218	...Pawl pivots about fixed point on drive handle
219	..Having intermeshing gears for driving drum
220	...Worm and worm wheel
221	..With projections or apertures on drum for engagement with complementary formations on material or cable
222	..With means for preventing or retarding rotation in at least one direction
223	...Ratchet wheel or formation and pawl
224	..With adjustable gripping device for attaching drum to rigid, in situ structure
225	..With material or cable contacting infeed guide
226	...Rotatable pulley wheel element
227	..With ground-engaging support means

PORTABLE IMPLEMENTS OR APPARATUS FOR TENSIONING FLEXIBLE MATERIAL OR FOR EXTRACTING STUMPS OR POLES
228 .Including expansible chamber fluid motor drive
229 .Including worm and worm wheel gear drive
230 .Includng rack and pinion, or pinion segment, drive
231 .Including screw drive
232 ..Plural screws
233 ...Having plural, oppositely shifting, threaded riders
234 ..Having plural, oppositely shifting, threaded riders
235 ..Having ratchet wheel and pawl for driving screw
236 ..Having intermeshing gears for driving screw
237 .Including ratchet bar and driving pawl drive
238 ..Having plural, disparate, driving pawls
239 ...Plural ratchet formations
240 ....Facing opposite directions
241 .Including intermeshing gear drive
242 .Including rotatable, pulley wheel element and cable
243 .Including either force transmitting, hand held and operated lever or animal powered sweep
244 ..Implement or apparatus includes bar component having plural holes and removable cooperating pins selectively engagable by lever
245 ..With means attached thereto for sequentially gripping, shifting, and releasing bar component
246 ..Having linearly shifting, guided component attached thereto
247 ...With ratchet formation and locking pawl for maintaining relative positioning
248 ..With additional, hand held lever pivotally attached thereto for applying pulling force in opposite direction
249 ...Having position locking means between levers
250 ..With camming means thereon, and pressure element spaced therefrom to confine material, or force transmitting cable, thereagainst
251 ..With material, article, or force transmitting cable clamping means attached to and shifting with lever
252 ...Including cooperating, relatively stationary means for intermittently locking material or cable
253 ...Plural clamping means
254 ....Alternately clamping and pulling on material or cable
255 ....Attached by flexible connector
256 ..With material, article, or force transmitting cable engaging means movably attached to and shifting with lever
257 ...Including cooperating, relatively stationary means for intermittently locking material or cable
258 ...Plural, movably attached engaging means
259 ....Alternately engaging and pulling on material or cable
260 ....Attached by flexible connector
261 ..With means pivotally connected to lever and adapted to engage rigid, in situ structure
262 .Including adjustable gripping device for attaching implement or apparatus to rigid, in situ structure
263 .Including ground engaging means for supporting implement or apparatus in plural, vertically spaced positions
84 TRAVERSING JACK
85 .Screw
418 VEHICLE ATTACHED JACK
419 .Semi-trailer landing gear
420 .Attached to trailer tongue
421 .Turntable
422 .Rocking lever
423 .Hydraulic or pneumatic
424 .Screw actuated
425 ..Gear driven
426 .Cable actuated
427 .Rack and pinion
264 APPARATUS FOR HAULING OR HOISTING LOAD, INCLUDING DRIVEN DEVICE WHICH CONTACTS AND PULLS ON CABLE
265 .Device includes driven, flexible, cable contacting belt
266 .Device includes rotatably driven, cable contacting drum
267 ..Having rotational speed governor for generating control impulse to rotation retarding means or drive
268 ..Having mechanism, actuated by changes in position of drum relative to another component of device, for generating control impulse to rotation retarding means or drive
269 ..Having stationary mechanism, actuated by load or other obstruction on and traveling with cable, for generating control impulse to rotation retarding means or drive
270 ..Having cable contacted, supported, or attached mechanism for generating control impulse to retarding means or drive
271 ...With cable contacting component, on or adjacent to circumference of drum, shifted by segment of wound cable
272 ...With cable deflecting or path defining component shifted by cable when tension varies
273 ....Electricity or fluid utilized in transmittal of impulse
274 ..Having mechanism, linked to drum or rotating element of drive, for generating control impulse to rotation retarding means or motor when torque on drum varies
275 ...Electricity utilized in transmittal or impulse
276 ..Having mechanism, linked to drum and actuated by number of drum rotations, for generating control impulse to rotation retarding means or drive
277 ..With fluid or resilient shock absorbing or tension maintaining means attached to, supported by, or supporting guiding structure for cable
278 ..Plural drums or drum with plural distinct sections
279 ...With vehicle for supporting at least one drum

APPARATUS FOR HAULING OR HOISTING LOAD, INCLUDING DRIVEN DEVICE WHICH CONTACTS AND PULLS ON CABLE
.Device includes rotatably driven, cable contacting drum
..Plural drums or drum with plural distinct sections
...With vehicle for supporting at least one drum
280 ....Having rotatable, cable guiding, pulley wheel element spaced from drums
281 .....Element repositionable relative to at least one of the drums
282 ....Drive for at least one drum includes motor of vehicle
283 ...Having rotatable, cable guiding, pulley wheel element spaced from drums
284 ....Element repositionable relative to at least one of the drums
285 .....Plural elements
286 ....Plural elements
287 ...Juxtaposed to cable at single locus
288 ...With means affixing at least one drum to supporting base and allowing movement between drum and base
289 ....Movement engages or disengages drum from drive
290 ...Plural, distinct, drive motors
291 ....Noncompressible fluid
292 ....Electric
293 ...Each drum having plural, distinct drive sources or discrete drive trains
294 ...Having common drive source or mechanically interlinked drive trains
295 ....Including intermeshing gears in drive
296 .....Worm and worm wheel
297 .....Epicyclic gear train having sun, intermediate (e.g., planet), and ring gears
298 .....Shiftable into and out of intermeshing engagement
299 .....Also including clutch mechanism having coaxial, rotatable, relatively shiftable axially, power transmitting components
300 ......With frictional brake assembly mechanically linked to, and operationally influenced by, clutch
301 ......With additional axially shiftable clutch mechanism mechanically linked to, and operationally influenced by, first clutch
302 ....Alternately transmitting power
303 ......Fluid operated actuator shifts component
304 ......Components having frictional contact surface
305 ....Truncated cone shaped
306 .....Also including ratchet wheel and driving pawl
307 ......Plural driving pawls
308 ....Attached to rotatable disk or shaft
309 .....Also including clutch mechanism having rotatable, radially shiftable, power transmitting component
310 .....With means for preventing or retarding rotation of one or more drums in at least one direction
311 ....Including sprocket wheel and chain in drive
312 ....Including power transmitting pulley and rope or belt either in drive or in cable return means
313 ....Including contacting friction wheels having noncollinear axes of rotation in drive
314 ....Including expansible, noncombustible, fluid motor in drive (e.g., air, steam)
315 ....Including noncompressible fluid motor or pump in drive
316 ....Including electric motor in drive
317 ....Including clutch mechanism in drive having coaxial, rotatable, relatively shiftable axially, power transmitting components
318 .....With frictional brake assembly mechanically linked to, and operationally influenced by, clutch
319 .....Components having frictional contact surface
320 ....Including ratchet wheel and interengaging driving pawl in drive
321 ....Including means for preventing or retarding rotation of one or more drums in at least one direction
322 .....Frictional brake assembly having rotating, wheel structure and shiftable shoe or band
323 ..With vehicle for supporting drum
324 ...Having arch-shaped body for straddling load
325 ...Having rotatable, cable guiding, pulley wheel element spaced from drum
326 ....Element repositionable relative to drum
327 ....Plural elements
328 ...Drive for drum includes motor of vehicle
329 ..With means affixing drum to supporting base and allowing relative movement therebetween
330 ...Movement engages or disengages drum from drive
331 ...Movement occurs along line collinear with rotational axis of drum during pulling of cable
332 ...Including pivotal, rotational, or swivel connection between drum and base
333 ..Having pressure element spaced from drum to confine cable thereagainst
334 ..Having rotatable, cable guiding, pulley wheel element spaced from drum
335 ...Element repositionable relative to drum
336 ....Plural elements
337 .....Cable supported
338 ...Plural elements
339 ..Having plural, distinct drive sources or discrete drive trains
340 ...Including two or more motors
341 ..Drive includes rack and either pinion or pinion segment
342 ..Drive includes intermeshing gears
343 ...Worm and worm wheel
344 ...Epicyclic gear arrangement including sun, intermediate (e.g., planet), and ring gears
345 ...Shiftable into and out of intermeshing engagement

APPARATUS FOR HAULING OR HOISTING LOAD, INCLUDING DRIVEN DEVICE WHICH CONTACTS AND PULLS ON CABLE
.Device includes rotatably driven, cable contacting drum
..Drive includes intermeshing gears
346 ...Drive also includes clutch mechanism having coaxial, rotatable relatively shiftable axially, power transmitting components
347 ....With frictional brake assembly mechanically linked to, and operationally influenced by, clutch
348 ....With additional axially shiftable clutch mechanism mechanically linked to, and operationally influenced by, first clutch
349 ....Fluid operated actuator shifts component
350 ....Components having frictional contact surface
351 .....Truncated cone shaped
352 ...Drive also includes ratchet wheel and driving pawl
353 ....Plural driving pawls
354 .....Attached to rotatable disk or shaft
355 ...Drive also includes clutch mechanism having rotatable, radially shiftable, power transmitting component
356 ...With means for preventing or retarding rotation of drum in at least one direction
357 ....Ratchet wheel or formation and locking pawl
358 ..Drive includes sprocket wheel and chain
359 ..Either drive or cable return means includes power transmitting pulley and rope or belt
360 ..Drive includes expansible, noncombustible, fluid motor (e.g., air, steam)
361 ..Drive includes noncompressible fluid motor or pump
362 ..Drive includes electric motor
363 ..Drive includes contacting friction wheels having noncollinear axes of rotation
364 ..Either drive or cable return means includes spring
365 ..Drive includes clutch mechanism having coaxial, rotatable, relatively shiftable axially, power transmitting components
366 ...With frictional brake assembly mechanically linked to, and operationally influenced by, clutch
367 ...Fluid operated actuator shifts component
368 ...Components having frictional contact surface
369 ..Drive includes ratchet wheel and interengaging driving pawl
370 ..Drive includes clutch mechanism having rotatable, radially shiftable, power transmitting component
371 ..With means on circumference of drum, or relatively movable drum components, for grasping cable
372 ..With projections or apertures on drum for engagement with complementary structural formations on cable
373 ..With pickup or pushing means on circumference of drum for cooperating with structure attached to, or formed on, end of cable
374 ..Having noncircular or varying diameter, cable contacting perimeter
375 ..Including means for preventing or retarding rotation of drum in at least one direction
376 ...Ratchet wheel or formation and locking pawl
377 ...Fluid resistance brake
378 ...Frictional brake assembly having rotating, wheel structure and shiftable shoe or band
379 ....Having fluid actuator for shifting shoe or band
380 ..With portable housing for drum and hand manipulated means for removably fastening housing to supporting base or load
381 ..With structure (e.g., sweep, tree, yoke) adapting drum to be powered by draft animal
382 ..Including static receiver spaced from drum for storing pulled cable
383 ..With cable guard structure extending partly around and closely adjacent to drum
384 .Including hand held and operated lever with plural cable engaging means movably attached thereto for alternately contacting and pulling on cable
385 .With rotatable, cable contacting, pulley wheel element attached to and reciprocated by driving component of device
386 ..Element reciprocated by expansible fluid motor
88 INCLINED PLANE LIFTER
89 R MULTIPLE LIFTERS (E.G., VEHICLE LIFTS)
89 H ..Fluid pressure
90 .Track-straddling platform
91 .Swinging platform
92 .Screw
93 R FLUID PRESSURE
93 VA ..Vehicle attached
93 L ..Service station lifts
93 A ..Combined with screw
93 HP ..Inflatable portable bags
93 H ..Portable automobile jacks
94 ROCKING SUPPORTS
95 RACK AND PINION
96 .Screw pinion
97 .Geared
98 SCREW
99 .Derrick type
100 .Special engaging feature

102 .Telescoping screws
103 .Geared
104 WEDGE
105 STEP-BY-STEP TRAVELING BAR
106 .Clutch actuated
107 ..Multiple driving clutches
108 .Pawl actuated
109 ..Multiple driving pawls
110 ...Reversing
111 ..Reversing
112 .Rack and lever
113 SINGLE THROW LEVER AND BAR
114 .Sliding bar
115 ..Rack bar and segment
116 ..Adjustable
117 ...Lateral shoe
118 ...Rack bar

	SINGLE THROW LEVER AND BAR
119	.Adjustable
120	SINGLE THROW LEVER
121	.Rail or tie lifter
122	.Lazy tongs
123	.Lever-supported thrust bar
124	.Mechanically actuated
126	..Screw
127	..Cable
128	...Block and tackle
129	.Adjustable
130	..Multiple fulcrums
131	.Special engaging feature
131.5	..Fulcrumed fork or shovel
132	..Root puller type
387	LOAD ENGAGING MEMBER AND POWER TRANSMITTING CABLE FOR SHIFTING MEMBER RELATIVE TO STRUCTURE WHICH CONTACTS AND GUIDES MEMBER
133 R	SPECIAL ENGAGING ELEMENTS
133 A	..Sharing props (nonhydraulic)
134	.Adjustable
388	MEANS SUPPORTED BY, AND MAINTAINING RELATIVE SPACING BETWEEN, LONGITUDINAL RUNS OF AN ENDLESS LOAD MOVING CABLE
389	DEVICE OR MEMBER FOR CONTACTING AND GUIDING MOVING CABLE
390	.Including rotatable, cable contacting, pulley wheel element
391	..With mechanism for retarding or preventing cable movement or element rotation
392	..With fluid, shock absorbing or tension restoring mechanism connected thereto
393	..Plural elements or element with plural cable contacting regions
394	...At least two of the elements having noncollinear axes of rotation
395	....Juxtaposed to cable at single locus
396	.....Having juxtaposed elements repositionable relative to one another
397	.....Including additional element spaced along cable path
398	....Having one element repositionable relative to another element
399	.....Repositionable element supported by cable (e.g., traveling block)
400	....Having axes perpendicular or skewed
401	...With portable block for elements and hand manipulated means for removably fastening block to support base or load
402	....Having portion of block repositionable for insertion or removal of cable or for exposure of elements
403	....With guard or guide for maintaining cable on elements
404	....Including antifriction means for elements
405	..With block for element and portion thereof repositionable for insertion or removal of cable or for exposure of element
406	...Portion revolves about axis of rotation of element
407	..With means, or element structure, enabling object or obstruction on cable to bypass or travel over element
408	..With block for element having stationary portion adapted to coact with element to grip cable
409	..With portable block for element and hand manipulated means for removably fastening block to support or load
410	...Fastening means remotely operable or breakaway type
411	...With guard or guide for maintaining cable on element
412	...Including antifriction means for element
413	..With means for affixing element to support base and allowing relative movement therebetween
414	...Including elastic member
	CROSS-REFERENCE ART COLLECTIONS RELATED TO ANTIGEN-ANTIBODY OR IMMUNOASSAY
415	...Including pivotal, rotational, or swivel connection
416	..With antifriction means for element
417	.Having cable contacting portion revolving around another component of device

CLASS 264 PLASTIC AND NONMETALLIC ARTICLE SHAPING OR TREATING: PROCESSES

DECEMBER 1990

0.5	SHAPING OR TREATING RADIOACTIVE MATERIAL, E.G., FISSIONABLE OR FERTILE, ETC.
1.1	OPTICAL ARTICLE SHAPING OR TREATING
1.2	.Nonresinous material only, e.g., ceramic, etc.
1.3	.Light polarizing article or holographic article
1.4	.Utilizing plasma, electrical, or wave energy
1.5	.Fiber optic
1.6	.Continuous or indefinite length
1.7	.Composite or multiple layer
1.8	..Including bifocal
1.9	..Reflective
2.1	.Rotational molding
2.2	.Changing mold size or shape during molding or with shrinkage compensation
2.3	..With mold adherence or release
2.4	..Preform
2.5	.Including step of mold making
2.6	.Nonmechanical aftertreatment, e.g., hydration of contact lens, extraction, heat treatment, etc.
2.7	.Reshaping or treatment of an optical preform
3.1	EXPLOSIVE OR PROPELLANT ARTICLE SHAPING OR TREATING
3.2	.Rolling to form sheet or rod
3.3	.Extrusion to form sheet or rod
3.4	.Forming or treating particulate material
3.5	..By liquid comminuting
3.6	...Immersed in liquid
4	ENCAPSULATING NORMALLY LIQUID MATERIAL
4.1	.Liquid encapsulation utilizing an emulsion or dispersion to form a solid-walled microcapsule
4.3	..With treatment subsequent to solid wall formation, e.g., coating, hardening, etc.
4.32	...Microcapsule wall containing two or more layers
4.33	...Microcapsule wall derived from synthetic polymer
4.4	..Solid-walled microcapsule formed by cooling molten material
4.6	..Solid-walled microcapsule formed by physically removing a constituent, e.g., evaporation, extraction, etc.
4.7	..Solid-walled microcapsule formed by in situ polymerization
5	FORMATION OF SOLID PARTICULATE MATERIAL DIRECTLY FROM MOLTEN OR LIQUID MASS, E.G., LIQUID COMMINUTING
6	.With subsequent uniting of the particles
7	.Coated particles
8	.Utilizing centrifugal force or rotating forming zone
9	.By vibration or agitation
10	.Utilizing electrical energy
11	.By impinging plural liquid masses
12	.By impinging or atomizing with gaseous jet or blast
13	.By extrusion spraying, or gravity fall through orifice
14	..Into moving fluid
15	SPHEROIDIZING OR ROUNDING OF SOLID PARTICLES
16	DENTAL SHAPING TYPE
17	.Denture forming
18	..Forming denture base against preformed teeth
19	.Tooth forming
20	..Shaded layer
21	SHAPING OR TREATING LUMINESCENT MATERIAL
22	DIRECT APPLICATION OF ELECTRICAL OR WAVE ENERGY TO WORK
23	.Sonic or supersonic wave energy
24	.To convey or align particulate material
25	.To heat
26	..Electro-static
27	..By electric current passing directly through work
28	WITH STEP OF COOLING TO A TEMPERATURE OF ZERO DEGREES C. OR BELOW
29.1	CARBONIZING TO FORM ARTICLE
29.2	.Filaments
29.3	.Agglomeration or accretion
29.4	.From cellulosic material
29.5	.With addition of carbonizable material to carbon article and carbonizing
29.6	.In specific atmosphere (except vacuum or air)
29.7	.Controlling varying temperature or plural heating steps
30	FURNACE LINING FORMATION OR REPAIR
31	FORMING STRUCTURAL INSTALLATIONS IN SITU
32	.Arched, domed, or vertical-cylindrical structure
33	.Repositioning or moving mold to form sequential portions of a structure
34	.Sequentially molding in situ different portions or layers on a unitary structure
35	.Uniting preform member with molding material
36	REPAIRING OR RESTORING ARTICLES FOR REUSE
37	RECYCLING OF RECLAIMED OR PURIFIED PROCESS MATERIAL
38	.Of extrudant receiving bath material
39	WITH STEP OF CLEANING, POLISHING OR PRECONDITIONING APPARATUS FOR USE
40.1	WITH MEASURING, TESTING OR INSPECTING
40.2	.Sensing by passage of an electric field-current, or light thru molding material
40.3	.Controlling fluid pressure in direct contact with molding material
40.4	.Measuring a weight or volume, e.g., level-responsive, etc.
40.5	.Positioning of a mold part to form a cavity or controlling pressure of a mold part on molding material
40.6	.Controlling heat transfer with molding material
40.7	.Controlling rate of movement of molding material or its support in a continuous process
41	PORE FORMING IN SITU, E.G., FOAMING, ETC.
42	.Of inorganic materials
43	..Including vitrification or firing
44	...Burning out components to form pores
45.1	.Composite article making
45.2	..Utilizing inflatable or expandable mold part or mold, per se
45.3	..Incorporating particulate material, fibers or batts in a random distribution within a foamed body
45.4	..Forming one layer by uniting and expanding expandable thermoplastic beads or particles
45.5	..Autogenously formed surface layer or base supplies surface, e.g., skin forming, etc.
45.6	...Foam surface layer produced by surface treatment of preformed base material
45.7	..Utilizing rotational molding operation

PORE FORMING IN SITU, E.G., FOAMING, ETC.
.Composite article making
45.8 ..Forming indefinite length continuous work
45.9 ...Including extrusion
46.1 ....With subsequent application of shaping force to form final desired shape
46.2 ...Between at least two moving surfaces
46.3 ....With roller applied pressure
46.4 ..Shaping material and uniting to a preform or solidified layer
46.5 ...Uniting spaced preforms or solidified layers by introducing foamable material therebetween
46.6 ...Against inner surface of a hollow preform or solidified layer
46.7 ...Utilizing metal part or reinforcement
46.8 ...Introducing preform into mold by thermoforming operation, e.g., vacuum forming, etc.
46.9 ...On a preform or solidified layer which is spherical, toroidal, or annular
48 .Including surface treatment of porous body
49 .By treating occluded solids
50 .By mechanically introducing gas into material
51 .By gas forming or expanding
52 ..Utilizing expansion retarder
53 ..Liquid to gas phase change
54 ..Chemical blowing
55 ...Plural or incremental expansion steps
56 VITRIFYING OR SINTERING OF PREFORM TO MAKE INORGANIC ARTICLE
57 .Particular positioning, arranging or conveying article during heating
58 ..Stacking or arranging plural articles
59 .Simultaneously burning out embedded element to form void
60 .Forming coated, composite, or nonuniform composition article
61 ..Forming electrical article or component thereof
62 ..Shaping followed by article coating
63 .Utilizing binder to add green strength to preform
64 .Controlling or directing heat flow within heating or drying chamber or against the article
65 .Controlling pressure or composition of heating atmosphere
66 .Controlling varying temperature or plural heating steps
67 .With article cutting, punching or grinding
68 INCLUDING STEP OF GENERATING HEAT BY FRICTION
69 TREATMENT OF MATERIAL BY VIBRATING, JARRING OR AGITATING DURING SHAPING
70 .Continuously formed or indefinite length article
71 .By reciprocating or vibrating mold
72 ..Diverse, sequential or modulated
73 RANDOM VARIEGATED COLORING DURING MOLDING
74 .Of surface portion only
75 .By extrusion
76 .By calendering
77 .By compression in a closed mold cavity
78 WITH INCORPORATING DYE SUSCEPTIBLE MATERIAL OR DYEING WORKPIECE
79 WITH APPLICATION OR BARRIER FOR VOLATILE COMPONENT MATERIAL TO MOLDED ARTICLE SURFACE
80 FLAME CONTACT OR RESHAPING BY HEAT DECOMPOSITION OF WORK
81 GAS OR VAPOR DEPOSITION OF ARTICLE FORMING MATERIAL ONTO MOLD SURFACE
82 REACTIVE GAS OR VAPOR TREATMENT OF WORK
83 .Work is organic material
84 APPLYING EXPLOSIVE FORCE TO MAKE ARTICLE
85 UTILIZING SPECIAL INERT GASEOUS ATMOSPHERE OR FLUSHING MOLD WITH INERT LIQUID
86 REMOVAL OF LIQUID COMPONENT OR CARRIER THROUGH POROUS MOLD SURFACE
87 .By direct application of vacuum or pneumatic pressure
500 DIRECT APPLICATION OF FLUID PRESSURE DIFFERENTIAL TO PERMANENTLY SHAPE, DISTORT, OR SUSTAIN WORK
501 .Producing toroidal work, e.g., tire, etc.
502 ..At least a portion of the external surface being unconfined during application of fluid pressure
503 .Shaping against interior of a forming surface by rotation of material or material shaping member
504 .Perforation by differential fluid pressure; or smoothing, scoring, or cutting of green concrete with fluid pressure
505 .Corrugating
506 ..Of a tubular preform
507 ...With axial compression
508 ...Continuous or indefinite length
509 .Labeling or embossing indicia
510 .Producing multilayer work or article
511 ..Including application of vacuum to hold, support, or sustain a preform against which material is molded
512 ..Producing hollow work or a tubular article
513 ...Including injection
514 ...Including extrusion
515 ....Including forming a hollow article
516 ...By insertion or application of a preform
517 .Bulk deposition of particles by differential fluid pressure
518 ..Continuous or indefinite length
519 .Differentail temperature conditioning
520 ..Including application of internal fluid pressure to hollow finite length preform to force same into conformity with female mold part
521 ...Heating
522 ..Starting material is nonhollow planar finite length preform or product is planar and of finite length
523 .Including application of internal fluid pressure to hollow finite length parison to expand same into conformity with female mold part
524 ..Production of a sealed product or a filled mercantile container
525 ...Including maintenance or production of internal sterility
526 ..Including use of vacuum or internal venting of parison to remove fluid after application of differential fluid pressure
527 ..Forming multiple containers in a single mold block from a single length of parison
528 ..Including internal cooling of the article after fluid pressure shaping
529 ..Including plural distinct steps of differential fluid pressure induced expansion

DIRECT APPLICATION OF FLUID PRESSURE DIFFERENTIAL TO PERMANENTLY SHAPE, DISTORT, OR SUSTAIN WORK
.Including application of internal fluid pressure to hollow finite length parison to expand same into conformity with female mold part
..Including plural distinct steps of differential fluid pressure induced expansion
530 ...In diverse female mold cavities
531 ..Including shaping by mechanical means other than fluid pressure during or subsequent to fluid pressure differential shaping
532 ...Shaping is longitudinal or axial stretching prior to or during differential fluid pressure deformation
533 ...Shaping is neck formation other than by closure of mold for body of article
534 ...Shaping is subsequent to expansion
535 ..Including heating of previously formed parison to blow molding temperature
536 ..Including removal of flash or sprue
537 ..Including injection forming of parison or portion thereof
538 ...Arcuate or rotary movement of parison or workpiece from one work station to another
539 ...Including extrusion
540 ..Including extrusion
541 ...Of irregular or varying cross section
542 ...With movement of parison or workpiece from one work station to another
543 ....Movement is arcuate or rotary
544 .Starting material is nonhollow planar finite length preform or product is finite length
545 ..Including uniting plural shaped sheets to form hollow work
546 ..Material shaped is a fabric per se
547 ..With distinct staged deformation by differential fluid pressure
548 ...Including heating after forcing into contact with a solid heating means by differential fluid pressure
549 ...Including use of male part to stretch heated preform which is formed by a female mold which determines shape of work
550 ..Including use of male part to stretch heated preform which is formed by a female mold which determines shape of work
551 ...Simultaneous formation of plural articles
552 ..Including curing or vulcanization
553 ..Including use of vacuum
554 ...Including use of male mold part which determines the final shape of at least a portion of the work
555 .Production of continuous or running length
556 ..By casting on to a cooled roll
557 ..Including liquid contact
558 ...Including internal liquid contact
559 ....With downward movement of workpiece
560 ...With calibration, mandrel forming or with internal guide
561 ...Contact with liquid coagulant or reactive liquid
562 ...With immersion in liquid bath
563 ..Producing a tubular product
564 ...Including deformation by application of fluid pressure
565 ....With internal gas bearing or mandrel
566 ....With application of external pressure or vacuum
567 .....With reheating of work, e.g., tempering, annealing, etc.
568 .....Including use of vacuum
569 .....Including annular fluid contact
570 .Including hydrostatic or liquid pressure
571 .Including use of vacuum
572 .With internal application of fluid pressure
573 ..To finite length tubular product
574 ..To form generally spherical product
101 VACUUM TREATMENT OF WORK
102 .To degas or prevent gas entrapment
103 WITH TWINING, PLYING, BRAIDING OR TEXTILE FABRIC FORMATION
104 FORMING ELECTRICAL ARTICLES BY SHAPING ELECTROCONDUCTIVE MATERIAL
105 .Conductive carbon containing
106 FORMING SOUND GROOVES IN RECORDS
107 .Die pressing disk type records
108 ORIENTING OR ALIGNING SOLID PARTICLES IN FLUENT MATRIX MATERIAL
109 FORMING ARTICLES BY UNITING RANDOMLY ASSOCIATED PARTICLES
110 .Mica particles
112 .Stratified or layered articles
113 ..Plural layers formed by uniting randomly associated particles
114 .Utilizing centrifugal force
115 .With liberating or forming of particles
116 ..From felt or batt
117 .Agitating to form larger particles, i.e., accretion or agglomeration
118 .With subsequent cutting, grooving, breaking or comminuting
119 .With reshaping or surface embossing of formed article
120 .Plural, intermittent pressure applying
121 .Projecting particles in a moving gas stream
122 .Utilizing diverse solid particles
123 .Autogenously or by activation of dry coated particles
124 ..By activating naturally occurring binder, e.g., cork, etc.
125 ..Sintering or heat fusing particles
126 ...Of organic material
127 ....Fluorocarbon resin
128 .Liquid binder applied subsequent to particle assembly
129 WITH PRINTING OR COATING OF WORKPIECE (OUT OF MOLD)
130 .Anti-stick or adhesion preventing coating
131 .Coating with particulate material
132 .Applying indicia or design, e.g., printing, etc.
133 .Applied to clay, sand or earthen workpiece
134 .Coating or impregnating workpiece before molding or shaping step
135 ..Molding material against and uniting to the coated or impregnated workpiece
136 ..Impregnation of batt, sheet, or filament
137 ...Heat settable impregnant
138 WITH SEVERING, REMOVING MATERIAL FROM PREFORM MECHANICALLY OR MECHANICALLY SUBDIVIDING WORKPIECE
139 .Removing surface portion of composite workpiece to expose substrate
140 .To form particulate product, e.g., flakes, etc.

WITH SEVERING, REMOVING MATERIAL FROM PREFORM MECHANICALLY OR MECHANICALLY SUBDIVIDING WORKPIECE
.To form particulate product, e.g., flakes, etc.
141 ..Subsequent to extruding step
142 ...By cutting at point of extrusion
143 ...From strands
144 ..From continuously cast material
145 .Forming continuous work followed by cutting
146 ..Slitting longitudinally
147 ...Of web to form plurality of threads
148 ..Extruding followed by cutting to length
149 ...Extruding around moving preform
150 ...Extruding hollow product
151 ...With shaping between extruding and cutting steps
152 .Cutting and uniting cut parts
153 .Punching article from sheet material
154 .Making hole or aperture in article
155 ..By punching or drilling
156 ...Plurality of holes
157 .Dividing work to form plural articles
158 ..Shaving or slicing sheets from work block
159 ..Tubular work
160 ..Sheet or web work
161 .Flash or sprue removal type
162 .Surface finishing, e.g., abrading, grinding, etc.
163 .Simultaneous severing and shaping, or severing while work remains on shaping surface
164 UNCONFINED DRAWING OR EXTENDING OF A PLASTIC MASS TO MAKE ARTICLE
165 FORMING CONTINUOUS OR INDEFINITE LENGTH WORK
166 .With mold element formation or removal
167 .Of varying cross-sectional area or with intermittent cross-sectional irregularity
168 .With crimping or crinkling of strands of filaments
169 .With prevention of equipment fouling accumulations or deposits
170 ..By chemical additive to molding material or treating bath
171 .Composite or stratified transversely of length
172 ..Plural discrete axially aligned preforms
173 ..Hollow articles
174 ..Strand-like or filament-like preforms
175 .By calendering
176.1 .Shaping by extrusion
177.1 ..To produce particular cross section, e.g., noncircular, etc.
177.11 ...Nonresinous material only, e.g., ceramic, soap, cellulose, glue, etc.
177.12 ...Honeycomb
177.13 ...Filament, e.g., T-configured, dog-bone, trilobal, etc.
177.14 ....Hollow or tubular work produced
177.15 .....Capillary passages, e.g., pen nibs, writing tips, etc.
177.16 ...Die configuration (other than fixed orifice shape)
177.17 ...Processing or treatment after extrusion, e.g., support, guide, etc.
177.18 ....Chemical
177.19 ....Temperature specified (other than ambient)
177.2 ...With reinforcement, filler or additive
178 R ..Into a liquid bath
178 F ....Filaments
179 ...With purifying or replenishing of bath
180 ...Liquid of bath is in motion
181 ....With stretching in bath of extruded article
182 ...Polyacrylonitrile containing extrudant
183 ...Reactive bath
184 ....Synthetic resin containing extrudant
185 .....Polyvinyl alcohol containing
186 ....Carbohydrate containing extrudant
187 .....Cellulose derivatives
188 ......Viscose
189 ....Bath contains organic compound
190 ....Carbohydrate or protein
191 ....Extrudant contains added organic compound
192 ....Sulfur containing organic compound
193 ....Polyethers, e.g., oxyalkylated compounds, etc.
194 ....Nitrogen containing organic compound
195 ....Subsequent chemical treatment of formed articles
196 ....Plural step coagulating or regenerating
197 ....With stretching
198 ....Mechanical treatment of articles, e.g., stretching, folding, deforming, etc.
199 ......Cupro ammonium cellulose
200 ......Cellulose acetate
201 ....Natural rubber containing extrudant
202 ....Protein containing extrudant
203 ...Liquid is solvent extractive
204 ..Solidifying by evaporation of liquid solvent or liquid carrier
205 ...Synthetic resin containing spinning solutions
206 ....Polyacrylonitrile
207 ...Cellulose derivative
208 ....With stretching of formed article
209.1 ..Hollow article
209.2 ...Including rotational or translational movement of a material shaping member
209.3 ...Reshaping product (extrudate) subsequent to extrusion
209.4 ....Sizing to desired dimension
209.5 .....Stretching extruded material
209.6 ...Curing or polymerizing operation during extrusion, e.g., cross-linking, vulcanizing, etc.
209.7 ...At least two distinct operational temperatures employed during the extrusion operation
209.8 ...Providing special flow channel feature, e.g., varying dimension of flow channel or varying direction of flow of material in the extruder, etc.
210.1 ..And reshaping
210.2 ...Including a step other than application or removal of tension
210.3 ...With application of agent other than water or air to workpiece
210.4 ....During or after final shape change
210.5 ...With temperature gradient across cross section of workpiece or heat treatment after all shaping
210.6 ...With processing before extrusion or inclusion of additive

	FORMING CONTINUOUS OR INDEFINITE LENGTH WORK
	.Shaping by extrusion
	..And reshaping
210.7	...Plural stretching steps or stages
210.8	...Of filament
211	..Utilizing added agent, e.g., flux, plasticizer, dispersing agent, etc.
211.1	..Centripetal extrusion
211.11	..Nonresinous material only, e.g., ceramic, soap, cellulose, etc.
211.12	..Processing or treatment after extrusion
211.13	...Contact of extrudate with fluid other than ambient air
211.14	....Filament (e.g., fiber, etc.)
211.15	.....Plural treatment stages of zones
211.16	.....Extractive fluid or effects reaction
211.17	.....Heating
211.18	....Plural treatment stages or zones
211.19	....Extractive fluid or effects reaction
211.2	....Heating
211.21	..Screw extruder or screw feeder device
211.22	...Filament (e.g., fiber, etc.)
211.23	...Plural screws, plural extruders, or plural stage extruder
211.24	..Curing or polymerization in the extruder (includes incomplete polymerization or curing, or coagulating rubber)
212	.By casting liquids on a solid supporting or shaping surface
213	..Utilizing surface parting, anti-stick or release agent
214	..To form nonplanar article or surface
215	..By dipping the forming surface into the forming material
216	..Rubber or synthetic resin containing liquid
217	..Carbohydrate containing liquid
218	...Solidifying by applied reagent
219	WITH STEP OF MAKING MOLD OR MOLD SHAPING PER SE
220	.Utilizing surface to be reproduced as an impression pattern
221	..With destruction of pattern or mold to dissociate
222	..Anatomical surface, i.e., using body area as an impression pattern
223	...Pedal
224	..With flexible inversion of a forming surface
225	..Forming mold from fluent material
226	...With initial molding or treating of a surface to be reproduced
227	....Developing a surface negative and then a surface positive mold
228	FORMING STRESSED CONCRETE ARTICLES
229	PRESTRESSING SOLID BODY AND UNITING IN STRESSED CONDITION
230	UTILIZING HEAT RELEASABLE STRESS TO RESHAPE SOLID WORKPIECE, E.G., ELASTIC MEMORY, ETC.
231	APPLYING TENSILE STRESS TO WORKPIECE DURING HEAT CURING
232	DISPARATE TREATMENT OF ARTICLE SUBSEQUENT TO WORKING, MOLDING OR SHAPING
233	.Washing of article
234	.Effecting temperature change
235	..Annealing
235.6	...After stretching running or indefinite length work
235.8	....Biaxial stretching of film
236	..Completing vulcanization or polymerization
237	..Cooling
238	COMBINED
239	MECHANICAL SHAPING OR MOLDING TO FORM OR REFORM SHAPED ARTICLE
240	.Separately introducing reacting materials into mold
241	.To produce composite, plural part or multilayered article
242	..Joining parts for relative movement
243	..Bristled or tufted article making
244	..Uniting shoe part to upper
245	..Multicolored surface
246	...One component self-sustaining prior to compositing
247	....Positioning component in mold
248	..Fusion bonding of preformed bodies and shaping at joint only
249	..Mechanically securing parts together by reshaping joint portion only
250	..By separately molding different article portions
251	...Spaced molded portions interconnected by solid preform
252	....Molding portions along sheet edge
253	....Building unit having spaced walls
254	...Separate stage covering of different preform areas
255	...Sequential formation of portion on same mold or a preform surface
256	....Utilizing clay, sand or calcareous slurry
257	..One component is a fibrous or textile sheet, web or batt
258	...Joining a plurality of superposed fibrous or textile layers
259	..Shaping material and uniting to a preform
260	...Co-molding plural fluent materials and uniting to preform
261	...Uniting spaced preforms, by introducing fluent material therebetween
262	....Concentric preforms
263	...To unite independent contacting preforms
264	...Preventing adherence of shaped material to preform
265	...Conditioning or treatment of preform
266	...Simultaneously shaping material and reshaping preform
267	...Against inner surface of hollow preform
268	....Cap or cup-like preform, e.g., container closure, etc.
269	....Cavity lining type
270	.....Utilizing centrifugal force, e.g., pipe lining, etc.
271.1	...Preform embedded in or surrounded by shaped material
272.11	....Electrical component encapsulating
272.12	.....Nonresinous encapsulant
272.13	.....With curing procedure, or procedure or treatment to compensate for differential expansion
272.14	.....Plural electrical components
272.15	.....With component positioning procedure or incorporation of article positioning means
272.16	.....Transducer, or electric lamp or space discharge device
272.17	.....Semiconductor or barrier layer device, e.g., integrated circuit, transistor, etc.
272.18	.....Condenser or resistor
272.19	.....Dynamoelectric machine, electromagnet, transformer inductors or coils

	MECHANICAL SHAPING OR MOLDING TO FORM OR REFORM SHAPED ARTICLE
	.To produce composite, plural part or multilayered article
	..Shaping material and uniting to a preform
	...Preform embedded in or surrounded by shaped material
	....Electrical component encapsulating
	.....Dynamoelectric machine, electromagnet, transformer inductors or coils
272.2	......Motor or part encapsulated
272.21	.....Battery or part encapsulated
273	....Shaped material extends through holes in preform
274	....Preform particularly provided with means to provide interlock with shaped material
275	....Positioning or maintaining position of preform relative to mold surface
276	.....Preventing flash
277	.....Maintaining preforms in spaced relationship
278	.....By removable means
279	....Applying fluent material to preform
279.1	....Preform is completely surrounded by shaped material
280	.Reshaping running or indefinite-length work
281	..Longitudinally advanced coiling (nonplanar)
282	..Creping or crinkling
283	...By doctoring from drum
284	..Deforming the surface only
285	..Bending
286	...Corrugating
287	....And subsequent reshaping of corrugated material
288.4	..Stretching by applying tension
288.8	...Nonuniform product, e.g., porous, etc., or with tensioning before application of heat
289.3	...With treatment other than heating before stretching
289.6	...With shrinking or with liquid contact during or after stretching
290.2	...Biaxial or transverse to travel direction
290.5	...Of filament
290.7	....Including contact with mechanism in stretch path, e.g., snubbing, etc.
291	.Stretching or stretch forming
292	..By drawing over a form
293	.Deforming the surface only
294	.Plural sequential shaping or molding steps on same workpiece
295	..Molding followed by bending or twisting
296	..One step reshapes portion only of article
297.1	.Forming plural articles
297.2	..Including introducing material under pressure into a closed mold cavity, e.g., injection molding, etc.
297.3	...With plural molds on belt or turntable
297.4	..Forming multiple stacked or nested articles or including multi-layer pressing
297.5	..Reshaping or treatment of a preform, e.g., vulcanizing, etc.
297.6	..With plural molds on a moving surface
297.7	...With linear movement of the molds
297.8	..Simultaneous formation of plural articles
297.9	...Of primarily inorganic material, e.g., concrete or ceramic, etc.
298	.By casting on a liquid surface
299	.Shaping against forming surface, e.g., casting, die shaping, etc.
300	..Utilizing release agent in molding material
301	..Accretion from bulk
302	...Slush casting type
303	...Accretion of varying wall thickness or control of accretion by compound movement of form
304	...Facilitating removal of article from form
305	...Successive dipping steps into same material
306	...Conditioning or treating material or form to effect deposition
307	...Treating accreted material on form with added agent or reactant
308	..Incremental layer molding type
309	..Spraying or flinging material against a shaping surface
310	..By rotation of material or material shaping member
311	...Utilizing centrifugal force
312	...Inner relatively rotating member to form hollow article
313	..Utilizing a flexible, deformable or destructable molding surface or material
314	...Utilizing fluid-expansible mold
315	....Toroidal mold bag
316	...Utilizing sheet-like material
317	...Removing mold by destruction
318	..Molding trapped undercut article portion
319	..Applying heat or pressure
320	...Reshaping solid work or introducing solid work into mold cavity
321	....Sponge-like or foamed work
322	....Initially softening workpiece
323	....Sliding motion between material and mold surface (extruding finite articles)
324	....Woven or felted sheet-form work
325	....Utilizing closed mold cavity
326	.....Toroidal work, e.g., tire, etc.
327	...Differential heating or cooling in mold
328.1	...Introducing material under pressure into a closed mold cavity, e.g., injection molding, etc.
328.2	....Material is nonthermoplastic
328.3	.....Toroidal work, e.g., tire, etc.
328.4	.....Utilizing a transfer chamber
328.5	......With preformed charge
328.6	.....Including mixing of reactants
328.7	....Including changing mold size or shape during injection or between multiple stages of injection
328.8	....With multiple injectors, mold cavities, or multiple steps of injection of material
328.9	....Including operation or design to minimize formation of gate, sprue, or flash
328.11	....Including movement of mold relative to injector
328.12	....Including specified direction or condition of flow in mold
328.13	....Including injection at two or more pressures
328.14	....With heating or cooling
328.15	.....Of injection nozzle
328.16	.....Of mold

	MECHANICAL SHAPING OR MOLDING TO FORM OR REFORM SHAPED ARTICLE
	.Shaping against forming surface, e.g., casting, die shaping, etc.
	..Applying heat or pressure
	...Introducing material under pressure into a closed mold cavity, e.g., injection molding, etc.
328.17	....Pretreatment or preparation of charge material
328.18	.....Mixing of filler, dye, or pigment
328.19	.....Including feeding to accumulator
330	...Organic material shaping
331.11	....Synthetic resin containing
331.12	.....Polymer having heterocyclic group or polymer derived from monomer having heterocyclic group except heterocyclic derived solely from carboxylic acid, i.e., cyclic imide, lactam, lactone, or anhydride
331.13	.....Polymer derived from monomer having at least two ethylenic groups, e.g., ABS rubber, chloroprene, etc., or with natural rubber
331.14	.....Fluorine
331.15	.....Ethylenically unsaturated polymer or polymer derived from ethylenically unsaturated monomer
331.16	......Nitrogen containing polymer
331.17	......Hydrocarbon polymer
331.18	......Carboxylic acid or derivative, e.g., acrylic, etc.
331.19	.....Nitrogen containing, e.g., polyamide, polyurethane, etc.
331.21	.....Carboxylic acid or derivative
331.22	.....Polymer derived from aldehyde
332	...Fusing or melting inorganic material
333	...Inorganic hydraulic settable material shaping
334	..Article or material ejecting, core or mold stripping or separating
335	...By direct fluid pressure or pressure differential
336	...Ejecting or stripping before full set or cure of work
337	..Utilizing particular mold material
338	...Coating or lining
339	.Bending or twisting of work
340	TREATING SHAPED OR SOLID ARTICLE
341	.Solvent polishing type
342 R	.To shrink
342 RE	...Relaxation of running or indefinite length work
343	.To swell or plasticize
344	.To remove entrained material from article
345	.By a temperature change
346	..To anneal or temper
347	..To complete vulcanization or polymerization
348	..To cool

44 PROCESS
45 .Plugging or tapping
46 .Cooling
47 .Tuyere operation
48 MEANS FOR CUTTING SOLID METAL WITH HEAT, E.G., BLOWPIPES
49 .With waste entrapping fluid
50 .Means for cutting continuously cast workpieces
51 .Means for removing surface material, e.g., scarfing
52 ..Having means to simultaneously scarf multiple sides of a workpiece
53 ..Having workpiece-contacting cutting means spacer
54 .With means for cutting tubular workpiece
55 ..Having torch mount secured within workpiece
56 ..Having means to circumrotate torch about workpiece
57 ..With means to rotate workpiece
58 .With pattern control means
59 ..With tape-control means
60 ..With automatic line-follower means
61 ..With means to rotate workpiece
62 ..Having articulated arm supporting torch
63 ...With pantograph arm means
64 ..Having spaced, superposed templet
65 .With work supporting grate means
66 .Hand held, work riding torch
67 .With wheeled carriage torch mount
68 ..Having work contacting torch spacing means
69 ..With work-spanning torch mount
70 .Circle cutter
71 .Having torch solely supported by workpiece
72 .With cantilevered arm torch support
73 ..Having carriage-supported cantilevered arm
74 .Having adjuvant material feed
75 ..Solid material
76 .Having torch spacing means
77 .With torch mounting means
78 WITH CONTROL MEANS RESPONSIVE TO SENSED CONDITION
79 .By treated material sampling means
80 .With analyzer or computation means
81 .With means supplying a treating agent
82 ..Correlated flow of diverse fluents
83 ...With flow rate sensor
84 ...With means sensing moisture content
85 ..Individual control of diverse inputs
86 ..By means positioning dispenser
87 .With temperature sensor
88 ..In a fluid
89 .With pressure sensor
90 .With means responsive to condition of treated material
91 ..By means sensing weight or density of work
92 ..By means sensing position of work
93 ...By means sensing presence or absence of work
94 ...By means sensing level of molten liquid
95 ....By float means
96 WITH PROGRAMMED, CYCLIC, OR TIME RESPONSIVE CONTROL MEANS
97 .By timer
98 ..Having driven disk or drum
99 WITH RECORDING, INDICATING, INSPECTION OR MEASURING MEANS
100 .Having observation means
101 HAVING MEANS FOR LEACHING AND SUBSEQUENTLY PRECIPITATING A METAL
102 MEANS TREATING A CONTINUUM OF WORK
103 .With heating means
104 ..By joule effect
105 ..Discrete article continuum
106 ..Overlapped planar coil
107 ..In a molten material bath
108 ..In a muffle furnace
109 ..With cooling by contact with solid heat sink
110 ..In specific environment, e.g., vacuum
111 ..With fluid contact means
112 ...In liquid bath
113 ...In liquid spray
114 HAVING MEANS FOR CONTACTING A SOLID METALLIFEROUS MATERIAL OR METAL OBJECT WITH A LIQUID
115 .With means changing the shape of a treated object, e.g., roller means
116 ..Spring shaping means
117 .With means to prevent warping of treated object
118 ..Of a gear wheel
119 ..With heating of object
120 .By immersing an article to be treated in bath of molten material, e.g., salt bath
121 .With heating means, e.g., flame contact
122 ..By means treating metalliferous materials, e.g., ores
123 ..By heating means adapted to be inserted into a hollow object
124 ..By means heating selected areas of an object
125 ...By means specialized to heat an article having an irregular contour (e.g., cams, gears)
126 ....By heating means configured to fit between adjacent gear teeth
127 ..Unitized heating and fluid contact means
128 ..By electric heating means
129 ...Inductance type
130 ..Having bath for contacting the work with liquid
131 ...With means to agitate or control temperature of bath
132 ...Having work introducing elevator
133 ...Having means to move work through bath
134 .By means contacting only selected areas of treated article with liquid
135 WITH CLEANING OR LUBRICATING MEANS
136 .Fluid injector cleaner
137 WITH MEANS TO COMMINUTE OR DISINTEGRATE SOLIDS
138 WITH MEANS TO PREHEAT GAS
139 .Having heat storage means, e.g., checkers, stroves
140 .By heat generating means
141 .By remote heat exchanger
142 GEOGRAPHIC OR STRUCTURAL INSTALLATION
143 .Having refining vessel with travelling support
144 WITH MEANS TREATING OR HANDLING GASES EXHAUSTED BY TREATING MEANS
145 .Having means to treat or handle gases evolving from rotary furnace
146 .By contacting gas with nonmetallic liquid
147 ..By liquid spraying
148 .By condensing and collecting a volatile constituent
149 ..Within evacuated chamber
150 ..Having molten metal splashing means
151 ..By cascading material evolving the gas
152 ..By indirect liquid heat exchange means
153 ..Having retort condenser
154 ..Vertical shaft furnace

WITH MEANS TREATING OR HANDLING GASES EXHAUSTED BY TREATING MEANS
155 .With heat exchanger, e.g., waste heat boiler
156 .By means recycling exhaust gas
157 .By separating particles from evolved gas
158 .Hood
159 .Offtake
160 COMBINED OR CONVERTIBLE
161 MEANS FOR EXTRACTING AND REFINING METAL
162 .With separate refining zone
163 ..With rotating heating vessel
164 ..With heated vertical extracting means
165 AMBULANT VESSEL
166 TREATING VESSEL WITH DISTINCT MOLTEN MATERIAL HOLDING MEANS, E.G., FOREHEARTH
167 THERMIT REACTION VESSEL
168 MEANS FOR TREATING ORES OR FOR EXTRACTING METALS
169 .Amalgam-type extraction means
170 .By means precipitating metal from solution
171 .By means applying heat to work, e.g., furnace
172 ..Fluidized zone
173 ..Rotary drum-type furnace
174 ..With safety device
175 ..With separate preheat chamber
176 ..With means for moving solid material to or through heating zone
177 ...By means for moving charge through zone
178 ....Traveling grate
179 .....With seal means
180 .....Train of grate elements
181 ....Means forming cascading array
182 ...By fluid current
183 ...By power-driven means conveying solid charge into zone
184 ...Bell and hopper type
185 ..With work supporting grate
186 ..With means for feeding fluids
187 ...With flow regulating means
188 ...With common outlet means to feed diverse fluids
189 ...With means to cool fluid feeding means
190 ..With cooling of heating means
191 ...By means cooling material discharge means
192 ...By direct fluid contact
193 ...By means embedded in heating means
194 ....Having means to facilitate removal of cooling means
195 ..With discharge means
196 ...With trough-shaped outlet, e.g., runner
197 ..Shaft-type furnace, e.g., blast furnace
198 ...Having external support
199 ...Having specific top structure
200 MEANS FOR MELTING OR VAPORIZING METAL OR TREATING LIQUEFIED METAL
201 .Slag refining means
202 .Spray refining means
203 .By means specialized to puddle metal
204 .Means applying centrifugal force
205 .Means to melt and separate metal from mass of diverse constituents
206 .Means for melting-type material, e.g., Linotype
207 .By providing, treating or protecting environment, e.g., vacuum
208 ..By application of vacuum
209 ...By upward flow of metal within treating zone
210 ....Recirculating material to its source
211 ...Enclosed within casing
212 .Refining means with separate metal-melting zone
213 .Revolving drum-type furnace
214 .Reverberatory refining vessel, e.g., open hearth
215 .Continuous refining
216 .By means introducing treating material
217 ..Gaseous treating material
218 ...Having fluid inlet formed in vessel wall, e.g., tuyere
219 ....Having intersecting streams converging on central axis of vertical furnace
220 ....Having porous outlet
221 ....By means to introduce diverse material
222 .....Concentric flow paths
223 ....Having control means
224 ....Having tuyere formed in plug bottom
225 ...Lance
226 ....With manipulating means
227 .By separating metal in a molten mass from undesired material, e.g., slag
228 ..By skimming a material
229 ..By baffle means
230 ...At discharge outlet
231 ...In discharge trough, e.g., runner
232 ..Settling receptacle, e.g., slag pot
233 .By stirring or mixing molten metal
234 ..Induction stirring
235 ..Having impeller means
236 .With means to discharge molten material
237 ..Including electromagnetic means
238 ..Means for removing residual material
239 ..By changing ambient pressure on material surface, e.g., suction
240 ..With means to tilt heating means
241 .With means to cool treating means
242 .Heated melting pot
243 .Bessemer-type treating vessel
244 ..By mounting vessel to revolve about its longitudinal axis
245 ..With means pivotally mounting vessel
246 ...Means mounting vessel to trunnion ring
247 ...Means mounting vessel to U-shaped trunnion support means
248 .Horizontal, rotatable, cylindrical type
249 MEANS TREATING SOLID METAL
250 .Having evacuated chamber
251 .By contact with gas
252 ..With heating means
253 ...Bottom feeding furnace
254 ...With indirect heat-exchange means for gas
255 ...Having work contained in separate, noncommunicating chamber, e.g., muffle
256 ....Bell furnace
257 ...Having atmosphere generating means within treating zone
258 ..By contacting only selected areas of object
259 .By cooling of the solid
260 ..By contact with solid heat sink
261 .By flame contact heating
262 .Fluid tight heat transferring box shield or hood (e.g., annealing box)
263 ..Bell-type hood, or support for such hood
264 ...Having packing at hood lip
265 MEANS FOR INTRODUCING FLUENT INTO VESSEL, E.G., TUYERE
266 .With flow control means or internal flow guide

	MEANS FOR INTRODUCING FLUENT INTO VESSEL, E.G., TUYERE
267	.Having means for simultaneously feeding diverse materials
268	..Having plural outlets
269	.Having drain means or cleaner insertion means, e.g., punch hole
270	.having means preventing damage to introducing means, e.g., wear linings, cooling
271	MEANS SEALING OR OPENING APERTURE IN VESSEL
272	.By means plugging aperture
273	..By means injecting plugging compound, e.g., mud gun
274	MEANS FOR HOLDING OR SUPPORTING WORK
275	.Receptacle
276	..With means movably supporting receptacle
277	...By bed of rollers
278	..Having corrugated wall
279	.Grate
280	LININGS
281	.With making or repairing means
282	.With metallic means to prevent lining abrasion
283	.Having particular lining element shape
284	.Having specific grain size
285	.With means allowing for expansion
286	.With specific lining enclosing structure

CLASS 267 SPRING DEVICES

DECEMBER 1990

1.5 PACKING EXPANDER OR CONSTRICTOR
80 SPRING PANEL
81 .Composite springs of diverse material, e.g., metal and non-metal
82 ..Vented fluid chamber modifies action of metallic spring
83 ..Superposed layers; metal and non-metal
84 ...Metal layer is compressible coil spring
85 .Multistage springs
86 .Diverse types of superposed metallic springs
87 ..Sinuous spring loading surface supported by other spring
88 ..Compressible coil spring loading surface supported by other spring
89 .With means to vary preliminary tension of spring
90 .With means to dampen vibration of springs, e.g., sound deadening
91 .Spring panel comprises vertically oriented compressible coil springs
92 ..Plural superposed coils
93 ..Panel comprises spring of varying capacities
94 ..With padding protector on spring end
95 ..Loading surface includes component other than coil spring
96 ..With resilient side or end, e.g., edge roll
97 ..With reinforcement or extension for border wire
98 ..With diagonal surface-to-frame brace
99 ..Resiliently mounted on frame by tensile springs
100 ..Mounted on frame spanning strips
101 ..Spring rows supported by row separating stringers
102 .With cantilevered surface extension, i.e., "soft edge"
103 .Spring means spacing loading surface vertically from plane of supporting frame
104 ..With supplementary spacing means intermediate ends of surface
105 ..Stiffener or bracer for loading surface
106 ..Multiple sections span frame
107 ..By inwardly bowed portion, i.e., "fishmouth" type
108 ...With coiled apex, i.e., "safety pin" type
109 ..By outwardly bowed portion
110 .Panel secured peripherally to supporting frame
111 ..Panel secured to tension frame inwardly
112 ...Secured by resilient connectors
2 VEHICLE
3 .Railway

5 .Perambulator
6 .Bolster
7 ..Leaf
183 .Parallel depression (e.g., having stabilizer bar)
184 ..Duplex
185 ...Single pivot
186 ..Fluid stabilizer
187 ...Including torque bar or pump
188 ..Torque bar or tube stabilizer
189 ...And elastomeric member
190 ...And coil spring
191 ...And retarder
192 ..Leaf spring stabilizer
193 ...Leaf spring acting between pivoted links
194 ..Plural nontorsion coil springs
195 .Mechanical spring and nonresilient retarder (e.g., shock absorber)
196 ..Friction (e.g., "snubber")
197 ...Including flexible strap connector
198 ....Strap forms friction element
199 ....Flat spiral spring
200 ...Having lubricating feature
201 ...Elastomeric spring or friction element
202 ....And helical coil spring
203 .....Plural coil springs
204 ...Friction surface on helical spring
205 ...Including cam or wedge friction element or actuator therefor
206 ....Helical cam surface
207 ....Plural axially spaced expandable friction rings
208 ....Including relatively rotating friction surfaces (e.g., drum type)
209 ....Including helical coil spring
210 .....Transversely oriented coil biasing friction surfaces
211 .....Plural laterally spaced coils (e.g., spring group)
212 .....Nested coil springs
213 ......Inside friction shell
214 ...Friction surface formed on or biased by additional spring
215 ....Relatively rotating friction surfaces (e.g., drum type)
216 ...Coil spring for biasing vehicle parts and friction surfaces
217 ..Fluid retarder
218 ...With separate pump or adjustment for spring loading
219 ...Elastomeric spring
220 ....Mounted at end of retarder
221 ...Helical coil spring
222 ....Quadrilateral suspension
223 ....And rocking actuator arm or rotary fluid displacement member
224 .....Plural mechanical springs for biasing vehicle parts
225 ....Plural mechanical springs for biasing vehicle parts
226 ....Spring within coaxial fluid chamber
227 ...Leaf spring
228 .Lever and nontorsion spring
229 ..Leaf spring
230 ...Quadrilateral suspension
231 ...And coil spring
232 ....And roller
233 ....And "overload" bumper
234 ....Including adjustment for spring loading
235 .....Adjusting screw coaxial with coil spring
236 ....Plural coils between vertically spaced leaf springs
237 ....Plural coaxial coils
238 .....Nested coils
239 ....Having leaf-end-connecting lever
240 .....Coil spring between lever and vehicle part
241 ...And fluid pressure spring
242 ...Including adjustment for spring loading
243 ...And roller or bearing to accommodate deflection of spring
244 ...Vertically spaced leaf springs (e.g., elliptic)
245 ...Having serially pivoted levers at end of spring
246 ...Transverse leaf spring
247 ...Center acting or resiliently biased lever
248 ..Coil spring

	VEHICLE
	.Lever and nontorsion spring
	..Coil spring
249	...Enclosed spring
250	....Plural coaxial coils in enclosure
251	...Plural nontorsion coil springs
252	....Coaxial
253	....Differentially deflected by lever
254	...Quadrilateral suspension
255	...Including adjustment for spring loading
256	..Fluid spring
257	..Elastomeric spring
258	...Annular or spherical
259	.Compound
23	..Leaf, coil, and fluid pressure
24	..Leaf, fluid pressure and liquid
25	..Leaf and torsion
26	...Torsion coil
27	....Leaf-end-connecting
28	..Leaf and coil
29	...Leaf-end-connecting
30	..Leaf and rubber type
31	..Leaf and fluid pressure
32	...Leaf-end-connecting
33	..Coil and rubber type
34	..Coil and fluid pressure
35	..Rubber type and fluid pressure
36.1	.Leaf
37.1	..And covering
37.2	...Spiral or elastic covering
37.3	...Three serially arranged metallic segments
37.4	...Having lubricant reservoir or pad
38	..Twin, axle interposed
39	..Side bar
40	..Longitudinal
41	..Cantilever
42	..Elliptic
43	..Elliptic and leaf
44	..Semielliptic
45	..Semielliptic and leaf
46	...End-to-end connected
47	..Structure
48	...Auxiliary tensioning elements
49	...Antifriction
50	...Lubrication
51	..Broken-spring supports
52	..Intermediate supports
53	..Clips
260	..Having specific end connection
261	...For elliptic spring
262	...Sliding
263	...Including spring for biasing pivotal connection
264	...Including threaded or grooved bearing surface
265	...Including spring position adjustment or geared connection
266	...Universal joint
267	...Having rolling antifriction elements (e.g., ball bearing)
268	...Having lubrication feature
269	...Including elastomeric material
270	....Including tapered bushing or inner and outer sleeve for cylindrical bushing
271	...Including shackle pivoted to spring and to vehicle
272	.Flat spiral
273	.Torsion
274	..Quadrilateral suspension
275	..Helical torsion coil
276	..And separate elastomeric member (e.g., bushing)
277	..And adjustment for varying spring loading
278	...Screw threaded adjustment
279	..Elastomeric torsion spring
280	...Plural axially spaced elastomeric elements
281	...And attached inner and outer metallic sleeves
282	....Plural concentric elastomeric rings
283	..Multilayer leaf
284	..And housing enclosing spring
285	..Plural torsion springs
286	.Coil
287	..Having stiffener
288	..Conical
289	..Plural coils
290	...Nested
291	...Having guide rods extending through coils
292	.Elastomeric
293	..Including central guide rod or tube through spring
294	..Having rigid spacer plate between plural elastomeric segments
64.11	.Comprising compressible fluid
64.12	..Having lockable strut
64.13	..Including compressible liquid
64.14	..Including chamber at sub-atmospheric pressure
64.15	..With retarder
64.16	...Leveling device
64.17	....Self-pumping
64.18	....Having metering pin for varying spring rate
64.19	....Having flexible wall
64.21	.....Including rolling lobe between telescoping members
64.22	...Having metering pin for varying spring rate
64.23	...Having flexible wall
64.24	....Including rolling lobe between telescoping members
64.25	...Having plural compressible fluid springs
64.26	...Having telescoping cylinders
64.27	..Having flexible wall
64.28	..Including means for charging or discharging spring
66	.Braces
67	..Yielding
68	..Sliding
69	ELASTIC EXTENSION DEVICES
70	.Compression spring
71	..Single
72	...Drawbars inclosed
73	.Tension spring
74	..Single
75	RECIPROCATING-BED-CUSHIONING DEVICES

128	...Rigid-material-spring impelled
129	...Seal
130	PRESS CUSHION
131	SEAT SUPPORT
132	.Velocipede or motorcycle
133	.Flexural
134	FRICTION SNUBBER

	FRICTION SNUBBER
135	.Snubbed coil spring or ring pack
136	RESILIENT SHOCK OR VIBRATION ABSORBER
137	.Tool movement dampening
138	.Draft gear
139	.Bumper
140	..Rubber
140.1	.Including additional energy absorbing means or feature, e.g., friction, fluid, etc.
140.2	.Variably preloaded
140.3	.Having diverse resilient element
140.4	..Metallic and nonmetallic
140.5	.Diverse resistance to vibration along different axes
141	.Nonmetallic, resilient element
141.1	..Plural resilient elements with rigid spacer
141.2	..Confined between coaxial, vibrating annular members
141.3	...Including radial contact surface, e.g., tapered or shouldered member
141.4	....Annular flange or collar embedded in resilient element
141.5	.....Flanged or collared innermost member
141.6	....Collapsible wall
141.7	....Arcuate or tapered contact surface
142	CUSHION FOR HUMAN COMFORT

CLASS 269 WORK HOLDERS

DECEMBER 1990

1	HAND MANEUVERED OR WORK SUPPORTED TOOL GUIDES
2	.Relatively movable jaws
3	OPERATOR SUPPORTED
4	.Convertible to bench supported
5	.With opening through handle for work supply
6	.Handle manipulation for jaw actuation
7	SOLIDIFICATION OF WORK CONTACTING MEDIUM
8	MAGNETIC HOLDER
9	PLURAL SELECTIVELY USED HOLDERS
10	.Work stop abutment
11	WITH HOLDER ILLUMINATING MEANS
12	WITH DRY RUN WORK DRIVING MEANS
322	SURGICAL SUPPORT
323	.Tilting
324	..Sectional
325	...With means to tilt sections relatively
326	...Rack and pawl maintain sections in adjusted position
327	.With drain
328	.Body member rest or restrainer
13	WITH PRODUCT DISCHARGE FACILITATOR
14	.Product mover
15	WITH CATCH PAN
16	WITH PART OR TOOL HOLDING RECEPTACLE
17	WITH GROUND TRAVERSING MEANS
19	WITH PLUMB INDICATOR
20	WITH FLUID MEANS
21	.Vacuum-type holding means
22	.With movable diaphragm
23	.With safety means
24	.Plural positioning means sequentially operated
25	.Cylinder-piston means directly moves jaw(s)
26	..With equalized pressure on plural (nonopposed) jaws
27	.Cylinder-piston means in series with additional positioning means
28	..With separate air means in series with liquid means
29	..Including self-contained manual pump means
30	..With common fluid means for holding and releasing
31	...Cylinder-piston unit rotatably and/or pivotally mounted
32	..Mechanical means between fluid means and jaw
33	...Including opposed cylinder-piston means
34	...Single fluid unit moves plural spaced jaws
35	.With guide means
36	FENCE BOARD HOLDER AND GAUGE
37	PLURAL HOLDERS TO HOLD WORKPIECES RELATIVE TO EACH OTHER
38	.Fletching jig (i.e., arrow feathering holder)
40	.Fixed work-contacting portions for each holder
41	.Workpieces normal to each other (e.g., miter clamps)
42	..Means for simultaneous actuation of holders
43	.Workpieces parallel to each other (e.g., box-shook clamp)
44	..Three holders
45	.With means to relatively array or arrange holders
46	SUSPENDED HOLDER
47	HOLDER INSERTED WITHIN WORK APERTURE
48	.With tool couple element
48.1	.Expandable mandrel
48.2	..Plural pin man
48.3	...Having inter
48.4	....And coil spring
49	.Inserted holder movable relative to work backup
50	.Holder mounted for movement
51	..Compound or plural movement
52	.Within concentric opening
53	PIN-TYPE HOLDER
54	.With work-overlying clamp
54.1	.With means to drive pin into work
54.2	..Including opposed coacting pins
54.3	...Three or more pins
54.4	.With work-underlying support
54.5	..Pin perpendicularly extended
55	HOLDER MOUNTED FOR MOVEMENT
56	.Relative to a station
57	..Rotary (e.g., dial type)
58	.Including means to shift holder position
59	..With means to lock shift means
60	..Screw means
61	..Gear means
62	..Treadle means
63	.With indexing steps
64	..Corrugated
65	..Threaded
66	..Cam or eccentric means
67	..Pin-rack
68	..Pawl-rack
69	..Peg-hole
70	...With bias means
71	.With plural means for changing holder positions
72	..Single lock for plural means
73	..Means for dual position only
74	.Means for position lock
75	..For universal joint
76	..Set screw type
77	..Periphery clamp type
78	...Split ring type
79	..Effective on a movable brace
80	..For yoke type
81	..Of holder to table (i.e., reference base or wall)
82	..Plane bearing surfaces clamped together
83	...Radial bearing surface type
84	....Central clamp
85	....Plural clamps
86	RELATIVELY MOVABLE JAWS
87	.With tool couple element
87.1	..With guide means
87.2	...Slot type
87.3	...Hole type
88	.Convertible to other type or form of holder
89	.Jaw actuation locks holder position relative to base
90	.With separate means to lock jaw(s) after actuation
91	.Clamp couple element with fastening means
92	..With plural actuating means
93	..Responsive to element actuating means
94	..Rocking-element type
95	.With means to fasten holder to support (e.g., portable)
96	..Wrench or plier type of work holder
97	..Clamp type fastening means
98	...Unitary fastener-jaw and holder-jaw
99	..Socket type fastening means
100	...Aperture in support
101	..Threaded fastening means
102	..Nail or spur fastening means
103	.For cable about thimble (e.g., rigger's vise)

RELATIVELY MOVABLE JAWS
.Plural jaw pairs, angularly oriented, for common work
105 ..Three jaw couples in three nonparallel planes
106 ...With actuating means for each couple
107 ..Interrelated actuating means
108 ...Constricting loop common to plural jaw pairs
109 ...Four relatively movable corner-angled jaws
110 ..One actuated jaw carries a second actuated jaw
111 ..Quadrilateral frame type
112 ...Diagonally moved jaw
113 ...Plural actuating means for one side
114 ....Plural actuators on each of two sides
115 ...Actuator located at corner
116 ....Actuators at diagonal corners
117 .....Actuator at each corner
118 ...Actuated jaw couples perpendicularly related
119 ....Actuator for each side
120 ...One couple adjusted and one couple actuated
121 ...Adjustment means intermediate ends of side
122 ...Adjustment means including attached wedge means
123 ....Wedge means attached by chain
124 ...Adjustment means at diagonal corners
125 ....Adjustment means at four corners
126 .Including pivoted yoke frame jaw carrier
127 ..With specific latch means
128 ...Latch means includes jaw actuating element(s)
129 ..With jaw actuating means intermediate yoke legs
130 .Including constrictable loop (strand or articulated) jaw
131 ..Flaccid loop
132 ..With means to actuate a coacting jaw
133 .Weight of a vertically disposed panel actuates jaws
134 .With means for "hold-down" component of force
135 ..With rockable work contacting member
136 ..Moved by linearly acting jaw
137 ..Inclined actuator and/or jaw travel
138 ..With wedge or cam means
139 .With means to align coacting jaw faces
140 .With separate positioning means for each of jaw pair
141 ..Adjustable positioning only
142 ..Separate means to actuate each of a jaw pair
143 ...Portable C-clamp type
145 ...Same actuator type for each jaw
146 ..Means to both actuate and adjust the same jaw
147 ..Portable straight beam type
148 ...Plural parallel beams
149 ...Extensible beam
150 ...Pivoted jaw actuator means
151 .With means to orient actuating force on jaws
152 .Plural jaw pairs
153 ..With common actuating means
154 ..One jaw common to plural coacting jaws
155 ..Acting in intersecting planes
156 .Three coacting work grippers
157 .With means to bias jaw(s) toward nonholding position
161 ..Leaf spring between pivoted jaws
162 ..Spring coil around or abutting cam or cam follower
163 ..With articulated attachment or insert for jaws
164 .With means for lateral adjustment of jaw portions
165 .Means for direct manual adjustment of jaw(s)
166 ..With cant type adjustment lock
167 ...Including separate cant member
168 ....Means for skewing plural members to actuate jaw(s)
169 ....Plus additional means to release cant lock
170 .....With means to bias member into locked position
171 ...Including interlocking abutting surfaces
171.5 ...With tooth-like surface engaging a planar surface
172 ..With relative axial shift of screw-nut actuating means
173 ...Split nut type
174 ....With separate means for lateral motion of segments
175 .....Including weight biased lever
176 .....Common to spaced parallel screw means
177 .....Control travels with screw
178 ....With screw mounted means for lateral segment motion
179 ...With longitudinally rockable actuating screw
180 ....Direct hand tilt
181 ...Half nut type
182 ....With separate means for lateral nut-screw motion
183 .....With pedal means
184 ...Interrupted thread type
185 ....Antipodal screw thread sectors
186 ....Rack-like nut thread sector
187 ....With continuous screw thread
188 ..With common means to both lock and actuate jaw(s)
189 ...Screw-nut type
190 ....With wedge means in the lock mechanism
191 .....Roll or ball gripping element
192 .....With pawl-rack immobilization means
193 ......Pivotal or rockable pawl
194 ....Pawl-rack adjustment lock
195 .....To immobilize nut
196 ...Cam or eccentric type
197 ....Plural cams in series
198 ....Cam in series with diverse actuator
199 ....Plural cam surfaces
200 ....Including radial face and/or axial follower feature(s)
201 ...Toggle type
202 ...Rack-pinion sector
203 ..With clamp (or friction) type adjustment-lock
204 ...Pivoted eccentric for applying lock
205 ...Plus additional means to release lock
206 ...Deformable elastic plug gripping element
207 ..With detent type adjustment-lock
208 ...Peg-hole
209 ....For pivoted jaw
210 ...Movable rack
211 ...Pin-rack
212 ...Pawl-rack
213 ....Detent positionable by rocking of screw actuator

	RELATIVELY MOVABLE JAWS
216	.Means to actuate jaw(s) (i.e., apply holding force)
217	..Work camming or wedging action type
218	..With common means for each of coacting jaws
219	...Spaced parallel screw means
220	....With specific means for angular positioning of jaws
221	..Plural means for one jaw
222	...Plural intergeared screw-nut actuating means
223	...Including means to move nut
224	..With yieldable means in actuation train
225	..Gear type
226	...Worm
227	...Rack and pinion
228	..Toggle type
229	..Cam, eccentric or wedge type
230	...With position latch
231	...Cam surface is jaw face
232	...Including radial face and/or axial follower feature
233	...Including cam slot or groove
234	...Slidable wedge
235	...Eccentric cylinder or disc
236	...Cam on end pivoted hand lever
237	..For pivoted jaw(s)
238	...First class lever action type
239	...Third class lever action type
240	..Screw-nut type
241	...Differentially threaded
242	...Right and left threaded
243	...Rotating nut means
244	...Screw held at ends for rotation only
245	...With means for relative rotation of elements
246	...Screw travels with jaw
247	....Screw within traveling box-beam guide
248	....With separable or replaceable nut means
249	....C-clamp type
250	....Means to keep faces parallel and/or translate jaw
251	.....Flange and/or slot
252	.....Traveling means parallel to screw
253	......Plural traveling elements coplanar with screw
254 R	..Bias type (e.g., weight, spring, resilience)
254 DF	....Dental flask
254 D	....Drawing board
254 CS	....Coil spring
254 MW	....Movable weighted member
256	.With paralleling mechanism for jaws
257	.Jaw features
258	..Angularly alignable
259	...Attachments and/or inserts
260	....With hook type fastener means
261	....With socket type fastener means
262	....With threaded type fastener means
263	....With yieldable type fastener means
264	....Loosely positioned between coacting jaws
265	..Plural spaced work contacting portions
266	...Settable elements conformable to work contour
267	...With pressure equalizing means
268	...Angular and/or curved jaw face
269	...Opposed jaw faces diversely shaped
270	....Complementary to work configuration
271	..Attachment(s) and/or insert(s)
272	...Interdigitated
273	...Named material
276	...With magnetic fastening means
277	...Coacting elements loosely positioned between jaws
278	....Elements jointed by a pivot or link
279	...Selective
280	....By substitution
281	.....With yieldable type fastener means
282	.....With threaded type fastener means
283	.....With socket type fastener means
284	.....With detent type fastener means
285	.Specific means for wear, strain, protection, assembly
286	.Specific material(s) used for holder
287	HOLDER ENCLOSES WORK
288	.With tool couple element
289 R	WORK-UNDERLYING SUPPORT
289 MR	..Movable roller
290	.With tool couple element
291	..With work-stop abutment
292	..Element projectable through support
293	..In support surface
294	...Cylindrical element
295	...Guiding slot for horizontally moving tool
296	.Gapped support
297	..With movable work-stop abutment
298	...Abutment movable in gap
299	....Plural separately mounted slidable abutments
300	....With abutment position indicator
301	....With abutment lock
302	..Enclosed gap
302.1	.Mixing or kneading board
303	.With work-stop abutment
304	..Attached to movable support portion
305	..Multiple direction restrainer
306	..Suspended abutment
307	.With sight gage
308	.With work supply supporting means
309	.Support mounting means
310	..Support resiliently urged upwardly
311	..Means to hold plural support blocks
312	...By through rod
313	....Blocks enclosed by holder
314	...Blocks enclosed by holder
315	WORK-STOP ABUTMENT
316	.Vertically compressible abutment
317	.Resiliently urged abutment
318	.Abutment mounted between spaced parallel arms
319	.Plural spaced abutment surfaces
320	.With motor drive abutment moving means

38	..Cylinder collecting
39	.Zigzag package
40	..Longitudinal web folding
41	.Longitudinal web folding
42	..Cylinder collecting, with sheet folding
43	.Web associating, with cylinder collecting
44	..Additional-sheet associating
45	.Sheet associating
46	..Stop sheet
47	..Cylinder collecting
48	...Additional-sheet associating
49	....Revolving pivotal folding blade
50	...Revolving pivotal folding blade
51	..Additional-sheet associating
52	ASSOCIATING OR DISASSOCIATING
52.5	.Web disassociating
53	.Stapling or stitching
54	.Signature gatherers
55	..Insetting
56	..Interrupter
57	.Insetting
58	.Sheet associating
59	..Stop sheet
60	..Cylinder collecting
95	..Placing sheets in column and inserting marker sheets to indicate number of sheets in column

CLASS 271 SHEET FEEDING OR DELIVERING

DECEMBER 1990

1 SPECIAL ARTICLES
2 .Envelope
3 FEEDING AND DELIVERING
3.1 .Delivering to stack and feeding therefrom
4 .Separators and conveyors
5 ..Pneumatic separator
6 ..Continuous endless conveyor
7 .Continuous endless conveyors
8.1 FEEDING
9 .Multiple supply
10 .Separators and conveyors
11 ..Pneumatic separator
12 ...Endless conveyor
13 ....Side aligner
14 ...Reciprocating conveyor
15 ...Side aligner
16 ..Buckling separator and endless conveyor
17 ...Side aligner
18 .Separators
18.1 ..Magnetic or electrostatic
18.2 ...Cyclicly moving
18.3 ..Surface-piercing element(s)
19 ..Buckling
20 ...Pneumatic
21 ...Rotary
22 ....Pack advancer
23 ....Bottom feed
24 ...Pack advancer
25 ....Feeler control
90 ..Pneumatic
91 ...Plural, relatively-moving suction members
92 ....Laterally receding members (e.g., for tautening sheet laterally)
93 ....Including members for separating and members for forwarding sheet
94 ...Unidirectionally-moving suction member or surface
95 ....Having additional movement
96 ....With means to adjust suction
97 ...Sheet removal by pressurized gas
98 ....And suction means
99 ...Suction member acting on bottom of pack
100 ....Oscillating member bending margin of bottom sheet
101 .....With moving segments supporting remainder of pack
102 ....Suction member reciprocating perpendicularly to sheet
103 ...Sheet-moving action of suction member results from engagement with sheet
104 ...With means to restrain feed of next sheet
105 ...Means effecting preliminary operation on sheets in pack
106 ....Suction member flexing sheet or portion
107 ...Oscillating suction member
108 ...Controlled by valve means
30.1 ...Pack advancer
31 ....Feeler control
31.1 ....Stack on edge
33 ..Adhesive
34 ..Endless belt
35 ...Bottom feed
109 ..Rotary
37 ...Preliminary protrusion
38 ....Feeler control
110 ...Control of separator responsive to sensing of sheet
111 ....Including plural separators or plural sensors
112 ...Suction assisted
113 ...Separator rotating in plane of foremost sheet
114 ...Variably or intermittently driven
115 ....In oscillatory movement
116 ....By over-running one-way drive
117 ...Separator adjustable or retractable relative to pack
118 ....Feed by successive approach and retraction
119 ...Separator having non-uniform periphery
120 ....Including relatively movable elements
121 ...With means to restrain feed of next sheet
122 ....By restrainer having rearwardly moving surface
123 ....By restrainer acting on rear end of sheet
124 ....By adjustable restrainer
125 .....Including restraining roller
126 ...With means to urge pack toward separator
127 ....Including pivoted pack holder
42 ..Reciprocating
128 ...With pack advancer
129 ....With sheet on edge
130 ....And feeler control for advancer
131 ...Bottom feed
132 ....Suction assisted
133 ....With means to prepare pack or bottom sheet for feeding
134 .....By relief of pack weight
135 .....By partial planar movement of bottom sheet
136 ....With means to skip or stop feed
137 ....With means to restrain feed of next sheet
138 .....By adjustable exit or throat
139 ....By pusher reciprocating variably or non-rectilinearly
140 .....Orbital (e.g., four-way) motion of pusher
141 ....By pin (e.g., pointed) pusher
142 ....By adjustable (e.g., for sheet thickness) pusher
143 ....By self-aligning (e.g., yieldable) pushers
144 ....Holder adjustable to size of sheet
225 .By means to change direction of sheet travel
226 .With means to align sheet
227 ..Responsive to sheet-sensor
228 ...To control gripper-couple moving sheet to alignment
229 ..With means to retard sheet before alignment
230 ...By member moved with sheet
231 ....Including suction retarder
232 ..Against aligner entering hole in sheet
233 ..Against rear-edge aligner
234 ..Against plural aligning assemblages
235 ...For incremental travel against successive front-edge aligners
236 ...For front and side alignment of sheet
237 ....Alignment of imbricated sheets
238 ....Including oppositely-disposed side-edge aligners
239 ...Plural aligners selectively used
240 ...Oppositely-disposed side-edge aligners
241 ..By aligning a sheet-holder and its sheets
242 ..Against temporarily-stopped conveyer
243 ..Against front-edge aligner moved in direction of sheet travel
244 ...By retro-moving front-edge aligner
245 ..Against front-edge aligner interposed into sheet path

	FEEDING
	.With means to align sheet
	..Against front-edge aligner interposed into sheet path
246	...Synchronized with intermittently-active conveyor-couple
247	....Including sheet-margin gripper
248	..Against aligner adjacent side edge of sheet
249	...By shifting aligner and gripper-couple laterally of sheet travel
250	...By means to shift sheet laterally against aligner
251	....By oblique conveyor
252	....By gripper-couple pulling sheet laterally
253	..With means to adjust position of aligner
254	...During operation of feeder
255	...With indicator of aligner position
256	.With means to interrupt feeding
257	..Manually controlled (e.g., for alternate-cycle feed)
258	..Responsive to sheet-sensor
259	...Plural sensors
260	....Pneumatic sensors (e.g., to sense superposed sheets)
261	....Laterally spaced sensors (e.g., to sense misalignment)
262	...Excess-thickness sensor
263	....To activate an electric circuit
264	.By means to convey sheet (e.g., from pack to operation)
265	..Responsive to sheet-sensor
266	..With intermittent movement of the sheet
267	..On oscillating or reciprocating conveyor
268	...Including gripper-couple
269	...Including rear-edge pusher
270	..With means to vary speed of conveyor sheet
271	..By rear-edge pusher
272	..Between superposed conveyor couple
273	...Having means to permit separation of couple
274	....Including couple-elements resiliently urged together
275	..On peripheral face of drum or belt
276	...Including pneumatic means
277	...Including gripper-couple
145	.Pack holders
146	..With means to vibrate pack
147	..Advancer
148	...With means to move portions of advancer unequally (e.g., for unequal-thickness sheets)
149	...For on-edge or imbricated sheets
150	....Supported by moving conveyor belt
151	.....For imbricated sheets
152	...Control of advancer responsive to sensing of foremost sheet
153	....Sensor included in feed mechanism
154	....Sensor activates electric or fluidic circuit
155	.....Controlled electric or fluidic motor actuates advancer
156	....Controlled pawl and ratchet actuates advancer
157	...With means to replenish pack or retract advancer platform
158	....Using plural platforms during continuous operation of feeder
159	.....And plural drives for plural platforms
160	...Urged by spring or weight
161	..With means to bow sheets
162	..Holder movable relative to feed position
163	...Holder convertible from feed to delivery
164	...Holder moved parallel to plane of sheets
165	..For feed from bottom of pack
166	...With means to relieve weight of pack
167	..With means to restrain feed of next sheet
168	...By sheet-impaling restrainer
169	...By lateral margin or side-edge restrainer
170	....Corner snubber
171	..Holder adjustable to size of sheet
278	DELIVERING
279	.Multiple discharge
280	..For separating sheet from moving assemblage of sheets
281	...By separating member moving in direction opposite of assemblage
282	...By sheet attracting means
283	....Pneumatic attracting means
284	.....Opposed pneumatic attracting means
285	...With leading edges of sheets offset
286	....With means to cause offset
287	..Of successive sheets to plural receivers in succession
288	...With control means to vary mode of operation
289	....To bypass array of receivers
290	.....To route sheets to subsequent array of receivers
291	...With selective actuation of means for inverting duplex sheets
292	...With movable receivers or receiver portions
293	....With means to increase spacing between receiver defining portions
294	....Receivers moving into registry with delivery zone
295	.....Receivers arranged in rotary array
296	...By diverter or conveyor moving past receivers
297	...By individual diverter for each receiver
298	..With means to program discharge destination
299	..To laterally spaced receivers
300	..By release from conveyor at plural locations
301	..Selectively to recirculating path or exit
302	..By conveyor section movable to direct sheets along alternate paths
303	..With movable diverter
304	...Bidirectionally rotating diverter roller
305	...Individual diverter for each receiver
65	.Optional face or back
66	..Endless conveyors to flies
67	.Endless conveyors to curtains
69	.Endless conveyors to other conveyors
70	..To flies
72	.Rotary conveyors to flies
73	.Curtains
306	.With transfer means between conveyor and receiver
307	..Means to strip sheets from engagement with moving conveyor
308	...Stripper cyclically movable between stripping and nonstripping position
309	...By air blast
310	...By means to attract sheet from conveyor
311	...Stripper normally in contact with conveyor surface

DELIVERING
.With transfer means between conveyor and receiver
..Means to strip sheets from engagement with moving conveyor
312 ...Stripper normally in spaced relation to conveyor surface
313 ....With means to maintain constant spacing of movable stripper
175 ..Means to drape sheets over horizontal bar
176 ..Responsive to delivered sheet
177 ..Means to push sheets out of edgewise into broadside movement (e.g., packer)
178 ...Rotating packer
179 ....Screw or helix
180 ...By reciprocating or oscillating packer
181 ....Packing sheets on-edge into receiver
182 ..Means to retard sheets
183 ...By suction retarder
184 ..Means to change orientation or direction of sheets during delivery
185 ...Orientation-changing means
186 ....Sheet inverting means
187 ....By rotating circumferential-pocket members
188 ..Means to bow sheets during delivery
189 ..Means temporarily interposed between conveyor and receiver
190 ...Transversely-disposed, gapped sheet-supports on endless carrier
191 ...Endless belt on reciprocating carrier
192 ...Counter-rotating supports for lateral margins
193 .By electrostatic or magnetic conveyor
194 .By pneumatic conveyor
195 ..Using pressaurized gas
196 ..Unidirectionally-moving suction member or surface
197 ...Including endless-belt conveyor and suction chamber
198 .By endless conveyor
199 ..Operation controlled by delivered sheet
200 ..With delivery end movably relative to pack receiver
201 ...Moving away from increasing delivered pack
202 ..With means to vary speed of sheets on conveyor(s)
203 ...By cyclicly varying conveyor speed
204 ..Suspension gripper
205 ...For lateral margins of conveyed sheet
206 ...With means to adjust gripper
314 .Rotary conveyor
315 ..With circumferential pocket members
81 ..Traveling
82 ..Suspension gripper
83 ..Flies
84 .Reciprocating conveyors
85 ..Suspension gripper
207 .To receiver for pack of sheets
208 ..With means to discharge static electricity
209 ..With means to bow sheets
210 ..With means to vibrate receiver
211 ..With air cushion between sheet and pack
212 ..For receiving sheets from below the pack
213 ..With movable sheet-surface support
214 ...Receding from delivery zone (e.g., retractor)
215 ....Responsive to increase
216 ....Conveyor-receiver for imbricated sheets
217 ....Lowering as pack-height increases
218 .....With auxiliary support for part of pile
219 .....Spring-loaded support
220 ..With movable pack-limiting member(s) (e.g., hold-down)
221 ...And means to move members cyclicly against sheet edges (e.g., jogger)
222 ....And yieldable connection in moving means
223 ...Members adjustable to sheet size
224 ....Sheet-impact bumper member

8.5	..By transparent reflector
9	..Stage
10	...Special projected picture or light effects
11	...Settings
12	....Rapid movement
13	...Mirror
14	...Sound imitation
15	...Rain, snow and fire
16	..Trip simulation
17	...In passenger-carrying devices
18	....With projected picture scenery
19	..Maze or labyrinth
20	..Pyrotechnic display
21	.Stage appliances
22	..Shifting scenery
23	...Guides, braces and clips
24	..Aerial suspension devices
25	..Properties
26	...Stage tanks
27 R	.Initiating devices
27 B	...Blowing and cards
27 W	...Pins and water jets
27 N	...Novelties
28 R	.Roundabouts
28 S	...Vertical shaft mounting
29	..Combined with transporting vehicle
30	..Combined seesaw
31 R	..Toy
31 A	....Aircraft
31 B	....Helicopter
31 P	....Phonograph driven
32	..Marine
33 R	..Occupant propelled
33 A	....Bowl shape
33 B	....Bicycle type
34	..Auto-propelled carriages
35	..Free carriage
36	..Vertical and horizontal axes
37	..Plural vertical axes
38	..Plural horizontal axes
39	..Vertical axis only
40	...Suspended vehicle or rider support
41	....Circular swings
42	....With rotating platform
43	...Rotating vehicle or rider support and stationary track or platform
44	....Vertically undulating track or platform
45	....Horizontally undulating track or platform
46	...Rotating disk, ring or bowl
47	....Concentric rings or disks
48	....With vehicle or rider supports
49	..Horizontal axis only
50	..Gyrating axis
51	..Inclined axis
52	.Hobby horses
52.5	..Combined or convertible
53.1	..With actuating means
53.2	..With movable elements
54	.Seesaws
55	..One person

56.5 R	.Slides
56.5 SS	...Ski slopes
85	.Swings
86	..Motor operated
87	..Hand and foot operator
88	..Hand operator
89	...Horizontally reciprocating
90	...Cable grasp
91	....Pulley mounted
92	..Foot operator with separate suspender
93	EXERCISING EQUIPMENT
94	.For head (e.g., jaws, neck, etc.) or foot
95	..Face (e.g., jaws, lips, etc.)
96	..Foot
97	.For simulating skiing
98	.For thrusting a simulated weapon (e.g., fencing foil, etc.)
99	.For improving user's respiratory function
100	.For track or field sports
101	..For jumping, vaulting or hurdling
102	...Cross-bar or support therefor (e.g., hurdle, etc.)
103	....Means to facilitate adjustment of cross-bar height
104	...Vaulting pole or stop therefor
105	..Starting block for track runner
106	..For throwing (e.g., javelin, hammer, etc.)
107	...Discus
108	...Shot put
109	.Gymnastic
61	..Trapezes and rings
62	..Horizontal bars
63	...Parallel bars
64	..Vaulting horses
65	..Projectors
66	...Spring boards
110	..Swinging tower or pole
111	..Balancing bar or rope
112	..For hanging or climbing by the arms
113	..Playground climber (e.g., for use by children)
67	.Hand and wrist
68	..Grips
69	.Tread mill
70	.Walking or skating
70.1	..Stilts
70.2	...Steps
70.3	..Occupant propelled frame
70.4	...Armpit engaging
71	.Swimming
72	.Rowing
73	.Bicycle
74	.Skipping
75	..Ropes
76	.Striking
77	..Striking bags
78	...Supports
114	.For user locomotion (e.g., pogo stick, etc.)
115	..Translatable with user inside
116	.User-manipulated force-resisting mechanism or element
117	..User-manipulated weight
118	...Including guide for vertical array of weights
119	...Worn on user's body
120	...Utilizing user's body weight
121	...Part of user's body
122	...Dumbbell or barbell
123	....Barbell

EXERCISING EQUIPMENT
.User-manipulated force-resisting mechanism or element
..User-manipulated weight
124 ...Club
125 ..Isometric or isokinetic
126 ..Self-force resister
127 ...Rolled by or against user
128 ..Utilizing inertial force-resister
129 ..Utilizing electromagnetic force-resister or electrical control
130 ..Utilizing hydraulic or pneumatic force-resister
131 ..Utilizing frictional force-resister
132 ...Including rotating or arcuately-oscillating element
133 ...Including rope moving relative to surface of element
134 ..With common support frame for user's body and for force-resister
135 ..Utilizing resilient force-resister
136 ...Attached to static foundation
137 ...And user-supplied counter force
138 ....Against user-occupied platform
139 ....Attached to user
140 ...Torsion element
141 ...Linearly-compressed element
142 ...Extension element
143 ..User-interface element (e.g., handle, belt, etc.)
144 .Support for user's body (e.g., bench, slant-board, etc.)
145 ..And hold-down for user's feet
146 ..Swivelled foot-platform

195 B ....Tiltable platform
196 ...Tethered projectile
197 R ....Rotatable
197 A ......About horizontal axis
198 ....By flexible filament
199 R ..Projectile
199 A ....Flight restraining and guiding element included (e.g., parachutes, stabilizing fins, etc.)
200 R ...Tethered
200 A .....Slidable along a guide line
200 B .....No flexible cord
32.5 .Tee setting devices
33 .Tees
201 ..With ball feeding means
202 ..Adjustable height
203 ...Plural interchangeable or rearrangeable
204 ..Horizontally swingable
205 ..Of ribbon-like sheet material
206 ..Of wire
207 ..Tilt top
208 ..Tethered
209 ..Restrained by weight
210 ..Foldable blanks or assembled from blanks
211 ..Plural points in ball engaging surface
212 ..Diverse material head and shank
37 BOWLING
38 .Mechanically projected ball
39 .Changed or curved ball path
40 .Tethered bowling ball
41 .Special targets
42 R .Mechanical pin setters
42 A ...With pin lifter
43 R ..With mechanical pin gatherers
43 A ....With pin lifter
43 D ....Distributor
43 E ....Elevator
44 ..Tethered pin
45 ...Tethered to bed
46 .Pin spotters
47 .Ball return
48 ..Automatic
49 ..Mechanically operated
50 .Foul indicators
51 .Beds and gutters
52 ..Pin spots
53 ..Back stops
54 R .Accessories
54 A ...Pin sweeps
54 B ...Bowler worn or carried
54 C ...Computers and scorekeeping accessories
54 D ...Non-carried practice devices
54 E ...Pin detectors
55 R FOOTBALL
55 A ..Tackling dummies
55 B ..Kicking tees and kicking trainers
55 C ..Flag belts
55 D ..Goal post structure
56 CROQUET
57 .Tables and boards
58 R BALLS
58 A ..Solid and covered
58 B ..Hollow: single layer
58 BA ...Plural layer
58 C ..Tethered
58 D ..Skeleton
58 E ..Sounding
58 F ..Loose internal elements
58 G ..Including electrical components
58 H ..Liquid containing
58 J ..Rubber formulations
58 K ..Surface projections
59 R .Billiard and pool
59 A ...Materials
59 B ...Weights and indicators
60 R .Baseball
60 A ...Covers
60 B ...No windings
61 R .Tennis
61 A ...Ping-pong balls
61 B ...Fabrics, per se
61 C ...Rubber formulations
61 D ...Methods of pressurizing
62 .Golf
213 ..With alarm, location or indicator means
214 ..Center expanded or under compression
215 ...Injected expanded fluent material
216 ...Tensioned elastic windings
217 ..Mechanical bond between encompassing points
218 ..Unitary structure
219 ..Buoyant
220 ..Center
221 ...With air pockets
222 ...Wound
223 ....Spider or skeleton core
224 ....Exclusively
225 ....With diverse type layer
226 ....Plural windings
227 ....Rubber
228 ...Plural layer
229 ....Fibrous
230 ...Core
231 ....Liquid
232 ..Surface configurations
233 ..Cover
234 ...Reinforced
235 R ...Materials
235 A .....Paint
235 B .....Irradiated
63 R .Bowling
63 A ...Improved finger hole grips
63 B ...Means for changing finger hole location or size
63 C ...Indicia
63 D ...Tracking
63 E ...Weights
63 F ...Movable release element
63 G ...Polyester
64 ..Hand grips

	BALLS
65 R	.Football and basketball
65 A	...Closures
65 B	...Bladders
65 C	...Valves: composite
65 D	...Valves: rubber
65 E	...Casings
65 EA	....Non-ball art
65 EB	....Windings

65 ED	....Ball making methods
65 EE	....One-piece construction
65 EF	....Spiraling and electrical
65 EG	....Gripping structure
65 F	...Closure means
67 R	BATS, MALLETS, RACQUETES, CUES, PINS, AND BILLIES
67 A	..Hockey sticks
67 B	..Hand or foot attached
67 C	..Polo mallet
67 D	..Cricket bat
67 DA	...Handle structure
67 DB	...Grips, guards, and weights
67 DC	...Blade facings
68	.Billiard cues
69	..Mechanically operated
70	..Tips and tip fasteners
71	...Clamps and presses
72 R	.Baseball
72 A	...Metal shell
73 R	.Tennis
73 A	...Stringing devices
73 B	...Stretching devices
73 C	...Bow structure
73 D	...String fastener or guides
73 E	...Adjustable tension
73 F	...Laminated non-metallic
73 G	...Throat structure
73 H	...Metal
73 J	...Handle structure, per se
73 K	...Metal reinforced
73 L	...Replaceable string frame
74	..Presses and cases
75	..Handle grips
76	..Table
77 R	.Golf
77 A	...Club sets
162 R	..Combined
162 A	....Scorekeeping
162 B	....Leveling devices
162 C	....Tees
162 D	....Ball position markers
162 E	....Retriever clubs
162 F	....Other tool
163 R	...Ball and club alignment means
163 A	.....Alignment means on shaft
164	....Integral with club
81 R	..Handles and hand grips
81 A	....Weighted handle
81 B	....Longitudinal lines, flats, recesses, projections, etc.
81 C	....Rotatable
81 D	....Gripping attachment
165	...Removable grip positioner
166	...Player worn gripper
81.2	...Quick detachable or longitudinally adjustable
81.3	...Angularly related handle and club shaft axes
81.4	...Finger-conforming configurations
81.5	...Spiral windings
81.6	....With spiral grooves and/or elevations
79	..Adjustable ball engaging face
80 R	..Shafts and shaft fastenings
80 A	....Center of gravity
80 B	....Shaft flexibility
80 C	....Relation between shaft axis and head
80 D	....Telescopic
80.1	...Quick detachable or angularly adjustable head and shaft
80.2	...Head and shaft joints
80.3	....With common covering
80.4	....Cushioned interspace
80.5	....Shaft surrounding and hosel end abutting sleeve
80.6	....Deformed shaft wall
80.7	....Threaded shaft
80.8	....With core or plug
80.9	...Longitudinally seamed or sectioned shafts
167 R	..Heads
167 A	....Sole features
167 B	....Overspin
167 C	....Cylindrical or spherical
167 D	....Design and publications
167 E	....Reduced air resistance
167 F	....Weighing and balancing the head
167 G	....Relation between shaft axis and head
167 H	....Hollow
167 J	....Striking face
167 K	....Hosel-less
168	...Plural ball contacting faces
78	...Resilient faces
169	...With particular weight means
170	....Shifting weight during swing
171	....Adjustable by addition, subtraction or interchange
172	....By modification of sole plates
173	...Plates and inserts
174	....Ground engaging
175	...Non-planar ball contacting faces
82 R	.Bowling pins
82 A	...Metal core
82 B	...Base structure, per se
83	.Croquet

87 E	...Tiltable course
87 F	...Playing card
87 G	...Spinner
87 H	...Disc projectile
87.2	..Projector
87.4	...Manikin type
88	.Baseball
89	..Mechanically pitched and batted ball
90	..Manually batted ball
91	..Moving surface

SIMULATED GAMES
.Baseball
93 R ..With chance element
93 C ....With cards
94 .Football
310 LIGHT RAY PROJECTILE GAME
311 .Shoot-out or duel
312 .Moving target
313 SIMULATED PROJECTILE GAME OR ACCESSORY THEREFOR
314 .Having target or subtarget marker
315 .Having target deflector
316 .Having electrical contact coincidence detection of target position and projector aim position
317 AERIAL PROJECTILE, TARGET THEREFOR, OR ACCESSORY
318 .Combined projector and catcher
319 ..Tethered projectile
320 ...Pocketed catcher
321 ....Elastic tether
322 ..Separate entrance and exit (e.g., continuous orbit, etc.)
323 ..Pocketed projector and catcher
324 ...Mechanical projection
325 ...Pocket-to-pocket
326 ...Transversely extending pocket (e.g., lacrosse stick)
327 ..Impaling, hooking, or ensnaring type catcher
328 ..Pocketed catcher-separate projector
329 .Projectile tethered to hand-held, apertured manipulator
330 .Projectile flexibly tethered to hand-held manipulator
331 .Target and tethered projectile
332 ..Tethered ring
333 ..Having indicator or indication by movement of target
334 ...Elastic tether
335 ..Elastic tether
336 .Peg and ring game or pegged target therefor
337 ..With mechanical projector
338 ..Having plural pegs
339 ...Structurally different or nonparallel longitudinal axes
340 .Playing surface or projectile struck from below to project projectile
341 .Tipcat game, projectile therefor, or accessory
342 .Upwardly facing projectile-bounce surface
343 .Hooking or draping projectile and target therefor
344 .Projectile or target having suction cup
345 .Projectile or target having magnetized material for adherence therebetween
346 .Projectile or target having complementary bristled, micro-hooked, or looped material for adherence therebetween (e.g., VELCRO material, etc.)
347 .Projectile or target having complementary means for nonpenetrating adherence therebetween (e.g., tacky surface, etc.)
348 .Target
348.1 ..Including heating means (i.e., thermal target)
349 ..With liquid projector (e.g., water pistol)
350 ..Liquid buoyant
351 ..Game simulating aerial bombing of targets
352 ..SKEE-BALL game
353 ..Tiddlywink game
354 ..Having means to vary size of projectile-receiving target aperture or target opening
355 ..With support having both target and movable mechanical projector attached thereto
356 ...Projector universally pivots
357 ..With plural mechanical projectors
358 ..Projected picture
359 ..Moving
360 ...Airplane towed
361 ....Having target exchange, carrier, or storage means
362 ...Flying or moving freely through the air
363 ....Material dispensing or burning upon projectile impact
364 ....Having projector-engaging protrusion, notch, or recess means for enhancing projection of target
365 ....Reusable in whole or part
366 ...Along endless path
367 ....Target has additional motion while moving along path
368 ....Path is circular
369 ...Oscillating (e.g., pendulum motion) or reciprocating
370 ....Target has additional motion while oscillating or reciprocating
371 ..With electrically actuated or operated indicator
372 ...Indicator responsive to projectile produced sonic or shock wave
373 ...Penetrating projectile alters circuit condition of target formed of stacked, penetrable sheetlike conductors
374 ...Element moved by projectile impact to actuate circuitry
375 ....Element is pivoted
376 ....Coplanar elements
377 ...Spaced conductors bridged by nonpentrating projectile
378 ..Indication by movement of target or target having indicating means
379 ...Plural indicators sequentially released
380 ...Frangible or formed from a plurality of separable interconnected elements (e.g., explosion simulating)
381 ...Audible indication
382 ....Projectile passes through aperture to operate indicator
383 ...Having projectile-actuated means to free indicator for movement
384 ....Indicator is dumped or is projected into the air (e.g., return fire)
385 ....Gravity operated indicator
386 ...Target is moved or indicator is moved
387 ....Indicator is moved
388 .....Indicator is alternate target
389 .....Target is opening through which projectile passes to actuate indicator
390 ....Target pivots
391 .....Having restoring means
392 ......Automatic restoring
393 ....Target separates from support
394 ..Having means to deliver spent projectile to easily accessible location
395 ...Movable conveyor or reprojecting target
396 ...Projectile returned toward the projecting point
397 ....Runway extending between target area and projecting point

	AERIAL PROJECTILE, TARGET THEREFOR, OR ACCESSORY
	.Target
398	..Pocketed or apertured
399	...With mechanical projector
400	...Closed-back or closed-bottom pocket
401	....Entrance opening is formed in laterally extending surface
402	...Target is aperture dimensioned to allow projectile to pass entirely therethrough
403	..Penetrable target with replaceable element
404	..Penetrable target with projectile backstop
405	..With mechanical projector
406	..Handling or manipulation (e.g., target positioning means)
407	..Target support structure
408	..Target penetrated by projectile
409	..Printed matter
410	.Projectile backstop
411	.Playing field or court game; or accessory therefor (e.g., volleyball, soccer, etc.)
412	.User manipulated means for catching projectile moving through the air
413	.Tethered projectile
414	..Tethered to means engageable with human body part (e.g., hand-held means or means attachable to human body part)
415	.Scattershot projectile or beanbag projectile
416	.Arrow, dart, shuttlecock, or element thereof
417	..Shuttlecock
418	..Material dispensing upon impact or having fluid conducting means
419	..Head structure
420	...And vane structure (i.e., flight guiding or stabilizing means)
421	...Broadhead
422	....Interchangeable blade
423	..Vane structure (i.e., flight guiding or stabilizing means)
424	.Disc or ring projectile
425	..Ring
426	.Boomerang projectile
427	.Horseshoe projectile
428	.Nonspherical projectile
108	SURFACE PROJECTILE
109	.Moving surface
110	..Pivoted
111	..Pivoted gate
112	..Spiral surface
113	..Pocketed
114	...Mercury globule
115	...Surface pockets
116	....Hazard pockets
117	...Moving pockets
118 R	.Ball games
118 A	...Magnetic or electric
118 D	...Ball actuated element
119 R	..Combined with projector
119 A	....Electric or magnetic
119 B	....Fluid projector
120 R	...Gravity projectors
120 A	.....Electric or magnetic
121 R	...Return course
121 A	.....Electric or magnetic
121 B	.....Pachinko, i.e., nearly vertical playing surface
121 D	.....Ball supply means
121 E	.....Ball elevator
122 R	...Ball return
122 A	.....Electric or magnetic
123 R	..Pocketed
123 A	....Electric or magnetic
124 R	...Return course
124 A	.....Electric or magnetic
125 R	...Ball return
125 A	.....Electric or magnetic
126 R	.Disk or ring games
126 A	...Electric or magnetic
127 R	.Targets
127 A	...Fall apart targets
127 B	...Static, no ball return
127 C	...Ball return
127 D	...Target pivots about horizontal axis
128 R	.Projectiles
128 CS	...Curling stones
128 A	...Rollable
129 R	.Projectors
129 K	...Swung, carried by user
129 L	...Slid, carried by user
129 M	...Wheeled, carried by user
129 P	...Pinched or strand engaged
129 Q	...Gravity propelled
129 AP	...Air propelled
129 S	...Plunger, Mechanically or Electrically driven
129 T	...Plunger, Manual
129 V	...Pivoted, Mechanically or Electrically driven
129 W	...Pivoted, Manual
236	BOARD GAMES, PIECES OR BOARDS THEREFOR
237	.Electrical
238	..Removable and discrete game piece changes status of circuit
239	.Magnetic
240	.Markable or erasable game board or piece (e.g., magic slate)
241	.Having three-dimensional pattern
242	.Piece moves over board having pattern
243	..Chance device controls amount or directionof movement of piece
244	...Sports or outdoor recreational activities
245	....Golf
246	....Racing
247	....Football or soccer
248	...Race to a finish (e.g., backgammon)
249	....With common finish (e.g., parchisi)
250	.....Outer space or astronomy
251	.....Travel or exploration
252	....Travel or exploration
253	...Outer space or astronomy
254	...Travel or exploration (e.g., touring, treasure hunt, archeology)
255	...Military or naval engagement
256	...Property or commodity transactions
257	...Judicial, legislative, or election process
258	..Strategic race to a finish (e.g., Chinese checkers)
259	..Sports or outdoor recreational activities
260	..Chess or checker type
261	...Nonrectangular or extended pattern
262	..Military or naval engagement
263	..Chase type (e.g., fox and geese)
264	..Alignment games (e.g., morris, mill)
265	.Salvo type
266	.Nim type (i.e., game of take away)
267	.Completing square type
268	.Dice board and number plate type
269	.Lotto or bingo type
270	..With attached pieces
271	.Alignment games (e.g., tic-tac-toe, go-moko)
272	.Word, sentence, or equation forming (e.g.,SCRABBLE, hangman)
273	.Memory or matching games (e.g., concentrat

	BOARD GAMES, PIECES OR BOARDS THEREFOR
274	.Betting or wagering board (e.g., casino)
275	.Path forming
276	.Construction or assembly games
277	.Sports or outdoor recreational activities
278	.Property or commodity transaction (e.g., stock market)
279	.Judicial, legislative, or election process
280	.Rotatably mounted board
281	.Game board having movably attached piece
282	.Removably interfitting or detachably adhesive board and piece
283	.Game board having pattern separable into sections
284	.Game board having interchangeable, variable, or plural distinct playing patterns
285	.Collapsible board (e.g., folding)
286	..Flexible sheet type
287	.Game board structure
288	.Game piece
289	..With movably attached part
290	..Stackable or nestable feature
291	..Weighted or reversible (e.g., for different game)
138 R	CHANCE DEVICES
138 A	..Electric or magnetic
139	.Chance selection
140	..Fish ponds
141 R	.Rotating pointer
141 A	...Electric or magnetic
142 R	.Rotating disk
142 A	...Indicator: projected
142 B	...Indicator: electrical
142 C	...Indicator: optional
142 D	...Indicator: free element
142 E	...Ball indicator-pocketed disc
142 F	...Ball indicator-notched disc
142 G	...Ball indicator-stationary pocket
142 H	...Plural disc
142 HA	....Concentric
142 J	...Indexing
142 JA	....Pin and reed
142 JB	....Magnetic
142 JC	....Leaf spring and cog
142 JD	....Pivoted pawl
142 K	...Phonograph mounted
143 R	..Edge indication
143 A	....Rolling
143 B	....Movable web
143 C	....Indexing: magnetic
143 D	....Indexing: leaf spring
143 E	....Indexing: loose weight
144 R	.Lot mixers and dispensers
144 A	...Lot dispenser: mixing and dispensing
144 B	...Lot dispenser: mixing and showing
145 R	..Dice agitators
145 A	....Cup
145 B	....Chute
145 C	....Closed container
145 CA	.....Internal agitator
145 D	....Reciprocating floor
145 E	....Rotating table
146	.Dice
147	.Tops
292	CARD OR TILE GAMES, CARDS OR TILES THEREFOR
293	.Card or tile structure
294	..Playing surface having nonrectangular perimeter
295	..Material
296	.With functional back indicia
297	.Property or commodity transaction representation
298	.Sports or outdoor recreational activities
299	.Word, sentence, or equation forming
300	.With quotation thereon
301	.With musical indicia
302	.With educational data
303	.Suits
304	..With supplementary indicia
305	..Indexing
306	..With auxiliary or accessory card or tile
307	.Rearranged basic indicia
308	.With representations of persons or objects and names associated therewith
148 R	GAMES ACCESSORIES
148 A	..With card holders
148 B	..All video game accessories
309	.Game supporting tables or surfaces
149 R	.Card shufflers and dealers
149 P	...Devices for dealing predetermined hands
150	.Hand holders
151	..Duplicate games
153 R	PUZZLES
153 P	..Pyramid building
153 S	..Shifting movement
153 J	..Jumping movement
154	.Balancing ovoids
155	.Folding and relatively movable strips and disks
156	.Take-aparts and put-togethers
157 R	..Geometrical figures, pictures, and maps
157 A	....Transparent overlay

CLASS 277 JOINT PACKING

DECEMBER 1990

1	PROCESSES
2	WITH INDICATOR, SAMPLERS, OR INSPECTION MEANS
3	WITH MEANS FOR ESTABLISHING PRESSURE CONDITION WITHIN ASSEMBLY
4	PIPE OR PLATE ATTACHED PACKING BOX
5	WITH DISPARATE JOINT
6	.Interacting with packing
7	.Alternatively fixed or movable coaxial rods
8	.Antirotation coupling
9	WITH REPAIR OR ASSEMBLY MEANS
9.5	.Holding means functioning only during assembly or disassembly
10	.Handle
11	.Position or guide
12	STRUCTURAL INSTALLATION
13	CENTRIFUGAL LIQUID BARRIER
14 R	.Centrifugal cup or chamber
14 V	...Vertical shaft
15	WITH FLUID CIRCUIT
16	WITH ISOLATED FLOW PATH
17	WITH EXTERNAL FLUID RECEIVER
18	.With related receiver or director
19	.Surrounding rod
20	..Carried by removable end member
21	.Separably mounted on peripheral wall
22	WITH HEATER, HEAT EXCHANGER, OR HEAT TRANSMITTER
23	WITH FLUID SEPARATOR OR FORAMINOUS GUARD
24	WITH DEPOSIT REMOVAL
25	WITH CENTRIFUGAL FEATURE
26	TEMPERATURE RESPONSIVE

31	ROTATABLE PACKING FOR AXIALLY MOVABLE ROD
32	COMBINED OR CONVERTIBLE
33	AXIALLY BIASED ROD
34	INFLATABLE PACKING OR BIAS
34.3	.Toroid
34.6	.With internal fluid distributor
35	CARTRIDGE-TYPE SEALING UNIT
36	.Axially extensible housing
37	.With external seal
38	.Relatively rotatable radially contacting sealing members
39	..Within unit housing
40	...Axially biased translatable member
41	....Rotatable
42	..With connecting diaphragm
43	...Biased against housing
44	.Segmental packing
45	..With radial bias means between housing and packing
46	...Acting along intersecting radial lines
47	.Packing held between radial housing flange and separate retainer
48	..Resiliently biased against flange
49	...Rigidly secured bias means
50	.Packing held by recess in housing member
51	.Spaced packing retainers
52	.Packing reenforced at housing juncture
53	LABYRINTH
54	.Adjustable concentric member
55	.Plural opposed projections
56	..Interfitting or overlapping
57	...With axially directed projections or grooves
58	PLURAL DISTINCT PACKING ASSEMBLIES
59	.With interposed fluid receiver
60	.Packing chamber within follower
61	.Oppositely biased coaxial
62	..Interposed bias
63	.Asymmetrical mirror images
64	.Including manually adjustable packing box
65	.Including relatively rotatable, radially contacting sealing members
66	AXIALLY SEPARABLE PACKING BOX
67	IMPELLER WITH FLUID RECEIVER OR DIRECTOR
68	WITH FLUID DIRECTOR
69	.Nested with packing
70	WITH FLUID PORT
71	.Through seat or chamber wall
72 R	..With fluid line or connection
72 FM	....Fluent packing material
73	..With fluid piston
74	..Communicating with relatively movable sealing surfaces
75	..Connected port in packing member
76	...And bias member
77	..Extending through a follower
78	..In corner
79	..In peripheral wall
80	MAGNETIC
81 R	RELATIVELY ROTATABLE RADIALLY CONTACTING SEALING MEMBERS
81 P	..Rotary piston
81 S	..Segmental
82	.With diverse relatively movable sealing part
83	.Floating ring
84	.Radially acting bias
85	.With secondary packing and bias
86	..Member and secondary packing biased oppositely by common spring
87	..Member and radially contained secondary packing biased by common spring
88	.Flexible diaphragm between member and axially movable part
89	..Shaft attached
90	..Attached at radially spaced points
91	.Telescoping member and fixed shaft abutment
92	.Elastomeric backing far member
93 R	.Axially translatable member rotatable with shaft
93 SD	...Spring driven
94	.Radial groove or rabbet
95	.Flexible packing member
96	.Particular interface material and configuration
96.1	..Interface configuration
96.2	..Interface material
97	VIBRATING MOUNT OR PACKING MEMBERS
98	.Axially spring pressed
99	..Coaxial spring
100	.Arcuate bearing face
101	EXTERNALLY CLAMPED
102	RADIALLY CONTAINED PACKING WITH AXIALLY ACTING FOLLOWER
103	.Piston
104	.Sectional follower
105	.Bolted flange
106	..Spring biased flange
107	.With operating handle
108	.With tool engaging means
109	.Weight actuated
110	.Screw thimble
111	..With locking means
112	.Screw
113	.With operating mechanism
114	.Unidirectional movement
115	.Tapered follower or box
116	..Arcuate
116.2	.Axially related backup member radially actuated by movement of follower
116.4	.Telescoping actuator
116.6	..With inserted sleeve expander

RADIALLY CONTAINED PACKING WITH AXIALLY ACTING FOLLOWER
.Telescoping actuator
116.8 ..Deflected packing
117 .Wedging surfaces
118 ..Internal shell
119 ..Split or segmental packing
120 ...Expanding and contracting
121 ....Elastomeric
122 ...Contracting
123 .Plural packing elements
124 ..Nested
125 ..Diverse
126 EXTERNALLY OPERATED ADJUSTMENT
127 .Fluid motor
128 .Circumferential band
129 .Acting along radius
130 LATERAL ACCESS TO PACKING BOX
131 .With distinct closure
132 ..Packing attached
133 IMPELLER TYPE
134 .Axially acting
135 LIQUID BARRIER
136 WITH ANTIROTATION KEY OR ANCHOR
137 .Radial wall
138 WITH DISTINCT RADIALLY ACTING BIAS
139 .Unitary packing spacer and bias means
140 ..U-section
141 .Common bias for axially spaced packings
142 .With axially acting bias means
143 .With axial component
144 ..Complementary inclined surfaces
145 ...Transversely symmetrical
146 .With bias restrainer
147 .With adjustable loading means
148 .Individually biased segments
149 .Circumferentially spaced radially acting springs
150 ..With radial pin or socket
151 .Circumferential thrust
152 .Axial lip or boss
153 ..Exposed coil spring
154 .Interfitted segments
155 .With bridging segments
156 .Break joint
157 .Periphery engaging spring
158 ..Incompatible shapes
159 ...Radially extending tongues
160 ...Wave or undulate
161 ...Polygonal
162 ..Open-end
163 ..Spiral
164 .Embedded or enclosed spring
165 .Nonmetallic
166 ANCHOR EXTENDING THROUGH OR INTERFITTED WITH PACKING
167 HELICAL SEAT
167.3 SERIALLY ARRANGED, SEPARATELY SEATED OR ANCHORED PACKING MEMBERS
167.5 SINGLE SEAT FORMED BY OPPOSED RECESSES IN PLURAL MEMBERS
168 LATITUDINALLY STEPPED OR TAPERED SEAT
169 .Arcuate wall
170 .Oblique wall
171 ..Plural
172 ...Parallel
173 FLOATING PACKING MEMBER
174 .Radially translatable
175 ..Axially spring pressed
176 .Additional member
177 .Elastomeric
178 INTERFITTING WITH RADIALLY PROJECTING FLANGE
179 EMBEDDED REENFORCEMENT OPPOSING TAPERED MOUNTING SURFACE
180 WITH COMPRESSION STOP
181 PACKING ATTACHED RETAINER
182 .Peripheral shell
183 ..With radial mounting flange
184 ..Channel-shaped
185 .Plural at axially opposed ends
186 .Resilient
187 PACKING CHAMBER OR SEAT WITH SEPARABLE END WALL
188 R WITH AXIALLY RELATED BACKING OR RETAINING MEMBER
188 A ..With anti-extrusion rings
189 WITH ANCHOR OR RETAINER
189.5 COMPOSITE SEAT
190 WEDGING PORTIONS
191 .Enclosed
192 SEGMENTAL
193 .Axially related segments
194 ..L-shaped
195 ..With radially related segment
196 ..Coiled or corrugated segment
197 ..Diametrically opposed splits
198 .Concentric segments
199 .Interfitting segments
200 AXIALLY SPACED FLANGES WITH CORRUGATED CONNECTING WEB
201 ANNULUS WITH DUCT OR PASSAGEWAY
202 .Elongated
203 HELICAL
204 VOLUTE
205 FLEXIBLE U- OR V-CUP
206 R .Radially facing
206 A ...X-shape
207 R RIBBED CONTACT SURFACE
207 A ..Pipe joints or connections
208 .Axially spaced
209 ..Opposite surfaces
210 ...Line contact
211 .Opposite surfaces
212 R FLEXIBLE CUP OR FLANGE TYPE
212 C ..Flexible cup type
212 F ..Flange
212 FB ..Flexible boot
213 CORRUGATED CONTACT SURFACE
214 CIRCUMFERENTIAL GROOVE IN PERIPHERAL SURFACE
215 WITH SPACED POCKETS, GROOVES, OR RECESSES
216 SPLIT ANNULUS
217 .Variable radius
218 .With separate gap or bridging piece
219 ..End secured
220 .With joining structure
221 ..End-to-end tongue and slot
222 ..Beveled or arcuate mating surfaces
223 .With insert
224 ..Hard material
225 WITH INTERMEDIATE RADIAL PERIPHERAL FLANGE
226 FLUENT OR VACUUM CORE
227 COMPOSITE
228 .Elastomeric core
229 .Distinct sheath
230 ..Woven or braided strands
231 .Reentrant contact surface
232 ..Enclosing plural plies
233 .Plural planar or conical plies
234 ..Metal faced
235 R .Including metal
235 A ...Planar coating
235 B ...Engine gasket
236 METALLIC

1.5	WITH MEANS FOR ENGAGING BODY OF WALKING ATTENDANT
3	WHEELED PROPELLED
4	HOSE AND LADDER
830	TANK OR BOILER
7	.With tank leveling device
831	.Tank forms load support
832	.Insulated tank walls
833	.Saddle type; vehicle frame straddling
834	.Service tank
835	..Cycle type
836	.Ground engaging or rolling wheel type
837	.Semitrailer tank vehicle
838	.Tank truck
839	.Trailer tank vehicle
5.2	STEP OR ABUTMENT ASCENDING TYPE VEHICLE
5.22	.With endless track
5.24	.With skid or rollerway
5.26	.With spider-type engaging means
5.28	.Relatively movable running gear portions
5.3	.Jack-type attachment, i.e., elevating
5.32	.Fulcrum attachment
840	BODY-LEVELING DEVICES
6.1	.With ground engaging means moved vertically responsive to body level sensing means
6.11	.With ground engaging means interconnected for opposite vertical adjustment
6.12	.Using hydraulic motor
7.1	CONVERTIBLE, I.E., VELOCIPEDE TYPE
7.11	.To drop frame
7.12	.Wheel to or from runner
7.13	..Skates
7.14	..Substituted
7.15	.Occupant propelled
7.16	..To or from plural occupant
7.17	..To non-propelled
8	WHEELED AND RUNNER
9	.Retracting wheel or runner
10	..Wheel-runner type
11	..Pivoted lateral axis
841	SKATES
11.115	.With propulsion means driven by occupant
11.12	.Runner type
600	..Snow skates
601	..Skis
602	...With camber or flexibility control
603	...Knockdown, folding or collapsible
604	...With climbing or braking means
605	....Pivotally mounted brake member
606	...Steerable or with handle
607	...With foot supporting plate or portion
608	...With edge or guide strip
609	...With special shape, contour or groove
610	...Laminated or synthetic material
11.14	..With resiliently mounted foot supports
11.15	..Jointed runner and foot supports
11.16	..Extensible
11.17	..Tubular foot posts
11.18	..Runners
842	.Ski simulators
843	.Ball type roller skates
844	.Endless tread skates
11.19	.Wheeled skate
11.2	..With brake
11.21	..With retrogression preventers
11.22	..Tandem wheels
11.23	...Two-wheeled
11.24	..One-wheel
11.25	..Two-wheeled
11.26	..Extensible
11.27	..Trucks and mountings
11.28	...Resiliently yieldable
11.3	.Shoe attaching means
11.31	..Toe and/or heel clamps
11.32	...Screw actuated
11.33	...Lever actuated
11.34	....With screw adjustment
611	..Ski fasteners
612	...Magnetic
613	...Operating mechanism located in or under boot
614	...Cross-country to or from downhill
615	...Cross-country only
616	...Toe and heel fasteners interconnected for simultaneous operation
617	...Toe and heel fasteners mounted on common support plate or element
618	....Plate is movable or releasable from ski
619	...Heel cable and/or ankle strap type
620	....Attached to movable or releasable plate
621	....Cable tightening mechanism mounted on ski
622	....With means to separate cable or pull cable from boot
623	...Hold-downs or clamps
624	....Side or rear hold-down only, e.g., "Spademan" bindings
625	....Clamp comprises plural sole engaging members
626	....Pivotal about horizontal and/or vertical axis
627	.....With non-pivotal hold-down or clamp
628	.....Pivotable about both horizontal and vertical axis
629	.....Pivotable about vertical axis or axes
630	......Single fixed axes
631	.....Single, fixed, transverse horizontal axis
632	......With latch or catch means

	SKATES
	.Shoe attaching means
	..Ski fasteners
	...Hold-downs or clamps
633	....With adjustable or detachable support
634	....With specific detent, adjustment or tension structure
635	....Toe irons, i.e., side cheeks
636	...Sole supports and antifriction devices
637	...With runaway strap
11.36	..Ankle braces
809	SKI OR SKATE APPLIANCE OR ATTACHMENT
810	.Wind sail for propelling or braking skier or skater
811	.Ice or roller skate boot attachment (e.g., cover, protector, etc.)
812	.Seat supported by ski pole
813	.Ski or pole having means to scrape snow or ice from ski or boot
814	.Clamp, tie, or case for carrying or storage of skis
815	..Prevents warp, maintains camber, or conforms to ski shape
816	.Combined
817	.Anti-crossover for skis
818	.Having means interconnecting skis for training
819	.Ski pole
820	..Having means to interconnect with another pole
821	..Hand grip
822	...Having quick release means
823	..Adjustable length (e.g., retractable tip)
824	..Ring or basket
825	.Scabbards for ice or roller skates
826	.Riding stick
845	RUNNER VEHICLE
12.1	.With occupant propelled means
12.11	..Intermittent ground engaging
12.12	...Foot actuated
12.13	..Traction wheel drive
12.14	...Foot actuated
13	.Wheel runner
14	.Hub runner
14.1	.Skis converted to sled
14.2	.Standing occupant
14.3	..With steering handle
15	.Multiple sled
16	..Occupant steered
17	..Swivel and rocking
18	.Toboggan
18.1	..Bowl or saucer type
19	..Drag
19.1	.Shelter sled
20	.Folding
21.1	.Occupant steered
22	..Flexible runner
22.1	..Tiltable runner type
23.1	.Push
24	.With draft attachment
25	.Spring
26	.Rocker runner
27	.Knees
28	.Runner bases
28.11	.With brake
28.12	.Container type
28.13	.Logging type sled
28.14	.Central runner
28.15	..With auxiliary outrigger runner
28.16	.Auxiliary top, bottom or side runners
28.17	.Machinery sled
28.18	..Tank or vacuum cleaner
28.5	WHEEL SUBSTITUTE
29	WHEELED
200	.Occupant propelled type

201	..Combined with pump
202	..With carrier
203	...Sidecar type
204	...Trailing vehicle
205	..Single axis or wheel
206	...Occupant within wheel
207	....Epicyclic or squirrel cage type
208	....Dicycles
209	..Parallel connected cycles
210	..With propulsion means
211	...Steering by driving
212	...Added or stored energy device
213	....Sail attachments
214	....With occupant propulsion means
215	.....Interposed power storing device
216	......Fluid system
217	......Flywheel or weight
218	...Inching or step-by-step
219	...Intermittent ground engaging drive
220	...Movable occupant support
221	....Interconnected with propulsion means
222	.....Plural occupant propelled
223	.....With added power application
224	......Hand and foot
225	......Hand
226.1	.....Moveable seat
227	......And crank hanger
228	.....Treadmill type
229	....Eccentrically mounted wheels
230	...Plural power application
231	....Plural occupant propelled
232	.....Hand and foot
233	....Hand and foot
234	.....Interconnected steering means
235	.....Seat or body steered
236	...Reversing and power ratio change
237	....Reversing
238	....Shiftable clutch or gearing
239	...Three tandem wheels
240	...Interconnected steering means
241	...Intermittent gripped belt or chain
242.1	...Hand propelled
243	....Strap, drum and ratchet
244	....Oscillating lever
245	.....Rack and pinion
246	.....Linkage and ratchet
247	.....Linkage and crank
248	......With gearing
249	....Hand wheel or crack and gearing
250	.....Belt or chain
250.1	....Wheelchair type
251	...Strap, drum and ratchet
252	...Reciprocating power application
253	...Oscillating lever
254	....Rack and pinion
255	....Linkage and ratchet
256	....Linkage and crank
257	.....With gearing
258	....Ratchet and gearing
259	...Rotary crank power
260	....With gearing
261	.....Belt or chain
262	....With pitman
263	..With steering
264	...Combined with brake
265	...Foot steered
266	...Seat or body steered
267	...Two-wheel controlled
268	....Centering
269	....Stub axle
270	...One-wheel controlled
271	....Centering
272	....Checked
273	....Plural occupant
274	....Frames and running gear
275	.....Yielding
276	......Front forks and heads
277	.......Independent wheel mounting

	WHEELED
	.Occupant propelled type
	..With steering
	...One-wheel controlled
	....Frames and running gear
278	.....Extensible and knockdown
279	.....Front forks and heads
280	......Crowns
281.1	..Frames and running gear
282	...Polycycles
283	...Yielding
284	....Rear forks
285	.....Independent wheel mounting
286	....Independent wheel mounting
287	...Extensible and knockdown
288	...Rear forks
288.1	...Low profile
288.2	...Combined with body
288.3	...Hollow shell frames
288.4	..Attachments and accessories
290	...Occupant body harness
291	...Steps and foot rests
292	...Towing attachments
293	...Props and steadying devices
294	....Pedal attached
295	....Combined and/or convertible
296	.....With wheel or propulsion engaging means
297	.....With locking means
298	....Pivoted and extensible
299	.....U-frames
300	.....Plural leg
301	....Pivoted
302	.....U-frames
303	.....Plural leg
304	....Extensible or sliding
304.1	...Wheelchair
304.2	...Wheel driven
304.3	...Guards and reinforcements
304.4	....Occupant engaging
304.5	...Handling and carrying attachments
30	.Convertible
31	..Cradle or crib
32	..Skids
32.5	.With worker's support or shade
32.6	..Repairman's creepers
32.7	.Riding attachment
400	.Articulated vehicles
401	..Collapsible to superposed relation
402	..Single end suspension of transported vehicle
403	..With access between vehicles
404	..Load separately supported on plural units (e.g., pole carrying type)
405.1	..Load distribution adjustment
406.1	...Plural connections
406.2	....House trailer hitch type
407	...Adjustable connection to leading vehicle
407.1	...Semitrailer type
408	..With draft means at front and rear of same vehicle (e.g., vehicle train)
409	...For laterally offset vehicles
410	...Direct draft
411.1	..Multiple trailing vehicles
412	...Adjustable position
413	....Abreast
414.1	..Boat carrying type
414.2	...Temporarily attached wheel assembly
414.3	...Boat suspending means
414.5	..With actuator for moving trailing vehicle wheel vertically
415.1	..Convertible
416	...Animal and vehicle draft
416.1	...Convertible or interchangeable from one type coupling to another
416.2	....From three point hitch
416.3	....Male and female coupling member
417.1	....To or from gooseneck
418	...Two wheel and four wheel
418.1	...Semitrailer-type vehicle
419	..Interconnected steering of plural units
420	..Service connections
421	...Fluid
422	...Electric
423.1	..Semitrailer
424	...Passenger carrying type
425.1	...Coupling and uncoupling with facilitating lift means
425.2	....With additional detachable or shiftable gooseneck
426	...Steering by articulative movement
427	...Interrelated operation of coupling, landing gear and brake
428	....Interrelated brake and coupling
429	....Landing gear actuated by coupling action
430	.....Longitudinally movable trailer coupling
431	....Landing gear and coupling interlock
432	...Safety devices
433	...Fifth wheel only
434	....Self-coupling
435	.....Double pivoted jaws
436	......Urged to retaining position by draft
437	.....Transverse horizontal pivot retainer
438.1	....Moveably mounted
439	.....Resilient
440	......Rubber
441	......Slidably mounted
441.1	.....Turnable-type fifth wheel coupling
441.2	...Detachable or shiftable gooseneck type
442	..Wheel steering by articulative movement
443	...Stub axle
444	....Drawbar pivoting
445	.....With steering disabling means
446.1	..Condition responsive connections
447	...Freely laterally shiftable
448	...Reversal responsive articulation modification
449	...Overload release
450	....Notched bar and detent
451	....Frangible member (e.g., shear pin)
452	....Pivoted jaw or hook
453	.....Linear motion hook release
454	.....Double link retainer
455	.....Resilient keeper
455.1	...Antisway hitch
456.1	..Plural or laterally adjustable connections
457	...Auxiliary safety connection
458	...With crossed connections
459	...Auxiliary tracking connection
460.1	...Laterally spaced parallel connections
461.1	...Vertically spaced connections
462	...Angularly adjustable trailer tongue
463	....With actuator
464	.....Gearing
465	......Screw
466	......Belt and sprocket
467	...Laterally or angularly adjustable vehicles
468	....With actuator
469	.....Gearing
470	......Screw
471	......Belt and sprocket
472	..Laterally offset
473	...Side draft
474	..Selectively rigid or flexible
475	..With retractable ground support
476.1	..Wheeled draft connection

	WHEELED
	.Articulated vehicles
477	..Connection facilitating
478.1	...Draft element bodily shiftable
479.1	....With motor
479.2	....Telescoping drawbar swingable on horizontal guide
479.3	....Extensible swingable tow bar with coacting guide for centering
480	..Tow ropes, chains, etc.
480.1	...With particular storage for retracted position
481	..Pusher type
482	..Adjustable length draft devices
483	..Resilient
484	...Plural biased movements
485	....By single resilient element, e.g., rubber block type
486	...In line of draft
487	....To intermediate position
488	...About vertical pivot
489	...About horizontal transverse pivot
490.1	..Vertically adjustable
491.1	..Retractable, foldable or knockdown
491.2	...Telescoping
491.3	...Pivoting to nonuse position with single draft member
491.4	...With folding braces movable to collapsed position
491.5	...Readily demountable hitch
492	..Plural articulation axes
493	...Tow bar
494	....Horizontal pivot with vertical or universal pivots
495	..Vehicle mounting or clamp
496	...Forward of leading vehicle rear axle
497	...Vertically spaced connections of draft element to leading vehicle
498	...Pivoted
499	....Vertical pivot and spaced horizontal guide
500	...Modified bumper or non-coupling bumper clamp
501	....With other vehicle connection
502	....Bumper clamp
503	...Axle connection
504	..Coupling
505	...Bumper forms coupling element
506	...Rattle preventing
507	...Protector or lock
508	...Self-coupling
509	....Biased open
510	....Opened by opposite coupling part
511	...Ball and socket
512	....Pivoted jaw or retainer
513	....Reciprocating jaw or retainer
514	...Interlocked
515	...Draft pin
33.991	.Nesting vehicles
33.992	..Attachments or accessories
33.993	...Children's seat
33.994	...Brake or antitheft device
33.995	..With means facilitating unloading
33.996	..Pivoted load support
33.997	..Load supporting frame
33.998	..Vertically nestable or confined
638	.Extensible
35	..Article support
639	..Folding
640	...Casket or stretcher type
37	...Traveling case
38	...Pivoted wheel carrier
39	....Longitudinal axis
40	.....Two-wheel
641	....Transverse axis
642	.....Three- or four-wheeled chair, baby carriage, or stroller
643	......Convertible
644	......Body made of flexible material
645	.....One- or two-wheeled cart
646	......Laterally, inwardly collapsing wheels
42	...Lateral
647	...Wheeled chair, stroller, or baby carriage
648	....Convertible
649	....With pair of laterally spaced "x" members
650	....Chair or stroller for seated occupant
651	...Cart
652	....One- or two-wheeled
653	.....Wheelbarrow
654	.....Wheels attached to lower end of handle frame
655	.....Collapsible handle
655.1	...Handle only is collapsible
656	..Trailer
657	..Carriage for live occupant
658	...Child's carriage
659	..Hand cart of barrow
43	..Vertically adjustable wheels
46	...Tongue
47	...Wheel adjusted by its own power
43.1	...Tiltable vehicle stabilized by attendant or article
43.11	...Load surface below wheel axis
43.12	...Pallet truck type
43.13	...Interconnecting means for adjusting wheels on different axles
43.14	....With nonwheel means for engaging the supporting surface
43.15	.....With means to vary distance between wheels
43.16	....With means to vary distance between wheels
43.17	...With actuator
43.18	....With resilient mounting for body
43.19	....With flexible connection
43.2	....Screw-jack type
43.21	....Rack and pinion or ratchet type
43.22	....Translating motion
43.23	....Power operated
43.24	...With nonwheel means for engaging the supporting surface
87.01	.Coasters
87.021	..Occupant-pushed
87.03	...Yieldable
87.041	...Standing occupant
87.042	....Steered by tiltable platform (e.g. skateboard)
87.043	....Rear steering platform on coaster wagon
87.05	...Extensible or knockdown
87.051	...Baby walker
47.1	.Body rocking by wheel rotation
47.11	.Wheel steering by attendant
47.12	.Vehicles with rocker or fulcrum supports auxiliary to wheels
47.131	.Tiltable vehicles, stabilized by attendant or article
47.15	..Vehicle axle, shaft or spring engaging
47.16	..With auxiliary wheel stabilizing means at both ends
47.17	..Handle-propelled vehicles
47.18	...Convertible, selective, or changeable body
47.19	...Plural load supports
47.2	...With auxiliary wheel stabilizing means
47.21	...With shiftable main axle support
47.22	....Spring suspension
47.23	...Load base below wheel axis (e.g., drop body type)
47.24	...Laterally spaced wheels
47.25	....With occupant seat

	WHEELED
	.Tiltable vehicles, stabilized by attendant or article
	..Handle-propelled vehicles
	...Laterally spaced wheels
47.26	....With receptacle body
47.27	....With toe (e.g., warehouse truck)
47.28	.....With auxiliary toe or rack
47.29	.....Movable
47.3	...Single wheel vehicle
47.31	....With receptacle body (e.g., wheelbarrow)
47.315	...Adjustable handle
47.32	..Single wheel vehicle
47.33	..With leg supports
47.331	..Boat carrier
47.34	.Stable vehicles, handle-propelled
47.35	..Plural load supports
47.36	..Reversible handles
47.371	..Adjustable handle
47.38	..Occupant seating type (e.g., baby carriages)
47.39	...Reversible body
47.4	...Seat with back and/or foot rest
47.41	...Body movably supported relative to wheels
2	.Dropped bodies
62	.Three-wheel
63	.Two-wheel
64	..Adjusting wheels
65	..Spring
66	...Thill and axle connected
67	....Interposed spring
68	.....Body thill mounted
69	.....Body axle mounted
70	....Body thill mounted
71	.....Adjustable
72	....Body axle mounted
73	.....Adjustable
74	....Adjustable
75	...Thill and body connected
76	....Adjustable
77	...Adjustable
78	.One-wheel
79	.Spring
79.11	.Body with bracketed-type or nonsuspended axles (e.g. platform type)
79.2	..Receptacle or occupant seating body
79.3	..Rack-type body
79.4	..Wheel or tire support body
79.5	..Bucket or can support body
79.6	..Cylindrical object with elongated horizontal axis support body
79.7	..Vertically elongated rectangular object support body
80.1	.Running gear
81.1	..Multiple truck
81.5	...Occupant steered
81.6	...Self-steered trucks
82	..Tongue truck
83	...Vertically adjustable
84	...One-wheel
85	...Swinging axle and rocking
86	..Swivel truck
771	..Occupant steered
87.1	...Foot operated
87.2	...Outrigged wheel controlled
772	...With cornering tipping deterrent
773	...With manually powered hydraulic steering
774	...With remote position steering
775	...With adjustable steering wheel or column
776	...Including bias means maintaining steerable wheel and elongate surface engagement (e.g., furrow followers)
777	...Steering column or wheel movable in response to collision
778	...Plural steering hand grips or noncoaxial steering wheel and column
779	...With steering column mount or support
780	....Having nonrigid member
88	...Combined brake
89	...Checked
90	....Fluid
91	...Four-wheel controlled
92	...One-wheel controlled
93	...Stub axle
94	....Centering
95.1	....Link connected
96	.....Rotary shaft and gearing
846	.....Idler arm steering linkage
96.1	....Mounts
660	.....With suspension means
661	......With caster and/or camber adjustment
662	......Plural diverse springs
663	......Lever and spring
664	.......Torsion spring
665	........Stabilizer bar
666	.......Coil spring
667	........Coil located above upper lever arm
668	........Coil mounted on turnable strut, e.g., "Mac Pherson-type" suspension
669	......Leaf spring
670	......Coil spring
671	......Rubber spring
672	......Fluid spring
673	......With connection or element feature
674	.......Ball joint feature
675	.......Geometric feature
96.3	.....Pivot in wheel plane
97	...Swinging axle
98	..Short turn
99	...Four-wheel controlled
100	....Oppositely swinging axles
101	.....Pivoted and sliding reach
102	.....Crossed reaches
103	...Stub axle
104	..Equalized frame
676	...Tandem axles
677	....With walking beam
678	.....With fluid-type suspension
679	.....With torsion-type suspension
680	.....With leaf-type suspension
681	.....With rubber-type suspension
682	....With rocker
683	....With fluid-type suspension
684	....With torsion-type suspension
685	....With coil-type suspension
686	....With leaf-type suspension
687	....With rubber-type suspension
105	..Roller bearing frame
781	..Vehicle frame
782	...Forming fluid or electrical conduit means or having other means to accommodate the transmission of a force or signal
783	...Having storage compartment
784	...Having impact absorbing means
785	...Assembled from prefabricated connectable sections
786	...Single longitudinal beam type
787	....With spring suspension means
788	...With resilient means for suspension
789	...Trailer type
790	...Having vertically offset load bearing surface
791	...Pinched frame type
792	...Wide-hipped frame type
793	...X-frame type

	WHEELED
	.Running gear
	..Vehicle frame
	...X-frame type
794	....Tansverse frame members form "X"
795	...Transverse member is body support
796	...Having tubular transverse frame member
797	...Longitudinal frame member is box-shaped
798	...Longitudinal frame member is tubular
799	...Longitudinal frame member is an "T" beam
800	...Longitudinal frame member is channel-shaped
107	..With body or load retainers
108	..With tongue antivibrators
109	..Swinging axle and rocking
110	...Spring
111	..Rocking
112.1	...Spring
112.2	....Roll-responsive rocking axles for body banking
113	..Swinging axle
114	...Platform type
115	....Spring
116	...With draft attachment
117	...Offset pivot
118	....Spring
119	.....Longitudinal leaf
120	...Spring
121	....Leaf
122	.....Longitudinal
123	.....Cross
688	..Suspension means
689	...Anti-sway
690	...Independent
691	....Steerable
692	.....Plural diverse springs
693	.....Fluid
694	.....Leaf
695	.....Torsion
696	.....Coil
697	....Plural diverse springs
698	....Fluid
699	....Leaf
700	....Torsion
701	....Coil
702	...Fluid
703	....Anti-nose dive and/or squat systems
704	....Wheel raising
705	....Road arm
706	....Vacuum controls spring strength
707	....With electric control means
708	....Hydro-pneumatic
709	....Hydraulic
710	.....With non-fluid spring means
711	....Pneumatic
712	.....With nonfluid spring means
713	.....With lever stabilizer means
714	....With specific valve or valve arrangement
715	...Plural, diverse nonfluid springs
716	...Rubber
717	....Torsion
718	...Leaf
719	....Transverse
720	....Single leaf
721	...Torsion
722	....Coil
723	....Transverse
724	...Coil
725	....With lever stabilizer means
726	.....Transverse lever
125	..Swinging axle connections
126	...Rocking
127	....Platform types
128	.....Spring
129	....Spring
130	...Platform type
131	....Spring
132	...With draft attachment
133	...Offset pivot
134	....Spring
135	.....Longitudinal leaf
136	...Spring
137	....Longitudinal leaf
138	...Antirattlers
139	..Hounds
140	..Reaches
141	...Swivel
142	...Extensible
143	..Bolsters and standards
144	...Varying width adjustment
145	...Pivotally connected
146	...Vertically adjustable standard
147	...Readily removable standards
148	...Supplemental bolsters
149	..Irons and clips
149.1	..Interchangeable axles
149.2	..Longitudinally shiftable running gear
727	.Attachments
728	..Inflatable passenger restraints or confinements and attachments thereto
729	...Plural compartment confinement, e.g., "bag within a bag"
730	...Inflated confinement specifically positioned relative to occupant
731	...Deflated confinement located within or on steering column
732	...Deflated confinement located in or on instrument panel
733	...In the form of or used in conjunction with a belt or strap
734	...Responsive to vehicle condition
735	....Electric control and/or sensor means
736	...With source of inflation fluid and flow control means thereof
737	....With means to rupture or open fluid source
738	....With means to aspirate ambient air
739	....With confinement deflation means
740	....With means to diffuse inflation fluid
741	...Inflation fluid source
742	...Flow control means
743	...Confinement structure
801	..Safety belt or harness, e.g., lap belt or shoulder harness
802	...Passive restraint system
803	....Having belt retractor mounted on vehicle closure
804	....Having belt connected to member slidable in a vehicle-mounted track
805	...With energy absorber
806	...Inertia responsive locking or tightening of belt or harness
807	...Retractable
808	...Shoulder belt or harness
748	..Passenger safety guards
749	...Safety net, curtain, or transparent sheet
750	...Connected to the steering wheel or column
751	...Padded or cushioned member
752	....Instrument panel or dashboard
753	....Positionable by automatic actuator
754	..Vehicle spring jacking lock, between sprung and unsprung mass
755	..To prevent vehicle tip or tilt
756	..Roll bars and/or overhead guards
757	..Anti-skid or slide
758	...Shiftable-type anti-skid counter weights
759	...Static-type anti-skid counter weights

	WHEELED
	.Attachments
760	..Auxiliary platform or frame attachment for tractors
761	..Parking assisting devices, nonpowered
762	..Exterior
763.1	...Retractable prop, support or stabilizer
764.1	....With actuator for pivoted support
765.1	.....Having additional translating or telescoping movement
766.1	....With actuator for translating or telescoping support
767	...Auxiliary wheel
768	...Trailer skirts
769	...Article carriers
770	...For protecting the vehicle body
151	..Auxiliary load starters
847	..Dust and mud guards
152.05	...With wheel or tire carrying means
152.1	...Velocipede type
152.2	....Combined with wheel guards
152.3	....Flexible or sectional
848	...Body attached
153.5	....Joints welts

CLASS 285 PIPE JOINTS OR COUPLINGS

DECEMBER 1990

1 SAFETY RELEASE
2 .With frangible or deformable element
3 FRANGIBLE ELEMENT
4 .Score line or groove
5 IRRIGATION TYPE (GUIDE AND SUPPORT)
6 .Released by conduit motion
7 VACUUM CLEANER TYPE
8 FAUCET TYPE (E.G., SLIP-ON)
9.1 WITH MAGNETIC ELEMENT
9.2 CONTACT ONLY
10 LIQUID SEAL
11 .With relative motion
12 CONVERTIBLE
13 WITH LEAKAGE OR DRIP DISPOSAL
14 .Weep holes
15 REPAIR
16 .Removable wear element
17 ..Alternate wear parts
18 WITH ASSEMBLY MEANS OR FEATURE
19 .Spaced plates
20 ..Penetrating
21 .For molded joints
22 ..Spacing means (e.g., lugs)
23 .With holding means functioning only during transportation assembly or disassembly
24 .Guide and support
25 ..Plural noncommunicating (e.g., train pipe type)
26 ...With latch or lock
27 .Guide
28 ..Plural noncommunicating
29 ...With latch or lock
30 .Combined inlet and outlet
31 .Inserted section
32 ..Threaded telescopic
33 .Quick release
34 ..Radially moved segmented threads (e.g., chuck type)
35 ...Pivoted segments
36 .Attached thread-jamming preventer
37 .With winder for packing or clamp
38 .Handle or handwheel for rotary engagement
39 .Particular tool-engaging means or with tool
40 .Thread-cutting means
41 WITH HEATING OR COOLING
42 ROOF OR FLOOR DRAIN FLASHING TYPE
43 .Angled
44 ..Adjustable pitch
45 WITH CASING, LINING OR PROTECTOR
46 .Escutcheon type
47 .Insulated
48 ..Between serially connected parts
49 ...Intermediate resilient conduit (noise-dampener)
50 ...By intermediate joint
51 ....Ball and socket
52 ....Screw thimble
53 ...Sleeve
54 ...Socket
55 .Lined
56 WATER CLOSET TYPE, FLOOR-SUPPORTED
57 .Flexible diaphragm or bellows
58 .Intermediate coupling
59 ..Tapered spigot
60 .Tapered spigot
61 WITH SUPPORT
62 .Vehicle
63 ..Railway
64 .Static building construction
65 IDENTICAL HALVES (E.G., TRAIN LINE TYPE)
66 .With intermediate sleeve
67 .Side slide
68 .Transverse port
69 ..Auxiliary detent
70 .Longitudinal port
71 ..Pivoted hook or loop
72 ...Auxiliary detent
73 ..Integral hook
74 ...Oscillating engagement
75 ....Reciprocating conduit
76 ....Auxiliary detent
77 .....Reciprocating
78 ......Key or wedge
79 ...Auxiliary detent
80 WITH LOCK OR SEAL
81 WITH MEANS BLOCKING RELEASE OF HOLDING MEANS
82 .Auxiliary latch
83 ..Line pressure-responsive
84 ..Reciprocating
85 ...With manipulator
86 ...Locking sleeve
87 ..Pivoted
88 ...With manipulator
89 .Lock nut or washer
90 .Set screw
91 .Key or pin
92 .Thread lock
93 WITH INDICATOR, ALARM OR INSPECTION MEANS
94 WITH LUBRICATION
95 WITH FLUID PRESSURE SEAL
96 .With external pressure supply
97 ..Inflated member
98 .Swivel with flange in socket
99 .Coacting opposing duplicate
100 .With expansible chamber means
101 ..Piston-type reactor
102 ...With line pressure-responsive catch
103 ...Side slide
104 .With separate, encased pipe-gripping means
105 ..Packing-actuated
106 .Independent supply passage
107 .Expansible shank
108 .Separate retainer or positioner
109 .Expansible internal sleeve-type gasket
110 .Flexible lip
111 ..C-shaped section
112 ...Longitudinal web
113 .Wedged gasket
114 WITH STRAIN RELIEF
115 .Extension of socket or sleeve
116 ..Separable
117 WITH BROKEN PARTS RETAINER
118 KNUCKLE JOINT WITH ACTUATING MEANS
119 COMBINED
120 SYSTEMS
121 .With access opening
122 ..Swivel
123 ...With hollow center bolt
124 ..Detachable return bend
125 ...With yoke clamp
126 ....Removable bushing
127 ..Elbow
128 .Pipe or cable and box
129 ..With attached closure flange
130 .Receptacle inlet and outlet in unitary mounting
131 .Plural noncommunicating paths
132 ..With branched flow
133.1 ..Concentric
133.2 ...Having suspension means (e.g., oil well head type, etc.)
134 ...With relative motion (e.g., drier drum type)
135 ....Ball and socket
136 ..With relative motion
137.1 ..Parallel
137.2 ...Having suspension means (e.g., oil well head type, etc.)
138 .Inner to spaced outer tube coupling
139 ..Radially compressed packing

SYSTEMS
.Inner to spaced outer tube coupling
140 ..Suspended (e.g., oil well casing type)
141 ...Radially movable support ring (split ring type)
142 ...Inner tube coupling with integral support
143 ....With intermediate member
144 ...Slip anchored inner tube
145 ....With slip actuator
146 ....With unitary slip and packing assembly
147 ....With slip-compressed packing
148 ....With packing seat on slip
149 .Plural layer pipe
150 .Branched
151 ..With relative motion
152 ...Double Y-type
153 ..With vent
154 ...Antisiphon
155 ..Y-type
156 ..T-type
157 .U-type
158 .Pipe or rod-to-pipe-to-plate
159 ..Dependent coupling
160 ..Ball and socket
161 ..Plate clamped between internal nut and shoulder or flange
162 ..Expanding spigot engages plate
163 .Serial relatively movable joints
164 ..Diverse
165 ...With telescopic type
166 ..Plural ball and socket
167 ...With sphere intermediate two sockets
168 ..Plural swivel
169 .Serial diverse single flow path or line
170 ..Intermediate joint with expansible spigots
171 ..Compound (e.g., leak-gland type)
172 ...With molded joint
173 ..Diverse materials
174 ...Nonmetal to metal
175 ..Diverse coupling interfaces
176 ..Diverse size or shape
177 ...Reducer
178 ...Eccentric
179 ELBOW
180 .Cooperating saddle clamp
181 .Serially connected, adjustable
182 .Nesting parts
183 .Sheet metal
184 ADJUSTABLE ANGLE
185 .With center bolt
187 TEMPERATURE-RESPONSIVE
188 SIDE TO PIPE SIDE
189 END TO SIDE OR PLATE
190 .Swivel with lateral port to annular sleeve
191 .Bolt or hook in flow (e.g., center bolt)
192 .Penetrating (e.g., secant)
193 ..Fixture
194 ..Hole edge clamp
195 ...Transverse screw
196 .Expansible packing on spigot
197 .Saddle-type clamp
198 ..Yoke with radial screw at bight
199 ..Yoke with thread on free ends
200 .Flexible or yielding plate
201 .Sput
202 ..Interlocked
203 ...Plate edge locks sput
204 ...Packed
205 ..Clamped plate
206 ...Screw clamp
207 ....With conduit clamping means
208 ....Attachable from one side of plate
209 .....Lugged nipple
210 ......Movable lug
211 .Countersunk packed
212 ..Screw-compressed
213 .Gland
214 ..Internal with expanding means
215 ..External of conduit
216 ...Expansible
217 ....With conduit clamping means
218 .....Transverse screw
219 .Screw
220 ..With packing
221 ..Necked plate
222 .Expanded or swaged pipe
223 FLEXIBLE JOINT, RIGID MEMBERS
224 .Radial and longitudinal expansion compensators
225 .Diaphragm
226 .Bellows
227 ..Multiple
228 ...Balanced
229 ..Single fold type
230 .Concrete, clay, or masonry pipe
231 .Socketed packing type
232 ..With conduit gripping means (e.g., wedge ring)
233 ..Beaded conduit
234 ..Flared conduit
235 .Resilient sleeve type
236 ..Clamped
237 ..With spigot and socket ends
238 NONMETAL TO METAL
239 .Internal member (e.g., sleeve or nipple)
240 ..Flexible tip pipe
241 ...External clamp
242 ..External clamp or holder
243 ...Movable jaw
244 ...Spring
245 ...Screw-compressed
246 ....Thimble gland
247 ....Thimble
248 .....Separable means between hose and clamp
249 ......Wedge ring
250 ....Gland
251 ....Screw-fed hose
252 ...Band clamp with tightener
253 ....Bolted
254 ...Wrapped band
255 ...Wedge
256 ...Deformation
257 ....Bendable spur fingers
258 ....Expanding internal member
259 ...Particular surface
260 BOTH MEMBERS PLIABLE AND NONMETAL
261 BALL AND SOCKET
262 .With internal tie means
263 .Radially spaced spherical surfaces
264 .Oscillative
265 ..With gimbal ring
266 .Composite ball
267 .Spring-biased packing
268 .Spring-biased ball
269 ..Socketed spring
270 .With separate packing actuator
271 .With removable ball seat
272 SWIVEL
273 .Transverse cylinder in socket
274 .With yoke
275 .Pipe in socket type
276 ..With ball, ring or pin detent
277 ...With manipulator
278 ..With flange in socket
279 ...Spring-pressed flange
280 ...Flange locked axially
281 ....Packed
282 .With rotation limits
283 DETACHABLE HINGE

284	MOLDED JOINT
285	.With root repellent
286	.Weld
287	.Solder
288	.Composite pipe (ends)

40	.Net tension-operated
41	RELEASABLE UPRIGHT APRON
42	SCOOP TYPE
43	.Wheeled
44	.Hinged
45	..Folding
46	...Net roller
47	.Swing-link
48	PILOT TYPE
49	.Roller front
50	FOLDABLE SIDE WINGS
53	RAKE TOOTH
58	WHEEL TREAD
102	BUFFER OR BUMPER TYPE
103	.Having means maintaining bumper distance above road
104	.Vibration dampening type
105	.For use on two or three wheel cycle
106	.Having a storage compartment
107	.Having fluid means within impact means to absorb energy
108	..Bumper guard
109	..Foam filled impact means
110	..Compartmented impact means
111.1	.With vehicle jack
112	.With means to deflect projected road debris
113	.Having vehicle exhaust pipe receiving means or air scoop opening
114	.With outrigger means extendable laterally from bumper
115	.With grille or radiator guard
116	.Convertible
117	.Combined
118	.Shiftable between operative and inoperative positions other than by impact
119	.Horizontally movable to plural operative positions other than by impact
120	.Composite bumper
121	..Covered metal bar
122	..Hollow cylinder
123	.Vertically extending only
124	.Flexible cord or coil spring
125	.Having roller impact member
126	.Bumper extends along side of vehicle
127	..And completely encircles vehicle
128	..For side of vehicle only
129	.Vehicle suspension spring absorbs force exerted on bumper
130	.Single piece impact bar having plural loops in horizontal plane
131	.Bumper having lever and shock absorber mount
132	.Bumper having impact force absorbing means directly interposed between bumper and vehicle structure
133	..One-shot type
134	..Fluid shock absorber type
135	..Spring type
136	...Elastomeric
137	...Coil spring
138	.Bumper mounted on vehicle spring supporting frame member (i.e., spring horn)
139	..Sectional- or wing-type impact bar
140	..Vertically adjustable
141	.Bumper attached to vehicle mudguard
142	.Bumper guard
143	..Increases vertical area of bumper
144	...With horizontal member
145	...Spring or pivotally mounted
146	.Plural impact bars vertically spaced in impact plane
147	..Impact bars intersect in the impact plane
148	..Impact bars connected at center to support member
149	.Sectional- or wing-type impact bars
150	..End section pivotable upon impact
151	..Having means to interconnect sections
152	...Interconnect means lies in bumper impact plane
153	....Overlapping bar portions
154	.End connections
155	.Joints and connections

1.1 MISCELLANEOUS
1.2 CONTACT LENS APPLICATOR
1.3 SANITARY HANDLER FOR PET DROPPINGS
1.4 .Pole mounted
1.5 ..Catcher
2 MISCELLANEOUS COMPOUND IMPLEMENT
3 .Plier or tong type
3.5 MORTAR HAWK
3.6 ZIPPER PULLING TOOL
4 BARREL-ROLLER TYPE
5 EAR-CORN HOLDERS
5.5 ROD-TYPE SUPPORTS AND HANGERS
6 PLATE TURNERS
7 PANCAKE TURNER TYPE
8 .Special turning element
8.5 CLOTHES TONGS
8.6 CARPET STRETCHER
132 WIRE ENGAGING AND CLAMPING MEANS FOR USE WITH CABLE TYPE WIRE TENSIONING APPARATUS
133 .Wire engaging portion of means includes rotatable, generally circular disk or cylinder
134 .Including threaded tightener
135 .Including pivotally attached and hand engaged lever
136 ..Having curved, camming portrusion formed on lever
9 STOVE IMPLEMENTS
10 .Combined
11 .Fire tong
12 .Lid lifter
13 ..Pivoted jaw
14 .Poker
15 HAND BARS AND HAND BARROWS
16 .Opposing jaws
17 .Cant hook type
18 .Railway coupling tools
19.1 POLE MOUNTED IMPLEMENT
19.2 .Ball Retriever
19.3 .Grappling Gaff
22 .Store goods
23 ..Compound tool
23.5 .Laundry sticks
24 .Compound tool
25 HAND AND FINGER ATTACHMENTS
26 HAND-HOOK TYPE
26.5 DISCHARGING HAND RECEPTACLES, TRAYS OR CAGES
27.1 DETACHABLE PLATE AND RECEPTACLE LIFTER
28 .Pivoted graspers
29 ..Rim- and bottom-engaging
30 ..Axially extending handle
31.1 ..Rim gripping jaws
31.2 .Band type
32 .Bottom-engaging
33 .Resilient
34 .Sliding graspers
49 HAND FORKS AND SHOVELS
50 .Fork-tine shovel clearers
50.5 ..With grappling-type forks or shovels
50.6 .Grappling type
50.7 ..Annularly arranged
50.8 ..With movable cooperating load-engaging member
50.9 ...Fixed and movable members
51 .Convertible and combined
52 ..Fork and rake
53.5 .Pivoted and adjustable head
54.5 .Snow shovel
55 .Scoop
55.5 .Fork
56 .Edge guards
57 .Handles
58 ..Auxiliary
59 .Attachments
60 ..Foot pieces
61 SPEARS
62 BRICK CARRIERS
63.1 .Hoist-line frame
63.2 ..Expanding grapple, fluid pressure inflatable
64.1 VACUUM
64.2 .Venturi effect
64.3 .By positive fluid stream directed against article
65 .Frames
65.5 MAGNET
66.1 UNDERWATER IMPLEMENT
66.2 .With locating means
81.1 SPACING HOIST BAR OR FRAME
81.2 .Adjustable to accommodate different size loads
81.21 ..Telescopic
81.3 .With center of gravity adjustment
81.4 .With orienting means
81.41 ..Load engaging guide
81.5 .Load supporting units
81.51 ..Pivotal about horizontal axis
81.52 ..Rotatable about vertical axis
81.53 ...Twist lock
81.54 ..Horizontally slideable
81.55 ..Underlying load spanning support and sling
81.56 ..Hook
81.6 .Load gripping units
81.61 ..Pivoted gripping element
81.62 ..Slideable gripping element
68.1 HOISTABLE RECEPTACLE
68.2 .With discharge or loading means
68.21 ..Bottom or side discharge or loading
68.22 ...Bucket or bailer type
68.23 ....Twin bucket sectors (e.g., clamshell bucket)
68.24 ....Twin doors
68.25 ....Vertically sliding closure
68.26 ..Tilting discharge or loading
68.27 ...With trunnions
68.3 .Separable auxilliary hoisting means (e.g., sling, spreader frame)
67.1 HOISTLINE ATTACHED LOAD SUPPORTING FRAME
67.2 .L-frame
67.21 ..With center of gravity adjustment
67.22 ..With load retainer
67.3 .Load capturing supports
67.31 ..Pivotable about horizontal axis
67.32 ..Rotatable about vertical axis
67.33 ..Horizontally slideable
67.4 .Underlying load spanning support and sling
67.41 ..With load retainer
67.5 .Load leveling or shifting
74 HOIST-LINE SLINGS
75 .Latch release
76 ..Bottom
77 .Net
82.1 HOISTLINE OR GRAB HOOK
82.11 .Cable and hook tackle
82.12 ..With center of gravity adjustment
82.13 ..Opposed load grasping hooks
82.14 ..Choker type
82.15 .Driven positioning mean
82.16 .Resilient suspension means (e.g., spring or fluid)
82.17 .Locking device (i.e., hook throat closure)
82.18 ..Overlapping loop forming hooks
82.19 ..Locking arm swings in plane of hook
82.2 ...With pivoted latch
82.21 ...With sliding latch
82.22 ..Swivel locking arm
82.23 ..Slidable locking arm
82.24 .Load releasing means
82.25 ..Parachute release means
82.26 ..Store ejector (e.g., aircraft carried)
82.27 ..Boat detaching

	HOISTLINE OR GRAB HOOK
	.Load releasing means
82.28	..Plurality of balls
82.29	..Explosive release
82.3	..Motor operated
82.31	..Pivoted load support
82.32	...Plurality of similar coacting supports
82.33	...With pivoted latch
82.34	...With sliding latch
82.35	..Sliding load support
82.36	..Load ejecting
85	OVERHEAD BEAM HOOKS AND GRAPPLES
86.4	GRAPPLE
86.41	.Load shifting
86.42	.Interwoven contractable gripper (e.g., chinese fingers)
86.1	.Well type
86.11	..Basket-forming
86.12	..Combined insertable and surrounding grappling means
86.13	..With separate lateral positioning means
86.14	..With separate grapple-setting operator
86.15	...Fluid pressure operator
86.16	..With laterally movable grapple support
86.17	..With releasing means
86.18	...Excessive force-responsive
86.19	...Spring release means
86.2	...Grappling means latched in release position
86.21	....Lateral pocket and lug
86.22	...Screw-threaded
86.23	..With impact means
86.24	..Expanding grapple means
86.25	...Cammed grappling means
86.26	..Contracting grappling means (e.g., overshot)
86.27	...Inwardly biased grappling means with trip
86.28	...Outwardly biased grappling means
86.29	...Pivoted grappling means
86.3	...Cammed grappling means
86.31	....Inwardly biased grappling means
86.32	...Resilient grappling means
86.33	...Shoulder-engaging
86.34	..Including washover or cutover means
87.1	.Multiple grapples for multiple objects
87.11	..Confection stick handling (e.g., popsicle stick)
87.12	..Egg handler
87.2	..Groove- or shoulder-engaging type
87.22	...Pivoted jaws
87.24	....Link- or lever-operated
87.26	...Slidable jaws
87.28	...Rigid type
88	.Magnet- or piston-controlled
89	.Lewises
90	.Collar-engaging
91	..Rigid yoke
92	.Rigid gripper
93	.Expanding
94	..Cam-spread jaws
95	...Pivoted
96	...Slip wedge
97	..Pivoted
98	...Hayfork type
98.1	..Inflatable
99.1	.Resilient jaws
99.2	..Hand-held (e.g., tweezer, tongs)
100	..Separate sliding operator
101	.Pivoted cam and hook
102.1	.Socket and slip wedge
102.2	..Well pipe elevator
103.1	.Fixed and moveable jaw
103.2	..Coil gripper
104	..Pivoted jaw
105	...Hayfork type
106	.Pivoted jaws
107	..Hayfork type
108	...With auxiliary retainer
109	...Latched
110.1	..Automatic
110.2	...Cam and follower
111	..Separate cable operator
112	...Suspension
113	..Surrounding frame
114	...Opposing load-engaging cams
115	..Separate sliding operator
116	..Cam-operated
117	..Auxiliary operating handle
118	..Crossed levers
119	...Tandem tongs
119.1	.Slideable jaws
119.2	.Band type
119.3	.Inflatable
119.4	.Swing dampener
120	HAYFORK TYPE
121	.Corkscrew
122	.Single tilting fork
123	..With auxiliary retainer
124	..Latch release
125	.Combined harpoon and fork
126	.Harpoon
127	..Mechanically spread barbs
128	...Multiple
129	....Latch release
130	...Latch release
131	SHIELD DEVICES
137	ARTICLE CARRIER GRIPPED AND CARRIED BY HAND
138	.Including means to cover book or sheet
139	.Including support for optical instrument (e.g., camera holder)
140	.Carrier for person
141	.Convertible to, or useable as, different device or different type carrier
142	..Having means for supporting or mounting carrier
143	...Having plural receivers or supports for plural articles (e.g., rack)
144	...Tray
145	.Configured for complimentary projections on package or article
146	.Having plural diverse receivers or supports for diverse articles
147	..Including receiver or support for ski
148	.Including helical spring or elastic material for engaging or supporting article
149	.Having flaccid receiver, support or fastener for article
150	..Including means to tighten flaccid member about article
151	..Including rigid, semirigid or reinforced panel
152	..Having plural handles connected by flaccid receiver or support (e.g., sling)
153	..And rigid handle or bar
154	...Plural discrete flaccid supporting members suspended from handle or bar at spaced points
155	....And connected by cross-strap or brace (e.g., harness)
156	...Single web or strap (e.g., sling)
157	..Having parallel flaccid members forming article support
158	.Carrier component positioned in aperture in article
159	.Having plural discrete receivers or supports for spaced articles
160	..Separable supports
161	..Vertical array

ARTICLE CARRIER GRIPPED AND CARRIED BY HAND
.Having plural discrete receivers or supports for spaced articles
162 ..Having movably mounted or separable means to retain articles
163 ...Common to plural receivers or supports
164 .Article gripping or retaining means actuated by lifting carrier
165 .Including means to release article or to fasten carrier to or around article
166 ..Resiliently biased
167 .Support or receiver movably, removably, or adjustably mounted to handle or handle portion (e.g., collapsible)
168 ..Having slidable sections
169 ..Having pivoted sections
170 .Including handle having article or cord engaging means depending at each end
171 .Having cord or bail accommodating groove or passage along length of handle
172 .Tray

21	.Advertising and displaying
22	.Lunch wagons
156	.Camper
157	..Having boat carrying means
158	..Having vehicle carrying means
159	..Having tent means demountable therefrom
160	..Having tent solely supported by camper body roof
161	..Having tent having ground engaging means
162	..Having porch means
163	..Having canopy means
164	..Supported by self-propelled vehicle unit
165	...Expansible or collapsible vehicle body
166	...Having docking passage means between body and vehicle unit
167	...Having means to tie down body to vehicle unit
168	..Supported on a trailer-type vehicle unit
169	...Body having hinged side or end sections to support a bed
170	...Body having slidable bed support
171	...Body having telescopic sections
172	...Body being expansible from one configuration usable for camping to another configuration usable for camping
173	...Body being collapsible to a configuration nonusable for camping condition
174	..Body having hinged bed support
175	..Body having telescopic sections
176	..Body being expansible from one configuration usable for camping to another configuration usable for camping
24.1	.Enclosed compartment
24.2	..For an animal
25	.Dropped bottom
26	.Extensible
27	.Collapsible
177	.Vehicles simulating standard types of vehicles (e.g., ambulance, farm tractor, etc.) but reduced to a size upon which a child may ride
178	.Passenger bus body
179	..For transporting passengers to or from an aircraft
180	.Wagon or horse drawn vehicle
180.1	.With distinct wind deflector
180.2	..Mounted on pulling vehicle (e.g., tractor)
180.3	...Adjustable angle
180.4	..Mounted on towed vehicle
180.5	..Adjustable angle
181	.Trailer body
182	..Body platform
183	.Truck body
184	..Dump truck type
185	.Automobile body
186	..Nonenclosed type
187	.Body structural means
188	..For reinforcing or resisting deformation from impact
189	..Deformable to absorb the shock of impact
190	..Operator's cab
191	..Panel means
192	..Cowl
193	..Body section
194	...Body front
195	...Body rear
196	...Separable section
197	...Modular section
198	...Wheel housing or fender
199	..Scuff plate
200	..Clear view window means
201	..Window support means
202	..Door support means
203	..Body frame
204	...Under frame
205	...Made of tubular members
206	..Wind break securing means
207	..Door bumper
208	..Ducts or conduits
209	..Sill
29	..Corners and joints
30	...Metallic reinforcements
32	.Top boards
33	..Baffle
34	..Spacing devices
35.1	.Body securing device
35.2	..Having occupant safety feature, e.g., means to absorb collision impact
35.3	..Removable body
35.4	..Baby carriage, e.g., perambulator
36	.Top and side board securing devices
37.1	.Auxiliary article compartments
37.2	..Wheel or tire type
37.3	..Tire covers
37.4	..On child's vehicle body(e.g., carriage, etc.)
37.5	..Having foldable parts
37.6	..On truck-like vehicle
37.7	..At or on roof or roof-like panel
37.8	..Accessible from within passenger compartment
37.9	...For cigarette butt or ash
37.11	....With disposing
37.12	...On dash
37.13	...On door or side panel
37.14	...In or beneath floor level
37.15	...On or under seat
37.16	...At rear of seat
38	.Drip pans
39.1	.Lining
39.2	..Open truck bed
39.3	..Heat or sound insulating
40	.Ties
41	.Wear strips
42	.Stay irons
43	.Stakes and sockets
50	.End gates
51	..Combined types
52	..Vertically removable
53	..Rearwardly removable
55	...Pivotally connected sections
56	..Upwardly swinging
57.1	..Downwardly swinging
58	...Shovel, board type
59	....Readily removable
60	.....Box-engaging frames or clips

BODIES
.End gates
..Downwardly swinging
61 ...Combined loading chute
62 ...Combined steps
63 .Seats with body modifications
64 ..Seating arrangements
65.1 ..Shifting seat
66 ...Seat-forming body parts
67 ...Attached side panels
68 ...Door or end-gate operated
68.1 ...With safety feature
69 ..Seats convertible to other devices
146 .Doors and windows with specified vehicle feature
147 ..Converts body from open to closed type
148 ...Side closure panels removable
149 ...Closure receiving pockets on door and adjacent body section
150 ....Displaceable pillar intermediate closures in closed postion
151 ..Closure conforms to fender or running board
152 ..Closure mounted body accessory, e.g., visor, shield
153 ...Armrest or arm engaged protector pad
154 ...Fluid drain or deflector
155 ..Sliding closures on opposite sides of body
70 .Dashboards
71 ..Rails and handles
72 ..Securing devices
73 ...Pivoted
74 ..Extensions
75 .Foot rests
76 .Trunk lids
77 .Lap-robe holders and locks
77.1 .Storm-front shield, apron, or robe
78.1 ..Velocipede type
79 ..Top-supported windowed panels
80 ...Combined aprons
81 ..Robes
82 ..Aprons
83 ..Curtains
84.1 ..Windshield
85 ...Rear seat
86 ...Connected horizontally pivoted panels
87 ....Edge to edge
88 ....Link hinged
89 ...Vertically movable panels
90 ...Single panel
91 ...Deflected protecting air-currents
92 ...Hinges
93 ...Weatherstrips
95.1 ...Auxiliary protector
96 ....Pivoted panels
96.11 ...Auxiliary windscreen (e.g., vent window)
96.12 ...Full vision (i.e., wraparound)
96.13 ....Moveably mounted to provide access
96.14 ...Multiple layered with airspace therebetween
96.15 ...Cleaner
96.16 ....Rotating windshield
96.17 ....With specific motor mounting for cleaner
96.18 ...Clear vision slot
96.19 ...Glare reducing
96.2 ...Pivoted about horizontal axis
96.21 ...With specific support structure
96.22 ....Releasable upon impact
97.1 .Glare screen or visor
97.2 ..With specific structure or properties for diffusing or reflecting light
97.3 ...Apertured
97.4 ..With actuating means for moving
97.5 ..Combined or convertible
97.6 ..Having detachable auxiliary visor or glare screen cooperating therewith
97.7 ..Mounted or detachably supported on dashboard, steering column or windshield
97.8 ..Having foldable, extensible or rollable body
97.9 ..With specific mounting means therefor
97.11 ...Allowing slidable movement relative to support
97.12 ...For mounting to pivotable arm
97.13 ....Arm having specific pivot structure
97.21 .Baby carriage or child's wagon
97.22 .Access cover for gas tank filler pipe
97.23 .Floor mat with vehicle body feature
TOPS
98 .Roll-up covers
99.1 .Extension
100 .Load covers
101 ..Refuse
102 .Standing
103 ..Detachable limousine type
104 ..Space parallel bows
105 ...Collapsible
106 ..End gate
107 .Let-down type
108 ..Pivotally connected sections
109 ..Collapsible spaced parallel bows
110 ..Plural up position
111 ..Single bow group
112 ...Raising and lowering devices
113 ....Spring
114 ..Two bow groups
115 ...Raising and lowering devices
116 ..Outrigger type
117 ...Raising and lowering devices
118 ..Bows and slats
119 ...Irons
120.1 ..Brace
121 ..Joints and couplings
122 ...Brace and bow pivots
123 ..Shifting rails
124 ..Down supports
125 ...Prop-block cushions
126 ....Spring
127 ...Bow spacers
128 ...Clamping
129 ....With bow spacers
130 ....Strap
131 ...Top attached
132 ...Body and top attached
133 ....Spring
134 ...Spring
135 .Valance
136 .Dust covers
210 .Roof structure
211 ..Having sound absorbing, insulating, or light reflecting quality
212 ..Vacuum or air pressure applied to roof means
213 ..Having water drainage or guide means
214 ..Having headliner or liner support
215 ..Having light transmitting means
216 ..Roof panel movable to uncover passenger area
217 ...Having associated air deflector or guide
218 ...Panel removable from roof
219 ...Panel comprises hinged sections, or rollable or foldable material
220 ...Panels movable to overlaping or nested relation
221 ...Panel pivots upwardly to vent mode and moves downward before sliding to fully open mode
222 ...Panel slides with final closing motion having vertical component to attain closed and sealed condition

TOPS
.Roof structure
..Roof panel movable to uncover passenger area
223 ...Panel having drive or actuating means
224 ...Panel latch means
138 .Curtains
139 ..Door opened
140 ..Overhead storage
141 ...Rolled or folded
142 ..Vertical roller
143 ..Horizontal roller
144 ..Backstays
145 ..Windowed

1 SEATING DEVICE REORIENTS AS UNIT
2 .To expose nonoccupant support
3 .Inverting
4 PORTABLE BOTTOM WITH OCCUPANT ATTACHER
5 WITH OCCUPANT-PROPELLED WALKER OR SKATER FRAME
6 .Bottom movable to nonuse position
7 WITH REMOVABLE OR REORIENTABLE CRIB SIDE
8 .Fabric crib side
9 .Side added to front edge of bottom
10 .Side storable within or upon seating device
11 ..Within or upon armrest
12 ..Side withdrawn laterally of device
13 FOLDING BOTTOM PERMITS SEAT ROTATION ABOUT VERTICAL AXIS
14 BOTTOM AND BACK CONNECTED TO AND FOLDABLE IN WALL OR PARTITION
15 .In floor
16 COLLAPSIBLE CHAIR, I.E., RELATIVELY FOLDING BOTTOM, BACK AND LEGS
17 .Collapsed components form self-contained carrying case
18 .Nonpivoted crossed legs
19 .With means to hold chair in plural operative configurations
20 ..By adjustable leg-to-rocker connection
21 ..Set means operative between back post and rear leg
22 ...Back-to-leg prop
23 ....Single element forms back post and front leg
24 ..Set means interconnects front leg and rear leg
25 ...Brace or tie interconnection
26 ....Bottom forms or supported by tie
27 ..Set means include armrest
28 ...Rigid with armrest
29 .Journaled connections of parts permit occupant to change configuration
30 .With concurrently folding footrest
31 .Front leg folds relative to integral bottom-rear leg., e.g., beach type
32 .With folding rocker
33 ..Rocker disengages from leg to permit folding
34 .Rearwardly folding back
35 .With folding armrest
36 ..Laterally swinging
37 ...To overlie or underlie bottom
38 ..Slidably connected to chair component
39 ..Back, arm, bottom and front leg form collapsible parallelogram
40 ..Folds forwardly and downwardly
41 ..Pivoted to integral back and leg
42 .Laterally collapsible
43 ..Against fixed standard
44 ..Folding back or bottom sections
45 ..Fabric bottom and back
46 .Back and legs collapse concurrently
47 ..Parallel leg pairs
48 ..Back articulated to both leg pairs
49 ...Above and below bottom
50 ..Back-to-leg articulation above back-to-bottom articulation
51 .Back and legs collapse independently
52 ..Back pivoted to and abutting a leg
53 ..To overlie and underlie bottom
54 ...Noncrossed legs
55 .Relatively collapsible bottom, rear legs, and integral back and front legs
56 ..Crossed legs
57 ...Bottom detachably or slidably connected to back
58 ..Rear leg pivoted to back above bottom connection
59 .Relatively collapsible bottom, front legs, and integral back and rear legs
60 ..Upwardly tilting bottom elevates pivoted front legs
61 HEADREST INTERCONNECTED WITH BACK FOR RELATIVE CONCURRENT MOVEMENT
62 COMPONENT REORIENTABLE TO STACKED BUNKS
63 COMPONENT OF ADJACENT SEATS REORIENTABLE TO SINGLE BED
64 .Back pivots rearwardly between and coplanar with bottoms
65 ..Bottom moves horizontally responsive to reclining of back
66 ..Rear seat component supports reclined back
67 .Facing seats
68 LEGREST OR FOOTREST INTERCONNECTED TO MOVE RELATIVE TO BOTTOM AND CONCURRENT WITH BOTTOM OR BACK
69 .With means to permit independent adjustment of legrest or footrest
70 ..Footrest adjustable independently of leg-rest movement
71 .Common actuator controls vertical adjustment and relative movement of parts
72 .Back reversible as to bottom
73 ..Back movement disposes footrest for use from rear
74 ...Common rocker arm carries opposed footrest
75 .Relatively movable rest sections move simultaneously
76 ..Footrest extends angularly of depending legrest
77 .Face-to-face seats suspended to oscillate
78 .Interconnection inclused back-controlled movable armrest
79 ..Armrest linkage connected to legrest below legrest-to-bottom pivot
80 ..Armrest directly pivoted to upper extension of legrest
81 ...With concurrently movable bottom
82 ....Bottom pivoted to supporting frame at rear
83 .with means to move bottom relative to and concurrently with back
84 ..Rest advances forwardly of bottom
85 ...Advancing linkage includes lazy tong pivoted to rest
86 ..Common actuator articulates bottom and rest to back
87 ..Bottom actuator for rest
88 .Bottom and back movable as unit relative to legrest
89 ..Advancing legrest pivoted to lazy tong linkage
90 .Interconnector articulated to back extension below back-to-bottom pivot
91 ..By plural links
92 CHAIR WITH INTERCHANGEABLE AND REVERSIBLE BOTTOM AND BACK
93 .One-piece bottom and back
94 BACK REVERSIBLE AS TO BOTTOM, E.G., WALKOVER TYPE
95 .Back movement tilts bottom oppositely
96 ..Gear actuator
97 ..Back-actuated cam in bottom-carried slot
98 ...Cam carried by back support
99 ...Cam actuator slidably connected to back
100 .Bisector link rigidly connected to back
101 .Multiple links, pivotally connected to back
102 ..Crossed link back inverter
103 ..Parallelogram linkage

BACK REVERSIBLE AS TO BOTTOM, E.G., WALKOVER TYPE
104 .Link pivoted to back and armrest
105 DISPLACEABLE BOTTOM EXPOSES SUPPLEMENTAL BODY SUPPORT
106 .Lazy tong-mounted supported
107 .Laterally extensible
108 .Bottom inverts to form extension of subjacent support
109 ..Plural sections exposed by inverting bottom
110 ..Armrest or back inverts with bottom to support extension
111 .Supplemental body support positioned forwardly of bottom
112 BACK CARRIES STORED SUPPLEMENTAL BODY SUPPORT
113 .Armrest movable from recess in back
114 .Supplemental support pivoted to upper end of back
115 ARMREST MOVABLE TO DIVERSE USE POSITION
116 .Pivots laterally
117 ..Releasable from back-connected upright position
118 CONVERTIBLE
119 .Table
120 ..Additional table leaf extensible from converting component
121 ..Common table with plural bottoms
122 ..Sectional table formed of bottom and back
123 ..Bottom and back move as unit
124 ..Back-to-table top
125 ...Rear of back
126 ....Extends beyond bottom for concurrent use
127 ....Supported on armrest
128 .....Slidably connected to armrest
129 .To nonoccupant support device
130 .Alternately usable seat mounts
131 ..Rocker retractable to inoperative position
132 ...Ends of composite rockers contact inwardly
133 ..Detachable rocker
134 ..Seat detachable from subjacent table or stool
135 WITH TABLE, DESK OR EASEL
136 .Seat supported within periphery of apertured table
137 ..Seat rotatable about vertical axis
138 ..Seat movable along table-mounted horizontal track
139 .Table forms carrying case for seat
140 .Seat inoperatively positionable beneath table
141 ..Pivotally movable seat
142 ...Horizontally swinging
143 ..Slides on track or guide
144 .Extensible from within or beneath seat component
145 ..From armrest
146 ..From back
147 .Extensible from wall or receptacle
148 .Table supported on both arms
149 ..Horizontally adjustable
150 ...And movable to inoperative position
151 ...Pin and slot type
152 ..Means for attaching seat and table to adjacent support
153 ..Removable
154 ..Movable to inoperative position
155 ...To side of chair
156 .Straddle-type seat
157 .Table with opposing seats
158 ..Booth type
159 ..Folding
160 .Tablet-arm type
161 ..Adjustable to multiple use positions
162 ..Connected to move to inoperative position
163 .Table behind seat
164 ..Both independently vertically adjustable
165 ...Tiltable seat
166 ....Single pedestal
167 ..Tiltable seat
168 ...Vertically adjustable
169 ...With tiltable table
170 .Chair-secured standard supports table
171 ..Standard is vertical extension of chair leg
172 ..Standard spaced from chair by base element
173 .Table pivotally connected to seat
174 .Table in front of seat
175 MILKER STOOL TYPE
176 .With tail guard or holder
177 .Pail support movable as unit relative to seat
178 ..Pail support vertically movable
179 .Adjustable as to pail size
180 HEAT EXCHANGE, OR FLUID OR VAPOR TREATMENT
181 SIMULATION, E.G., ANIMAL OR VEHICLE
182 WITH DEBRIS CATCHER
183 WITH HANDLE
184 WITH SUN, RAIN OR INSECT PROTECTOR, E.G., CANOPY OR SCREEN
185 WITH MIRROR
186 WITH MUSICAL INSTRUMENT OR INSTRUMENT SUPPORT
187 PRIE-DIEU TYPE KNEELING STAND
188 WITH HOLDER OR RECEPTACLE FOR DISPARATE ARTICLE
189 .Holder or receptacle collapses as seat pivots
190 .For apparel
191 .On or in back
192 .Directly under seat
193 ..Accessible by displacement of seating surface
194 .On or in armrest
195 STRADDLE SEAT (SADDLE)
196 .Base-attached cantilevered spring mounts seat
197 .Filamented supporting surface
198 .Laminated leaf spring-mounted
199 .Pneumatic cushion
200 ..Plural independent compartments
201 .Sectional or split relatively movable supporting surface
202 .Depressed portion spaces body supporting surfaces
203 .Rear end supported on inclinded rod independently of support for front end
204 .With means to adjustably set tautness of supporting surface
205 ..Rod mounting bracket includes tautness setting means
206 ..Front spring adjustably clamped to rear spring
207 ..Threaded adjusting means extends longitudinally of seat
208 .Coil spring-mounted
209 ..Vertically oriented
210 ...Serially arranged tension and compression springs
211 ...Parallel stems each supported by encircling spring
212 ...Rear coil directly secured to front connected member
213 ..Axis extends laterally of seat
214 .With cushioned top
215 .Bow spring-mounted

216 CRASH SEAT
217 COMBINED
218 UPHOLSTERY COVER DETACHABLY CONNECTED TO FRAME
219 WITH CONNECTED PAD OR COVER, E.G., SLIPCOVER.
220 .Headrest
221 ..With cover supply
222 ...With cutter
223 .Reversible or with replaceable section
224 .With elastic section
225 .Wrap around one-piece bottom, back and shoulder or arm
226 .Hem-inserted keeper bar
227 .Armrest
228 ..And bottom or back cover formed of one piece
229 .One-piece bottom and back
230 ADDITIONAL BACK SUPPORTED FROM OTHER SEAT
231 .Substitute for primary back
232 PLURAL RELATED SEATS
233 .Combinable to form single seat
234 .Movement of one seat effects storage of either seat
235 ..Both move to effect storage of one
236 ..Moving seat stores within or beneath other bottom
237 ...Stored seat withdraws to substitute for other
238 ..Within back
239 .Nested
240 .Relatively rotatable
241 ..One seat has floor roller
242 ..Coaxially
243 .Tandem
244 .Oppositely facing
245 .Face to face
246 ..Oscillating on rollers
247 ..Oscillating on rockers
248 .Coupled side-by-side
249 ..Adjustable within or to arcuate row
250 .With detachable connection means
251 ..Armrest-supported
252 ..Fore or aft board straddling clamps
253 ..Secured by bottom-back crevice
254 ..Back-connected
255 ...Collapsible or foldable unit
256 ....Rigid panel-type bottom
257 .Relatively movable
258 ROCKER-MOUNTED
259 .Bottom connected to rocker for movement supplemental to rocking motion
260 .With means to impart rocking motion
261 .Track-mounted rockers, i.e., platform rocker
262 ..Meshed teeth engagement
263 ..Rotatable track
264 ..Spring return to neutral positon
265 ...Coil spring
266 ....Extensible
267 .....With opposing compressible coil spring
268 ...Transversely extending spring, e.g., torsion bar
269 ..With means to lock rockers to track
270 .With means to limit or immobilize rocking motion
271 .With footrest or legrest
272 .Rockers, or rocker attachments
273 OSCILLATING SUSPENDER CONNECTED TO OR THROUGH ADJUNCTIVE REST
274 .Baby jumper type
275 ..With belt or garment restrainer
276 .Suspender passes through armrest to bottom
277 .Suspender connected to back
278 ..Adjustable connection for movement relative to bottom
279 ..And legrest or footrest
280 ..And armrest or side frame
281 .Armrest-or side frame-connected
282 ..Bottom dependent from subjacently mounted armrest
283 CHANGEABLE OR REFERSIBLE SUPPORTING SURFACE
284 BOTTOM OR BACK WITH MEANS TO ALTER CONTOUR
285 BACK RESILIENTLY SUPPORTED IN OPERATIVE POSITION
286 .Resilient support includes armrest
287 ..Integral leg and armrest
288 ...Rear leg
289 ..Rearward back tilting axially compresses spring
290 ..Spring leaf or spring rod armrest
291 .Spring centers back on pivot
292 .Coil spring surrounds horizontal pivot
293 .Coil spring comprises horizontal pivot
294 .Resilient leg integral with bottom or back
295 ..Bottom and back
296 .Back secured to resilient upright bar or rod
297 ..Bar or rod rigidly secured to bottom
298 ..Bar or rod operatively adjustable with respect to bottom
299 .Spring mounts terminal of back
300 .Spring resists tilting of back
301 ..Simultaneously with bottom about fixed pivot
302 ...Back rigid with bottom
303 ....Pivot central of and below bottom surface
304 ..Adjustable resistance
305 ...Coaxial adjustment means extends through coil
306 ..Independently of bottom
307 .Constantly oriented during up-and-down movement
308 ..Back immovable relative to bottom
309 ..Bottom component resiilietly supports back
310 WITH MEANS TO CONTROL REARWARD CHAIR TIPPING
311 MOVABLE BOTTOM
312 .Independently movable resilient bottom sections
313 .Tiltable
314 ..Laterally
315 ...With laterally folding back
316 ..Interconnected with back for relative concurrent movement
317 ...Bottom slides forwardly while tilting
318 ....On roller
319 ...Back-actuated cam tilts bottom
320 ...Back supports rear of bottom
321 ....Front of bottom caried by link
322 ...Bottom tilts with concurrent horizontal movement
323 ...With armrest interconnected for mutual movement
324 ...Back moved by folding of bottom
325 ..Bottom and back tiltable as unit
326 ...About stationary horizontal pivot
327 ....To plural use positions
328 .....With set means horizontally spaced from pivot
329 ...With concurrent horizontal movement
330 ..Motor-actuated
331 ..Movable to inoperative position
332 ...Biased to position
333 ....Spring axis coaxial with pivot axis of bottom
334 ...On link

MOVABLE BOTTOM
.Tiltable
..Movable to inoperative position
335 ...About stationary horizontal pivot
336 ....Disengages holding abutment rearwardly of pivot
337 .Movable independently of back
338 ..Vertically
339 ...With force multiplying means
340 .Interconnected with back for relative concurrent movement
341 ..Back tilts and bottom moves forwardly
342 ...Rearwardly tilting of back
343 ....Back slidably connected to back support
344 .Bottom and back movable as unit
345 ..Vertically
346 ...With horizontal adjustment
347 ...With force multiplying means
348 ....Gear
349 ..About vertical axis
350 LATERALLY FOLDING OR COLLAPSING BACK
351 .One-piece bottom and back
352 PORTABLE BACK WITH BOTTOM ATTACHER
353 MOVABLE BACK
354 .Tiltable
355 ..Plural distinct occupant supporting positions
356 ...Full stroke adjusting mechanism
357 ...Vertical displacement of back disengages holder
358 ...Common actuator adjusts height and inclination
359 ...Back-pivoted armrest carries latch or holder
360 ....Bottom-pivoted armrest
361 ...Mechanical operator moves back fore and aft
362 ....Gear train
363 ...Axially slidable bolt or pawl
364 ....Spring-pressed
365 .....Engages movable rack
366 ...Rack and pawl
367 ....Actuator disengages pawl
368 .....Actuator rigid with pawl
369 ......Spring-pressed
370 ....Actuator disengages rack
371 .....Actuator rigid with rack
372 ....Depending pawl or rack prop pivoted to back
373 ...Serrated clamp hinge
374 ...Friction detent
375 ....Clamp acts on axially moving rod
376 ....Pin and slot
377 ...Held by prop behind back
378 ..Foldable forwardly over bottom
379 ...Held erect by releasable latch
380 ...Tension tie supports back
381 ....Armrest tie
382 ...Fabric hinges bottom to back
383 .Horizontally
464 BODY OR OCCUPANT RESTRAINT OR CONFINEMENT
465 .Jacket, vest, or suit restraint
466 .Leg or arm restraint
467 .Having crotch strap or post
468 .Safety belt or harness, e.g., lap belt or shoulder harness
469 ..Passive restraint system
470 ..With means to absorb energy of acceleration
471 ...Deformable or stretchable element
472 ....Element is permanently deformed, i.e., one time use
473 ..Belt or harness rides on seat connected slide
474 ..Retractable
475 ...Belt winds upon take-up reel
476 ....Having means to lock belt against further extension when in its occupant restraining position
477 .....Electrically operated
478 .....Inertia actuated
479 ...Having means to lock belt against further extension when in its occupant restraining position
480 ..Inertia responsive locking or tightening of belt or harness
481 ..Having means for storage in nonuse position or in position to be handy for use
482 ..Belt or belt anchor covers
483 ..Shoulder belt or harness
484 ...Engageable with both shoulders of occupant
485 ..Having means providing easily releasable attachment to a chair or seat
486 .Shoulder restraint
487 .Front guard or barrier
488 ..Padded or cushioned member
391 HEADREST
392 .Chin support
393 .Occupant-attached
394 .Detachable headrest and armrest unit
395 .Wall- or ceiling-supported
396 .Extension of upper back
397 .Portable, with seat attacher
398 ..Laterally collapsible
399 ..U-clamp mounted
400 ...Adjustable
401 ....Spring clamp
402 ....Screw clamp
403 .Movable to inoperative position rearwardly of back
404 .Resiliently mounted
405 .Ball- and socket-mounted
406 .Adjustable laterally
407 ..On shiftable mounting
408 .Angularly movable about horizontal axis
409 ..With horizontal translator
410 .Adjustable retilinearly vertically
411 ARMREST
412 .Post- or panel-mounted
413 ..Sill-suspended
414 .Portable, with seat attacher
415 ..Cantilevered from clamp
416 .Detachably connected by manipulated joint, i.e., knockdown
417 .Movable to inoperative position
418 .Single element forms plural spaced armrests
419 .Integral with front leg
420 .Connected to back and front leg
421 .Connected to back and bottom
422 .End frame-supported
423 REST FOR KNEE, LEG OR FOOT
424 .For nonoccupant use, e.g., shoe salesmen's stool here
425 ..Rest at rear of seating device
426 ...Kneeling stool
427 .Laterally bearing or applied
428 .With substitute footrest
429 .Connected to seat for relative movement
430 ..Slides horizontally beneath bottom to nonuse position
431 ...With adjustments for selective use position
432 ...With floor-engaging support
433 ..Pivoted for vertical swinging
434 ...With actuator
435 ...And slides forwardly relative to bottom
436 ...On supporting link
437 ..Rectilinearly vertically
438 .Portable

	REST FOR KNEE, LEG OR FOOT
	.Portable
439	..Self-supported
440	INTERFITTING COMPONENTS DETACHABLY CONNECTED BY MANIPULATED JOINT, I.E., KNOCKDOWN
441	.Interfitted fabric component
442	.Slotted components normal to each other
443	.Interfitted back or back frame and bottom or bottom frame
444	.Interfitted back and back frame
445	BOTTOM, BACK AND LEG, I.E., CHAIR
446	.Back or back standard integral with leg
447	..Front leg
448	..Single element forms spaced back standards
449	.Interbraced back, bottom and leg
450	.Back connected to end support
451	.Back standard secured below or to underside of bottom
452	BOTTOM OR BACK
453	.Ventilating means space surface from subjacent support
454	.Directly connected bottom and back
455	..Cushioned bottom and back
456	...Cushioning means interconnected
457	..Inegral sheet material
458	.Contoured bottom
459	..Laterally contoured
460	.Contoured back
461	PADDED STOOL
462	.Hassock type
463	MISCELLANEOUS
	******************************
	DIGESTS
	******************************
DIG 1	Foam
DIG 2	Molded
DIG 3	Pneumatic
DIG 4	Wheelchair
DIG 5	Fireproof
DIG 6	Velcro
DIG 7	Rocker/recliner
DIG 8	Inflatable bellows
DIG 9	Cycle backrest
DIG 10	Occupant-arising assist

CLASS 298 LAND VEHICLES, DUMPING

DECEMBER 1990

1 R	MISCELLANEOUS
1 A	..Auxiliary dump body mounted in nondumping body
1 B	..Dump body includes flexible or movable bottom part to facilitate dumping
1 H	..Means for heating dumping body
1 SG	..Wheel splash guards movable responsive to body tilting
1 V	..Vibrator means to facilitate removal of material
1 C	..Motor driven carts having forwardly dumping body
1 T	..Toy dump trucks
2	HAND TRUCKS AND BARROWS
3	.Single wheel
4	SLEDS
5	TWO-WHEEL
6	.With cover or end gate control
7	WITH LOAD-DELIVERING CHUTE
8 R	PLURAL LOAD UNITS
8 H	..Hopper type body
8 T	..Multiple dumping vehicles connected in tandem
9	ROTATING ABOUT VERTICAL AXIS AND TILTING
10	ROTATING TO OVERTURN ABOUT FIXED AXIS
11	ELEVATING AND TILTING
12	SLIDING AND TILTING
13	.Side delivery only
14	.Operating mechanism
15	..Vehicle-motion controlled
16	..Vehicle-motor controlled
17 R	TILTING
17 B	..Brace or prop to support tilted load body
17 S	..Vehicle includes means to stabilize or level body while dumping
17 SG	..Ground engaging
17 T	..Tractor dumping attachments
17.5	.Tilting about plural or shifting fulcrums
17.6	..Selectively tiltable in different directions
17.7	...Side or end delivery
17.8	...Progressive fulcrum points
18	.Side delivery only
19 R	.Operating mechanism
19 B	...Booster device for initial tilting movement
19 V	...Tilting mechanism includes flexible operator means, (e.g., cable)
20 R	..Vehicle-motion controlled
20 A	....Motion effecting means mounted on fifth wheel
22 R	..Fluid-pressure operators
22 AE	....Fluid pressure actuator associated with fifth wheel mechanism
22 C	....Control means for hydraulic tilting mechanism
22 F	....Tilting mechanism includes flexible operator means (e.g., cable)
22 J	....Jack-knife linkage actuated by hydraulic means
22 P	....Plural, simultaneously operated fluid cylinder means
22 A	....Rotary piston type
22 B	....Cam means in cooperation with fluid pressure means
22 D	....Pivotally connected (non-jack-knife type) linkage actuated to effect tilting
21 R	..Vehicle-motor controlled
21 V	....Tilting mechanism includes flexible operator means (e.g., cable)
23 R	.With cover or endgate control
23 MD	...Motor operated endgate opening means
23 M	...Motor operated endgate latch means
23 S	...Combined latch and endgate opening means
23 A	...Automatic (non-motor) endgate latch mechanism
23 B	....Including cam actuator means
23 F	....Including flexible operating member
23 D	...Automatic, positive, non-motor endgate opening means
23 DF	....Including flexible operating member
23 C	...Dump body covers, control means therefor
23 TT	...Miscellaneous tilting trucks
24	HOPPER TYPE
25	.Pivoted sections
26	.Tilting bottom
27	.Bottom opening
28	..Removable bottom boards
29	..Hinged doors
30	...Transversely hinged only
31	...Longitudinally hinged only
32	....Parallel swinging
33	....Oppositely swinging
34	.....Inwardly only
35 R	.....Outwardly only
35 M	.......Motor operated doors
36	......Vertically movable
37	......Closing equalizers
38	CATCHES

CLASS 299 MINING OR IN SITU DISINTEGRATION OF HARD MATERIAL

DECEMBER 1990

1 AUTOMATIC CONTROL; SIGNALING OR INDICATING
2 TUNNEL RECOVERY OF FLUID MATERIAL
3 IN SITU CONVERSION OF SOLID TO FLUID
4 .Input and output wells
5 .Dissolving or chemical reaction
6 .Melted material recovered
7 WITH SEPARATION OF MATERIALS
8 .Separation below surface of earth or water
9 .Material mined or excavated underwater
10 PROCESSES
11 .Stabilizing underground structure
12 .Mine safety
13 .Explosive
14 .Directly applying heat or vibration
15 .Forming blocks (e.g., quarrying)
16 .Breaking down by direct contact with fluid
17 ..Jetting (e.g., hydraulic mining)
18 .With material-handling
19 MINE LAYOUTS
20 EXPANSIBLE BREAKING-DOWN DEVICES
21 .Fluid-pressed element
22 ..Piston
23 .Wedge
24 ICE-WORKING DEVICES
25 .Relatively moving cutter
26 ..Reciprocating
27 ..Block-cutting type
28 ...Plural blades
29 HARD MATERIAL DISINTEGRATING MACHINES
30 .Remote control
31 .Stepper-type advance-causing means
32 ..Planer-type cutter
33 .With mine roof-supporting means
34 .Planer-type cutter
35 .Wire saw-type cutter
36 .Floor-working
37 ..Reciprocating cutter
38 ...Narrow channel-forming type
39 ..Rotary cutter
40 ...Freely rolling cutter
41 ...Vertical cutter axis
42 .Sidewall-working
43 ..With material-handling means
44 ...Undercutting, dislodging and conveying
45 ...Material handler enters cut with cutter
46 ...Rotary impeller
47 ..Driven flexible member causes advance
48 ...Cutter shiftable horizontally
49 ...Driver for member rotates about horizontal axis
50 ....Axis transverse to direction of advance
51 ..Horizontal cutter tooth orbit
52 ...Cutter shiftable horizontally
53 ..Vertical cutter tooth orbit
54 ...Cutter bodily shiftable horizontally
55 .Rotary cutter head with advance direction coincident to rotary axis
56 ..With material-handling means
57 ...Cooperates with laterally spaced heads
58 ..Machine follows cutter into opening formed thereby
59 ...Relatively driven cutters
60 ....Cutting area of one encircled by another
61 ...Radially adjustable cutting area
62 ...With percussive-type cutter
63 .Endless loop chunk serving cutter
64 .With material-handling means
65 ..Undercutting, dislodging and conveying
66 ...Undercutter shiftable horizontally
67 ..Material handler enters cut with cutter
68 ..Rotary impeller
69 .Percussive-type cutter
70 ..Cutter shiftable horizontally
71 .Relatively shiftable cutters
72 .Shiftable to operate in vertical or horizontal cutter tooth orbit
73 .Cutter shiftable horizontally
74 ..Horizontal cutter tooth orbit
75 ..Shiftable vertically
76 .Cutter shiftable vertically
77 .Horizontal cutter tooth orbit
78 .Vertical cutter tooth orbit
79 CUTTER HEADS OR TEETH
80 .Adjustable cutting area
81 .Cleansing fluid passage
82 .Chain-type head
83 ..Plural teeth on single link
84 ..Nontracking arrangement
85 .Parts relatively moving during operation
86 ..Rolling tooth
87 .Helical cutting or conveying portion
88 .Plural teeth
89 ..Rotary head
90 ...Cutting direction common to rotary axis
91 .Tooth-mounting
92 ..Resiliently biased retaining means
93 ..Clamped tooth
94 .Percussive
95 MISCELLANEOUS

CLASS 300 BRUSH, BROOM AND MOP MAKING

1	MISCELLANEOUS
2	BRUSH-MAKING MACHINES
3	.Drilling and tuft setting
4	.Tuft feeding and setting
5	.Tuft gathering and setting
6	..Drawn work
7	.Tuft gathering
8	.Tuft setting
9	.Filling
10	.Work holders
11	..Positioning devices
12	BROOM-MAKING MACHINES
13	.Nailing and stapling
14	.Winding
15	.Wire banding
16	MOP-MAKING MACHINES
17	BRUSH AND BROOM TRIMMING
18	DRESSING AND ASSORTING
19	IMPLEMENTS
20	HANDLE SETTING
21	PROCESSES

CLASS 301 LAND VEHICLE, WHEELS AND AXLES

DECEMBER 1990

1	COMBINED WHEEL AND AXLE MODIFICATION
2	.Cushion lateral thrust
2.5	.With pedal crank
5 R	WHEELS
5 B	..Balancing devices
5 BA	...Automatically operating
5 P	..With peripheral rollers
5 VH	..Housing tire-inflation valve
5.3	.Skate
5.7	..With antifriction bearings
6 R	.With drive or brake attachments
6 A	...Wheel or brake structure for aircraft
6 CS	...Brake-cooling means
6 CF	....Comprising a fluid
6 D	...Drive means on wheel
6 S	...Wheel supported on brake drum clear of hub
6 W	...Brake drum supported on wheel clear of hub
6 E	...Wheel and disc-type brake drum
6 V	...Drive or brake means cycle-type wheels
6 WB	...Misc. special features (i.e., vibration dampers, heat-insulation means, etc.
7	.Wheelbarrow type
8	.Auxiliary bracing
9 R	.Detachable wheel section
9 G	...Geared mounting mechanism
9 AH	...Artillery wheel with single-acting retaining means
9 AN	...Artillery wheel bolted to hub
9 DH	...Disc wheel with single-acting retaining means
9 CN	...Disc wheel retained by central nut
9 DN	...Disc wheel bolted to hub
9 DP	...Spoke formations bolted to hub
9 S	...Wire-spoke wheel with single-acting mounting means
9 SB	...Wire-spoke wheel bolted to hub
9 SC	...Wire-spoke wheel central-mounting nut
9 TV	...Means for shifting rim laterally of hub
9 AC	...Artillery wheel retained by certain nut
10 R	..Demountable rims
10 DC	....Driving connection
11 R	...Securing means
11 CD	.....Circumferentially divided rim
11 S	.....Spacer means between wheel periphery and rim
11 KL	.....Rock means between wheel and rim
12 R	....Spoke-attached
12 M	......Spoke moves radially to engage rim
13 R	....Plural rims
13 SM	......Dual rims mounted
14	....Rim-removing
15	....Contracting rim
16	....Expansible wheel
17	....Bayonet joint
18	....Radially wedged
19	.....Transversely extending wedges
20	......Independently movable
21	.......Radial bolts
22	.......Ring
23	....Removable side ring
24	....Removable side lugs
25	....Latches
26	.....Movable locking ring
27	......Expansible ring
28	.....Radially extending bolts
29	.....Pivoted
30	...Transversely divided
31	....Plural sections
32	.....Hinged
33	....With end-manipulating structure
34	.....Tool connections
35 R	...Circumferentially divided
35 SS	.....One circular split ring also transversely split
35 BJ	.....Rim section held together by bayonet joint
35 SL	.....Rim section held together by split locking ring
36 R	.Dual
36 A	...Relative rotatable
36 WP	...With wear-preventing means therebetween
37 R	.Protectors or trim members
37 ST	...Removable tire sidewall trim
37 TC	...Tire sidewall trim retained on wheel cover
37 AT	...Antitheft devices for wheel covers
37 P	...Cover constructed primarily of plastic
37 CM	...Central ornament or medallion attached to cover
37 SS	...Wire wheel simulating wheel cover
37 N	...Relatively rotatable element on cover
37 T	...Trim rings covering only tire rim or portion thereof
37 C	...Resilient clips secured to wheel or rim removably secures cover
37 CD	....Clips are detachable from wheel
37 TP	...Cover has means cooperating with retaining bumps or protrusions on wheel or rim
37 PB	....Bumps or protrusions are on tire mounting rim
37 S	...Cover-retaining means comprises threaded means
37 SC	....Central screw attached
37 B	...Biting teeth integrally formed from cover material directly engage wheel or rim
37 SA	...Wheel cover has retaining means for securing wheel spoke
37 H	...With access opening
37 L	...Design patents
38 R	.Emergency
38 S	...Auxiliary wheel movable radially into position
39 R	..Tires
39 T	....Safety
39 C	....Rim clamps for securing emergency trim to rim
39 CC	....Covers cleated to wheel to provide smooth road surface
40 R	...Detachable traction increasing
40 S	.....Auxiliary tire mounted to one side of main wheel
41 R	.Traction increasing
41 W	...Weights added to traction wheel
42	..Chains
43	..Projecting spurs or cleats
44 R	...Detachable
44 T	.....Separate traction attached to wheel portion
44 A	.....Resilient material plug
44 B	.....Lugs bolted to rim
45	...Movable
46	....Adjustable
48	.....Alternately projecting and retracting
49	......Supplemental wheel attachments
47	......Supplemental wheel attachments
50	.....Individually
51	....Spring-projected
52	..Parallel rim, connecting cleats
53	..Recessed rims
54	.Combined tension and compression
55	.Tension
56	..Tangentially arranged spokes
57	..Hairpin type
58	..Felly and spoke connections
59	..Hub and spoke connections

	WHEELS
	.Tension
	..Hub and spoke connections
60	...Simultaneous spoke tensioning
61	...Separable spoke sockets
62	.Compression
63 R	..Disc
63 DD	....Wheel formed from two discs permanently secured together
63 DT	....Two wheel-forming discs secured together by tabs struck from wheel
63 DS	....Wheel discs removably secured together
63 D	....Disc wheel having removable rim section
63 C	....Wheel of fabric, wood, paper or the like
63 PW	....Wheel of plastic or rubber largely
64 R	...With spoke formation
64 SH	.....Two-wheel disc permanently secured together
64 SD	.....Single disc forms wheel
65	..Cast metal
66	..Integrally connected spokes
67	..Felly and spoke connections
68	...Adjustable
69	....Screw
70	...Separate spoke socket
71	....Combined felly joint
72	...Combined felly joint
73	..Plural spoke series
74	...Hub and spoke connections
75	....Spoke tighteners
76	....Driven spokes
77	.....Reenforcing bands or casings
78	....Spoke-claiming hubs
79	..Single spoke series
80	...Hub and spoke connections
81	....Spoke tighteners
82	....Driven spokes
83	.....Reenforcing bands or casings
84	....Spoke-clamping hubs
85	.....Ring-forming spoke ends
86	.Nonresilient tires
87	..Fastening devices
88	...Combined felly joint
89	...Interposed clips or wedges
90	..Rail-climbing devices
91	..Adjustable
92	...Screw
93	....Right- and left-threaded
94	...Wedge
95	.Fellies or rims
96	..Metallic
97	...Resilient tire
98	..Resilient tire
99	..Joints
100	...Adjustable
101	....Screw
102	.....Right- and left-threaded
103	....Wedge
104	.Spokes
105 R	.Hubs
105 B	...Bicycle
105 S	...Circumferentially divided
106	..Reenforcing bands and casings
107	...Point bands
108 R	..Caps
108 A	....Plastic or rubberlike material
108 S	....Retained by threaded fastener means
108 SC	....Retained by central screw-threaded means
108 TW	....Having transparent window
109	..Axle boxes
110	...Mounting
111	.Wheel-attaching devices
112	..Outer-end stop
113	...Linchpin
114	...Screw-attached
115	....Adjustable plural-part nut
116	....Hub wrench
117	....Tap bolts
118	...Bayonet joints attached
119	...Pivoted detent
120	...Sliding detent
121	..Movable-latch detent
122	..Stop-engaging collars or sleeves
123	.Sand bands
124 R	AXLES
124 H	..Including drive mechanism housing
125	.With combined vehicle structure
126	.Rotary shaft or spindle
127	.Cranked or bowed
128	.Varying-length adjustment
129	.Trussed
130	.Emergency repairing
131	.Spindles
132	..Mounting
133	...Spring
134	.Skein
135	..Mounting
136	...Spring

CLASS 303 FLUID-PRESSURE BRAKE AND ANALOGOUS SYSTEMS

DECEMBER 1990

1	MISCELLANEOUS
2	MULTIPLE SYSTEMS
3	.Fluid pressure and electric
4	.Fluid pressure and vacuum
5	MULTIPLE FLUID-RECEIVING DEVICES
6.01	.Multiple motors
6.1	..Brake and door
7	..Sectional Train
8	...Multiple brake valves
9	..Supplementary in emergency
9.61	..Separate and simultaneous control
9.62	..Apportioning control
9.63	...Failure responsive
9.64	...Motorcycle
9.65	...Manual
9.66	...For pneumatic system
9.67	...Inertia
9.68	....Inertia weight
9.69	...Load
9.71	...Having significant pressure control by front brake
9.72	...Having multiple pistons affecting fluid flow
9.73	...Having significant output feature
9.74	....Multiple outputs
9.75	...Detail
9.76	..Spring operated motor
10	WITH PUMP
11	.Pressure control
12	.Vacuum
13	MULTIPLE CONTROL
14	.Double heading
15	.Fluid and electric
16	..Automatic electric
17	...Electric impulse
18	EXTERIOR CONTROL
19	.Deadman type
91	SPEED-CONTROLLED
92	.With failure responsive means
93	.Speed responsive braking system with interrelated antiskid braking system
94	.Responsive to a comparison of a speed condition to a fixed standard or reference
95	..Including electrical control
96	...With plural similar inputs
97	...Controlled by acceleration
98	..With plural similar inputs
99	..Controlled by acceleration
100	.Responsive to a speed condition and another condition
101	..With brake control handle
102	..Responsive to plural speed conditions
103	...Including electrical control
104	....By rate of change by braking force or jerk
105	....Sensing both acceleration and deceleration
106	.....With further speed condition
107	....By integrating vehicle and wheel acceleration differences
108	....By sensed difference between vehicle and wheel deceleration
109	....By difference between pseudo-vehicle speed and actual vehicle speed
110	....One condition releases, another type condition reapplies
111	....With cross coupling feature or central control module
112	.Torque sensing
113	.With valve structure responsive to a speed-responsive actuating signal
114	..With power-assist booster means
115	..With fluid-pressure modulator
116	..With pump
117	..Spool valve
118	..Relay or motorman type
119	..Solenoid-operated cutoff and release valve
20	ELECTRIC CONTROL
22.1	LOAD CONTROL
22.2	.Empty and load type
22.3	..Alterable for different classes of service
22.4	.Failure responsive
22.5	.Responsive to fluid pressure spring
22.6	.Railway vehicle
22.7	..Detail
22.8	.Detail
24.1	INERTIA CONTROL
25	AUTOMATIC AND DIRECT
26	.Supplementary control pipe
27	.Direct on control-pipe reduction
28	AUTOMATIC
29	.Supplementary control pipe
30	.Supplementary reservoir pipe

DIG 2	Brake control by pressure comparison
DIG 3	.Electrical pressure sensor
DIG 4	..Pressure signal used in electrical speed controlled braking circuit

CLASS 305 WHEEL SUBSTITUTES FOR LAND VEHICLES

1 STEPPER TYPE
2 .Cam positioned
3 .Having plural link connector elements
4 .Feet attached to rim
5 ..Spring biased
6 RIGID PORTABLE TRACK
7 .Circular
8 WITH RAIL ENGAGING MEANS
9 WITH BRAKE
10 WITH HYDRAULIC ADJUSTING MEANS
11 WITH MEANS TO EXCLUDE OR REMOVE FOREIGN MATTER
12 .Deflector plate or scraper
13 .Self-cleaning tread unit structure
14 WITH LUBRICATING MEANS
15 COMBINED OR CONVERTIBLE
16 FRAME CARRIED TRACK
17 .With roller antifriction means
18 ..Track carried
19 SINGLE WHEEL TYPE
20 WHEEL ON TOP OF UPPER TRACK RUN
21 END WHEELS WITH INTERMEDIATE SUPPORT
22 .Support connected to end wheel for movement therewith to maintain track tension
23 .Intermediate support comprises wheel contacting upper and lower track runs
24 .Intermediate support engages lower track run
25 ..With intermediate upper track run support means
26 ..Support comprises endless roller chain
27 ..Support comprises vertically movable wheels
28 ..Support comprises plural wheels
29 RELATIVELY MOVABLE END WHEELS
30 .Vertically adjustable
31 .Longitudinally outwardly biased
32 .Longitudinally adjustable
33 WITH INTERPOSED FRICTION DRIVE BELT
34 INFLATABLE MEANS
35 R NON-METALLIC TYPE TRACK OR TREAD
35 EB ..Non-metallic ground engaging means includes endless belt
36 .With metal sleeve for connector pin
37 .With connecting means for reinforcing elements
38 .With metallic embedded reinforcement
39 TRACKS OR TREADS
40 .Cable connected treads
41 .Resilient connection between treads
42 ..Torsion bushing
43 ..Resilient compressible hinge
44 .Steerable
45 .Adjustable connection between treads
46 .With resiliently biased ground engaging portion
47 .With sag prevention means
48 ..Projecting truss type
49 ...Truss interconnected
50 .Track treads interconnected without separate fastening means
51 .With street plate
52 .With roller means
53 .One piece track tread
54 .With detachable grouser
55 ..Interconnected without separate fastening means
56 .With means for interfitting with support
57 ..Sprocket and track engagement
58 R .Separate transverse pin connector between treads
58 PC ...Pin connectors
59 ..Non-cylindrical or hollow connector pin

CLASS 307 ELECTRICAL TRANSMISSION OR INTERCONNECTION SYSTEMS

DECEMBER 1990

1	SUPERIMPOSED UNLIKE CURRENTS
2	.AC and DC sources
3	.Different frequencies or phase
4	.Different voltages
5	..Series-connected
6	...Plural converters
7	....Induction transformer
8	...Plural generators
9.1	VEHICLE MOUNTED SYSTEMS
10.1	.Automobile
10.2	..Antitheft
10.3	...Ignition or starting circuit lock
10.4	....Manual code input (e.g., push button)
10.5	....Coded record input (e.g., IC card)
10.6	..Ignition or starter circuits
10.7	..Battery protection
10.8	..Lighting circuits
11	PLURAL LOAD CIRCUIT SYSTEMS
12	.Common conductor or return type
13	..Polyphase
14	...Phase balancing
15	..Voltage divider type
16	..Plural output generators
17	.Transformer connections
18	.Plural sources of supply
19	..Interconnected for energy transfer
20	...With control of magnitude of energy transfer
21	...Diverse sources
22	....AC and DC
23	..Substitute or alternate source
24	..With control of magnitude of current or power
25	..Diverse sources
26	...AC and DC
27	...Different frequencies
28	...Different voltages
29	..Selectively connected loads and/or sources
30	.Anticoupling of load circuits through same source
31	.Control of current or power
32	..Load current proportioning or dividing
33	..Constant magnitude control
34	...By control of one or more load circuits
35	..Limit control
36	.Serially connected load circuits
37	..Selective series-parallel connections
38	.Selectively connected or controlled load circuits
39	..Condition responsive
40	..Code-controlled
41	..Sequential or alternating
42	.Circuit arrangements or layouts
43	PLURAL SUPPLY CIRCUITS OR SOURCES
44	.One source floats across or compensates for other source
45	..With intervening converter
46	...Storage battery or accumulator-type source
47	..Dynamoelectric-type source
48	..Storage battery or accumulator-type source
49	...With series-connected auxiliary source
50	...Tap-changing or variable number of cells
51	.Circulating- or inter-current control or prevention
52	.Load current control
53	..Load current division
54	...Serially connected sources
55	...Fixed or predetermined ratio
56	....Diverse-or unlike-type sources
57	....Plural generators
58	....Plural converters
59	...Peak or excess load
60	..Constant load or current
61	...Serially connected sources
62	..Load-limiting
63	..Serially connected sources
64	.Substitute or emergency source
65	..Plural substitute sources
66	..Storage battery or accumulator
67	...With intervening dynamoelectric machine
68	..Dynamoelectric
69	.Sources distributed along load circuit
70	.Load transfer without paralleling sources
71	.Series-parallel connection of sources
72	.Diverse or unlike electrical characteristics
73	..Differing frequencies
74	..Differing capacities
75	..Differing voltages
76	...Generator sources
77	.Series-connected sources
78	..Generator sources
80	.Selective or optional sources
81	..Predetermined sequence
82	.Plural converters
83	.Plural transformers
84	.Plural generators
85	.Connecting or disconnecting
86	..Condition responsive
87	...Attainment of voltage, frequency or phase relationship
400	ELECTRETS
401	NONLINEAR REACTOR SYSTEMS (E.G., SATURABLE)
402	.Parametrons
403	..Thin film parametrons
404	..Using logic circuits
405	..Using pump energizer
406	.Magnetic flip-flops
407	.Logic circuits
408	..Multiaperture
409	..Clocking, delay or transmission line
410	..Nor, Not logic circuit
411	..Exclusive Or, And logic circuit
412	.Driver circuits
413	.Signal sensor (e.g., current or frequency)
414	.Magnetic trigger devices
415	.Magnetic switching circuits
416	.Amplifiers using nonlinear reactors (i.e., magnetic amplifiers)
417	..With transistors
418	..With feedback
419	.Magnetic pulse generator
420	..Using multivibrator
421	..With specified output waveform
422	.Multiaperture
423	..Three apertures or ladder
424	.Parametric frequency converter
425	..Optical or quasi-optical frequency converters
426	...Raman type
427	...Harmonic generator
428	...Parametric oscillators
429	...Optical laser acoustic delay lines
430	...Dielectric optical waveguide
200.1	NONLINEAR SOLID-STATE DEVICE CIRCUIT OR SYSTEM
201	.Neuron circuits
202.1	.Fusible link or intentional destruct circuit or device
440	.Digital logic
441	..Redundant
442	..Fail-safe
443	..Signal sensitivity or transmission integrity
444	..Insulated gate charge transfer device

	NONLINEAR SOLID-STATE DEVICE CIRCUIT OR SYSTEM
	.Digital logic
445	..Functions of AND, OR, NAND, NOR, or NOT
446	...Diverse device types or circuit combinations (e.g., FET-bipolar; TTL-DTL, transistor-tunnel diode)
447	....Space discharge device (e.g., vacuum tube)
448	...Field-effect transistor (FET)
449	....Decoding circuit
450	....Special FET
451	....Complementary FET's
452	.....With clocking
453	....With clocking
454	...Bipolar (e.g., RTL, DCTL)
455	....Emitter-coupled logic (ECL) (i.e., current mode logic (CML) or emitter-follower logic (EFL)
456	....Transistor-transistor logic (TTL) or complementary transistor logic (CTL)
457	....Diode-transistor logic (DTL)
458	.....With metal semiconductor junction diode (e.g., Schottky barrier or hot-carrier diode)
459	....Integrated injection logic (i.e., merged transistor logic (MTL) or current hogging logic (CHL)
460	...Diode
461	....Negative resistance device
462	...Superconductor (e.g., cryogenic)
463	..Decoding
464	..Threshold (e.g., majority, minority, or weighted inputs)
465	..Multifunctional or programmable (e.g., universal, PLA, etc.)
465.1	...Significant integrated structure layout or layout interconnections
466	...Bipolar
467	....Emitter-coupled or emitter-follower logic
468	...Field-effect transistor (FET)
469	....Complementary FET's
470	..Inhibitor
471	..Exclusive function (e.g., exclusive-OR)
472	...Half-adder or quarter-adder
473	..Tri-state
474	..Four or more state
475	..Interface
476	..Superconductor
477	..Integrated injection logic
478	..Negative resistance
479	..Frequency or phase
480	..Clocking or synchronizing of logic stages or gates
481	...Field-effect transistor (FET)
482	..With capacitive bootstrapping
482.1	..Significant integrated structure layout or layout interconnections
219	.Redundant means
219.1	.Nonpulse frequency conversion
227	.Stepwave generator
228	.Sawtooth or sweep waveform
490	.Nonlinear analog circuit (e.g., nonlinear amplifier or function generator)
491	..With compensation or stabilizing means (e.g., for temperature, component differences, power supply, etc.)
492	..For logarithmic function generation
493	..Including gain control means
494	..Including differential-comparator circuitry
495	...Having diverse-type transistor devices (e.g., FET-bipolar)
496	...Having complementary symmetry (e.g., PNP-NPN; N-channel FET-P-channel FET)
497	...Having field-effect transistor device
498	..Output a function of two or more analog inputs
499	..Including diverse-type nonlinear devices (e.g., FET-bipolar, diode-transistor)
500	..Including complementary symmetry
501	..Including field-effect transistor device
502	..Including negative resistance means (e.g., tunnel diode, punch through transistor, back diode, etc.)
503	..Including significant diode means
231	.Signal discriminating, comparing or selecting
510	..By phase, time, or frequency sensitive circuit
511	...With phase correction or control
512	....For quadrature rejection or control
513	....For phase splitting or reversing
514	...With phase angle sensing (e.g., lead-lag discriminators)
515	....Combined with transducer (e.g., shaft angle detection)
516	....Using reference signal (e.g., fixed, strobe, sampled)
517	...With time interval or rate of change (slope) detection
518	...With pulse selection/detection or time discrimination/decoding
519	...With frequency to voltage conversion (e.g., speed detection, antiskid circuits, etc.)
520	...With unwanted signal elimination (e.g., active filter circuits)
521	....Adjustable (e.g., tunable filters)
522	...With predetermined frequency selection
523	....Including sampling or reference frequency
524	....Including plural frequency detection
525	...With comparison of two or more input frequencies
526	....One a reference
527	....For synchronization detection
528	....With logic circuit
529	...With mixing, synthesizing, or combining (adding, multiplying, etc.) of signals
234	..As to pulse width or spacing
350	..As to amplitude
530	...By sensing amplifier
351	...Maximum or minimum amplitude
352	...Including details of sampling or holding
353	....Sample and hold
354	...Reference level crossover detecting (e.g., zero level)
355	...Plural varying inputs compared one to another
356	....Input provides varying reference signal
357	....Three or more inputs
358	...Input signal compared to reference derived therefrom
359	....Reference derived therefrom by feedback
360	...Input signal compared to plural fixed thresholds
361	....Three or more thresholds
362	...Input signal compared to single fixed threshold
363	....Threshold determined by single circuit element
364	....Plural sources of input signal

	NONLINEAR SOLID-STATE DEVICE CIRCUIT OR SYSTEM
	.Signal discriminating, comparing or selecting
236	..As to polarity
540	.Attenuation or control by limiting, clipping, or clamping
541	..Using superconductive device
542	..With transient or signal noise reduction
542.1	...Contact bounce noise signal (i.e., chattering)
543	...By filtering
544	...By using diverse-type nonlinear devices (e.g., FET-bipolar; transistor-diode)
545	...By using negative resistance device
546	...By feedback limiting-clamping
547	....Including controlled shunt-type circuit bypath
548	.....Using field-effect transistor
549	...By controlled or biased shunt-type circuit bypath
550	....Using only FET-type nonlinear device
551	....Using only diode-type nonlinear device
552	..Providing constant input-output amplitude level ratio
553	...By feedback control
554	....Including field-effect transistor
555	..For controlling output wave shape characteristics
556	...By filtering
557	..In input or output circuit
558	...For interstage coupling
559	....Using diode
560	...By using diverse-type nonlinear devices
561	...By using only diode
562	..Feedback
563	...Using Schottky barrier diode
564	..By using diverse-type nonlinear devices
565	..By using only diode
566	...Avalanche or negative resistance device (e.g., Zener diode, tunnel diode, etc.)
567	..By using only transistor
568	...Field-effect type device
239	.Gating (i.e., switching)
240	..Periodic switching (e.g., chopper)
241	..Plural controlled paths
242	...Parallel controlled paths
243	...Converging controlled paths
244	...Diverging controlled paths
245	..Superconductive (e.g., cryogenic) device
246	..Gate charges or discharged energy storage device
247.1	..Gate driving or driven by multivibrator
248	..Three or more electrode solid-state device gate
570	...Diverse devices gate (e.g., FET-bipolar transistors, SCR-FET, SCR-BIPOLAR)
249	...Bilateral transistor
250	....Plural
571	...Field-effect transistor
572	....Signal transmission integrity and spurious noise override
573	.....Control signal derived from or responsive to controlled signal
574	......FET hybrid device gate (e.g., depletion-enhancement, JFET-IGFET)
575	......Insulated gate FET (IGFET) (e.g., MOSFET) gate
576	.......Complementary metal oxide semiconductor (CMOS)
577	.....Insulated gate FET (IGFET) (e.g., MOSFET) gating
578	......With capacitive bootstrapping
579	......Complementary metal oxide semiconductor (CMOS)
580	....Responsive to external effect
581	....FET hybrid device gate (e.g., depletion-enhancement, JFET-IGFET)
582	....Synchronous or clocking (phase) control
583	.....Using insulated gate FET (IGFET)
584	....Insulated gate FET (IGFET) (e.g., MOSFET)
585	.....Complementary metal oxide semiconductor (CMOS)
630	...Negative resistance device (e.g., silicon controlled rectifier, thyristor)
631	....Particular device (e.g., significant structure, radiation responsive, etc.)
632	.....Triac
633	.....GTO (i.e., gate turnoff)
634	.....N-gate
635	.....Junctionless device (e.g., Ovshinsky effect switch)
636	.....PUT (i.e., programmable unijunction transistor)
637	.....Four electrodes
638	....Particular topology
639	.....DC supply
640	......Plural devices
641	.......Series anode-cathode paths
642	.......With commutating means
643	.....AC supply
644	......Device in bridge
645	......Plural devices
646	.......Inverse parallel
647	......Zero point switching
648	.....Complex wave supply
253	...Conventional transistor
254	....Plural
255	.....Opposite conductivity (i.e., complementary)
256	..Two electrode solid-state device gate
257	...Bridge circuit
258	...Negative resistance
259	...With conventional diode
260	.Signal shaping, converting or generating
261	..Signal conversion (e.g., sine wave to pulse, sawtooth to square wave, etc.)
262	..Phase or polarity control
263	..Slope control
264	..Amplitude control
265	..Pulse duration or width control
266	...Pulse shortening
267	...Pulse lengthening
268	..Pulse shaping
269	..Clocking, synchronizing or timing
270	..Current driving means
271	..Frequency or repetition rate control
272.1	..One or more stable-state circuits
272.2	...Master-slave bistable latch
272.3	...Initializing, resetting, or protecting a steady state condition
273	...Monostable
274	....Negative resistance device circuits
275	....Blocking oscillator
276	...Convertible circuits (bistable to monostable and vice versa, etc.)
277	...Superconductive (e.g., cryogenic) impact ionization and thin film devices

	NONLINEAR SOLID-STATE DEVICE CIRCUIT OR SYSTEM
	.Signal shaping, converting or generating
	..One or more stable-state circuits
278	...Hall and other external effect devices (light, heat, mechanical force, etc., sensitive devices)
279	...Including field-effect device
280	...Minority carrier storage effect
281	....Storage diodes (i.e., enhancement, Boff, step recovery, slow reverse recovery diodes)
282	...With transformer or saturable core device
283	...Negative resistance transistors (e.g., avalanche, punch through, unijunction transistor)
284	....Four or more layer devices, (e.g., SCR, CTO, CR, trigistor)
285	...Zener diode or capacitive diode
286	...Negative resistance diodes having N-shape characteristic on I-V Plot (e.g., tunnel diode, back diode, backward diode)
287	...Negative resistance diodes having S-shape characteristic on I-V Plot (e.g., four or more layer semiconductor devices)
288	...Complementary transistors
289	...Two or more stable state circuits with single transistor or plural transistors of same conductivity type
290	....Multivibrator with single cross-coupling path (e.g., Schmitt trigger)
291	....Multivibrator with at least two cross-coupling paths (e.g., Eccles-Jordan multivibrator)
292	.....Conventional diodes at input, output, or in cross-coupling path
590	.Time control (e.g., delay)
591	..Including significant compensation means (e.g., temperature or device characteristic compensated delay)
592	..For controlling switching operation
593	...Utilizing multivibrator delay means
594	...With field-effect device in delay means
595	...Having plural delay means or signal paths for single control means
596	...Of plural switch means (e.g., sequential operation)
597	...With controlled delay means (e.g., variable charge-discharge, on-delay/off-delay control)
598	....Relay
599	....Including negative resistance device in delay circuit (e.g., unijunction transistor, tunnel diode, SCR)
600	..Interval
601	...Pulse edge or angle delay (e.g., rising or falling edge delayed response)
602	...Having plural delay means or signal paths
603	...With controlled delay means (e.g., feedback control, variable charge/discharge, reset)
604	....Using negative resistance device
605	...Having particular circuit element or structure (e.g., FET, complementary transistors, etc.)
606	....Including delay line
607	.....Charge transfer device (e.g., charge-coupled or bucket-brigade device)
608	....Multivibrator or differential amplifier
296.1	.Including significant bias or power supply circuitry
296.2	..Having particular substrate biasing
296.3	..Power conservation or pulse type
296.4	..Including signal protection or bias preservation
296.5	...With field-effect transistor
296.6	..Having stabilized bias or power supply level
296.7	...With diverse type transistor devices
296.8	...With field-effect transistors only
298	.Thin film
299.1	.Special three or more electrode solid-state device circuit
299.2	..Multiple-emitter transistor
299.3	..Multiple-collector transistor
300	..Minority carrier storage
301	..Unijunction transistor
302	..Transistor breakdown devices (e.g., avalanche, zener or punch through)
303	..Integrated structure
303.1	...Significant layout or layout interconnections
303.2	....Having field-effect transistor device
304	..Field effect
305	..Four or more layer devices (e.g., silicon-controlled rectifier)
306	.Superconductive (e.g., cryogenic) device
307	..Impact ionization
308	.External effects
309	..Magnetic (e.g., Hall effect)
310	..Temperature
311	..Light
313	.Complementary transistors
314	.Saturable reactor
315	.Darlington connection
316	.Tube and transistor in same circuit
317.1	.Diode circuit
317.2	..Schottky barrier diode
318	..Two terminal breakdown devices (e.g., zener diode)
319	..Minority carrier storage diode (e.g., enhancement diode)
320	..Capacitive diode
321	..Diode bridge circuit
322	.Negative resistance device having "N"-type curve on I-V Plot (e.g., tunnel diode type)
323	..Backward diode, unitunnel diode or tunnel rectifier
324	.Negative resistance device having "S"-type curve on I-V Plot (e.g., PNPN diode type)
325	..Hyperconductive diode (i.e., PNPN type)
326	PERSONNEL SAFETY OR LIMIT CONTROL FEATURES
327	.Parasitic current suppression
328	.Interlock
89	ANTI-INDUCTION OR COUPLING TO OTHER SYSTEMS
90	.Inducing current control
91	.Magnetic or electrostatic field control (e.g., shielding)
95	ANTI-ELECTROLYSIS
96	INTERMITTENT REGULATORY INTERRUPTION OF SYSTEM
97	.Condition responsive
98	COMBINED IMPEDANCE AND SWITCH SYSTEMS
99	.Condition responsive switch
100	SHUNTING OR SHORT CIRCUITING SYSTEMS

101	RESIDUAL OR REMANENT MAGNETISM CONTROL
102	STABILIZED, ANTI-HUNTING OR ANTIOSCILLATION SYSTEMS
103	WITH LINE DROP COMPENSATION
104	ELECTROMAGNET OR HIGHLY INDUCTIVE SYSTEMS
105	WITH HARMONIC FILTER OR NEUTRALIZER
106	WAVE FORM OR WAVE SHAPE DETERMINATIVE OR PULSE-PRODUCING SYSTEMS
107	.With rectification or derectification
108	.With capacitor
109	CAPACITOR
110	.Parallel-charge, series-discharge (e.g., voltage doublers)
111	NONRESPONSIVE-TO-FREQUENCY-CHANGE SYSTEMS
112	SWITCHING SYSTEMS
113	.Plural switches
114	..Lazy-man switch type
115	..Selectively actuated
116	.Condition responsive
117	..Light, heat, vibratory or radiant energy
118	..Fluid pressure, density, level, velocity or humidity
119	..Mechanical force
120	...Speed, centrifugal or kinetic force
121	....Inertia or acceleration
122	....Direction of rotation
123	....Differential speed between two bodies
124	....Torque
125	..Electrical
126	...Power or energy
127	...Polarity, phase sequence or reverse flow
128	...AC or DC discriminating
129	...Frequency
130	...Voltage
131	...Current
132 R	.Repetitive make and break
132 E	...Electronically controlled relay
132 EA	....Responsive to physical condition
132 T	...Thermal relay
132 V	...Vibrating relay
132 M	...Miscellaneous
134	.With operation facilitating feature
135	..Preliminary reduction in current or voltage of system
137	..Switch contact conditioning
138	...Polarity reversing
139	.Switch actuation
140	..Power circuit controlled
141	..With time delay or retardation means
141.4	...Electrically initiated
141.8	...Series connected switches
142	..With locking, holding or braking means
143	..Electrical actuator
144	..Fluid-pressure actuator
145	WITH CURRENT COLLECTION OR TRANSFER
146	UNIDIRECTIONAL CONDUCTOR SYSTEMS
147	CONDUCTOR ARRANGEMENTS OR STRUCTURE
148	.Multipart-conductor current equalization
149	MISCELLANEOUS SYSTEMS
150	.Power packs
151	.Conversion systems
152	.Rate of change responsive systems
153	.Generator control systems
154	.For particular load device
155	..Plural diverse load devices
156	...Structural load device combinations
157	..Lamp or discharge device

CLASS 310 ELECTRICAL GENERATOR OR MOTOR STRUCTURE

DECEMBER 1990

1	EDUCATIONAL OR CONSTRUCTION UNITS OR KITS
300	NON-DYNAMOELECTRIC
301	.Nuclear reaction
302	..Contact potential difference
303	..P-N semiconductor
304	..Secondary electron emission
305	..Direct charge particle emission
306	.Thermal or pyromagnetic
307	..With heat actuated bimetal element
308	.Charge accumulating
309	..Electrostatic
310	...Friction
311	.Piezoelectric elements and devices
312	..Adding or subtracting mass
313 R	..Surface acoustic wave devices
313 A	....Orientation of piezoelectric material
313 B	....Interdigitated electrodes
313 C	.....Envelope or apodized
313 D	.....Grating or reflector in wave path
314	..Electrical systems
315	...Temperature compensation circuits
316	...Input circuit for simultaneous electrical and mechanical output from piezoelectric element
317	...Input circuit for mechanical output from piezoelectric element
318	...Input circuit for electrical output from piezoelectric element
319	...Electrical output circuit
320	..Piezoelectric slab having different resonant frequencies at different areas
321	..Combined with resonant structure
322	...Acoustic wave type generator or receiver
323	...Direct mechanical coupling
324	...Diaphragm
325	...Sandwich or Langevin type
326	..Combined with damping structure
327	...On back of piezoelectric element
328	..With mechanical energy coupling means
329	...Including inertia type operator
330	...Bending type
331	....Plural elements
332	.....Multimorph
333	...Shear or torsional type
334	...Acoustic wave type generator or receiver
335	....With lens or reflector
336	....Nondestructive testing type
337	....Underwater type
338	...Force or pressure measuring type
339	...Voltage, spark or current generator
340	..Encapsulated or coated
341	..With temperature modifier and/or gas or vapor atmosphere control
342	...For plural piezoelectric elements
343	...With heating element
344	...Sealed unit
345	..Supported by elastic material
346	..With temperature compensating structure
347	...Compensated air gap
348	..With mounting or support means
349	...Air gap
350	....Adjustable
351	...Suspended by thin member
352	....Point contact on major surfce only
353	....Contact at edges only
354	...Clamped
355	....Spring bias
356	.....90 degrees to major surface and margin clamped only
357	..Orientation of piezoelectric polarization
358	...Ceramic composition (e.g., barium titanate)
359	....More than one poling direction (e.g., Rosen transformer)
360	..Rotation of crystal axis (e.g., cut angle)
361	...Quartz
362	...Rochelle salt
363	..Electrode materials
364	...Multilayer
365	..Electrode arrangement
366	...More than two
367	..Piezoelectric element shape
368	...Rectangular plate
369	...Circular disc, ring, or cylinder
370	..."U" or "tuning fork" shape
371	...Sphere or hemisphere
10	DYNAMOELECTRIC
11	.Conducting fluid
12	.Linear
13	..Fixed and movable wound elements
14	..Solenoid and core type
15	.Reciprocating
16	..With cooling or temperature modification
17	..With other elements
19	...Speed control or time delay
20	...Motion-converting mechanism
21	....Pivoted or flat-spring armature
22	.....Plural armatures
23	....Solenoid and core type
24	.....Plural cores
25	..Reed type
26	..Magnetostrictive
27	..Fixed and movable wound elements
28	..Direct-connected
29	...Pivoted or flat-spring armature
30	...Solenoid and core
31	..Self-actuated interrupter
32	...Pivoted or flat-spring armature
33	....Plural armatures
34	...Solenoid and core
35	....Successively energized solenoid coils
36	.Oscillating
37	..With motion-converting mechanism
38	..Direct-connected
39	..With interrupter
40 R	.Rotary
40 MM	...Miniature motors
40.5	..Self-nutating or moving (e.g., oscillating fan, etc.)
41	..With mechanical starters
42	..With assembling, metal casting or machining feature
43	..Molded plastic
44	..Powdered metal
45	..Impregnated or coated
46	..Magnetic motors
47	...Portable or hand tool (e.g., dry shavers)
48	...With other elements
49 R	...Step-by-step
49 A	.....Claw-tooth and printed circuit components
50	..Portable or hand tool
51	..Vibration or noise suppression
52	..Cooling or fluid contact
53	...With control means
54	...Liquid coolant
55	...Nonatmospheric gas
56	...With gas purification or treating
57	...Intermediate confined coolant
58	...Circulation
59	....Plural units or plural paths
60 R	....Self-forced
60 A	......Hollow passages
61	.....Rotor passage

DYNAMOELECTRIC
.Rotary
..Cooling or fluid contact
...Circulation
....Self-forced
62 .....Suction pump or fan
63 .....Pressure pump or fan
64 ....Heat-exchange structure
65 .....Spacers (e.g., laminae, coils, etc.)
66 ..With other elements
67 R ...Inbuilt or incorporated unit
67 A .....Bicycle-hub generators
68 R ...Electric circuit elements
68 A .....Manually operable (e.g., switches, rheostats, etc.)
68 B .....Condition responsive (e.g., position, torque, etc.)
68 C .....Temperature, current-responsive, i.e., protectors
68 D .....Conversion elements, (e.g., transformers, rectifiers, etc.)
68 E .....Motion responsive (e.g., centrifugal switches)
69 ....Shaft-driven switch (e.g., blasting generators)
70 R .....Distributor or timer (e.g., ignition magnetos)
70 A ....Ignition systems
71 ....Connectors, terminals or lead-ins
72 ....Impedance devices
73 ....Illuminating devices
74 ....Inertia or fly-wheel device
75 R ...Drive mechanism
75 A .....Spring or gravity drive
75 B .....Hand- or foot-operated
75 C .....Rim drive (e.g., bicycle generator drive by wheel, rim, or tire)
75 D .....Flexible shaft or coupling and hollow shaft drive
76 ....Brake and clutch
77 ....Brake
78 ....Clutch
79 ....Shaft and armature timing or phasing connection
80 ....Motion conversion
81 .....Unbalanced weight (e.g., vibrators)
82 .....Swash plate
83 .....Gearing
84 .....Impulse coupling
85 ...Mechanical shields or protectors
86 ....Shield in air gap
87 ....Submersible
88 ....Dirt, moisture or explosion proof
89 ....Housings, windows or covers
90 ...Bearing or air-gap adjustment or bearing lubrication
90.5 ....Magnetic bearing
91 ...Supports
92 ..Torque-transmitting clutches or brakes
93 ...Brake type
94 ...Automatic control
95 ....By speed
96 ...With other drive mechanism
97 ....Output bias or resistance device
98 ....Drive motor
99 ....Gearing
100 ....Mechanical clutch
101 ...Plural units
102 R ...Generator-motor type
102 A .....Homopolar clutches
103 ...Magnetic field type
104 ....With air-gap shield
105 ....Induced or eddy current type
106 .....Magnetic reluctance feature
107 .....With collection means for induced current
108 ......Delivery to external device
109 ....Electric motor
110 ....Impedance
111 ..Generated wave-form modification
112 ..Plural units, structurally united
113 ...Motor-generator sets
114 ..Plural rotary elements
115 ...Field and armature both rotate
116 ....Limited movement
117 .....Mechanical bias
118 ....With interconnecting drive mechanism
119 .....Fluid-drive mechanism
120 .....Friction-drive mechanism
121 .....Mechanically controlled element
122 ......By additional dynamoelectric machine
123 ......Friction brake
124 ...Plural short-circuited rotary elements
125 ....Squirrel cage type
126 ...Plural armatures in common field
127 ..Plural collector-type machines
128 ...Commutator and slip-ring type
129 ....Synchronous or rotary converter
130 .....For plural wire D.C. system
131 ....Different armature circuits
132 .....Polyphase armature winding
133 ....Common armature winding
134 .....With plural field windings
135 ....Commutator in field circuit
136 ...Plural commutator type
137 ....Double current D. C. machines
138 .....Dynamotor type
139 .....Hetero-axial excitation
140 ....Plural armature windings
141 .....Plural field windings
142 ....Plural field windings
143 ...Plural slip-ring sets
144 ....Plural armature windings
145 .....Plural sets of poles
146 .....Polyphase windings
147 .....Slip rings in field circuit
148 ...Plural sets of brushes
149 ....Plural field windings
150 .....Polyphase arrangement
151 ....Short circuiting conductor between brushes
152 ..Permanent magnet machines
153 ...Inbuilt with flywheel (magneto)
154 ...Permanent magnet stator
155 ....Inductor type
156 ...Permanent magnet rotor
157 ..Vertically disposed
158 ..Universal (A.C. or D.C.)
159 ..A.C.
160 ...Frequency converters
161 ...Phase-shifter type
162 ...Synchronous
163 ....Reaction type
164 .....Toroidal coil
165 ....D.C. excited
166 ...Induction
167 ....With repulsion-starting
168 ....Inductor-type generators (variable reluctance)
169 .....High frequency
170 ......Multifrequency
171 ....Induction generators
172 ....Shifting field (e.g., shading pole)
173 ...Commutated
174 ....Single phase
175 .....Conduction operation
176 .....Transformer operation
177 ..D.C.
178 ...Homopolar
179 ..Windings and core structure
180 ...Field or excitation windings or structure
181 ....Combined permanent and electromagnet

DYNAMOELECTRIC
.Rotary
..Windings and core structure
...Field or excitation windings or structure
182 ....With short-circuited winding or conductor
183 .....Damper winding
184 .....Plural field windings
185 .....Plural sets of poles
186 .....Interpole, compensating or neutralizing poles
187 .....Slotted or divided pole
188 .....Differentially related
189 ....Variable length or tapped winding
190 ....Magnetic shunts for shifting field flux
191 ....Adjustable magnetic structure
192 ....Nonmagnetic inserts or air gaps
193 ....Nonuniform core cross section
194 ....Coil supports and spools
195 ...Armature or primary
196 ....Corona-prevention
197 ....With short-circuited winding or conductor
198 ....Plural windings
199 .....Combined stationary and rotary
200 ....Variable length or tapped windings
201 ....Bar windings
202 ....Open windings
203 ....Closed windings
204 .....Equalizers
205 .....Multiplex
206 .....Lap
207 .....Wave
208 ....Coils
209 ....Adjustable magnetic structure
210 ...Secondary windings or conductors
211 ....Squirrel cage
212 .....Inherently variable impedance (double squirrel cage)
213 ...Antiparasitic conductors (imbricated)
214 ...Coil retainers or slot closers
215 ...Slot liners
216 ...Core features
217 ....Securing laminae
218 ....Pole assembly and securing means
219 ..Current collectors
220 ...Spark-reduction
221 ....Arc extinguishers
222 ....Spark-neutralizing current
223 ....Flux compensators
224 .....Commutating poles or windings
225 .....Short-circuited coil circuit
226 .....Field-distortion
227 ...With cooling
228 ...With cleaning, lubricating, resurfacing or repairing
229 ...Brush-traversing
230 ...Circumferential brush shifting on reversal
231 ...Rotary structure
232 ....Slip rings
233 ....Commutators
234 .....Winding connectors
235 .....Molded support
236 .....Cylindrical or drum
237 .....Disc
238 ...Fixed structure
239 ....Brush holders or rigging
240 .....Brush-lifting
241 .....Circumferential adjustment
242 .....Brush engagements or guides
243 .....Fluid pressure-operated
244 .....Brush affixed to pivoted arm
245 .....Slidable brush
246 ......Pressure arm
247 ......Axial spring
248 ....Brushes
249 .....With electrical connector
251 .....Structure (e.g., composite material)
252 .....With composition feature
253 ......Carbonaceous
254 ..Stator structure
255 ...For railway-type machines
256 ...Stray field flux loss prevention
257 ...Interfitting or claw-tooth stators
258 ...Frame and core type
259 ....Core assembly
260 ....End turn supports
261 ..Rotor structure
262 ...High-speed rotor type
263 ...Interfitting or claw tooth rotors
264 ...Armatures
265 ....Drum
266 ....Hollow (e.g., double air gap)
267 ....Ring
268 ....Disc
269 ....Salient pole
270 ...End turn supports
271 ...Banding
272 ..Elements
273 ..Miscellaneous

CROSS-REFERENCE ART COLLECTION

800 PIEZOELECTRIC POLYMERS (E.G., MYLAR, PVDF)

DIGESTS

DIG 2 Hysteresis rotors and motors
DIG 3 Hall effect generators and converters
DIG 6 Printed-circuit motors and components

1	BARRIER OPENING WITH FLEXIBLE SEAL FOR OPERATOR
3	CANOPY OR CURTAIN TYPE

CLASS 313 ELECTRIC LAMP AND DISCHARGE DEVICES

DECEMBER 1990

1	PLURAL UNIT
2.1	.Cathode ray tube
3	.Inter-electrode connection
5	.Control electrode unit
6	..Plural control electrode units
7	WITH EVACUATING PUMP
8	ARC AND SEPARATE INCANDESCENT BODY
9	FILAMENT AND SEPARATE INCANDESCENT BODY
10	WITH TEMPERATURE INDICATOR
11	WITH TEMPERATURE MODIFIER
11.5	.Spark plug type
12	.Recirculating systems
13	.Having control means for the temperature modifier
14	.Pyroelectric type device
15	.Electric heater
16	..For liquid electrode
17	.Double wall, jacket or casing for envelope
18	..For conductive envelope devices
19	...With plural electrode temperature modifying
20	...With internal temperature modifying baffle
21	...Cylindrical electrode type envelope
22	..Fluid circulation type
23	...Plural electrode temperature modifying
24	...Flow directing means in casing
25	..Sealed casing for envelope
26	...Integral double wall type of envelope
27	..Heat conserving or insulating type
28	..Plural electrode temperature modifying
29	.For liquid electrode
30	.Hollow electrode or lead
31	..Tubular coil electrode
32	..Closed duct type (e.g., for liquid)
33	.Envelope with internal temperature modifying baffle
34	.Envelope with condensing chamber or surface
35	.Using liquids or fluid flow directing means
36	..Jacket or casing
37	.For filament or heated cathode
38	..Hollow shield around filament or cathode
39	.For electrode within an envelope
40	..Radiating type surface
41	...Material, roughened surface
42	.Mounted on lead-in or electrode support
43	.For lead-in-seal or stem protection
44	.For envelope wall
45	.Radiating type surface
46	.Having heat conducting path
47	.Heat conserving or insulating type
48	WITH HANDLE
49	WITH DETACHABLE ELECTRICAL CONNECTOR OR SUPPORT
50	.Resilient or vibration damping
51	.Electrical connector
52	CONVERTIBLE
53	FLAME OR EXPLOSION TYPE
54	WITH RADIOACTIVE MATERIAL
62	CYCLOTRONS
359.1	WITH POSITIVE OR NEGATIVE ION ACCELERATION
360.1	.Plural apertured electrodes
361.1	.Means for deflecting or focusing
362.1	.Supplying ionizable material (e.g., gas or vapor)
363.1	.Extraction or target electrode
364	CATHODE RAY TUBE
365	.Image pickup tube
366	..Semiconductor depletion layer type
367	...Mosaic
368	....Plural junction
369	..Mechanically responsive (e.g., sound)
370	..Particular transparent conductor
371	..With optical element
372	...Light conducting fiber or rod
373	..With photoemissive cathode
374	...Mosaic
375	...Plural photoemissive layers
376	...With target
377	....Secondary electron emissive
378	....Support
379	...Secondary electron emissive
380	...Special ray sensitive
381	...Image dissector
382	...Focusing
383	...Electrode or electrode support
384	..Photoconductive
385	...Layer composition
386	....Plural layers
387	...Secondary electron emissive
388	...Special ray sensitive
389	...Focusing
390	...Electrode or electrode support
391	.Storage
392	..Depletion layer type storage element
393	..Double ended
394	..Continuous storage element
395	..Foraminous storage element
396	..With non-beaming gun
397	..With display
398	...Integral or contiguous storage and display element
399	.Secondary emissive electrode
400	..With display
401	..Monoscope
402	.Shadow mask, support or shield
403	..Non-circular aperture
404	..With resilient support
405	...Bimetallic
406	...With studs
407	..With frame
408	..With screen
409	.Plural beam generating or control
410	..With character forming electrode
411	..One cathode source of plural beams
412	..Convergence
413	..With deflection
414	..With focusing and accelerating electrodes
415	..With screen
416	...Including non-planar elements
417	..With electrode support
418	.Signal translating output electrode
419	..Plural
420	.Electron permeable window
421	.Beam deflecting means
422	..Flat tube type
423	..Electron reflecting mirror
424	..Ion trap
425	..Centering
426	..Plural
427	...Three or more
428	....With convergence
429	....Field varied near screen (i.e., post deflection)
430	.....By external element
431	....Plural magnetic
432	...Electrostatic
433	....Magnetic
434	....Nonparallel or asymmetric
435	.....Nonplanar
436	....Enclosed or overlapping
437	....With distortion correction
438	....With support
439	..Electrostatic
440	..With yoke
441	.Ray generating or control
442	..With magnetic focus
443	...Internal
444	..Sandwiched electrodes

	CATHODE RAY TUBE
	.Ray generating or control
445	..Canted electrode (i.e., ion trap)
446	..Including cathode assembly
447	...With control grid adjacent cathode
448	....With anode
449	.....With additional electrode
450	......With coating or spiral electrode
451	......With support
452	...With focus electrode adjacent cathode
453	....Noncircular beam type
454	....Nonplanar cathode
455	.....Brillouin beam type
456	..With support for electrode
457	...Parallel rod type
458	..Electrode
459	...Movable
460	...Plural
461	.Screen
462	..Scale or graticule
463	..Electroluminescent
464	..Incandescent type
465	..Light valve type
466	..Nonluminescent layer
467	..Phosphor composition
468	...Rare earth
469	...Embedded in face plate
470	..Mosaic
471	...Beam indexing element
472	...Dot type
473	..Plural layer type
474	..With optics
475	...Light conducting fiber or rod
476	..Support
477 R	.Envelope
477 HC	...With details of high-voltage connector
478	..With external optical element
479	..Coating or shielding
480	..Composition
481	..With getter or gas
482	..Support for electrode or envelope
93	GEIGER-MUELLER TYPE
523	PHOTOSENSITIVE
524	.With optical device
525	.Having phosphor screen
526	..Proximity focus type
527	..Photocathode responsive to phosphor
528	..With electron multiplier
529	..With control electrode
530	..With photocathode on envelope
531	.Having plural photosensitive electrodes
532	.Photomultiplier
533	..Having plural dynodes
534	...Channel or circular type
535	...Venetian blind type
536	...Box or linear type
537	.Having a control electrode
538	.Gas phototube
539	.Responsive to ultraviolet radiation
540	.Having plural anodes or cathodes
541	.Having photocathode on tube wall
542	.Photocathode
543	..With phosphor
544	..With envelope
103 R	.SECONDARY EMITTER TYPE (E.G., ELECTRON MULTIPLIER)
103 CM	..Channel multiplier
104	.Plural secondary emissive electrodes
105 R	..Three or more
105 CM	....Channel multiplier
106	SECONDARY EMISSION PREVENTION
107	.Nonemissive material
107.5	VARIABLE WIDTH ELECTRON STREAM (E.G., MAGIC EYE)
483	WITH LUMINESCENT SOLID OR LIQUID MATERIAL
484	.With gaseous discharge medium
485	..Phosphor on envelope wall
486	...Including particular phosphor
487	....Plural
488	...Aperture-type tube
489	...With protective coating or filter
490	...With amalgam
491	...Electrode structure or material
492	....With shield or additional electrode
493	...Envelope structure or material
494	.Coplanar electrodes
495	.Vacuum-type tube
496	..Phosphor on anode segments
497	...With accelerating or control electrode
498	.Solid-state type
499	..Semiconductor depletion layer type
500	...Matrix or array
501	...Light conversion
502	..With phosphor embedding material
503	..With particular phosphor or electrode material
504	...Organic phosphor
505	..With electrode matrix
506	..Plural layers
507	...With photosensitive layer
508	...With piezoelectric layer
509	...With dielectric layer
510	..With character display (e.g., digits or letters)
511	..Flexible
512	..With envelope or encapsulation
513	WITH CHARACTER DISPLAY (E.G., DIGITS OR LETTERS)
514	.Gaseous discharge medium
515	..With character-shaped envelope
516	..Electrode with character-shaped aperture
517	..With electrode display segments
518	...With dielectric layer or coating
519	...Multiple display (i.e., side-by-side)
520	..With integrant display electrode
521	...Stacked electrodes (i.e., superimposed)
522	.Incandescent filament display
110	WITH OPTICAL DEVICE OR SPECIAL RAY TRANSMISSIVE ENVELOPE
111	.Plural diverse optical devices
112	.Polarizer or special ray transmission (e.g., filter)
113	.Reflector
114	..Plural reflectors
115	..Multiple filament lamps
116	.Light diffusing
117	.Light valve or obscuring means
118	SPARK PLUGS
119	.Sealing-off valve for electrode chamber
120	.With fluid feed or air vent
121	.Reversible (e.g., part)
122	.Removable electrode on shell
123	.Plural series gaps
124	..Intensifier in center electrode lead-in
125	.Movable electrode (e.g., for cleaning, adjustable)
126	..Automatically moved (e.g., engine vibration)
127	.Cleaner (e.g., movable scraper)
128	.Plural insulated electrodes with individual lead-in
129	.With transparent part
130	.Non-conducting material in or adjacent gap (e.g., restricts spark)
131 R	..Non-shortest line spark and surface spark type
131 A	....Spark plugs with semiconductive material at the gap
132	.Capillary groove or space
133	.Ball electrode

	SPARK PLUGS
134	.With radio shielding
135	.With particular connector structure
136	.Plural part center electrode lead-in
137	.Plural part insulating means
138	.Electrodes are pure figures of revolution about plug axis
139	.Ring or disk electrode (e.g., sector)
140	.Plural parallel gaps (e.g., main and standby, serrated electrode)
141	.Particular electrode structure or spacing
142	..Gap on and along axis
143	.Shaped electrode chamber, insulator end, shell skirt, baffle or gas directing means
144	.With specific joint structure
145	..Between center electrode and insulator
146	WITH MOVABLE ELECTRODE OR SHIELD
147	.Plural
148	.Movable envelope wall
149	.Rotary
150	.Movable liquid electrode
151	.Thermal actuator
152	.Magnetic actuator
153	WITH MAGNETIC DEVICE
154	.For generating plural fields
155	.Electrode generates field
156	.Field transverse to discharge
157	..Concentrically arranged electrode with axial field
158	...Pole pieces facing electrode ends
159	....Electrode support penetrates pole piece
160	.With envelope
161	..Gas or vapor type
162	..Three or more electrodes
163	LIQUID ELECTRODE DISCHARGE DEVICES
164	.Shock absorber for liquid
165	.Plural liquid electrodes
166	.Starting band or external electrode
167	.Apertured electrode (e.g., grid) interposed in discharge space
168	.Plural anodes in separate envelope chambers
169	.Plural anodes with anode arc shield
170	.Auxiliary starting or holding electrode
171	..Immersed in liquid electrode
172	.Liquid in contact with plural electrodes
173	.Cathode spot anchoring
545	HAVING VALVE WITH GETTER, GAS/VAPOR GENERATING MATERIAL OR PRESSURE CONTROL MEANS
546	WITH FRANGIBLE CAPSULE CONTAINING GETTER, GAS OR VAPOR GENERATING MATERIAL
547	HAVING HEATING MEANS TO CONTROL GAS/VAPOR,GAS OR VAPOR GENERATING MEANS OR GETTER MEANS
548	.Incandescent lamp gettering
549	.Discharge device gettering
550	.Vapor generating
551	.Gas generating
552	HAVING PRESSURE CONTROL OF GAS OR VAPOR
553	WITH GETTER
554	.Plural
555	..Diverse
556	.And vapor generator
557	.Incandescent lamp type
558	.Electrode includes getter, supports getter or is connected to getter
559	.Mounted on electrode support
560	.With structure to direct or shield from getter
561	.With contained getter
562	.Gas or vapor device type
563	HAVING GAS GENERATING MATERIAL
564	HAVING VAPOR GENERATING MATERIAL
565	.Mercury vapor material
566	.Electrode or electrode support includes material
567	WITH GAS OR VAPOR
568	.Having a particular total or partial pressure
569	..Incandescent lamp
570	..Greater than 760 torr
571	...Includes mercury in gas or vapor fill
572	..One torr thru 760 torr
573	...Having specified envelope detail
574	...With electrode structure
575	....Composite
576	.....With rare gas
577	..Less than .1 torr
578	.Incandescent filament lamp
579	..Tungsten-Halogen cycle lamp
580	..With filter, barrier, screen, shield, electric terminal or fuse
581	.Three or more electrode discharge device
582	..Multiple gaseous discharge display panel
583	...Having electric terminal detail
584	...Having intersecting electrode sets
585	....With three sets of electrodes
586	....With dielectric member
587	.....And additional layer on member
588	..Amplifier, cathanode, or ionic cathode
589	..Counter, indicator or switching tube
590	..With shield to prevent discharge between electrodes
591	..Having cathode heater
592	...With control electrode
593	....Plural
594	..Start electrode exterior to envelope
595	..Internal start or control electrode between discharge electrodes
596	...Strip electrode
597	...Interposed apertured electrode
598	....Mean free-path spacing
599	....Plural serial apertured electrodes
600	...Two interposed electrodes
601	..Start electrode not in main discharge path
602	...Trigger electrode concentric with discharge electrode
603	...Triggerable vacuum gap device
604	..Plural serial electrodes
605	.Mean free-path spacing of envelope portions or content parts
606	..Electrode spacing related to mean free path length
607	.Having electrode exterior to envelope
608	.Single electrode type discharge device, or including particulate material
609	.Having baffle, partition or constricting means affecting discharge
610	..Partition
611	..Constriction means
612	...Substantially full length of discharge path
613	.Having electrode shield
614	..With anode shield
615	..Crater electrode with shield
616	..With positive ion or cathode shield
617	.Having spur electrode
618	.Having hollow cathode
619	.Negative or cathode glow device
620	.Having specified electrode spacing
621	.Having electrodes with geometrical relationship
622	.Discharge device with diverse electrodes
623	.Having electrode lead-in or electrode support sealed to envelope

WITH GAS OR VAPOR
.Having electrode lead-in or electrode support sealed to envelope
624 ..End cap seal
625 ..End plug seal
626 .Having lead-in shield
627 .Having electrode heated by space discharge current
628 ..Coil type
629 .Having resistance heated cathode
630 .Having electrode of alkali, alkaline or rare earth material
631 .Having particular electrode structure
632 ..Cathode or anode
633 .Electrode composition
634 .Envelope with particular structure
635 ..Envelope layer or coating
636 .Envelope composition
637 .With particular gas or vapor
638 ..With metal vapor
639 ...Mercury vapor
640 ....And rare earth metal
641 .....With rare gas
642 ....And rare gas
643 ..One or more rare gases
230 DISCHARGE DEVICE WITH POSITIVE ION EMITTER
231.01 FLUENT MATERIAL SUPPLY OR FLOW DIRECTING MEANS
231.11 .Lightning or surge arrester
231.21 ..Expulsion type
231.31 .Plasma
231.41 ..Arc discharge type
231.51 ...With tangential fluent supply
231.61 ...Electromagnetic output (i.e., light)
231.71 .Arc discharge lamp or radiation source
232 ELECTRODES IMMERSED IN LIQUID
233 INVOLVING PARTICULAR DEGREE OF VACUUM
234 ELECTRODE EXTERIOR TO ENVELOPE
235 IMPERFECT ELECTRICAL CONTACT BETWEEN ELECTRODES
236 STAND-BY ELECTRODE TYPE (WITH SPARE ELECTRODE)
237 WITH ELECTRODE REPLACEMENT MEANS OR DEMOUNTABLE
238 WITH SUPPORT AND/OR SPACING STRUCTURE FOR ELECTRODE AND/OR SHIELD
239 .For shield
240 ..Shield supported by electrode, electrode support or spacer
241 ...Extending across ends of plural discharge device electrodes
242 ..Shield supported by or forming part of envelope stem
243 .For plural electrodes of discharge device
244 ..Envelope supports or forms electrode
245 ...Plural discharge spaces formed by three or more electrodes
246 ...Electrode forms part of envelope
247 ....Hollow electrode with another electrode supported by end structure
248 ...Conductive envelope supports plural electrodes
249 ...Elongated envelope with electrodes spaced along length
250 ....With spacer between electrodes or electrode supports
251 ....Plural electrodes supported along the length of a wire, rod or tube
252 ...Support structure supported by the envelope
253 ....At spaced or opposed portions of envelope
254 .....At three or more portions of envelope
255 .....Same electrode supported by spaced or opposed portions
256 ....Insulating or ceramic support rod or tube
257 ....With spacer between electrode or electrode supports
258 .....Spacer between envelope and support or electrode
259 .....Insulating coating forms spacer
260 .....Plate or bar extending across ends of electrodes
261 ......Plates or bars at opposed ends of electrodes
262 .....Ceramic bead for joining parts
263 ....With indirectly heated cathode
264 ....With U-shaped, V-shaped or plural sections filament
265 ....Apertured electrode (e.g., grid) supported between two other electrodes
266 ....Stem or envelope structure
267 ..Plural rod electrodes
268 ..Insulating spacer between discharge electrodes
269 .With vibration damping device
270 .For indirectly heated cathode
271 .For filament
272 ..Plural filaments
273 ..Plural section filament
274 ..Supports supported by opposed parts of envelope
275 ..Insulator supports filament
276 ...Conductive member supports insulator
277 ...Insulating standard supports filament brackets or anchors
278 ..Tension device for filament
279 ..Support intermediate of filament ends
281 .Support mounted in or around aperture in conductive wall or plate
282 .Conductive envelope supports electrode
283 .Electrode supported by envelope
284 ..Electrode supporting member supported by envelope
285 ...Supporting wire, rod or tube supported by envelope
286 ....At spaced or opposed portions of envelope
287 ....Support collar surrounding envelope stem
288 ....Spacer between envelope and support or electrode
289 ....Ceramic or insulating support
290 ....Stem or envelope structure
291 ..Electrode formed by coating on envelope
292 .Supporting and/or spacing elements
293 DISCHARGING DEVICES WITH APERTURED ELECTRODE (E.G., GRID) INTERPOSED BETWEEN TWO ELECTRODES
294 .Non-uniformly spaced from another electrode
295 .Interposed electrode with non-uniform mesh area (e.g., variable mu)
296 .Plural interposed apertured electrodes
297 ..Serially arranged
298 ...Plural inter-electrode discharge spaces
299 ...Aligned apertures (e.g., beam power)
300 ...Three or more serially arranged
301 ..Plural inter-electrode discharge spaces
302 .Plural cathodes
303 .Three or more non-emissive electrodes (e.g., plural anodes)
304 .Plural-parallel-section cathode with electrode surrounding each section
305 DISCHARGE HEATED ANODE TYPE (E.G., CATHANODE)

306	DISCHARGE DEVICES HAVING THREE OR MORE ELECTRODES
307	.Four or more electrodes
308	.Discharge control electrode
309	DISCHARGE DEVICES HAVING A MULTIPOINTED OR SERRATED EDGE ELECTRODE
310	DISCHARGE DEVICES HAVING A THERMIONIC OR EMISSIVE CATHODE
311	DISCHARGE DEVICES HAVING AN ELECTRODE OF PARTICULAR MATERIAL
312	WITH CASING OF JACKET FOR ENVELOPE
313	WITH ELECTRICAL SHIELD OR STATIC CHARGE DISTRIBUTION MEANS
314	NON-REPAIRABLE
315	INCANDESCENT LAMPS
316	.Plural filaments or glowers
317	WITH ENVELOPE
318	.With base or connector
323	COMBINED
324	.With casing or jacket
325	MISCELLANEOUS DISCHARGE DEVICES
326	ELECTRODE AND SHIELD STRUCTURES
327	.Self-baking electrodes (e.g., Soederberg)
328	.Liquid electrode container
329	.Mosaic electrodes
331	.With lead wire or connector
332	..Inserted section or material
333	..Filament or wire shield or electrode
334	..Non-metallic electrode or shield
335	..Rod electrode or shield
336	.Point source cathodes
337	.Indirectly heated cathodes
338	..Plural separate cathode sections
339	..Interior emissive hollow cathodes
340	..Insulating material between heater and cathode
341	.Filament or resistance heated electrodes
342	..Non-inductive
343	..Plural wires or strands
344	..Coiled
345	..Coated
346 R	.Cathodes containing and/or coated with electron emissive material
346 DC	...Dispensator cathode
347	.Incandescible upon electron bombardment
348	.Foraminous electrodes (e.g., grids) or shields
349	..Non-uniform mesh area or non-straight electrodes or non-uniform cross-sectional area electrodes
350	..Rods, wire or mesh supported on rod or post
351	.Multi-pointed or serrated edge electrode
352	.Composite electrodes or shields
353	..With non-discharge-sustaining portion
354	..Cored rod
355	..Coated or laminated
356	.Tubular or hollow sleeve
357	.Rods
358	MISCELLANEOUS (E.G., ELECTROLYTIC LIGHT SOURCE)

DIG 7	Bombardment induced conductivity

CLASS 314 ELECTRIC LAMP AND DISCHARGE DEVICES, CONSUMABLE ELECTRODES

DECEMBER 1990

1 AUTOMATIC SUBSTITUTION OF DISCHARGE DEVICE, ELECTRODE OR LAMP
2 .With current-shifting switch
3 .Differential separation type
4 .Common electrode-operating type
5 ..Electrode magazine type
6 ..Current- and/or potential-actuated release
7 PLURAL DEVICES
8 .Series-connected
9 WITH SIGNAL, INDICATOR AND/OR ALARM
10 WTH AUTOMATIC SHUNT AND/OR CUTOUT
11 .Shunt circuit closing
12 ..Regulating magnet placed in the shunt
13 ..With compensating impedance
14 ...Feed-regulating mechanism, actuated switch
15 ..Current- and/or potential-actuated switch
16 ...Feed-regulating mechanism, actuated switch
17 .Switch-operated type
18 ..Current- and/or potential-actuated switch
19 ...Feed-regulating mechanism, switch-actuated type
20 WTH DISCHARGE-DEFLECTING MEANS
21 WITH AUXILIARY MATERIAL SUPPLY TO THE DISCHARGE
22 .Fluent material feed
23 WITH ELECTRODE TIP CLEANER OR FILM-PUNCTURING MEANS
24 .Repeated contact type
25 WITH ECONOMIZER
26 WITH VENTILATOR, FUME FLOW SHIELD, FUME CONDENSER AND/OR TEMPERATURE-MODIFYING MEANS
27 .Movable type, connected to the electrode or electrode-moving mechanism
28 .Ventilator, fume director and/or condenser
29 .Liquid-circulating type
30 .Radiating transmitter type
31 POLYPHASE A.C. SUPPLY
32 WITH TRANSFORMER IN SUPPLY LINE
33 THREE OR MORE SERIES-CONNECTED ELECTRODES
34 WITH AUXILIARY-STARTING ELECTRODE
35 WITH AUXILIARY-CONTROL ELECTRODE FOR THE ELECTRODE-MOVING MECHANISM
36 PLURAL CATHODE AND/OR ANODE TYPE
37 .Consumption feed type
38 .Interconnectd feed operator
39 OSCILLATORY AND/OR ROTARY ELECTRODE MOTION TYPE
40 .Interconnected feeding and oscillating and/or rotating mechanism
41 ..Rotary motion-type power supply
42 .Rotary electrode
43 ..Plural rotary electrode
44 DISK OR PLATE ELECTRODE TYPE
45 INCLINED OR PARALLEL ELECTRODES
46 .Pivoted electrode
47 ..Plural pivoted electrodes
48 ...Linear feed
49 ..Linear feed
50 .Interconnected feed operator
51 PLURAL MOVABLE ELECTRODES
52 .Plural electrode feeding
53 ..Interconnected operator
54 ...With separate movement of one electrode
55 ...With diverse rates of feed
56 ...Gear-, belt-, or chain-connected
57 MANUAL FEED
58 .With power drive
59 CONSUMPTION FEED TYPE
60 .Electrodes
61 FLUID TRANSMISSION
62 MOTOR SPEED-CONTROLLED
63 RADIANT ENERGY RESPONSIVE CONTROL TYPE
64 ELECTRIC DISCHARGE CONTROL CIRCUIT
65 WITH ELECTRODE SEPARATING MECHANISM AND FEEDING MECHANISM
66 .Electromagnetic separating
67 ..Electromagnetic feed
68 POSITIVE FEED
69 .Rotary electric motor
70 ..With motor-braking
71 ..With motor circuit impedance regulator
72 ...Switch-controlled motor circuit
73 ..Switch-controlled motor circuit
74 ...With regulation of switch operator
75 ..Auxiliary motor circuit current supply
76 ..Differential wound armature and/or field
77 .Pawl and ratchet
78 .Electromagnetic operator
79 .Power-transmission control
80 ..Gear train
81 ...Reversible
82 ESCAPEMENT FEED CONTROL
83 DETENT OR BRAKE-CONTROLLED ROTARY FEED MEMBER OR GEAR
84 .Movable feed frame type
85 ..Pivoted frame
86 ...Multiple magnet-operated
87 .Locked during separating stroke
88 ..Positive-acting brake or detent
89 THERMOSTATIC OPERATOR OR CONTROLLER
90 .With mechanical energy-storing device
91 WITH RESILIENT OR LOST MOTION CONNECTION
92 WITH MECHANICAL ENERGY-STORING DEVICE
93 .Rod gripper biasing type
94 .With electric motive power
95 ..Biased lever
96 ...Spring-biased
97 ..Spring-biased
98 WITH ELECTRODE COUNTERBALANCE
99 WITH RETARDER
100 .Retarded feeding type
101 RELEASABLE ELECTRODE OR RODGRIPPER TYPE
102 .Plural clutches
103 .With separation limit stop
104 .Magnetic clutch
105 .Electromagnetically operated
106 ..Plural electromagnet coils
107 ...Three or more
108 ...Interconnected lever systems
109 ....Common oscillating lever or armature
110 ...Coaxial coils
111 ..Concentric magnet and electrode
112 SLIDING ELECTRODE TYPE
113 ELECTROMAGNETIC OPERATOR AND/OR FEED-CONTROLLING
114 .With control of the electromagnet circuit
115 ..With current or voltage regulator
116 ...Current- or potential-responsive
117 ..Shunt magnet control
118 ...With control of series magnet
119 .With electromagnetically operated separating
120 ..Movable coil
121 ..Plural coils
122 ...Three or more
123 ...Interconnected lever system
124 ....Common oscillating lever or armature
125 ...Coaxial coils
126 ...Opposed magnetic flux type
127 ..Concentric magnet and electrode
128 .Vibration-damped electromagnet
129 WITH CURRENT-TRANSFER DEVICE
130 FRAMES AND ELECTRODE SUPPORTS
131 .With electric switch

FRAMES AND ELECTRODE SUPPORTS
132 .With electric impedance
133 .With electrode guides
134 .Adjustable electrode supports
135 WITH CURRENT OR VOLTAGE REGULATOR
136 MISCELLANEOUS

CLASS 315 ELECTRIC LAMP AND DISCHARGE DEVICES, SYSTEMS

DECEMBER 1990

1	CATHODE RAY TUBE CIRCUITS
3	.Combined cathode ray tube and circuit element structure
3.5	..Traveling wave tube with delay type transmission line
3.6	...Line with plural characteristics or plural lines
4	..Inductor or distributed parameter type inductive structure
5	...Ray passes in or through a hollow distributed parameter device
5.11	....With a secondary emission stage
5.12	.....Secondary emission passes through or in the hollow device
5.13	....With a magnetron
5.14	....Plural rays pass through or in the hollow device
5.15	.....Rays merged at the hollow device
5.16	.....Plural hollow devices
5.17	......Feed-back by ray
5.18	....Ray returns to the hollow device, e.g., reflex type
5.19	.....By same path and/or to same aperture
5.21	......Device tunable
5.22	.......Device has a flexible wall
5.23	........Thermally controlled
5.24	....Deflecting or reflecting the ray
5.25	.....Ray sweeps over an aperture or slot in the hollow device
5.26	.....Device deflects the ray
5.27	......Plural hollow devices
5.28	.....Plural hollow devices
5.29	....Ray has appreciable transverse electrical dimension and/or significant shape
5.31	.....Hollow ray
5.32	.....Disk shaped ray
5.33	....Device also a ray anode or cathode
5.34	....Focusing and/or concentrating the ray
5.35	.....By magnetic field
5.36	....Device removable from its grids
5.37	....Device has particular grid structure
5.38	....With particular collector or anode structure
5.39	....Plural hollow devices
5.41	.....Accelerating or decelerating the ray between the hollow devices
5.42	.....Devices excited to accelerate the ray across their gaps, e.g., synchrotrons
5.43	.....Devices of different resonance frequency
5.44	.....Feed-back connection between the hollow devices
5.45	......Three hollow devices
5.46	.....Device tunable
5.47	......Gang tuned hollow devices
5.48	......Device has a flexible wall
5.49	.....Three hollow devices
5.51	....Plural gaps in the hollow device
5.52	....Device has a re-entrant portion surrounding the ray
5.53	....Device tunable
5.54	.....Device has a flexible wall
7	...Connected to the deflecting electrodes
8	.Compensating for stray deflecting fields
8.51	.Pulse storing
8.61	..Plural cathode ray tubes or ray type tubes
9	.Plural cathode ray tubes in the circuit
10	.With radiant energy sensitive control means
11	..With secondary emission stage in the cathode ray tube
12.1	.With secondary emission stage in the cathode ray tube
13.1	.Plural ray type tube
13.11	..Storage tubes
14	.Plural concentrating, accelerating and/or de-accelerating stages
15	..Three or more stages
16	...Intermediate stage at lower potential
17	..With ray deflecting stage interposed between plural concentrating or accelerating and/or de-accelerating stage or co-extensive with one such stage
364	.Cathode ray deflections circuits
365	..Symbol generator
366	..For flat cathode ray tube
367	..Including a digital to analog device
368	..Including color convergence control
369	..Target controls deflection circuit
370	..With ray deflection distortion correction or reduction
371	...By modulation of deflection waveform
372	..For cathode ray tube having plural targets
373	...Targets radially about cathode
374	...Targets in single plane
375	..For plural phosphor target tube
376	...With post deflection phosphor selection
377	..With marker
378	..Circular, spiral or radial sweeps
379	..With additional control of cathode ray
380	...Control only at turn-on or turn-off of circuit
381	....Circuits controls grid-cathode circuit of tube
382	...With focusing of ray
382.1	....For television
383	...Intensity control of ray
384	....Ray blanking
385	....Ray unblanking
386	....With ray control responsive to deflection circuit
387	..Including feedback circuit
388	...Plural feedback circuits
389	...Negative feedback
390	....Tube type circuit
391	..Plural deflection circuits
392	...Plural waveform display circuits
393	...Inter-connected sweep circuits
394	...Plural deflections in one plane
395	..Plural potentials or currents applied to deflection member
396	...Push-pull deflection circuit
397	....Coil type circuit
398	...With cathode ray centering
399	..Deflection coil circuit
400	...Including a saturable element
401	...Including a temperature responsive element
402	...Including a voltage dependent resistor
403	...Including an amplifier
404	....Tube type amplifier
405	.....With transformer connecting amplifier to coil
406	......With power recovery circuit
407	.....With diode or amplifier across coil
408	...Including solid state switch
409	..Including a discharge device
410	...With device discharging a condenser
30	.Ray modulation
411	.Power supply from deflection circuit source
32	COMBINED LOAD DEVICE OR LOAD DEVICE TEMPERATURE MODIFYING MEANS AND ELECTRICAL CIRCUIT DEVICE STRUCTURE
33	.Portable self-contained

COMBINED LOAD DEVICE OR LOAD DEVICE TEMPERATURE MODIFYING MEANS AND ELECTRICAL CIRCUIT DEVICE STRUCTURE
34 .With antenna
35 .Plural discharge device loads
36 ..Series connected discharge devices
37 ..Cathode-anode circuit connected to the discharge control electrode of another discharge device load (e.g., cascade)
38 ..Corresponding electrodes connected by a circuit impedance (e.g., push pull)
39 .Discharge device load with distributed parameter type transmission line (e.g., wave guide, coaxial cable)
39.3 ..Traveling wave type with delay type transmission line
39.51 .Distributed parameter resonator type magnetron
39.53 ..With output coupling means
39.55 ..Variable tuning
39.57 ...Electron emission type
39.59 ...Thermal or magnetic actuator
39.61 ...Movable tuning element (e.g., slug)
39.63 ..With control electrode, secondary emitter, or auxiliary anode or cathode
39.65 ..Having diverse size resonators
39.67 ..Tubular anode with eccentric or axially displaced cathode
39.69 ..With strapping for resonant structure
39.71 ..Magnetic field generating and pole structure
39.73 ..Interdigital electrode
39.75 ..Anode with plural cavities
39.77 ..With resonant cavity coupled to anode
40 .Electrode formed as inductive impedance
41 .Inductive impedance connected between electrodes of a discharge device load
42 ..Connected to plural anodes or plural cathodes
43 ..Connected to control electrode
44 ...With capacitive impedance connected to the control electrode
45 ..With diverse type impedance
46 .Filament, electric heater, or resistance in shunt with the discharge electrodes of a discharge device load
47 ..Automatic switch in the shunt circuit
48 ..Cathode or cathode heater in the shunt circuit
49 .Filament or electric heater in series with a discharge device load
50 .Load device temperature modifying means combined with or forming circuit impedance means
51 .Plural circuit elements
52 ..Plural impedance elements
53 ...Diverse types of impedances
54 ...Plural inductive impedances
55 .Electric generator or piezoelectric device
56 .Discharge device load
57 ..Discharge device and transformer
58 ..Discharge device and circuit impedance
59 ...Impedance connected between two electrodes
60 ....Impedance connected to an auxiliary starting electrode
61 ....Discharge control discharge device
62 ...Inductive impedance
63 ..Discharge control discharge load
64 .Multiple filament load devices
65 ..Automatic substitution of the filament
66 ..Series connected filaments
67 ..Diverse resistance filaments
68 ..Three or more controlled filament circuits
69 ..Plural filaments energized in parallel
70 .Load device and transformer
71 .Load device and impedance
72 .Load device and periodic electric switch
73 .Electric switch inside evacuated or gas filled envelope
74 .Automatic shunt circuit closing or cut-out switch
75 ..Shunt circuit closing
76 SPECIAL APPLICATION
77 .Vehicle
78 ..Vehicle motor or vehicle motion driven generator
79 ..Vehicle or engine speed controlled
80 ..Load device controller combined with vehicle controller
81 ...Steering mechanism controlled
82 ..Head light systems
83 ...Alternate circuit closing
84 .Door or closure controlled load device
84.51 PULSE STORING SYSTEMS OF THE GASEOUS DISCHARGE TUBE TYPE
84.61 .With plural cathode or anode tube
85 WITH ELECTROMAGNETIC WAVE RADIATION PREVENTING OR SHIELDING MEANS
86 AUTOMATIC SUBSTITUTION OF THE POWER SUPPLY
87 .With load device or electrode substitution
88 AUTOMATIC SUBSTITUTION OF THE LOAD DEVICE OR ELECTRODE
89 .Plural substitution of load devices or electrodes
90 .Plural load devices with selective substitution of load device or electrode
91 .Over-voltage or over-current controlled substitution
92 .Diverse type load device or electrode substituted
93 .With current shifting switch
94 WITH CATHODE OR CATHODE HEATER SUPPLY CIRCUIT
95 .Plural load device systems
96 ..Series connected cathodes or heaters
97 ..Pulsating or A.C. supply to the cathode or heater circuit
98 .Plural cathodes or heaters in the load device
99 ..Series connected cathodes or heaters
100 ...Thermostatic switch in the series circuit
101 .Discharge device and/or rectifier in the cathode or heater circuit
102 .Delayed application of the discharge potential
103 ..With surge generator in the discharge circuit
104 ..Thermostatic controlled delaying means
105 .Pulsating or A.C. supply to the cathode or heater circuit
106 ..Automatic cut-out or voltage regulator in the cathode or heater circuit
107 .Automatic cut-out or voltage regulator in the cathode or heater circuit
108 CONFINED GAS OR VAPOR TYPE LOAD DEVICE WITH PRESSURE REGULATING MEANS
109 .Auxiliary discharge type
110 .Valve controlled
111.01 DISCHARGE DEVICE LOAD WITH FLUENT MATERIAL SUPPLY TO THE DISCHARGE SPACE
111.11 .With tangential fluent material supply
111.21 .Plasma generating
111.31 ..With extraction electrode
111.41 ..With magnetic field

	DISCHARGE DEVICE LOAD WITH FLUENT MATERIAL SUPPLY TO THE DISCHARGE SPACE
	.Plasma generating
	..With magnetic field
111.51	...Induction type
111.61	...Acceleration
111.71	...Plasma containment
111.81	.Electron or ion source
111.91	..Gas ionization type (e.g., ion pump or gauge source)
112	WITH LOAD DEVICE TEMPERATURE MODIFIER
113	.Plural load device systems
114	..Electric heater for the load devices
115	.Electric heater for the load device
116	..Automatic cut-out or voltage regulator for the heater circuit
117	.Automatic control of the temperature modifier
118	.Load device circuit controlled by the temperature modifying medium
119	WITH AUTOMATIC SHUNT AND/OR CUTOUT
120	.Combined with signal, indicator or alarm
121	.Plural load device systems
122	..Series connected load devices
123	.Plural shunts and/or cut-outs
124	.Auxiliary electrode controlled
125	.Shunt circuit closing
126	..With compensating impedance
127	.Supply circuit current and/or potential actuated switch
128	..Plural switch operating means
129	WITH SIGNAL, INDICATOR OR ALARM
130	.Plural load device systems
131	..Selective indication of the load device
132	...Plural signals, indicators or alarms
133	.Plural signals, indicators or alarms
134	.Radiant energy responsive control type
135	.Discharge device and/or rectifier in the signal circuit
136	.Electrically operated switch controlling the signal circuit
137	POLYPHASE A.C. SUPPLY
138	.M phase to N phase (e.g., phase splitters)
139	..Polyphase supply circuit
140	...Phase multiplying
141	.Transformer in the supply circuit
142	..With interphase transformer in the supply circuit
143	..Convertible transformer connections
144	..Plural load devices
145	..Plural cathode and/or anode load device
146	.Plural discharge control discharge device load devices
147	.Plural cathode and/or anode discharge device load
148	..Discharge control discharge device
149	WITH RADIANT ENERGY SENSITIVE CONTROL MEANS
150	.Radiant energy responsive load device
151	.Load device irradiating the radiant energy responsive device
152	.Plural load devices
153	..Selective energization of the load devices
154	...Selective electric switch controlled by the radiant energy responsive device
155	.Plural radiant energy responsive devices
156	.Radiant energy control of an electric discharge device in the supply circuit the load device
157	.Discharge control discharge device load controlled by the radiant energy responsive device
158	.Radiant energy controlled regulation of the current supply for the load device
159	.Electric switch controlled by the radiant energy responsive device
160	PLURAL POWER SUPPLIES
161	.Plural load devices
162	..Diverse type load devices
163	...Simultaneous application of diverse type current supplies to a load device
164	..Series connected current supplies
165	..Diverse type current supplies
166	...Simultaneous application to a load device
167	.Plural cathode and/or anode load device
168	..Diverse type current supplies to auxiliary and principal electrodes
169.1	..Diverse type energizing or bias supplies to different electrodes
169.2	...Including shifting, of register, counter or display
169.3	...Electroluminescent device
169.4	...Gas display panel device
170	.Series connected current supplies
171	.Discharge device and/or rectifier in one of the supply circuits
172	.Periodic switch in one of the supply circuits
173	.Condenser in one of the supply circuits
174	.Plural diverse pulsating or A.C. supplies
175	.Diverse type current supplies
176	..Simultaneous application to the load device
177	LOAD DEVICE IN THE PRIMARY AND SECONDARY CIRCUIT OF THE SUPPLY TRANSFORMER
178	PLURAL DIVERSE TYPE LOAD DEVICES
179	.Series connected diverse type load devices
180	..Plural diverse discharge device load
181	...Asymmetrical discharge device load
182	.Electric discharge device load
183	..Plural diverse discharge device loads
184	THREE OR MORE LOAD DEVICES CONNECTED BETWEEN DIVERSE PAIRS OF PAIRED CONDUCTORS
185 R	PLURAL SERIES CONNECTED LOAD DEVICES
185 S	..Christmas lights
186	.Periodic switch in the supply circuit
187	.Condenser in the supply circuit
188	..Condenser in shunt to load and supply
189	.Discharge device loads
190	..Asymmetrical discharge device loads
191	.Convertible to parallel connected
192	.Combined with parallel connected load device
193	.Electric switch controlled load device
194	REGULATION OF THE CONTROL CURRENT AND/OR POTENTIAL APPLIED TO DISCHARGE CONTROL DISCHARGE DEVICE LOADS BY PHASE SHIFTING MEANS
195	.Plural load device systems
196	..Inverse parallel connected asymmetric load devices
197	...Discharge control discharge device in the control circuit
198	..Discharge control discharge device in the control circuit
199	.Discharge control discharge device in the control circuit
200 R	DISCHARGE DEVICE AND/OR RECTIFIER IN THE SUPPLY CIRCUIT
200 A	..Flashers
201	.Plural load device systems

	DISCHARGE DEVICE AND/OR RECTIFIER IN THE SUPPLY CIRCUIT
202	.Plural cathode and/or anode discharge device load
203	..Discharge device or rectifier in the auxiliary starting electrode circuit
204	...Discharge control discharge device in the auxiliary electrode circuit
205	.Plural discharge devices and/or rectifiers in the supply circuit
206	.Discharge device and/or rectifier in the primary circuit of the supply transformer
207	.Discharge device and/or rectifier in shunt to the load device
208	.Discharge control discharge device in the supply circuit
209 R	PERIODIC SWITCH IN THE SUPPLY CIRCUIT
209 T	..Transistorized ignition systems
209 CD	..Capacitor dischargeneous ignition systems
209 M	..Miscellaneous ignition systems
209 PZ	..Piezoelectric ignition systems
209 SC	..Silicon controlled rectifier ignition
210	.Plural load device systems
211	..Distributor type periodic switch means
212	...Transformer in the supply circuit
213	....Distributor switch means in the primary circuits of plural transformers
214	....With additional periodic switch in the primary circuit
215	...With additional periodic switch in the distributor switch means circuit
216	...Plural electrically operated switches
217	..Periodic switch selectively connectable to plural load device circuits
218	.Magneto-electric generator supply
219	.Periodic switch in the primary circuit of the supply transformer
220	..Plural transformers in the supply circuit
221	..Secondary conductively connected to the primary
222	..Plural interrupted transformer coil circuits
223	..Condenser or inductance in the primary circuit
224	.Impedance or current regulator in the supply circuit
225	.Periodic switch cut-out
226	.Plural periodic switches or multiple contact periodic switch
227 R	CONDENSER IN THE SUPPLY CIRCUIT
227 A	..Arc machining
228	.Plural load device systems
229	..Condenser connected to plural cathodes or anodes of asymmetrical discharge device loads
230	..Discharge control discharge device loads
231	..Plural series connected condenser and load device circuits
232	..Condenser in shunt to load and supply
233	.Plural cathode and/or anode discharge device load
234	..Condenser in the auxiliary starting electrode circuit
235	..Condenser connected to plural cathodes or anodes
236	.Electromagnetic influenced discharge device load
237	.Discharge control discharge device load
238	..Condenser in the control circuit
239	.Transformer in the condenser load device circuit
240	.Electric switch in the condenser circuit
241 R	.Condenser in shunt to the load device and the supply
241 P	...Photoflash
241 S	...Strobe lights
242	..With an inductance in the circuit
243	...Inductance in series with the load device, and the supply
244	.Inductance in the condenser circuit
245	.Resistance in the condenser circuit
246	PULSATING OR A.C. SUPPLY
247	.With power factor control device
248	.Induction type discharge device load
249	.Potential node type discharge device load
250	.Plural load device systems
251	..Inverse parallel connected asymmetrical discharge device loads
252	..Discharge control discharge device loads
253	..Full wave systems with asymmetrical discharge device loads
254	..Transformer in the supply circuit
255	...Plural transformers in the supply circuit
256	....Primaries in series
257	...With plural secondary or tapped secondary
258	..Inductance in the supply circuit
259	...Variable inductance
260	.Plural cathode and/or anode discharge device load
261	..Auxiliary starting electrode type discharge device load
262	...Transformer or auxiliary winding in the auxiliary electrode circuit
263	...Inductance or potential surge generator in the auxiliary electrode circuit
264	...Impedance in the auxiliary electrode circuit
265	..Full wave type system
266	...Transformer in the supply circuit
267	.Electromagnetic influenced discharge device load
268	.Discharge control discharge device load
269	..With plural discharge control devices
270	..Plural control potentials
271	...Plural pulsating and/or A.C. potentials
272	..Rectifier and/or discharge device in the control circuit
273	...With condenser in the control circuit
274	..Transformer in the control circuit
275	..Condenser in the control circuit
276	.Transformer in the supply circuit
277	..Plural transformers in the supply circuit
278	..Three or more coil type transformers
279	..Current regulator in the primary circuit
280	..Convertible to inductance
281	..Relatively movable core and coil type transformer
282	..Regulating transformer
283	.Inductance in the supply circuit
284	..Variable inductance
285	...Relatively movable core and coil type inductance
286	....Biased movable part with supply current controlled movement
287	.Periodic type current and/or voltage regulator in the supply circuit
288	THREE OR MORE WIRE DISTRIBUTION SYSTEMS
289	SURGE GENERATOR OR INDUCTANCE IN THE SUPPLY CIRCUIT

SURGE GENERATOR OR INDUCTANCE IN THE SUPPLY CIRCUIT
290 .Circuit interrupter in the inductance circuit
291 CURRENT AND/OR VOLTAGE REGULATION
292 .Keyboard operated or pattern controlled regulator
293 .Pre-selectable regulator systems
294 .Plural load device regulation
295 ..Regulator selectively connectable to plural circuits
296 ..Inverse control of load devices
297 ..Automatic regulation
298 ..Mechanically connected regulators
299 .Plural regulators
300 ..Current generator control
301 ..Plural automatic regulators
302 .Current generator control
303 ..Control of the prime mover
304 ..Plural field type generator
305 ...Three or more fields
306 .Regulator in shunt to the load device
307 .Automatic regulation
308 ..Regulator responsive to plural conditions
309 ..Thermal responsive regulator
310 ..Shunted impedance type regulator
311 ..Variable impedance type regulator
312 PLURAL LOAD DEVICE SYSTEMS
313 .Electric switch in the supply circuit
314 ..Pre-selectable switching systems
315 ...Electrically controlled load device switch
316 ..Keyboard or pattern controlled switch
317 ..Three or more controlled load device circuits
318 ...Group control systems
319 ....Four or more groups
320 ..Plural switches
321 ...Master circuit closing switch
322 ..Alternate circuit closing
323 .Sequential starting
324 .Plural discharge device loads
325 ..Discharge control discharge device loads
326 DISCHARGE DEVICE LOAD
327 .Discharge drawing type discharge device
328 ..Tilting discharge device
329 ...Electrically controlled tilting
330 ..Auxiliary starting electrode type
331 ...Movable auxiliary starting electrode
332 ....Automatic switch in the electrode moving device circuit
333 ..Automatic cut-out for the electrode moving device circuit
334 .Plural cathode and/or anode discharge device load
335 ..Auxiliary starting electrode type discharge device
336 ...Plural auxiliary starting electrode
337 ..Diverse potentials for the discharge electrodes
338 ..Electromagnetic influenced discharge device
339 ..Discharge control discharge device load
340 .With de-ionizing means in the cathodeanode circuit
341 .With plural discharge control devices
342 ..Diverse types
343 ..Plural electromagnetic devices
344 .Electromagnetic influenced discharge device
345 ..Rail type discharge device load
346 ..Plural current supply to the electromagnet
347 ..Series connected with the load device
348 ..Pulsating or A.C. supply to the electromagnet
349 .Discharge control discharge device load
350 ..Plural control currents and/or potentials
351 ...Plural pulsating or A.C. currents and/or potentials
352 ..Rectifier and/or discharge device in the control circuit
353 ...With condenser in the control circuit
354 ..Transformer in the control circuit
355 ..Condenser in the control circuit
356 ...Inductance in the control circuit
357 .Movable electrode discharge device
358 .Plural gases or vapors in the discharge device
359 PYRO-ELECTRIC DEVICE LOAD
360 TIME-CONTROLLED
361 PLURAL CONTROL STATIONS
362 ELECTRIC SWITCH IN THE SUPPLY CIRCUIT
363 MISCELLANEOUS SYSTEMS
****
DIGESTS
****
DIG 1 Fluorescent lamp circuits with more than two principle electrodes
DIG 2 High frequency starting operation for fluorescent lamp
DIG 3 Circuit for ion gauges and pressure gauges
DIG 4 Dimming circuit for fluorescent lamps
DIG 5 Starting and operating circuit for fluorescent lamp
DIG 7 Starting and control circuits for gas discharge lamp using transistors

1 ELECTRIC MOTOR WITH NONMOTOR DRIVING MEANS (E.G., AXLE DRIVE, MANUAL DRIVE)
2 .Manual driving means
3 WITH PARTICULAR MOTOR-DRIVEN LOAD DEVICE
4 .Plural, diverse or diversely controlled load device
5 ..Plural motor drive
6 .Tension-maintaining type of motor-control system
7 ..Plural, diverse or diversely controlled motors
8 .Plural, diverse or diversely controlled driving motors (e.g., driving differential gearing)
9 .Power- or motion-transmitting mechanism
10 ..Reversible drive mechanism
11 ..Variable speed mechanism
12 ...Gearing
13 ....Differential type
14 ..Motion-converting mechanism
15 ..Mechanical gearing
16 SUPPLIED OR CONTROLLED BY SPACE-TRANSMITTED ELECTROMAGNETIC OR ELECTROSTATIC ENERGY (E.G., BY RADIO)
17 PORTABLE-MOUNTED MOTOR AND/OR PORTABLE-MOUNTED ELECTRICAL SYSTEMS THEREFOR
560 POSITIONAL SERVO SYSTEMS (E.G., SERVOMECHANISMS)
561 .Adaptive or optimizing systems including "bang-bang" servos
562 .Time-sharing or multiplexing systems
563 .With protective or reliability increasing features (e.g., "fail-safe" systems)
564 .."Redundant" operating channels
565 ..Monitoring systems
566 ..Maneuver, force, or load-limiting
567 .Program- or pattern-controlled systems
568.1 ..With program recording or composing means
568.11 ...Multifunction manipulator (i.e., Robot)
568.12 ....Mobile robot
568.13 ....With particular program teaching method
568.14 .....Manual lead through
568.15 ....With particular interpolation means
568.16 ....With particular sensing device
568.17 ....With multimode control (e.g., course-fine, position-force, etc.)
568.18 .....Including velocity control
568.19 ....With particular coordinate transformation means
568.2 ....With plural control systems (e.g., the interaction of plural processors to control the plural joints of a single robot):
568.21 .....Including end effector (e.g., gripping jaw, micromanipulator, etc.)
568.22 ....With particular compensation (e.g., gain, offset, etc.)
568.23 .....Including program modification
568.24 ....With reliability enhancement means (e.g., monitoring, redundant circuits, etc.)
568.25 .....Including display device
569 ..Digital or numerical systems
570 ...Contouring systems
571 ....With "feed-rate" control
572 ....With "zero-offset" or tool radius correction
573 ....With interpolating means
574 ....Multiple axes point to point systems
575 ..Multiple axes analog systems
576 ...Nonmechanical line, seam or edge followers
577 ....Optical or photoelectric line followers
578 ...Cam or template followers
579 ...Multiple pass systems
580 .Vehicular guidance systems with single axis control
581 ..Radio-controlled
582 ..Celestial navigation
583 ..Landing systems
584 ..Altitude or pitch control
585 ..Roll control
586 ..Yaw control
587 ..Land vehicles
588 ..Marine vehicles
589 ...Submarine and torpedo systems
590 .Multiple mode systems
591 ..With mode-engagement features (e.g., manual to automatic)
592 ..Fine and coarse systems
593 ...Separate fine and coarse motors
594 ...Digital systems
595 ...Multiple speed synchro systems
596 ..Combined "on-off" and proportional control
597 ..Slewing systems
598 ...With a separate slewing motor
599 .Pulse-width modulated power input to motor (e.g., "duty cycle" systems)
600 .Digital or numerical systems
601 ..Digital comparison
602 ...Commutating switch-type encoder
603 ..Pulse-counting systems
604 ..Analogue comparison
605 ...Synchro or resolver (e.g., transmitter simulators)
606 .Frequency- or phase-modulated systems
607 ..Frequency comparison
608 ..Phase comparison
609 ."Reset" systems (P.I.)
610 ..With rate (P. I. D.) (e.g., reset windup prevention)
611 .With stabilizing features (e.g., anti-hunting, damping)
612 ..Electric braking near balance (e.g., dynamic)
613 ...D.C. in A.C. windings
614 ..Friction-braking near balance including magnetic or eddy current brakes
615 ..By auxiliary feedback loop
616 ...Rate feedback
617 ....Variable rate feedback
618 ....Tachometer feedback
619 ..Variable gain bandwidth
620 ..Nonlinear circuits
621 ..Lead or lag networks
622 ...A.C. networks
623 ..Load stabilization (e.g., viscous, magnetic or friction dampers)
624 ..By deadband at null (e.g., threshold circuits)
625 .Plural servomotors
626 .Limit or end-stop control
627 ..Secto-scanning systems
628 ."Feedback" systems
629 .Unwanted harmonic or voltage component elimination quadrature rejection systems
630 .Antibacklash systems (e.g., with unidirectional approach to balance)
631 .Antistatic friction features (e.g., "dither" voltage)
632 .With compensating features
633 .."Two-cycle error" compensation
634 ..Temperature compensation
635 .With signal-, voltage-, or current-limiting

POSITIONAL SERVO SYSTEMS (E.G., SERVOMECHANISMS)
636 ."Sampling" systems including miscellaneous "sampled data" control systems
637 .Analog computation
638 .With particular "error-detecting" means
639 ..Plural, diverse conditions
640 ..Photoelectric or optical-type measuring instruments
641 ..With particular temperature measuring instrument
642 ..With liquid level measuring instruments
643 ..With moisture content or wetness measuring instruments
644 ..With flow measuring instruments
645 ..With fluid pressure measuring instruments
646 ..With force or weight measuring instruments
647 ..With magnetic field measuring instruments
648 ..With inertial, direction or inclination measuring instrument
649 ...Stable platforms
650 ..With current, voltage or electrical power measuring instruments
651 ..With acceleration measuring instruments
652 ..With particular position measuring instruments
653 ...Magnetic transducers
654 ...Synchro control transmitter-transformer systems
655 ....With synchro differential
656 ...Differential transformer systems
657 ....Linear differential transformer
658 ...."E" type transformer
659 ...."Microsyn" type
660 ...."Inductosyn" systems
661 ....Resolver systems
662 ...Variable capacitor systems
663 ...Potentiometer systems including autotransformers and Wheatstone bridges
664 ....Minor arc seeking
665 ....Continuous rotation, unlimited range
666 ....Controlled tap and slidewire
667 ....With a bridge in the feedback circuit
668 .....Recalibrating systems
669 ...Standing wave
670 ...Contact resistance
671 .With particular motor control system responsive to the "actuating signal"
672 ..Discontinuous or "on-off" control
673 ...Seeking switch type
674 ...Wheatstone bridge type
675 ..One transmitter or controller element follows another
676 ..Transmitter or controller element returned (e.g., force balance systems)
677 ..With particular servoamplifier
678 ...Differential amplifier
679 ...Diverse types of amplifiers in different stage
680 ...Magnetic servoamplifiers
681 ...Solid-state servoamplifiers
682 ...Rotating amplifier (e.g., "Ward Leonard" control)
683 ..With particular phase discriminator
684 ..With particular modulator or detector (e.g., choppers)
685 .."Step-by-step" motors in closed-loop servos
686 ..Reciprocating or oscillating motors
687 ..Linear movement motors
688 ..Shaded pole motors
689 Torquing motors
690 SELF-SYNCHRONOUS TYPE OF MOTOR
691 .With means to amplify transmitter signals
692 .Having induction or "selsyn" type transmitter
693 .Having impedance-type transmitter
694 .Having commutated dynamoelectric machine transmitter
695 .Having commutating switch-type transmitter
696 OPEN-LOOP STEPPING MOTOR CONTROL SYSTEMS
34 PLURAL, DIVERSE OR DIVERSELY CONTROLLED ELECTRIC MOTORS
35 .Motors with diverse motions (e.g., reciprocating and rotary motors)
37 .Plural reciprocating or oscillating motors
38 .Plural linear-movement motors
39 .Work and feed motors (e.g., indexing)
40 .Motor biased against rotation
41 .Having electrical synchronizing interconnections
42 ..Between windings on auxiliary dynamo-electric machines
43 ..D.C. or A.C. commutator motors with slip rings
44 ..Between induction motor secondaries
45 .Mechanically coupled in fixed ratio of movement
46 ..Motors having unlike operating characteristics
47 ...Synchronous and nonsynchronous motors
48 ..Mechanically coupled in torque opposition
49 .Motors electrically connected in cascade or tandem
50 ..With means for effecting other motor interconnections
51 .Plural, diverse motor controls for different motors
52 .Slipping and/or racing control for electric motors
53 .Plural, diverse motor controls
54 ..Motor-reversing
55 ...With running-speed control
56 ....And braking
57 ...And braking
58 ...And acceleration control
59 ..Running-speed control
60 ...And braking
61 ...And acceleration control
62 ...And automatic starting and/or stopping and/or with time delay
63 ..Braking
64 ..Acceleration control
65 .Motor-reversing
66 .Running-speed control
67 ..Diverse speeds for different motors
68 ..Relative motor speed control
69 ...With speed-difference detector
70 ....Electrical-type detectors
71 .....Voltage and/or current difference detector
72 .....Dynamoelectric machine detector
73 .....Synchronously operated impedance detectors
74 .....Synchronously actuated switch detectors
75 ......Plural switches connected in series
76 ....Differential-gearing detector
77 ...Controlling motor speed in response to speed of another motor

PLURAL, DIVERSE OR DIVERSELY CONTROLLED ELECTRIC MOTORS
.Running-speed control
..Relative motor speed control
...Controlling motor speed in response to speed of another motor
78 ....Controlling A.C. frequency or rate of electrical impulses to other motor
79 ...Control of both armature (or primary) and field (or secondary) circuits
80 ...Armature or primary circuit control
81 ...Field secondary circuit control
82 ..Armature or primary circuit control
83 ...Series-parallel armature circuit connections
84 ..Field or secondary circuit control
85 .Synchronizing or phasing control
86 .Braking
87 ..Motor used as braking generator (dynamic braking)
88 ...Load or current division during braking
89 ...Motor as exciter for another motor
90 .Acceleration control
91 ..Accelerating motors in succession or selectively
92 ..Control of both armature (or primary) and field (or secondary) circuits
93 ...Series-parallel connected armature or primary circuits
94 ..Armature or primary circuit control
95 ...Series-parallel connections
96 ....With armature circuit impedance
97 ..Field or secondary circuit control
98 .Load control
99 ..Fixed ratio of load or current division
100 ...By field or secondary circuit control
101 .Starting and/or stopping
102 ..Sequential or successive starting and/or stopping
103 ..Selective starting and/or stopping
104 ..Armature (or primary) circuit control
105 .Plural, diverse or diversely controlled sources of armature (or primary) supply
106 ..Diverse sources
107 ...A.C. and D.C.
108 ....Different voltages
109 ...Different voltages
110 ...Different frequencies
111 .Series-parallel connected motors
112 .Parallel connected motors
113 .Series connected motors
114 IMPACT, MECHANICAL SHOCK, OR VIBRATION-PRODUCING MOTORS
115 MOTOR WITH DIVERSE MOTIONS (E.G., ROTARY AND RECIPROCATING)
116 NONMAGNETIC MOTOR
117 .Thermoelectric motor
118 MAGNETOSTRICTIVE MOTOR
119 RECIPROCATING OR OSCILLATING MOTOR
120 .Stopping after predetermined number of reciprocations or cycles (including single cycle)
121 .Having means to produce a progressing or traveling motor field flux
122 .Plural, diverse or diversely controlled motor windings
123 ..Polyphase or diverse or diversely controlled sources of motor supply
124 ...A.C. and D.C. sources
125 ..Unidirectionally conductive devices in energizing circuit
126 .Energizing winding circuit control
127 ..Automatic in response to predetermined position, movement or condition in or of the motor or driven device
128 ...Noise, sound, vibration, movement or position of motor
129 ..By means for producing periodic electrical pulses in the energizing circuit
130 ...Electrical oscillation or condenser charging and/or discharging circuits
131 ...Motor or escapement-controlled means
132 ..By space-discharge or unidirectionally conductive devices in energizing circuit
133 ..By impedance devices in energizing circuit
134 ..By circuit making and/or braking devices
135 LINEAR-MOVEMENT MOTORS
136 AUXILIARY MEANS FOR PRODUCING MECHANICAL STARTING OR ACCELERATING TORQUE
137 .By auxiliary motor
138 SPACE-DISCHARGE-DEVICE COMMUTATED MOTOR
139 BATTERY-FED MOTOR SYSTEMS
140 GENERATOR-FED MOTOR SYSTEMS HAVING GENERATOR CONTROL
141 .Automatic generator control and/or with time-delay means
142 ..Responsive to diverse conditions or with time-delay means
143 ...Plural electrical conditions
144 ..Armature or primary current of motor
145 ..Terminal voltage or counter e.m.f. of motor
146 ..Speed of motor or driven device
147 ..Speed or frequency of generator or its drive means
148 .Alternating-current-motor system
149 .With plural, diverse or diversely controlled generators
150 .With flywheel on generator or on motor
151 .Control of both the generator and the circuit to the motor
152 ..With motor control
153 .Control of both the generator and the motor
154 ..Control of excitation (field) circuit of both
156 .Plural, diverse or diversely actuated, generator control means
157 .Generator speed control
158 .Generator field circuit control
159 HAVING ROTOR ELEMENT BIASED AGAINST ROTATION
160 .By resilient biasing means (e.g., spring)
161 WITH FLYWHEEL OR MASSIVE ROTARY MEMBER
162 CONTROL BY PATTERNS OR OTHER PREDETERMINED SCHEDULE MEANS
163 .Motor running-speed control
164 ..Cyclically varying or repeated speed schedules
700 SYNCHRONOUS MOTOR SYSTEMS
701 .Hysteresis or reluctance motor systems
702 .Antihunting or damping
703 .Braking
704 .Pole changing motor winding circuits
705 .Synchronization systems
706 ..With armature power removal upon failure to synchronize or loss of synchronism
707 ...Upon failure to resynchronize
708 ...Responsive to thermal electrical element in system
709 ..Having different armature voltage prior to synchronism
710 ..With d.c. field removal

SYNCHRONOUS MOTOR SYSTEMS
.Synchronization systems
..With d.c. field removal
711 ...With electronic control element in system
712 ..With field excitation application
713 ...Responsive to slip voltage frequency in d.c. field winding
714 ...Responsive to armature current
715 ...Responsive to rotor speed or rotor driven member
716 .Field winding circuits
717 ..Responsive to a motor condition
718 ...Induced voltage in field winding
719 ...Speed responsive field power sources
720 .Armature winding circuits
721 ..Responsive to rotor shaft position or speed
722 ..Having electronic power conversion circuit
723 ..Having variable frequency supply
724 ..Having a plurality of windings or winding portions
725 REPULSION MOTOR SYSTEMS
726 .With added motor winding or convertible to series motor
727 INDUCTION MOTOR SYSTEMS
728 .Repulsion start
729 .Power-factor control
730 .With plural separately movable rotors
731 .With voltage source connected to motor secondary
732 ..Electronic device controls current in secondary circuit
733 ..Commutator connected to secondary winding
734 ..Slip rings connected to secondary winding
735 ...Rotor shaft coupled to dynamoelectric machine
736 ....Slip rings connected to dynamoelectric machine winding
737 .Self-cascaded motor windings
738 .With commutated winding
739 .Reversing
740 ..With diverse motor operation
741 ...With braking
742 ....Electromagnetic brakes
743 .....Generator action
744 .....Plugging
745 ..With controlled saturable reactor in primary circuit
746 ...Two phase motor
747 ..Two phase motor
748 ...With plural primary windings or winding portions having common connection
749 ..Operating from a single phase source
750 ...Shaded pole motor
751 ...Split phase motor with capacitor interchangeably connected in series with either primary winding
752 ....With controlled electronic device to provide the series connection
753 ...With de-energizable start winding
754 ....With separate winding or winding portion energized for each direction of rotation
755 ....Automatic current reversal on start winding
756 ..With controlled electronic switch for phase reversal
757 .Braking
758 ..With diverse operation
759 ..Dynamic braking
760 ...Direct current primary winding braking circuit
761 ....Rotating rotor controls braking current in primary winding
762 ....With a.c. to d.c. conversion circuit
763 ..Reversal of power to primary winding
764 ...Three phase power reversal
765 ..Eddy current braking circuits
766 .Primary and secondary circuits
767 .Primary circuit control
768 ..Three phase motor operated from single phase source
769 ...With dynamoelectric converter
770 ..Dual voltage motors
771 ..Delta-wye, plural wye, or plural delta connected primary windings
772 ..Plural speed
773 ...Pole changing
774 ....Single phase motor
775 .....Separate primary running winding for each pole number, alternately energized
776 .....Entire primary running winding energized for each running speed
777 ....Separate primary running winding for each pole number, alternately energized
778 ..Starting control
779 ...With speed control
780 ...Three phase motor with variable transformer to initially adjust voltage to motor windings
781 ...Operating from a single phase source
782 ....With protective features
783 .....Thermal starting and thermal overload protection
784 ....Impedance for reducing current during starting operation
785 ....Start winding removed during running operation
786 .....By electronic switch
787 ......With transformer for sensing the run winding current
788 ......With variable temperature coefficient resistor in switch control circuit
789 .....By electromagnetic switch
790 ......With relay coil in series with main winding
791 .....By thermal switch
792 ......With variable temperature coefficient impedance element
793 .....By centrifugal switch
794 ....Capacitor run motor with different capacitance at starting
795 .....With plural capacitors
796 ....Saturable winding in capacitor run motor circuit
797 ....Phase splitting using stator winding mutual inductance or saturable winding
798 ..Responsive to motor condition
799 ...Responsive to speed or rotation phase angle
800 ....With controlled power conversion
801 .....Including inverter
802 ......Responsive to an additional condition
803 ....With controlled a.c. to d.c. circuit in inverter supply
804 ....With controlled magnetic reactance
805 ...Responsive to motor voltage
806 ..Condition responsive
807 ..Frequency control
808 ...With voltage magnitude control
809 ...With voltage phase angle control
810 ...With voltage pulse time control
811 ....Pluse width modulation or chopping
812 ..Voltage control
813 ...With transformer

INDUCTION MOTOR SYSTEMS
.Primary circuit control
..Voltage control
814 ...With impedance control
815 ....Saturable reactor
816 ...Single phase, split phase motors
817 ....With capacitor
818 .Secondary circuit control
819 ..Open secondary member or portion thereof with means to open or close the circuit thereto
820 ..Closed secondary member or member portion with means to change electrical characteristics thereof
821 ..Impedance control of secondary circuit
822 ...Responsive to motor condition
823 ....Rotor speed or position responsive
824 .....Centrifugal force of rotor controls secondary circuit impedance
825 ....Induction motor current
826 .....Primary motor current
827 ....Frequency of secondary current
828 ....Secondary voltage
829 ...By manual operation
830 .With relatively movable cooperating motor parts to control energized motor
831 ..Axially movable cooperating parts
832 ..Dual stators, one or both angularly movable
244 ALTERNATING CURRENT COMMUTATING MOTORS
245 .Universal or A.C.-D.C. motors
246 SERIES MOTORS
247 .Convertible for nonseries motor operation
248 .With plural, diverse or diversely connected or controlled sources of e.m.f.
249 .Control by motor circuit impedance
250 ..Impedance in series with field windings and in parallel to armature winding
251 .Field circuit control
252 ..Plural, diverse or diversely connected or controlled field coils
253 HOMOPOLAR OR UNIFORM FIELD MOTORS
254 SELF-COMMUTATED IMPULSE OR RELUCTANCE MOTORS
255 PLURAL DIVERSE MOTOR CONTROLS
256 .Motor-reversing
257 ..With running-speed control
258 ...And braking
259 ....And acceleration control
260 ...And acceleration control
261 ..With braking
262 ...And acceleration control
263 ..With acceleration control
264 ..With automatic starting and/or stopping
265 ...Stopping upon predetermined movement of or position of motor or driven device
266 ....At limit-of-travel of motor or driven device
267 .....Dual control circuits alternately energized
268 .Running-speed control
269 ..With braking
270 ...And acceleration control
271 ..With acceleration control
272 ..With automatic starting and/or stopping
273 .Motor braking
274 ..With acceleration control
275 ..With automatic starting and/or stopping
276 .Acceleration control
277 ..With automatic starting and/or stopping
278 ...In response to an electrical condition
279 ....Automatic stopping means less responsive during acceleration
280 MOTOR-REVERSING
281 .Periodic- or intermittent-reversing
282 ..In response to movement or position (e.g., limit of travel) of motor or driven device
283 .Automatic and/or with time-delay means
284 ..With means to delay reversing until motor substantially stops
285 ..Instant of, or passage or predetermined time or having time-delay means
286 ..Movement or position of motor or driven device
287 .Armature or primary circuit control
288 ..Plural, diverse or diversely controlled armature windings
289 ...Phase-reversal
290 ...Selectively energized windings
291 ..Armature or primary current reversal
292 ...By shifting motor brushes or selecting appropriate set of brushes
293 ...Reversing polarity of current supplied to armature circuit
294 ....Wheatstone bridge type
295 ....Potentiometer-controlled
296 .Field circuit control
297 ..Plural, diverse or diversely controlled field windings
298 ...Simultaneous energization
299 ....With means for short-circuiting a winding
300 ..Field-circuit current reversed

CLASS 388 SUBCLASSES 800-841 ARE AN INTEGRAL PART OF CLASS 318 AS SHOWN BY THE POSITION OF THIS BOX. THIS PORTION OF CLASS 388 PROVIDES FOR SPEED CONTROL OF COMMUTATED DC MOTORS.

362 BRAKING
363 ."Spotting" or adjustment of braking controller during coasting
364 .Automatic and/or with time-delay means
365 ..Plural diverse conditions or with time delay
366 ..Condition of motor or driven device
367 ...Armature or primary current
368 ...Armature or primary circuit voltage or terminal or counter e.m.f. voltage
369 ...Speed, acceleration, movement or position of motor or driven device
370 .Plural, diverse or diversely controlled braking means
371 ..Including both friction braking "plugging" and/or dynamic braking
372 .Friction braking
373 ."Plugging" or application of reverse power to motor
374 ..Energy flow interrupted when motor stops
375 .Dynamic braking
376 ..Regenerative
377 ...With additional source of e.m.f.
378 ....In series with armature or primary circuit
379 ..Locally closed armature circuit
380 ...Closed through impedance or the like
381 ...With field or secondary circuit control

BRAKING
382 .By auxiliary electric generator or by magnetic attraction or repulsion devices
383 "ANTI-BRAKING" OR BRAKING-PREVENTION MEANS

CLASS 388 SUBCLASSES 842-860 ARE AN INTEGRAL PART OF CLASS 318 AS SHOWN BY THE POSITION OF THIS BOX. THIS PORTION OF CLASS 388 PROVIDES FOR ACCELERATION CONTROL OF COMMUTATED DC MOTORS.

430 MOTOR LOAD, ARMATURE CURRENT OR FORCE CONTROL DURING STARTING AND/OR STOPPING
431 .Initial, "cracking" or "starting from rest" torque control
432 CONSTANT MOTOR CURRENT, LOAD AND/OR TORQUE CONTROL
433 .Control of motor load or device driven
434 LIMITATION OF MOTOR LOAD, CURRENT, TORQUE OR FORCE (E.G., PREVENTING OVERLOAD)
436 NONRUNNING, ENERGIZED MOTOR
437 PHASING OR ANGULAR OR LINEAR POSITIONAL CONTROL OF MOVABLE ELEMENT OF THE MOTOR
438 POWER FACTOR CONTROL OF ARMATURE OR LINE CIRCUIT
439 MOTOR COMMUTATION CONTROL SYSTEMS
440 HAVING PLURAL, DIVERSE OR DIVERSELY CONTROLLED SOURCES
441 .A.C. and D.C.
442 .Different voltages
443 PERIODIC, REPETITIOUS OR SUCCESSIVE OPERATIONS CONTROL OF MOTOR, INCLUDING "JOG" AND "INCH" CONTROL
444 .Variable periods or intervals between controlling operations
445 AUTOMATIC AND/OR WITH TIME-DELAY MEANS (E.G., AUTOMATIC STARTING AND/OR STOPPING)
446 .With nonautomatic control means (e.g., manual)
447 .Nonresponsive or less responsive for limited periods
448 .Anti-hunting
449 .With respect to a fixed standard, master or reference device
450 ..Electrical detector
451 ..Mechanically vibrating device as reference device (e.g., tuning fork)
452 .Plural, diverse conditions or with time-delay means
453 ..Electrical condition
454 ...Plural, diverse electrical conditions
455 ....Voltage and current (e.g., watts)
456 .Rate-of-change of a condition
457 ..Interia-type detector
458 ..Electrical condition
459 .Terminal voltage or counter-electromotive force of controlled motor
460 .Sound, supersonic vibration or mechanical vibration
461 .Speed or rate-of-movement
462 ..Centrifugal-type detector
463 ..Tachometer-type detector
464 ...Electric generator tachometer
465 ..In excess of a predetermined valve
466 .Movement, position, or limit-of-travel
467 ..Plural sensing means for determining plural positions or plural limits-of-travel
468 ..Limit-of-travel control means
469 ...Overloading limit-of-travel-type control means
470 ..Magnitude of movement or revolutions
471 .Responsive to thermal conditions
472 ..Of motor control means
473 ..In or about the motor being controlled
474 .Motor load, armature or primary or secondary circuit current
475 ..Mechanical-type detector (e.g., by yielding spring devices)
476 ..In excess of a predetermined magnitude
477 ...Intentionally increased load
478 .Electrical conditions in circuit other than controlled motor circuit
479 ..Voltage
480 .Radiant energy
481 .Pressure in a fluid or granular material
482 .Level of fluid or granular material
483 .Moisture content or wetness
484 .Time or with time-delay means
485 ..Dash-pot or other mechanical delay means
486 ..Pilot- or servo-motors
487 ..Electromagnetic or inductive time-delay means
488 .Responsive to stress in body or material
489 .Responsive to direction, inclination or angular position of bodies
490 WITH SIGNALS, METERS, RECORDERS OR TESTING DEVICES
491 CONTROL OF BOTH MOTOR CIRCUIT AND MOTOR STRUCTURE
492 MOTOR MAGNETIC ENERGY DISSIPATION
493 CONTROL OF BOTH ARMATURE (OR PRIMARY) CIRCUIT AND FIELD (OR SECONDARY) CIRCUIT
494 ARMATURE (OR PRIMARY) CIRCUIT CONTROL
495 .Plural, diverse or diversely controlled, armature or primary windings
496 ..Polyphase windings
497 ..Series-parallel
498 ..Energized or controlled in predetermined sequence
499 ..Wound or energized in magnetic opposition
500 .Plural sources of voltage (including counter e.m.f. cells)
501 .By shunting armature or primary winding
502 .Variable length or tapped armature winding
503 .Frequency or pulsation control
504 .Voltage control
505 .By means to space-discharge devices
506 ..Plural, diverse or diversely connected or controlled space-discharge devices
507 ..Having discharge-control means (e.g., grids)
508 .Impedance-controlled
509 ..Plural, diverse or diversely controlled impedances
510 ...Including both reactor and condenser
511 ..Inherently or self-variable impedance
512 ..Inductive reactor controlled
513 ...Having auxiliary means for saturating reactor core
514 ..Resistor-controlled
515 ...Having short-circuiting means
516 ....Short-circuited step-by-step
519 .By armature or primary circuit-making and/or breaking
520 ..Electromagnetically actuated
521 FIELD OR SECONDARY CIRCUIT CONTROL
523 .Plural, diverse or diversely connected or controlled field windings

	FIELD OR SECONDARY CIRCUIT CONTROL
	.Plural, diverse or diversely connected or controlled field windings
524	..Convertible number-of-poles type (e.g., 4-pole or 6-pole)
525	..Differentially wound or energized windings
526	..Series-parallel
527	..Series field winding
528	..With means to short circuit a field winding
529	..Selectively energized
530	.Plural, diverse or diversely connected or controlled sources of field circuit voltage
531	.Variable length or tapped field winding
532	.By means of space-discharge device in field circuit
533	.Impedance-controlled
534	..Plural, diverse or diversely connected or controlled field circuit impedances
535	...Wheatstone bridge
536	.By field circuit making and/or breaking
537	..Intermittently operated
538	MOTOR STRUCTURE ADJUSTMENT OR CONTROL
539	.Both armature and field structures rotatable or adjustable
540	.Rotor element movable axially
541	.Brush or other current-collector control
542	..Having movement toward or from cooperating part (e.g., brush lifted from commutator)
543	THREE-OR-MORE-POSITIONS MOTOR CONTROLLER SYSTEMS
544	.With other motor control device
545	..Main line switch
546	.Plural, diverse or diversely controlled controllers
547	..Plural control stations
548	.Plural control stations
549	.Return to "off", "starting" or "neutral" positions
550	..Power-operated controllers
551	.Knee- or foot-operated controllers
552	.Power-actuated controllers
553	..Separately actuated controller contacts
554	...Electromagnetic actuated
555	..Electromagnetic actuated
556	...Reciprocating or oscillating electromagnetic means
557	...Intermittent or step-by-step operation

• CLASS 320 ELECTRICITY, BATTERY AND CONDENSER CHARGING AND DISCHARGING

DECEMBER 1990

1 CONDENSER CHARGING AND/OR DISCHARGING
2 BATTERY CHARGING AND/OR DISCHARGING
3 .Including dry cells or primary batteries
4 .."Recharging", depolarizing and/or reconditioning
5 .Combined charging and discharging
6 ..Plural, diversely treated batteries
7 ...Series-parallel connections thereof
8 ...Transposition between charging and discharging circuits
9 ..Combined regulation of charging source or circuit and discharging circuit
10 ..Charging source and/or circuit controlled by discharging circuit
11 ...Starting and/or stopping of battery charging
12 ...Charging generator control
13 ..Discharging circuit regulation
14 ..Alternately charging and discharging
15 .Plural, diversely treated, batteries
16 ..Series-parallel connections thereof
17 ..Series-connected batteries
18 ...Variable number in series
19 ..Periodic or intermittent charging or discharging
20 .High-rate, short-time charging systems
21 .Periodic or intermittent charging or discharging
22 .Plural rates of charging or discharging
23 ..Decreasing rates of charging
24 ...Three or more rates
25 .With polarity control
26 ..By means of reversing switches
27 .Combined control of source and charging circuit
28 ..Including charging circuit-making and/or breaking
29 .Combined circuit regulation and circuit-making and/or breaking
30 .Control responsive to predetermined conditions
31 ..Plural, diverse conditions and/or with time-delay means
32 ...Including voltage and current magnitudes
33 ....For battery circuit-making and/or breaking
34 ...For battery circuit-making and/or breaking
35 ..Thermal condition
36 ...For battery circuit-making and/or breaking
37 ..Instant of, or period of time
38 ...For battery circuit-making and/or breaking
39 ..Voltage or current magnitude
40 ...For battery circuit-making and/or breaking
41 ..Speed or centrifugal forces
42 ...For battery circuit-making and/or breaking
43 ..Condition of battery charge
44 ...Control by ampere-hour or watt-hour type of device
45 ....For battery circuit-making and/or breaking
46 ...Control by gas pressure-responsive means
47 ..For battery circuit-making and/or breaking
48 .With indicating, signaling and/or testing means
49 .Battery circuit control
50 ..With bucking and/or boosting e.m.f. in charging circuit
51 ..By impedance in charging or discharging circuit
52 ...Pressure-responsive type of impedance
53 ..Unidirectionally conductive devices in battery circuit
54 ..Battery circuit-making and/or breaking
55 ...Plural circuit makers and/or breakers
56 .Plural, diverse or diversely treated sources of supply for charging
57 .Rectifying systems for battery charging
58 ..Dynamoelectric-type rectifier
59 ..Unidirectionally conductive-type rectifier
60 ...Space-discharge devices
61 .Generation systems for battery charging
62 ..Physical starting and/or stopping of generator
63 ...Generator used as starting means
64 ..Generator field-winding circuit control
65 ...Plural, diversely treated field windings
66 ....Differentially related
67 ...Auxiliary source or field circuit e.m.f.
68 ...Field-winding circuit impedance
69 ....Step short-circuited type
70 ....Pressure-responsive type of impedance
71 ..Armature or generating circuit shorted or grounded
72 ..Generator structure control

DIG 1 Transistor circuits which have specific uses as battery chargers
DIG 2 Silicon-controlled rectifier used as battery chargers

CLASS 322 ELECTRICITY, SINGLE GENERATOR SYSTEMS

DECEMBER 1990

1 PORTABLY MOUNTED
2 R NONMAGNETIC-TYPE GENERATOR
2 A ..Electrostatic
3 RECIPROCATING AND/OR OSCILLATING-TYPE GENERATOR
4 WITH FLYWHEELS OR MASSIVE MOVING PARTS
5 WITH GENERATOR POLARITY CONTROL
6 .By control of excitation
7 COMBINED CONTROL OF GENERATING MEANS AND LOAD CIRCUIT
8 .Including load circuit-making and breaking
9 PLURAL DRIVING MEANS
10 WITH PHYSICAL STARTING AND/OR STOPPING OF THE GENERATOR
11 .Automatic in response to predetermined conditions
12 .Connecting and/or disconnecting generator and driving means
13 .Electric motor as driving means
14 COMBINED CONTROL OF GENERATOR AND DRIVING MEANS
15 .Simultaneous control
16 ..Electric motor
17 AUTOMATIC CONTROL OF GENERATOR OR DRIVING MEANS
18 .With time-delay in the response
19 .Antihunting or rate of change
20 .Power factor or phase relationships
21 .With line-drop compensation
22 .Plural conditions
23 ..Including an electrical condition
24 ...Plural electrical conditions
25 ....Voltage and current
26 .Light or photosensitive control circuits
27 .Current output
28 .Voltage of generator or circuit supplied
29 .Speed or frequency of generator
30 ..Centrifugal of fly weight governor
31 ..Tachometer devices
32 ..Frequency responsive devices or networks
33 .Thermal conditions
34 ..In generator and/or driving means
35 .Fluid pressure including wind
36 .With respect to a reference or master device or quantity
37 .Electrical conditions in circuit other than that of generator being controlled
38 DRIVING MEANS CONTROL
39 .Electric motor control
40 POWER TRANSMITTING MECHANISM CONTROL
41 .Friction-type transmission
42 ..Belt drive
43 ...Slip control
44 GENERATOR CONTROL
45 .Combined diverse generator controls
46 .Combined permanent magnet and wound field structure
47 .Induction generator
48 .Acyclic or homopolar-type generator
49 .Magnetic structure
50 ..Magnetic shunt for field flux
51 ..Rotor element
52 ..Stator element
53 .Odd number of brushes (e.g., 3rd brush type)
54 .Adjustable current-collecting mechanism
55 ..Movable circumferentially
56 ...Continuously
57 .With nonexciting saturating means for generator structure
58 .With means for suppressing, eliminating or minimizing undesired frequencies
59 .With excitation winding and/or circuit control
60 ..Substitute or auxiliary starting source of excitation
61 ..Alternating current excitation
62 ..Plural sets of poles type of generator
63 ..Plural excitation windings
64 ...Differentially related
65 ...Interpole windings
66 ...Compensating windings
67 ..Series-wound generator
68 ..Short circuiting of field winding
69 ..Circuit interruption
70 ...Continuous make and break
71 ..Variable length field winding
72 ..Control by electric space discharge
73 ...Discharge control discharge device
74 ...Electric arc
75 ..Control by circuit impedance
76 ...Plural impedances
77 ....Bridge arrangements
78 ....Tuned or resonant
79 ...Unidirectionally conductive
80 ...Resistance
81 ....Thermally varied resistance
82 ....Pressure-varied resistance
83 ....Short-circuited
84 .....Continuous make and break
85 .....Step by step
86 ..Plural sources of excitation voltage
87 ...Dynamoelectric source
88 ...Battery source
89 .With armature or primary circuit control
90 ..Plural armature circuits or windings
91 ..Short-circuiting of windings
92 ...By auxiliary brushes diametrically opposed or 180 electrical degrees apart
93 ..Tapped or sectionalized
94 ..Circuit-making and/or breaking
95 ..By armature circuit impedance
96 ...Plural impedances
97 ...Resistance control
98 ....In circuit across brushes or in shunt to generator
99 WITH SIGNALS, INDICATORS, RECORDERS, TESTING, ETC.

DIG 2 Generator field current-responsive systems
DIG 5 Hall effects elements
DIG 6 Ripple sensitive

201 INCLUDING A DYNAMOELECTRIC MACHINE
202 .Balancer sets
203 .With plural sets of slip rings or brushes
204 .Condition responsive
205 FOR REACTIVE POWER CONTROL
206 .Using saturable inductor
207 .Using converter
208 .Using impedance
209 ..Switched impedance
210 ...Static switch
211 ....Digitally controlled
212 FOR PHASE SHIFT OR CONTROL
213 .By splitting and combining
214 .Using saturable inductor
215 .Using transformer
216 ..With movable structure or winding
217 .Using a three or more terminal semiconductive device
218 .Using impedance
219 ..In bridge
220 IN SHUNT WITH SOURCE OR LOAD
221 .Photo responsive
222 .Using choke and switch across source
223 .Using a three or more terminal semiconductive device
224 ..With additional series regulator
225 ..Plural devices
226 ..Linearly acting
227 .Using electronic tube
228 ..With additional series regulator
229 .Using diode
230 ..Inverse parallel
231 ..Zener
232 .Using inductor
233 .Using impedance
234 OUTPUT LEVEL RESPONSIVE
235 .Zero switching
236 ..Nonelectrical condition sensing
237 .Phase controlled switching using electronic tube or a three or more terminal semiconductive device
238 ..With soft start
239 ..Including single unidirectional element with bidirectional pass
240 ..Including saturable inductor in trigger circuit
241 ..With digital control
242 ..Including ramp generator or controlled capacitor charging
243 ...As input to comparator
244 ..With synchronization
245 ..With nonelectrical condition sensing
246 ..With plural condition sensing
247 .Using a transformer or inductor as the final control device
248 ..Ferroresonant
249 ..Controllably saturable
250 ...With specific core structure (e.g., gap, aperture, slot, permanent magnet)
251 ...With plural power windings
252 ....In bridge configuration or in bridge arm
253 ....On different cores
254 ...With electronic tube or a three or more terminal semiconductive device in control circuit
255 ..Having a variable length winding (e.g., tapped) as the final control device
256 ...With motor driven tap switch
257 ....Including an electronic tube or a three or more terminal semiconductive device in control circuit
258 ...With electronic tube or a three or more terminal semiconductive device as tap switch
259 ..Having a winding in series with the source and load (e.g., buck-boost)
260 ...With motor in control circuit
261 ...With saturable reactor in control circuit
262 ...Plural windngs in series
263 ...With electronic tube or a three or more terminal semiconductive device in control circuit
264 ..Having movable structure or winding
265 .Using a three or more terminal semiconductive device as the final control device
266 ..Including pre or post regulation
267 ..Including plural loads commonly controlled
268 ..Including plural final control devices
269 ...Linearly acting parallel connected
270 ...Linearly acting series connected
271 ...Switched (e.g., on-off control)
272 ....Parallel connected
273 ..Linearly acting
274 ...With threshold detection
275 ...With plural condition sensing
276 ....For protective system
277 .....With current sensor
278 ......Having base-emitter of transistor coupled across sensor
279 ....Including final control device parameter
280 ...With a specific feedback amplifier (e.g., integrator, summer)
281 ...With reference voltage circuitry
282 ..Switched (e.g., switching regulators)
283 ...Digitally controlled
284 ...With threshold detection
285 ...With plural condition sensing
286 ....Including filter sensing
287 .....In flyback path
288 ...With ramp generator or controlled capacitor charging
289 ...With base drive control dissipation
290 ...With inductor in control circuit
291 .Using an electronic tube as the final control device
292 ..With a three or more terminal semiconductive device in control circuit
293 .Using an impedance as the final control device
294 ..Hall effect device, magnetoresistor or thermistor
295 ..Pressure sensitive resistor
296 ..Liquid contact resistor
297 ..Plural selective resistors
298 ..Variable resistor
299 INPUT LEVEL RESPONSIVE
300 .Phase controlled switching using electronic tube or a three or more terminal semiconductive device
301 .Using a transformer or inductor as the final control device
302 ..Saturable
303 .Using a linearly acting final control device
304 SELF-REGULATING (E.G., NONRETROACTIVE)
305 .Using a transformer or inductor as the final control device
306 ..Ferroresonant
307 ...With plural cores
308 ...With core having an air gap or magnetic shunt
309 ....Including a ferrocapacitor across a tertiary winding
310 ..Controllably saturable

SELF-REGULATING (E.G., NONRETROACTIVE)
311 .Using a three or more terminal semiconductive device as the final control device
312 ..For current stabilization
313 ...To derive a voltage reference (e.g., band gap regulator)
314 ....With additional stage
315 ...Including parallel paths (e.g., current mirror)
316 ....With amplifier connected to or between current paths
317 ....With switched final control device
318 EXTERNAL OR OPERATOR CONTROLLED
319 .Zero switching
320 .Phase controlled switching using electronic tube or a three or more terminal semiconductive device
321 ..With soft start
322 ..With digital control
323 ..With interval timer
324 ..Using single unidirectional element with bidirectional pass
325 ..With a three or more terminal semiconductive device in trigger circuit
326 ...Including ramp generator or controlled capacitor charging
327 ..With passive element only in trigger circuit
328 .Using a transformer or inductor as the final control device
329 ..Controllably saturable
330 ...With permanent magnet
331 ...With core having a gap, aperture, or slot
332 ...With plural power windings
333 ....In bridge configuration or in bridge arm
334 ....On different legs of single core
335 ....On different cores
336 .....Multistage
337 .....Push-pull
338 ...With plural cores
339 ...Including an electronic tube or a three or more terminal semiconductive device in control circuit
340 ..Having a variable length winding (e.g., tapped) as the final control device
341 ...With motor driven tap switch
342 ...With other transformer
343 ...With a three or more terminal semiconductive device
344 ..Having a windng in series with the source and load (e.g., buck-boost)
345 ..Having a switch in series with winding
346 ..Having series-parallel connectable windings
347 ..Having movable structure or winding
348 ...Including rotary motion
349 .Using a three or more terminal semiconductive device as the final control device
350 ..Including plural final control devices
351 ..Switched (e.g., switching regulators)
352 .Using an impedance as the final control device
353 ..Resistor
354 ...Selective
355 INCLUDING A TRANSFORMER OR AN INDUCTOR
356 .With compensation
357 ..For current transformer
358 .Current transformer
359 .Potential transformer
360 .Superconductive
361 .Polyphase or plural transformers
362 .With core having permanent magnet or air gap
363 .Inductor with or in a bridge
364 INCLUDING AN IMPEDANCE
365 .In a bridge
366 ..Thermistor
367 ..Resistor only
368 .Hall effect device or magnetoresistor
369 .Thermistor or resistor
370 ..With capacitor

300 PARTICLE PRECESSION RESONANCE
301 .Using a magnetometer
302 ..To determine direction
303 .Using well logging device
304 .Using optical pumping or sensing device
305 ..Having particular optical cell structure
306 .Determine fluid flow rate
307 .Using a nuclear resonance spectrometer system
308 ..Including a test sample and control sample
309 ..To obtain localized resonance within a sample
310 ..By scanning sample frequency spectrum
311 ..With signal decoupling
312 ..By spectrum storage and analysis
313 ..Including polarizing magnetic field/radio frequency tuning
314 ..With conditioning of transmitter signal
315 ..With sample resonant frequency and temperature interdependence
316 .Using an electron resonance spectrometer system
317 ..Including a test sample and control sample
318 .Spectrometer components
319 ..Polarizing field magnet
320 ...With homogeneity control
321 ..Sample holder structure
322 ..Electronic circuit elements
323 OF GEOPHYSIC OF GEOPHYSICAL SURFACE OR SUBSURFACE IN SITU
324 .Including borehole fluid investigation
325 ..To determine fluid entry
326 .For small object detection or location
327 ..Using oscillator coupled search head
328 ...Of the beat frequency type
329 ..Using movable transmitter and receiver
330 .By aerial survey
331 ..For magnetic field detection
332 .With radiant energy or nonconductive-type transmitter
333 ..Within a borehole
334 ..With separate pickup
335 ...Employing multiple frequencies
336 ...To detect transient signals
337 ...To detect return wave signals
338 ...Within a borehole
339 ....By induction logging
340 .....To measure susceptibility
341 .....To measure dielectric constant
342 .....Using a toroidal coil
343 .....Using angularly spaced coils
344 .With radiant energy or nonconductive-type receiver
345 .By magnetic means
346 ..Within a borehole
347 .Using electrode arrays, circuits, structure, or supports
348 ..For detecting naturally occurring fields, currents, or potentials
349 ...Of the telluric type
350 ....Including magreto-telluric type
351 ...Within a borehole
352 ....Combined with artificial source measurement
353 ....With fluid movement or pressure variation
354 ..Coupled to artificial current source
355 ...Within a borehole
356 ....While drilling
357 ...Including separate pickup of generated fields or potentials
358 ....With three electrodes
359 ....With nonelectrode pickup means
360 ....Using a pulse-type current source
361 .....With mechanical current reversing means
362 .....To measure induced polarization
363 ....By varying the path of current flow
364 .....Using frequency variation
365 ....Offshore
366 ....For well logging
367 .....Using a pad member
368 .....Cased borehole
369 .....While drilling
370 .....Using surface current electrodes
371 .....Using plural fields
372 .....Between spaced boreholes
373 .....Using current focussing means
374 ......Including a pad member
375 ......Including plural current focussing arrays
376 OF SUBSURFACE CORE SAMPLE
377 .For magnetic properties
378 INTERNAL-COMBUSTION ENGINE IGNITION SYSTEM OR DEVICE
379 .With analysis of displayed waveform
380 .Electronic ignition system
381 ..With magnetically controlled circuit
382 ..With capacitor discharge circuit
383 .By simulating or substituting for a component under test
384 .Using plural tests in a conventional ignition system
385 .Distributor
386 ..Dwell (i.e., cam angle)
387 ..Condenser
388 .Coil
389 .Magneto
390 .Low or high tension lead
391 .Ignition timing
392 ..Using a pulse signal technique
393 .In situ testing of spark plug
394 ..With cathode-ray tube display
395 ..Using an illuminating device to indicate spark plug condition
396 ..With an air gap in series with spark plug to indicate spark plug condition
397 ..By shorting the plug to ground to indicate spark plug condition
398 ...With air gap in ground circuit
399 ..Wherein a measured electric quantity indicates spark plug condition
400 .Spark plug removed or tested in a test fixture
401 ..Using a pressure chamber
402 .Apparatus for coupling a measuring instrument to an ignition system
403 ELECTRIC LAMP OR DISCHARGE DEVICE
404 .Cathode-ray tube
405 .Vacuum tube
406 ..Plural tubes in the testing circuit
407 ..Testing circuit for diverse-type tube
408 ..Circuit for making diverse test
409 ..Testing discharge space characteristic (e.g., emission)
410 ...With application of current or potential to the discharge control means
411 ....Pulsating or alternating current or potential for the discharge control means
412 .....Pulsating or alternating current for the anode
413 ..Shock testing
414 .Electric lamp
415 ELECTROMECHANICAL SWITCHING DEVICE
416 .Voltage regulator
417 .Thermostat switch
418 .Relay
419 ..Reed switch
420 ..To evaluate contact chatter

ELECTROMECHANICAL SWITCHING DEVICE
.Relay
421 ..To evaluate contact resistance
422 ..To evaluate contact sequence of operation
423 ..To evaluate contact response time
424 .Circuit breaker
425 ELECTROLYTE PROPERTIES
426 .Using a battery testing device
427 ..To determine ampere-hour charge capacity
428 ...Including an integrating device
429 ..To determine load/no-load voltage
430 ..To determine internal battery impedance
431 ..With temperature compensation of measured condition
432 ..To determine battery electrolyte condition
433 ..To compare battery voltage with a reference voltage
434 ..To determine plural cell condition
435 ..Having particular meter scale or indicator
436 ..Including oscillator in measurement circuit
437 ..Including probe structure
438 .Using a pH determining device
439 .Using a conductivity determining device
440 ..Which includes a dropping mercury cell
441 ..Which includes a temperature responsive element
442 ..Which includes an oscillator
443 ..Having a bridge circuit
444 ..Which includes current and voltage electrodes
445 ..Having inductance probe structure
446 ..Having conductance probe structure
447 ...With movable or adjustable electrode
448 ...With concentric electrodes
449 ...With axially arranged electrodes
450 ..Which includes particular cell container structure
451 A MATERIAL PROPERTY USING THERMOLELECTRIC PHENOMENON
452 A MATERIAL PROPERTY USING ELECTROSTATIC PHENOMENON
453 .In a liquid
454 .Frictionally induced
455 .Corona induced
456 .For flaw detection
457 ELECTROSTATIC FIELD
458 .Using modulation-type electrometer
459 USING IONIZATION EFFECTS
460 .For monitoring pressure
461 ..Using a radioactive substance
462 ..Using thermionic emission
463 ..Using a magnetic field
464 .For analysis of gas, vapor, or particles of matter
465 ..Using electronegative gas sensor
466 ..Using a filter
467 ..Using test material desorption
468 ..Using thermal ionization
469 ..Using a radioactive substance
470 ..Using thermionic emission
200 MAGNETIC
207.11 .Displacement
207.12 ..Compensation for measurement
207.13 ..Having particular sensor means
207.14 ...Diverse sensors
207.15 ...Inductive
207.16 ....Electrically energized
207.17 .....Separate pick-up
207.18 .....Differential type (e.g., LVDT)
207.19 .....Differential bridge circuit
207.2 ...Hall effect
207.21 ...Magnetoresistive
207.22 ..Having particular sensed object
207.23 ..Plural measurement (e.g., linear & rotary)
207.24 ..Linear
207.25 ..Rotary
207.26 ..Approach or retreat
201 .Susceptibility
202 .Calibration
203 .Curie point determination
204 .Fluid material examination
205 .Permanent magnet tesing
206 .Movable random length material measurement
209 .Stress in material measurement
210 .Magnetic information storage element testing
211 ..Memory core storage element testing
212 ..Dynamic information element testing
213 .Magnetic recording medium on magnetized object records object field
214 .By paramagnetic particles
215 ..With pattern enhancing additive
216 ..Flaw testing
217 .Railroad rail flaw testing
218 ..Rail joint cutout
219 .Magnetic sensor within material
220 ..Sensor supported, positioned, or moved within pipe
221 ...Borehole pipe testing
222 .Hysteresis or eddy current loss testing
223 .Hysteresis loop curve display or recording
224 .With temperature control of material or element of test circuit
225 .With compensation for test variable
226 .Combined
227 .Plural tests
228 .With means to create magnetic field to test material
229 ..Thickness measuring
230 ...Layer or layered material
231 ...With backing member
232 ..Plural magnetic fields in material
233 ..With phase sensitive element
234 ..Electrically energized nonforce type sensor
235 ...Noncoil type
236 ...Oscillator type
237 ....Material flaw testing
238 ...Material flaw testing
239 ..Induced voltage-type sensor
240 ...Material flaw testing
241 ....Opposed induced voltage sensors
242 ....Plural sensors
243 ...Plural sensors
244 .Magnetometers
244.1 ..Optical
245 ..Plural sensor axis misalignment correction
246 ..With means to align field sensor with magnetic field sensed
247 ..Nonparallel plural magnetic sensors
248 ..Superconductive magnetometers
249 ..Thin film magnetometers
250 ..Electronic tube or microwave magnetometers
251 ..Hall plate magnetometers
252 ..Semiconductor type solid-state or magnetoresistive magnetometers
253 ..Saturable core magnetometers
254 ...Second harmonic type
255 ...Peak voltage type
256 ..Energized movable sensing coil magnetometers
257 ..Moving coil magnetometer
258 ..Fixed coil magnetometer
259 ..Movable magnet or magnetic member interacts with magnetic field

500	FAULT DETECTING IN ELECTRIC CIRCUITS & OF ELECTRIC COMPONENTS
501	.Using radiant energy
502	.In an ignitor or detonator
503	.In vehicle wiring
504	..With trailer
505	..Combined with window glass
506	.Combined with a flashlight
507	..With fuse testing attachment
508	.With electric power receptacle for line wire testing
509	.Of ground fault indication
510	..Of electrically operated apparatus (power tool, appliance, machine, etc.)
511	.Of electrically operated apparatus (power tool, appliance, machine, etc.)
512	.For fault location
513	..Where component moves while under test
514	...By exposing component to liquid or gas while under test
515	...Using a particular sensing electrode
516	....Metal chain
517	....Wire bristles
518	....Metal pellets or beads
519	..By capacitance measuring
520	..By frequency sensitive or responsive detection
521	..By phase sensitive or responsive detection
522	..By voltage or current measuring
523	...Of an applied test signal
524	...Polarity responsive
525	..By resistance or impedance measuring
526	...Using a bridge circuit
527	..By applying a test signal
528	...Tracing test signal to fault location
529	....Using a magnetic field sensor
530	....Using an electric field sensor
531	...At fault site
532	...Using time measuring
533	....Of reflected test signal
534	..By reflection technique
535	..By time measuring
536	..By spark of arc discharge
537	.Of individual circuit component or element
538	..Electrical connectors
539	..Multiconductor cable
540	...With sequencer
541	...For insulation fault
542	...Having a light or sound indicator
543	..Single conductor cable
544	...For insulation fault
545	..Armature or rotor
546	..Winding or coil
547	...Transformer
548	..Capacitor
549	..Resistor
550	..Fuse
551	..Insulation
552	...Bushing
553	...Oil
554	...Sheet material
555	.Instruments & devices for fault testing
556	..Having a lamp or light indicator
557	FOR INSULATION FAULT OF NONCIRCUIT ELEMENTS
558	.Where element moves while under test
559	.Where a moving sensing electrode scans a stationary element under test
600	IMPEDANCE, ADMITTANCE OR OTHER QUANTITIES REPRESENTATIVE OF ELECTRICAL STIMULUS/RESPONSE RELATIONSHIPS
601	.Calibration
602	.With auxilliary means to condition stimulus/response signals
603	..For excitation
604	...Including marker signal generator circuit
605	..For response signal evaluation or processing
606	...Including a signal comparison circuit
607	...Including a conversion (e.g., A->D or D-> A) process
608	...Including a ratiometric function
609	..For sensing
610	...Including a bridge circuit
611	...Including a remote type circuit
612	.Parameter related to the reproduction or fidelity of a signal affected by a circuit under test
613	..Noise
614	...Signal to noise ratio or noise figure
615	..Transfer function type characteristics
616	...Gain or attenuation
617	...Response time or phase delay
618	...Transient response or transient recovery time (e.g., damping)
619	...Selective type characteristics
620	..Distortion
621	...Envelope delay
622	...Phase
623	...Harmonic
624	...Intermodulation
625	...Dissymmetry or asymmetry
626	...Nonlinearity
627	..Shielding effectiveness (SE)
628	...Circuit interference (e.g., crosstalk) measurement
629	.Distributive type parameters
630	..Plural diverse parameters
631	..Using wave polarization (e.g., field rotation)
632	..Using particular field coupling type (e.g., fringing field)
633	..Using resonant frequency
634	...To determine water content
635	...To determine dimension (e.g., distance or thickness)
636	...With a resonant cavity
637	..Using transmitted or reflected microwaves
638	...Scattering type parameters (e.g., complex reflection coefficient)
639	...Where energy is transmitted through a test substance
640	....To determine water content
641	....To determine insertion loss
642	...Where energy is reflected (e.g., reflectometry)
643	....To determine water content
644	....To determine dimension (e.g., distance or thickness)
645	....Having standing wave pattern
646	....To determine reflection coefficient
647	..Using a comparison or difference circuit
648	...With a bridge circuit
649	.Lumped type parameters
650	..Using phasor or vector analysis
651	...With a bridge circuit
652	..Of a resonant circuit
653	..For figure of merit or Q value
654	..Using inductive type measurement
655	...Including a tuned or resonant circuit
656	...Including a comparison or difference circuit

	IMPEDANCE, ADMITTANCE OR OTHER QUANTITIES REPRESENTATIVE OF ELECTRICAL STIMULUS/RESPONSE RELATIONSHIPS
	.Lumped type parameters
	..Using inductive type measurement
	...Including a comparison or difference circuit
657	....Using a bridge circuit
658	..Using capacitive type measurement
659	...With loss characteristic evaluation
660	...With variable electrode area
661	...With variable distance between capacitor electrodes
662	....To determine dimension (e.g., thickness or distance)
663	...Where a material or object forms part of the dielectric being measured
664	....To determine water content
665	.....By comparison or difference circuit
666	......Including a bridge circuit
667	.....By frequency signal response, change or processing circuit
668	......Including tuned or resonant circuit
669	.....With compensation means
670	......For temperature variations
671	....To determine dimension (e.g., dielectric thickness)
672	....By comparison or difference circuit
673	.....Including a bridge circuit
674	....By frequency signal response, change or processing circuit
675	.....Including a tuned or resonant circuit
676	...With pulse signal processing circuit
677	....Including R/C time constant circuit
678	....Including charge or discharge cycle circuit
679	...With comparison or difference circuit
680	....Including a bridge circuit
681	...With frequency signal response, change or processing circuit
682	....Including a tuned or resonant circuit
683	...With phase signal processing circuit
684	...With compensation means
685	....For temperature variation
686	...With a capacitive sensing means
687	....Having fringing field coupling
688	....Including a guard or ground electrode
689	....To determine water content
690	....Including a probe type structure
691	..Using resistance or conductance measurement
692	...With living organism condition determination using conductivity effects
693	...With object or substance characteristic determination using conductivity effects
694	....To determine water content
695	.....Where the objects moves while under test
696	.....With a probe structure
697	....For interface
698	....To determine oil qualities
699	....To determine dimension (e.g., distance or thickness)
700	.....Including corrosion or erosion
701	....Where the object moves while under test
702	...With radiant energy effects
703	....Including heating
704	...With ratio determination
705	...With comparison or difference circuit
706	....Including a bridge circuit
707	...With frequency respsonse, change or processing circuit
708	....Including a tuned or resonant circuit
709	...With phase signal processing circuit
710	...With pulse signal processing circuit
711	....Including R/C time constant circuit
712	....Including a digital or logic circuit
713	...With voltage or current signal evaluation
714	....Including a potentiometer
715	....Including a particular probing technique (e.g., four point probe)
716	.....To determine dimension (e.g., distance or thickness)
717	.....To determine material composition
718	.....To detect a flaw or defect
719	...With semiconductor or IC materials quality determination using conductivity effects
720	...With compensation means
721	....For temperature variation
722	...Device or apparatus determines conductivity effects
723	....Potentiometer
724	....Using a probe type structure
725	.Using a particular bridge circuit
726	.Transformer testing (e.g., ratio)
727	.Piezoelectric crystal testing (e.g., frequency, resistance)
66	CONDUCTOR IDENTIFICATION OF LOCATION (E.G., PHASE IDENTIFICATION)
67	.Inaccessible (at test point) conductor (e.g., buried in wall)
160	ELECTRICAL SPEED MEASURING
161	.Speed comparing means
162	.With acceleration measuring means
163	.Including speed analog electrical signal generator
164	..Eddy current generator type (e.g., tachometer)
165	..With direction indicator
166	.Including speed-related frequency generator
167	..Including rotating magnetic field actuated indicator
168	..Including periodic switch
169	...In ignition system
170	....High voltage speed signal type
171	...With extent-of-travel indicator
172	..Including synchronized recording medium
173	..Including magnetic detector
174	...Permanent magnet type
175	..Including radiant energy detector
176	.Including object displacement varied variable circuit impedance
177	.Including motor current or voltage sensor
178	.Including "event" sensing means
179	..Magnetic field sensor
180	..Mechanically actuated switch
71.1	DETERMINING NONELECTRIC PROPERTIES BY MEASURING ELECTRIC PROPERTIES
71.2	.Erosion
71.3	.Beam of atomic particles
71.4	.Particle counting
71.5	.Semiconductors for nonelectrical property
71.6	.Superconductors
72	TESTING POTENTIAL IN SPECIFIC ENVIRONMENT (E.G., LIGHTNING STROKE)
72.5	.Voltage probe
73.1	PLURAL, AUTOMATICALLY SEQUENTIAL TESTS
74	TESTING AND CALIBRATING ELECTRIC METERS (E.G., WATT-HOUR METERS)
75	.By stroboscopic means

76 R	MEASURING, TESTING OR SENSING ELECTRICITY PER SE
76 A	..Integrating
77 R	.Analysis of complex waves
77 A	...Amplitude distribution
77 B	...Frequency spectrum analyzer
77 C	....Scanning-panoramic receivers
77 CS	.....Scanning, particular sweep
77 D	....Nonscanning
77 E	.....Parallel filters
77 F	......Logarithmic
77 G	.....Correlators
77 H	......With delay line
77 K	......Optical
77 J	......Physical
78 R	.Frequency of cyclic current or voltage (e.g., cycle counting)
78 D	...Digital output
78 E	...With energy storage
78 F	...With filtering
78 J	...Current output proportional to frequency
78 N	...Nulling system
78 Q	...Qualitative output
78 S	...With saturable device
78 Z	...Deviation measurement
79 R	..By frequency comparison (e.g., heterodyne)
79 D	....Digital
80	..Tuned mechanical resonator (e.g., reed piezocrystal)
81	..By tuning (e.g., to resonance)
82	..By phase comparison
83 R	.Phase comparison (e.g., between cyclic pulse voltage and sinusoidal current)
83 A	...Analogue output
83 D	...Digital output
83 Q	...Quadrature sensing
83 FE	...Feedback control, electrical
83 FM	...Feedback control, mechanical
84	..With waveguide (e.g., coaxial cable)
85	..With frequency conversion
86	..Polyphase (e.g., phase angle, phase rotation or sequence)
87	..With nonlinear device (e.g., saturable reactor, rectifier), discharge device (e.g., gas tube) or lamp
88	...Cathode ray
89	...Space discharge control means (e.g., grid)
90	..Electrodynamometer instrument
91	..Synchroscope type
92	.Fluid (e.g., thermal expansion)
93	..Conductive field (e.g., mercury)
94	...Electrolytic
95	.With waveguide or long line
96	.Using radiant energy
97	..Light beam type (e.g., mirror galvanometer, parallax-free scale)
98	.Balancing (e.g., known/unknown voltage comparison, bridge, rebalancing)
99 R	..Automatic
99 D	....Digital voltmeters
100	...With recording
101	.Non-rebalancing bridge
102	.Transient or portion of cyclic
103 R	.Demand, excess, maximum or minimum (e.g., separate meters for positive and negative power, peak voltmeter)
103 P	...Peak voltmeters
104	..Thermal (e.g., actuation)
105	.Thermal (e.g., compensation)
106	..Actuation
107	.Polyphase
108	..Positive, negative or zero sequence
109	.Electrostatic attraction or piezoelectric
110	.Meter protection or fraud combatting
111	.With storage means for voltage or current (e.g., condenser banks)
112	..Tape, sheet (e.g., disk) or wire (e.g., magnetic) storage
113	.Recording
114	.Plural meters (e.g., plural movements in one case)
115	.Plural ranges, scales or registration rates
116	..With register (e.g., discount type, demand penalty)
117 R	.Magnetic saturation (e.g., in field or in amplifier)
117 H	...Hall effect
118	.Modulator/demodulator
119	.With rectifier (e.g., A.C. to D.C.)
120	.With voltage or current conversion (e.g., D.C. to A.C., 60 to 1000)
121 R	.Cathode ray (e.g., magic eye)
121 E	...Magic eye indicators
122	.Gaseous discharge (e.g., spark gap voltmeter)
123 R	.With amplifier or space discharge device
123 C	...Feedback amplifiers
124	..Inverted amplifier
125	.Inertia control, instrument damping and vibration damping
126	.With coupling means (e.g., attenuator, shunt)
127	..Transformer (e.g., split core admits conductor carrying unknown current)
128	..Selective filter
129	.Polepiece (e.g., split) admits nonunitary input conductor
130	.Self-calibration
131	.Suppressed zero
132	.Nonlinear (e.g., Thyrite)
133	.Nonquantitative (e.g., hot-line indicator, polarity tester)
134	.With commutator or reversing or pulsating switch (e.g., D.C. watt-hour meter)
135	..Oscillating
136	.With rolling wheel or ball (e.g., transmission, integrating)
137	.Eddy current rotor (e.g., A.C. integrating wattmeter)
138	..With phase adjustment
139	.Motor-driven, time-controlled or oscillating (e.g., ratchet)
140 R	.Plural inputs (e.g., summation, ratio)
140 D	...Ratio
141	..Voltamperes (real or reactive)
142	..Watts
143	.Plural active motor elements (e.g., for rtwo crossed pointers)
144	.With electromagnetic field (e.g., dynamometer)
145	..Solenoid plunger type
146	..With permanent magnet (e.g., field, vane)
147	..Soft iron vane
149	.With probe, prod or terminals
150	.Eccentricallly pivoted coil
151 R	.With permanent magnet
151 A	...Permanent magnet core
152	..Drag magnet
153	.With register
154 R	.With rotor (e.g., filar suspension, zero set, balancing)
154 PB	...Pointer and bearing details
155	..With pivot (e.g., internal friction compensation, anticreep)
156	.Casings
157	.Combined
158 R	MISCELLANEOUS
158 D	..Diode testing

	MISCELLANEOUS
158 F	..Test fixtures
158 MG	..Motor-generator tests
158 P	..Probes
158 SC	..Silicon-controlled rectifier tests
158 SM	..Servomotor tests
158 SY	..Synchro tests
158 T	..Transistor tests

CROSS-REFERENCE ART COLLECTION

****

800	DIVINING RODS

1 WITH MEANS RESPONSIVE TO EXTERNAL NONELECTRICAL CONDITION
2 .Light responsive
3 .Temperature responsive
4 .Moisture responsive
5 .Responsive to approach or passage of an object
6 .Flame responsive (e.g., flame acts as a rectifier in circuit)
7 WITH PROTECTIVE DEVICES FOR PERSONNEL
8 WITH PROTECTIVE MEANS FOR TUBES (E.G., AGAINST OVERLOAD, POWER SURGE)
9 .With control means for plate voltage or current
10 .With means to limit grid voltage and/or current
11 .Temperature control
12 WITH DIVERSE-TYPE ART DEVICE
13 WAVE CONVERSION SYSTEM (E.G., SINE WAVE TO PULSE WAVE)
14 .With synthesizing or quantizing means
15 .Frequency conversion systems
16 ..Harmonic or subharmonic generating means
17 ...With plural outputs
18 ....Selectively
19 ...With particular tube and/or distributed parameter elements
20 ..Frequency doubling means
21 .A.C. wave input to A.C. wave output
22 ..With plural conversion means (e.g., sine wave to sawtooth) to sine wave
23 ..With harmonic adding means
24 ..With phase conversion means (i.e., M-phase to N-phase)
25 ..With frequency dividing means
26 .A.C. wave input to rectified output
27 .Pulse wave input to A.C. wave output
28 .A.C. wave input to complex or pulse wave output
29 ..With plural pulse train outputs
30 ..With frequency dividing means
31 ..With amplitude control and/or limiting means
32 ..With rectifier means
33 ..With saturable inductance means
34 .Pulse wave input to pulse wave output
35 ..Rectangular pulse to sawtooth pulse
36 ..With plural conversions (e.g., triangular to sawtooth to square wave)
38.1 ..With pulse frequency multiplying means (i.e., single pulse successive pulse output)
53 ..With amplitude variation means (i.e., one pulse height to another)
54 ...With limiting and/or clipping means
55 ..With pulse delay and/or phase control means
56 ...With passive delay line means
57 ..Plural pulse output with opposite polarities
58 ..With duration control means (e.g., pulse stretching)
59 PULSE GENERATING MEANS
60 .With plural paths in network
61 ..With common output
62 .With plural outputs
63 .With synchronizing or timing means
64 .With electron beam-type tube
65 .With electromagnetic pulse forming means
66 .Delay line and/or capacitor storage means charged or discharged through or by a relaxation oscillator-type circuit
67 .Delay line or capacitor storage means charges or discharges through a tube
68 ..With relaxation oscillator in input of discharge tube
69 CONTROL SYSTEMS
70 .Plurality of load devices
71 .With plural paths in circuits
72 .With timing and/or synchronizing means
73 ..Intermittent control
74 ..With pulse forming means
75 ..Sequencing means
76 .Electron switching tube discharge path in series with an electrical circuit
77 ..With timing means
78 ...Utilizing a plurality of capacitor charging and discharging means
79 ..Plural tubes complete plural separate circuit means
80 ..Plural tubes complete single circuit means
81 ...Tubes connected in inverse parallel
82 ..Single tube completes circuit
83 ...Responsive to plurality of control signals
84 ...Gaseous tube
85 .Electron tube controls external circuit control means
86 ..With timing means (closing means)
87 ...With mechanical switching means in control circuit of tube
88 ..Plural tubes with plural electromagnetic circuit control means
89 ..Plural tubes with single electromagnetic circuit control means
90 ..Single tube
91 .Electron tube gating means
95 ..Plural gating means
96 ...Parallel-connected
97 ...Selectively operated
98 ..With cathode follower output
99 ..With inhibiting means
100 ..Shunt-controlled
101 ..Plural tube gating means (single gate)
102 ..Single tube gating means
103 DISTRIBUTION AND COMBINING SYSTEMS
104 .Plural channel input to single channel output
105 .Single channel input to plural channel output
106 ..Plural tube stages successively or sequentially conducting
107 ..Single tube with plurality of outputs
108 PULSE CHARACTERISTIC SELECTING MEANS
109 .By time or phase relationship
110 ..With coincidence means
111 .By width
112 ..With plural paths in circuit
113 ..With shock-excited circuit
114 .By shape or slope
115 .By amplitude
116 ..With plural channels
117 ...With combining means in output
118 .By polarity
119 .With decoding means
120 .Missing pulse detecting means
121 STORAGE SYSTEMS INCLUDING A TUBE OR TUBES
122 .With plural cascaded stage storage means
123 .Cathode ray tube storage means
124 ..With storage scan and/or reading scan means
125 .Gas tube means
126 .With single tube storage means
127 INTEGRATING OR DIFFERENTIATING NETWORKS
128 .With single tube (e.g., Miller integrator type)
129.1 WITH TIME INTERVAL DETERMINING MEANS

	WITH TIME INTERVAL DETERMINING MEANS
130.1	.Plurality of intervals sequentially
131.1	.With electromechanical relay means
132	OUTPUT INDICATIVE OF RATE OF CHANGE OR INPUT VOLTAGE
133	OUTPUT IS A FUNCTION OF PHASE OR FREQUENCY DIFFERENCE BETWEEN PLURAL INPUT SIGNALS (E.G., SYNCHRONOUS DETECTORS)
134	.Fixed frequency reference compared with a variable frequency
135	OUTPUT IS A FUNCTION OF DIFFERENCE IN AMPLITUDE BETWEEN TWO CHARACTERISTICS OF OR POINTS ON A SINGLE INPUT WAVE
136	OUTPUT IS A FUNCTION OF A SPECIFIC OR PREDETERMINED NUMBER OF COMPLETE CYCLES OF AN A.C. INPUT WAVE
137	OUTPUT IS A SELECTED ONE OF A PLURALITY OF SIMULTANEOUSLY APPLIED INPUT SIGNAL WAVES
138	OUTPUT IS PRESENT ONLY AT A PREDETERMINED FREQUENCY OF A SIGNAL INPUT
139	OUTPUT IS A FUNCTION OF A PRESELECTED SIGNAL COMPONENT IN A COMPOSITE WAVE INPUT (E.G., SYNCHRONIZING PULSE SEPARATORS)
140	OUTPUT IS A FUNCTION OF FREQUENCY REPETITION RATE OR POLARITY OF A SINGLE INPUT
141	.Output proportional to the deviation from a reference frequency
142	WITH OUTPUT AS A NONLINEAR FUNCTION OF INPUT
143	.With plural channels in circuit
144	.Output indicative of square law function or input (as either square or square root)
145	.Output a logarithmic function of input
146	VOLTAGE SIGNAL AMPLITUDE COMPARISON MEANS
147	.With plural paths in circuit
148	.With indicating means
149	.With filter and/or detector means
150	WITH OUTPUT REPRESENTATIVE OF OR DEPENDENT UPON A PARTICULAR OR INSTANTANEOUS AMPLITUDE OF THE INPUT
151	.With sampling and/or storage means in circuit
152	CHANNEL SELECTING MEANS
153	.With single input, plural output
154	.With plural input, single output
155	PHASE CORRECTION OR CONTROL SYSTEMS
156	OUTPUT A COMPOSITE OF A PLURALITY OF INPUTS
157	.Pulse wave inputs
158	OUTPUT A RESULTANT FUNCTION OF A PLURALITY OF INPUTS
159	.Sum and carry systems (e.g., half adders)
160	.Output is product of plural inputs
161	.Output is quotient of plural inputs
162	DISTORTION MEASURING AND/OR CORRECTION MEANS
163	.With plural channels
164	.With pulse regenerating means
165	UNWANTED WAVE COMPONENT ELIMINATING MEANS
166	.Quadrature component selection or rejection
167	.With filter means
168	AMPLITUDE CONTROL MEANS
169	.With amplitude limiting means
170	..With tuned circuit means
171	..With rectifier and/or nonlinear impedance
172	.With means to control current in the output
173	.With means to maintain constant level output
175	..With feedback means
176	WITH BOOTSTRAP CIRCUIT MEANS
177	ELECTRON TUBE DELAY MEANS
178	WITH PARTICULAR WAVE OUTPUT
179	.With synchronizing means
180	.With plural outputs
181	.Sawtooth or triangular wave output
182	..With cathode follower
183	..With constant current means in circuit
184	..With linearization means
185	..With slope and/or duration control means
186	.With step wave output
187	.With TV signal or complex pulse wave output
188	.With test pattern waveform
189	.With marker pulse wave output
190	WITH PARTICULAR CIRCUIT MEANS
191	.Plural stages including multivibrator type
192	..With feedback means between stages
193	.Multivibrator type
194	..With control tube
195	..With gating means
196	..With particular pulsing or triggering means
197	..With further tube in output
198	..With transistor in tube circuit
199	..With diverse-type tubes
200	..With gross coupling through a tube or tubes
201	..With synchronizing means
202	..With tubes in series (e.g., cascade connected)
203	..With cathodes connected
204	..With output control means
205	..With three or more conditions of equilibrium
206	..Bistable type
207	..Monostable type
208	.With bridge circuit
209	.With particular feedback means
210	.With gaseous tube
211	..With particular electrode arrangement
212	.With diverse-type vacuum tubes
213	.With cathode follower
214	.Tube or tubes perform plural functions
215	.With oscillation prevention means
216	.With distributed parameter circuit
217	.With plate supply voltage variation compensation means
218	.With equipotential surface cathode heating means
219	.Control circuit utilizes internal tube structure
220	.With space charge grid (e.g., virtual cathode)
221	.With particular coupling or decoupling means
222	.With particular connecting means
223	.Including oscillatory or shock-excited circuit
224	.One tube acts as a standby for another
225	.With particular grid control means
226	.With particular bias means
227	.Including electron or other charged particle beam tube
228	..With beam focusing, centering or dispersing means
229	..With beam deflecting means
230	...Magnetic
231	..Cathode ray type
232	..Klystron type
233	..With particle accelerating or decelerating means
234	...Cyclotron type

WITH PARTICULAR CIRCUIT MEANS
.Including electron or other charged particle beam tube
..With particle accelerating or decelerating means
235 ...Synchrotron type
236 ...Bevatron type
237 ...Betatron type
238 ...Rotatron type
239 .With speaker field coil
240 .With hum or microphonic eliminating means
241 .Negative resistance type
242 ..Secondary emissive type
243 ..Electron multiplier type
244 ..Magnetic field-controlled type
245 .With retarding field means (e.g., Barkhausen-Kurz)
246 .Single tube
247 ..Triggered circuit
248 ...Bistable (e.g., phantastron)
249 WITH PARTICULAR TUBE STRUCTURE
250 .Gas tube
251 ..With particular electrode arrangement
252 .Vacuum tube type
253 ..Magnetically controlled
254 ..Beam tube structure
255 ...Cathode ray type
256 ...Electron or particle acceleration or deceleration type
257 ...Negative resistance type
258 WITH PARTICULAR SOURCE OF POWER OR BIAS VOLTAGE
259 .With protective means
260 .With A.C. or D.C. input selectively or alternately
261 .With oscillator and/or interrupter
262 .Fluctuating or A.C. source with rectifier and/or filter means
263 ..With particular filter means
264 ..With battery connected across rectifier means
265 .With hum or interaction prevention means
266 ..With means to supply separate out of phase voltages to plate and grid circuit
267 .With voltage regulating means
268 .Raw A.C. to plate and/or filament circuits
269 .With thermoelectric generating means
270 .With particular filament heating circuit means
271 MISCELLANEOUS

300 FREQUENCY SHIFT KEYING OR MINIMUM SHIFT KEYING DEMODULATOR

301 .Including discrete semiconductor device

302 .Input signal combined with local oscillator or carrier frequency signal

303 .Including logic element (e.g., logic gate or flip-flop

304 PHASE SHIFT KEYING OR QUADRATURE AMPLITUDE DEMODULATOR

305 .Including discrete semiconductor device

306 .Input signal combined with local oscillator or carrier frequency signal

307 ..Including phase or frequency locked loop

308 ...With parallel signal combiners (e.g., Costas loop)

309 ....Including logic element (e.g., logic gate or flip-flop)

310 .Including logic element (e.g., logic gate or flip-flop)

311 PULSE OR INTERRUPTED CONTINUOUS WAVE DEMODULATOR

312 .Pulse width demodulator

313 .Pulse position, frequency, phase or spacing demodulator

314 ..Including discrete semiconductor device

315 FREQUENCY MODULATION DEMODULATOR

316 .Plural demodulation

317 ..Including amplitude demodulation

318 .Having specific distortion, noise or other interference prevention, reduction or compensation

319 ..Using feedback to reduce distortion, noise or other interference

320 ..By cancelling distortion, noise or other interference

321 ..Using amplitude limiting within the demodulator

322 .Including microwave or distributed parameter structure

323 .Input signal combined with local oscillator or carrier frequency signal

324 ..Input signal applied directly to local oscillator

325 ..Including phase or frequency locked loop

326 ...Including discrete semiconductor device

327 .Input signal split into plural signals

328 ..Including piezoelectric resonant element

329 ..Using a transformer to split input signal

330 ...Signals taken from primary and secondary windings

331 ....Including plural detector diodes (e.g., ratio detector type)

332 ...Signals taken from plural secondary windings

333 ....Including plural detector diodes (e.g., ratio detector type)

334 .....Including resonant circuits tuned above and below input signal carrier frequency

335 ...Including plural detector diodes (e.g., ratio detector type)

336 ..Input signal combined with phase shifted or delayed portion of input signal

337 ...Including LC resonant phase shift circuit

338 ..Input signal split by LC resonant circuit

339 ...Including LC resonant circuits tuned above and below input signal carrier frequency

340 ..Including plural detector diodes (e.g., ratio detector type)

341 .Input signal converted to and processed in pulse form (e.g., pulse counter or digital type demodulator)

342 ..Including discrete semiconductor device

343 ..Including digital logic circuitry

344 .Including signal passed through single demodulating path including resonant circuit

345 PHASE MODULATION DEMODULATOR

346 .Input signal combined with local oscillator or carrier frequency signal

347 AMPLITUDE MODULATION DEMODULATOR

348 .Having plural demodulation outputs

349 .Having specific distortion, noise or other interference prevention, reduction or compensation

350 ..Automatic amplitude stabilization or control

351 ..Nonlinearity reduction or compensation

352 ..Temperature compensation

353 ..Noise reduction or compensation

354 .Including microwave or distributed parameter structure

355 ..With electron discharge device

356 .Suppressed carrier double sideband type

357 .Single or vestigial sideband type

358 .Input signal combined with local oscillator or carrier frequency signal (e.g., synchronous demodulator)

359 ..Input signal applied directly to local oscillator

360 ..Including phase or frequency locked loop

361 ..Including sampling, gating, or switching

362 ...With three or more terminal discrete semiconductor device

363 .Input signal split into plural signals

364 ..Including three or more terminal discrete semiconductor device

365 ..Including diode demodulator device

366 ...Plural diodes

367 .Including regenerative feedback in non-oscillating demodulator

368 .Electron discharge demodulator device having more than two electrodes (e.g., triode, tetrode etc.)

369 .Including three or more terminal discrete semiconductor demodulator device

370 .Including diode demodulator device

371 .Coherer type demodulator

372 MISCELLANEOUS

CLASS 330 AMPLIFIERS

DECEMBER 1990

1 R	WITH DIVERSE-TYPE ART DEVICE
1 A	..With process control system
2	WITH AMPLIFIER CONDITION INDICATING OR TESTING MEANS
3	WITH PLURAL DIVERSE-TYPE AMPLIFYING DEVICES
4	WITH MASER-TYPE AMPLIFYING DEVICE
4.3	.Optical or quasi-optical type (e.g., laser, laser modulator, iraser)
4.5	PARAMETRIC AMPLIFIERS
4.6	.Traveling wave type
4.7	..Electron beam device
4.8	.Gyromagnetic type (e.g., ferrite)
4.9	.Semiconductor type (e.g., with semiconductor diode)
5	WITH SOLID ELEMENT WAVE PROPAGATING AMPLIFYING DEVICE
5.5	.Phonon type (e.g., ultrasonic wave propagating device)
6	WITH HALL EFFECT TYPE MEANS
7	WITH CAPACITIVE AMPLIFYING DEVICE
8	WITH SATURABLE REACTOR-TYPE AMPLIFYING DEVICE
9	WITH PERIODIC SWITCHING INPUT-OUTPUT (E.G., FOR DRIFT CORRECTION)
10	MODULATOR-DEMODULATOR-TYPE AMPLIFIER
11	WITH D.C. REINSERTION CIRCUIT
250	WITH SEMICONDUCTOR AMPLIFYING DEVICE (E.G., TRANSISTOR)
251	.Including Class D amplifier
252	.Including differential amplifier
253	..Having field effect transistor
254	..Having gain control means
255	..Having push-pull amplifier stage
256	..Having temperature compensation means
257	..Having current mirror amplifier
258	..Having common mode rejection circuit
259	..Having D.C. feedback bias control for stabilization
260	..Having signal feedback means
261	..Having particular biasing arrangement
262	.Including push-pull amplifier
263	..Having complementary symmetry
264	...And field effect transistor
265	...And feedback means
266	...And temperature compensation
267	...And particular biasing arrangement
268	....To eliminate crossover distortion
269	..Having field effect transistor
270	..Having D.C. feedback bias control for stabilization
271	..Having signal feedback means
272	..Having temperature compensating means
273	..Having particular biasing arrangement
274	...To eliminate crossover distortion
275	..Having balanced to unbalanced circuitry and vice versa
276	..Having transformer
277	.Including field effect transistor
278	.Including gain control means
279	..And significant control voltage developing means
280	...With delay means
281	...With time constant means
282	..Having feedback means acting as variable impedance
283	...Having emitter degeneration
284	..Having attenuation means in signal transmission path
285	..Having particular biasing means
286	.Including distributed parameter-type coupling
287	..Of diode type
288	.Including current mirror amplifier
289	.Including temperature compensation means
290	.Including D.C. feedback bias control for stabilization
291	.Including signal feedback means
292	..Having compensation for interelectrode impedance
293	..Having negative feedback
294	..Having frequency-responsive means or phase-shift means in feedback path
295	.Including plural amplifier channels
296	.Including particular biasing arrangement
297	.Including particular power supply circuitry
298	.Including protection means
299	.Including combined diverse-type semiconductor device
300	..Bipolar or unipolar (FET)
301	.Including balanced to unbalanced circuits and vice versa
302	.Including frequency-responsive means in the signal transmission path
303	..Including an active device in the filter means
304	..And equalizing means
305	..And tuning means
306	..And bandpass, broadband (e.g., wideband) or sidepass means
307	.Integrated circuits
308	.Including atomic particle or radiant energy impinging on a semiconductor
309	.Involving structure of three diverse function electrode type
310	.Including plural stages cascaded
311	..Having different configurations
41	WITH GAS OR VAPOR TUBE AMPLIFYING DEVICE
42	WITH SECONDARY ELECTRON EMISSION TUBE AMPLIFYING DEVICE
43	WITH TRAVELING WAVE-TYPE TUBE
44	WITH ELECTRON BEAM TUBE AMPLIFYING DEVICE
45	.Having electrode coupled to cavity resonator
46	.Having deflecting means
47	WITH MAGNETICALLY INFLUENCED DISCHARGE DEVICE (E.G., MAGNETRONS)
48	.Having signal applied to magnetic means
49	WITH VACUUM TUBE HAVING DISTRIBUTED PARAMETER IMPEDANCE CHARACTERISTICS
50	WITH DUMMY TUBE
51	COMBINED WITH AUTOMATIC AMPLIFIER DISABLING SWITCH MEANS
52	WITH PILOT FREQUENCY CONTROL MEANS
53	WITH DISTRIBUTED PARAMETER-TYPE COUPLING MEANS
54	.Distributed amplifier
55	.Push-pull
56	.Waveguide, cavity, or concentric line resonator
57	.Artificial line
58	WITH ROTATING DYNAMOELECTRIC AMPLIFYING DEVICE
59	HAVING LIGHT-CONTROLLED OR ACTIVATED DEVICE (I.E., NOT LIGHT SIGNAL)
60	HAVING MAGNETOSTRICTIVE-TYPE AMPLIFYING DEVICE
61 R	WITH RESISTIVE-TYPE AMPLIFYING DEVICE
61 A	..Negative resistance amplifiers
62	.Magnetoresistive type
63	WITH MAGNETIC MEANS AMPLIFYING DEVICE
64	WITH SPACE CHARGE GRID TUBE
65	INVOLVING STRUCTURE OTHER THAN THAT OF TRANSFORMERS PER SE
66	.With printed circuits
67	.With capacitive structure
68	.With shielding means
69	SUM AND DIFFERENCE AMPLIFIERS
70	ANODE ENERGIZED THROUGH DISCHARGE PATH OF CONTROLLED VACUUM TUBE
71	.Plural discharge paths traversed by anode supply

ANODE ENERGIZED THROUGH DISCHARGE PATH OF CONTROLLED VACUUM TUBE
.Plural discharge paths traversed by anode supply
72 ..Amplifier devices in arms of a bridge
73 .Plural outputs
74 .Separate signal inputs to series devices
75 SIGNAL FEEDBACK
76 .Compensating for inter-electrode impedance (e.g., neutralization)
77 ..At least one push-pull stage
78 ..To or from electrode common to input and output
79 ..By transformer feedback
80 ..By coil in parallel to and resonating with inter-electrode capacity
81 .At least one push-pull signal stage
82 ..Positive and negative feedback
83 ..Including D.C. path for signal feedback
84 .Plural amplifier channels
85 .Amplifier in signal feedback path
86 .Variable impedance in feedback path varied by separate control path
87 .Cathode impedance feedback
88 ..Cascade amplifier stages with cathode-cathode feedback
89 ...Between adjacent stages
90 ..Combined with diverse-type feedback coupling
91 ...Diverse feedback to or from cathode
92 ....Feedback to cathode impedance of a prior stage
93 ...Including positive feedback
94 ..Frequency responsive means in cathode impedance feedback path
95 ..Nonlinear impedance means in cathode impedance feedback path
96 .Combined with control of bias voltage of signal amplifier
97 .Including D.C. path for signal feedback
98 .In cascade amplifiers
99 ..Multiple feedback
100 ...A feedback to input of a prior stage
101 .Positive and negative feedback in same path at different frequencies
102 .Current and voltage feedback
103 .Multiple feedback paths
104 ..Positive and negative feedback
105 .From impedance in series with output load (e.g., current feedback)
106 .In series with input source
107 .Phase shift means in loop path
108 .Potentiometer common to signal and feedback path
109 .Frequency responsive feedback means
110 .Nonlinear impedance element in loop path
111 .To or from an auxiliary grid or to the anode
112 .Positive feedback
113 POLYPHASE POWER SUPPLY (I.E., FOR AN ELECTRODE, CATHODE HEATER, OR FILAMENT)
114 UNRECTIFIED A.C. POWER SUPPLY FOR AN ELECTRODE (I.E., NOT THE HEATER)
115 .Applied to filamentary cathode
116 WITH BALANCED-TO-UNBALANCED COUPLING
117 WITH UNBALANCED-TO-BALANCED COUPLING
118 INCLUDING A PUSH-PULL STAGE
119 .Coupling to or from cathode in push-pull
120 .Interstage coupling between push-pull
121 ..D.C. coupling
122 .Input and/or output coupling for push-pull
123 .Power or bias supply circuits and control thereof
124 R WITH PLURAL AMPLIFIER CHANNELS (E.G., PARALLEL AMPLIFIER CHANNELS)
124 D ..Redundant amplifier circuits
125 .D.C. and A.C. amplifier channels
126 .Amplifying different frequencies in different channels
127 WITH CONTROL OF POWER SUPPLY OR BIAS VOLTAGE
128 .Control means for anode of screen grid circuit
129 .With control of input electrode or gain control electrode bias
130 ..Bias controlled by separate external control source
131 ..Control of bias on separate gain control electrode
132 ..Frequency selective means to select control signal from amplifier channel
133 ..Different bias control means for different stages of cascade amplifier
134 ..Plural different bias control voltages provided by separate means
135 ..Amplitude limiting or bias voltage
136 ..Bias control signal from input of amplifier
137 ..Oscillator supplies or controls bias
138 ..Bias controlled by biased rectifier or discharge device
139 ..Electronic tube controls bias
140 ..Rectifier in bias control circuit
141 ..Time constant circuit in bias control circuit
142 ..Cathode resistor supplies bias (e.g., self-biasing circuits)
143 THERMALLY RESPONSIVE IMPEDANCE
144 VARIABLE IMPEDANCE FOR SIGNAL CHANNEL CONTROLLED BY SEPARATE CONTROL PATH
145 .Electron tube or diode as impedance
146 WHEATSTONE BRIDGE WITH AMPLIFIER IN AT LEAST ONE ARM
147 PLURAL SIGNAL INPUTS
148 PLURAL SIGNAL OUTPUTS
149 HUM OR NOISE OR DISTORTION BUCKING INTRODUCED INTO SIGNAL CHANNEL
150 CASCADED SIMILAR AMPLIFYING DEVICE OF DIFFERENT CHARACTERISTICS
151 WITH AMPLIFIER BYPASS MEANS (E.G., FORWARD FEED)
152 CASCADED DIFFERENTLY COUPLED BETWEEN STAGES
153 .Including a cathode follower stage
154 .Transformer or resonant circuit in interstage coupling (e.g., stagger tuning)
155 UNICONTROL OF COUPLING OR THE CIRCUITS ASSOCIATED THEREWITH
156 BOOTSTRAP COUPLING
157 INTERSTAGE COUPLING
158 .Coupling to cathode
159 ..D.C. coupling
160 .Coupling to plate or auxiliary grid
161 ..D.C. coupling
162 .Output coupling from grid
163 ..D.C. coupling
164 .With electronic tube or diode in coupling circuit
165 .Transformer coupling
166 ..With additional reactive coupling
167 ..With additional impedance connected to "P" or "S" circuits
168 ..From cathode
169 ..With means for adjusting inductive coupling
170 ..With shielding

INTERSTAGE COUPLING
.Transformer coupling
171 ..With transformer structure
172 .Coupling from cathode
173 ..D.C. coupling
174 .With electromechanical transducer (e.g., piezoelectric crystal)
175 .With lattice or Wheatstone bridge network in coupling circuits
176 .With T, H, or Pi network in coupling circuit
177 .With coupling or blocking capacitor
178 ..With R or L in series between stages
179 ..L in anode or grid circuit
180 ..With R in anode and grid circuit (RC coupling)
181 .D.C. coupled
182 ..With series reactive element between stages
183 ..With nonlinear device
184 ..With series resistance between stages
185 INPUT NETWORKS
186 .To cathode
187 ..D.C. coupled
188 .Transformer coupled
189 ..With additional impedance connected to "P" or "S" circuits
190 ..With transformer structure
191 .D.C. coupled
192 OUTPUT NETWORKS
193 .From cathode
194 ..D.C. coupled
195 .Transformer coupled
196 ..With additional impedance connected to "P" or "S" circuit
197 ..With transformer structure
198 .D.C. coupled
199 WITH POWER OR BIAS VOLTAGE SUPPLY
200 .For plural stage amplifier
201 ..Filamentary cathodes heated by anode current or anode supply source
202 .For anode
203 ..And input electrode
204 .For input electrode
205 ..And filamentary cathode
206 .For filamentary cathode
207 R MISCELLANEOUS
207 A ..Class D
207 P ..Amplifier protection means

94.1	MOLECULAR OR PARTICLE RESONANT TYPE (E.G., MASER)
1 R	AUTOMATIC FREQUENCY STABILIZATION USING A PHASE OR FREQUENCY SENSING MEANS
1 A	..AFC with logic elements
2	.Plural oscillators controlled
3	.Molecular resonance stabilization
4	.Search sweep of oscillator
5	.Magnetron oscillator
6	.Klystron oscillator
7	..Plural controls
8	.Transistorized controls
9	.Oscillator with distributed parameter-type discriminator
10	.Plural A.F.S. for a single oscillator
11	..Plural comparators or discriminators
12	...With phase-shifted inputs
13	..Motor control of oscillator
14	.With intermittent comparison controls
15	.Amplitude compensation
16	.Tuning compensation
17	.Particular error voltage control (e.g., intergrating network)
18	.With reference oscillator or source
19	..Spectrum reference source
20	..T.V. sync type
21	...Lock to power line
22	..Plural significant heterodyne stages
23	..Sensing modulation (e.g., frequency modulation controlled oscillator
24	...With motor comparator
25	..Signal or phase comparator
26	...Plural diode type
27	...Plural active element (e.g., triodes)
28	...Unilateral element (e.g., diode)
29	...Electromechanical
30	.With stable heterodyne oscillator or source
31	..Plural significant heterodyne stages
32	..With particular discriminator (e.g., LPF and HPF)
33	...Plural diode type
34	.Particular frequency control means
35	..Electromechanical (e.g., motor)
36 R	..Reactance device (e.g., variable capacitors, saturable inductors, reactance tubes, etc.)
36 C	....Capacitor controlled AFC
36 L	....Inductor controlled AFC
37	BEAT FREQUENCY
38	.Plural beating
39	..Single channel
40	.Frequency or amplitude adjustment or control
41	.Frequency stabilization
42	.With particular signal combining means (e.g., cavity mixer)
43	..With filter in mixer output circuit
44	WITH FREQUENCY CALIBRATION OR TESTING
45	POLYPHASE OUTPUT
46	PLURAL OSCILLATORS
47	.Oscillator used to vary amplitude or frequency of another oscillator
48	.Adjustable frequency
49	.Selectively connected to common output or oscillator substitution
50	.Cascade or tandem connected
51	..Frequency dividers
52	..Semiconductor (e.g., transistor)
53	..Frequency multiplier
54	..Diverse-type oscillators
55	.Synchronized, triggered or pulsed
56	.Parallel connected
57	RING OSCILLATORS
58	PLURAL FUNCTIONS SIMULTANEOUSLY
59	CONVERTIBLE (E.G., OSCILLATOR TO AMPLIFIER, ETC.)
60	SINGLE OSCILLATOR WITH PLURAL OUTPUT CIRCUITS
61	.Plural outputs of diverse wave form
62	WITH OSCILLATOR CIRCUIT PROTECTIVE MEANS
63	PROTECTIVE OF SAFETY DEVICES FOR PERSONNEL
64	WITH INDICATOR, SIGNAL, OR ALARM
65	WITH DEVICE RESPONSIVE TO EXTERNAL PHYSICAL CONDITION
66	.Temperature or light responsive
67	WITH ELECTROMAGNETIC OR ELECTROSTATIC SHIELD
68	WITH OUTER CASING OR HOUSING
69	.With temperature modifier
70	WITH TEMPERATURE MODIFIER
71	RAW A.C. USED AS SOURCE OF POWER OR BIAS
72	ELECTRON-COUPLED TYPE
73	.Piezoelectric crystal resonator
74	COMBINED WITH PARTICULAR OUTPUT COUPLING NETWORK
75	.Space discharge or unilaterally conductive device in output network
76	..Harmonic producing or selecting network
77	.Wave filter
78	ELECTRICAL NOISE OR RANDOM WAVE GENERATOR
79	BEAM TUBE
80	.With beam sweeping or deflecting means
81	.With electron bunching or velocity variation means
82	..Traveling wave type
83	..Multicavity type (e.g., Klystron)
84	..Reflex type (i.e., with repeller electrode)
86	WITH MAGNETICALLY CONTROLLED SPACE DISCHARGE DEVICE (E.G., MAGNETRON)
87	.With particular pulsing means
88	.With frequency stabilization
89	.With secondary emissive electrode
90	.With frequency adjustment
91	.With undesired mode suppression or selection means
92	RETARDING FIELD TUBE-TYPE OSCILLATORS (E.G., BARKHAUSEN KURZ)
93	.With distributed parameter resonator
95	BUTTERFLY RESONATOR
96	WITH DISTRIBUTED PARAMETER RESONATOR
97	.Tube enclosed by resonator structure
98	..Disk seal tube (e.g., lighthouse, pencil tube)
99	.Parallel wire type
100	..Push-pull type
101	.Coaxial or shielded line type
102	..Push-pull type
103	TUBE STRUCTURE FORMS INDUCTIVE PART OF RESONANT CIRCUIT
104	TRANSIT TIME OSCILLATOR
105	WITH PARASITIC OSCILLATION CONTROL OR PREVENTION MEANS
106	WITH PERIODOIC OR REPETITIOUS AMPLITUDE VARYING MEANS (E.G., TREMOLO)
107 R	SOLID STATE ACTIVE ELEMENT OSCILLATOR
107 DP	..Significant distributed parameter resonator (e.g., cavity)
107 P	...Parallel-connected oscillator devices
107 SL	...Stripline type
107 C	...Coaxial type
107 A	..Acoustoelectric device oscillators
107 G	..Gunn-type bulk effect device oscillators
107 S	..Superconductive device oscillators
107 T	..Tunnel diode oscillators
108 R	.Transistors
108 A	...Use of complimentary-type transistors
108 B	...Phase shift oscillator
108 C	...Integrated circuit oscillators

	SOLID STATE ACTIVE ELEMENT OSCILLATOR
	.Transistors
108 D	...Integrated modules with discrete elements oscillators
109	..Amplitude stabilization and control
110	..Bridge type
111	..Relaxation oscillator
112	...Blocking oscillator type
113 R	...Multivibrator type
113 A	.....Saturable core controlled converters
113 S	.....Converter using silicon control rectifiers
114	..Push-pull
115	..Negative resistance
116 R	..Electromechanical resonator controlled
116 FE	....Field-effect transistor active element
116 M	....Electromechanical resonators other than piezoelectric crystals
117 R	..L-C type
117 FE	....Field-effect transistor active element
117 D	....Distributed parameter resonator transistor oscillators
126	GASEOUS SPACE DISCHARGE DEVICE
127	.Spark or open arc type
128	.Drives shock excited L.C. circuit
129	.Relaxation oscillator
130	..Plural gaseous devices
131	..Discharge device or rectifier in "C" or "L" charging or discharging circuit
132	NEGATIVE RESISTANCE OR NEGATIVE TRANSCONDUCTANCE OSCILLATOR
133	.Secondary emission (e.g., dynatron)
134	.Transitron type
135	PHASE SHIFT TYPE
136	.Zero phase shift
137	.With R.C. ladder-type phase shift network
138	BRIDGE TYPE
139	.Piezoelectric crystal in bridge
140	.R.C. or R.L. type
141	..Wien bridge
142	..Double T bridge
143	RELAXATION OSCILLATORS
144	.Multivibrators
145	..With sync, triggering or pulsing circuit
146	.Blocking oscillators
147	..Using discharge device with plural grids
148	..With 3 or more winding feedback transformers
149	..With sync, trigger, or pulsing circuit (e.g., self-pulsing)
150	.Output supplied to another discharge device circuit
151	.Involving resonant or inductive wave forming circuit or transformer
152	.Multi-grid discharge device in charged capacitor circuit
153	.With sync, trigger or pulsing circuit
154	ELECTROMECHANICAL RESONATOR
155	.With optical, piezoelectric or acoustic coupling means
156	.Vibrating reed or string type (e.g., tuning fork)
157	.Magnetostrictive
158	.Crystal
159	..Plural tube
160	..With means to limit crystal current or voltage
161	..With crystal substitution
162	..Plural crystals in circuit
163	..Crystal having three or more electrodes in circuit
164	..Anode or cathode to grid crystal circuit
165	SHOCK EXCITED RESONANT CIRCUIT
166	.With keying means of the active element type (e.g., burst generator)
167	L-C TYPE OSCILLATORS
168	.Plural tubes
169	.Anode to cathode coupled or connected resonant circuit
170	.Anode to grid coupled or connected resonant circuit
171	.Grid to cathode coupled or connected resonant circuit
172	WITH SYNCHRONIZING, TRIGGERING OR PULSING CIRCUITS
173	.Triggering or pulsing (e.g., burst generators)
174	..Self-quenched
175	FREQUENCY STABILIZATION
176	.Temperature or current responsive means in circuit
177 R	WITH FREQUENCY ADJUSTING MEANS
177 V	..With voltage sensitive capacitor
178	.Cyclic frequency sweeping means (e.g., vibrato)
179	.Step-frequency change (e.g., band selection, frequency-shift keying)
180	.Reactance tube type
181	.Variable inductance device (e.g., saturable core or adjustable vane inductor)
182	AMPLITUDE CONTROL OR STABILIZATION
183	.Automatic
184	HAVING DISCHARGED DEVICE OR PARTICULAR CONSTRUCTION
185	WITH PARTICULAR SOURCE OF POWER OR BIAS VOLTAGE
186	.Regulated
187	MISCELLANEOUS OSCILLATOR STRUCTURES
	******************************
	DIGESTS
	******************************
DIG 2	Phase locked loop having lock indicating or detecting means
DIG 3	Logic gate active element oscillator

CLASS 332 MODULATORS

100 FREQUENCY SHIFT KEYING MODULATOR OR MINIMUM SHIFT KEYING MODULATOR
101 .Including logic element (e.g., logic gate or flip-flop)
102 .Including discrete semiconductor device
103 PHASE SHIFT KEYING MODULATOR OR QUADRATURE AMPLITUDE MODULATOR
104 .Including logic element (e.g., logic gate or flip-flop)
105 .Including discrete semiconductor device
106 PULSE OR INTERRUPTED CONTINUOUS WAVE MODULATOR
107 .Including stabilization or alternatively distortion, noise or other interference prevention, reduction or compensation
108 .Plural modulation
109 .Pulse width modulator
110 ..Including discrete semiconductor device having three or more electrodes
111 ..Including electron discharge device
112 .Pulse position, frequency, phase, or spacing modulator
113 ..Including discrete semiconductor device having three or more electrodes
114 ..Including electron discharge device
115 .Pulse amplitude modulator
116 ..Including discrete semiconductor device having three or more electrodes
117 FREQUENCY MODULATOR
118 .Including measuring or indicating
119 .Plural modulation
120 ..Including amplitude modulation
121 ...Including electron discharge device
122 ..Including electron discharge device
123 .Including stabilization or alternatively distortion, noise or other interference prevention, reduction, or compensation
124 ..Nonlinearity reduction or compensation
125 ..Automatic amplitude stabilization or control
126 ..Automatic frequency stabilization or control
127 ...Phase or frequency locked loop
128 ....Modulating signal applied to plural elements of the loop
129 .Including microwave or distributed parameter structure
130 ..With discrete semiconductor device
131 ..With electron discharge device
132 ...Magnetron type
133 ...Klystron type
134 ...Travelling wave type
135 .Including discrete semiconductor device
136 ..With varactor
137 .Including electron discharge device
138 ..Particular oscillator circuit
139 ...Crystal oscillator type
140 ....With separate modulator tube (e.g., reactance tube)
141 ...L-C oscillator type
142 ....With separate modulator tube (e.g., reactance tube)
143 .....Plural modulator tubes
144 PHASE MODULATOR
145 .Including amplitude modulator
146 .Including discrete semiconductor device
147 .Including electron discharge device
148 ..Push-pull circuit
149 AMPLITUDE MODULATOR
150 .Including measuring or indicating
151 .Plural modulation
152 ..Including discrete semiconductor device
153 ..Including electron discharge device
154 ...Push-pull circuit
155 .Percent modulation control or automatic amplitude control of carrier or modulating signal
156 ..Overmodulation prevention
157 ..Average carrier amplitude controlled by modulating signal
158 ..Carrier output suppressed during absence of modulating signal
159 .Including stabilization or alternatively distortion, noise or other interference prevention, reduction or compensation
160 ..Reduction or compensation of nonlinearity in modulation characteristic
161 ..Reduction of carrier phase or frequency variations or modulation
162 ..Using feedback to reduce distortion, noise or other interference
163 .Including microwave or distributed parameter structure
164 ..With discrete semiconductor device
165 ..With electron discharge device
166 ...Magnetron type
167 .Suppressed carrier double sideband type
168 ..Including discrete semiconductor device
169 ..Including electron discharge device
170 .Single or vestigial sideband type
171 ..Including electron discharge device
172 .Modulating signal applied to a bridge circuit
173 .Magnetic field varied by modulating signal
174 .Resistive or dissipative device controlled by modulating signal (e.g., loss modulator)
175 .Variable reactance controlled by modulating signal
176 .Nonlinear device controlled by modulating signal
177 ..Nonlinear discrete semiconductor device
178 .Including discrete semiconductor device
179 .Including electron discharge device
180 ..Push-pull circuit
181 ..Plate circuit modulation
182 ..Grid circuit modulation
183 MODULATION CONVERTER HAVING PRE-MODULATED INPUT (E.G., FM TO AM)
184 .Between diverse pulse modulation types
185 MISCELLANEOUS

CLASS 333 WAVE TRANSMISSION LINES AND NETWORKS

DECEMBER 1990

1	PLURAL CHANNEL SYSTEMS
1.1	.Nonreciprocal gyromagnetic type (e.g., circulators)
2	.With automatic control
3	..Line substitution
4	.With balanced circuits
5	..Plural balanced circuits
100	.Having branched circuits
101	..Including switching means
102	...Having gyromagnetic operating means
103	...Having semiconductor operating means
104	....Using TEM lines
105	...Having mechanical switching means
106	....Using rotary switching means
107	.....For TEM lines
108	.....For waveguide
109	..Using directional coupler
110	...For providing frequency separation
111	...For providing adjustable coupling
112	...Having lumped parameters or impedances
113	...Having parallel-guide waveguide
114	...Having crossed-guide waveguide
115	...Having TEM lines
116	....Using stripline
117	..Including hybrid-type network
118	...Having lumped parameters or impedances
119	....Using transformer coil
120	...Having hybrid ring junction
121	...Having hybrid-T (e.g., magic-T)
122	....Using waveguide
123	...Having coaxial element
124	..With impedance matching
125	...Including long line element
126	....For providing frequency separation
127	....Using TEM lines
128	.....Stripline
129	...For providing frequency separation
130	...Using resistors only
131	...Using coupled windings
132	..For providing frequency separation
133	...Utilizing electromechanical transducer
134	...Utilizing long line element
135	....Including waveguide element
136	..Including long line element
137	...Using waveguide
12	TRANSMISSION LINE INDUCTIVE OR RADIATION INTERFERENCE REDUCTION SYSTEMS
13	RESONATOR-TYPE BREAKDOWN DISCHARGE SYSTEMS (E.G., T-R OR R-T SYSTEMS)
14	AMPLITUDE COMPRESSION AND EXPANSION SYSTEMS (I.E., COMPANDERS)
15	PILOT LINE-CONTROLLED SYSTEMS
16	PILOT CURRENT-CONTROLLED SYSTEMS
17.1	AUTOMATICALLY CONTROLLED SYSTEMS
17.2	.Limiting of amplitude
17.3	.Impedance matching
18	.With control of equalizer and/or delay network
19	DIFFERENTIATING OR INTEGRATING SYSTEMS
20	WAVE-SHAPING
21 R	WAVE MODE CONVERTERS
21 A	..Polarization converters
22 R	DISSIPATING TERMINATIONS FOR LONG LINES
22 F	..Fluid-cooling
23	ARTIFICIAL LINES
24 R	COUPLING NETWORKS
24 C	..Capacity coupling
24.1	.Nonreciprocal gyromagnetic type (e.g., directional phase shifters)
24.2	..Nonreciprocal attenuators or isolators
24.3	..Nonreciprocal polarization rotators
25	.Balanced to unbalanced circuits
26	..Having long line elements
27	.Interlinking long line
28 R	.Equalizers
28 T	...Audio tone control
138	.Delay lines including a lumped parameter
139	..Variable parameter
140	..Physical structure
141	.Delay lines including elastic bulk wave propagation means
142	..Multipath propagation
143	...Spurious signal reduction
144	..Variable delay
145	..Nonuniform propagation path
146	..Helical propagation path
147	..Propagation path has significant chemical or physical properties
148	..Including magnetostrictive transducers
149	..Significant transducer structure
150	.Delay lines including elastic surface wave propagation means
151	..Spurious signal or mode cancellation means
152	..Variable delay
153	..Including discontinuities within propagation means
154	..Significant transmitting or receiving transducer structure
155	..Temperature stabilization or compensation
156	.Delay lines including long line elements
157	..Waveguide
158	...Including ferrite means
159	...Having mechanically movable delay control means
160	..Coaxial line
161	..Planar line structure (e.g., stripline)
162	..Helical line structures and lines developed from a helical structure
163	...Having plural concentric helices
164	..Control of delay with semiconductive means
32	.With impedance matching
33	..Having long line elements
34	...Tapered
35	...Quarter-wave transformer type
165	.Frequency or time domain filters and delay lines utilizing charge transfer devices
166	.Time domain filters
167	.Frequency domain filters utilizing only lumped parameters
168	..Including recurrent sections
169	..Wheatstone or lattice type
170	..Bridge type
171	...With variable response
172	..RC or RL type
173	..Synchronous filters
174	..With variable response
175	..Resonant, discrete frequency selective type
176	...Including specific frequency rejection means
177	..Transformer coupled
178	...Including bandwidth adjusting, shaping, or stabilization means
179	...With permeability tuning means
180	...With variable coupling means
181	..Smoothing type (e.g., direct current power supply filters or decoupling filters)
182	...Feedthrough type
183	....Resiliently mounted components
184	...Monolithic structure
185	..Having significant physical structure
186	.Electromechanical filter
187	..Using bulk mode piezoelectric vibrator
188	...With means for varying response
189	...Plural coupled vibrators

	COUPLING NETWORKS
	.Electromechanical filter
	..Using bulk mode piezoelectric vibrator
	...Plural coupled vibrators
190	....Lattice structure
191	....Monolithic structure
192	.....With electrical coupling
193	..Using surface acoustic waves
194	...Including spurious signal prevention or reduction means
195	...With wave-modifying means (e.g., reflectors, resonators, diffractors, multistrip couplers, etc.)
196	...With response weighting means
197	..Plural mechanically coupled bar, plate, or rod-type resonating means
198	...Plural interresonator coupling paths
199	...Plural mechanically coupled disk resonators
200	..Reed- or fork-type resonators
201	..Magnetostrictive wave transmission path
202	.Wave filters including long line elements
203	..Digital structure
204	..Stripline or microstrip
205	...Tunable
206	..Coaxial
207	...Tunable
208	..Waveguide
209	...Tunable
210	...Including evanescent guide sections
211	...Including frequency selective absorbing means
212	...Including directly coupled resonant sections
213	NEGATIVE RESISTANCE OR REACTANCE NETWORKS OF THE ACTIVE TYPE
214	.Simulating specific type of reactance
215	..Using gyrator
216	.Having negative impedance
217	..Providing negative resistance
81 R	ATTENUATORS
81 A	..Coaxial or microstrip
81 B	..Waveguide type
218	FREQUENCY MULTIPLIERS
219	RESONATORS (DISTRIBUTED PARAMETER TYPE)
219.1	.Dielectric type
219.2	.Magnetic type
220	.Open wire or Lecher line
221	..With tuning
222	.Coaxial or shielded
223	..With tuning
224	...Having movable element
225	....Using movable shorting means
226	....Using plunger, rod, or piston
227	.Cavity resonator
228	..With mode suppressor
229	..With temperature compensation
230	..With coupling
231	..With tuning
232	...Having movable element
233	....Using movable wall
234	.Temperature compensated
235	.With tuning
236	LONG LINES
237	.Leaky lines
238	.Strip type
239	.Waveguide type
240	..Surface wave
241	..Flexible
242	..Circular or helical structure
243	.Shielded type
244	..Including spaced, electrically compensated, internal support means
245	LONG LINE ELEMENTS AND COMPONENTS
246	.Strip type
247	..Semiconductor mounts
248	.Waveguide elements and components
249	..Bend
250	..Active element mounting
251	..Mode suppressor
252	..Window
253	..Including variable impedance
254	..Connectors and interconnections
255	...Quick disconnect
256	...Movable
257	....In line
258	..Switch
259	...Mechanically movable
260	.Connectors and interconnections
261	..Rotary coupling
262	.Switch
263	.Including variable impedance
99 R	MISCELLANEOUS
99 S	..Superconductive
99 PL	..Plasma
99 MP	..Multipactor applications

CLASS 334 TUNERS

DECEMBER 1990

1	COMBINED DIVERSE-TYPE TUNERS
2	.With plural diverse disk or plural diverse cylinder-type turret tuners
3	.With mutual tuning element
4	MAGNETIC FIELD-RESPONSIVE TUNER
5	CONDITION-RESPONSIVE (E.G., TEMPERATURE COMPENSATION)
6	.With condition-responsive inductor or capacitor
7	PUSH BUTTON AND/OR LEVER-TYPE MECHANICALLY OPERATED TUNER
8	REMOTELY CONTROLLED TUNER
9	.With electromagnetic operator
10	..Solenoid or relay operator
11	TUNER UNIT DIRECTLY RESPONSIVE TO VOLTAGE AND/OR CURRENT VARIATION
12	.Saturable core-type inductor
13	..Automatic frequency-centering circuit
14	.Reactance tuning
15	..Semiconductor reactance circuit
16	..Automatic frequency-centering circuit
17	TUNER UNIT WITH ELECTROMAGNETIC OPERATOR
18	.Band scanning or selector circuit
19	..Solenoid or relay-operated tuner means
20	..Motor-operated
21	...Predetermined frequency selector
22	...With reversing means
23	...Clutch means
24	...Relay-controlled
25	....Plural relays
26	.Automatic frequency-centering circuit
27	..Tool-driven aligning apparatus
28	..Plural signal sources
29	.Predetermined center frequency selector (e.g., push-button control)
30	WITH RESONANCE INDICATOR
31	.Meter type
32	..With optical and/or shading device
33	.Cathode ray type
34	..Magic eye
35	...Plural shadows
36	.Lamp type
37	..Glow discharge
38	WITH REACTOR ELEMENT WINDING AND UNWINDING COMBINED
39	COMBINED
40	SENSITIVITY OR "Q" ADJUSTMENT MEANS IN TUNED CIRCUITRY
41	WITH RESONANT LINE ELEMENTS
42	.Plural-operated tuning units
43	..With shaft operator
44	.Deformable
45	.With lumped capacitor in tuned circuit
46	WITH COMPRESSIBLE OR DEFORMABLE-TYPE TUNER
47	WITH SWITCHING MEANS
48	.Tuner switch rockable for fine tuning
49	.Disk-type turret tuner
50	.Drum or cylinder-type turret tuner
51	..With vernier tuning means
52	.Switch operated by variable tuning means
53	..Rectilinearly operated switch
54	.Rectilinearly operated switch
55	.Capacitor only modified or substituted by switching
56	.Inductor only modified or substituted by switching
57	..With vernier tuning means
58	...Variable capacitor
59	.Tuned transformer circuit substituted by switching
60	..Tuned circuit shorted by switch
61	MUTUAL INDUCTANCE VARIABLE MEANS
62	.Variometer
63	.Plural coils having common adjustable core
64	SERIES TUNED CIRCUIT
65	INDUCTOR AND CAPACITOR BOTH VARIABLE
66	.With variable inductor and capacitor structure in common
67	..Butterfly-type tuner
68	..Rectilinearly movable reactance adjusting elements
69	.Inductor and capacitor simultaneously varied
70	..Core tuned inductor
71	VARIABLE INDUCTOR TUNED
72	.Movable contact adjustable over length of inductor
73	..With capacitor-type contact
74	.Adjustable core type
75	..With inductor wound in particular shape
76	..With particular shape and/or type of core
77	..Gang-operated
78	VARIABLE CAPACITOR TUNED
79	.Straight-line frequency type
80	.With variable spacing between plates
81	.Rectilinearly sliding plates
82	.With particular shape and/or arrangement of plates
83	.Gang-operated capacitors
84	.Capacitor drive means
85	WITH SHIELDING OR HOUSING MEANS
86	WITH INDICATOR
87	.Band-switching
88	WITH STOP OR POSITIONING MEANS (E.G., DETENTS)
89	MISCELLANEOUS

CLASS 335 ELECTRICITY, MAGNETICALLY OPERATED SWITCHES, MAGNETS AND ELECTROMAGNETS

1 COMBINED DIVERSE SWITCHES (E.G., MANUAL-ACTUATED AND ART TYPE)
2 ELECTROMAGNETICALLY ACTUATED SWITCHES
3 .Utilizing magnetostrictive elements
4 .Radio frequency switch (e.g., T/R switch)
5 ..With coaxial components
6 .Automatic circuit-interrupting devices (e.g., circuit-protective devices)
7 ..Responsive to plural diverse circuit conditions (e.g., voltage and current)
8 ..Multipole or polyphase
9 ...With individual latch or trip means in each leg
10 ...With common latch or trip means
11 ..Plural switches
12 ..With shunting contacts
13 ..With auxiliary switch means (e.g., for energizing coil)
14 ..With direct connected contact separating means
15 ..With contact biasing, holding or pressure control means
16 ...Magnetic or electrodynamic (e.g., blowon or blowoff)
17 ..With switch condition signalling, indicating or alarm means
18 ..Responsive to predetermined or abnormal current condition (e.g., direction, phase angle or amplitude)
19 ...Zero current
20 ..Voltage responsive (under, over or no voltage)
21 ..With latch or trip means
22 ...Plural latch or combined latch operating means for single latch
23 ....With diverse-type actuating means (e.g., magnetic and thermal)
24 ...Trip-free (i.e., cannot be manually reclosed while overload exists)
25 ....With disabling means (for contact-actuator)
26 ...Reclosing or resetting
27 ....Automatic combined with manual
28 ....Automatic combined with timing or delay means
29 .....Fluid-controlled
30 .....Mechanical motor-controlled (e.g., clock movement)
31 .....Thermally actuated
32 .....With counting or integrating means (e.g., repetitive for given number of reclosures)
33 ......With means providing for operation after variable intervals or fixed intervals of different duration (e.g., first reset occurs) instantaneously, with other at longer intervals)
34 ......With lockout
35 ...Plural trips or combined operating means for single trip (e.g., magnetic with thermal)
36 ....With common structural elements
37 ....With thermal element comprising magnetic flux source
38 ...Magnetic
39 ....With time delay (e.g., thermal)
40 .....Responsive to or proportional to degree of overload condition
41 ....With magnetic flux winding directly in series with main contacts
42 ....With adjusting or calibrating means
43 ...Thermal
44 ....Including ambient temperature compensating means
45 ....With regulating, adjusting or calibrating means
46 ..With contact rebound or other undesirable motion prevention means
47 .Utilizing conductive liquid (e.g., mercury)
48 ..Comprising three or more electrodes or circuit-completion means
49 ..With liquid-displacement means
50 ...Comprising plural interconnected liquid containers
51 ...Magnetic
52 ....Piston or plunger
53 .....Combined with timing or delay means
54 ...Tiltable or rotating liquid chamber
55 ..Armature structure
56 ...Comprising freely movable floating slug or mass
57 ..Contact or electrode structure
58 ...Mercury or mercury wetted
59 .Retarded or delayed type
60 ..Plural sets of contacts alternately, consecutively or selectively opened or closed
61 ..With pneumatic delay means (e.g., dashpot, etc.)
62 ..With hydraulic delay means
63 ..With magnetic or electromagnetically actuated delay means
64 ..With mechanical delay means
65 ...Motor or motor-controlled (e.g., clockwork)
66 ..Electrothermal delay means
67 ..Adjustable or regulatable
68 .With motor
69 ..Reversible or oscillatable
70 ..Frequency-responsive or synchronous
71 ..Contact actuating structure
72 ...Plural contacts
73 ...Eccentric or cam
74 ...Including brake, clutch or detent
75 ....Magnetically actuated
76 ...Comprising energy storage means (e.g., wound spring)
77 ..With locking, latch or tripping structure
78 .Polarity-responsive
79 ..Storage or memory type (e.g., bistable)
80 ..Armature structure
81 ...Freely movable within coil or magnetic field between poles
82 ...Floating (i.e., no fixed pivot)
83 ..Contact structure of composition
84 ..Magnetic structure (e.g., saturable)
85 ...Pole structure
86 ..With adjusting means
87 .Periodic (e.g., vibrators)
88 ..Plural periodic switches or with plural pairs of contacts
89 ...Selectively, alternately, or consecutively actuated
90 ..With vibrating or oscillating element damping, frequency adjusting or vibration control
91 ..Actuating magnet structure or material
92 ...Plural magnets
93 ..Vibratory reed or other periodic contact actuator
94 ...Tuned or resonant at a particular frequency
95 ..Armature
96 ...Adjustable
97 ..Contact arrangement or composition
98 ...Adjustable contacts
99 .Alternating or fluctuating current type

ELECTROMAGNETICALLY ACTUATED SWITCHES
.Alternating or fluctuating current type
100 ..Induction or eddy current (e.g., vane or closed conductive loop)
101 ..Preselected or synchronous frequency responsive
102 ..Polyphase
103 ..With plural magnetic-actuating structures
104 ..With chatter, bounce or vibration-prevention means
105 ..With damping or adjustment means
106 .Multiple contact type
107 ..Contacts-selectively, sequentially, alternately, or intermittently actuated
108 ...Automatic telephone type
109 ....Plural or multidirection mechanical selector motions
110 .....With motion-conversion means
111 .....Selector structure
112 ......Crossbar type
113 ....With holding, locking or latching means
114 ....Rotary selector motion
115 ....Reciprocating selector motion (e.g., sliding)
116 ....With reset or selector-restoring means
117 ....With operational mode-varying means
118 ....Motor-driven
119 ...Plural armatures
120 ....With interlocking or mechanical connection
121 ...Contact-actuation means
122 ....With rotary or compound motion device (e.g., rack and pinion)
123 .....Pawl and ratchet
124 ....Armature structure
125 .....Rotary armature
126 ....Reciprocating or linearly sliding
127 ..Simultaneously actuated
128 ...By pivotal or rockable armature
129 ....Movable contacts or slidable card bar or comb
130 ....Movable contacts on circular card or comb structure
131 ...By reciprocating armature
132 ..With adjustable, replaceable or interchangeable structural features
133 ..Contact structure or arrangement
134 ...Grid or coordinate
135 ...In pile or stack
136 ..With plural magnet or coil means
137 ...Of diverse type
138 .Step-by-step type (e.g., closure responsive to predetermined number of control pulses
139 ..With timing or indexing means (e.g., clock mechanism)
140 ..Ratchet and pawl-type actuator
141 .With electrothermal-actuating means (e.g., expansible wire)
142 ..Fusible element
143 ..Independently operative
144 ..With armature positioning or adjusting
145 ..Bimetallic element
146 ..Thermomagnetic (e.g., device whose magnetic permeability changes with temperature)
147 .Electrodynamically actuated
148 ..Moving coil type
149 ...Plural coils
150 ...With reset or restoring means
151 .Vacuum or hermetically sealed type (e.g., reed switch)
152 ..Plural
153 ..With permanent magnet structure
154 ..Armature, contact or contact-actuating means (e.g., sealed reed)
155 .With predetermined current or voltage value-responsive actuator
156 .With protective means for switch or contacts
157 .With operation-inhibiting means (shock resistant)
158 ..From open position
159 .Plural independently operable switches
160 ..Interlocking
161 ...With cooperative-actuating means
162 ..With unitary housing, support or flux path
163 ..With unitary or common magnetic flux source
164 .Manually or gravity-operated latch with electromagnetic trip
165 .Contact-actuating means unitary with latch or trip
166 .With latch- or trip-reset means
167 .Latching means
168 ..With positive lock (against movement)
169 ..Plural or with auxiliary latch
170 ..Magnetically operated
171 ..Including spring-biasing or energy-storage means
172 .Tripping means
173 ..Plural diverse (e.g., manual plus electromagnet)
174 ..Magnetically operated
175 ...Utilizing hammer or other impacting means
176 ...With adjusting or regulating means
177 .Plural magnets or flux sources
178 ..Of diverse electrical characteristics
179 ..Of diverse magnetic characteristics (e.g., permanent plus electromagnet)
180 ..With common core or single armature
181 ...Pivoted armature
182 ...Magnetic fields opposing (e.g., differential)
183 ..Magnetic fields or torques acting alternately in opposite directions
184 ..With plural reciprocating armatures aligned or rigidly connected
185 .Contact-actuating means
186 ..Plural or combined (e.g., manual with other)
187 ..Unitary with armature
188 ..Snap-action
189 ..Mechanical linkage
190 ...Including cam, roller or eccentric means
191 ...Compound motion device (e.g., toggle)
192 ..With biasing means (open or closed)
193 ..With vibration-, bounce- or chatter-prevention means
194 ..With pressure-maintaining or adjusting means
195 ...Magnetic or electrodynamic force
196 .Contact composition or structure
197 ..Adjustable or readily detachable
198 ...Convertible from normally open to normally closed and vice versa
199 ..Printed circuit
200 ..Pivoted or relatively movable independently of the armature
201 .With arc-suppression or extinguishing means
202 .With housing or support means
203 .With armature structure
204 .Through conductor type (i.e., conductor field actuates armature)
205 PERMANENT MAGNET-ACTUATED SWITCHES
206 .Plural switches

PERMANENT MAGNET-ACTUATED SWITCHES
207 .Plural magnets
208 .Thermomagnetic
209 MAGNETS AND ELECTROMAGNETS
210 .Electron or ion beam deflecting type
211 ..With magnetic shunt
212 ..With adjustable magnetic element (e.g., to change the air gap, or its position on the cathode ray tube)
213 ..With coil structure
214 ...With electric or magnetic-shielding means
215 .Magnetostrictive-type device
216 .Superconductive type
217 .Temperature-responsive type (e.g., temp. compensation means)
218 ..With time-delay means
219 .Combined with diverse-type art device
220 .With magneto-mechanical motive device (e.g., electromagnet with armature)
221 ..Frequency-responsive type
222 ..With relatively movable coil and permanent magnet (e.g., D'Arsonval type)
223 ..With relatively movable conductors (e.g., dynamometer)
224 ...Induced current-type movable conductor (e.g., eddy current member)
225 ....Rotating disk
226 ....Short-circuited winding
227 ..Saturable magnetic type
228 ..With motion-conversion means (e.g., reciprocating to rotary motion)
229 ..With permanent magnet
230 ...Polarized electromagnet
231 ....Varying alternating current amplitude responsive
232 ....With plural armatures
233 .....With armature-locking means
234 ....With reversible magnetic flux-type movement (e.g., bistable type)
235 ....With vibrating reed or spring bar-type armature
236 ..With a shunt path for magnetic flux
237 ...Adjustable
238 ..With auxiliary armature-movement control means (e.g., manual)
239 ..With time delay armature-movement control means
240 ...Dashpot type
241 ...Auxiliary control coil
242 ...With plural armatures selectively retarded
243 ..Alternating current type
244 ...Flux phase displacement or varying means
245 ....Shading coil
246 ....Plural winding type
247 ...With chatter- or noise-preventing means
248 ....Spring or cushion-type vibration absorber
249 ....Special armature construction or mounting means (e.g., to assure positive seating of armature)
250 ...Coil construction or mounting means
251 ...With plunger-type armature
252 ...With vibrating armature
253 ..With armature latch means (e.g., means to retain armature in open or closed position
254 ...With latch-control winding
255 ..With plunger-type armature
256 ...Plural coils controlling a single armature
257 ...With shock-absorbing means (e.g., means to absorb the shock of armature or plunger)
258 ...With armature stroke adjustment
259 ...Plural plungers
260 ...With sealed enclosure (e.g., dust or moistureproof)
261 ...Armature structure or material
262 ....With centering or aligning or guiding means
263 ....With plunger rotation preventing means (e.g., means to prevent undesired rotation of the plunger during movement)
264 ....Sectional plunger
265 ..Plural armatures actuated by single electromagnetic coil
266 ..Plural coils or magnets control armature movement
267 ...With plural armatures
268 ...Coils or magnets being separately or selectively controllable
269 ..With dynamically balanced armature
270 ..Armature-mounting means
271 ...With armature bounce or vibration-preventing means
272 ...Rotating disk or cylindrical armature
273 ...With armature-adjusting means (e.g., means to adjust the relative distance between core and armature)
274 ...With armature-biasing means or bias-adjustment means
275 ...Hinge joint type armature-mounting means
276 ...Pivot support type armature-mounting means
277 ..With shock absorption, vibration or bounce-preventing means
278 ..With casing or enclosure
279 ..Armature shape, structure or material
280 ..Balls, filings or granular material
281 ..Core or pole shape, structure or material
282 ..Coil shape, structure or material
283 .Blade sharpening or conditioning type magnets
284 .For magnetizing or demagnetizing
285 .Work or object holding type
286 ..With workpiece to magnet adapted or fixture (e.g., to bridge flux)
287 ...Angularly adjustable fixture
288 ..Rotary-type magnetic chuck (permanent or electromagnet type)
289 ..Electromagnet type (e.g., electromagnetic chuck)
290 ...With circuit control means
291 ...Lifting or attracting type (e.g., for lifting pigiron or pulling hairpins)
292 ....Hermetically sealed or moisture-proofed
293 ....Hand-held type
294 ....With outer casing or housing
295 ..With magnetic-hold control means (e.g., means to control the hold strength)
296 .Magnet structure or material
297 ..Core structure
298 ...Movable or adjustable cores
299 ..Coil structure or material
300 ...With cooling means
301 ..With electric- or magnetic-shielding means
302 ..Permanent magnets
303 ...Enclosed in flexible plastic, cloth or tape
304 ...With flux leakage-reducing means

MAGNETS AND ELECTROMAGNETS
.Magnet structure or material
..Permanent magnets
305 ...Magnetic plug type (e.g., crankcase plug)
306 ...Plural magnets

5	POLYPHASE
10	.ADJUSTABLE INDUCTOR
12	.Interconnected windings
15	WITH COIL WINDING AND/OR UNWINDING
20	WITH DEFORMABLE OR DISTORTABLE COIL AND/OR CORE
30	WITH CONDITION-RESPONSIVE INDUCTANCE ADJUSTING MEANS (E.G., BY ELECTROMAGNET)
40	ADJUSTABLE BY MAGNETIC FORCE BETWEEN RELATIVELY MOVABLE PARTS OF THE INDUCTOR
41	.Weight-counterbalanced coil or core
45	WITH MOVABLE ELEMENT POSITION INDICATOR
55	WITH TEMPERATURE MODIFIER
57	.With inductor insulating fluid circulating means
58	.Liquid insulating medium
59	.Vented casing
60	.Ventilating passages (e.g., by coil section or core part spacers)
61	.Heat exchanging surfaces
62	.Hollow conductor coil
65	WITH MOUNTING OR SUPPORTING MEANS (E.G., BASE)
66	.Handle
67	.Bracket
68	.Suspension
69	WITH COIL CAPACITANCE MODIFYING MEANS
70	.With surge potential gradient modifying means
73	WITH CLOSED COIL OR CONDUCTOR MEMBER
75	.Movable with respect to another coil
77	..With magnetic portion
79	..Angularly movable
82	COIL FORMS PROTECTIVE CASING
83	CORE FORMS CASING
84 R	WITH ELECTRIC AND/OR MAGNETIC SHIELDING MEANS
84 C	..Conductive
84 M	..Magnetic
87	.Adjustable inductor
90	WITH OUTER CASING OR HOUSING
92	.Internal inductor support
94	.Fluid insulation
96	.Potted type
98	.Exposed core portions
100	WITH VIBRATION CONTROL
105	COMBINED
107	.With connector
110	WITH PERMANENT MAGNET
115	RELATIVELY MOVABLE COILS
116	.With means to change coil length and/or connections
117	.With core
118	..Relatively movable core and coils
119	..Coil and core movable as a unit
120	...Angularly movable
121	.Angularly and linearly movable coils
122	.Angularly movable
123	..About axis parallel to or coaxial with the other coil axis
124	..Nonsymmetrically pivoted coil movable on axis transverse to other coil axis
125	..About axis normal to other coil axis
126	...Plural coils movable with respect to a coil
127	...Similar spherical-shaped coils
128	...Tubular stationary coil
129	.Movable along or parallel to other coil axis
130	RELATIVELY MOVABLE CORE AND COIL
131	.Plural coils with plural cores
132	.Plural relatively movable core parts
133	..Adjustable magnetic shunt
134	..Adjustable air gap
135	...Angularly movable
136	.Telescoping magnetic body and coil
137	WITH MEANS TO CHANGE COIL LENGTH OR CONNECTIONS
138	.Parallel-spaced conductors or coils bridged by movable connector
139	.Contactor following helical conductor
140	..Plural movable contactors
141	..With contactor guide track
142	.Coil connections changed by moving coil (e.g., coil substitution)
143	.With connection reversing means
144	.With variable number of short-circuited turns
145	.Plural coils (e.g., transformers)
146	..Inductance change in plural coils
147	..Plural coils or coil portions connected in parallel or in series and parallel
148	..Autotransformers
149	.Contactor slidable on coil winding
150	.Series change (e.g., tap change)
155	INDUCTIVE REGULATORS WITH NO RELATIVELY MOVING PARTS
160	.With magnetic shunt to increase leakage reactance
165	..Air gap in magnetic shunt
170	THREE OR MORE WINDINGS
171	.Noninductively related windings
172	COIL TURN LINKS PORTION OF CORE ACROSS SECTION (E.G., FRACTIONAL TURN)
173	INTERLINKED COILS OR WINDINGS (E.G., CURRENT TRANSFORMER)
174	.Coil surrounding linear conductor
175	CORE SURROUNDING LINEAR CONDUCTOR
176	.Hinged core
177	WITH COIL OR MAGNETIC MATERIAL
178	WITH CLOSED CORE INTERRUPTED BY AN AIR GAP
179	COILS WITH TEMPERATURE COMPENSATING MEANS
180	WINDING FORMED OF PLURAL COILS (SERIES OR PARALLEL)
181	.Wound to reduce external magnetic field (i.e., fieldless winding)
182	.Two windings (e.g., transformer)
183	..Coils of different windings interposed
184	.Coils having different axis or on different core legs
185	.Coil supports or spacers
186	COIL FORMED OF PARALLEL CONNECTED CONDUCTORS
187	.Crossed or transposed conductors
188	TWO WINDINGS WITH MUTUALLY CROSSED WINDING TURNS
189	COIL WITH CROSSED TURNS
190	.Bank or universal wound coils (e.g., honeycomb, random wound)
191	.Basket weave (single layer)
192	WINDING WITH TERMINALS, TAPS, OR COIL CONDUCTOR END ANCHORING MEANS
195	COIL SUPPORTED WITHIN GROOVED OR HOLLOW COIL CONDUCTOR OF ANOTHER COIL
196	WITH SUPPORTING AND/OR SPACING MEANS BETWEEN COIL AND CORE
197	.Coil clamps or wedges
198	.Preformed insulation between coil and core (e.g., spool)
199	COIL OR COIL TURN SUPPORTS OR SPACERS
200	.Printed circuit-type coil
205	.Coil turns cemented to support or embedded in plastic
206	.Flexible filament, strip or sheet insulation
207	.With coil turn spacer
208	.Coil on a preformed suport or mount
209	COIL WRAPPER ON BINDER
210	WITH CORE CLAMPS, WEDGES OR FASTENERS
211	CONCENTRIC OR NESTED CORE ELEMENTS

212 PLURAL PART CORE
213 WOUND CORE
214 MULTIPLE MAGNETIC PATHS
215 .Three or more
216 CORE JOINT STRUCTURE
217 .Overlapping laminations (e.g., "Break Joint")
218 MAGNETIC ORIENTATION (I.E., DIRECTIONALLY PRESTRESSED CORE MATERIAL)
219 CORE INSULATION (E.G., BETWEEN CORE PARTS)
220 TWO WINDINGS
221 COIL AND CORE
222 WINDINGS
223 .Having conductor of particular shape (e.g., tapered longitudinally or of noncircular cross section)
224 .Nonuniformly spaced turns
225 COILS OF SPECIAL CONFIGURATION
226 .Figure "8" section
227 .Polyhedral section
228 ."D" section
229 .Toroidal
230 .Spherical
231 .Conical
232 .Planar type
233 CORE (E.G., COMPRESSED POWDER)
234 .Laminated type (includes bundles of rods or wires)

DIG 1 Superconductive
DIG 2 Separable

CLASS 337 ELECTRICITY, ELECTROTHERMALLY OR THERMALLY ACTUATED SWITCHES

1	WITH DIVERSE ART-TYPE DEVICE
2	WITH SEPARATE DISTINCT DIVERSE ART-TYPE SWITCHING DEVICE (E.G., FLUID-OR MECHANICAL-ACTUATED)
3	.Bimetallic device with other
4	.Fusible element device with other
5	..Diverse art-type switching device responsive to the condition of fusible element
6	..With automatic circuit-interrupting device
7	...Multiphase of multipole
8	..Manually operable mechanical device
9	...Knife or blade switch
10	...Rotary or reciprocating mechanism
11	..With multiple circuit connector device (e.g., multiple mechanical)
12	WITH DIVERSE ART-TYPE ACTUATOR FOR SINGLE SWITCH
13	.Bimetallic with other
14	ELECTROTHERMALLY ACTUATED SWITCHES
15	.Shunt or short circuit completion devices
16	..Bimetallic means
17	..Fusible material combined with gap
18	...Gaseous space discharge gap (e.g., air gap)
19	..Gap with thin film dielectric (e.g., voltage-responsive)
20	..With significant housing or casing structure
21	.Conductive fluid devices
22	.Fluorescent lamp-starting devices
23	..With significant heating means
24	...With shunt or short-circuiting means (for resistor)
25	..Electric discharge means (e.g., electron-emissive)
26	..With significant contact structure or composition
27	...Bimetallic element
28	.Space discharge device (gaps, lightning arrester, etc.)
29	..Plural
30	..With explosive or combustible material
31	..With fusible element (e.g., cutout means)
32	...With grounding means
33	...With common structural elements (e.g., fuse provides support or element of spark gap structure
34	..Housing, casing, mounting or support means
35	.Plural diverse similar art-type devices in single switch
36	.With bimetallic elements (i.e., motion takes place in a plane at right angles to its major axis)
37	..With manual or other mechanical contact controlling means
38	...Plural elements combined with single mechanical means
39	....Independently operative bimetallic elements
40	....Individually responsive to diverse conditions or diverse characteristics
41	...Multiple contact or plural circuit control means
42	....Plural switches
43	.....With interlocking means
44	....Selectively or alternately actuated
45	....Single multipole or polyphase control device
46	.....With common mechanical actuating or tripping means
47	.....With separate latching or tripping means in each phase
48	......With common trip-bar means
49	.......Slidable or reciprocal bar
50	.......Rotatable
51	...Cyclically or periodically actuated
52	...With spring or other energy storage device
53	....Snap-action
54	.....With magnetic flux source (e.g., magnetic armature)
55	.....With latching or holding means
56	.....With reclosing or reset means
57	.....With adjusting or calibration means
58	....Compound motion means
59	.....Toggle
60	.....Floating lever
61	....Rotary or oscillatory motion device (e.g., spring motor)
62	....Reciprocating or slidable motion device
63	.....With lost motion coupling means
64	.....With camming or wedging means
65	.....With contact guiding or alignment means
66	.....With push-button actuating means
67	...With contact pressure maintaining or adjusting means
68	...With direct contact separating means (e.g., plunger camming means)
69	...Independently operative (nontrip-free)
70	...Latch or latch-release means
71	....Plural or responsive to diverse effects
72	....With reclosing or reset means
73	.....Automatic
74	....Trip-free
75	....Bimetallic element unitary with or comprising latch means
76	....Performs dual functions (e.g., main contact)
77	....With external or auxiliary heater
78	....Utilizing plural bimetallic elements
79	...With signal or indicating means
80	...With mercury or other conductive liquid circuit completion means
81	...Retarded or delayed action type
82	...With operating range calibration or adjustment means
83	....Comprising electric shunt or short-circuiting means
84	....Comprising mechanical means
85	..Bimetallic element unitary with or directly actuates movable contact means
86	...Plural contacts or external circuit connection means
87	....Alternately or selectively actuated
88	...Retarded or delayed type
89	...Snap-action
90	....With magnetic armature or holding means
91	....With reset means
92	...Cyclic or repetitively operative (e.g., flashing)
93	....With interval predetermining or adjustment means
94	...With operating range, calibration or adjusting means
95	...With plural or combined elements
96	....Responsive to diverse conditions or of diverse operative characteristics
97	..With switch structure protective means
98	..With contact operation inhibiting means (e.g., meltable or magnetic)

ELECTROTHERMALLY ACTUATED SWITCHES

.With bimetallic elements (i.e., motion takes place in a plane at right angles to its major axis)
99 ..With voltage or ambient temperature compensation means
100 ...Auxiliary heating means
101 ...Bimetallic means
102 ..With external or auxiliary heating means
103 ...With heater-adjusting, shunting or short-circuiting means
104 ...Plural heating means
105 ...With electrical power supply or current control means
106 ....Inductive means (e.g., tansformer)
107 ...Significant heating element structure or composition
108 ....Arc or spark gap
109 ..Contact composition or structure
110 ..With arc-suppression or blowout means
111 ..Bimetallic structure or composition of material
112 ..Housing, casing or support means
113 ...With external circuit connection means
114 .Expansible or vaporizable fluid-actuated (e.g., mercury vapor)
115 ..With manual or other mechanical contact actuating means
116 ...Cyclically or periodically operative
117 ...Utilizing diaphragm or bellows means
118 ...With restoring or resetting means
119 ..Utilizing capillary tube or bore means
120 ..With external heating means (external from fluid; may be the container)
121 ..With housing or casing
122 ..With contact or electrode structure or material (e.g., carbon)
123 .With longitudinally expansible solid element (e.g., rod, wire strip, etc.)
124 ..With voltage or ambient temperature compensation means
125 ..With electrical shunting or short-circuiting means
126 ..With manual or other mechanical contact actuating means
127 ...With delayed action or timing means
128 ...Latching or tripping means
129 ....With adjustment or calibration means
130 ....With reset or reclosing means
131 ...Snap-action (e.g., bistable)
132 ....With toggle spring
133 ....With stop means (e.g., motion limiting)
134 ....With magnetic biasing or holding means
135 ....With flexible vane or plate
136 .....With preset deformation
137 ..Contact structure or composition
138 ..Cylically or periodically operated (e.g., flasher)
139 ..With significant expansible element structure or composition of material
140 ...Wire or other stranded element
141 ..With external or auxiliary heating means
142 .Fusible element actuated
143 ..With manual or other mechanical contact control means
144 ...Plural fuses combined with single mechanical means
145 ...Multiple contact or plural circuit control means
146 ....Multipole or polyphase
147 ...Snap-action mechanical device
148 ...Reciprocal or rectilinear sliding motion actuating means (e.g., spring-loaded plunger or striker pin)
149 ...Rotary or oscillatory motion device
150 ...Latching trip or holding means (actuated by condition by fuse element)
151 ....Ratchet and pawl
152 ....Thin film or resoldering (e.g., eutetic alloy)
153 ....With external or auxiliary heating means
154 ....Tripping or release means
155 ...With reclosing or reset means
156 ...Manually operated shunting, disconnect or load-break device
157 ....Mechanical fuse link rupturing means
158 ..Current limiting devices (e.g., high voltage fuses)
159 ...Comprising significant fuse link or element structure or arrangement
160 ....With fusible metal overlay (e.g., alloy-forming)
161 ....Plural elements
162 .....With diverse characteristics
163 ..Delayed action (i.e., time lag)
164 ...Utilizing plural fusible elements
165 ...With biased direct circuit opening means
166 ...With heat absorption, conducting or storage means
167 ..Convertible (e.g., fused to nonfused)
168 ..Cutout or disconnect type (an assembly) of a fuse support and fuse holder with or without a fuse link)
169 ...With kickout means
170 ....Fusible element controlled
171 ...With dropout features (i.e., the fuse tube will be separated, or drop away from, at least on the main circuit contacts)
172 ....Utilizing combined mechanical motions (e.g., sliding with pivotal)
173 ....Utilizing sliding or reciprocating motions
174 ....With holding, latch or trip means
175 .....Combined latch or trip
176 .....Fusible element controlled
177 ......With fuse link extracting means
178 ......Spring biased
179 ......With delayed action
180 ...Line terminal or contact structure
181 ....Directly connected by fusible element (e.g., in line-type fuse)
182 ..With external or auxiliary heating means
183 ...Resistive heater
184 ....Directly in series with or completing controlled circuit
185 ...Comprising or including heat storage or accumulator means
186 ..Housing, casing or support means
187 ...With external circuit connection means
188 ....Plural conductor connector means
189 .....Distribution or load center type (e.g., plural outputs)
190 ....With fuse element tensioning or clamping means
191 ....Cable or busbar attachment means
192 .....Socket or thimble
193 .....Line tap, hook or clamp
194 ....With relatively movable cooperative elements (e.g., pull out)
195 .....With spring biasing means

ELECTROTHERMALLY ACTUATED SWITCHES
.Fusible element actuated
..Housing, casing or support means
...With external circuit connection means
....With relatively movable cooperative elements (e.g., pull out)
196 .....Door or closure controlled
197 .....Plural diverse (e.g., male and female connectors)
198 .....Prong or blade (e.g., plug-type housing)
199 ...With electrical ground, shield or barrier
200 ...Ceiling block fixture type (e.g., Rosette)
201 ...With plural interfitting or interlocking sections
202 ...Bushing or insulator
203 ...With gaseous venting or expulsion means (from the housing)
204 ...With oil or other liquid
205 ...With locking, sealing or guard means
206 ...With operational condition indicating means
207 ...With external support or attaching means (e.g., hook)
208 ...With fuse carrier attachment means
209 ....Adaptor means
210 ....Combined with lockout or other circuit closure prevention means
211 ....With pull out or ejector means (for tube)
212 ....Door-supported
213 ....Peculiarly adapted for cartridge fuse
214 .....With clamping, latch, or other attachment means
215 ......Spring clip
216 ....Peculiarly adapted for plug-type fuse carrier (e.g., fuse block)
217 ..Fuse link extraction or expulsion means
218 ...Combined with contact structure
219 ...Spring means
220 ...Pressure responsive
221 ..With electrical shunt circuit means (may also be fusible)
222 ..With switch protective means (for fuse structure)
223 ...Against shock or recoil
224 ...Against corona (e.g., shield)
225 ..With overfusing or tamper prevention means
226 ...Special adaptor or other selective means
227 ..Fuse link carrier or holder
228 ...Cartridge or tube
229 ....With plural fuse links or elements
230 .....Selectively or successively insertable in common circuit
231 ....With fuse link attaching support or securing means
232 .....Soldered or brazed joint
233 .....Rigid bar means
234 .....Locking or clamping means
235 .....Threaded screw or stud
236 .....Wedging or camming means
237 .....Replaceable or readily interchangeable
238 ....With fuse link tensioning means
239 .....Spring or other energy storage means
240 ......With strain member
241 ....With indicating or inspection means
242 .....Glow lamp
243 .....Chemical means
244 .....Movable or displaceable element (e.g., plunger or semaphore)
245 ....With handle or other manipulating means
246 ....Cartridge or tube structure or material of construction
247 .....Plural tubes (e.g., telescoping)
248 ....Ferrule, cap or other seal means
249 ....With gas expulsion means
250 .....Venting, cooling or deionizing
251 ....Contact or terminal structure
252 .....Attaching or securing means (to the tube or to the fusible element)
253 ......Locking, clamp or wedge means
254 ....Knife blade contact with slotted disk
255 ...Plug
256 ....Plural fusible elements in a single carrier
257 .....Selectively or successively insertable in protected circuit
258 ......Selection means
259 ....Rotatable relatively movable
260 ....With fuse element attachment or securing means
261 .....Resilient biasing or retaining means
262 .....Particularly adapted for specific fuse element
263 ......Cartridge or capsule enclosed
264 .....Readily replaceable or detachable element
265 ....With indicating means
266 .....Glow lamp or other incandescent means
267 .....Plunger or semaphore type
268 ....Contact or terminal structure
269 .....Plural diverse (e.g., male and female)
270 ....Structure or composition of material
271 .....Part of or structurally adapted for use with particular socket means
272 .....With venting means
273 ..With arc suppression or extinguishing means
274 ...Plural (e.g., auxiliary fuse)
275 ...With draw-out rod
276 ...Dielectric filler material or compound (e.g., quartz)
277 ....Liquid (e.g., hydrocarbon)
278 ....Dielectric gap or barrier means (e.g., wedging dielectric)
279 ...Deionizing gas or vapor generating material
280 ...Cooling, condensing or absorbing means
281 ...Blowout means (e.g., gaseous)
282 ...Arcing chamber or passage structure
283 ..Plural independent fuses
284 ...Selectively or sequentially inserted in same protected circuit
285 ....Automatic selective means (e.g., repeater type)
286 .....With delayed action selective means
287 ......Hydraulic or pneumatic
288 .....Transfer or interlock means
289 ....Rotary selector means
290 ..Fusible link or element structure or material
291 ...With strain-relief means
292 ...Plural series-connected conductive elements forming a single link
293 ...Plural parallel fusible elements
294 ...Continuous strand adapted for successive insertion in protected circuit

	ELECTROTHERMALLY ACTUATED SWITCHES
	.Fusible element actuated
	..Fusible link or element structure or material
295	...With particular geometrical shape or configuration
296	...Composite (e.g., with overlay)
297	...With nonconductive core (e.g., printed circuit)
298	THERMALLY ACTUATED SWITCHES
299	.Plural diverse actuating means in single switch
300	.Responsive to plural external conditions (e.g., temperature and humidity)
301	.With mechanical timing means (e.g., clockwork)
302	..Periodic or cyclically operative
303	...With predetermined operative cycle adjusting means
304	..With predetermined operative temperature range
305	...Utilizing cam or eccentric
306	.Expansible or vaporizable fluid actuated
307	..Plural expansible elements with single switch
308	...Individually responsive to diverse conditions or of diverse characteristics
309	..Multiple contacts or external circuit completion means
310	...Plural independent switches
311	...Selective, sequentially or alternately actuated
312	..With manual or other mechanical contact control means
313	...Combined or compound motion device
314	...Reciprocating or sliding motion
315	....Piston or plunger
316	...Rotary or oscillatory motion device
317	...With spring or other energy storage means
318	....Snap-action
319	.....With adjusting, calibrating or compensating means
320	..With diaphragm or bellows structure
321	...Combined with capillary tube or bore
322	..With bourdon tube
323	..With operating range calibration or adjustment means
324	..With auxiliary heater
325	..With latching, locking or holding means
326	..Fluid or fluid pressure generating means
327	..Housing, casing or support means
328	...With pressure relief (e.g., venting)
329	..Contact structure or composition of material
330	...With relative position adjustment means
331	...Comprising conductive liquid (e.g., mercury)
332	..With signaling, alarm or visual indicator means
333	.With bimetallic element
334	..With manual or other mechanical contact control means
335	...Plural elements combined with single mechanical means
336	....Individually responsive to diverse conditions or of diverse operating characteristics
337	...Multiple contact or plural circuit control means
338	....Plural separate switches
339	.....With interlocking
340	....With contacts selectively, alternately or sequentially actuated
341	...With time-delay means
342	...With spring or other energy storage means
343	....Snap-action
344	.....With magnetic flux source (e.g., magnetic armature)
345	.....With toggle linkage
346	.....With frictional coupling or lost motion means
347	.....With adjusting or calibration means
348	.....With reset or reclosing means
349	...With contact biasing, pressure control or adjusting means
350	...Compound motion means
351	...Rotary or oscillatory motion means
352	....With frictional clutch drive means
353	....Including cam and follower
354	...Reciprocating or slidable motion means
355	...Independently operative
356	...Latch or latch-release means
357	....Adjustable
358	....With reclosing or reset means
359	....With bimetallic element comprising or unitary with latch
360	..With operating range calibration or adjustment means
361	...Utilizing cam or roller
362	..Bimetallic element unitary with or directly actuates contacts
363	...Multiple contacts or external circuit control means
364	....Alternately or selectively actuated
365	...Snap-action
366	....With magnetic flux source
367	....With reset means
368	....With adjustment or calibration means
369	...Cyclically or repetitively operative
370	...With plural bimetallic elements
371	....Of diverse operating characteristics or responsive to diverse conditions
372	...Element attachment or mounting means
373	..Contact structure or composition of material (e.g., mercury)
374	...With position adjusting means
375	....Leaf spring with direct thrust element
376	..With signal or indicating means
377	..With auxiliary heating means
378	..With compensation means (e.g., ambient temperature)
379	..Bimetallic element structure or composition of material
380	..Housing, casing or support structure
381	...With significant external circuit connection means
382	.With longitudinally expansible solid element
383	..With plural contacts or external circuit completion means
384	..With manual or other mechanical contact control means
385	...Latching or tripping means
386	...Comprising mechanical advantage or force multiplying means
387	...Comprising frictional clutch or lost motion means
388	...With spring or other energy storage means
389	....Comprising resilient leaf spring
390	....Snap-action
391	.....With flexible vane or plate

THERMALLY ACTUATED SWITCHES
.With longitudinally expansible solid element
392 ..With operating range calibration or adjusting means
393 ..Expansible solid structure or composition of material
394 ...Rod, tube or cylinder
395 ...Wire or stranded material
396 ...Diaphragm, strip or ribbon
397 ..Plural deformable elements in single switch
398 ..Housing, casing or support means
399 ..Contact or terminal structural or composition of material
400 ...With position adjustment means
401 .With fusible, combustible or explosive material
402 ..With manual, gravity-actuated or other mechanical contact control means
403 ...Automatic cutout or disconnect type
404 ....With fusible element directly connecting contacts
405 ....With fusible element opening the circuit (no mechanical contacts)
406 ...Multiple contacts or plural circuit control means
407 ...Utilizing spring or other energy
408 ....Reciprocating or slidable motion device
409 .....Plunger or piston
410 ....Rotatable
411 ...Latch, trip or holding means
412 ..Plural independent fuse elements with single circuit completion means
413 ..Contact structure or composition of material
414 ..Housing, casing or support means
415 ...Flexible or resilient
416 ..Fusible, link or element structure or composition of material
417 DETAILS

CLASS 338 ELECTRICAL RESISTORS

1 COHERER TYPE
2 STRAIN GAUGE TYPE
3 .With temperature compensation
4 .Fluid- or gas pressure-actuated
5 .Dynamometer type
6 .Extensometer type
7 RESISTANCE VALUE TEMPERATURE-COMPENSATED
8 .Temperature-compensated actuator
9 .With additional compensating resistor or resistance element
10 ..Filament or wire resistance elements
11 REFLECTOR DIRECTS HEAT ON ELEMENT
12 MOVABLE MAGNET ACTUATES RESISTOR THROUGH HOUSING OR PARTITION
13 RESISTANCE VALUE RESPONSIVE TO A CONDITION
14 .Plural conditions
15 .Photoconductive (e.g., light sensitive)
16 ..With vibration control
17 ..Plural resistance elements (e.g., mosaic)
18 ..Infrared radiation
19 ..With transparent housing
20 .Current and/or voltage (e.g., ballast resistor)
21 ..Voltage surge-responsive or lightning arrester type
22 R ..Thermistor type
22 SD ....Semiconductor
23 ...Indirectly heated
24 ..Indirectly heated
25 .Ambient temperature
26 ..Cable or tape type (e.g., fire-detecting cable)
27 ..Liquid contact or element
28 ..Probe type
29 ...Mechanically adjustable or variable
30 ...Terminal forms casing or housing
31 ..Mechanically adjustable or variable
32 R .Magnetic field or compass (e.g., Hall effect type)
32 H ...Hall effect
32 S ...Superconductors
33 .Float actuator
34 .Gas, vapor, or moisture absorbing or collecting
35 ..Humidity
36 .Fluid- or gas pressure-actuated
37 ..Vehicle tire inflation
38 ..Liquid resistance element or contact
39 ..Piston
40 ..Bourdon tube
41 ..Bellows or capsule
42 ..Diaphragm
43 .Gravity stabilized or inertia actuator
44 ..Liquid resistance element or contact
45 ..Centrifugal
46 ..Pendulum
47 .Force-actuated
48 PLURAL SEPARATE DIVERSE RESISTORS
49 SHUNT TYPE
50 MOUNTED ON WHEELS OR VEHICLE
51 WITH HEAT DISSIPATING PROJECTIONS (E.G., VANES)
52 .Granular, powdered, or transversely stacked resistance element
53 WITH COOLING GAS OR LIQUID CIRCULATION
54 .Element granular, powdered, or stacked between terminals
55 .With cooling liquid circulation
56 ..Liquid resistance element circulates
57 .Vented or ventilating casing or housing
58 .Ventilated helical or zigzag element
59 WITH HEAT-STORING
60 WITH CAPACITY-REDUCING
61 WITH INDUCTANCE-REDUCING
62 .Helical or wound element
63 ..Bifilar
64 WITH ELECTRICAL SHIELD
65 .Mechanically variable resistor
66 IGNITION INTERFERENCE SUPPRESSOR TYPE
67 WITH DIVERSE NONELECTRICAL DEVICE (E.G., MECHANICAL OR CHEMICAL)
68 MECHANICALLY VARIABLE (E.G., RHEOSTAT)
69 .Musical instrument playing key actuated
70 .In or on lamp socket
71 ..Resistor surfaces pressed together (e.g., compressible type)
72 ..Resistor with intervening connector between contact and element (e.g., taps)
73 ..Resistor with contact angularly slidable on element
74 ..Resistor with contact rectilinearly slidable on element
75 .With resistor cleaner
76 .Interchangeable resistors of different resistance value
77 .Plug boxes
78 .With current reversing (e.g., reversing rheostat)
79 .With element winding and/or unwinding
80 .Liquid resistance element
81 ..Electrode separable from liquid element for switching
82 ..Adjustable insulating barrier between electrodes
83 ..Variable electrode separation
84 ...Plural ganged electrodes
85 ...Electrode rotatable
86 ..Level of liquid element adjustable on electrodes (e.g., electrodes move up and down in element)
87 .Contact adjustably inserted into resistance element (e.g., penetrating type)
88 ..Powdered element
89 .Mathematical function (e.g., sine-cosine potentiometer)
90 ..With slab or card-type resistance element
91 ..With mechanical converter
92 .Resistance element adjustably short-circuited
93 ..Compressible spring type
94 ..Liquid contact
95 ..With intervening structure between element and short-circuiting means (e.g., taps)
96 ..Spring contact strip progressively pressed along element
97 ..Unitary movable contact electrically bridges resistance portions
98 .With motion or vibration damping means (e.g., dashpots)
99 .Surfaces pressed together (e.g., compressible type)
100 ..Granular
101 ..Pile type
102 ...With contactor moving along pile
103 ...With electromagnetic operator (e.g., electric motor)
104 ....Force applied at both ends of pile
105 ....With diaphragm-type biasing spring
106 ....With initial pressure adjustment
107 ...With electromagnetic holder
108 ...Pedal- or treadle-operated
109 ...With initial pressure adjustment
110 ...With switch actuated by resistor actuator
111 ...With intervening conducting structure
112 ...Contact surface area of piles variable
113 ...With resilient pressure-applying linkage
114 .Deformable

MECHANICALLY VARIABLE (E.G., RHEOSTAT)
115 .Element in piled or stacked layers
116 .With electromagnetic operator (e.g., electric motor)
117 .Slidable coextensive helical and linear contacts
118 .Movable contact electrically adjustable over length of resistance element
119 ..With contact position indicating lamp
120 ..Additional resistor adjustably shunts part of resistance element (e.g., varifunction type
121 ..With nonlinearity correction
122 ..Coarse and fine resistance elements
123 ...Plural elements and plural contacts
124 ....Contacts interlinked (e.g., lost motion type)
125 ..Unitary movable contact electrically bridges plural resistance elements
126 ...Elements or taps in parallel
127 ...Contact rotates between circularly arranged elements or taps
128 ..Plural
129 ...Sequentially operated
130 ...Ganged
131 ....Resistors individually adjustable
132 ....Resistors in tandem along rotary shaft or coupling
133 ....Rectilinearly operated
134 ...Individually operated concentric shaft type
135 ..With zero setting or phasing
136 ..Contact clamped on resistance element
137 ..Plural contacts adjustable over single resistance element
138 ..Element tapered
139 ...Portion of element shorted
140 ...With intervening connector between contact and element (e.g., taps)
141 ...Helical or wound
142 ...Element forms a coating
143 ..Contact moves along turns of helical resistance element
144 ...Contact lifts element from core
145 ...Helical resistance element moves
146 ...With helical collector parallel to helical element
147 ...Resistor formed as a flat spiral
148 ...With helical screw for moving the contact
149 ...With contact stop
150 ..Resistance element moves
151 ...With liquid contact
152 ...With knob mounting or enclosing the element
153 ..Contact operated by pedal or treadle
154 ..With a flexible conductive strip separating the movable contact and the resistance element or taps
155 ..Contact rocks along element or taps
156 ..With liquid contact
157 ..Contact rolls along element or taps
158 ...Contact rolls rectilinearly
159 ..With heat conducting or distributing path
160 ..Contact slides along in contact with element
161 ...With element casing open over contact track
162 ...Contact angularly slidable
163 ....With knob forming casing or covering
164 ....Hermetically sealed housing
165 ....With elongated rectilinear resistance element
166 ....With removable actuating shaft or key
167 ....Spring-loaded contact
168 ....With flexible lead-in to contact
169 ....Contact pressure adjustable
170 ....With contact biasing spring on contact arm or carrier
171 ....With plural contact portions
172 ....With switching
173 .....Contact separable from resistance element
174 ....With collector ring
175 .....Ring, a shaft-bearing
176 ...Contact rectilinearly slidable
177 ....Contact surrounds resistor
178 ....Contact separable from element for switching
179 ....With series switch
180 ....Screw-operated
181 .....Screw, a fine-adjustment
182 ....With contact lock
183 ....With collector bar
184 ..With housing
185 ..With intervening connector between contact and element (e.g., taps)
186 ...Connector formed as severed helical turns or as comb teeth
187 ...With arc suppressor
188 ...With collector bar or ring
189 ...With magnetic holder for controller arm
190 ...Angularly movable contact
191 ....With switch
192 ....Resistance element enclosed
193 .....Enclosure formed on and hardened on element
194 ...Rectilinearly movable contact
195 .Resistance value varied by removing or adding material
196 .With resistor actuator position indicator
197 .With support
198 .With switch actuated by resistor actuator
199 .With housing
200 .With switch
201 ..Switch connects plural elements in parallel
202 MOVABLE CONTACT STRUCTURE
203 READILY SEVERABLE INTO INDEPENDENT RESISTORS
204 ELEMENT IN LAYERS PILED OR STACKED BETWEEN TERMINALS
205 .With intervening conducting layer
206 EXPANDED METAL TYPE
207 ELEMENT AND BASE PERMANENTLY FOLDED OR ROLLED
208 MESH, WOVEN, OR BRAIDED RESISTANCE ELEMENT
209 EXTENSIBLE
210 FLEXIBLE OR FOLDING
211 .Element coated on flexible base
212 .Tape or sheet
213 .Beaded
214 .Cable type
215 WITH SWITCH
216 IN COAXIAL TRANSMISSION LINE OR WAVE GUIDE
217 TAPERED ELEMENT
218 .Helical or wound
219 IN OR ON LAMP SOCKET OR BASE
220 IN DETACHABLE ELECTRICAL CONNECTOR
221 DETACHABLE PLUG-TYPE RESISTOR UNIT
222 WITH LIQUID ELEMENT
223 GRANULAR OR POWDERED ELEMENT
224 .Granular or powdered mixtures
225 .Carbon particles
226 INCASED, EMBEDDED, OR HOUSED
227 .With resistance value indicator
228 .Casing extends through plate
229 .Probe type

INCASED, EMBEDDED, OR HOUSED
230 .Metal casing or housing cast around element
231 .In liquid
232 .Casing or housing readily openable and/or separable from element
233 ..Elongated casing or housing with plug, disc, or cap at end
234 .With gaseous or vacuum spacing between element and casing or housing
235 ..Plural elements or resistors
236 ..Spacing of uniform thickness over length of element
237 ...Hermetically sealed
238 .Element inpowdered insulation with outer metallic sheath
239 ..Plural elements or resistors
240 ..Terminals or leads adjacent
241 ...Sheath only outside looped element
242 ..Shape of sheath
243 .Element in insulation with outer metallic sheath
244 ..Insulation coated on conducting liner
245 ..Entire insulation or sheath formed as a coating
246 ..With insulation and sheath external and internal to element
247 ..Plural part sheath
248 ...Insulation formed and hardened in situ (e.g., molded)
249 ...Parts formed as flat sheets
250 ..Insulation formed and hardened in situ (e.g., molded)
251 ..Sheath embraces or folds over insulation
252 .Element embedded or enclosed in groove or recess
253 ..With filling hardened in situ
254 .Flattened resistance element between flat layers
255 ..Layers coalesced or fused together
256 ..Casing or housing formed in plural layers external to element
257 ..One layer a coating
258 .Resistance element formed as a coating on interior of casing or housing
259 .Wound, braided, or woven casing or housing
260 .Plural resistors
261 ..Helical or wound element
262 .Casing or housing formed as a coating
263 ..Helical or wound element
264 ...Element coiled on a core
265 ....Terminal or leads at one end of core
266 ....Terminal surrounds element and/or core
267 .Helical or wound element
268 ..Preformed sleeve engaging over element
269 ..Casing or housing formed on and hardened on resistor (e.g., molded)
270 ..Element coiled on a core
271 .Terminal forms casing or housing
272 .Terminal or lead surrounds and secured to casing or housing
273 .Terminal or lead extends into end of elongated casing or housing
274 ..With sealing plug, disc or cap
275 .Casing or housing formed on and hardened on resistor (e.g., molded)
276 .Terminal or lead extends through casing or housing wall
277 WITH PROTECTING STRUCTURE SPACED FROM ELEMENT OR TERMINAL
278 EDGEWISE COILED HELICAL STRIP RESISTANCE ELEMENT
279 RIBBON RESISTANCE ELEMENT BENT OR CURVED ON FLAT SIDE
280 .Zigzag or sinuous
281 ..Element includes integral stiffening structure
282 .Helical or wound
283 ZIGZAG OR SINUOUS RESISTANCE ELEMENT
284 .Element includes integral stiffening structure
285 .Element extends along groove in base
286 .Helical
287 .Compound or multiple zigzag
288 ..Element includes conductive jumpers or spacers
289 .Element includes conductive jumpers or spacers
290 .Element projects in or through an opening or a slot in a support or frame
291 .With transaverse element stiffening or reinforcing rod or strip
292 .Element forms a coating
293 .Planar
294 .Cylindrical
295 PLURAL RESISTANCE ELEMENTS CONNECTED BY A JUMPER OR SPACER
296 HELICAL OR WOUND RESISTANCE ELEMENT
297 .Flat spiral winding
298 .Compound helix or winding
299 .Plural supported helices or windings
300 .Element forms a coating
301 .Element coiled on flat or ribbon base
302 .Element coiled on cylindrical or prismatic core
303 ..In helical groove on core
304 .Element on frame or support
305 ..Element extends in or through openings or grooves in frame or support
306 WITH BASE EXTENDING ALONG RESISTANCE ELEMENT
307 .Resistance element and/or terminals printed or marked on base
308 .Resistance element coated on base
309 ..Terminal coated on
310 .Resistance element extends through base
311 .Resistance element mounted in a groove in base
312 .Terminal extends in or through base
313 .Terminal embraces base
314 .Resistance element and base formed in layers
315 WITH MOUNTING OR SUPPORTING MEANS
316 .Compensates for or permits resistor
317 .Threading or projecting through the support
318 .Extending between supports
319 ..Plural resistors
320 .Plural resistors
321 RESISTANCE ELEMENT CORES AND FRAMES
322 WITH TERMINAL
323 .Terminal tapped on resistance element
324 .Diverse terminals
325 .With three or more terminals
326 .Terminals adjacent (e.g., looped resistor)
327 .Terminal coated on resistance element
328 .Terminal and resistance element disposed in flat layers
329 .Welded or soldered
330 .Terminal and resistance element integral
331 .Resistance element surrounds terminal
332 .Terminal embraces or surrounds resistance element
333 PARTICULAR CONFIGURATION AND/OR DIMENSION
334 MISCELLANEOUS

DIG 1 Worm gear drive

850	UNDERWATER
851	.Ship guidance system
852	.Electrodes and electrode systems
853	WELLBORE TELEMETERING
854	.By electromagnetic energy
855	..Radio frequency
856	.By electricity
857	..Using a common transmission medium
858	...Time multiplexed
859	...Frequency Multiplexed
860	.Depth recording
861	.Pulse transmission
870.01	CONTINUOUSLY VARIABLE INDICATING (E.G., TELEMETERING)
870.02	.With meter reading
870.03	..Having plural transmitters
870.04	.With calibration
870.05	.With calculation
870.06	..Plural transmitter (e.g., ratio)
870.07	.Combined (TM system with other system)
870.08	..Radio dial
870.09	..With alarm or annunciator (concurrent with TM)
870.1	.For radio sonde
870.11	.Plural transmitters
870.12	..Frequency division multiplex
870.13	..Time division multiplex
870.14	...Using particular sync
870.15	..With plural receiver
870.16	.Condition responsive
870.17	..Temperature
870.18	.Using a particular modulation (e.g., phase, frequency, or amplitude)
870.19	..Pulse
870.2	...Pulse repetition
870.21	...Analog to digital function converter
870.22	...Permutation code
870.23	...Increase pulses plus decrease pulses
870.24	...Pulse duration (e.g., pulse train)
870.25	.Phase variation
870.26	.Frequency variation
870.27	.Plural circuits, each for particular magnitude
870.28	.Via radiant energy beam (via particular energy)
870.29	..Photoelectric cell pickup
870.3	.With particular transmitter (e.g., piezoelectric, dynamo)
870.31	..Inductive transmitter
870.32	...Mutual inductance
870.33	....Flux valve type (e.g., with movable saturating magnet)
870.34	....Self-synchronous type
870.35	....Differential type
870.36	.....Linear variable differential transformer (LVDT)
870.37	..Capacitive transmitter
870.38	..Resistive transmitter
870.39	.With supply voltage regulation or compensation
870.4	.With particular receiver (e.g., ratiometer)
870.41	..Plural receivers
870.42	..With feedback (e.g., reflex along line)
870.43	...Follow-up (e.g., circuit rebalanced when upset)
870.44	..With discharge device (e.g., CRT)
901	EXTERNAL CONDITION VEHICLE-MOUNTED INDICA ATOR OR ALARM
902	.Transmitter in another vehicle (e.g., emergency vehicle)
903	..Relative distence between vehicles (e.g., collision alert)
904	.Transmitter in one vehicle only
905	.Highway information (e.g., weather, speed limits, etc.)

906	OVERRIDE OF TRAFFIC CONTROL INDICATOR BY COMMAND TRANSMITTER
907	TRAFFIC CONTROL INDICATOR
908	.Portable
908.1	..Barricade marker
909	.Plural intersections under common central station control
910	..Central station responsive to traffic detectors
911	...Central station ceontrols offset (time between beginning of same phase at adjacent intersections)
912	..Standby cycling implemented if invalid trasmission received or loss of transmission occurs
913	..Offset control
914	..Split control
915	..Central station includes display of status of indicators
916	.Intersection normally under local controller
917	..Controller responsive to traffic detectors
918	...Controller, when changing right of way, alters or skips normal "go" cycle of street having no traffic detected
919	...Plural cross highways at intersection each have traffic detectors
920	....Density determines split
921	.....Extension of time
922	...Density determines split
923	...Extension of time
924	..Local controller can be supercaeded by central station controller
925	..Pedestrian control
926	..Manual setting of cycle length and split times
927	..Rotating cam structure (specific structure required)
928	.Combined (e.g., toll systems, oneway)
929	.Indication of time remaining before change of phase
930	..Electromechanical movable auxiliary indicator
931	.Traffic control or local controller failure indicator
932	.Pacing (e.g., vehicle keeps pace with sequentially activated lights)
932.1	.Pivoted
932.2	VEHICLE PARKING INDICATORS
933	VEHICLE DETECTORS
934	.Density
935	.Descriminates vehicle direction
936	.Speed and overspeed
937	.With camera
938	.Compensation for vehicle remaining at sensor position
939	.Environmental or drift compensation
940	.With pneumatic
941	.Inductive
942	.Photoelectric
943	.Sonic or ultrasonic
944	PEDESTRIAN GUIDANCE
945	AIRCRAFT ALARM OR INDICATING SYSTEMS
946	.Nonairplane (e.g., balloon or helicopter)
947	.Land based landing guidance
948	..Aircraft actuation of land based landing guides
949	..Wind direction
950	..Movable (e.g., rotatable) guide
951	..Phased landing guidance (e.g., runway approach, landing, touchdown)
952	..Particular energy guide source (e.g., sound, electric field, radio)
953	...Visual source
954	....Alignment of plural sources

AIRCRAFT ALARM OR INDICATING SYSTEMS
.Land based landing guidance
..Particular energy guide source (e.g., sound, electric field, radio)
...Visual source
955 ....Plural colors
956 ....Modulated light source
957 ...Magnetic field guide
958 .Docking guidance
959 .Takeoff indicator
960 .Landing gear indicator
961 .Potential collision with other aircraft
962 .Icing indicator
963 .Flight alarm
964 ..Phased warnings for same flight condition
965 ..Tactile
966 ..Stall
967 ..Attitude (including yaw, angle of attack, roll, pitch, glide slope)
968 ..Wind shear
969 ..Speed
970 ..Altitude
971 .Nonalarm flight indicator
972 ..Runway presentation
973 ..Indicator of at least four flight parameters (altitude, speed, etc.)
974 ..Attitude
975 ...Roll or pitch
976 ...Glide slope or path
977 ..Altitude
978 ..Speed
979 ..Heading (includes deviation from desired course)
980 ..Indicator visible in pilot's line of sight through windscreen
981 .Aircraft beacons
982 ..Lights communicate (e.g., direction, altitude, reference position to observer
983 .Obstruction beacon
984 WATERCRAFT ALARM OR INDICATING SYSTEMS
985 .Navigation guides (e.g., channel lights)
986 .Anchor movement
987 .Rudder position indicator
988 VEHICLE POSITION INDICATION
989 .At remote location
990 ..With map display
991 ..Position indication transmitted by vehicle after receipt of information from local station
992 ..Position indication transmitted at periodic intervals (e.g., distance travelled)
993 ..Position indication transmitted by local station to remote location
994 ..Vehicle's arrival or expected arrival at remote location along route indicated at that remote location (e.g., bus arrival systems)
995 .Map display
996 .Prerecorded message describes position
425.5 LAND VEHICLE ALARMS OR INDICATORS
426 .Of burglary or unauthorized use
427 ..Of motorcycles or bicycles
428 ..Responsive to changes in voltage or current in a vehicle electrical system
429 ..Responsive to inertia, vibration or tilt
430 ..With entrance/exit time delay
431 .For trailer
432 .For bicycle
433 .For school bus
434 .For taxi
435 .Of relative distance from an obstacle
436 .Of collision or contact with external object
437 ..Curb
438 .Internal alarm or indicator responsive to a condition of the vehicle
439 ..Operation efficiency (e.g., engine performance, driver habits)
440 ..Tilt, imbalance or overload
441 ..Speed of vehicle, engine or power train
442 ..Tire deflation or inflation
443 ...By indirect detection means (e.g., height measurement)
444 ....Relative wheel speed
445 ...With particular telemetric coupling
446 ....Acoustic wave
447 ....Radio wave
448 ....Inductive
449 ..Temperature
450 ..Fluid level
450.1 ...Of hydraulic brake fluid
450.2 ...Of fuel
450.3 ...Of lubricant (e.g., engine oil)
451 ..Fluid pressure
452 ...Of brake fluid
453 ..Brake or clutch condition
454 ...Wear
455 ..Battery charging system condition
456 ..Gear position
457 ..Reminder
457.1 ...Of seat belt application
457.2 ...Of headlight energization
457.3 ...Of parking brake application
457.4 ...Of service interval expiration
458 ..Lamp or lamp circuit condition
459 ..Plural conditions
460 ...With voice warning
461 ...With particular display means
462 ....Digital
463 .External alarm or indicator of movement
464 ..Plural indications (e.g., go, slow, stop)
465 ..Turning or steering
466 ..Speed
467 ..Acceleration or deceleration
468 .External signal light system
469 ..With two or more intensity levels (e.g., day or night)
470 ..Pass - no pass
471 ..Hazard warning or distress signalling
472 ...Auxiliary signal permanently attached to vehicle
473 ...Portable signal
474 ..With audible signal
475 ..Turn signal
476 ...With automatic cancelling
477 ....By predetermined time interval or distance
478 ...With plural bulbs sequentially flashed
479 ..Brake light
480 .Electromagnetically actuated mechanical signal
481 ..Wigwag type
482 ..Normally encased
483 ...Plural concurrent indicators
484 ...Sliding sign or shutter
485 ...Window exhibited sign or shutter
486 ....Drum
487 ..Pivoting
488 ...Multiple indicators
489 ...Three or more positions
490 ....Vertical axis
146.2 DIGITAL COMPARATOR SYSTEMS
500 CONDITION RESPONSIVE INDICATING SYSTEM
501 .With particular system function (e.g., temperature compensation, calibration)

CONDITION RESPONSIVE INDICATING SYSTEM
.With particular system function (e.g., temperature compensation, calibration)
502 ..Acknowledgement
503 ...With ringback
504 ..Answer-back
505 ..Interrogator-responder
506 ..Alarm system supervision
507 ...Fail-safe
508 ...Redundant (e.g., added circuit or loop)
509 ...Plural or diverse current sources
510 ...Bridge or potential divider
511 ...Threshold or window (e.g., of analog electrical level)
512 ...Pulse
513 ...Diode
514 ..Testing
515 ...Simulation of condition
516 ...Automatic (e.g., periodic, start-up)
517 ..Selection from a plurality of sensed conditions
518 ...Scanning
519 ...Worst condition
520 ...First sensed exclusively indicated
521 ...Plural diverse conditions
522 ....Combined for response
523 ...Particular sequence of conditions
524 ...Condition position indicator
525 ....Display board
526 ..Predetermined rate of occurrence
527 ..Time delay
528 ...Entrance/exit
529 ...Condition persistence
530 ....Capacitor
531 .With particular coupling link
532 ..Having particular safety function
533 ..Wired
534 ...Coded message
535 ....Mechanical code means (e.g., coded disc)
536 ...Noninterfering
537 ...With impedance level coding
538 ...Combined with power line
539 ..Radio
540 .Specific condition
541 ..Intrusion detection
542 ...Lock
543 ....Permutation
544 ...Disturbance of fluid pressure
545 ...Door or window movement
546 ....Portable
547 ....Magnetic sensor
548 ....Plug or cord tension sensor
549 ....Rotatable sensor
550 ...Partition penetration
551 ...Disturbance of magnetic field
552 ...Disturbance of electromagnetic waves
553 ....Standing waves
554 ....Doppler effect
555 ....Light
556 .....Beam
557 ......Laser
561 ...Disturbance of electric field
562 ....Capacitance
563 .....With bridge
564 .....Fence
565 ...Responsive to intruder energy
566 ....Vibration
567 ....Electromagnetic energy
568 ..Article placement or removal
569 ...Mailbox
570 ...Drawer
571 ...Alarm on protected article
572 ...Detectable device on protected article
573 ..Human or animal
574 ...Holdup
575 ...Sleep
576 ...Drive capability
577 ..Flame
578 ...By radiant energy
579 ...By ionization or conductivity
580 ..Ice formation
581 ...Thermal
582 ...Vibratory
583 ...Photoelectric
584 ..Thermal
585 ...Refrigerated storage
586 ...Portable
587 ...False alarm resistant
588 ...Time-temperature relationship (e.g., overtemperature exceeds predetermined interval or time-temperature integral)
589 ....Rate of temperature change
590 ...Fusible, frangible, or destructible sensor
591 ....Containing pressurized fluid
592 ...Expanding fluid sensor
593 ...Switch sensor
594 ....With bimetallic element
595 ...Current modifier or generator
596 ....Cable or elongated probe
597 ....Curie point sensor
598 ....Barrier-layer sensor
599 ....Bridge circuit
600 ..Radiant energy
601 ..Meteorological condition
602 ...Moisture or humidity (e.g., rain)
603 ..Fluent material
604 ...Wetness
605 ...Leakage
606 ...Flow rate
607 ....Filter clogging
608 ....Stoppage
609 ....Counting
610 ....Vane in flow path
611 ....Pressure
612 ...Material level
613 ....Weight in container
614 ....Pressure
615 ....Moving sensor (e.g., impeller)
616 ....Overflow
617 ....Pulverant material (e.g., bin)
618 ....Liquid
619 .....Optical sensor
620 .....Electrode probe
621 .....Having sonic sensor
622 .....Having heat sensor
623 .....Float sensor
624 ......Vertically reciprocable
625 ......Pivoted arm
626 ...Pressure
627 ...Particle suspension in fluid
628 ....Smoke
629 .....Ionization
630 .....Photoelectric
631 ....Lubricant
632 ...Gas
633 ....Catalytic detector
634 ....Semiconductor detector
635 ..Condition of electrical apparatus
636 ...Battery
637 ...Watt-hour meter
638 ...Fuse or circuit breaker
639 ....Plural
640 ...Heater element
641 ...Signalling light element
642 ....Plural bulbs or filaments
643 ....Thermal or magnetic current sensors
644 ...Switch or relay
645 ...Rectifier
646 ...Transformer
647 ...Insulation

	CONDITION RESPONSIVE INDICATING SYSTEM
	.Specific condition
	..Condition of electrical apparatus
648	...Motor
649	...Condition of intentional grounding circuit
650	...Undesired circuit ground or short
651	....For plural circuit conductors
652	...Breaking of circuit continuity
653	...Electronic circuit or component
654	...Circuit energization
655	....Heating circuit
656	....Electricl socket
657	..Electrical characteristic
658	...Phase or frequency
659	...Pulse or surge
660	...Voltage
661	....Comparison
662	....Overvoltage
663	....Undervoltage
664	...Current
665	..Force or stress
666	...Weight
667	....On seat
668	...Tension
669	..Acceleration
670	..Velocity
671	...Angular
672	....Direction of shaft rotation
673	..Article transport
674	...Discrete articles
675	...Web, film, or strip
676	....Conveyer belt
677	...Strand
678	..Of geometrical gauge
679	..Machine condition
680	...Machine tool
681	...Synchronization
682	...Bearings
683	...Vibration
684	...Agricultural
685	...Cranes
686	..Position responsive
687	...Connected or disconnected
688	...Meter dial
689	...Tilt
690	...Geophysical (e.g., fault slip)
691	.Specified indicator structure
692	..Sound reproducer
693	.Specified power supply or housing
700	SELECTIVE VISUAL DISPLAY COMMUNICATION SYSTEMS
701	.Having selectable colors
702	..Using optical means external to display element
703	..Using display element color bit selection
704	..Using control amplitude selection
705	.Image superposition by optical means (e.g., heads-up display)
706	.Having specified input means
707	..Including light pen
708	...With pen controlling scan distinct from display scan
709	..Cursor mark position control (e.g., joystick)
710	...With mouse
711	..Including keyboard
712	...Display array defines keyboard
713	.With control of condition of display array elements (e.g., heater, priming)
714	..Structure including priming means
715	.With specified image of abnormal data
716	.Tandem display systems (e.g., one display cascaded with another diverse display array)
717	.Plural viewing point systems (e.g., plural terminals)
718	.Having control circuit means physically integral with display
719	..Having common base or substrate
720	.Cathode-ray tube display system
721	..Having simultaneous diverse messages
722	..Bar graph (e.g., analog data shown as variable length line)
723	..With specified image control
724	...With means for moving image (e.g., position)
725	....Animation
726	....Creep, crawl, slither and dither
727	....Rotation
728	...With interpolation means
729	...With perspective or shadow
730	...Character border
731	...Size
732	..Having specified generator means
733	...Including delay line
734	...Simulated overlay
735	...Font change
736	...Data responsive deflection generator
737	....Including magnetic element array
738	....Including impedance array
739	....Stroke or vector
740	.....With up/down counter
741	.....With normalization
742	.....With intensity compensation
743	....Lissajous
744	...Data responsive intensity generator (e.g., with repetitious scan)
745	....Combined plural generators
746	....Including magnetic element array
747	....Graphical
748	....Alphanumeric
749	.....Including counter or frequency divider
750	.....Including register, storage, or memory
751	....Calligraphic
752	.Specified plural element physical array (e.g., n by m visible elements)
753	..Linear image (e.g., bar graph of analog value)
754	...Plural (e.g., stacked, adjacent)
755	..Simulated array (e.g., physically moved array)
756	..Monogram or character area array
757	...With optical means in viewing path
758	...Using fluid light emitter elements (e.g., gas, plasma, or liquid)
759	....With particular mask or electrode shape
760	...Using solid body light emitter elements (e.g., incandescent or electroluminescent
761	....Using selective shunt circuit control
762	....Light emitting diodes
763	...Using specified light-controlling elements (e.g., shutter)
764	....Plural mechanically movable element
765	....Using liquid crystal elements
766	..Using specified light emitting elements
767	...Using brightness control (e.g., duty cycle)
768	...With shifting means
769	....Specified plasma coupling path
770	....Radiant energy coupling
771	...Using fluid light emitter (e.g., gas, plasma, or liquid)
772	....With phosphor excited by fluid response
773	....With particular discharge path

SELECTIVE VISUAL DISPLAY COMMUNICATION SYSTEMS
.Specified plural element physical array (e.g., n by m visible elements)
..Using specified light emitting elements
...Using fluid light emitter (e.g., gas, plasma, or liquid)
774 ....With shaped electrode or mask (e.g., nixie tube)
775 ....With more than two electrodes per element
776 ....Including means for combining selective and sustain signals
777 .....By specified network (e.g., charge storage diode)
778 ......Including transformer
779 ....With electrode insulated from fluid medium
780 ...Incandescent
781 ...Electroluminescent (e.g., with phosphor)
782 ...Using solid body light emitter (e.g., LED)
783 ..Using specified light controlling elements (e.g., goose bumps)
784 ...Liquid crystal elements
785 ...Electrochromic elements
786 ...Thermochromic elements
787 ...Particle suspensions (e.g., electrophoretic)
788 ...Fluid or pulverent materials in display
789 .With specified control circuitry
790 ..With control of indicia library
791 ..Special effects (e.g., antismear)
792 ...With message shifting means (e.g., traveling image)
793 ...With image intensity control (e.g., gray scale)
794 ..Using selective display to drive display (e.g., as nondisplay character generator)
795 ...With optical system
796 ....Specified mask
797 ...With cathode-ray tube as a storage means
798 ..Having specified storage means
799 ...Including memory
800 ...Including shift register data store
801 ....With routing logic
802 ..Having sequential or multiplexed data
803 ..Using logic
804 ...Decoder
805 ..Having generator of specified waveform coupled to display
806 ..Using patterned mechanical control means
807 ...Plural, interrelated switches (e.g., x by y)
808 ...Cam or card edge control
809 ...Belt drum or disc control
810 ....Optical path in control means
811 .Having specified display energizing means
812 ..Compensation of display elements (e.g., size of bits)
813 ..With regulation means
814 ..Synchronizing means
825 SELECTIVE
825.01 .Spare channel
825.02 .Tree or cascade
825.03 .Channel selection
826 ..Plural stage matrix system (e.g., path finding)
827 ...Alternate routing
825.04 ..Code or pulse responsive
825.05 .Loop
825.06 .Monitoring and control (e.g., supervisory)
825.07 ..With addressing
825.08 ...Polling or roll call
825.09 ..Quiescent
825.1 ..Scanning
825.11 ...Continuous
825.12 ...Interrupted
825.13 ....Automatic
825.14 ..Synchronization
825.15 ..With storage or recording
825.16 ..Fault condition
825.17 ..With indicator
825.18 ..Relay
825.19 .Communication or control for the handicapped
825.2 .Synchronizing
825.21 ..With addressing
825.22 .Program control
825.23 ..Machine tool
825.24 ..Of audio system
825.25 .Audio system (e.g., by pulse signal)
825.26 .Stock quotation
825.27 ..With information storage
825.28 .Space allocation (e.g., vehicle seat, hotel reservation)
825.29 ..Remote terminal
825.3 .Intelligence comparison
825.31 ..Authorization control (e.g., entry into an area)
825.32 ...With alarm or indication of improper access
825.33 ...Credit
825.34 ..Authentication (e.g., identity)
825.35 ..Commodity (e.g., vending)
825.36 .Having indication or alarm (e.g., location indication)
825.37 ..Additional to other selective control
825.38 ..Party line
825.39 ...Selection by means of frequency
825.4 ...Selector or indicator per se
825.41 ...Step by step impulse
825.42 ....Polarity controlled
825.43 ...Amplitude or polarity controlled
825.44 ..Code responsive (e.g., paging)
825.45 ...Distress signal alarm
825.46 ...Vibratory (tactual) alarm
825.47 ...Group call
825.48 ...Tone code
825.49 ..Location indication
825.5 .Lockout or priority (programmed or variable)
825.51 ..Designated priority
825.52 .Addressing
825.53 ..Plural part (e.g., digit) or repetitions
825.54 .Interrogation response
825.55 ..Printout (e.g., logging) or display
825.56 .With multidigit encoder
825.57 .Pulse responsive actuation
825.58 ..Phase or frequency shift keying
825.59 ..Polarity
825.6 ..Pulse pairs
825.61 ..Having delay line
825.62 ..Serial
825.63 ...Pulse width
825.64 ...Pulse spacing (e.g., pulse repetition rate)
825.65 ...Counting
825.66 ....Relay
825.67 ....Counting chain
825.68 ...Shift register
825.69 ...Radio link
825.7 .Phase responsive actuation
825.71 .Frequency responsive actuation
825.72 ..Wireless link
825.73 ..Plural frequencies
825.74 ...Simultaneous

	SELECTIVE
	.Frequency responsive actuation
	..Plural frequencies
825.75	...Permutation
825.76	...Corresponding to distinct functions
825.77	.Amplitude responsive actuation
825.78	..Divided resistor
825.79	.Matrix
825.8	..Plural stage
825.81	..Electroluminescent elements
825.82	...Light emitting diode
825.83	..Programmable
825.84	...Having fusible element
825.85	..Semiconductor crosspoint
825.86	...Integrated circuit
825.87	...Logic
825.88	...Bistable
825.89	...Switching element
825.9	...Transistor
825.91	....Field effect transistor
825.92	....Four or more element
825.93	....Plural
825.94	...Diodes
825.95	....Charge storage
825.96	....Plural diodes at crosspoint
825.97	.Having electron beam device
825.98	.System having rectifier
286.01	SYSTEMS
286.02	.Network signaling
286.03	..Speaking tube including circuit
286.04	.Manual alarm telegraph e.g., other than signal box type
286.05	..Fire
286.06	.Call station
286.07	..Hospital
286.08	..Hotel
286.09	..Restaurant
286.11	.Annunciator
286.12	..Drop annunciator
286.13	.Mimic
286.14	..Mapping
287	.Signal box type (e.g., to call messenger, plural fire alarm boxes)
288	..Combined (e.g., alarm circuit over power line)
289	...With fire extinguisher (e.g., CO2)
290	...Engine house apparatus controlling (e.g., releases horses, starts motor)
291	..Repeaters (e.g., from central to plural fire houses or to siren)
292	..Circuit maintenance (e.g., fault alarm, faulty circuit substitution)
293	..Variable signal (e.g., police and fire, first and third alarm)
294	...Dial selector for variable signal
295	..Non-interferring (prevents break-in by another box during transmission)
296	...Key obstruction type
297	..With signal at box (e.g., preliminary signal to combat false alarms)
298	...Answer back signal acknowledges transmitted signal
299	...Simultaneous (e.g., actuated by transmitted signal)
300	...Lamp at box (e.g., to call patrolman)
301	..Portable box actuating key (e.g., key must be released by signal from central)
302	...Frangible guard or protector for key
303	..Frangible element must be broken to send signal
304	..False alarm combating (e.g., detention devices)
305	..Local circuit to actuate box
306	...Watchman's local circuit
307	..Transmitters
308	...Controlled by door of signal box
309	...With make and break wheel
309.15	.Timer controlled
309.2	..With non-electrical indicator or exhibitor
309.3	..With diversely controlled indicator
309.4	..Selectively or sequentially actuated indicators
309.5	...With independent manual controller
309.6	..Circuit maker-breaker in series
310 R	.Combined (e.g., signal over power line)
310 A	...Power
310 CP	...Coupling-plug
311.1	.Paging
313	.Answer back
314	..Non-correspondence alarm (e.g., if acknowledgment is incorrect)
315	.Selsyn type
316	.Rebalancing at receiver
317	..Automatic rebalancing
318	.Synchronous distributor at transmitter and receiver
319	.Plural electromagnets or plural motors receiver
320	.Via fluid conduit (e.g., fire hose)
321	.Portable self-contained (e.g., movie usher's signalling flashlight)
322	.Self-cancelling after fixed time
323 R	.Game reporting
323 B	...Bowling
326	.Plural (e.g., concurrent auxiliary) single indications (e.g., light flashes when bell rings)
327	..With sounder signal cut-off
328	.Audible signals (e.g., bell rings softly first and then loudly)
329	..Intermittent
330	.In and out indicators (e.g., doorbell button flashes "out" sign)
331	.Periodic or flashing
332	.Signal light systems
333	.With specific power supply (e.g., power substitution)
425	REPEATER IN UNSPECIFIED TYPE COMMUNICATIONS LINE OR CHANNEL
815.01	VISUAL INDICATOR
815.02	.Three or more messages
815.03	..Using light emitting diode
815.04	..Monogram or character area array
815.05	...With electromagnetic actuation
815.06	..Transparent display element
815.07	...With optical system
815.08	..Including motor positioner
815.09	...Having mechanical coupling
815.1	.Multiple color
815.11	.Audio responsive lamp
815.12	.Switchboard or panel type (e.g., bullseye)
815.13	..Pushbutton
815.14	..Housing
815.15	.With lamp enclosed in housing
815.16	..Combined
815.17	..Light source modifier
815.18	..Readily movable
815.19	..Moving light source
815.2	..Assembly details
815.21	.Concurrent or auxiliary indications
815.22	..Bell
815.23	.Plural (e.g., grouped drop annunciators with single restorers)
815.24	.Moving
815.25	..Semaphore
815.26	..Rotary
815.27	..Array or matrix of elements
815.28	..Circuit closing type
815.29	..Electromagnet releases latch (e.g., drop annunciator)
815.3	.Self canceling after fixed time
815.31	.With light piping

	VISUAL INDICATOR
815.32	.False signal prevention (e.g., anti sunlight)
815.33	.Signal lense
384 R	AUDIBLE (E.G., SIMULATED NOISE IN TRAINERS)
384 E	..Electronic
385	.Explosive
386	..Successive
387	.Weatherproofing
388	.Diaphragm (e.g., horn)
389	..Phonograph type
390	..Rotary actuator
391	..Supports
392	.Percussion-type sound producers (e.g., signal chimes)
393	..Combined or plural (e.g., manual and electric, bell and buzzer)
394	...With unitary battery
395	..Suspended (e.g., locomotive bell)
396	..Gong encases striking mechanism
397	..Polarized
398	..With linkage between operator and clapper (e.g., church bell)
399	..Rotary clapper
400	..Single stroke for single impulse
401	...Alternating current type
402	..Details (e.g., clapper)
403	...Interrupter details
404	.Pneumatic-type sound producer (e.g., horn with electromagnetic valve)
405	..Siren
406	..Whistle
407	MISCELLANEOUS (E.G., TACTUAL SIGNALS)

CLASS 341 CODED DATA GENERATION OR CONVERSION

DECEMBER 1990

1 DIGITAL PATTERN READING TYPE CONVERTER
2 .Plural denominationally related carriers (e.g., coarse/fine geared discs)
3 .Plural types of codes on single carrier
4 .According to nonlinear function
5 .For X or Y coordinate determination (e.g., stylus-pad)
6 .With directional discrimination
7 .Antiambiguity feature
8 .Real and complementary patterns
9 .Having combined (e.g., denominational, combination code) coding pattern
10 ..Constant distance code
11 .Incremental
12 .Cathode ray
13 .Optical
14 ..Having optical waveguide
15 .Magnetic, inductive or capacitive
16 .Brush and contacts or conductive pattern
17 .Actuated by physical projection
20 BODILY ACTUATED CODE GENERATOR
21 .For handicapped user
22 .Including keyboard or keypad
23 ..Variable key legends
24 ..With error prevention means (e.g., debounce, antichatter)
25 ...With rollover feature (i.e., antidoublestrike)
26 ..With particular key scanning feature
27 ..With audible or tactile indicator
28 ..For pictorial or ideographic characters (e.g., design, chinese or japanese characters)
29 ..With variable pulse spacing or grouping
30 ..For numerical pulse type transmission
31 ..Photoelectric actuation
32 ..Magnetic or inductive actuation
33 ..Capacitive actuation
34 ..Pressure sensitive actuation
35 .With rotary dial
50 DIGITAL CODE TO DIGITAL CODE CONVERTERS
51 .Adaptive coding
52 .To or from particular bit symbol
53 ..Bit represented by pulse width
54 ..Bit represented by discrete frequency
55 .Substituting specified bit combinations for other prescribed bit combinations
56 .To or from multi-level codes
57 ..Binary to or from ternary
58 .To or from minimum d.c. level codes
59 .To or from run length limited codes
60 .To or from packed format
61 .Data rate conversion
62 .BCD (binary-coded-decimal) to or from decimal
63 .To or from bit count codes
64 .To or from number of pulses
65 ..To or from Huffman codes
66 ..To or from Morse code
67 .To or from variable length codes
68 .To or from NRZ (nonreturn-to-zero) codes
69 ..Return-to-zero to or from NRZ (nonreturn-to-zero) codes
70 ..To or from bi-phase level code (e.g., split phase code, Manchester code)
71 ..To or from bi-phase space or mark codes (e.g., double frequency code, FM code)
72 ..To or from delay modulation code (e.g., Miller code, three frequency code, MFM code)
73 ..To or from coded mark inversion
74 ..To or from double density code
75 .To or from nonlinear codes
76 .To or from differential codes
77 ..To or from delta modulation codes
78 .Programmable structure
79 .Tree structure
80 .To or from fibonacci codes
81 .To or from interleaved format
82 .To or from mixed code formats
83 .To or from mixed base codes
84 ..Binary to BCD (binary-coded decimal)
85 ..BCD (binary-coded decimal) to binary
86 .Generator runs until new code is generated
87 .Unnecessary data suppression
88 .Multiple conversions using same converter
89 .Reversible converters
90 .To or from alphanumeric code formats
91 ..To or from Baudot code
92 ..To or from Hollerith code
93 .Complementers
94 .With error detection or correction
95 .Byte length changed
96 .To or from constant distance codes
97 ..Gray to binary
98 ..Binary to Gray
99 .To or from display device codes
100 .Serial to parallel
101 .Parallel to serial
102 .To or from "N" out of "M" codes
103 .."N" out of "M" to "X" out of "Y"
104 .Binary to decimal
105 .Decimal to binary
106 .Coding by table look-up techniques
107 .To or from code based on probability
108 REVERSIBLE ANALOG TO DIGITAL CONVERTERS
109 STOCHASTIC TECHNIQUES
110 ANALOG TO DIGITAL CONVERSION FOLLOWED BY DIGITAL TO ANALOG CONVERSION
111 PHASE OR TIME OF PHASE CHANGE
112 .Synchro or resolver signal
113 ..Coarse and fine
114 ..Control system
115 ..Converter compensation
116 ..Analog resolver or synchro signal to digital signal
117 ..Digital signal to analog resolver or synchro signal
118 CONVERTER COMPENSATION
119 .Temperature compensation
120 CONVERTER CALIBRATION OR TESTING
121 .Trimming control circuits
122 SAMPLE AND HOLD
123 .Having variable sampling rate
124 .Sampled and held input signal with linear return to datum
125 .Sampled and held input signal with nonlinear return to datum
126 ANALOG TO OR FROM DIGITAL CONVERSION
127 .Bipolar
128 ..Dual slope analog to digital converter
129 ..Plural slope analog to digital converter
130 .Difunction code as output
131 .Increasing converter resolution (e.g., dithering)
132 .Detecting analog signal peak
133 .With particular solid state devices (e.g., Gunn effect device, Josephson device, drift transistor, using solid state active devices as impedances)
134 ..Integrated injection logic
135 ..Current mirror
136 ..Field effect transistor
137 .Using optical device, (e.g., fiber optics, cathode ray tubes)
138 .Nonlinear

	ANALOG TO OR FROM DIGITAL CONVERSION
	.Nonlinear
139	..Automatic control for increasing converter range (e.g., gain ranging, automatic gain control)
140	..Linearization (e.g., nonlinear transfer characteristic compensates for nonlinear transducer)
141	.Multiplex
142	.Converter is part of control loop
143	.Differential encoder and/or decoder (e.g., delta modulation, differential pulse code modulation)
144	.Digital to analog conversion
145	..Coarse and fine conversions
146	..Serial conversion
147	..Function generator
148	..Tree structure
149	..Using magnetic or cryogenic components
150	..Using charge coupled devices or switched capacitances
151	..Analog output represents a displacement or force
152	..With intermediate conversion of digital value to time interval
153	..Using weighted impedances
154	..Using ladder network
155	.Analog to digital conversion
156	..Coarse and fine conversions
157	..Intermediate conversion to frequency or number of pulses
158	..Analog input compared with static reference
159	...Parallel type
160	....Including priority encoder
161	...Acting sequentially
162	...Serial conversions with change in signal
163	...Recirculating
164	...Single comparator and counter
165	...Single comparator and digital storage
166	..Intermediate conversion to time interval
167	...Dual slope
168	...Plural slope
169	...Input signal compared with linear ramp
170	...Input signal compared with nonlinear ramp
171	..Using magnetic or cryogenic components
172	..Using charge transfer devices (e.g., charge coupled devices, charge transfer by switched capacitances)
173	CODE GENERATOR OR TRANSMITTER
174	.Plural transmitters
175	.With code display at transmitter
176	.Transmitter for remote control signal
177	.Producing different pulse frequencies
178	.With variable pulse spacing or grouping
179	..Plural pulse shapes
180	..Plural channels
181	..Carrier frequency variation
182	..With variable pulse length
183	..Pulse presence or absence in equal length code
184	.Numerical pulse type
185	..Multistage
186	..With gaseous or space discharge device
187	..Having counter or register
188	..Serial pulse number actuation
189	..Pulse gating
190	..Mechanical switch feature
191	.With gaseous or space discharge device feature
192	.With rotary distributor
200	QUANTIZER
899	MISCELLANEOUS

CLASS 342 COMMUNICATIONS, DIRECTIVE RADIO WAVE SYSTEMS AND DEVICES (E.G., RADAR, RADIO NAVIGATION)

1 RADIO WAVE ABSORBER
2 .For aircraft or missile
3 .For camouflage
4 .With particular geometric configuration
5 RADAR REFLECTOR
6 .With modulation
7 .Corner
8 ..Inflatable or collapsable
9 ..Decoy or tow target
10 .Inflatable or collapsable
11 .With spherical lens (e.g., Luneberg lens)
12 .Chaff
13 RADAR EW (ELECTRONIC WARFARE)
14 .ECM (Electronic countermeasures, i.e., jamming)
15 ..With repeater
16 .ECCM (Electronic counter-countermeasures, i.e., antijamming)
17 ..Radar reacts to jamming
18 ...by changing frequency
19 ...By varying gain or blocking receiver
20 .Detection of surveilance
21 BASE BAND SYSTEM
22 TRANSMISSION THROUGH MEDIA OTHER THAN AIR OR FREE SPACE
23 BERTHING OR DOCKING
24 BLIND AID
25 SYNTHETIC APERTURE RADAR
26 WEATHER RADAR
27 PRESENCE DETECTION ONLY
28 .By motion detection
29 AIRCRAFT COLLISION AVOIDANCE SYSTEM (CAS)
30 .With transponder
31 ..Including synchronized clock
32 ..Included in Secondary Surveilance Radar (SSR) or Air Traffic Control Radio Beacon System (ATCRBS)
33 AIRCRAFT LANDING SYSTEM
34 .Ground control approach (GCA)
35 .Microwave landing system (MLS)
36 AIR TRAFFIC CONTROL
37 .Secondary Surveilance Radar (SSR) or Air Traffic Control Radar Beacon System (ATCRBS)
38 ..With altitude information
39 ..With side lobe suppression
40 ..With defruiting or degarbling
41 SHIP COLLISION AVOIDANCE
42 RADAR TRANSPONDER SYSTEM
43 .Combined with primary radar system
44 .Unique identity
45 .IFF or SIF
46 .Navigational
47 ..Distance measuring equipment (DME)
48 ...With automatic lock-on
49 ...With VOR/TACAN
50 .With Telemetry
51 .Transponder only
52 COMBINED WITH DIVERSE TYPE RADIANT ENERGY SYSTEM
53 .With infrared device
54 .With laser
55 .With television
56 .With direction finding
57 .With radio voice communication
58 .With transmission to a remote station
59 PLURAL RADAR
60 TRANSMITTING INTELLIGENCE
61 RETURN SIGNAL CONTROLS EXTERNAL DEVICE
62 .Missile or spacecraft guidance
63 .Aircraft guidance
64 ..With map matching
65 ..With terrain avoidance or alarm
66 .Camera
67 .Gun (e.g., fire control)
68 .Proximity fuze
69 .Device actuated by presence of land vehicle
70 .Radar mounted on and controls land vehicle
71 ..With control of brakes or steering
72 ..With control of safety device (e.g., air bags)
73 RETURN SIGNAL CONTROLS RADAR SYSTEM
74 .Antenna control
75 ..Physical orientation
76 ...With ground tracking
77 ...With signal error correction
78 ...Conical scan
79 ...Lobe switching
80 ...Monopulse
81 ..Beam direction by phase or frequency control
82 .Transmitter
83 ..Signal phase or frequency other than pulse repetition frequency (PRF)
84 ...Function of doppler frequency
85 ...Function of distance
86 ....With constant phase
87 ....With constant beat frequency
88 ..Transmission timing (e.g., ring around)
89 .Receiver
90 ..Automatic target detection
91 ..Gain or threshold
92 ...Automatic gain control (AGC)
93 ...Constant false alarm rate (CFAR)
94 ..Gating
95 ...Automatic range tracking
96 ....Automatic track while scan (ATWS)
97 ....With automatic lock-on
98 ..Frequency
99 ...Doppler frequency tracking
100 ....Wtih local oscillator control
101 ....With filter control
102 ...Phase
103 ....Phase locked loop
104 DETERMINING VELOCITY
105 .Other than doppler (e.g., range rate)
106 .Combined with determining acceleration
107 .Combined with determining distance and direction
108 ..With correlation
109 .Combined with determining distance
110 ..With plural fixed range gates
111 ..With plural receiver frequency band separation
112 ..With plural frequencies transmission
113 .Combined with determining direction (i.e., bearing)
114 .Combined with determining sense of motion (i.e., approaching or receding)
115 .Digital
116 .With plural received frequency band separation
117 .With plural beams (e.g., "Janus")
118 DETERMINING DISTANCE
119 .Miss distance indicator (MDI)
120 .Altimeter
121 ..With additional indicator
122 ..FM type
123 .Height finder
124 .Material level within container
125 .With remote cooperating station
126 .Triangulation
127 .Phase comparison
128 .With frequency modulation
129 ..Plural frequencies transmitted
130 ..Plural modulation

DETERMINING DISTANCE
.With frequency modulation
..Plural modulation
131 ...Combined with pulse modulation (e.g., frequency agile)
132 ....With pulse modulation (e.g., "Chirp")
133 ..Combined with determining direction
134 .With pulse modulation
135 ..Digital (e.g., with counter)
136 ...With plural fixed range gates
137 ..With variable pulse repetition frequency (PRF) or pulse width
138 ..With type "A" or "J" range scope
139 ..Combined with determining direction
140 ...With azimuth and elevation determination
141 ...Off boresight
142 ...With CRT display
143 ....Plural
144 ....PPI type
145 .With correlation
146 .Combined with determining direction
147 DETERMINING DIRECTION
148 .Low angle processing
149 .Monopulse
150 ..With common IF channel
151 ..With channel equalization
152 ..With quadrature difference processing
153 ..With particular antenna or waveguide
154 ..Combined with beam steering
155 .Lobe switching
156 .Interferometer
157 .With frequency or phase steering
158 .Scanning
159 CLUTTER ELIMINATION
160 .MTI (Moving target indicator)
161 ..With vehicle movement compensation (e.g., AMTI (Airborn MTI))
162 ..Digital
163 ..With blind speed elimination
164 ..With storage tube
165 TESTING OR CALIBRATING OF RADAR SYSTEM
166 .Proximity fuze
167 .With laser
168 .With noise generation
169 .By simulation
170 ..Microwave
171 ..Doppler
172 ..With delay
173 .By monitoring
174 ..Calibrating
175 WITH PARTICULAR CIRCUIT
176 .Display
177 ..Plural
178 ..Projection type
179 ..Image production
180 ..Stereoscopic or tridimentional
181 ..Color
182 ..Electronic marker generation
183 ...Cursor
184 ..With stabilization (e.g., True Motion, True North)
185 ..Scan conversion
186 ..With sweep expansion
187 .Augmenter
188 .With polarization
189 .For correlation
190 .With recording
191 ..Mapping
192 .Spectrum analysis
193 ..Harmonic
194 .Complex signal (in phase and quadrature)
195 .Digital processing
196 ..Fast fourier transform (FFT)
197 ..With video quantizer
198 .For receiver protection
199 .Automatic frequency control (AFC)
200 .For frequency modulation
201 ..Combined with pulse modulation
202 .For pulse modulation
203 ..With noise reduction
204 ..With pulse shaping
205 .Sensitivity time control (STC)
350 DIRECTIVE
351 .Including a radiometer
352 .Including a satellite
353 ..Having a signal repeater
354 ..With beam steering
355 ..With control of satellite altitude
356 ..Synchronous satellite
357 ..With position indicating
358 ..With satellite signal correction
359 .Including antenna orientation
360 .Including antenna pattern plotting
361 .Including polarized signal communication transmitter or receiver
362 ..Receiver only
363 ...Circular
364 ...Eliptical
365 ..Circular
366 ..Eliptical
367 .Including directive communication system
368 .Including a steerable array
369 ..Injection radiation type
370 ..Retrodirective
371 ..With electronic scanning
372 ...Controlled
373 ..With a matrix
374 ..With a switch
375 ..With a delay line (e.g., serpentine transmission line, frequency scanning)
376 ..Including a remote energy source
377 ..Including a computer
378 .Utilizing correlation techniques
379 ..Side lobe elimination
380 ...Sum of each antenna channel signal
381 ...Difference of each antenna channel signal
382 ...Mixing each antenna channel signal
383 ..Sum of each antenna signal
384 ..Difference of each antenna channel signal
385 .Beacon or receiver
386 ..With transmisson of bearing or position determinative signals
387 ...Iso-chronic type
388 ....Loran
389 .....Loran-C
390 ......With cycle selection
391 .....Loran-A
392 ....With automatic gain control
393 ...Iso-frequency type
394 ...Iso-phase type
395 ....With hetrodyne synchronization
396 ....Omega
397 ....Decca
398 ...Rotating beacon signal
399 ...Tacan
400 ....Receiver only
401 .....VOR
402 ......Doppler
403 ....With circular array of antennas
404 ....VOR
405 .....Doppler
406 ......With circular array of antennas
407 ...Fixed course or bearing indicating
408 ....Moving beam
409 ....With superimposed images
410 ....Glide slope transmitter or receiver
411 .....Receiver only

DIRECTIVE
.Beacon or receiver
..With transmisson of bearing or position determinative signals
...Fixed course or bearing indicating
....Glide slope transmitter or receiver
412 .....Transmitter oly
413 ....Localizer transmitter or receiver
414 ....Distinctive frequencies equi-signal type
415 .....Coded equi-signal (e.g., A and N type)
416 .....Sequentially effective reflectors
417 ..Direction-finding receiver only
418 ...Doppler
419 ...Portable
420 ...With error or deviatioan compensator or eliminator
421 ....Pulse-type noise elimination or compensation (e.g., sky waves)
422 ...With self-orienting antenna pattern
423 ....Plural antennas
424 .....Tracking interferometer
425 ....Conical scan antenna type
426 ....Step track antenna type
427 ....Monopulse or paeuodo monopulse tracking antenna type
428 ...With continuously movable antenna pattern
429 ....Including a stationary antenna
430 ....Including plural moving antennas
431 ....Including a goniometer
432 ...With plural fixed antenna pattern comparing
433 ....Successively commutated
434 .....Including more than two antennas
435 .....By diode switching
436 .....By modulation
437 ....Including more than two antennas
438 ....Including separate indicators
439 ....Including combined effect indicator
440 ....Including a goniometer
441 ...Having a goniometer
442 ...Having a phase detector
443 ...Having a direction indicator
444 ...Having plural receivers
445 ...Having more than two antennas
446 ....Unequal distance between at least three antennas
447 ...Having a spiral antennas
448 ...Having a coil or loop type antenna
449 ...Having a moving antenna
450 .Position indicating (e.g., triangulation)
451 ..By computer
452 ..By plotting table
453 ..By deflected or repeated signal
454 ..Traffic
455 ...Having collision avoidance
456 ...Having traffic control
457 ..Land vehicle location (e.g., bus, police car
458 ..Distance
459 ..Underground object location
460 ..Storm or atomic explosion location
461 ..With speed determination
462 ..With altitude determination
463 ..Having plural transmitters or receivers
464 ...Plural transmitters only
465 ...Plural receivers only

700 R	ANTENNAS
700 MS	..Microstrip
701	.Having electric space discharge device
702	.With radio cabinet
703	.Measuring signal energy
704	.With ice clearer or preventer
705	.With aircraft
706	..Lighter-than-air device
707	..Trailing type
708	..Aircraft part of active antenna or vice versa
709	.Waterborne (e.g., buoyant or with watercraft)
710	..Watercraft part of active antenna or vice versa
711	.With vehicle
712	..Vehicle part of active antenna or vice versa
713	..Supported by vehicle body
714	...Antenna adjustable from inside body
715	...Rod type
716	...Running board
717	..Supported underneath vehicle
718	.Body-attached or connected
719	.Buried underground or submerged under water
720	.Combined with diverse-type art device
721	..Light
722	.With lumped reactance filter in active antenna
723	.Single adjustable length electrically long linear antenna
724	.Convertible to different antennas
725	.Plural separate diverse type
726	..Including balanced doublet and loop-type antennas
727	..Including balanced doublet-type antenna
728	..Including loop-type antenna
729	.Plural diverse-type antennas using same active element
730	..Including balanced doublet-type antenna
731	.Traveling wave type
732	..Circular loop
733	..Rhombic
734	...With feedback
735	..Balanced V
736	..Inverted V
737	..Plural
738	..With reflecting transformer
739	.With terminating resistance at open end
740	..Balanced type
741	.High frequency type loops
742	..Plural
743	..Feed coupling at spaced points on loop
744	..With series reactance in loop
745	.With variable reactance for tuning antenna
746	..Slot type
747	..Balanced doublet type
748	..Loop type
749	.With lumped reactance for loading antenna
750	..Adjustable reactance
751	..Plural antennas
752	..Reactance at free end of active antenna
753	.With spaced or external radio wave refractor (e.g., lens)
754	..With scanning, sweeping, or orienting
755	..With reflector
756	.With polarization filter or converter
757	.With means for moving directive antenna for scanning, sweeping or orienting
758	..Plural relatively movable
759	..Spiral motion
760	..With signal, indicator or alarm
761	..Reflector and antenna relatively movable
762	..Wave guide type antenna
763	..Rotary or rotary oscillatory motion
764	...Loop-type antenna
765	...In different planes
766	...Motor-driven
767	.Slot type
768	..With periodic control of slot or coupling
769	..Ring-shaped slot
770	..Plural
771	...With wave guide coupling
772	.Wave guide type (e.g., horn)
773	..Biconical horn type
774	...Stacked
775	...With reflector
776	..Plural
777	...With control of individual antenna (e.g., lobe switching or steering)
778	...With phasing
779	...With reflector
780	.."Pillbox" type
781 R	..With external reflector or director
781 P	....Plural reflectors
781 CA	....With main and subreflector (Casse-grain type)
782	...With means reducing re-radiation into active antenna
783	..With internal-wave refraction means
784	..With closure
785	..Dielectric type (e.g., polystyrene rod)
786	..With horn
787	.Including magnetic material
788	..Loop type
789	.Within conductive apertured wall
790	.Active sleeve surrounds feed line
791	..With coaxial active rod
792	..Doublet type
792.5	.Logarithmically periodic
793	.Balanced doublet - centerfed (e.g., dipole)
794	..Diverse-type doublets
795	..Sheet or wing type
796	..Helically or angularly staggered plural doublets
797	..Plural crossed (e.g., turnstile)
798	...Plural groups (e.g., stacked)
799	..Plural circumferentially arranged
800	...Plural groups (e.g., stacked)
801	..Three or more collinear units form doublet
802	..Distributed reactance added to arms
803	..Folded
804	...Multiple conductor type
805	..Arms angularly adjustable (e.g., rabbit ears)
806	..Bent arms (e.g., zigzag type)
807	..Tapered, thick, or enlarged arms
808	..Plural-rod arm forming V (e.g., conical arrangement)
809	..Arms non-linearly arranged (e.g., resonant V type)
810	..Plural
811	...Fishbone-type array
812	...Parallel arrangement
813	....Parallel and collinear arrangement
814	....With coupling network
815	....With parasitic element (e.g., reflector or director)
816	...With coupling network
817	...With parasitic element (e.g., reflector or director)
818	..With parasitic element (e.g., reflector or director)
819	...With reflector and director

	ANTENNAS
	.Balanced doublet - centerfed (e.g., dipole)
820	..With coupling network or impedance in the leadin
821	...Balanced to unbalanced circuit
822	...Impedance matching network
823	..Adjustable length
824	.Planar array of linear antennas
825	.Fractional, multiple, or full wave length linear type
826	..Plural
827	...Collinear arrangement
828	..Non-uniformity in antenna
829	..With grounding structure, including counterpoises
830	...With coaxial feed line
831	..Stub type
832	.Active antenna as reflector
833	.Antenna with parasitic director
834	.Antenna with parasitic reflector
835	..Plural active antennas
836	...Plural reflectors
837	..Plural reflectors
838	...Including a screening reflector
839	..Reflector and active antenna relatively movable
840	..Parabolic-type reflector with active antenna at focus
841	.With electrical shield
842	..Loop-type antenna
843	.Having an appreciable wave length dimension
844	.Plural antennas spaced a fractional or full wave length apart
845	.With ground connection spaced from feed line connection
846	.With grounding structure (including counterpoises)
847	..Insulated from or capacity coupled to ground
848	..Artificial or substitute grounds (e.g., ground planes)
849	..Modified natural grounds
850	.With coupling network or impedance in the leadin
851	..With radiation suppressor (e.g., shield)
852	..Plural path with impedance matching
853	..With plural antennas
855	...Loop antennas
856	..Antenna forms transformer primary or secondary
857	..Coupling at spaced points on antenna
858	..Coupled to plural leadins
859	..Balanced to unbalanced circuit
860	..Impedance matching network
861	...Adjustable
862	...Including long line element
863	....Tapered
864	....Quarter-wave transformer
865	..Balanced coupling network to balanced antenna
866	.Loop type
867	..Plural; plural or tapped coils
868	..Adjustable configuration, area or coil length
869	..With rotatable support
870	..With connector or terminals
871	..With collapsible or foldable frame
872	.With housing or protective covering
873	..Antenna embedded, potted, or coated
874	.Mast or tower type
875	..Sectional
876	.Switching between antennas and lines
877	.With reel for antenna
878	.With support for antenna, reflector or director
879	..For plural separate antennas
880	..Adjustable or collapsible support
881	...Foldable
882	...Pivoted or rotatable
883	...Telescoping
884	..Plural wire transmission line or wave guide as support
885	..Stress distributing or static discharging means for support
886	..Horizontally suspended between poles or standards
887	..Streamline-shaped support
888	..For supporting rod-like end portion of antenna
889	...Rod retractible into support
890	..Antenna on post, standard or tower
891	...Antenna along length of post
892	..Antenna on bracket
893	.Plural antennas
894	.With signal, indicator or alarm
895	.Spiral or helical type
896	.Rods or wire form cage or hollow post
897	.Mesh, woven, braided or multiple strip
898	.Hollow metallic body
899	.Having area increasing means (e.g., spiniferous, metal ball on top)
900	.Rod type
901	..Telescoping
902	...Fluid pressure actuated
903	...Flexible rod actuated
904	.Combined
905	..With transmission line
906	..With electrical connector
907	.Antenna components
908	..Active antenna component of particular shape
909	..Refracting means and radio wave energy filters (e.g., lenses and polarizers)
910	...Zoned type
911 R	...Dielectric type
911 L	.....Luneberg type
912	..Reflector or director
913	...With impedance
914	...Diverse curvature
915	...Collapsible, foldable or adjustable
916	...Made of detachable parts
	******************************
	DIGESTS
	******************************
DIG 1	With vibration damper or wind catcher
DIG 2	Satellite-mounted antenna

CLASS 346 RECORDERS

DECEMBER 1990

1.1	PROCESSES
2	ANGLE MEASUREMENT RECORDER FOR OPTICAL INSTRUMENTS
3	PERFORMANCE OF MULTIPLE FUNCTIONS OF STEAM AND GAS ENGINES
4	.Pressure responsive element
5	..Drum recorder
6	...Bourdon tube marker element
7	RECORD TRACER MOVEMENT RESPONSIVE TO INERTIA OR MASS INCLINATION
8	COURSE
9	WEIGHT RECORDERS, BY PRINTING OR PERFORATING
10	.Recording directly from weight positioned member
11	.Weight positioned member and independently movable record controlling followup element
12	..Coaxial member and element
13	COMBINED WITH NON-RECORDING INTEGRATOR
14 R	COMBINED WITH NON-RECORDING REGISTER
14 MR	..Meter reading
15	.Fare register
16	..And indicator or alarm
17	COMBINED WITH NON-RECORDING INDICATOR OR ALARM
18	.Speed indicator or alarm
19	COMBINED WITH AUTOGRAPHIC APPARATUS
20	COMBINED WITH CLOCK
21	COMBINED WITH RECORD DELETING MEANS
22	COMBINED WITH RECORD RECEIVER DEPOSIT RECEPTACLE OR RECORD RECEIVER THROUGH CHUTE
23	COMBINED WITH FIDUCIAL LINE MAKING
24	COMBINED WITH RECORD RECEIVER SEVERER
25	COMBINED WITH OTHER NON-RECORDING DEVICES
26	AUTOGRAPH AS SOLE RECORD, TIME DRIVEN ELEMENT
27	CHECK RECEIVERS, SELECTIVE COMPARTMENT
28	EXTENT OF WEB ADVANCE AS SOLE MEASURE OF FUNCTION
29	MULTIFACTOR-DRIVEN RECORDER ELEMENT
30	.Time factor
31	FOLLOW-UP
32	REBALANCING SYSTEMS
33 R	COMBINED WITH EXTERNAL RECORDER OPERATING MEANS
33 WL	..Well logging
33 P	..Pipe
33 F	..Flaw
33 M	..Magnetic miscellaneous
33 EC	..Echo
33 S	..Spark
33 MC	..Machine control record
33 A	..Optical system
33 B	..Radiation system
33 C	..Seismic system
33 ME	..Medical environment
33 D	..Speed
33 TP	..Temperature or pressure
34	.Plural external means for one recording couple
35	.Single external means for plural markers, single record
36	.Valve movement concurrent
37	.Radio receiver, tuning responsive
38	.Ordnance responsive
40	.Weight depressive member
41	.Case cover, or case cover key, or keyhole cover
42	.Gate, door, or turnstile control member
43	.Pump dispenser part
44	PLURAL RECORDERS
45	PLURAL-FUNCTION RECORDER, DISTINGUISHABLE RECORDINGS
46	.Records distinguishable by color
47	..Workmen's records
48	.Magazine retained record receivers and receiver selecting mechanism
49	.Plural markers and single record receiver
50	..With dotting, printing, or punching marker
51	...Plural selective, mechanical, manually operated, marker control devices on recorder
52	...Markers under selective control of element normally discrete from recorder
53	....With clock time index-and-dial or character recorder
54	....With register character recorder
55	....Time-driven record receiver
56	...With discrete element as marker
57	....Time-driven record receiver
58	....And clock time index-and-dial or character recorder
59	...With clock time index-and-dial or character recorder
60	....And register character recorder
61	...With register character recorder
62	.Single marker and single record receiver
63	..Under discrete element control
64	...Time-driven record receiver
65	SINGLE FUNCTION RECORDER, SINGLE SCALE, VARIABLE VALUE
66	SINGLE FUNCTION RECORDER, DUPLICATE OR PORPORTIONAL SCALE RECORDS
67	.Single marker
68	RECORD RECEIVER REMOVAL AND MARKER DISPLACEMENT
69	RECORD ELEMENT FRICTION ELIMINATING VIBRATOR
70	RECORD RECEIVER EXPANSION AND MARKER POSITION SHIFT
71	UNDULATORY RECORD, CONSTANT AMPLITUDE
72	FLOAT RESPONSIVE OR EXPANSIBLE CHAMBER RESPONSIVE MARKER
73	CENTRIFUGAL GOVERNOR RESPONSIVE MARKER
150	ELECTRIC
151	.Thermoplastic
152	.Radioactive
153.1	.Electrostatic
154	..Signal switching
155	..Electrostatic head
156	...Character wheel
157	..Color
158	..Electron beam
159	..Ion beam
160	..Photo scanning
160.1	..Structural enhancement
161	.Cathode ray
162	.Spark
163	..Spark burning
164	..Spark chemical
165	.Electrolytic
74.2	MAGNETOGRAPHIC
74.3	.Physical reorientation of magnetic particles
74.4	.Radiation sensitive
74.5	.Magnetographic head
74.6	.Magnetochemical or physical chemistry
74.7	.Multiple color
75	WITH GAS BLAST AGAINST RECEIVER
76 R	PYROGRAPHIC AND THERMO-CHEMICAL
76 PH	..Thermal print head
76 L	..Laser
77 R	RECORD RECEIVER DEFORMING
77 E	..Thermoplastic
78	PRINTING, DOTTING, OR PUNCHING MARKER
79	.Interconnected record receiver feed and record effecting movement
80	.Time record

		PRINTING, DOTTING, OR PUNCHING MARKER
		.Time record
81		..Clock time index-and-dial or character printing or punching
82		...On discrete card
83		....With variable positioning means for card
84		.....Plural fixed guides
85		.....Card modifier to prevent superposed records
86		.....Time controlled
87		...Record receiver movable to time markers
88		....Dial time markers
89		...Characters movable to platen
90		....Translatable dial or pointer
91		...Time character advancing or resetting mechanism
92		....Rotatable dial or pointer
93		..On web
94		.Register character printing, dotting or punching
95		..Discrete record receiving mechanism
96		...With card modifier to prevent superposed records
97		..Fare or passenger register character
98		..Register character advancing or resetting mechanism
99		...Card control
100		.Rolling serrated or toothed punching marker
101		.Helical record-effecting element
102		.Rotatable disc record receiver
103		.Rotatable drum record receiver
104		.Card or leaf record receiver
105		.Ink transfer support or moving means
106		..With coordinated marking
107	R	PHOTOGRAPHIC
107	A	..Timing means
107	B	..Race cameras
107	C	..Depository camera
107	MP	..Meter photographing

146		MISCELLANEOUS

CLASS 350 OPTICS, SYSTEMS AND ELEMENTS

DECEMBER 1990

1.1	HAVING SIGNIFICANT INFRARED OR ULTRAVIOLET PROPERTY
1.2	.Compound lens system, lens system or component
1.3	..Infrared lens having four or more components
1.4	..Infrared lens having three or fewer components
1.5	.Fluid filter or mirror
1.6	.Multilayer filter or reflector
1.7	..Having metal layer
3.6	HOLOGRAPHIC SYSTEM OR ELEMENT
3.61	.Having particular recording medium
3.62	..Recyclable
3.63	...Sandwich having photoconductor
3.64	...Crystalline
3.65	.Having nonplanar recording medium surface
3.66	.For synthetically generating a hologram
3.67	.Using modulated or plural reference beams
3.68	..Spatial modulation
3.69	.Copying by holographic means
3.7	.Using a hologram as an ordinary optical element
3.71	..Scanner
3.72	..Lens
3.73	...Multiple point hologram
3.74	.Having defined page composer
3.75	.For producing, or reconstructing images from, multiple holograms
3.76	..holographic stereogram
3.77	..Superimposed holograms only
3.78	..Discrete hologram only
3.79	...Sequential frames on moving film
3.8	.Having particular laser source
3.81	.Having multiple beam or diffuse object illumination
3.82	..In Fourier transform holography
3.83	.Having optical element between object and recording medium
3.84	..Focused image holography
3.85	.For reconstructing image
3.86	..Real image
4.1	KALEIDOSCOPE
4.2	.Including particles loosely housed for agitation
6.1	LIGHT BEAM DEFLECTION BY USING A PERIODICALLY MOVING ELEMENT
6.2	.Including transmissive type moving element
6.3	..Having moving lens
6.4	..Having moving prism
6.5	.Including reflective type moving element
6.6	..Having oscillating element
6.7	..Having multifaceted rotating element
6.8	...With facets parallel to rotation axis
6.9	..Having planar rotating reflector with transverse rotation axis
6.91	..Having planar rotating reflector with rotation axis in its plane
500	IMAGE STABILIZATION
501	COMPOUND LENS SYSTEM
502	.With image recorder
503	.With curved reflective imaging element
504	..Two or more in a series
505	...Concave, convex combination
506	.Right angle cavity inspector
507	.Microscope
508	..With viewed screen
509	..Interference
510	...Using polarized light
511	..With plural optical axes
512	...Side-by-side fields
513	...Plural oculars
514	....Binocular
515	.....Stereoscopic
516	......With single or parallel objectives
517	.......For viewing stereo pairs
518	..Spacing of optical elements axially adjustable
519	...Variable magnification
520	..Imaging elements movable in and out of optical axis
521	..Adjustable along optical axis
522	..With rotatable adjustment
523	..Illuminator
524	...Using polarized light
525	...With annular lighting structure
526	...With optical switching means
527	...With condensor and image fields combined
528	...With support
529	..Stage or slide carrier
530	...Adjustable along optical axis
531	...With plural transverse movements
532	...With turntable
533	...With temperature control
534	..Transparent slide
535	...Reference lines or grids
536	...Specimen cavity or chamber
537	.Telescope
538	..With viewed screen
539	..With image anti-rotation means
540	..Periscope
541	...With plural optical axes
542	....Binocular
543	...With mechanical adjustment
544	....Extensible structure
545	..Binocular
546	...Foldable or collapsible
547	...Body supported or with handle
548	....With focusing means
549	....With adjustable interocular distance
550	...With adjustable interocular distance
551	....Oculars swing about central axis
552	.....Spacing of optical elements axially adjustable
553	....Oculars rotate about separate axes
554	.....Spacing of optical elements axially adjustable
555	....Spacing of optical elements axially adjustable
556	...Spacing of optical elements axially adjustable
557	..With plural optical axis
558	...Plural magnification in same viewing field
559	..Selective magnification
560	..Variable magnification
561	..With relay
562	...With reticle
563	..Focusing or relatively sliding barrels
564	...Internal focusing
565	...With reticle
566	..With reticle
567	..With line of sight adjusting means
568	...Equatorial mount
569	..With prism or U-shaped optical path
570	.Variable magnification
571	.With tilted lens or tilted image plane
572	.With relay
573	..Repetitious lens structure
574	EXTENDED SPACING STRUCTURE FOR OPTICAL ELEMENTS
575	.Wide angle
576	.With screen or reticle in real image plane
577	.Extension of tubular element adjustable
578	WITH BLIND FOR NONVIEWING EYE
579	BARREL END EYE GUARD OR SHIELD
580	BARREL END OR LENS MOUNT SHADE
581	.Collapsible or foldable
582	MOISTURE OR FOREIGN PARTICLE CONTROL
583	.Optical element rotates

MOISTURE OR FOREIGN PARTICLE CONTROL
584 .Fluid directed across optical element
585 .Microscope drape
586 .Access facilitating structure
587 .Cap or cover
588 .Humidity or temperature control
589 .Sealing
590 ..Mirror, prism or signal reflector
96.1 LIGHT TRANSMITTING FIBER, WAVEGUIDE, OR ROD
96.11 .Integrated optical circuit
96.12 .Thin-film optical waveguide
96.13 ..Having modulating or switching means
96.14 ...Utilizing electro-optics
96.15 .Optical coupling means
96.16 ..Having data bus means
96.17 ..For use between fiber and thin-film device
96.18 ..Having lens focusing means
96.19 ..Utilizing prism and grating
96.2 .Optical connecting means
96.21 ..Having fiber to fiber mating means
96.22 ..Having fiber bundle mating means
96.23 .Optical transmission cable
96.24 .Optical fiber bundle
96.25 ..Having imaging bundle
96.26 ...For fiber scope
96.27 ...For fiber bundle plate
96.28 .Optical imaging tunnel
96.29 .Optical fiber with cladding
96.3 ..Waveguide
96.31 ...With graded index core or cladding
96.32 ...Utilizing nonsolid core or cladding
96.33 ...Utilizing multiple core or cladding
96.34 .Optical conductor characterized by material
97 SIGNAL REFLECTORS
98 .Hand or body carried
99 .Vibrating, oscillating, or rotating
100 .For a signal source remote from observer
101 .Light transmitting from source behind a reflector
102 .Cube corner, trihedral, or triple reflector type
103 ..Unitary plate or sheet comprising plural reflecting elements
104 .Including a curved refracting surface
105 ..Minute transparent spheres embedded in matrix
106 ..Plural refracting elements formed as a unitary mass
107 ..With individual reflector element mounting means
108 ...Including a threaded member
109 .Discrete reflecting elements formed as a unitary mass
110 SCALE OR INDICIA READING
111 .Polarizer
112 .Prism
113 .Mirror
114 .Lens
115 ..Movable or adjustable
116 ...Along scale or indicia
117 PROJECTION SCREENS
118 .With sound producer
119 .Acoustical
120 .Moving during projection
121 .Tracing (e.g., camera lucida)
122 .With lens (e.g., camera obsura)
123 .With reflector or additional screen
124 .Border, mask, shade, or curtain
125 .Curved
126 .Embedded particles
127 .Unitary sheet comprising plural refracting areas
128 ..Lenticular
129 .Unitary sheet comprising plural reflecting areas
130 STEREOSCOPIC
131 .Depends on eye parallax
132 .With right and left channel discriminating means (e.g., polarized or colored light)
133 .Stereo-viewers
134 ..View changers
135 ...Picture moves linearly past viewing aperture
136 ..Compensates for camera position (e.g., plotting or mapping type)
137 ..Reflected line of sight
138 ...Pictures offset, transposed, or have respective right or left sides adjacent
139 ..Ocular spacing or angle between ocular axes adjustable
140 ..Collapsible
141 ..Illumination
142 ..Ocular to picture distance adjustable
143 ..Supporting, mounting, enclosing, or light shielding structure
144 RELIEF ILLUSION
145 BINOCULAR DEVICES
146 .Binocular loupe type
330 UTILIZING A LIQUID CRYSTAL MATERIAL
331 R .With electrical excitation means
331 T ...With temperature detector
332 ..Having particular electrical driving circuit
333 ...For driving row electrode and column electrode
334 ..Having significant cell structure
335 ...Including plural cells in series
336 ...Including particular electrode
337 ...Including particular polarizer
338 ...Including particular reflector
339 R ...Including nonconductive layer
339 D .....Diffuser
339 F .....Filter
340 ....For perpendicular alignment
341 ....For parallel alignment
342 ...Including photoconductive layer
343 ...Including particular seal
344 ...Including particular spacer
345 ..Having particular illuminator
346 ..Exhibiting phase transformation or reversal in sign of dielectric anisotropy
347 R ..Exhibiting birefringence effects or variable index of refraction
347 V ....Variable index of refraction
347 E ....Electrically controlled birefringence
348 ..Exhibiting variable diffraction
349 ..Exhibiting variable absorption of light due to an additive in the liquid crystal material
350 R ..Having particular liquid crystal composition
350 S ....Smectic
350 F ....Flourescent additive
351 .With thermal excitation means
352 .Polarization filter
370 FOR POLARIZATION OF LIGHT OR USING POLARIZED LIGHT
371 .Mechanical stress responsive (e.g., elasto-optical)
372 ..For filtering
373 ..With particular medium
374 .Electric, magnetic or electromagnetic field responsive means (e.g., electro-optical, magneto-optical)
375 ..Magnetic field (magneto-optical)
376 ...For modulation of beam property

	FOR POLARIZATION OF LIGHT OR USING POLARIZED LIGHT
	.Electric, magnetic or electromagnetic field responsive means (e.g., electro-optical, magneto-optical)
	..Magnetic field (magneto-optical)
	...For modulation of beam property
377	....Using layered structure or plural mediums
378	....With particular direction of the field in relation to the medium, beam direction or polarization
379	..For beam focusing
380	..For beam deflection or scanning
381	...Using reflecting or cavity structure
382	...Using more than one polarization (e.g., digital)
383	...Using single polarization
384	..For modulation of beam property
385	...Using reflective or cavity structure
386	....Semiconductor
387	...Compensation technique
388	...Using plural mediums
389	...With particular direction of the field in relation to the medium, beam direction or polarization
390	...With particular medium or state of the medium
391	....Liquid medium
392	...With particular electrode structure or arrangement, or medium mounting structure or arrangement
393	...With particular field
394	.By reflection or refraction
395	..With particular medium
396	.Polarization varies over surface in direction of magnitude (e.g., vetograph)
397	.Using dichroic medium
398	..Of particular composition or structure
399	.Glare prevention by discriminating against polarized light
400	.With birefrigent element
401	..For beam deflection or splitting
402	..Prisms
403	..For modulation of beam property using plural elements
404	...Frequency filter or interference affects
405	...Using compensation techniques
406	..With particular material or mounting structure
407	.Superimposed or in series polarizers relatively adjustable
408	.With color filter
162.11	FOR DIFFRACTION
162.12	.Using Fourier transform spatial filtering
162.13	..For correlation only
162.14	..For convolution (crosscorrelation) only
162.15	..With diffraction grating before or at Fourier plane
162.16	.From zone plate
162.17	.From grating
162.18	..For ornamental effect or display
162.19	..For diffractive subtractive filtering
162.2	..Including particular grating characteristic
162.21	...Nonplanar grating
162.22	...Echelette or blazed grating
162.23	...Reflection grating
162.24	...Variable grating
163	LIGHT INTERFERENCE
164	.Interference produced by coating or lamina
165	..With transmissive coating on free lens surface
166	..Selective
167	SURFACE COMPOSED OF LENTICULAR ELEMENTS
168	LIGHT DISPERSION
169	SINGLE CHANNEL TO OR FROM PLURAL CHANNELS (E.G., LIGHT DIVIDING, COMBINING, ORPLURAL IMAGE FORMING)
170	.Portion of rays refracted by prism
171	.Rays reflected
172	..Different rays reflected and transmitted
173	..Partial reflection at prism face or interface between prisms
174	..Ray combining
409	LENSES
410	.Eyepiece
411	.Double refracting
412	.With field curvature shaping
413	.With graded refractive index
414	.Microscope objective
415	.Telecentric system
416	.Spherical
417	.Method of making or assembly
418	.Fluid
419	..With variable magnification
420	.Anamorphic
421	..With prism anamorphoser
422	.Selective magnification by exchanging or adding lens components
423	.With variable magnification (e.g., zoom type)
424	..Prism lens type
425	..With fixed conjugates
426	..Reverse telephoto
427	..With mechanical compensation
428	...With macro-type focussing
429	..Adjusting mechanism
430	...With macro-type focussing
431	.Diffusing
432	.Including a nonspherical surface
433	..Cylindrical
434	..Toroidal
435	..Paraboloidal
436	.Asymmetric (e.g., prismatic or eccentric)
437	.Plural focal length
438	.Selective wavelength transmitting or blocking
439	..With separate filter
440	.Annular zonal correcting
441	.Panoramic
442	.Including concave or convex reflecting surface
443	..With aspheric surface (e.g., Schmidt lens)
444	..Surface coated on lens
445	.With reflecting element
446	..For producing a double pass
447	.With diverse refracting element
448	.With light limiting or controlling means
449	..Diaphragm
450	...Between lens components
451	.With multipart element
452	..Echelon (e.g., Fresnel lens)
453	.Afocal (e.g., Galilean telescopes)
454	.Telephoto
455	..With five components
456	..With four components
457	..With less than four components
458	.Reverse telephoto
459	..With eight components
460	..With seven components
461	..With six components
462	..With five or less components
463	.Multiple component lenses
464	..Six components
465	..Five components
466	...+ - - + + arrangement

	LENSES
	.Multiple component lenses
	..Five components
467	...+ + - - + arrangement
468	...+ + - + + arrangement
469	..Four components
470	...+ - - + arrangement
471	....With multiple element
472	...+ + - + arrangement
473	...+ + + - arrangement
474	..Three components
475	...+ - + arrangement
476	....With multiple element component
477	...+ + - arrangement
478	...+ + + arrangement
479	..Two components
480	...+ + arrangement
481	...+ - arrangement
482	.Single component with multiple elements
483	..Three or more elements
235	.With viewed object or viewed field illumination
236	..Illuminating beam coaxial with lens axis
237	..Illumination through lens
238	..With viewed object support
239	.With viewed object support
240	..On lens supporting handle
241	..Relatively movable informatory sheet and lens (e.g., reading machines)
242	.With lens casing
243	.Combined with diverse art tool, instrument or machine
244	..Operation viewed through lens
245	.With support
246	..With additional handle
247	..Lens movable in its plane
248	..Body or apparel attached or carried
249	...Monocular loupe type
250	..Foldable or collapsible
251	..With clamp or grip
252	..Lens mounts
253	...With temperature compensation or control
254	...Plural lenses in common carrier selectively operable (e.g., turret type)
255	...With axial adjustment (e.g., adjustable focus)
256	...With handle
257	...Detachably attached to plate or barrel
258	BUILDING INTERIOR ILLUMINATION WITH OUTSIDE LIGHT
259	.Unitary light transmitting member comprising plural reflecting or refracting elements
260	..Plural members in series
261	..Elements on two sides of member
262	..With internal reflections
263	.Slats or strips
264	.With reflection
265	..Internal
266	LIGHT CONTROL BY OPAQUE ELEMENT OR MEDIUM MOVABLE IN OR THROUGH LIGHT PATH
267	.Fluid
268	.With glare or flicker elimination
269	.Electro-mechanical
270	..String or ribbon type
271	.Slit type
272	.With relative motion of two aperture elements
273	.With rotating element (e.g., scanning discs)
274	..Continuously rotating apertured element
275	..Element rotates about axis perpendicular to light path
276 R	GLARE OR UNWANTED REFLECTION REDUCTION
276 SL	..Stray light absorbers
277	.With mirror (e.g., mirror with glare screen)
278	..Anti-glare mirrors
279	...Adjustable
280	....Plural reflecting surfaces
281	.....Prismoidal
282	.....Reversible
283	....Translucent or other semitransmitting panel selectively positioned in front of mirror
284	.Display window
484	LIGHT BEAM DEFLECTION USING A MOVING ELEMENT OR MEDIUM
485	.By frustrated total internal reflection
486	.By moving a reflective element
487	..Reflective element moved by deformable support
353	LIGHT CONTROL BY CHANGING BULK OPTICAL PARAMETER OF AN OPTICAL ELEMENT
354	.Optical parameter changed by actinic radiation
355	.Optical parameter changed by an applied electrical or magnetic field
356	..Electro-optic light valve
357	..Electrochromic light valve
358	.Optical parameter changed by an acoustic wave
359	LIGHT CONTROL BY CHANGING OPTICAL OR PHYSICAL CHARACTERISTIC OF A LIGHT CONTROL SURFACE OR INTERFACE
360	.Shape or contour of light control surface altered
361	..Light control surface forms image on projected light beam
362	.Changing position or orientation of suspended particles
363	.Light control surface formed or destroyed
286	PRISMS
287	.Mounts
600	MIRRORS
601	.With a transmitting property
602	..With reflections in series
603	.Back to back
604	.Retractable vehicle mirror
605	.Automatically adjustable with vehicle position
606	.On relatively movable vehicle portion or accessory
607	.Including means for controlling the shape of a mirror surface
608	..Membrane mirror in mechanical contact only at its edge
609	..With means for minimizing internal mirror stresses
610	...Fluid cooled mirror
611	..Including a plurality of adjustable mirror supports
612	.Plural mirrors
613	..Composite or echelon mirrors or light concentrating array
614	...With a line focus
615	..Identical side mirrors adjustable with respect to a central mirror
616	..Identical adjacent mirrors identically supported
617	...With reflections in series
618	..With reflections in series
619	...Including curved mirror surfaces in series
620	....With concave and convex mirrors in series
621	...To view observer

MIRRORS
.Plural mirrors
..With reflections in series
622 ...With three or more reflections in series
623 ...Including an adjustable mirror
624 ....Including a curved mirror
625 ..Including adjacent plane and curved mirrors
626 ..Relatively adjustable
627 ..Wide angle segmented mirrors
628 .Concave cylindrical or providing a line focus
629 .With mirror surface of varied radius
630 ..Concave
631 .With support
632 ..Mirror movable relative to support
633 ...With rotary to linear motion converting mirror adjusting means
634 ....With means for rotation about perpendicular axes
635 ...With a rigid handle extending to or near a mirror pivot
636 ...With means for rotation about perpendicular axes
637 ...With switch or motor controlling mirror movement
638 ...Body or apparel mirror support
639 ...With mirror supporting column or sliding adjustment
640 ..With handle
641 ..Laminated or layered mirror support
642 .With selective absorption or transparent overcoating
322 SCREENS
311 FILTERS
312 .Fluid
313 .Sequentially additive
314 .Neutral or different densities
315 .Movable in or out of optical path
316 .Superimposed or series
317 .Filters in optical parallel (e.g., side-by-side)
318 .With support or frame
319 OPTICAL APERTURES OR TUBES, OR TRANSPARENT CLOSURES
320 METHODS
321 MISCELLANEOUS

DIG 3 Magnetic

200 EYE EXAMINING OR TESTING INSTRUMENT
201 .For fusion and space perception testing (e.g., stereoscopic vision)
202 ..Of abnormal muscular functioning
203 .Eye exercising or training type
204 .For interpupillary distance measuring or lens positioning
205 .Objective type
206 ..Including eye photography
207 ...Having spurious reflection blocking
208 ...Having means to detect proper distance or alignment (i.e., eye to instrument)
209 ..Including eye movement detection
210 ...Using photodetector
211 ..Including projected target image
212 ...For cornea curvature measurement
213 ..Including light filter or absorber
214 ..Including diaphram or slit
215 ..Including light polarizing means
216 ..Including lens selectively insertable in optical path
217 ...On rotary disc
218 ....Hand held type
219 ..With contact lens
220 ..Including reflectors with off-set surfaces
221 ..Including illuminator
222 .Subjective type
223 ..Self examining type
224 ..Perimeter type
225 ...With rotatable arm
226 ...With bowl type screen
227 ..Including trial frame
228 ...With multifocal lens
229 ...With plural lens carrier
230 ...With individual lens holder
231 ...Removably attachable to eye glass frame
232 ..With light polarzing lens
233 ..Lens or filter selectively insertable in optical path
234 ...Mounted on rotatable disc
235 ....Having plural disc carrier
236 ...Movable along optical axis
237 ..Including target image projection
238 ...Tachistoscope type
239 ..Including test chart or target
240 ...Stereoscopic type
241 ...Astigmatism type
242 ...Chromaticity type
243 ...Illuminated
244 ...Having support or cabinet
245 .Support
246 .Methods of use
247 ..For contact lens fitting
41 SPECTACLES AND EYEGLASSES
42 .Lens repair devices
43 .Floating or underwater type
44 .With antiglare or shading
45 ..Partially occluding the light-path area
46 ..Perforated opaque plates or shields
47 ..Removable and/or adjustable filters or screens (e.g., clip-on type)
48 ...Spring biased
49 ..Polarizing
50 .With rear-view reflectors
51 .With decoration or ornamentation
52 ..Detachably secured
53 .Shooting type
54 .Invertible or reversible multifocal type
55 .With vertical adjustment of multifocal lenses
56 .Lorgnette type
57 .With auxiliary lenses movable in and out of the optical path (e.g., clip-on-type attachments)
58 ..Spring biased or secured by friction members
59 .Lens pivots in and out of optical path
60 .With lens suspension bar (e.g., torsion bar)
61 .U-shape or half-moon lens below eye level
62 .With moisture prevention or absorption
63 .Folding
64 ..Pince-nez type
65 .Pince-nez type (including pince-nez bridges, nose grips and nose pads therefor)
66 ..With ear chain or temple
67 ..Plural bridges
68 ..With resilient extensible bridge
69 ..Lens and nose grip movable on flexible bridge
70 ..Posts or studs connecting bridge and nose grip
71 ..With spring biased nose grips
72 ...With pivoting levers
73 ....With flat spiral springs
74 ....With springs below bridge
75 ....With springs encased
76 ..With adjustable or rockable nose grips or pads
77 ...With ball joints
78 ..Nose pads or cushions
79 ...Plural pad parts engage the nose
80 ...Detachable
81 ...Perforated or serrated
82 ...Fluid-filled or suction type
83 .Continuous rim mounting
84 ..With rotating means for multifocal lenses
85 ..Upper rim portion slotted
86 ..With lens retaining or locking means
87 ..Nose guards or pads integral with frame
88 ..Nose guards or pads removable or adjustable
89 ..With brace arm temple support
90 .Split rim mounting
91 ..With brow pieces or top arms
92 ...Screwless lens mounting
93 ...With brace arm supports for temple or lens
94 ..With auxiliary bridge
95 ..Expansible and contractible lens rim
96 ..Locking member secures lens against rotation
97 ..Split connected by U-clamps or pivot links
98 ..Split on nasal side of rim (i.e., at bridge)
99 ..Clamp and temple pivot screw spaced along rim clamping arm
100 ..Clamp and temple pivot screw coincident on rim clamping arm
101 ..Metal clamps embrace the rims and connect to bridge and/or temples
102 ..Combined metal and plastic rims
103 .Brace arm or semi-rimless mounting
104 ..Arm or rim of plastic or of different material (e.g., metal and plastic)
105 ..Detachable brace arm
106 ..Screwless lens mounting
107 ..With adjustable lens or frame part
108 ..Brace arm supports lens at two spaced points or constitutes a partial rim
109 ..Brace arm extends along edge of lens
110 .Rimless mounting
111 .Temples
112 ..With pocket clip or clasp

SPECTACLES AND EYEGLASSES
.Temples
113 ..Spring biased
114 ..Resilient or flexible
115 ..Reversible or axially rotatable
116 ..Detachable
117 ..With covered core or rod (e.g., reinforced)
118 ..Extensible (e.g., with adjustable sleeve member
119 ..Two-part type (e.g., jointed)
120 ..Inclined to lens plane
121 ..With connector
122 ..With skin protecting earpiece covering
123 ..With head or ear engaging attachments
124 .Bridges
125 ..Crossbar type
126 ..Flexible
127 ...Ball or chain type
128 ..Adjustable
129 ..Reinforced
130 ..With auxiliary support
131 ..With nose grip or guard integral with bridge
132 ..With nose grip, nose guard, pad, or cushion
133 ..With connectors or straps
134 ...Unitary bridge and straps
135 ...With lens clamping straps
136 .Nose pads or cushions
137 ..Adjustable, rockable, or pivotable
138 ..Detachable
139 ..With cover or coating
140 .Connectors
141 ..With screw locking means
142 ..Strap type
143 ...With particular bracing bar or stud
144 ...With cementing or fusing
145 ...With cushion around lens screw or bolt
146 ....Sleeve or bushing
147 ...With serrated interengaging parts
148 ...Adjusting
149 ...With interengaging projection and recess
150 ...With resilient parts (e.g., resilient strap arms)
151 ....Spring between lens and strap
152 ...With clamping arms
153 ..With particular hinge
154 .Lens linings or rims
155 .With support or holder (e.g., on hat or cap)
156 ..With head embracing bow or chain
157 ..Neck retainers
158 .Combined
159 .Ophtahalmic lenses or blanks
160 R ..Eye contact type
160 H ....Hydrophilic
161 ...Multifocal
162 ...Colored
163 ..With light filtering means
164 ...Multifocal
165 ...With sections of different light absorption
166 ..With lens protective layers
167 ..Cataract correction type
168 ..Multifocal
169 ...Gradually varying focal power
170 ...With prismatic segment
171 ...Three or more foci
172 ...Multiple elements
173 ..Image size (aniseikonia) correction
174 ..With beveled, polished or reinforced edges
175 ..Prismatic type
176 ..Focus and/or astigmatism correction
177 ..Methods
178 .Methods (e.g., securing lenses in mountings)

1 WITH SOUND ACCOMPANIMENT
2 .Cyclic motion pictures with sound (e.g., praxinoscopes
3 .Sound stages, methods and accessories
4 ..Prompters
5 .Methods
6 .Selectively operable plural records, recorders or reproducers
7 ..With change-over control
8 ..Plural sound or picture record selection
9 ..Plural sound reproducers sequentially operable
10 ..Plural sound transducers selectively operable
11 .Sound allocation
12 .Picture and sound synchronizing
13 ..Manual control
14 ..Loop control
15 ..Sound record controls picture
16 ...Control actuated by sound record
17 ....Control signal carried by sound record
18 ...By position of sound transducer of separate sound means
19 ..Picture controls sound
20 ...Control signal carried by picture record
21 ..With independent speed regulation
22 ..With synchronous starting
23 ..With synchronizing indicator
24 ...On picture and sound records
25 .With picture and sound control systems
26 .Common picture and sound record carrier systems
27 ..Flexible strip type
28 ...Common light source for picture and sound
29 ...Spaced picture gate and sound transducers
30 ....With damping
31 .Separate picture and sound carrier systems
32 ..Picture strip and groove-type sound disc or cylinder
33 ...Interconnecting drive permits relative position adjustment
34 .Housing and supports
35 ..With acoustic isolation
36 .Reproducer and screen arrangements
37 .Picture and sound recorder carries
38 METHODS
39 .Applications (e.g., motion analysis, marksmanship training)
40 .Exhibiting
41 ..Controlling projector illumination
42 ...With color filtration
43 ..Enhancing relief illusion
44 .Recording
45 ..Photographing with light filtration
46 ..With plural exposure of a single film
47 ..With projected picture component
48 ..With special scenery and staging effects
49 ...Illuminating the subject
50 ...Making a series of drawings (e.g., animation methods)
51 ....Using photographic guides
52 ....With manipulation of drawings
53 ...Moving camera position
54 ...Manipulating puppet or mannequins
55 ..Providing printed titles
56 .Carrier treating or working
57 STEREOSCOPIC CAMERAS AND/OR PROJECTORS
58 .Interlineated
59 .Plural film strip
60 .Simultaneous recording or reproducing left-right images
61 ..With image separation by special projection screen
62 .Sequential recording or reproducing left-right images
63 ..With image separation by synchronized viewer
64 ..With reciprocating film stip carrier
65 ..With pre-objective reflecting system
66 COLOR CAMERAS AND/OR PROJECTORS USING MONOCHROME FILM
67 .Simultaneously recorded or projected images
68 RECORDING OR PROJECTING PICTURE IMAGE DURING CHANGE CYCLE OF PRECEDING PICTURE
69 PANORAMIC PICTURE TYPE
70 .Mosaic picture
71 ..With vignetting
72 REMOVABLE FILM STRIP MAGAZINE TYPE
73 .Spool or magazine selective
74 .With magazine ejecting
75 .With light trap or occlusion
76 ..Shutter type
77 .With focal plane indexing
78 R .Magazines
78 C ...Coded signals on magazines
79 WITH PLURAL PICTURE SIZES AND TYPES
80 .Plural film width
81 INTERLINEATED PICTURE TYPE
82 WITH PICTURES IN TRANSVERSE ROWS
83 WITH PICTURES IN PLURAL LONGITUDINAL COLUMNS
84 TIME COMPRESSION OR EXPANSION (E.G., TIME LAPSE OR HIGH SPEED)
85 SPECIAL EFFECTS
86 .Depth illusion
87 .Animation
88 .Sets
89 ..Projected picture component
90 .Titling devices
91 R .Transition effects (e.g., wipes and dissolves)
91 C ...In a camera
91 S ....Film transport controlled
92 WITH FILM CARRIED CONTROL SIGNALS
93 CAMERA WITH PLURAL FIELDS OF VIEW
94 CAMERA WITH DEFLECTED FIELD OF VIEW
95 GUN-TYPE CAMERAS AND/OR PROJECTORS
96 OPAQUE PROJECTORS
97 WITH SUPERIMPOSED FILM STRIPS
98 INDIVIDUAL PICTURE PLATE TYPE
99 .Book leaf type (e.g., mutotropes)
100 .Traveling observer
101 PICTURE DRUM TYPE (E.G., AEOTROPES)
102 PICTURE DISC TYPE
103 .Spiral picture arrangement
104 CABINET-TYPE PROJECTOR
105 OPTICAL RECTIFIER TYPE
106 .Scanning reflectors and refractors
107 .Rotating reflector disc
108 .Rotating reflector drum
109 .Reflector angularly displaced about fixed axis
110 .Reflector displaced
111 ..Plural reflectors
112 ...With angular adjustment during displacement
113 .Refractor
114 ..Plural projection lenses
115 ...With rotary carrier
116 ..Plural refractor elements with rotary carrier
117 ...Lenticular drum
118 ...Lenticular disc
119 ..Rotating plano parallel prism
120 ...Plate type
121 SEQUENTIALLY OPERATED STILL CAMERAS
122 .With film severing or perforating means

123 EXHIBITORS WITH PLURAL FILM STRIP SELECTION
124 WITH REWINDING OF FILM STRIPS
125 .During projection of another film strip
126 WITH NONREWINDING FILM STRIP (E.G., ENDLESS FILM TYPE)
127 .Zigzag or sinuous film support
128 .Coil type
129 FILM STRIP VIEWING APPARATUS
130 WITH FILM TREATING OR WORKING
131 COMBINED WITH DIVERSE-TYPE DEVICE
132 .With manned vehicle
133 PLURAL
134 .Projectors with single light source
135 .Projectors with alternately operable shutters
136 COVERTIBLE
137 .Still-motion camera
138 .Camera-projector
139 WITH CAMERA PARTS DISPLACEABLE FOR FOCUSING
140 WITH FOCUS CONTROL
141 WITH AUTOMATIC DIAPHRAGM CONTROL
142 WITH SELECTION OF PLURAL LENSES
143 WITH FILM STRIP FIRE PREVENTION OR ISOLATION
144 .Fire trap
145 ..With film severing
146 .Film cooling
147 ..Single frame projection
148 ..By filters
149 .Auxiliary fire shutter
150 ..Film tension responsive
151 ...Slack loop actuation
152 ..Feed speed responsive
153 ...Friction drive actuation
154 ...Centrifugal actuation
155 .Electrical circuit interrupted by film sensing means
156 WITH CONCENTRIC REEL
157 WITH THREADING STRUCTURE
158 .Self-feeding type
159 WITH LOOP FORMING
160 WITH FRAMING AND/OR TRAVEL GHOST ELIMINATION
161 .By alteration of film path length
162 .By relative positioning of gate and drive
163 .By rotation of film drive sprocket
164 ..With shutter synchronization
165 .Shutter adjustments
166 CAMERA AND/OR PROJECTOR DRIVE MECHANISMS
167 .With illumination control responsive to drive speed
168 .Having plural or interchangeable drives
169 .With single frame operation
170 .With indicating means
171 ..Visible in viewfinder
172 ..Film footage
173 .With reverse feed
174 .With starting and/or stopping means
175 ..Having timed run
176 ..Responsive to camera or projector elements
177 ...Shutter responsive
178 ..Having manual controls
179 ...Remotely operated
180 .With speed regulation or selection
181 ..By escapement
182 ..By braking
183 .With feeding belt film engagement
184 .With continuous feed and intermittent film arresting means
185 .With film beater
186 .With reciprocating continuously driven carrier engaging sprocket
187 .With intermittently driven carrier-engaging sprocket
188 ..Cam actuated
189 ..Geneva gear actuated
190 ..Special type gearing
191 .With film engaging claws reciprocally driven to engage film
192 ..Crank pin actuated
193 ...With pivoted link or arcuate slot guide
194 ..Cam actuated
195 ...Scroll type
196 ...With single fixed pivot
197 .With supporting structure
198 PROJECTION LIGHT SOURCES
199 .Synchronized with shutter
200 .Intermittent light
201 .Flicker reduction by auxiliary illumination
202 .With ventilation and cooling
203 .Projector illuminators
204 SHUTTERS
205 .With plural light paths
206 ..Reflex view type
207 .Rectilinearly movable
208 .Rotary
209 ..With speed-adjusted aperture size
210 ..With apertured or radially deviating blade
211 ..Ventilating
212 ..With light modifying blades
213 ...Color
214 ..With axially spaced independently driven blades
215 ...Counter rotatable
216 ...Variable aperture size
217 ....Dissolve
218 ..With plural blades on spaced axis
219 ..Single drive (e.g., disc type)
220 ...Variable number of blades
221 GATES
222 .Fluid pressure type
223 .With pressure rollers
224 .With edge guide
225 .With reciprocating pressure plate
226 .With removable aperture plate
227 .With pressure plate tension control
228 .With curved film plane
229 .With gate moving and/or holding structure
230 ..Closure-operated
231 .With lens mounting
232 PICTURE CARRIERS
233 .Strip type
234 ..Color
235 ..With leader
236 ..With film-carried indicia
237 ..Reinforced
238 ..Abrasion resistant
239 ..With particular format (e.g., stereoscopic)
240 ..With pictorial matter
241 ..Perforation arrangement
242 WITH HOUSING
243 WITH SUPPORT
244 MISCELLANEOUS

CLASS 353 OPTICS, IMAGE PROJECTORS

DECEMBER 1990

1	KALEIDOSCOPIC
2	.Including particles loosely housed for agitation
3	HELIOSTATS
4	ASCENDING HEATED AIR CHANGES PICTURES
5	MAPPING OR AERIAL PHOTOGRAPH RECTIFYING
6	.Stereoscopic
7	STEREOSCOPIC
8	.Polarizer
9	.Slide transfer mechanism
10	RELIEF ILLUSION
11	TARGET, MAP OR NAVIGATION PROJECTION
12	.With or for vehicle
13	WITH OR FOR VEHICLE
14	.Instrument indicator
15	WITH SOUND ACCOMPANIMENT
16	.Phonograph
17	..In carrying case
18	..Cabinet encloses projector and one side of screen
19	.Common picture and sound record carrier system
20	POLARIZER OR INTERFERENCE FILTER
21	EDITING OR AUXILIARY VIEWING
22	TRANSPARENT PLATE
23	.Plate part of film gate
24	..Including lens support
25	SELECTIVE DATA RETRIEVAL
26 R	.Film strip
26 A	...Automatic
27 R	.Plural picture rows on single microcard
27 A	...Automatic
28	PROJECTED IMAGE COMBINED WITH REAL OBJECT
29	ADDITIONAL ILLUMINATION OF OR NEAR PROJECTED IMAGE
30	COMPOSITE PROJECTED IMAGE
31	.Multicolor picture
32	..Lenticular film
33	..Prism
34	.Plural projection paths with single light source
35	.Slides and/or film superposed in projector
36	.Letters or numbers
37	.Reflector between lamp and screen
38	UNITARY PLURAL REFRACTING SURFACES
39	MICROPROJECTOR
40	SCALE OR SCALE INDICATOR PROJECTOR
41	.Vernier or plural scales
42	POINTER
43	GUN, FLASHLIGHT OR BATTERY OPERATED TYPE
44	SIMULTANEOUS PROJECTION AND MANUAL DELINEATION
45	.Score register
46	IMAGE MOVES ON SCREEN
47	.Cabinet enclosed projector and one side of screen
48	.Plural projectors or projection paths
49	..Single light source
50	.Reflector between lamp and screen
51	..Plural
52	TEMPERATURE CONTROL
53	.Means to preheat slides or film
54	.Liquid coolant
55	.Heat filter
56	.Heat resistant or insulating material
57	.Blower
58	..Plural
59	..Common motor for blower and slide changer
60	..Air directed against face or back of object
61	..Particular air ducts or deflector
62	STENCIL OR PERFORATED PLATE PROJECTOR (E.G., SKY OR CLOUD PROJECTOR)
63	EPIDIASCOPE (I.E., SELECTIVE OPAQUE AND TRANSPARENCY PROJECTOR)
64	.Plural reflectors between lamp and screen
65	EPISCOPE (I.E., OPAQUE PROJECTOR)
66	.Reflector between lamp and screen
67	..Cabinet encloses projector and one side of screen
68	SELECTIVE SLIDE AND FILM STRIP PROJECTOR
69	DISTORTION COMPENSATION
70	.For projection axis inclined to screen
71	SELECTIVE PROJECTION ON DISTANT OR CABINET SCREEN
72	PROJECTOR OR SCREEN REMOVABLE FROM COMMON HOUSING
73	.Plural reflectors between lamp and screen
74	CABINET ENCLOSES PROJECTOR AND ONE SIDE OF SCREEN
75	.Light shield, mask, hood, or diaphragm
76	.Focus or variable magnification
77	.Reflector between lamp and screen
78	..Plural
79	STRUCTURALLY RELATED PROJECTOR AND SCREEN
80	.Profile or silhouette
81	PRISM IN LIGHT PATH
82	PLURAL PROJECTION PATHS WITH SINGLE LIGHT SOURCE
83	.Dissolve type
84	COLOR FILTER
85	LAMP CONTROL
86	.Dissolve type
87	.Lamp position adjustable
88	SHUTTER
89	.Plural projection paths
90	..Dissolve type
91	.Solenoid operated
92	.Slides reciprocated horizontally from magazine
93	.Dissolve type
94	PLURAL
95	FILM GATE
96	.And lens support
97	LIGHT SHIELD, MASK, HOOD, OR DIAPHRAGM
98	REFLECTOR
99	.Plural
100	LENS SUPPORT
101	.Lens position adjustable
102	PARTICULAR CONDENSER
103	SLIDE TRANSFER MECHANISM
104	.For slides of various dimensions
105	.Magnetically operated
106	..Solenoid
107	...Rotary slide carrier
108	.Slides fixed to movable carrier
109	..Endless chain or belt
110	..Disc
111	.Gravity operated
112	..Feeder magazine and receptacle
113	.Feeder magazine and receiver magazine
114	.Slides reciprocated horizontally
115	..Slides elevated
116	..From magazine
117	...Rotary magazine
118	.Slides gripped or hooked
119	HOUSING
120	PICTURE CARRIER
121	METHODS
122	MISCELLANEOUS
	******************************
	DIGESTS
	******************************
DIG 1	Slides stacked with surface to surface contact
DIG 2	Film strip
DIG 3	Transparent
DIG 4	Opaque
DIG 5	Transparency holder accessories
DIG 6	Head accessories

CLASS 354 PHOTOGRAPHY

DECEMBER 1990

1 EXPOSING MULTICOLOR CATHODE RAY TUBE TARGETS
2 DAGUERREOTYPE
3 ELECTRIC PHOTOGRAPHY
4 LINE GENERATION
5 PHOTOTYPE COMPOSING
6 .Photoelectronic type
7 .With programmed control
8 .With line inter-space adding
9 ..Tabulating or adjusting line length
10 .Optical line correction
11 .With means to detect indicia
12 .With character means
13 ..Plural character types
14 ..With a moveable carrier
15 ...Rotary
16 ....Key operative
17 ..Fixed carrier
18 .Support structure
19 ..Character holder
20 SENSITOMETRY (E.G., OPTICAL WEDGE MAKING, ETC.)
21 FILM CARRIER CONTROLS CAMERA OPERATION
400 AUTOMATIC CAMERA FOCUSING
401 .Using sound
402 .Having photoelectric focusing system or device
403 ..Using active ranging
404 ..With moving optical means in front of photocell
405 ...With moving mirror
406 ..With stationary beam splitter
407 ...Having split image means
408 ..With two separate stationary predetector optical systems
409 ..With focus indicator
410 AUTOMATIC EXPOSURE CONTROL SYSTEM OR DEVICE
411 .Nonphotoelectric exposure control type
412 .For controlling entire photographic operation
413 .Including artificial illumination system or device
414 ..For fill-in illumination
415 ..With Pre-exposure flashing
416 ..With flash termination control
417 ...Quench type
418 ..Charge level or power supply responsive
419 ..Automatically activated under low light condition
420 ..Controlling exposure without controlling flash
421 ...With follow focus control of exposure
422 ...With single circuit controlling the shutter and diaphragm
423 ...With means for controlling only the diaphram
424 ..With photocell used as flashed trigger
425 .Having log transformation circuit
426 ..Digital
427 ..With log expansion
428 ..With temperature compensation circuit
429 .Having plural photocells
430 ..Measuring special property of light or subject (e.g. color, speed, etc.)
431 ..With light reflected from film or shutter
432 ..With more than two cells
433 ..With only two cells measuring light directly from subject
434 ..With only two cells used to control exposure time
435 .Having circuit for controlling a diaphragm shutter
436 ..Walking beam type
437 ...Using digital control
438 ..Clamp or stop needle type
439 ..Stepping motor type
440 ..Solenoid control type
441 .Having circuit for controlling separate diaphragm and shutter
442 ..With selectable priority
443 ..With programmed control only
444 ..With exposure time priority only
445 ..With aperture priority only
446 .Having circuit for controlling diaphragm only
447 ..Clamp or stop needle type
448 ..Ratchet/pawl type
449 ..Direct drive galvanometer type
450 ...With bridge circuit
451 ..Servo motor type
452 ...Using stepping motor
453 ..Including special driving arrangement
454 ..Including irregular diaphragm opening
455 ..With interchangeable lens
456 .Having circuit for controlling shutter only
457 ..With piezoelectric driven shutter
458 ..With digital counter
459 ..With at least one RC circuit for timing
460 ...Including memory capacitor
461 ...Including plural selectable caopacitors
462 ..Clamp or stop needle type
463 ..Using oscillating voltage for drive purposes
464 ..With current, voltage, or temperature compensation
465 .Including indicator means
466 ..Having holographic display
467 ..Using sound
468 ..Displaying battery condition
469 ..Galvanometer type
470 ...With plural pointers or match needle
471 ..Having nonmechanical visual display
472 ...Bar graph type
473 ...High/Low/Ok type
474 ...Using more than three display means
475 ....Character segment type
476 .With photocell at specific position within camera
477 ..Movable into and out of light path
478 ..In or on pentaprism assembly
479 ..With light reflected by suplemental mirror
480 ..With light reflected from film or shutter
481 ..Having means for changing or limiting the photocell's field of view
482 ..With color filter
483 ..With variable light transmission means
484 .With power supply details
485 .With printed circuit details
486 .With mechanical switch details
62 EYE, MOUTH, OR BODY PHOTOGRAPHY
63 HOLLOW CAVITY TYPE
64 UNDERWATER TYPE
65 AERIAL CAMERA
66 .With shutter or film feed speed and air or spin speed synchronizing
67 .Remote exposure control
68 .Simultaneous recording of plural images
69 ..Plural images recorded on plural film
70 .With camera direction stabilizing (e.g., gyroscope, etc.)
71 .Including continuously moving film
72 .With indicator, signal or scale
73 .Including synchronization
74 .Support or holder
75 COMBINED OR CONVERTIBLE
76 .Combined with diverse art device
77 ..With projector
78 ...And developing means

COMBINED OR CONVERTIBLE
.Combined with diverse art device
79 ..With compound lens systems (e.g., microscope, etc.)
80 ..With object support
81 ..With support means
82 ...Operator supported
83 DEVELOPING CAMERAS
84 .Including means to treat superimposed material
85 ..Including pressure means
86 ...Roller
87 ....Roll material only
88 .Including fluid appliator
89 .Including film processing tank
90 ..And means to move film
91 ...With tank filling means
92 ...Roll type only
93 ...Plural tanks
94 PANORAMIC CAMERA
95 .Including reflector
96 .Concave film surface
98 .Convex film surface
99 .Synchronization of film and camera movement
100 COLOR
101 .Lenticular
102 ..Plural color filter sections
103 .Simultaneous recording of images
104 ..Images recorded on separate films
105 EXPOSURE IDENTIFICATION
106 .Autographic camera
107 ..Stencil or indicia transfer strip
108 ...Removable
109 .With auxiliary identification photographing system
110 PLURAL IMAGE RECORDING
111 .Convertible
112 .Stereoscopic
113 ..Plural camera arrangement
114 ..Single camera with plural spaced objectives
115 ...With lenticular screen, mirror or prism
116 ...Film feed or guide
117 ..Plural image reflection onto single objective
118 .Multiplying
119 ..Different planes
120 .Formed on single plate (e.g., multiplex, etc.)
121 ..Including rotary objective or plate support
122 ..Including pre-objective element
123 ..Including shiftable objective or plate support
124 ...Shiftable plate only
125 ..Including shiftable post-objective mask
126 OBJECT ILLUMINATION COMBINED WITH CAMERA STRUCTURE
127.1 .With measuring, testing or indicating
127.11 ..Having flash ready indicator
127.12 ...Indicating power source status
127.13 ..Having distance indicator
129 .With camera synchronization
130 ..Shutter controlled by explosive force of flash device
131 ..Remote control (e.g., radio wave, etc.)
132 ..Multiple illumination units
133 ..With shutter relay or solenoid
134 ..With pneumatic shutter release
135 ..Energizing generator contained in flash unit
136 ..Reflex focusing mirror closes contacts
137 ..With time delay adjustment means
138 ...Positional
140 ..With detachable synchronizer
141 ..Convertible illumination means
142 ..Percussive illumination source
143 ..Flash unit includes spare lamps
144 ...With unison film advance and lamp switching
145.1 ..Electronic flash unit
146 ..Curtain shutter
147 ..Flash unit contacts actuated by shutter movement
148 .Lamp substitution
149.1 .With variable illumination angle
149.11 .With flash built into camera
150 INCLUDING MEANS TO REFLECT IMAGE TO FILM
151 TWIN LENS REFLEX CAMERA
152 REFLEX CAMERA WITH SINGLE OBJECTIVE
153 .Film advance means sets mirror
154 .With means to block light from film (e.g., screen, etc.)
155 .Plural optical means in view finder
156 .With manipulating means (e.g., lever, etc.)
157 .Plate camera
158 .Folding, collapsible or bellows camera
159 PICTURE SIZE VARIABLE
160 CAMERA BACK OR FILM CARRIER ANGULARLY ADJUSTABLE
161 CAMERA FILM AND FOCUSING SCREEN EXCHANGEABLE
162 WITH RANGE FINDER
163 .Range finder coupled with focusing
164 ..With parallax correction
165 ..Focusing lights
166 ..With view finder
167 ..With adjustable coupling to compensate for change of camera lens
168 ..Cam means to actuate range finder
169 ..Lever means to actuate range finder
170 MOTOR FILM DRIVE (e.g., spring, etc.)
171 .Automatic film advance
172 ..With spring tension indicator
173.1 ..With electric motor
173.11 ...Having electronic timing
174 MAGAZINE CAMERA
175 .Rotatable magazine
176 .Hand changed plate
177 .Tilting magazine
178 .Flexible carrier for plates
179 ..With tab means
180 .Sliding plate
181 ..Sliding and return
182 ..Intermediate exposure chamber
183 .Quarter-turned plate
184 ..Tilting
185 ...Base guides
186 .Rear plate replaceable
187 FOLDING, COLLAPSIBLE, OR BELLOWS CAMERA
188 .With focusing screen
189 .Camera front or lens mount angularly adjustable
190 .With lens movable in its plane
191 .With guide and lock
192 .With hinged base attached to bellows
193 ..With self-erecting lens holder
194 .Hinged bellows type
195.1 MANUAL CAMERA FOCUSING
195.11 .Diaphragm controlled by focusing
195.12 .Plural lenses
195.13 .With distance indicator
199 .With view finder
200 ..Including focusing screen
201 ...And reflector
202 CAMERA DETAILS
203 .Film restraining means
204 .Interlocking film advance and shutter tension or setting
205 ..Focal plane shutter
206 ..Including film movement limiting means

CAMERA DETAILS
207 .Double exposure prevention
208 ..Foldable, collapsible, or extensible camera structure
209 ..With manual over-ride (i.e., permits double exposure)
210 .Plural film type
211 .Film cut-off
212 .Film advancing means
213 ..With film movement limiting means (i.e., movement stops after one frame)
214 ..Including rewind means
215 ..Including film position indicating means
216 ..Posterior rolls
217 .Film frame counting or measuring
218 ..Measuring
219 .View finder
220 ..Pose reflector
221 ..Parallax correction
222 ..Selective or adjustable view-finder field
223 ..Selective or adjustable viewing position
224 ..With reflector
225 ...Plural
226 .Shutter
227.1 ..Electro-optical type
228 ..With diaphragm
229 ...Plural apertured diaphragm
230 ...Shutter and diaphragm formed by the same pivoted or sliding plates
231 ...Including coupled shutter and diaphragm
232 ...Diaphragm opens for focusing or viewing
233 ..With shutter between lens
234.1 ..Dynamo-electric actuated
235.1 ...Single linear solenoid
236 ..Plural shutters
237 ..With delayed release means
238.1 ...Including electric circuit means
239 ...With clock-train
240 ....Detachable from camera
241 ..Curtain or flexible plate type
242 ...Plural curtains or plates
243 ....Curtains width opening
244 .....More than two rollers
245 ..Sliding rigid plate
246 ...Plural plates
247 ....Moves in opposite directions
248 ...Rectilinear reciprocation
249 ....Vertical motion
250 ..Pivoting or rotating blade
251 ...With cocking means
252 ...With brake means
253 ...Including aperture cover or lid
254 ...Shutter blade moves continuously from closed to open to closed position
255 ....Blade moves in opposite direction on alternate exposures
256 ...With retard means
257 ....Including pneumatic means
258.1 ....Including electric circuit means
259 ....Including gear means
260 ....Including cam means
261 ...Plural oscillating blades
262 ....With gear means
263 ....With pneumatic actuator
264 ....Symmetrical opening
265 ....Opposite movement
266 ..Release or actuator means
267.1 ...Timing means
268 ...With safety lock
269 ...Cable release
270 .Diaphragms
271.1 ..Electrically operated
272 ..Diaphragm opens for focusing or viewing
273 ..With indicator
274 ..Plural pivoted blades
275 .Detachable or removeable film holder unit
276 ..Plate or cut film holders
277 ...Light seals
278 ...Plate fastenings and kits
279 ....Adjustable
280 ...Solution drains and resistants
281 ...Closure locks and checks
282 ...Auxiliary
283 ...With dark slide
284 ....With hinged parts
285 ....Double holder
286 .Lens mount
287 .Hoods
288 .Body structure or housing
289.1 .Indicator or setting means
289.11 ..Indicia on lens ring or housing
289.12 ...With electric circuit means
290 STUDIO STRUCTURE
291 BACKGROUNDS
292 PHOTOGRAPHIC MODEL OR SUPPORT
293 CAMERA MOUNTING OR REST
294 .Stereo
295 CAMERA OPERATING ATTACHMENT
296 .Vignetter
297 FLUID-TREATING APPARATUS
298 .Photocell controlled
299 .And temperature control
300 .Gaseous-treating
301 .Treating superimposed or laminar sheets
302 ..Rollers sequentially submerge and press sheet
303 ..With fluid dispensing
304 ...Collapsible container
305 ..With fluid reservoir
306 .Reversal processing
307 .Dark cabinet
308 ..Hand or body insertion
309 ...With ventilation
310 ..Daylight loading
311 ..With film-holding cabinet insertable into developing tank
312 ..With film support or handling means
313 ...Roll film handling
314 ....With motor driven film winding spool
315 ...Plate film handling means
316 ...Film immersed and removed
317 .Fluid application to one side only of film
318 ..By roller or web
319 .With film or paper feed
320 ..And film immersed and removed
321 ...Strip type
322 ...Plural stations
323 .Single station and plural fluids
324 .With fluid circulating means
325 ..And fluid spraying means
326 ..And plate support means
327 ..By rocking tray or support
328 .With fluid agitating means
329 ..Rotating carriers
330 ...Motor driven
331 .Film or print processing vessel
332 ..With interlocking doors
333 ..Attachment or accessory
334 ...Visual film scanner
335 ...Adjustable film holding means
336 ...Reservoir
337 ..With film or plate support
338 ..With film guiding ribs
339 .Film guide
340 .Film holding device
341 ..Spool
342 ..Tensioning means

	FLUID-TREATING APPARATUS
	.Film holding device
343	..Adjustable means
344	..Retaining means
345	..Gripping means
346	...Opposed frame gripping means
347	...Plate
348	RETOUCHING
349	.Stands
350	..Vibrating
351	BURNISHING
352	.Rotary machine
353	..Interally heated
354	MISCELLANEOUS

CLASS 355 PHOTOCOPYING

1	INCLUDING FIBER OPTICS
2	HOLOGRAM, SEISMOGRAM, GRAPH OR SCALE COPYING
200	ELECTROPHOTOGRAPHY
201	.Unauthorized copy prevention
202	.Combined with diverse subject matter
203	.Diagnostic testing
204	..Computer controlled
205	...Of malfunction
206	....Display, warning or shutdown
207	....Correction of malfunction
208	...With alteration (e.g., optimization)
209	...With indicator
210	.Latent image formation
211	..Particular photoresponsive member
212	...Web or belt
213	....Drum supported and fed
214	..With control of image contrast
215	..With airborne contaminant control
216	..With charge sensing to terminate charging
217	..With transfer of electrostatic image (TESI)
218	..With edge or margin feature including erasure or image shifting
219	..Charging or discharging
220	...With simultaneous light imaging or illumination
221	...Corona
222	....Alternating current
223	....Negative polarity
224	....With fringe or needle-like electrodes
225	....With control grid (e.g., scorotron)
226	....Bipolar
227	...Nonuniform
228	..Illumination
229	...Light source
230	...Object (e.g., document) holder
231	....Platen cover
232	...Projection
233	....Scanning
234	.....With movable platen (including platen drive and positioning means)
235	.....With drive and positioning means for movable scanning carriage of optical projection means
236	.....With vibration damping means
237	.....Lens strip
238	.....Fiber optics
239	.....Line or half-tone image
240	.....Fresnel lens
241	....Full frame exposure
242	....Reflex exposure
243	....With variable magnification
244	....Composite imaging
245	.Latent image development
246	..With developed image contrast/density control (e.g., by toner concentration control, developing electrode bias, etc.)
247	..Powder cloud
248	...Flat plate
249	...Cloud charging
250	..Fibrous brush
251	..Magnetic brush
252	...Magnetic belt
253	...Loading of brush
254	..Cascade
255	..Fluidized bed
256	..Liquid
257	...Electrophoretic
258	...Polar ink
259	..Donor (e.g., using a roller as a donor)
260	..Container
261	..Electrode (e.g., bias electrode)
262	...Segmented or perforated
263	...Flexible
264	...Self-cleaning
265	...Variable applied electric potential
266	..Enhancement of portions of the image
267	..Simultaneous positive and negative visible image formation
268	..Reversal of light and dark portions of the visible image
269	..Simultaneous development and cleaning
270	..Single device for developing and cleaning
271	.Developed image transfer or display
272	..Multiple transfer
273	..Treatment to enhance transfer
274	..Electrostatic transfer of toner
275	...With conductive transfer web
276	..A.C. field transfer
277	..Pressure transfer
278	...With lamination
279	...With heat
280	...With adhesive
281	....Including a transfer web
282	.Image fixing
283	..With cleaning of image fixing means
284	..Offset prevention
285	..Heat fixation
286	...Radiation
287	....Microwave
288	....Flash heating
289	...Conduction
290	....With pressure means
291	...Convection
292	..With vapor fixative
293	..With liquid fixative
294	..With solid fixative
295	..With pressure
296	.Cleaning of photoresponsive imaging surface
297	..With plural diverse cleaning means
298	..With handling of cleaned material
299	..Blade
300	..Web
301	..Brush
302	...With brush scraper
303	...With electrostatic assist
304	...Involving a filter bag
305	...Magnetic
306	..Cleaning beads
307	..Liquid
308	.Document handling (including counting)
309	..Of feed stock
310	...With means for cutting feed stock
311	...With different physical characteristics (e.g., size, shape, stiffness, transparency, color, etc.)
312	...With pneumatic means
313	...With mode change
314	....Dominant mode with interrupt
315	...With copy substrate stripping means
316	..Including sheet tracking
317	..Including sheet registration
318	..Including sheet inverting
319	...Duplex copy
320	....Duplex original
321	..Including delivery or collection
322	...Stacking or imbricating
323	...Sorting or collating
324	...Fastening or binding
325	...Interleaving
326	.Colored copy production
327	..Full color
328	..With highlighting means
18	PROJECTION PRINTING AND COPYING CAMERAS
19	.Combined with or convertible to a contact printer
20	.With cathode ray tube for light source

PROJECTION PRINTING AND COPYING CAMERAS
21 .Collapsible or portable
22 .Stereoscopic
23 .Copying both sides of original
24 ..Duplex
25 ..Book page copying
26 .Photographing on both sides of photo-sensitive paper
27 .With developing
28 ..And film severing
29 .With film severing
30 .With temperature or foreign particle control
31 .Copying sound record
32 .Multicolor picture
33 ..Lenticular film
34 ...Including detailed diaphragm
35 ..Regulating light intensity or exposure time
36 ...Including electromagnet
37 ...Plural lamps
38 ...Including
39 .Tilting
40 .Identifying, composing, or selecting
41 ..Including photocell
42 ..Including electromagnet
43 ..Including reflector between original and photosensitive paper
44 .With focusing or projection screen
45 ..Reflector in optical path
46 .Plural
47 .Image transferred to or from curved surface
48 ..Original moves continuously
49 ...Reflector between original and photo-sensitive paper
50 .Original moves continuously
51 ..Reflector between original and photo-sensitive paper
52 .Distortion introducing or rectifying
53 .Step and repeat
54 .Producing plural rows of pictures on photosensitive paper
55 .Focus or magnification control
56 ..Automatic or semiautomatic focusing when varying image size
57 ...Reflector between original and photo-sensitive paper
58 ...Including a cam or a screw with nonuniform pitch
59 ....And an indicator or scale
60 ..Reflector between original and photo-sensitive paper
61 ..Including indicator or scale
62 ...Vertical optical path
63 ..Vertical optical path
64 .Image transferred from individual documents to film strip
65 ..Reflector between original and photo-sensitive paper
66 .Reflector between original and photo-sensitive paper
67 .Illumination systems or details
68 ..Including photocell or phototube
69 ..Electricity to lamp controlled
70 ..Plural lamps
71 ..Including shutter, diaphragm, polarizer or filter
72 .Detailed holder for photosensitive paper
73 ..Including vacuum or fluid pressure
74 ..Including adjustable or selective masking frame
75 .Detailed holder for original
76 ..Including vacuum, fluid or spring pressure
77 .Methods
78 CONTACT PRINTING
79 .SUPERIMPOSED CARRIERS (e.g., montage or combination printing)
80 .Localized contrast modification (e.g., dodging or fading)
81 ..With scanning
82 .Book page copying
83 .Light monitoring exposure control
84 .With scanning
85 .Exposing on sensitized printing press plate or cylinder (e.g., photocomposers)
86 ..Step and repeat
87 ...Fluid pressure
88 .Multicolor printing
89 .Plural exposure stations or plural machines
90 ..With plural webs of indeterminate length (e.g., motion picture film)
91 .Fluid pressure retention of carrier and receiver in exposure position
92 ..Air-inflated cushion
93 ..Pivoted frame
94 ..With pump
95 .Step and repeat
96 ..Strip receiver
97 .Machine (i.e., having at least partly automatic feed)
98 ..Sound track printing
99 ..With flat exposure station structure
100 ...With further developing processing
101 ...With shutters
102 ...Repeated printing from a carrier
103 ...Continuous running
104 ..With cylindrical or curved exposure station structure
105 ...Light lowered into vertical cylinder
106 ...With further developing processing
107 ....With intermediate printing material
108 ...Continuous running
109 ....Repeated printing from a carrier
110 ....Rotating exposure station cylinder
111 ....Indeterminate-length carrier and receiver
112 .Print counting and marking
113 .Light boxes
114 ..Transfer of plural images
115 ..With exposure timing
116 ..Foot-operated platen or shutter
117 ..Cylindrical or curved exposure station
118 ..Divided or flexible platen
119 ..Indirect illumination
120 ..Platen-controlled illumination circuit
121 ..With shutter
122 .Frames
123 ..Strip film
124 ..With shutters
125 ..With diffusing or masking (e.g., vignetting)
126 ...Adjustable parameters
127 ..Transfer of plural images
128 ..With platen
129 ...Divided platen
130 ....With closing spring bias
131 ...Attached platen
132 .Methods
133 MISCELLANEOUS

1	TRIANGULATION BY LIGHT BEAM
2	CONTOUR PLOTTING
3	RANGE OR REMOTE DISTANCE (E.G., HEIGHT) FINDING
4	.With light detector (e.g., photocell)
4.5	..Of light interference (e.g., interferometer)
5	..Time delay or phase change of reflected beam
6	.Instrument condition testing or indicating
7	.Periscope or offset type
8	.With view finder
9	.Base line instrument (i.e., base is a part of instrument)
10	..With filter or light valve
11	..Range finder combined with height finder
12	..Stereoscopic
13	...Ortho-pseudo type
14	...Stationary measuring marks
15	..Length of base line variable
16	..Image displaced by moving refracting element
17	..Image displaced by rotating reflecting element
18	..With mounting, support, adjusting, or folding structure
19	..Prism structure for determining coincidence
20	.External basis type
21	..Object size or distance known
22	...With displaced images
23	MOTION STOPPING (E.G., STROBOSCOPES)
24	.Periodically moving reflecting or refracting element
25	.Periodically moving light interrupting element
26	..Vibrating or oscillating element
27	VELOCITY OR VELOCITY/HEIGHT MEASURING
28	.With light detector (e.g., photocell)
28.5	..Of light interference (e.g., interferometer)
29	OPTICAL ELEMENT OR RETICLE RESPONDS TO RELATIVE VELOCITY OF REMOTE OBJECT
30	CRYSTAL OR GEM EXAMINATION
31	.Axes determination
32	MATERIAL STRAIN ANALYSIS
33	.With polarized light
34	..Attached detector
35	..Sheet material
35.5	.By light interference detector (e.g., interferometer)
36	WITH SAMPLE PREPARATION
37	.Condensation nuclei detector
38	.Depositing particles on optical surface
39	BLOOD ANALYSIS
40	.Hemoglobin concentration
41	..Oximeters
42	..Standards
43	OPTICAL PYROMETERS
44	.With sample engaging rod or tube
45	.Plural color responsive
46	.With incandescent standard
47	..Automatic intensity control
48	..Modulating (e.g., flicker beam)
49	..Telescopic
50	...Current control
51	INFRARED AND ULTRAVIOLET
52	EGG CANDLING
53	.Photoelectric
54	.With counting, marking, or weighing
55	.With egg transfer
56	..With egg turning or jarring
57	...Endless conveyor
58	..Endless conveyor
59	..Manual transfer
60	...With light shading chamber
61	...Portable receptacles
62	.With light shading chamber
63	..Hood type
64	.With light box
65	..With egg turning or jarring
66	..With particular illumination means
67	...With particular electrical switching
68	.Lamp attachments
69	CUTTING BLADE SHARPNESS
70	OIL TESTING (E.G., CONTAMINATION)
71	DOCUMENT PATTERN ANALYSIS OR VERIFICATION
72	WITH PLURAL DIVERSE TEST OR ART
73	PLURAL TEST
73.1	FOR OPTICAL FIBER OR WAVEGUIDE INSPECTION
300	BY DISPERSED LIGHT SPECTROSCOPY
301	.With Raman type light scattering
302	.For spectrographic (i.e., photographic) investigation
303	..With spectral analysis
304	..With sectored disc
305	..With diffraction grating
306	.With internal standard comparison
307	.With background radiation comparison
308	.With synchronized spectrum repetitive scanning (e.g., cathode-ray readout)
309	..Using plural beams
310	.With aperture mask
311	.With sample excitation (e.g., burning)
312	..By electrical resistance heating (e.g., graphite tube)
313	..By arc or spark
314	...Including sputtering
315	..By flame
316	..By high frequency field (e.g., plasma discharge)
317	..By light
318	...Monochromatic (e.g., laser)
319	.Utilizing a spectrophotometer (i.e., plural beam)
320	..Having plural wavelengths
321	..Having servo equalization
322	...With polarized light beams
323	..Having beam modulation
324	...With plural dispersion
325	...Prior to testing
326	.Utilizing a spectrometer
327	..Having light polarizing means
328	..Having diffraction grating means
329	...Including servo slit adjustment means
330	..Having optical gating means
331	.With monochromator structure
332	..Having adjustable color or bandwidth
333	...In a double monochromator
334	...With diffraction grating means
335	FOR SIZE OF PARTICLES
336	.By particle light scattering
337	BY PARTICLE LIGHT SCATTERING
338	.With photocell detection
339	..At right angles to the light beam (e.g., nephelometer)
340	..At variable angle to the light beam
341	..For light comparison means
342	..Of back-scattered light
343	..Using plural photocells
344	BY ELECTROPHORESIS
345	BY LIGHT INTERFERENCE (E.G., INTERFEROMETERS)
346	.Spectroscopy
347	.Holography
348	..For optical configuration
349	.With light beams of different frequency (e.g., heterodyning)
350	..For rotation rate (e.g., ring laser)
351	.With polarization
352	.With partially reflecting plates in series (e.g., Fabry-Perot type)

BY LIGHT INTERFERENCE (E.G., INTERFEROMETERS)
353 .With shearing
354 .With wavefront division (e.g., by diffraction)
355 ..For dimensional measurement (e.g., thickness)
356 ...Of displacement or distance
357 .For dimensional measurement (e.g., thickness)
358 ..Of displacement or distance
359 .For optical configuration
360 ..With two light beams (e.g., Twyman-Green)
361 .For refractive indexing
362 ..With Schlieren effect
363 .For orientation and alignment
364 BY POLARIZED LIGHT EXAMINATION
365 .With birefringent element
366 .With polariscopes
367 ..Including polarimeters
368 ...With electro-optical light rotation
369 .Of surface reflection
370 .With light attenuation
371 FOR FLATNESS
121 LAMP BEAM DIRECTION OR PATTERN
122 .With lamp focusing
123 FOCAL POSITION OF LIGHT SOURCE
124 LENS OR REFLECTIVE IMAGE FORMER TESTING
124.5 .For optical transfer function
125 .Focal length measuring
126 ..Deflecting or interrupting optical path
127 .Optical center, cylinder axis, or prism measuring or determining
128 REFRACTION TESTING (E.G., REFRACTOMETERS)
129 .Schlieren effect
130 .Differential
131 ..With servo controlled optical member
132 ...Reflective optical member
133 .Refractive rod engages specimen
134 .Prism forming fluid specimen container
135 .Prism engaging specimen
136 ..Internally reflecting prism
137 ..Plural prisms
138 ANGLE MEASURING OR AXIAL ALIGNMENT
139 .Plural scales or different portions of same scale simultaneously observable
140 .Apex of angle at observing or detecting station
141 ..With light detector (e.g., photocell)
142 ..Scale and remote point simultaneously observable
143 ...Artificial reference
144 ..With plural images
145 ...Lines of sight relatively adjustable with two degrees of freedom
146 ...Two or more lines of sight deflected
147 ..Measurement in two planes (e.g., azimuth and elevation; hour angle and declination)
148 ..Artificial reference
149 ...Gyroscope or pendulum stabilized optical element
150 .Sides of angle or axes being aligned transverse to optical axis (e.g., drift meter)
151 ..With light pulsing or interrupting means
152 .With light detector (e.g., photocell)
153 .Alignment of axes nominally coaxial
154 .With screen
155 ..Wheel alignment
372 BY MENSURATION
373 .Of article displacement
374 ..Including moire' fringe generation
375 .Of position
376 .Of contour or profile
377 ..With curve readers
378 .Of cavities
379 .Of area or volume
380 ..By scanning
381 .Of thickness
382 ..Of light permeable material
383 .Of length
384 .Of width or diameter
385 ..Of moving object
386 ...By scanning or light interruption
387 ..By scanning or light interruption
388 BY CONFIGURATION COMPARISON
389 .With photosensitive film or plate
390 .With two images of single article compared
391 .With projection on viewing screen
392 ..For comparison with master or desired configuration
393 ...Having master or desired configuration projection
394 .With comparison to master, desired shape or reference voltage
395 .With relatively movable optical grids
396 .With scale or optical grid displaced relative to remote fiducial mark
397 .With object being compared and scale superimposed
398 .With object being compared and light beam moved relative to each other (e.g., scanning)
399 BY ALIGNMENT IN LATERAL DIRECTION
400 .With light detector (e.g., photocell)
401 .With registration indicia (e.g., scale)
402 BY SHADE OR COLOR
403 .With merging colors or patterns (e.g., Maxwell disc)
404 .Photography
405 .Tristimulus examination
406 .Trichromatic examination
407 .With sample responsive to plural colors applied simultaneously
408 .With sequential comparison of sample and standard
409 .Fluid color transmission examination
410 ..Of flowing liquids
411 ...With plural light detectors (e.g., photocells)
412 ..With ionic determination
413 ..With variable light path length
414 ..With color transmitting filter
415 ...Including liquid filter comparison
416 .With color transmitting filter
417 ..Included with sample excitation
418 ..Including rotating sequential filters
419 ..Including multicolor filters
420 ..Included with colored light sources
421 .With reflective multicolor chart or standard
422 ..Plate
423 ...Disk
424 ..Drum or endless tape
425 .With color determination by light intensity comparison
426 BY INSPECTION WITH AGITATION OR ROTATION
427 .Of container contents
428 .Of containers
429 BY MONITORING OF WEBS OR THREAD
430 .For flaws or imperfections
431 ..Including transverse scanning
432 FOR LIGHT TRANSMISSION OR ABSORPTION
433 .By comparison
434 ..Photoelectric (e.g., sequential viewing)
435 ...With plural detectors (e.g., simultaneous viewing)
436 .Of fluent material
437 ..Gas

FOR LIGHT TRANSMISSION OR ABSORPTION
.Of fluent material
..Gas
438 ...Exhaust, dust or smoke
439 ....Contained
440 ..With significant sample holder or supply
441 ..Having particles suspended in liquid
442 ...With light detector
443 .Of photographic film
444 ..With scanning, sweeping, or moving detector over film
445 OF LIGHT REFLECTION (E.G., GLASS)
446 .With diffusion
447 .With modulation (e.g., flicker beam)
448 .By comparison
213 PHOTOMETERS
214 .Pupillary
215 .Integrating
216 .Heat absorbing (e.g., radiometers)
217 .Modulating (e.g., flicker beam)
218 .Photoelectric
219 ..Simultaneous sighting and reading measurement
220 ..Multiple housings
221 ..Responsive to incident or back lighting
222 ..Plural detectors
223 ..Logarithmic
224 ..Multisensitivity range
225 ..With predetector light modifier (e.g., diaphragm)
226 ..Detector and indicator electrical coupling (e.g., amplifying or attenuating)
227 ..With particular indicator
228 ...Movable scale (e.g., calibrating)
229 .Comparison
230 ..With light standard
231 ...Variable incandescent standard
232 ...Standard movable
233 .With variable light aperture size
234 .Light absorbing
235 ..Absorber continuously variable (e.g., wedge)
236 .Integrating spheres
237 INSPECTION FOR FLAWS OR IMPERFECTIONS
238 .Cloth or thread inspection
239 .Passing light through a transparent or translucent article
240 ..Containers (e.g., bottles) or contents
241 .Bore inspection (e.g., borescopes)
242 THREAD COUNTING
243 STANDARDS
244 SAMPLE, SPECIMEN, OR STANDARD HOLDER OR SUPPORT (E.G., PLATES OR SLIDES)
245 .Cotton graders
246 .Fluid containers (e.g., cells or cuvettes)
247 FIDUCIAL INSTRUMENTS
248 .Artificial reference
249 ..Liquid surface (e.g., bubble level)
250 ..Pendular suspension of optical element or reticle
251 .Reticle lies outside viewing path
252 ..Reticle image transversely adjustable relative to optical axis
253 .Deflection of line of sight
254 ..Two or more deflections
255 ..By reflection
256 MISCELLANEOUS

CLASS 357 ACTIVE SOLID STATE DEVICES, E.G., TRANSISTORS, SOLID STATE DIODES

DECEMBER 1990

1	SIGNIFICANT BULK EFFECT
2	.Amorphous material
3	.Multivalley material (e.g., Gunn effect)
4	SIGNIFICANT THIN FILM
5	.Josephson junction
6	.Active insulator
7	SIGNIFICANT SEMICONDUCTOR POTENTIAL BARRIER
8	.Organic semiconductor
9	.Point contact barrier
10	.Semiconducting metal oxide material (e.g., zinc oxide)
11	.Selenium or tellurium semiconductor
12	.P/N tunnel junction (Esaki type)
13	.P/N breakdown junction (e.g., Zener, avalanche, punch through)
14	.P/N capacitive junction (e.g., varactor)
15	.Metal semiconductor junction (e.g., Schottky barrier)
16	.Heterojunction
17	.Light emitting junction (infrared to u.v.)
19	..Combined with light responsive device
20	.P/N junction of particular geometry
21	.Unijunction transistor (double base diode)
22	.Junction field effect (unipolar transistor)
23.1	.Insulated gate device
23.2	..Significant semiconductor chemical compound in bulk crystal (e.g., GaAs)
23.3	..Short channel device
23.4	...Vertical channel or double diffused transistor
23.5	..Variable threshold (e.g., MNOS, floating gate memory)
23.6	..Insulated gate capacitor or insulated gate transistor combined with capacitor (e.g., dynamic memory cell)
23.7	..Thin-film semiconductor (e.g., silicon on saphire)
23.8	..With means to increase breakdown voltage
23.9	..With self-aligned semiconductor PN juntion (e.g., silicon gate)
23.11	..With field oxide or channel stopper structure
23.12	..With permanent threshold adjustment (e.g., enhancement and depletion mode)
23.13	..With gate insulator breakdown protection means (e.g., gate protection diode)
23.14	..With multiple control electrodes, at least one of which is an insulated gate, or with distributed control electrode
23.15	..With uncommon gate insulator material
24	..Charge transfer device
25	.Responsive to nonelectrical external signals
26	..Pressure
27	..Magnetic field
28	..Heat
29	..Radiation
30	...Light (infrared to u.v.)
31	....Vidicons
32	...Matrix
33	.Two potential barriers
34	..Bipolar transistor
35	...Lateral transistor
36	...Multielement (e.g., multiemitter, tetrode)
37	..Three potential barriers
38	...Controlled rectifiers and Shockley diodes
39	....Bidirectional (e.g., Triacs, Diacs)
40	.Integrated chip
41	..Contains a field effect transistor
42	...Complementary
43	...And bipolar transistor
44	..Complementary
45	..Matrix and array
46	..Plural devices share common active region (e.g., Darlington type)
47	..Isolation means
48	...P/N junction
49	...Dielectric
50	...Combined P/N junction and dielectric isolation
51	..Combined with a passive device (e.g., resistor, capacitor, inductor)
52	.Surface effects (e.g., passivation, guard rings)
53	..Field relief
54	..Multiple dielectrics
55	.Discrete device with particular external geometry (e.g., grooves, holes)
56	..Mesa
57	.Negative resistance
58	.Intrinsic region (e.g., I, II N)
59	.Polycrystalline
60	.Crystallography
61	.Particular compound
62	..Copper sulfide
63	.Particular dopant
64	..Deep level
65	OHMIC CONTACTS OF PARTICULAR MATERIAL OR GEOMETRY
66	.Liquid bonding
67	.Composite material
68	.Geometrical shape
69	..Beam lead
70	..Lead frame
71	.Multiple layers
72	ENCAPSULATED
73	.In glass
74	COMBINED WITH HOUSING
75	.With plural discrete devices
76	..Diode stack or bridge
77	...Dry rectifier type
78	.With desiccant, getter, or gas
79	.With single discrete device held in place by pressure means
80	.With device mounted on insulating support
81	.With cooling (e.g., heat sinks)
82	..Fluid cooling
83	...Cryogenic
84	.With shield
85	MISCELLANEOUS

CLASS 358 PICTORIAL COMMUNICATION; TELEVISION

DECEMBER 1990

1	NATURAL COLOR TELEVISION
2	.Holography
3	.Stereoscopic
310	.Recording or reproducing
311	..Editing
312	..Fast, slow or stop reproducing
313	..Field, frame or line skipping
314	..Dropout detection or correction
315	..Signal amplitude level control
316	...Color component
317	....Color killer
318	....Usng reference signal
319	..Synchronization signal modification
320	..Time (e.g., phase or frequency) control
321	...Of relative transducer/record medium speed
322	....Disc
323	...Using recorded reference (e.g., pilot) signal
324	...Phase matching or color components to an external reference
325	....Using variable delay
326	....Color burst
327	..Recorder or reproducer fault condition compensation
328	...Crosstalk elimination
329	...Comb filtering
330	..Frequency modulation recording techniques
331	..Using diffraction technique or stripe filter
332	..Using photographic record
333	...With color signal in nonpictorial form
334	..Separately recorded primary color signals
10	.Monitoring, testing, or measuring
11	.Signal format conversion
12	.Transmission signal formatting
13	..Pulse code modulation
14	..Simultaneous and sequential signals
15	..Simultaneous signals
16	...Luminance plus dual-phase modulated color carrier
17	.Color synchronization
18	..Of line-sequential switch
19	..Using burst
20	...Specific burst separation circuit
21 R	.Specific signal processing circuitry
21 V	...Vertical interval test/reference signal use
22	..Special effects
23	..Modulator or demodulator
24	...For PAL signal
25	...Reference signal control or source
26	..Color killer
27	..Color signal amplitude control
28	..Hue control
29	..Color balance or temperature
30	..Matrixing or mixing
31	..Chrominance-luminance signal separation
32	..Gamma correction
33	..Blanking
34	..D.C. insertion
35	..Differential phase or amplitude distortion correction
36	..Noise elimination
37	..Signal enhancing
38	..Frequency response modification
39	..Luminance channel circuitry
40	..Chrominance channel circuitry
41	.Picture signal generators
42	..With moving color filters
43	..With one pick-up device supplying more than one color signal
44	...Single photosensitive device
45	....With indexing
46	.....Including conductive grid at target
47	....Frequency separable signals
48	....Color signals at separate output terminals
49	....Separate complete images on face of photosensitive device
50	..With more than one pick-up device; each supplying only one color signal
51	...Misregistration correction
52	...Having four photosensitive devices
53	..Using mechanical-optical scanning means only
54	..Motion picture film scanning
55	..Optics
56	.Picture display
57	..Red-white phenomena
58	..With moving color filters
59	..Electroluminescent or solid state
60	..Projection device
61	...Using birefringent or polarizing medium
62	...Using deformable medium
63	...Using mechanical-optical scanning means only
64	..Using cathode ray tube
65	...Using separate electron beams in a single tube
66	...Using the same electron beam for more than one color
67	....With beam position indicating means
68	.....Horizontal stripes
69	.....Photoelectric sensor
70	.....Secondary emission sensor
71	....With electron-optical color selection
72	....With beam energy determining color
73	.....With variable depth of penetration of electron beam into the luminescent layer
74	....Beam intensity or ultor supply control
75	NATURAL COLOR FACSIMILE
76	.Color photography previewers
77	.Size variation
78	.Intermediate storage of signals
79	.Black signal synthesis
80	.Color correction
81	PSEUDO COLOR
82	.With conventional color television receiver
83	TELEVISION
84	.Audience survey and use accounting
85	.Telephone-television system and apparatus
86	.Wired broadcasting and distribution
87	.Panoramic
88	.Stereoscopic
89	..Pseudo
90	..Holographic
91	..Separate views on same channel
92	...Alternately transmitted
93	.Including structure dictated by use
94	..Aid for the blind
95	..Back scatter reduction
96	..Contour generator
97	..Combined television and motion picture
98	..Endoscope
99	..Underwater
100	..Hazardous or inaccessible
101	..Manufacturing
102	..Film, disc, or card retrieval
103	..Navigation
104	..Simulator
105	..Motion detector
106	..Flaw detector
107	..Measurement
108	..Surveillance

	TELEVISION
	.Including structure dictated by use
	..Surveillance
109	...Aerial viewing
110	.Responsive to nonvisible energy
111	..X-ray
112	..Sonic or ultrasonic
113	..Infrared
349	.Use or access blocking (e.g., locking switch)
125	.Camera tracking
126	..Using tracking gate
335	.Recording or reproducing television
336	..Noise pulse or dropout detection or correction
337	..Time (e.g., phase or frequency) control
338	...Of relative transducer/record medium speed
339	...Digital techniques
340	..Noise (e.g., crosstalk) reduction
341	..Separately recorded audio and video
342	..With disc
343	..Audio and video multiplexed onto same track
344	..With thermoplastic record
345	..With photographic record
346	...Recording at different frame rate
347	...Using laser or electron beam
348	...With record moving continuously
133	.Bandwidth reduction of signal
134	..Fast in-slow out
135	..Difference transmission
136	...Between fields or frames
137	..Scan rate variation
138	..Sampling
139	.Monitoring, testing, or measuring
140	.Standards or scan conversion
141	.Transmission signal formatting
142	..For transmission of more than one information signal
143	...Including sound
144	....Stereo sound
145	....During sync or blanking intervals
146	...Sequentially over the same band
147	....In blanking or sync periods
148	.Synchronization
149	..Remote-local lock in
150	..Generation of sync signals
151	...Means on video signal generator
152	..To achieve interlace scanning
153	..Sync separation
154	...Vertical from horizontal
155	...Noise reduction
156	....Amplitude limiting
157	....Noise inversion
158	..Automatic frequency control
159	...Sync signal compared with sawtooth derived from oscillator
160	.Specific processing circuitry
161	..Control dependent on ambient light
162	..Aperture correction
163	..Shading or black spot correction
164	..Gamma correction
165	..Picture blanking or sound muting
166	..Signal enhancing
167	..Noise elimination
168	..Brightness control (auto and manual)
169	..Contrast control (auto and manual)
170	..White limiter
171	..D.C. insertion
172	...Keyed clamp
173	...Diode
174	...Automatic gain control
175	...Carrier envelope
176	...Sync or blanking responsive
177	....Noise reduction or elimination
178	....Keyed
179	...Delayed AGC
180	..Sweep expansion or reduction
181	..Switching
182	..Dissolves or fades
183	..Wipes or inserts
184	..Amplifiers
185	.Studio equipment
186	.Transmitter circuitry
187	..To suppress echo
188	.Receiver circuitry
189	..TV receiver adapted to receive radio broadcast or in combination with radio receiver
190	..Power supply
191.1	..Tuning
192.1	...With indicator
193.1	...Search tuning
194.1	..Remote control
195.1	..Automatic frequency control
196	..Sound traps
197	..Intercarrier circuit
198	..Sound circuit
199	.Mechanical - optical scanning
200	..With fiber optics
201	..By acoustic wave
202	..Moving aperture
203	...Drum or belt
204	...Multiple scanning elements
205	..Moving lens or refractor
206	..Moving reflector
207	...Helical element
208	...Vibrating or oscillating
209	.Picture signal generator
210	..Remote control of generator
211	..Low light level
213.11	..Scanned solid state devices
213.12	...Junction field effect sensor (e.g., static induction)
213.13	...Having specific optical feature (e.g., shutter-readout coordination, viewfinder)
213.15	...Noise reduction or defect correction
213.16	....Dark current or temperature compensation
213.17	....With defective pixel compensation
213.18	....Transient or fixed pattern signal reduction (e.g., flicker, spike, grain)
213.19	....Blooming reduction or light level control (e.g., exposure control)
213.22	...Having particular interlacing feature
213.23	...Including charge transfer device
213.24	....Smear reduction
213.25	....Frame transfer
213.26	....Readout feature
213.27	...Readout enhancement
213.28	....Increased resolution
213.29	....Having shift register-sensor relationship
213.31	....Having specific biasing or pulsing feature
212	..Array of photocells
214	..Motion picture film scanner
215	...Intermittent film movement
216	...With modification of scanner sweep
217	..Cathode ray tube
218	...Automatic beam focusing
219	...Automatic beam current or sensitivity control
220	...Burn-in prevention
221	...Dark current compensation
222	...Image stabilization
223	...Remanent image erasure
224	...Viewfinder
225	..Optics
226	...Optical multiplexing
227	...Focus control
228	...Automatic iris control

	TELEVISION
	.Picture signal generator
229	..Support or housing
230	.Picture reproducer
231	..Projection device
232	...Kerr cell, polarizing
233	...Deformable medium
234	....Specific composition of medium
235	...Acoustic
236	...Alterable transmissivity
237	...Cathode ray tube as light source
238	....With concave mirror
239	.....With correcting plate
240	..Array of lamps
241	..Scanned solid state device
242	..Cathode ray tube
243	...Excess beam current or ultor voltage control
244	...With means to photograph displayed image
244.1	....Recording at different frame rate
244.2	....With record moving continuously
245	...Protective device
246	....Tensioned metal band
247	....Protective glass or panel
248	...Support
249	....Adjustable
250	...Optics
251	....For line elimination
252	....Glare reduction
253	....Filters
254	..Cabinet or chassis
255	...With light shield
400	FACSIMILE
401	.Image reproduction system
402	.Electronic mailbox
403	.Document filing and retrieval system
404	.Facsimile memory monitoring
405	.Image transmission accuracy verification
406	.Facsimile measuring, testing or calibrating
407	.Facsimile relay system
408	.Plural scanner station
409	.Synchronization
410	..Sync or phase pulse generator
411	..Facsimile carrier as synchronization signal
412	..Phase or speed regulation
413	...Start-stop
414	...With particular clutch mechanism
415	...With pendulum
416	...With tuning fork
417	...With strobe
418	...With movable phase shifter
419	...Receiver motor power transmitted from transmitter
420	...Receiver motor power source frequency change
421	...Receiver motor power source voltage change
422	...Receiver motor power source interruption
423	...With resistance variable in receiver motor power source
424	...Stylus
425	.Multiplex
426	.Time or bandwidth compression
261.1	..Run length encoding
261.2	...Predictive or adaptive encoding
261.3	...Two dimensional encoding
427	...Using Huffman code
261.4	...Having adressable memory
262.1	..Two level to three level
428	..Interpolation
429	..Halftone or grey level processing
430	..Adaptive or predictive
431	..Fill bits or dummy signal
432	..Two dimensional or orthogonal
433	...Block
434	.Auxiliary signal
435	..Transmitter and receiver both supply auxiliary signals
436	...Auxiliary signal controls apparatus at both transmitter and receiver
437	..Interruption detection and control
438	..Transmitter supplies auxiliary signal (s)
439	..Receiver supplies auxiliary signal (s)
440	..Telephone number or address of designator
441	..Facsimile alarm
442	.Facsimile system interface
443	.Specific signal processing circuitry
444	..Memory interface
445	..Signal sampling and conversion
446	..Signal voltage or gain control
447	..Signal enhancing
448	..Image processing
449	...Document size detection
450	...Plural images combined into a single image
451	...Picture size conversion
452	...Image editing
453	...Image portion selection
454	...Moire effect elimination
455	...Gray level processing
456	....Halftone
457	.....Dither matrix
458	.....Gradation or spatial processing
459	.....Variable halftone dot shape or size
460	.....Addressable storage
461	....Shade correction
462	...Text and image detection and processing
463	...Noise elimination
464	...To distinguish intelligence from background
465	...Picture signal thresholding
466	....Variable thresholding technique
467	...Image classification and coding
468	..Facsimile control unit
469	..Carrier wave modulation
470	.Coded character
471	.Picture signal generator
472	..Combined read and write head
473	..Hand held reader
474	..Scanning
475	...Facsimile illumination control
476	...Transceiver
477	...Nonlight
478	....Stylus type
479	...Facsimile video
480	...Coherent light
481	....Including polygon reflector
482	...Solid state
483	....Charge coupled device
484	...Fiber optics or optical waveguides
485	...Cathode ray tube
486	...Scan rate or document movement variation in accordance with data presence
487	...Facsimile transparency image scanning
488	...Document position detection
489	...Helical scanning pattern
490	....Transparent drum
491	.....Internal scan
492	....Specified sheet clamp
493	...Curved scanning surface
494	...Linear scanning pattern
495	....Spiral or helix aperture with linear aperture
496	....Document moves during scanning
497	....Scanning element moves relative to a flat stationary document
498	...Document feed

FACSIMILE
296 .Recording apparatus
297 ..Ablative
298 ..Halftone
299 ...Engraving
300 ..Electrostatic or electrolytic
301 ..Magnetic
302 ..Photographic
303 ..Pressure (e.g., on carbon paper)
304 ..With paper cutter

CLASS 360 DYNAMIC MAGNETIC INFORMATION STORAGE OR RETRIEVAL

DECEMBER 1990

CLASS 360 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 369 (AFTER SUBCLASS 18) AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 369.

1 RECORDING ON OR REPRODUCING FROM AN ELEMENT OF DIVERSE UTILITY
2 .Card
3 .Motion picture film
4 MANUAL INPUT RECORDING
5 RECORDING FOR SELECTIVE RETENTION OF A SPECIAL OCCURRENCE
6 RECORDING COMBINED WITH METERING OR SENSING
7 RECORDING FOR MONETARY DELAY OF AN ANALOG SIGNAL
8 RECORDING FOR CHANGING DURATION, FREQUENCY OR REDUNDANT CONTENT OF AN ANALOG SIGNAL
9.1 .Television signal
10.1 ..Fast, slow or stop reproducing
10.2 ...Scan locus or tracking control
10.3 ...Tape
11.1 ..Field or frame skipping
12 RECORDING OR REPRODUCING FOR AUTOMATIC ANNOUNCING
13 RECORD EDITING
14.1 .Television
14.2 ..Control track
14.3 ...Numerical code
15 RECORD COPYING
16 .Contact transfer
17 ..With magnetic bias
18 RECORDING OR REPRODUCING PLURAL INFORMATION SIGNALS ON THE SAME TRACK
19.1 .Audio and video
20 .Frequency multiplex
21 .Head gap azimuth multiplex
22 SPLITTING ONE INFORMATION SIGNAL FOR RECORDING ON PLURAL DISTINCT TRACKS OR REPRODUCING SUCH SIGNAL
23 .Time division
24 SPLITTING, PROCESSING AND RECOMBINING ONE INFORMATION SIGNAL FOR RECORDING OR REPRODUCING ON THE SAME TRACK
25 CHECKING RECORD CHARACTERISTICS OR MODIFYING RECORDING SIGNAL FOR CHARACTERISTIC COMPENSATION
26 ELECTRONICALLY CORRECTING PHASING ERRORS BETWEEN RELATED INFORMATION SIGNALS
27 RECORDING OR REPRODUCING AN INFORMATION SIGNAL AND A CONTROL SIGNAL FOR CONTROLLING ELECTRONICS OF REPRODUCER
28 .Reference carrier to control demodulator
29 MODULATING OR DEMODULATING
30 .Frequency
31 MONITORING OR TESTING THE PROGRESS OF RECORDING
32 CONVERTING AN ANALOG SIGNAL TO DIGITAL FORM FOR RECORDING; REPRODUCING AND RECONVERTING
33.1 GENERAL PROCESSING OF A TELEVISION SIGNAL
34.1 .Inverting polarity of alternate periods
35.1 .Single field or frame recording
36.1 .Time correction
36.2 ..Digital techniques
37.1 .Synchronization signal modifying
38.1 .Drop-out correction
39 GENERAL PROCESSING OF A DIGITAL SIGNAL
40 .In specific code or form
41 ..Nonreturn to zero
42 ..Phase code
43 ..Milti-frequency
44 ..Intra-cell transition
45 .Pulse crowding correction
46 .Head amplifier circuit
47 .Redundant or complimentary tracks
48 .Data in specific format
49 .Address coding
50 .Inter-record gap processing
51 .Data clocking
52 ..With incremental movement between record and head
53 .Data verification
54 .Data recirculation
55 GENERAL RECORDING OR REPRODUCING
57 .Selective erase recording
58 .Boundary displacement recording or transducers
59 .Thermomagnetic recording or transducers
60 .Recording-or erasing-prevention
61 .Signal switching
62 ..Record-reproduce
63 ..Between plural stationary heads
64 ..Between heads in alternate engagement with medium
65 .Specific of equalizing
66 .Specifics of biasing or erasing
67 .Specifics of the amplifier
68 ..Recording amplifier
69 AUTOMATIC CONTROL OF A RECORDER MECHANISM
70 .Synchronizing moving-head moving-record recorders
71 .Controlling the record
72.1 ..Locating specific areas
72.2 ...Responsive to recorded address
72.3 ...Responsive to tape transport
73.01 ..Speed
73.02 ...Control of relative speed between carriers
73.03 ...Rotary carrier
73.04 ...Linear carrier
73.05 ....Plural speed transport
73.06 .....Automatic change between fixed speeds
73.07 .....Automatic selection of carrier or track speed
73.08 .....Variable speed
73.09 ....Constant speed
73.11 .....By reproduced control signal and transport derived signal
73.12 .....By reproduced control signal
73.13 ......From separate track
73.14 .....By signal derived from transport
74.1 ..Stopping or reversing
74.2 ...Responsive to reel rotation
74.3 ...Responsive to tape tension
74.4 ...Responsive to magnetic recorded signals
74.5 ...Responsive to physical property of record
74.6 ....Photoelectric
74.7 ....Conductive
75 .Controlling the head
76 ..Azimuth or skew
77.01 ..Track centering
77.02 ...Rotary carrier
77.03 ....By nonmagnetic sensing (e.g., optical, capacitive)
77.04 ....By memory storage of repeatable error or correction
77.05 ....By servo signal component from carrier surface separate from information signal bearing surface
77.06 ....Reproduced data signal used for tracking
77.07 ....By tracking signal recorded on or immediately beneath surface

	AUTOMATIC CONTROL OF A RECORDER MECHANISM
	.Controlling the head
	..Track centering
	...Rotary carrier
	....By tracking signal recorded on or immediately beneath surface
77.08	.....Distinct servo sector
77.11	.....Continuous servo signal
77.12	...Elongate web carrier (i.e., tape)
77.13	....Transverse scan path
77.14	.....By pilot signal
77.15	......Plural pilot signals along single transverse path
77.16	.....Having head deflection drive (e.g., piezoelectric bimorph)
77.17	......Dithering
78.01	..Track changing
78.02	...Tape
78.03	....Plural tapes
78.04	...For rotary carrier (e.g., disc)
78.05	....Coarse and fine head drive motors
78.06	....Specified velocity pattern during access
78.07	.....Controlled by memory device
78.08	....Specified spatial pattern during access
78.09	....Including model of servo system or element
78.11	....Including nonmagnetic position sensing
78.12	....Including particular head actuator
78.13	.....Stepping motor
78.14	....By recorded servo reference or address signal
78.15	....Drum
79	RECORDER CONTROL OF AN EXTERNAL DEVICE
80	.Slide or movie projectors
81	RECORD TRANSPORT WITH HEAD MOVING DURING TRANSDUCING
82	.Belt record
83	.Tape record
84	..Rotating head
85	...Tape in container
86	.Disk record
87	.Drum record
88	RECORD TRANSPORT WITH HEAD STATIONARY DURING TRANSDUCING
89	.Wire record
90	.Tape record
91	..Plural tapes
92	...Tape in container
93	..Tape in container
94	...Transport accommodates different types
95	...With tape extraction
96.1	...Plural reels
96.2	....With dual capstan drive
96.3	....Reel drive details
96.4	.....With common capstan drive
96.5	....Container mounting details
96.6	.....With pivotal holder
97.01	.Disk record
97.02	..Environmental control (e.g., air filter, temperature control)
97.03	...Plural disks
97.04	...Flexible disk
98.01	..Plural disks
98.02	...Axially fixed flexible disks
98.03	....With pneumatic partioning of disks
98.04	...Changer
98.05	....Control detail
98.06	....Mechanical detail
98.07	...Rotational drive detail
98.08	...Seating of disks
99.01	..Flexible disk
99.02	...Loading or ejecting mechanism
99.03	....Motorized
99.04	...Rotational drive detail
99.05	...Disk seating
99.06	..Loading or ejecting mechanism
99.07	...Motorized
99.08	..Rotational drive detail
99.09	...Movable drive

130.24	......Head drum details
130.3	..Pressure element
130.31	...Tape record
130.32	....Element mounting details
130.33	....Element in tape container
130.34	...Disc record
131	RECORD MEDIUM
132	.In container
133	..For disk
134	.Tape
135	.Disk
136	.Drum
137	MISCELLANEOUS

1 SAFETY AND PROTECTION OF SYSTEMS AND DEVICES
2 .Arc suppression at switching point (i.e., includes solid state switch)
3 ..Synchronized or sequential opening or closing
4 ...Counter electromotive force
5 ...With current sensitive control circuit
6 ...With voltage sensitive control circuit
7 ...With combined voltage and current sensitive control circuit
8 ...Shunt bypass
9 ....With sequentially inserted impedance
10 ..By inserting series impedance
11 ...Nonlinear impedance
12 ...By arc stretching (e.g., horn gap)
13 ..Shunt bypass of main switch
14 ..Arc blowout for main breaker contact (e.g., electromagnet, gas, fluid, etc.)
15 .Capacitor protection
16 ..Series connected capacitors
17 ..Shunt connected capacitors
18 .Voltage regulator protective circuits
19 .Superconductor protective circuits
20 .Generator protective circuits
21 ..Voltage responsive
22 .Compressor protective circuits
23 .Motor protective condition responsive circuits
24 ..Current and temperature
25 ..Motor temperature
26 ...With bimetallic sensor
27 ...With thermistor sensor
28 ..With time delay
29 ...During energization of motor
30 ..Current and voltage
31 ..Current
32 ...Bimetallic element
33 ..Voltage
34 ...Bimetallic element
35 .Transformer protection
36 ..With differential sensing means
37 ..With temperature or pressure sensing means
38 ..Transformer with structurally combined protective device
39 ..With lightning arrester and fuse
40 ...With lightning arrester (e.g., spark gap)
41 ...With fuse
42 .Ground fault protection
43 ..Fault suppression (e.g., Petersen coil)
44 ..With differential sensing in a polyphase system
45 ..With differential sensing in a single phase system
46 ...With more than two wires
47 ..In a polyphase system
48 ...With more than three wires
49 ...In a single phase system
50 ...With more than two wires
51 .Overspeed responsive
52 .By regulating source or load (e.g., generator field killed)
53 ..Prime mover control
54 .Load shunting by fault responsive means (e.g., crowbar circuit)
55 ..Disconnect after shunting
56 ..Voltage responsive
57 ..Current responsive
58 .Impedance insertion
59 .Circuit automatically reconnected only after the fault is cleared
60 ..With differential voltage comparison across the circuit interrupting means
61 ..Reclosing of the nonfaulty phases of a polyphase system
62 .Feeder protection in distribution networks
63 ..With current responsive fault sensor
64 ...With communication between feeder disconnect points
65 ..With current and voltage responsive fault sensors
66 ...With communication between feeder disconnect points
67 .Series connected sections with faulty section disconnect
68 ..With communication between disconnect points
69 ...Pilot wire communication
70 ..Constant current system
71 .Automatic reclosing
72 ..With lockout means
73 ...Including timer reset before lockout
74 ..Continuous
75 ...With time delay before reclosing
76 .With phase sequence network analyzer
77 .Reverse phase responsive
78 .With specific quantity comparison means
79 ..Voltage and current
80 ...Distance relaying
81 ....With communication means between disconnect points
82 ...Reverse energy responsive (e.g., directional)
83 ...With time delay protective means
84 ..Reverse energy responsive (e.g., directional)
85 ..Phase
86 ..Voltage
87 ..Current
88 .With specific voltage responsive fault sensor
89 ..With time delay protective means
90 ..Overvoltage and undervoltage
91 ..Overvoltage
92 ..Undervoltage
93 .With specific current responsive fault sensor
94 ..With time delay protective means
95 ...With instantaneous override
96 ....With multiple timing characteristics (e.g., short, long)
97 ...With multiple timing characteristics
98 ...Transistorized
99 ...Combined thermal-electromagnetic relay
100 ..With semiconductor circuit interrupter (e.g., SCR, Triac, Tunnel Diode, etc.)
101 ...With transistor circuit interrupter
102 ...With mechanical circuit breaker
103 .Circuit interruption by thermal sensing
104 ..With fuse
105 ..With bimetallic element
106 ..With thermistor
107 .With specific transmission line (e.g., guarded)
108 ..Plural conductors in single sheath (e.g., compound)
109 .Too large fault makes breaker inoperative
110 .Transient nonresponsive (e.g., ignores surge on transmission line)
111 .Transient responsive
112 .With space discharge means
113 .With tuned circuit
114 .With manual or automatic opening of breaker and manual reclose

	SAFETY AND PROTECTION OF SYSTEMS AND DEVICES
115	.With specific circuit breaker or control structure
116	..Pneumatically operated circuit breaker
117	.High voltage dissipation (e.g., lightning arrester)
118	..Surge prevention (e.g., choke coil)
119	...In communication systems
120	..Vacuum or gas filled space discharge
121	..Fluid (e.g., mercury, quenching)
122	...Electrolytic
123	...Gas blast
124	..Thermal (e.g., fusible, bimetallic)
125	...With cutout (e.g., blowout type)
126	..Current limiting material in discharge path
127	...Nonlinear material (e.g., valve type)
128	....With plural gaps in discharge path
129	..Plural gaps with common electrode
130	..Plural gaps serially connected
131	..Combined (e.g., with disconnect switch)
132	...With line supporting insulator
133	..With magnetic means (e.g., electro-magnet)
134	...Arc stretching (e.g., blowout)
135	....By separating contacts
136	...For grounding line
137	..Horn gap
138	...With resistance insertion
139	CONTROL CIRCUITS FOR ELECTRO-MAGNETIC DEVICES
140	.Including compensation for thermal change of electromagnetic device
141	.Including superconductivity
142	.Including housing
143	.Systems for magnetizing, demagnetizing, or controlling the magnetic field
144	..For lifting or holding
145	...Magnetic chuck type
146	..Systems for magnetic field stabilization or compensation
147	..With permanent magnet
148	...Calibration or permanent magnet
149	..Demagnetizing
150	...Television degaussing
151	...Magnetic tape
152	...Including particular drive circuit
153	...Pulse initiated
154	...Including means to establish plural distinct current levels (e.g., high, low
155	....With capacitor charging or discharging through coil
156	...With capacitor charging or discharging through coil
157	.Including instrument (e.g., meter-relay)
158	..Temperature indicating instrument
159	.Including means for using, or compensating for, the induced EMF of the electromagnetic device
160	.For relays or solenoids
161	..Including thermal device
162	...Thermoelectric
163	...Bimetallic element
164	....Including heater
165	...Thermistor
166	..Plural relays or solenoids sequentially operated
167	...Alternately operated
168.1	...Pulse responsive
169.1	....Including electronic element
170	..Condition responsive (e.g., external circuit condition)
171	...Code responsive
172	....Including electronic element
173	...Light
174	....Light sensor controls its light path
175	....Including electronic element
176	.....Plural light sensors
177	....Plural light sensors
178	...Fluid (e.g., liquid level, humidity)
179	...Proximity or contact
180	....Metal presence or absence responsive
181	....Capacitance change type
182	...Frequency (e.g., audio, radio, remote control link)
183	....Plural relays or solenoids as loads
184	....Specific frequency responsive relay
185	...Phase
186	...Pulse
187	...Voltage or current level discriminators
188	...Variable impedance
189	..Plural switches in control circuit
190	...Including electronic switch
191	..Plural relay or solenoid load selectively operated
192	...Including interlock
193	....Electronic interlock
194	..Holding means
195	..Time delay
196	...Including semiconductor device connected to timing element
197	....Threshold device (e.g., Zener, Schockley diode)
198	.....Including three or more electrodes (e.g., unijunction)
199	...Including electric discharge device
200	....Threshold device (neon tube)
201	.....Including thyratron
202	...Electromechanical delay means
203	..With oscillator
204	..With magnetic amplifier or saturable reactor
205	..Threshold device (e.g., SCR, thyratron)
206	..Particular relay or solenoid
207	...Electrostatic
208	...Polarized
209	...Alternating current type
210	...Plural coils
211	CONTROL CIRCUITS FOR NONELECTRO-MAGNETIC TYPE RELAY (E.G., THERMAL RELAYS)
212	DISCHARGING OR PREVENTING ACCUMULATION OF ELECTRIC OF ELECTRIC CHARGE (E.G., STATIC ELECTRICITY)
213	.By charged gas irradiation
214	.Of paper or paper handling machine
215	.Of storage or hazardous area or fluid handling
216	.Structurally combined with building or vehicle
217	..With external structure of vehicle
218	...Aircraft
219	...Chain-type grounding means
220	.Specific conduction means or dissipator
221	..Brush or roller-type structure
222	..Rod-type structure
223	..Shoe type
224	...Integral with shoe
225	ELECTRIC CHARGING OF OBJECTS OR MATERIALS
226	.Particulate matter (e.g., liquids with suspended particles)
227	..For spray production
228	...Liquid type
229	.By charged gas irradiation
230	ELECTRIC CHARGE GENERATING OR CONDUCTING MEANS (E.G., CHARGING OF GASES)
231	.Modification of environmental electric charge
232	.For application to living beings

ELECTRIC CHARGE GENERATING OR CONDUCTING MEANS (E.G., CHARGING OF GASES)
233 .Use of forces of electric charge or field
234 ..Pinning
235 .With specific power supply
236 ELECTRICAL SPEED SIGNAL PROCESSING SYSTEMS
237 .With centrifugal weight means
238 .Antislip detection and circuitry
239 .With speed analog electrical signal
240 .Including frequency generators
241 .Two position (e.g., on-off)
242 .With speed comparison
243 .Synchronization of shafts
244 ..Phase comparison
245 POLARITY REVERSING
246 .Automatic
247 IGNITING SYSTEMS
248 .For explosive devices
249 ..With sequential firing by electronic switching
250 ..With sequential firing by mechanical switching
251 ..With capacitor discharging into explosive device
252 ..With electromechanical power source
253 .For electric spark ignition
254 ..With electromagnet control means
255 ...Including spark electrode make-break
256 ..With capacitor discharging into sparking transformer
257 ..With capacitor discharge into spark gap
258 ..With electromechanical generator
259 ...With permanent magnet
260 ...With piezoelectric element
261 ..With mechanical arrangement for spark electrode make-break
262 ..With one spark electrode which is hand held
263 ..With spark coil or transformer
264 .For incandescent ignition
265 ..With electromagnet control means
266 ..With helical heating element
267 DEMAGNETIZING SYSTEMS AND PROCESSES
268 TRANSFORMERS AND INDUCTORS WITH INTEGRAL SWITCH, CAPACITOR OR LOCK (E.G., IGNITION COIL)
269 .With lock for preventing unauthorized use
270 .With capacitor element
271 ELECTROSTATIC CAPACITORS
272 .With protection or compensating means
273 ..Self-healing
274 ..Temperature
275 ..Electrical (e.g., fuses, etc.)
276 .Cryogenic
277 .Variable
278 ..With significant electrode or terminal feature
279 ..Gas or vacuum dielectric
280 ..Responsive to external condition
281 ...Electrical
282 ...Thermal
283 ...Pressure
284 ...Liquid level
285 ...Fluid flow
286 ...Humidity
287 ..Mechanically variable
288 ...Push button
289 ...Motor driven
290 ...By varying distance between electrodes
291 ....Compression type
292 ...By varying effective area of electrode
293 ....Disk trimmer
294 ....Direct travel piston type
295 ....Piston trimmer
296 ....Sliding plates
297 ....Spiral or helical plates
298 ....Rotary plates
299 .....Plural capacitors
300 ...With controlling or indicating means
301 .Fixed capacitor
302 ..Feed through
303 ..Significant electrode feature
304 ...Nonself-supporting electrodes
305 ...Material
306 ..Significant electrical connection means (e.g., terminal or lead)
307 ...Lead extends into body of capacitor
308 ...Lead attached to edge of capacitor
309 ....Metallized terminal
310 ...Lead extends around at least a portion of capacitor
311 ..Solid dielectric
312 ...Plural dielectrics
313 ....Layered
314 ....Impregnated
315 .....With specific impregnant
316 ......Including wax
317 ......Including halogen (e.g., chlorinated)
318 ....With stabilizer or modifying substance
319 .....With stabilizer or modifying substance
320 ....Ceramic and glass
321 ...Ceramic, glass, or oxide particles
322 ....Oxide film
323 ...Plastic
324 ...Fibrous or fabric (e.g., paper, etc.)
325 ...Mica
326 ..Vacuum or gas dielectric
327 ..Liquid dielectric
328 ..Multiple capacitors
329 ...Distinct physically
330 ...Shared electrode
331 HOUSINGS AND MOUNTING ASSEMBLIES WITH PLURAL DIVERSE ELECTRICAL COMPONENTS
332 .For electrical power distribution systems and devices
333 ..Distribution station (substation)
334 ..Distribution or control unit
335 ..Electrical switchgear
336 ...Draw-out type (truck type)
337 ....With interlock
338 ...Drawer type
339 ....With interlock
340 ...Pivoted support means
341 ...Busbar arrangements
342 ....With plural removable control units in housing
343 ...With interlock
344 ....Door or cover type
345 ....Shutter type
346 ..Distribution or control panel boards
347 ...With switches and fuses
348 ....Unit block
349 ...With fuses
350 ...With switches
351 ....With switch actuating arrangements
352 ...Plugboards
353 ...With circuit breaker arrangements
354 ....With discriminating means
355 ...Busbar or conductor arrangements
356 ..Electric service distribution boxes
357 ...With switch or fuse
358 ...Including panel board
359 ....Adjustable panel
360 ....With switch or fuse
361 ....Busbar arrangements
362 ....Panel board corner mountings

HOUSINGS AND MOUNTING ASSEMBLIES WITH PLURAL DIVERSE ELECTRICAL COMPONENTS
.For electrical power distribution systems and devices
..Electric service distribution boxes
...Including panel board
363 ....Circuit breaker supporting arrangements
364 ..For electricity service meter
365 ...Plural meters
366 ...With meter circuit controller
367 ....Bypass arrangement
368 ....With transformer or circuit breaker
369 ...Meter mounting arrangements
370 ....Adaptable meter supports
371 ....Retractable or detachable meter support
372 ...Meter terminal and connector arrangements
373 ....Terminal block
374 ....Contact blade receiving structure
375 ....Adjustable or adaptable contacts
376 ..Circuit breaker supporting means (attaching, mounting)
377 ..For ballast elements
378 ..Bus duct
379 ..With cooling means
380 .For electronic systems and devices
381 ..With cooling means
382 ...Fluid
383 ....Air
384 .....With air circulating means
385 .....Liquid
386 ...Thermal conduction
387 ....By specific coating
388 ....Through support means
389 ....Through component housing
390 ..Cabinet-type housing
391 ...With retractable or readily detachable chassis
392 ..Module
393 ...Plural modules
394 ....With housing
395 ...With printed circuits
396 ...Cordwood type
397 ..Printed circuit board
398 ...Flexible board
399 ...With housing or chassis
400 ...Connection of components to board
401 ....Component within printed circuit board
402 ....By direct coating of components on board
403 ....With mounting pad
404 ....With specific lead configuration
405 .....Shaped lead on components
406 .....Shaped lead on board
407 .....Busbar
408 .....Flexible connecting lead
409 ....By specific pattern on board
410 .....Cross-connected
411 .....Witn specific material
412 ...Plural printed circuit boards
413 ....With separable connector or socket means
414 ....Plural contiguous boards
415 ....With housing or chassias
416 ..Matrix assembly
417 ..Component mounting or support means
418 ...Mounting pad
419 ..With discrete structure or support
420 ..Plural mountings or supports
421 .Lead frame
422 .Radio type
423 ..Tube mountings
424 .Shielding
425 .Contact banks
426 .Terminal blocks
427 .Support brackets
428 .Wire distribution (e.g., harness, rack)
429 .Frame
430 .Fuse block
431 ..Plural fuse blocks
432 .Fuse pullout device
500 ELECTROLYTIC SYSTEMS OR DEVICES
501 .Coulometer (i.e., electrochemical timer)
502 .Double layer electrolytic capacitor
503 .Liquid electrolytic capacitor
504 ..With significant electrolyte
505 ...Salt solute
506 ...Ethylene glycol
507 ...With depolarizer
508 ..Anode type electrode
509 ...Aluminum or tantalum
510 ...Anode riser
511 ...Wound
512 ....With separator
513 ....With mounting means (e.g., anchoring means or clamping)
514 ....With heat conductor (e.g., heat sink)
515 ....With common conductor (e.g., stripline)
516 ..Cathode type electrode (e.g., cathode casing)
517 ..Casing
518 ...With hermetic seal
519 ...With header, cover or endseal
520 ....Significant electrical connection means (e.g., terminals or leads)
521 ...With vent means
522 ..Multiple capacitors
523 .Solid electrolytic capacitor (e.g., dry electrolytic capacitor)
524 ..Dielectric
525 ..With significant electrolyte or semiconductor
526 ...Paste or gel
527 ...Organic salt (e.g., TCNQ)
528 ..Anode type electrode
529 ...Aluminum or tantalum
530 ...Wound
531 ....With lead conductor
532 ..Cathode type electrode
533 ...With significant lead
534 ..With protection means
535 ..Casing
536 ...With hermetic seal
537 ...With header, cover or endseal
538 ....Significant electrical connection means (e.g., terminals or leads)
539 ....With potting
540 ..With terminal
541 ..Multiple capacitors
434 .Systems (e.g., plural cells, standby exciting voltage)
435 .Current interruption type (e.g., circuit breaker, D.C.-to-pulse converters)
436 .Rectifiers
437 MISCELLANEOUS

CLASS 362 ILLUMINATION

DECEMBER 1990

1 DAYLIGHT LIGHTING
2 .Including selected wavelength modifier (e.g., filter)
3 PHOTOGRAPHIC LIGHTING
4 .Light responsive
5 .Measuring or indicating
6 .Heat responsive or control
7 .Convertible
8 .Combined
9 ..With battery support means
10 .Safety or interlocks
11 .Plural light sources or light source supports
12 ..Diverse type or size
13 ..Lamp substitution or selection
14 ...Indexing (i.e., dynamic)
15 ....With electrical ignition
16 .Including specific light modifier
17 ..Plural diverse
18 ..Selective or adjustable
19 WITH POLARIZER
20 AUTOMATIC SUBSTITUTION OF POWER SUPPLY OR LIGHT SOURCE
21 WITH FILAMENT CONTROL MEANS RESPONSIVE TO FRACTURE OF LIGHT SOURCE ENVELOPE OR ENCLOSURE
22 .Fluid or pressure responsive
23 ILLUMINATED SCALE OR DIAL
24 .Telephone dial
25 .Radiator water temperature meter
26 .Edge illuminated modifier or light rod/pipe
27 ..Plural light sources
28 .Illuminated through meter case
29 .Internal light source
30 ..Indirect illumination
31 EDGE LIGHTED PANEL
32 LIGHT FIBERS, RODS OR PIPES
33 WORK-TABLE LIGHTING SYSTEM
34 CHEMILUMINESCENT LIGHTING
35 REVOLVING
36 VEHICLES STEERING SWITCHES LIGHT SOURCES
37 VEHICLE STEERING MECHANISM OR ELEMENT MOVES PIVOTED LAMP OR LAMP SUPPORT
38 .Through fluid pressure control
39 .Pivoted lamps having plural unlike motions controlled additionally by manual movement
40 .Manual or steering mechanism control of pivoted lamp
41 .Plural lamps, one only moves in turn direction
42 .Tire, wheel or brake backing plate movement turns lamp
43 .Plural lamps concurrently moved
44 ..Single connection to steering mechanism or element
45 ...First lamp motion moves second lamp
46 ....Steering post arm or rod motion controls first lamp
47 .....Through link and lever transmission means
48 ....Tie rod motion controls first lamp motion
49 ...Steering post, arm rod motion controls lamps
50 ....Through link and lever transmission means
51 ...Tie rod motion control
52 ..Tie rod motion control
53 .Steering post, arm or rod controlled
54 ..Through link and lever motion transmission
55 .Stub shaft, stub shaft arm or attachment element controlled
56 ..Through telescopic motion transmission means
57 .Tie rod element controlled
58 ..With manual disconnect
59 ..Through link and lever motion transmission means
60 ...With pin and slot motion transmission means
61 WITH VEHICLE STRUCTURE
62 .Aircraft
63 ..Having retractable lamp
64 .Having light aperture
65 ..With retractable headlight
66 .With operating means to move pivoted lamp or lamp support
67 ..Truck or track controls movable light support
68 ...Through flexible motion transmission element
69 ...Through meshing gears motion transmission elements
70 ...Through rigid link motion transmission elements
71 ..Illuminating means repositioned in response to change in relative position of vehicle element
72 .Bicycle or motorcylce
73 .Baggage rack
74 .Ventilation duct, ceiling or roof
75 .Seat
76 .Elevator, railway step or threshold
77 .Railway dashboard
78 .Wheel spindle, axle, hub cap or brake backing lamp support
79 .Radiator, radiator cap or attachment
80 .Hood, shell, grill, fire wall or body member
80.1 ..Windshield or window
81 .Running board
82 .Bumper, bumper guard
83 .Fenders
83.1 .Mirror or reflector
83.2 .License plate or bracket
83.3 .Other light
84 LIGHT SOURCE OR LIGHT SOURCE SUPPORT AND LUMINESCENT MATERIAL
85 WITH CONTROL CONSOLE
86 SOUND EQUIPMENT ILLUMINATOR
87 .Phonograph
88 .Telephone
89 MACHINERY LIGHTING
90 .Sewing
91 .Cleaning
92 WITH HEATER OR REFRIGERATOR
93 .Nonelectric illuminator
94 .With door-controlled switch
95 WITH SWITCH PLATE OR SOCKET
96 WITH FLUID DISTRIBUTER
97 LIGHT TABLE-TYPE ILLUMINATOR
98 WITH PAPER, BOOK OR COPY HOLDER
99 .Notepad
100 DOOR KNOB OR KEYHOLE ILLUMINATOR
101 WITH LIQUID CONTAINER
102 WITH CANE, BATON, UMBRELLA OR CLUB
103 WITH WEARING APPAREL OR BODY SUPPORT
104 .Jewelry
105 .Head covering or clamp
106 ..Hat
107 ...Nonelectric light unit
108 .Shoulder suspension or torso encircling (e.g., vest, neck-sling)
109 WITH IMPLEMENT OR HAND HELD HOLDER THEREFOR
110 .Firearm
111 ..Convertible to light gun
112 ..Imitation firearm
113 ..Light controlled by trigger
114 ..Switch on handle
115 .Barber
116 .Key holder
117 .Iron

WITH IMPLEMENT OR HAND HELD HOLDER THEREFOR
118 .Pen or pencil
119 .Hand tool (e.g., knife, drill)
120 ..Elongate type
121 WITH STAR OR CROSS
122 WITH PLANT-LIKE ORNAMENT OR WREATH
123 .Tree
124 WITH SIMULATED ANIMAL
125 WITH SHOWCASE OR SHOW WINDOW
126 .Heat insulation or dissipation type
127 WITH FURNITURE
128 .With viewing mirror
129 ..Adjustable
130 .Bed
131 .Chair, stool or sofa
132 .Plural diverse type article holders (e.g., drawer and hook)
133 .Cabinet
134 .Base
135 WITH VIEWING MIRROR
136 .With vanity case
137 ..With closure light source control
138 .Inspection type
139 ..Adjustable
140 .With plural light sources or diverse light modifiers
141 ..Adjustable
142 .Adjustable
143 ..Janus-faced mirror-and-light projector
144 ..Repositionable as a unit
145 WITH STATIC STRUCTURE
146 .Staircase
147 .Wall or ceiling
148 ..Subceiling
149 ...With fluid handling means
150 ...Common subceiling and light unit support
151 .Valence or cornice
152 .With border, fence, gate or awning
153 .Floor
153.1 .Pavement
154 WITH CONTAINER
155 .With closure controlled switch
156 .Bag, purse or trunk
157 SELF POWERED LAMP
158 .With hermetic seal
159 .Nonelectric
160 ..Acetylene
161 ..Candle type
162 ...Collapsible housing
163 ...With chimmey
164 ..Miner's safety type
165 ...With lock
166 ..Selective wavelength transmitting or light blocking means
167 ...With separate movable selective elements
168 ....Plural
169 ...Plural lenses
170 ....Rotatable type
171 ..Tubular type
172 ...Base structure
173 ...Dome structure
174 ...Relatively movable modifier
175 ....Compound motion
176 ....Rectilinear motion
177 ....Pivoted motion
178 ...Tube structure
179 ..Mantle type
180 ..Chimmey type
181 ..Base structure
182 ..Dome structure
183 .Rechargeable electrical source of with external connections
184 .Having plural lamp bulbs or lamp sockets
185 ..With a protective cage
186 .Dome, globe or wire guard or lamp bulb cover
187 .With movable focusing element
188 ..Movable lamp bulb or lamp bulb support
189 .Disposable lamp or flexible material casing
190 .With support
191 ..With or comprising mounting means
192 .Generator power source
193 ..Friction driven generator
194 .Battery supported separable lamp assembly
195 ..Battery terminal sole support of lamp
196 .Mating-halves type flashlight casing
197 .Lamp bulb or lamp support axis adjustable or angularly fixed relative to axis of flashlight casing
198 ..Flexibly or extensibly mounted lamp bulb or lamp support
199 ..Separate lamp housing or lamp support pivoed to flashlight casing
200 .Flat flashlight casing
201 ..Lamp terminal directly contacts a battery terminal
202 .Cylindrical flashlight casing
203 ..Bulb or battery physically moved to join mating contacts of each other
204 ..Insulated casing with switch between fixed conductors
205 ..With switch
206 ...At end opposite bulb
207 .Spare bulb carrier
208 .Flashlight elements
209 PLURAL NONELECTRIC LIGHT SOURCES
210 PLURAL CARBON ARC-TYPE LIGHT SOURCES
211 MULTIPLE FILAMENT LIGHT UNIT
212 .With electrical switching means
213 .Relatively movable light source or modifier
214 .With mask or screen for at least one filament
215 .With corrugated, faceted or fluted reflector and/or lens
216 CURVILINEAR LIGHT SOURCE
217 ELONGATED SOURCE LIGHT UNIT OR SUPPORT
218 .With ventilating or cooling means
219 .With means to position plural light sources colinearly
220 .Repositionable
221 .With means to accommodate additional circuit element
222 ..With or including transparent or translucent member
223 .With or including transparent or translucent member
224 ..Plural members
225 .Plural sources or supports therefor
226 QUICK DISCONNECT-TYPE LIGHT UNIT
227 PLURAL LIGHT SOURCES
228 .Diverse light generators
229 ..Gas and electric
230 .Particular wavelength
231 ..Different wavelengths
232 .Source and modifier mounted for relative movement
233 .Remote adjustment or positioning means
234 .Combined
235 .With modifier
236 ..Distinct light units
237 ...Substantially identical modifiers
238 ....Positioning means for plural units
239 .....Relative adjustment means
240 ....Units have common housing
241 ....Reflector type modifiers
242 ...Diverse modifiers
243 ....Including reflector
244 ...Refractor type modifier
245 ....With reflector

	PLURAL LIGHT SOURCES
	.With modifier
	..Distinct light units
	...Refractor type modifier
246	....Diffusing type
247	...Reflector type modifier
248	...Shielding type modifier
249	.With support
250	..Adjustable
251	..With switch
252	..Particular arrangement (e.g., ornamental star)
253	COMBINED
254	LIGHT SOURCE SUBSTITUTION
255	MODIFIER MOUNTABLE ON LIGHT SOURCE ENVELOPE
256	.With additional modifier
257	LIGHT SOURCE (OR SUPPORT THEREFOR) AND MODIFIER
258	.With extensible electric cord storage member
259	.Laser type
260	.Fluorescent type
261	.Carbon arc type
262	..With electrode feed means
263	.Ionized gas or vapor light source
264	..Including cooling means
265	..Including circuit arrangement
266	.Nonelectric type
267	.With sealing means or artifical atmosphere
268	.Plural serial lens elements or components
269	.Tiltable or rotatable as a unit
270	..With linear repositioning means
271	..With actuator
272	...Electric or pneumatic
273	...Screw actuator
274	...Resiliently biased
275	..Plural axes
276	.Condition responsive
277	.Adjustable or repositionable modifier
278	..Flexible modifier
279	..Louvered or grid type modifier movable as a unit
280	..In plane, or extension of modifying surface
281	...Plural, relatively movable
282	..Angularly adjustable or respositionable
283	...Plural, relatively movable
284	...With actuator
285	.Adjustable or repositionable light source or light source support
286	..Electromagnetic actuator
287	..Angularly adjustable or repositionable
288	..Resiliently biased
289	..Screw actuated
290	.Louvered or grid type modifier
291	..Including curved modifying surface
292	..Including nonparallel modifying surfaces
293	.Including selected wavelength modifier (e.g., filter)
294	.With ventilating, cooling or heat insulating means
295	.With rheostat or switch
296	.Including reflector
297	..With or including plural, distinct reflecting surfaces
298	...Opposed
299	....With or including refractor
300	....With or including translucent or transparent modifier
301	....With or including planer reflecting surface
302	....With or including coaxial reflecting surfaces
303	.....With or including means blocking axial rays
304	...Coaxial
305	....With or including means modifying axial rays
306	..With resilient means to position source or modifier
307	..With or including translucent or transparent modifier
308	...Refractor
309	....With complex surface
310	..Enclosed light source
311	.Including translucent or transparent modifier
312	LIGHT PERVIOUS CHIMNEYS OR ACESSORIES THEREFOR
313	.Attachments
314	.Chimeny support or holder
315	.Composite
316	.Modified base
317	LIGHT MODIFIER
318	.Fluid medium type
319	.Adjustable or positionable
320	..Flexible
321	..Shutter type
322	..Angularly
323	...In plane or modifier surface
324	...With actuator
325	...Louvered or grid type
326	.Refractor
327	..With reflector
328	...Reflector separate from refractor
329	...Enclosure type
330	..Panel type
331	..Plural serial refractors
332	..Separate sections
333	..With plural elements on both sides of main surface
334	...Curved main surface
335	..Curved lens type
336	...Including diverse refracting elements on one surface
337	....Prismatic type
338	...Plural elements on a curved surface
339	..Prismatic type
340	...Curved main surface
341	.Reflector
342	..Louvered or grid type
343	..With diverse modifier
344	..With guard means
345	..With ventilating or cooling
346	..Plural separate reflectors or separate sections
347	..Curved surface
348	...Patterned surface
349	...Including straight surface
350	...Bowl shaped main surface
351	.Translucent or opaque (e.g., "shade")
352	..Collapsible or folding
353	..Including socket engaging means
354	..Louvered or grid type
355	..Diffusing type
356	...Hollow body open at both sides
357	....Including cloth covering
358	..Wire frame type
359	..External hood or visor
360	..Plural sections
361	..Curved surface
362	HOUSING
363	.Transparent globe type
364	.Recessed
365	..With mounting means
366	...With adjustment for panel dimensions or slope
367	.Frame with multiple light-transmitting panels
368	.With mounting means
369	..Shock absorbing

HOUSING
.With mounting means
370 ..Arm or bracket
371 ...Adjustable movement between arm and housing
372 .With adjustable light source
373 .With cooling means
374 .With closure fastener
375 .With closure
376 GUARD MEANS
377 .Bulb engaging
378 .Socket engaging
379 SMOKE BELLS
380 SPARK ARRESTERS
381 GAS TAPS
382 SUPPORTS
383 .Object sound or sighting controls movable light support
384 .Moving mass control movable light support
385 .Fluid pressure controls movable light support
386 .Electromagnetic operator controls movable light support
387 .With flexible power-cord storage member
388 .Convertible support
389 .Antislipping
390 .Shock absorbing
391 .Line-wire or cable-attaching support
392 .Imitation candle support
393 ..Adjustable
394 .Special switch operator
395 ..With standard (e.g., table and floor lamps)
396 .Clamp or hook
397 .Suction cup
398 .Magnetic
399 .Handle or bail
400 ..With means for receiving guard
401 .Counterbalanced support
402 ..Spring counterbalance
403 .Support having gravity-type light source or light modifier raising and lowering means
404 .Ceiling-suspended support
405 ..Body member with plural radial arms (e.g., chandelier)
406 ...With mounting means
407 ..Cord-supported light source with light source directing means
408 ..With light modifier holder
409 ..Nonelectric
410 .Standard-type support (e.g., table or floor lamp)
411 ..With electrical regulating means
412 ..Vase-type standard
413 ..Adjustable standard
414 ..With light source support mounted at top end of standard
415 ..Nonelectric
416 .Arc lamp hanger
417 .Harp type support
418 .Adjustable light support
419 ..Having plural diverse motions
420 ...Plural headlight supports concurrently operated
421 ...With ball and socket light support
422 ...With coaxial motion transmission members
423 ....With plural pairs of gears transmitting motion through internal member
424 ....Internal coaxial member having straight line motion
425 ...Single reciprocating and turning member transmits plural different motions to the adjustable support
426 ...Fork support
427 ..Pivoted lamp or lamp support
428 ...With operating means to move lamp or lamp support
429 ..Adjustable socket holder
430 ..With mounting means
431 .Pole or post type support
432 .Wall type arm or bracket support
433 .Modifier support
434 ..Double-ring frame
435 ...Socket extension
436 ....Clamping jaws
437 ..Socket covers
438 ...Clamping jaws
439 ...With mounting means
440 ..Spring ring
441 ..Base
442 ...Spider
443 ..Removable socket collar
444 ..Spring frame or bulb
445 ..Spring frame on body of chimney
446 ..Side
447 ..On candle
448 ..With socket or shell
449 ..Adjustable
450 ..Collapsible
451 ..Drop
452 ..Interior arms and ring crown engaged
453 ..Inverted-bowl suspension devices
454 ...Combined with support
455 ..Lens holder or support
456 ...Perforated plate
457 MISCELLANEOUS ATTACHMENTS AND FITTINGS

CLASS 363 ELECTRIC POWER CONVERSION SYSTEMS

DECEMBER 1990

1 CASCADED OR COMBINED, DIVERSE CONVERSIONS IN WHICH THE FREQUENCY OR PHASE OR COMBINED CONVERSION IS WITHOUT INTERMEDIATE CONVERSION TO D.C.
2 .Current and phase (e.g., D.C.-Ph1-Ph2)
3 ..Phase 1 to phase 2 to D.C.
4 ...Single phase to polyphase to D.C.
5 ...With interphase transformer
6 ....Including plural anode/single cathode device
7 ...With dynamic rectifier in phase 2 to D.C. stage (e.g., commutator type)
8 .Current and frequency (e.g., f1-f2-D.C.)
9 .Combined phase and frequency conversion (i.e., Ph1f1-Ph2f2)
10 ..By semiconductor device converter
11 ..By electron tube converter
12 ..By saturable reactor converter
13 CURRENT CONVERSION
14 .Cryogenic
15 .Including D.C.-A.C.-D.C. converter
16 ..Having transistorized inverter
17 ...Bridge type
18 ...Single ended self oscillating type
19 ....With automatic control of the magnitude of the output voltage or current
20 ...Single ended separately driven type
21 ....With automatic control of the magnitude of the output voltage or current
22 ...Double ended (i.e., push-pull) self oscillating tye
23 ....With automatic control of the magnitude of the output voltage or current
24 ...Double ended (i.e., push-pull) separately driven type
25 ....With automatic control of the magnitude of the output voltage or current
26 .....Using pulse with modulation
27 ..Having thyristor inverter (e.g., SCR)
28 ...With automatic control of the magnitude of the output voltage or current
29 ..Having electron tube inverter
30 ...Single ended type
31 ...Double ended type (i.e., push-pull)
32 ..Rotary-commutator-type inverter
33 ..Vibrator-type inverter
34 .Including an A.C.-D.C.-A.C. converter
35 ..For transfer of power via a high voltage D.C. link (i.e., HVDC transmission system)
36 ..For change of phase (e.g., number of phases)
37 ..By semiconductor rectifier and inverter
38 ..By electron tube rectifier and inverter
39 .With means to introduce or eliminate frequency components
40 ..In inverter systems
41 ...By pulse modulation technique (e.g., PWM, PPM, etc.)
42 ....Including notching
43 ...By step-wave, amplitude summation technique
44 ..In rectifier systems
45 ...Including means for reducing ripples from the output
46 ....With ripple responsive, automatic control
47 ....With low pass L or LC filter
48 .....For semiconductor rectifier
49 .With starting arrangement
50 .Including automatic or integral protection means
51 ..For high voltage D.C. transmission systems
52 ..For rectifiers
53 ...Semiconductor type
54 ....Thyristor
55 ..For inverters
56 ...Semiconductor type
57 ....Thyristor
58 .....Bridge
59 .With voltage multiplication means (i.e., V out > V in)
60 ..Including semiconductor means
61 ...For rectifying
62 .With voltage division by storage type impedance (i.e., V out < V in)
63 .With means to selectively provide D.C. of either polarity
64 .With interphase transformer
65 .Having plural converters for single conversion
66 ..Including plural anodes and single cathode (e.g., vapor arc device)
67 ..Plural rectifiers
68 ...In series (e.g., series SCR's, bridge circuits, etc.)
69 ...In parallel
70 ....Including semiconductor device
71 ..Plural inverters
72 ...Master-slave
73 .Constant current to constant voltage or vice versa
74 .With condition responsive means to control the output voltage or current
75 ..Including inductive integral sensing and control means (e.g., ferroresonant circuit)
76 ..Including integral sensing and control means for rectifier
77 ...With semiconductor conversion means
78 ..Cooperating separate sensing and control means
79 ...Including plural sensing or control means
80 ....With transistor as control means in the line circuit
81 ....By rectifier
82 .....With inductive control means in the line circuit
83 .....With electron tube or valve as control means in the line circuit
84 ...For rectifier system
85 ....With thyristor control means in the line circuit
86 .....External to rectifier (e.g., pre or post regulation)
87 .....For plural phase to D.C. rectifier
88 .....For full wave rectifier with at least 1 three electrode device
89 ....With transistor control means in the line circuit
90 ....With inductive control means in the line circuit
91 .....Saturable reactor (e.g., magnetic amplifier)
92 ......In plural phase to D.C. system
93 ......With plural control windings
94 ....With electron tube or valve control means in the line circuit
95 ...For inverter
96 ....With thyristor control means in the line circuit
97 ....With transistor control means in the line circuit
98 .....For bridge-type inverter

CURRENT CONVERSION
.With condition responsive means to control the output voltage or current
..Cooperating separate sensing and control means
...For inverter
99 ....With electron tube or valve control means in the line circuit
100 .With manual control of the output voltage or current
101 .With auxiliary bucking or boosting EMF
102 .Using dynamoelectric machine converter
103 ..Plural collector type
104 ...Having plural field windings
105 ...Having auxiliary motor drive
106 .By circuit interrupter type
107 ..Rotating
108 ...Rectifier (i.e., A.C.-D.C.)
109 ...Inverter (i.e., D.C.-A.C.)
110 ..Vibrating
111 .Using electronic tube converter
112 ..With gap in open atmosphere
113 ..With cathode element control
114 ..In rectifier systems
115 ...With retarding or delaying control means
116 ...With discharge control means (e.g., grid)
117 ....D.C. bias control
118 ....Phase angle control
119 ....Particular waveform grid excitation
120 ..In inverter systems
121 ...With discharge control means (e.g., grid)
122 ....Grid-like electrode
123 .Using semiconductor-type converter
124 ..In chopper converter systems
125 ..In rectifier systems
126 ...Diode
127 ...Transistor
128 ...Thyristor
129 ....Plural phase to D.C.
130 ....With magnetic control means
131 ..In transistor inverter systems
132 ...Bridge type
133 ...Double ended (i.e., push-pull) type
134 ....Separately driven
135 ..In thyristor inverter systems
136 ...Bridge type
137 ....D.C. to plural phase
138 .....With commutation means
139 ...Double ended (i.e., push-pull) type
140 .Using impedance-type converter
141 .With cooling means
142 .With means to connect the input to diverse power sources
143 ..110/220 Volts A.C. in, constant 110 Volts D.C. out
144 .With conductive support mounting
145 ..Adapted for use with alternators
146 .Encased in plug housing
147 .Integrated circuit
148 PHASE CONVERSION (Ph1-Ph2) WITHOUT INTERMEDIATE CONVERSION TO D.C.
149 .With automatic voltage magnitude or phase angle control
150 .By dynamoelectric machine converter
151 .By electron tube converter
152 .By induction-type converter
153 ..Transformer type
154 ...Stationary
155 ....With passive phase shift element
156 .By passive phase shift elements
157 FREQUENCY CONVERSION (f1-f2) WITHOUT INTERMEDIATE CONVERSION TO D.C.
158 .By varactor
159 .By semiconductor converter
160 ..Thyristor type
161 ...Positive and negative groups
162 ....Including blanking or inhibiting means
163 ..Transistor type
164 .With automatic voltage magnitude control
165 .With automatic frequency control
166 .By electron tube converter
167 ..With discharge control means
168 ...Including plural anodes and single cathode device (e.g., vapor arc device)
169 ...Thyratron type
170 .By induction-type converter
171 ..Transformer
172 ...Saturable core
173 ..LC circuit
174 ..Dynamoelectric machine
175 ...Motor generator type
176 ...Including induction motor
177 .By circuit interrupter converter
178 MISCELLANEOUS

130	DATA PROCESSING CONTROL SYSTEMS, METHODS OR APPARATUS
131	.Plural processors
132	..Master-slave
133	..Parallel
134	...Shared memory
135	..Hybrid types (analog, digital)
136	..Including sequence or logic processor
137	.Cascade control
138	.Supervisory control
139	..Of analog controllers
140	.Sequential or selective
141	..State of condition or parameter (e.g., on/off)
142	...Position responsive
143	...Time responsive (duration)
144	....With display
145	....Clock-calendar (e.g., time of day)
146	..Operator interface (e.g., display with controls)
147	...Specific programming (e.g., relay or ladder logic)
148	.Optimization or adaptive control
149	..With model
150	...Comparison with model (e.g., model reference)
151	...With adjustment of model (e.g., update)
152	..Specific criteria of system performance
153	...Constraints or limits (e.g., max/min)
154	....Variable
155	....Bidirectional (e.g., oscillatory)
156	....Economic (e.g., cost)
157	...Gain (e.g., tuning)
158	..With perturbation
159	...Test signal
160	..Plural modes
161	...Proportional-integral (P-I)
162	...Proportional - integral - derivative (P-D)
163	...Proportional-derivative (P-D)
164	..Feedforward (e.g., predictive)
165	...Combined with feedback
166	..Rate control
167.01	.Digital positioning (other than machine tool)
172	.Plural variables
173	..Ratio
174	..Positional (e.g., velocity, acceleration)
175	...Positional with nonpositional
176	.Specific compensation or stabilization feature
177	..Lag (e.g., dead time)
178	.Sampled data system
179	..Variable rate
180	.Multiple modes (e.g., digital/analog)
181	..Manual/automatic
182	..Fine/coarse
183	.With specific error signal generation (e.g., up/down counter)
184	.With protection or reliability feature
185	..Warning or alarm
186	..Self-test
187	..Backup/standby
188	.With operator control interface (e.g., control/display console)
189	..Keyboard
190	..Positional (e.g., joy stick)
191	.With preparation of program
192	..Editing/modifying
193	..Playback
194	.With specific algorithm
200	GENERAL PURPOSE PROGRAMMABLE DIGITAL COMPUTER SYSTEMS

****

APPLICATIONS

NOTE: Subclasses numbered between 221 and 286.6 are cross reference art collection which exist only in electronic form and searchable only in the CASPIR or APS Messenger systems. CASPIR Term List numbers are shown in brackets for each subclass. Paper copies of all patents in this range are found in subclass 200. A search in subclasses 221-286.6 may be indicated on the file wrapper and appropriate "copies" may be added in this range on the blue slip. When a document is to be added to a subclass in this range a copy must also be added to subclass 200. If a document is to be removed from a subclass in this range please forward a copy of said document to Documentation for processing. Subclasses whose titles contain a single (*) are complete only for patents issued since 1980.

400	APPLICATIONS
401	.Business practice and management
402	..Operations research
403	..Inventory
404	...With cash register
405	..Cash register
406	..Accounting
407	..Reservations
408	..Finance (e.g., securities, commodities)
409	.Government activities (e.g., voting, law enforcement)
410	.Games and amusements
411	..Scoring
412	..Wagering
413.01	.Life sciences
413.02	..Patient monitoring or diagnostics
413.03	...Vital signs (e.g., respiration, temperature, blood pressure, pulse)
413.04	....Physiological conditioning system
413.05	...Wave or rhythm
413.06	....Electrocardiogram
413.07	...Blood
413.08	....Blood cell analysis
413.09	....Blood chemistry (e.g., oxygen level)
413.1	...Cellular composition or activity
413.11	...Body chemistry (e.g., urine analysis)
413.12	...Fertility cycle
413.13	..Medical imaging
413.14	...Computed tomography using x-ray
413.15	....Particular data acquisition technique
413.16	....Particular projection data set creation technique

	APPLICATIONS
	.Life sciences
	..Medical imaging
	...Computed tomography using x-ray
	....Particular projection data set creation technique
413.17	.....Weighting factors
413.18	.....Interpolated or extrapolated data
413.19	....Particular image reconstruction technique
413.2	.....Fourier transformation
413.21	.....Convolution or back projection
413.22	....Image display
413.23	...Subtraction radiography using x-ray
413.24	...Including gamma camera system
413.25	...Using ultrasound
413.26	..Radiation detection or treatment
413.27	..For control of bodily function (e.g., muscle stimulation)
413.28	..Dental
413.29	..Diet
413.3	..Survival in hostile environment
413.31	...Diving decompression analysis
419	.Social sciences (e.g., linguistics, documentation, humanities)
420	.Earth sciences (e.g., weather)
421	..Seismology
422	..Well logging
423	.Military applications
424.01	.Vehicle guidance, operation, or indication
424.02	..Automatic route guidance system
424.03	..Vehicle maintenance or diagnostic
424.04	...With data recording device
424.05	..Vehicle accessory control
424.06	..Flight condition indicating system
424.07	..Construction or agricultural vehicle type (e.g., crane, forklift)
424.1	..Control of transmission
425	..Engineering of vehicles
426.01	..With indication or control of braking, acceleration or deceleration
426.02	...Antiskid/antilock
426.03	...Antispin
426.04	...Road vehicle speed control
426.05	...Railway vehicle speed control
427	..With indication or control of take-off
428	..With indication or control of landing
429	...I.L.S. or radar guidance
430	...Profile of descent
431.01	..Indication or control of power plant (e.g., performance)
431.02	...Gas turbine, compressor
431.03	...Internal combustion engine
431.04	....Digital or programmed data processor
431.05	.....Air/fuel ratio, injection, optimization
431.06	......Exhaust gas recirculation (EGR)
431.07	.....Speed, acceleration, deceleration
431.08	.....Vibration, roughness, knock
431.09	.....Engine stop, fuel shutoff
431.1	.....Starting, warmup
431.11	.....Backup, interrupt, reset or test
431.12	.....Specific memory or interfacing device
432	..With indication or control to maintain fixed position
433	..With indication or control of altitude/depth or rate of ascent or descent
434	..With indication or control of vehicle attitude
435	...Angle of attack
436	..Traffic analysis or control of surface vehicle
437	...With determination of traffic density
438	...With determination of traffic speed
439	..Traffic analysis or control of aircraft
440	...With speed control or order
441	...With course diversion
442	..With indication of fuel consumption rate or economy of usage
443	.Navigation
444	..Determination of course or distance from present position to destination
445	...Great circle route
446	..Determination of E.T.A.
447	..Determination of along-track or cross-track deviations
448	..Employing way point navigation
449	..Employing position-determining equipment
450	...Using dead-reckoning apparatus
451	...Using R-O (D.M.E. and path) or Tacan equipment
452	...Using Loran or Shoran or Decca equipment
453	...Using inertial sensor
454	....With correction by noninertial sensor
455	...Using star tracker
456	...With radar or optical ground scanner
457	..With indicated course correction (compass deviation)
458	..Determining range without range measurement
459	..Space orbits or paths
460	.Relative location
461	..Collision avoidance
462	..Course to intercept
463	.Determining balance or center of gravity (e.g., load distribution of vehicle)
464.01	.For cost/price
464.02	..Postage meter system
464.03	...Including mailed item weight
464.04	..Utility usage
465	..Fluid
466	..Weight
467	..Distance or time (e.g., taximeters)
468	.Product manufacturing
469	..Continuous material processing
470	...Textiles
471	...Paper products
472	...Metals
473	...Glass, plastic, and rubber
474.01	..Machining
474.02	...With particular tool or tool operation
474.03	....Tracing or duplicating
474.04	....Electrical discharge machining (EDM)
474.05	....3-D sculpturing using nontracing prototype sensor
474.06	....Grinding
474.07	....Bending (e.g., press brake)
474.08	....Laser
474.09	...Of elongated material (e.g., timber, veneer, web)
474.1	...Portable (e.g., hand-held)
474.11	...Supervisory control (e.g., plural tools or plural processors)
474.12	...Having particular control of a motor parameter
474.13	...Material usage optimization
474.14	...Multiple mode (e.g., rough-finish, coarse-fine)
474.15	...Adaptive (optimizing) system
474.16	...Performance monitoring
474.17	....Condition of tool or workpiece (e.g., tolerance, tool wear)
474.18	.....Offsetting
474.19	....Protective or diagnostic feature
474.2	.....Tool/workpiece interference prevention

	APPLICATIONS
	.Product manufacturing
	..Machining
474.21	...Tool selection/change
474.22	...With operator interface feature
474.23	....Specific programming format (e.g., macro)
474.24	....Including cad, cam, or cim, technique
474.25	....Preset pattern
474.26	....Machining path display
474.27	....Prompting technique
474.28	...Digital positioning technique
474.29	....For curve or contour
474.3	....Including velocity or acceleration control
474.31	....Interpolation
474.32	....Specified tool feed path at entry or withdrawal
474.33	.....Repeated machining passes
474.34	....Alignment of tool or workpiece (e.g., origin or path return)
474.35	....Positional compensation or modification
474.36	...Coordinate transformation technique
474.37	...With particular measuring device (e.g., probe)
476	..Pressing or molding
477	..Heating, sintering, or melting
478	.Article handling or distribution
479	..Dispensing
480	.Electrical/electronic engineering
481	..Measuring or testing
482	...Impedance
483	...Voltage, current, or power
484	...Frequency
485	....Frequency spectrum
486	...Pulse
487	...Waveform
488	..Design and analysis
489	...Circuits
490	....Integrated
491	.....Layout
492	..Power generation or distribution
493	...Economic dispatching
494	...Turbine or generator control
495	...With model
496	.Chemical and Engineering Sciences
497	..Chemical analysis
498	...Spectrum analysis (composition)
499	...Chemical property
500	..Chemical process control
501	...Distillation
502	...Physical mixing or separation
503	...Kilns
505	..Mechanical and civil engineering
506	...Measuring and testing
507	....Flaw or defect
508	....Stress, strain, or vibration
509	....Fluid
510	.....Fluid flow
511	....Power
512	...Structural design
513	.Artifical intelligence (e.g., speech and signal conditioning, self-organizing robot control)
513.5	..Speech signal processing
514	.Communication engineering (e.g., pictorial and pulse communication)
516	..Object detection or tracking
517	...Signal evaluation (target or noise)
518	.Control of data presentation
519	..Of line printer
520	..Of X-Y plotter
521	..Of CRT
522	...With perspective presentation
523	..For photocomposition or typesetting
524	.Physics
525	..Optics or photography
526	...Color analysis
527	..Atomic or nuclear physics
550	MEASURING, TESTING, OR MONITORING
551.01	.Measuring and evaluating (e.g., performance)
551.02	..Of machine tool
552	..Quality control determinations
553	..Transfer function evaluation
554	..Statistical data (e.g., stochastic variable)
555	..Particle count, distribution, size
556	.For basic measurements
557	..Temperature
558	..Pressure or density
559	..Orientation
560	..Dimension
561	...Distance
562	....Length or height
563	....Width or thickness
564	...Area or volume
565	..Rate of change of dimension (e.g., speed)
566	..Acceleration and further derivatives
567	..Weight
568	...Basis weight
569	..Time or time intervals
570	.Operations performed
571.01	..Calibration or compensation
571.02	...Having mathematical operation on initial measurement data
571.03	....Including environmental factors (e.g., temperature)
571.04	....Including predetermined stored data
571.05	....Using difference involving initial measurement data
571.06	....Using analog calculating elements
571.07	...By table look-up
571.08	...Using operator provided data
572	..Filtering
573	..Linearization
574	..Noise reduction
575	..Averaging
576	..Fourier analysis
577	..Interpolation/extrapolation
578	..Simulation or modeling
579	..With control of testing or measuring apparatus
580	..Programmed testing conditions
581	..Weighting
582	..Normalization
600	ELECTRIC HYBRID COMPUTER
601	.Plural complete computers
602	.Specialized function performed
603	..Evaluation of trigonometric functions
604	..Correlation, convolution, or transformation
605	..Integration or differentiation
606	..Multiplication or division
607	..Function generation
608	...Piece-wise linear synthesis
700	ELECTRIC DIGITAL CALCULATING COMPUTER
701	.Pulse repetition rate
702	..Digital differential analyzer
703	..Multiplication or division
704	.Plural complete computers
705.01	.Combined with diverse art device
705.02	..Checkbook
705.03	..Writing instrument (e.g., pen)
705.04	..Tape recorder
705.05	..Communication device (e.g., telephone, radio, television)
705.06	..Business device (e.g., billing, memorandum)
705.07	..Horological device
705.08	...Calendar
706	.Programmable calculator
707	.With power saving feature

ELECTRIC DIGITAL CALCULATING COMPUTER

708	.With specialized housing or casing
709.01	.With specialized input
709.02	..Having supplemental environment related input
709.03	...Cooking
709.04	...Business
709.05	..For security
709.06	..Input verification
709.07	..Fraction input
709.08	..Flexible input
709.09	..Including specific computing system interconnection
709.1	..Modular or overlay
709.11	..Including specific nonkeyboard type information entry
709.12	..Including specific keyboard type information entry
709.13	...Nonmechanical key actuation
709.14	...User definable key
709.15	...Plural function key
709.16	...Key sequencing (i.e., sequence defines function)
710.01	.With specialized output
710.02	..Having supplemental environment related output

APPLICATION

NOTE: Subclasses numbered between 916 and 971.1 are cross reference art collections which exist only in electronic form and are searchable only in the CASPIR or APS Messenger systems. CASPIR Term List numbers are shown in brackets for each subclass. Paper copies of all patents in this range are found in subclass 900. A search in subclasses 916-971.1 may be indicated on the file wrapper and appropriate "copies" may be added in this range on the blue slip. When a document is to be added to a subclass in this range a copy must also be added to subclass 900. If a document is to be removed from a subclass in this range, please forward a copy of said document to Documentation for processing. Subclasses whose titles contain a single (*) are complete only for patents issued since 1980.

130 .Three-dimensional magnetic array
131 .Two magnetic cells per bit
132 .Different size cores
133 .Cells of diverse coercivity
134 .Continuous cells
135 ..Elongated or bar-shaped cell
136 ...Twisters
137 ...Tubular
138 ...Chain
139 ...Plated wire
140 .Multiaperture cell
141 ..Aperture plate
142 ..Aperture with transverse axis
143 ...Biax
144 ..Same size apertures
145 .Ferroelectric
146 .Electrets
147 .Persistent internal polarization (PIP)
148 .Resistive
149 .Capacitors
150 ..Inherent
151 .Molecular or atomic
152 ..Nuclear induction or spin echo
153 .Electrochemical
154 .Flip-flop (electrical)
155 ..Plural emitter or collector
156 ..Complementary
157 .Magnetostrictive or piezoelectric

	SYSTEMS USING PARTICULAR ELEMENT
158	.Magnetoresistive
159	.Negative resistance
160	.Superconductive
161	..Thin film
162	..Josephson
163	.Amorphous (electrical)
164	.Electrical contacts
165	..Coherer
166	..Relay
167	.Simulating biological cells
168	.Ternary
169	.Gunn effect
170	.Hall effect
171	.Magnetic thin film
172	..Isotropic
173	..Multiple magnetic storage layers
174	.Semiconductive
175	..Diodes
176	..Silicon on sapphire (SOS)
177	..Bioplar and FET
178	..Ion implantation
179	..Plural emitter or collector
180	..Four layer devices
181	..Complementary conductivity
182	..Insulated gate devices
183	...Charge coupled
184	...Variable threshold
185	...Floating gate
186	..Single device per bit
187	..Three devices per bit
188	..Four or more devices per bit
189.01	READ/WRITE CIRCUIT
189.02	.Multiplexing
189.03	.Plural use of terminal
189.04	.Simultaneous operations (e.g., read/write)
189.05	.Having particular data buffer or latch
189.06	.Including signal clamping
189.07	.Including signal comparison
189.08	.Including specified plural element logic arrangement
189.09	.Including reference or bias voltage generator
189.11	.Including level shift or pull-up circuit
189.12	.With shift register
190	.For complementary information
191	.Signals
192	..Radio frequency
193	..Strobe
194	..Delay
195	..Inhibit
196	...Sense/inhibit
197	..Microwave
198	..Transmission
199	..Coincident A.C. signal with pulse
200	.Bad bit
201	.Testing
202	.Complementing/balancing
203	.Precharge
204	.Accelerating charge or discharge
205	.Flip-flop used for sensing
206	.Noise suppression
207	..Differential sensing
208	...Semiconductors
209	...Magnetic
210	....Reference or dummy element
211	..Temperature compensation
212	...Semiconductor
213	...Magnetic
214	..Particular wiring
215	.Optical
216	..Holographic
217	.Electron beam
218	.Erase
219	.SiPo/PiSo
220	.Parallel read/write
221	.Serial read/write
222	.Data refresh
223	.Bridge
224	.Eddy current
225	.Minor loop
225.5	.Including magnetic element
225.6	.Having bipolar circuit element
225.7	.Having fuse element
226	POWERING
227	.Conservation of power
228	.Data preservation
229	..Standby power
230.01	ADDRESSING
230.02	.Multiplexing
230.03	.Plural blocks or banks
230.04	..Alternate addressing (e.g., even/odd)
230.05	.Multiple port access
230.06	.Particular decoder or driver circuit
230.07	..Including magnetic element
230.08	.Including particular address buffer or latch circuit arrangement
230.09	.Combined random and sequential addressing
231	.Using selective matrix
232	..Magnetic
233	.Sync/clocking
233.5	..Transition detection
234	.Optical
235	..Page memories
236	.Counting
237	.Electron beam
238	.Cartesian memories
238.5	.Byte or page addressing
239	.Sequential
240	..Using shift register
241	..Detectors
242	.Current steering
243	..Diode
243.5	.Including magnetic element
244	MISCELLANEOUS

CLASS 366 AGITATING

1 MORTAR MIXER TYPE
2 .Methods
3 ..Gas incorporating; fluid mixing, delivering, or conveying
4 ...With heating or cooling
5 ...Gas incorporating at delivery
6 ..Treatment or preparation of material
7 ...By heating or cooling
8 ...By ingredient proportioning
9 .Gravity type
10 .With gas incorporating; fluid mixing, delivering, or conveying
11 ..Gas incorporating at delivery nozzle
12 ..Into rotating mixing chamber
13 ..With rotatable stirrer
14 .Plural mixing chambers
15 ..Intercommunicating
16 .With ingredient proportioning
17 ..By condition sensing means
18 ..By weight
19 ..By volume
20 ..By screw conveyer charging means
21 ..By varying opening of charging means
22 .With heating or drying
23 ..Heating mixing chamber and ingredient preheater
24 ..Heating mixing chamber
25 ...By hot gases to interior
26 .With elevating means
27 .With dynamic charging and dynamic delivery
28 ..Interrelated
29 ...With automatic control means
30 .With dynamic charging
31 ..By vibration
32 ...Of skip or hopper
33 ..Plural charge means
34 ...Including dynamic liquid charge
35 ...Including screw conveyer
36 ...Skip and liquid
37 ...Plural dynamic
38 ..By screw conveyer
39 ..Skip
40 .With liquid charge
41 .Movable charge hopper or chute
42 .With dynamic delivery
43 ..Including automatic control means
44 ..Rotatable mixing chamber reversible for delivery
45 ..Mixing chamber tiltable for delivery
46 ...With stirrer
47 ...Hand operated tilt
48 ....Wheelbarrow-type support
49 ..Endless belt
50 ..Rotary screw
51 ..Pump
52 ..Scraper or deflector
53 .Movable mixing chamber
54 ..Rotatable
55 ...With additional diverse motion
56 ...With agitator
57 ....Rigid deflector fixed to chamber wall
58 .....Compartmental-type chamber
59 .....Helical
60 ...With specified actuating or control means
61 ....Hydraulic drive or control
62 ...With specified support structure
63 ....Specified rotational mounting
64 .Movable stirrer
65 ..Vertical mixing chamber
66 ..Plural stirrers
67 ..Including scraper, wiper, or brush
68 .Movable chute
69 RUBBER OR HEAVY PLASTIC WORKING
70 .Candy puller type
71 .Roll couple and scraper
72 .Roll couple and work handler
73 .Roll couple having adjustment means
74 .Roll traveling within platen
75 .With specified vent means
76 .With specified feed means
77 .With specified discharge means
78 .Rotating and reciprocating stirrer
79 .Stirrer is through-pass screw conveyer
80 ..With deflector
81 ..With additional stirrer element on screw conveyer
82 ...Ring or disk
83 ..Plural screw conveyers on separate shafts
84 ...In parallel intercommunicating mixing chambers
85 ....Screw conveyers intermeshing
86 ....Intercommunication by conduit
87 ..And downstream breaker plate or screen
88 ..Including sections of different pitch
89 ..Varying diameter of shaft
90 ..Notched, apertured, or interrupted thread
91 .Plural mixing chambers
92 .With means to move mixing chamber
93 ..Rotating mixing chamber
94 ...With rotating stirrer
95 ....Single stirrer
96 .Stationary mixing chamber
97 ..With rotating stirrer
98 ...Single stirrer
99 ....Horizontal
100 .Stirrer with specified drive means
101 BY INJECTING GAS INTO CHAMBER
102 .With stirrer
103 ..Plural stirrers
104 ...Diverse
105 .Into rotating mixing chamber
106 .Intermittent or pulsating feed
107 .Plural gas feeders
108 BY VIBRATION
109 .Including endless conveyer
110 .Of holder for mixing chamber
111 .Of platform or mixing chamber supported by vibrator
112 ..Supported by vibrator solely
113 .Vibrator mounted in aperture of mixing chamber bottom wall
114 .Vibrator attached to mixing chamber wall or platform
115 ..By bonding
116 .With amplitude or frequency regulator
117 .Of stirrer
118 ..In mixing chamber
119 ...Actuated by flow of material
120 ..Pencil type
121 ...With lubricating means
122 ...Specified end structure
123 ...Actuated by rotary movement of unbalanced-weight shaft
124 .Vibrator actuated by fluid under pressure
125 ..Including shaft with radially movable element
126 ..Fluid acting on orbital rolling ball
127 .By electrostrictive or magnetostrictive transducer
128 .By rotary movement of unbalanced-weight shaft
129 OPERATOR SUPPORTED
130 .Mixing chamber type
131 WITH INTERRELATED FEED AND DISCHARGE MEANS
132 .Including means to monitor or control operation
133 .By single endless or screw conveyer
134 .Plural feed or discharge means
135 .Rotatable mixing chamber

WITH INTERRELATED FEED AND DISCHARGE MEANS
136 .Recirculating from and to mixing chamber
137 ..Directly
138 WITH FLUSHING OF MIXING CHAMBER
139 IN VACUUM CHAMBER
140 WITH SAMPLING
141 WITH WEIGHING
142 WITH TEST, SIGNAL OR INDICATOR MEANS
143 WITH INSPECTION MEANS (E.G., WINDOW)
144 WITH HEATING OR COOLING
145 .Including temperature control
146 .Electrical heating
147 .Medium in stirrer or mixing chamber
148 .Of supply
149 .Jacket
150 WITH SPECIFIED FEED MEANS
151 .Responsive to condition sensor
152 ..Proportioning plural material components
153 ..Controlling level of material in mixing chamber
154 .With agitation of material in feeder or supply reservoir
155 ..Rotatable impeller
156 ...Screw conveyer
157 ....Coaxial or unitary with stirrer
158 ....Axis parallel to stirrer in mixing chamber
159 .Including returning material to supply
160 .Including mixing ratio control
161 ..By variable pump
162 .Predetermined mixing ratio
163 .Suction
164 ..By stirrer
165 .Causing rotary motion in mixing chamber (e.g., cyclonic)
166 .Print washer type
167 .Liquid injector within mixing chamber
168 ..With rotatable stirrer
169 ...Fed through stirrer or stirrer shaft
170 ....Rotating mixing chamber
171 ...With cooperative stationary element
172 ...Plural injectors
173 ..Plural injectors
174 ..With deflector
175 ...Rotating mixing chamber
176 .Pump forcing through restriction (e.g., emulsifier)
177 .Plural feeders
178 ..Concentric
179 ..Intermittent feed
180 ..Into rotating mixing chamber
181 ..Including chute or hopper
182 .Including means for controlling flow
183 .Static conveyer
184 WITH SPECIFIED DISCHARGE MEANS
185 .By tilting mixing chamber
186 .By endless belt or screw conveyer
187 .Rotatable or oscillatable mixing chamber
188 ..Closure-type discharge
189 .Batch discharge
190 .By pump within mixing chamber
191 .By suction or compressed air
192 .Valve or gate
193 ..Sliding gate
194 .With rotatable or oscillatable stirrer
195 ..Interrelated with discharge means
196 ..Discharge effected by stirrer
197 MIXING CHAMBER REMOVABLE FROM STIRRER AND SUPPORT
198 .Plural supports
199 .Removable power drive means
200 .Support rotatable only
201 ..Adjustable stirrer
202 .Support oscillatory only
203 .Support rectilinearly reciprocable only
204 .Mixing chamber mounted within container
205 .Stirrer mounted through mixing chamber bottom wall
206 .With motor control
207 .Adjustable
208 BY MOVEMENT OF SUPPORT FOR REMOVABLE MIXING CHAMBER
209 .Mixing chamber secured to support
210 ..Support oscillatory only
211 ...Motor driven
212 ..Support rectilinearly reciprocable only
213 ..Support rotatable only
214 ...And means to clamp plural mixing chambers
215 ..Support pivotally mounted by plural linkage
216 ..Support oscillatory with additional motion
217 ..Support rotates about plural axes
218 .Mixing chamber conveyed by support during agitation
219 BY MOVEMENT OF MIXING CHAMBER RELATIVE TO STATIONARY SUPPORT
220 .Mixing chamber rotatable only
221 ..With scraper
222 ..Interrelated stirrer and mixing chamber drive
223 ...Effecting counter rotation
224 ..With rotatable stirrer
225 ..With deflector
226 ...Foraminous type
227 ...Helical type
228 ...Attached directly to chamber wall
229 ....Additional deflector on support in chamber
230 ...Deflector stationary
231 ....Suspended within chamber
232 ..Mixing chambers supported by shaft at one end only
233 ..Roller or suspended support for mixing chamber
234 ..Foraminous mixing chamber
235 ..Plural mixing chamber
236 ..Rectangular mixing chamber
237 .Mixing chamber oscillating only
238 ..With stirrer
239 .Mixing chamber rocking only
240 .Mixing chamber rectilinearly reciprocating only
241 STIRRER WITHIN STATIONARY MIXING CHAMBER
242 .Mounted in removable mixing chamber closure
243 ..Oscillatory stirrer
244 ..Rotatable stirrer
245 ...Axis fixed
246 ....Coincident axes
247 ....Single stirrer
248 .....Bent bar
249 .....Motor driven
250 ......Fluid motor
251 ......Electric motor
252 .....Gear drive
253 ......With cooperative stationary element
254 ......Adjustable stirrer or stirrer element
255 ..Translatable stirrer
256 ...Rectilinearly reciprocable only
257 ....Plural stirrers
258 ....With rotary input drive
259 ....Actuated by pivoted lever
260 ....Spring return
261 .With means to move stirrer and support
262 .Pump type
263 ..Centrifugal
264 ...Impeller with outer stationary ring

	STIRRER WITHIN STATIONARY MIXING CHAMBER
	.Pump type
	..Centrifugal
265	...Impeller only
266	..Screw
267	..Piston
268	...Plural
269	...Inlet and outlet at same end of flow path
270	..Propeller blade type
271	.Endless conveyer with paddles
272	.Gear-type stirrer
273	.Magnetic stirrer
274	..Actuating means in base support
275	.Flexible diaphragm
276	.Oscillatory stirrer
277	..With additional motion
278	..Including rotatable input drive
279	.Rotatable stirrer
280	..With movable element actuated by material
281	..With support for attachment to mixing chamber rim
282	...With motor drive
283	...With gear drive
284	....Including adjustable rim contact support
285	..Adjustable
286	...Axially
287	..Planetary
288	...Axes of rotation and revolution parallel
289	..Also axially reciprocable
290	..In at least one of intercommunicating adjacent mixing chambers
291	...Plural stirrers on parallel axes in adjacent mixing chambers
292	..Plural stirrer
293	...Coaxial
294	....Differing in speed
295	....Diverse stirrers
296	....Rotating in opposite directions
297	...On parallel axes
298	....Differing in speed
299	....Diverse stirrers
300	....Rotating in opposite directions
301	....Intermeshing with each other
302	..With cooperative stationary element
303	...Interdigitating
304	....Parallel to axis of rotation
305	...Cylindrical or conical stirrer or element
306	...Element mounted on mixing chamber end wall
307	...Element mounted on cylindrical mixing chamber wall
308	..Collapsible articulated stirrer
309	..Including scraper, wiper, or brush
310	...Helical type
311	...Pivotally mounted on noncoincident axis
312	...Plural distinct scraping edges or wiping surfaces
313	....Axially offset
314	..Mounted in mixing chamber bottom wall
315	..Disk-type stirrer
316	...Apertured or notched
317	...With projection
318	..Screw-type stirrer
319	...With additional agitator elements on screw
320	...Openwork helical ribbon
321	...Opposite pitch
322	...Discontinuous screw
323	...Varying diameter of convolutions or shank or varying pitch
324	...Apertured or notched
325	..Relatively fixed plural elements
326	...Adjustable or flexible
327	...Of differing pitch
328	...Apertured or notched
329	...Diverse
330	...Propeller type
331	..With specified mounting means
332	.Rectilinearly reciprocable stirrer
333	..In contact with mixing chamber
334	..Plural
335	...On parallel axes
336	STATIONARY DEFLECTOR IN FLOW-THRU MIXING CHAMBER
337	.Angularly related flat surfaces
338	.Curved deflector surface
339	..Helical ribbon or strand
340	.Plate or block, being apertured, notched, of truncated in shape
341	STATIONARY MIXING CHAMBER
342	AGITATOR
343	.Stirrer
344	..With ejector
345	..Ambulant over material-supporting surface
346	...Track guided
347	COVER OR SHIELD FOR MIXING CHAMBER
348	METHOD

CLASS 367 COMMUNICATIONS, ELECTRICAL: ACOUSTIC WAVE SYSTEMS AND DEVICES

1 SONAR COUNTER-MEASURES
2 TRANSPONDERS
3 .Sonobuoys and sonobuoy systems
4 ..With component activating or deployment means
5 ..With plurality of sonobuoys
6 .With plurality of transponders
7 ACOUSTIC IMAGE CONVERSION
8 .Acoustic holography
9 ..Seismic display
10 ..Liquid or deformable surface holography
11 .With memory means
12 BEAM STABILIZATION OR COMPENSATION
13 TESTING, MONITORING, OR CALIBRATING
14 SEISMIC PROSPECTING
15 .Offshore prospecting
16 ..Transducer position control
17 ...Hydromechanical
18 ...Fluid variation
19 ..Transducer cable location determination
20 ..Multiple hydrophone cable systems
21 ..Signal processing
22 ...Transducer output weighting
23 ...Controlled source signalling
24 ...Reverberation removal
25 .Well logging
26 ..Threshold set system
27 ..Time interval measurement
28 ..Amplitude measurement
29 ...Peak amplitude
30 ...Amplitude comparison
31 ...Of noncompressional acoustic wave energy
32 ...Frequency dependent determination
33 ..Depth recording or control
34 ..Received signal cycle discrimination
35 ..Borehole or casing condition
36 .Land-refraction type
37 .Land-reflection type
38 ..Signal analysis and/or correction
39 ...Random signal correlation
40 ...Received correlation
41 ...Transmitted correlation
42 ...Standard correlation
43 ...Filters
44 ....Comb filters
45 ....Adaptive filters
46 ....Inverse filters
47 ...Amplitude
48 ...Phase
49 ...Frequency
50 ...Timing correction
51 ....Dynamic timing correction
52 .....Normal moveout
53 ....For dip
54 ....For weathering layer
55 ...Timing mark generation
56 ...Particular source-receiver array
57 ....Vertical receiver or source array
58 ...By receiver pattern arrangement
59 ...Compositing system
60 ....Special digital system
61 ....Beam steering
62 ....Array weighting
63 ....With preliminary signal processing
64 ...Optical processing
65 ...Gain control
66 ....Analog/digital compatible systems
67 ....Digital
68 ..Display systems
69 ...Well logging type
70 ...Color

73 ..Synthetic seismograms and models
74 ..Format conversion
75 ..Shear wave
76 ..Telemetry
77 ...Radio wave
78 ...Multiplex
79 ....Time
80 ....Frequency
81 WELLBORE TELEMETERING
82 .Through drill string or casing
83 .Through well fluids
84 ..Rotary valve control
85 ..Linear valve control
86 BOREHOLE TESTING
87 ECHO SYSTEMS
88 .Side scanning or contour mapping sonar systems
89 .Speed determination
90 ..By doppler effect
91 ...Vehicle mounted system for determining vehicle speed
92 .Parametric sonar
93 .Presence or movement only detection
94 ..By doppler effect
95 .Returned signal used for control
96 ..External device
97 ..Receiver system
98 ...Automatic gain or threshold control
99 .Distance or direction finding
100 ..With correlation or matched filtering
101 ..Frequency modulation
102 ...Linear modulation (e.g., sawtooth)
103 ..With beam steering, scanning, or focussing
104 ...By transducer movement
105 ...Transducer switching or gating
106 ..With towing
107 ..With indicator
108 ...Digital readout
109 ...Rotating lamp
110 ...Color display
111 ...Luminous array
112 ...Alarm
113 ...Cathode-ray tube
114 ...Meter
115 ...Permanent record
116 ...Audible or tactile
117 PLURAL TRANSMITTERS TO RECEIVER OR TRANSMITTER TO PLURAL RECEIVERS
197 SELECTIVE (E.G., REMOTE CONTROL)
198 .Humanly generated sound or speech responsive (e.g., human whistle)
199 .Frequency responsive actuation
118 DISTANCE OR DIRECTION FINDING
119 .With beam steering, scanning, or focussing
120 ..By transducer movement
121 ..By electrical means
122 ...Transducer switching or gating
123 ...With phase shifter or delay means
124 .By combining or comparing signals
125 ..Phase comparison and/or correlation
126 ..Addition or subtraction
127 .With time interval measuring means
128 .With electromagnetic wave
129 .With plurality of transducers
130 .With towing
131 UNDERWATER SYSTEM
132 .Analog speech communication
133 .Remote control
134 .Telemetering
135 RECEIVER CIRCUITRY
136 .Responsive to intruder energy
137 TRANSMITTER SYSTEMS
138 .With beam forming, shaping, steering, or scanning
139 .Animal control
140 SIGNAL TRANSDUCERS

SIGNAL TRANSDUCERS
141 .Underwater type
142 ..Exclusive-type transmitter
143 ...Hydraulically driven vibrator
144 ...Air guns
145 ...Explosives
146 ...Implosion devices
147 ...Spark discharge devices
148 ...Electrically driven underwater bells or sirens
149 ..Exclusive-type receiver
150 ..With modifying lens
151 ..With reflector
152 ..With impedance matching means
153 ..Plural transducer array
154 ...Line array
155 ...Piezoelectric
156 ...Magnetostrictive
157 ..Piezoelectric
158 ...Head and tail mass
159 ...Elongated cylindrical element
160 ...Bending type
161 ....Multimorph
162 ...With resonant or damping structure
163 ...With diaphragm
164 ...Single element having a plurality of electrodes
165 ...Specific support structure
166 ...Liquid filled
167 ...Pressure compensating means
168 ..Magnetostrictive
169 ..Elongated continuous type
170 ..Electret
171 ..Liquid filled transducer
172 ..Transducer with pressure compensating means
173 ..Transducer with support
174 ..Transducer with diaphragm
175 ...Diaphragm with electric driving coil
176 ..Transducer with resonant or damping structure
177 .Towed land cables
178 .Receivers
179 ..Pendulum type
180 ..Piezoelectric
181 ..Capacitive
182 ..Moving coil
183 ...Spider spring
184 ...Having arcuate movement
185 ..Moving magnet
186 ...Having arcuate movement
187 ...Spider spring
188 ..Casing or housing
189 .Vibrator-type transmitter
190 ..With feedback control

CLASS 368 HOROLOGY: TIME MEASURING SYSTEMS OR DEVICES

DECEMBER 1990

1 CONTROLLED BY A DISPARATE DEVICE
2 .Speed checker
3 .Game
4 .Telephone
5 .Engine (e.g., internal combustion)
6 .Vehicle (e.g., aircraft, automobile) or vehicle part
7 ..Actuation of a parking meter
8 ..Actuation of a running-time meter
9 .Electrical device
10 COMBINED WITH DISPARATE DEVICE
11 .Ambient condition detector
12 .External alarm
13 .Telephone
14 .Navigational instrument
15 ASTRONOMICAL
16 .With sun, earth, and moon display
17 .With sun and earth display
18 .With moon and earth display
19 .With tide display
20 .With navigational display
21 PLURAL TIME ZONES
22 .With manually actuated display
23 .With a world globe
24 ..Including illumination means
25 .With movable belt display
26 .With movable drum display
27 .With movable disk display
28 WITH CALENDAR INDICATOR
29 .Electro-optical
30 ..Liquid crystal display (i.e., LCD)
31 .Winding and setting
32 ..Having clutch coupling
33 .Winding
34 .Setting or resetting
35 ..Movable ring or disk
36 ...With clutch
37 .Movable ring or disk
38 ..With jumper spring
39 .Movable drum
40 .Movable belt
41 WITH MEMORANDUM HOLDER OR ERASABLE WRITING SURFACE
42 .Motion controlled by timepiece
43 .Having alarm controlled by holder
44 .Having pointer controlled by timepiece
45 TOY
46 PLURAL TIMEPIECE SYSTEM OR SYSTEM DEVICE (E.G., PRIMARY OR SECONDARY CLOCKS)
47 .With wireless synchronization
48 .With auxiliary power source
49 .With significant winding or setting means
50 ..For winding only
51 ..For setting only
52 .Primary with direct synchronization or drive
53 ..By external condition responsive means
54 ..By fluidic actuation means
55 ..By communication means
56 ..By signal frequency change
57 ..By signal amplitude change
58 ..By signal polarity change
59 .Secondary
60 ..With mechanical or electromechanical resetting
61 ...Having mechanically actuated electrical switch
62 CHRONOLOGICAL
63 .Phonetic (e.g., talking clock)
64 .With supplemental power source
65 .With fluidic actuation means
66 .With power monitor
67 .With auxiliary illumination for display
68 .With intensity control of display
69 .With manually actuated display
70 ..Operated sequentially for distinct time data
71 .With simultaneous time indicating means
72 ..Alarm type
73 ...Actuated by electrical means
74 ...With significant winding or setting
75 ..Sequential hourly sounding means
76 .With mechanical or electromechanical driven display
77 ..Rotating disk
78 ..Drum
79 ..Optical
80 ..Hand and dial
81 ...Having motor located in hand
82 .With electro-optical display
83 ..Solid body light emitter (e.g., LED)
84 ..Liquid crystal display (i.e., LCD)
85 .With pulse transforming means
86 ..Including transistor
87 ...Integrated circuit
88 .With significant casing or mounting support structure
89 TIME INTERVAL
90 .Parking meter type
91 ..With gravity actuated timer
92 ..With overtime indicator
93 .Gravity actuated type (e.g., hourglass)
94 ..With alarm means
95 ..With special support means
96 .With alternately operating indicators (e.g., chess clock)
97 .With predetermined mechanical timing means
98 ..Including alarm means
99 ...With combined alarm and time motor
100 ...With cam controlled striker
101 .Mechanical stop time type
102 ..With plural second hands (e.g., split-seconds)
103 ..With pivoted coupler
104 ..With sliding coupler
105 ..With positive stop
106 ..With reset means
107 .Electrical or electromechanical
108 ..For predetermined interval
109 ...Including alarm means
110 ..Mechanically actuated stop time type
111 ...With electronic memory storage
112 ...With reset means
113 ..Stop time type
114 ...With physically changeable element
115 ...Including cathode-ray tube oscilloscope
116 ....With brightner means
117 ....With variable delay means
118 ...Including time base oscillator
119 ....Plural
120 ...Including delay means
121 ...Including time indicating means actuated by voltage or electrical charge
122 ....With null indicator having variable circuit element
123 ....With vacuum-tube voltmeter
124 ESCAPEMENTS
125 .With oscillating or reciprocating means
126 ..Magnetic type
127 ..Balance wheel type
128 ...With motion conversion drive
129 ...Carrying impulse receiving means
130 ....On balance shaft
131 .....With pallet lock
132 ...With levers
133 ....In straight-line configuration
134 ..Pendulum type
135 ...With motion conversion drive
136 ...With gravity actuation
137 ...With beat adjuster
138 ....Having a verge
139 MECHANICAL TIME BASE

MECHANICAL TIME BASE
140 .Mainspring
141 ..With protection means
142 ..With mainwheel on barrel
143 ..With mainwheel on arbor
144 ..With attachment means for spring
145 ..With winding and setting
146 ...Stem
147 ..With winding
148 ...Self
149 ....Electric
150 .....Weight controlled
151 ....Spring
152 ...Gravity
153 ...Case controlled
154 ..With spring click
155 ELECTRICAL TIME BASE
156 .Solid state oscillating circuit type
157 ..For reciprocating or oscillating element
158 ...Balance wheel type
159 ...Crystal
160 .For reciprocating or oscillating element
161 ..Balance wheel type
162 ...With coil
163 ...With magnet
164 ...With opening and closing of contacts
165 ..Pendulum
166 ...With drive means control
167 ..Tuning fork
168 OSCILLATING OR RECIPROCATING MEANS
169 .Balance wheel type
170 ..With regulation
171 ...By compensation
172 ...By rack and pinion
173 ...By screw
174 ....With spring bias
175 ...By hairspring
176 ....With curb pins
177 ....With collet
178 ....With stud
179 .Pendulum type
180 ..Torsion
181 ..With regulation
182 ...By thermal compensation
183 ..With lock
184 REGULATING MEANS
185 .For setting
186 ..With rate regulation
187 ..By electrical device actuation
188 ...With single actuation and plural pulses
189 ...With pulse blocking means
190 ..By winding means (e.g., stem)
191 ...Having a clutch
192 ....With lever engagement
193 .....Coupling
194 ......To notch in stem
195 ....With coupling spring biased
196 ...Having a movable plate
197 ....With double gear
198 .....Cam engagement
199 .....Lever engagement
200 .For adjusting the frequency or beat
201 ..Of frequency divider
202 .For compensation
203 POWER SUPPLY DETAILS
204 .Electrical
205 ..Solar cell
206 WINDING MEANS
207 .Self
208 ..Inertia
209 .With overwind prevention
210 .With condition indicator
211 ..Audio
212 ..Pointer and scale
213 .For cranked lever
214 .Key
215 .Rim
216 .Stem
217 PULSE TRANSFORMING MEANS
218 .With transistor
219 ..Field-effect transistor
220 DISPLAY TRAINS
221 .For rotatable disk dial type
222 .For drum or plate dial type
223 DISPLAYS OR DISPLAY DEVICE DETAILS
224 .With manual activation
225 ..By motion or position
226 .With luminous material
227 .With auxiliary illumination for display
228 .Dial or hand
229 ..With animation (e.g., motion clock)
230 ..For tactile time perception (e.g., braille clock)
231 ..With time indicia shifting means
232 ..Including dial details only
233 ...Of rotatable disk type
234 ...Translucent
235 ...Of drum or plate type
236 ...Of dial fasteners
237 ....Screw
238 ..Including hand details only
239 .Optical
240 ..With circular pattern of light sources
241 ..With solid body light emitter (e.g., LED)
242 ..With liquid crystal display (i.e., LCD)
243 SIGNALLING MEANS
244 .Time condition responsive (i.e., alarm)
245 ..With variable loudness or tone
246 ..With same day plural time selection
247 ..For more than one day (e.g., eight-day clock)
248 ..With automatic repetition over short interval
249 ..With signal condition indicator
250 ..Electrical
251 ...With electronic memory storage
252 ...With contact on a circle
253 ...With contact on a hand
254 ...With cam control
255 ...With piezoelectric means
256 ...With optical signal
257 ...With mechanical let-off
258 ....Having alarm winding arbor
259 ...With combined alarm and time motor
260 ..With combined alarm and time motor
261 ..Plural
262 ..With shutoff
263 ...For short period
264 ...Having spring wind release
265 ..With let-off
266 ...Setting
267 .Repeat
268 ..Double snail
269 .Cam controlled
270 ..Snail
271 ..Pin
272 .Musical (e.g., "cuckoo-clock")
273 ..Chimes
274 .Recorded
275 .With deactivation during setting
276 CASES
277 .Adaptable
278 .Combined with disparate device
279 ..Ring
280 .Of particular material
281 .Wrist worn
282 ..With band or bracelet details
283 ..With a cover
284 .With tubular shape
285 .With ornamentation
286 .With protection means

CASES
.With protection means
287 ..Shock absorbing
288 ..For crown or stem
289 ...By waterproofing
290 ....Push-button stem type
291 ..Waterproofing
292 ...Noncircular-type case
293 ..Antimagnetic shielding
294 .With bezel or crystal details
295 ..Of bezel only
296 ..Of crystal only
297 .With details of center
298 ..Integral to front or back
299 .With movement ring details
300 .With movement securing means
301 .With pendant details
302 ..Bow
303 ...Fastener
304 ....Pin or screw
305 ....Sleeve
306 ..Crown or stem
307 ...Fastener
308 .With crown or stem details
309 .With front or back details
310 ..Of screw-threading to case center
311 ..Of opening spring
312 ...Cover connection
313 ..Of hinge connection
314 .With dial or sash securing means
315 .With alarm or striking attachment
316 .With support details
317 ..Base
318 PLATE DETAILS
319 CROWN OR STEM DETAILS
320 .Switch or detent
321 ..Electrical
322 ARBOR AND PINION DETAILS
323 CANNON PINION DETAILS
324 STAFF AND BEARING DETAILS
325 .Balance
326 ..For protection (e.g., shock absorbing)
327 MISCELLANEOUS

CLASS 369 DYNAMIC INFORMATION STORAGE OR RETRIEVAL

DECEMBER 1990

1 COMBINED INDEPENDENT AUDIO SYSTEMS
2 .Changeover between audio systems
3 ..Fading between plural signals
4 .Combining signals to form composite (e.g., mixing)
5 .One of systems having plural concurrent signals (e.g., stereophonic)
6 .Radio
7 ..Including recording from radio
8 ..Oscillator modulated by retrieved information signal
9 ..Mechanical phonograph
10 ..With common cabinet for cartridge or cassette
11 ..Including separable assembly
12 ..Cabinet details
13 STORAGE DIFFERENT FROM RETRIEVAL (E.G., OPTICAL RECORDING AND MAGNETIC REPRODUCTION)
14 SIMULTANEOUS DIVERSE TYPES OF STORAGE OR RETRIEVAL
15 ALTERNATIVE DIVERSE TYPES OF STORAGE OR RETRIEVAL
16 MECHANICAL PRODUCTION OF OPTICAL STORAGE TRACK
17 TRACK CONVERSION
18 OPTICAL READING OF MECHANICAL RECORD

****
CLASS 360 IS AN INTEGRAL....
PART OF CLASS 369 AS SHOWN..
BY THE POSITION OF THIS BOX.
****

19 CONTROL BY TIMER OR EXTERNAL EXTRANEOUS CONDITION
20 .By diverse art device
21 ..In vehicle or elevator
22 ..Audible indicator
23 ...Talking clock
24 OPERATOR-ACTUATED REMOTE CONTROL OR INFORMATION LOCATION
25 .Dictation or transcribing
26 ..Privacy
27 ..With access to or marking of specified location (e.g., indexing)
28 ...By stored additional signal (e.g., tone)
29 ..Remote station (e.g., multiple stations or recording devices)
30 .Selective addressing of storage medium (e.g., programmed access, "juke box")
31 ..Novelty device (e.g., talking doll)
32 ..With specified electrical information signal processing
33 ..With specified electrical control signal processing
34 ...Plural storage medium elements
35 ..Plural nontranslating storage elements (e.g., in situ)
36 ..With unitary plural disc carrier
37 ...Radial array
38 ...Moving linear array
39 ...Scanning turntable
40 ..By manually actuated mechanism for movement of tone arm
41 ..Of track on single storage medium
42 .By mechanical linkage
43 WITH SERVO POSITIONING OF TRANSDUCER ASSEMBLY OVER TRACK COMBINED WITH INFORMATION SIGNAL PROCESSING
44.11 .Optical servo system
44.12 ..Solid state optical element with plural dissimilar optical components (e.g., using I.C. block, etc.)
44.13 ..Dithering or wobbling the beam or track
44.14 ..Optical head servo system structure
44.15 ...Elastic, flexible, pliant or spring support of lens or mirror
44.16 ....Flat flexible support (e.g., parallel leaf spring, etc.)
44.17 ...Optical head element with rotary motion
44.18 ....Rotary head wheel or scanner (e.g., for use with arcuate, transverse or slant tracks, etc.)
44.19 ....Head element pivots on arm (e.g., optical head disk arm etc..)
44.21 ....Lens or mirror pivots off center (e.g., on a shaft, etc.)
44.22 ...Lens or mirror floats, (e.g., magnetic field support or lens/mirror can freely float and pivot about its own axis, etc.)
44.23 ...Structure for shaping beam or causing astigmatic condition
44.24 ....Means to mask or shield a portion of the beam
44.25 ..Servo signal compared to a reference signal
44.26 ..Servo system operation related to disc structure information format
44.27 ..Initialization/start-up or changing modes of system
44.28 ...While track jumping or crossing
44.29 ...Servo loop gain/switching control
44.31 ....Recording
44.32 ..Means to compensate for defect or abnormal condition
44.33 ...Recording (e.g., inhibit recording upon defect, etc.)
44.34 ..Sampling servo system
44.35 ..Servo loop gain/switching control
44.36 ...Variable gain
44.37 ..Plural incident beams
44.38 ...Recording
44.39 ..Recording
44.41 ..Arithmetic operation using plural photodetectors
44.42 ...Beam or detector is not rectangular or circular
47 CONTROL OF STORAGE OR RETRIEVAL BY A SIGNAL TO BE RECORDED OR REPRODUCED (E.G., PILOT OR CONTROL SIGNAL)
48 .Control of information signal channel
49 ..Of plural interrelated channels
50 .Mechanism control by information signal (e.g., voice responsive)
51 ..Control of spiral track spacing (e.g., signal variable pitch)
52 CONTROL STRUCTURE ON STORAGE MEDIUM SENSED BY OTHER THAN TRANSDUCER SUPPORT (E.G., CONDUCTIVE STRIP, NOTCHED EDGE SENSOR)
53 WITH CONDITION INDICATING (E.G., MONITORING) OR TESTING
54 .With radiation storage or retrieval
55 .Of transducer
56 ..Location on storage medium
57 ..Positioning adjunct (e.g., indexing)
58 .Of record carrier
59 WITH BINARY PULSE TRAIN INFORMATION SIGNAL
60 SIGNAL PROCESSING BY STORAGE AND SUBSEQUENT RETRIEVAL (E.G., FREQUENCY SHIFT, DELAY)
61 STORAGE OF DIRECTLY RETRIEVABLE MODULATED R.F. OR SUPERAUDIBLE CARRIER SIGNAL
62 STORAGE OF SIGNAL MODULATING COMPONENT
63 SOUND REPRODUCTION FOR TOY OR NOVELTY DEVICE (E.G., TALKING DOLL)
64 .With electrical information signal processing
65 .Indexing to track (e.g., consecutive)
66 ..By chance

SOUND REPRODUCTION FOR TOY OR NOVELTY DEVICE (E.G., TALKING DOLL)
67 .With beginning or end of cycle stylus return
68 .Manual motion application (e.g., novelty card, hand-held stylus)
69 SYSTEMS OR SUBSYSTEMS COMBINED WITH DIVERSE ART DEVICE
70 .For control of diverse art device
71 WITH STYLUS CLEANING OR TREATMENT (E.G., GRINDING)
72 WITH STORAGE MEDIUM CLEANING OR ELECTROSTATIC CHANRGE NEUTRALIZATION
73 .By charge leakage (e.g., ionized particles)
74 .By tone arm attachment
75.1 WITH PARTICULAR CABINET STRUCTURE
75.2 .With mechanism to place disc on a turntable
76 .With electrical information signal processing
77.1 .Slotted for edgewise insertion of storage disc
77.2 ..Having disc stored in protective jacket
78 .With lid-mounted transducer assembly carrier
79 .With closure-operated interlock or braking actuator
80 .Particular acoustical structure (e.g., baffle)
81 ..Having collapsible or expandable acoustic path
82 ..Having parallel acoustic paths
83 EDITING OF STORED INFORMATION
84 DUPLICATION OR COPYING (E.G., RERECORDING)
85 .To diverse type of storage medium
86 STORAGE OR RETRIEVAL OF SPATIALLY RELATED ACOUSTIC SIGNALS (E.G., STEREO)
87 .Simulated spatial effect (e.g., pseudo-stereo)
88 .With transformation or intentional distortion of information signal (e.g., preemphasis)
89 .Quadraphonic
90 ..Including modulated subchannel signal
91 .Having distinct electrical channels
92 .Including distinct storage tracks on record medium
93 SYSTEMS HAVING PLURAL PHYSICALLY DISTINCT INDEPENDENT TRACKS ON A SINGLE STORAGE MEDIUM SURFACE
94 .Having layered storage medium
95 .Common time base (i.e., simultaneous)
96 .Continuous consecutive storage or retrieval of interrupted track for single signal (e.g., automatic reversal)
97 ..Tracks transverse to a motion component
98 .Indexing to discrete signal tracks (e.g., consecutive, by chance)
99 SPECIFIC DETAIL OF INFORMATION HANDLING PORTION OF SYSTEM
100 .Radiation beam modification of or by storage medium
101 ..Invisible radiation (e.g., electron beam or X-ray)
102 ..Multiplex
103 ..Holographic
104 ..Ribbon light modulator
105 ..Penumbra or push-pull optical system
106 ..Optical feedback
107 ..Ground noise suppression, signal envelope, or plural optical modulation
108 ..Color
109 ..With diffraction (e.g., pits, grating)
110 ..By polarization
111 ..Spiral or helical track
112 ..With particular imaging element
113 ..With medium contacting drum or gate in optical system (e.g., sound head)
114 ...Movable roller support for optical path
115 ...With driving or stabilizing mechanism
116 ..Light intensity adjustment or maintenance
117 ..Having movable shutter or light gate
118 ..With detail, configuration, or adjunct of element having slit or aperture in radiation path
119 ...With movement of optical beam (e.g., galvanometer)
120 ..Having particular radiation sensor
121 ..With particular light source (e.g., laser, CRT with phosphor)
122 ...Solid state
123 ...Glow lamps
124 ..With details of electrical signal procesing
125 ..Having photographic storage medium (e.g., variable density or area)
126 .Electrical modification or sensing of storage medium (e.g., capacitive, resistive, electrostatic charge)
127 .Mechanical modification or sensing of storage medium
128 ..With electrical information signal processing
129 ...From information modulated oscillator
130 ...Sensing of elastic deformation or relaxation of storage medium (e.g., skid type)
131 ...Bidirectional information flow (e.g., record/replay switching)
132 ...Recording
133 ....With transformation or intentional distortion of information signal (e.g., compensation for velocity variation with diameter)
134 ...With particular amplification characteristic or signal control circuitry (e.g., muting)
135 ..Specified structure of electrical transducing assembly
136 ...Multichannel (stereo cartridge)
137 ....By stress application to solid transducing element (e.g., piezoelectric)
138 .....With adjustable or replaceable stylus coupling structure
139 ....With details of damping or compliance
140 ...Plural styli
141 ...Plural alternative or with signal handling adjunct
142 ...Stylus controlled optical element
143 ...Electron tube
144 ...Electret or piezoelectric
145 ...Semiconductive
146 ...Magnetic field variation (e.g., magnetostrictive)
147 ....Moving signal coil
148 ....Variable reluctance
149 .....Fixed coil surrounding fixed part of magnetic path
150 ...Capacitive or electrolytic liquid
151 ...Electrostatic or capacitive
152 ...Variable resistance
153 ..Including treatment to facilitate storage (e.g., storage medium softening)
154 ...Heating (e.g., heated stylus)

SPECIFIC DETAIL OF INFORMATION HANDLING PORTION OF SYSTEM
.Mechanical modification or sensing of storage medium
155 ..Mechanical conversion to or from sound
156 ...Including fluid coupling in force linkage
157 ...Sound box with mounting structure
158 ...Acoustical tone arm
159 ....Having plural acoustical paths
160 ...Sound box
161 ....With interchangeable styli
162 ....Including stylus pivoted from fixed casing
163 ....With sound modification
164 ....Convertible between lateral and perpendicular modulation modes
165 ....Perpendicular mechanical modulation
166 .....Recording
167 .....With mechanical amplification (e.g., frictional coupling)
168 .....Floating weight
169 ....Lateral mechanical modulation
170 ..Stylus holder or shield
171 ...With structure to interchange styli
172 ....By replacement
173 ..Stylus
174 .Including signal modification
175 ..Frequency dependent (e.g., separation)
176 DYNAMIC MECHANISM SUBSYSTEM
177 .Having stationary storage medium
178 .Access of multiple storage elements (e.g., record changer)
179 ..Cylindrical storage element
180 ..Flexible disc
181 ..Stack height adjustment for tone arm or turntable
182 ..Numerical count shut-off
183 ..Cam shaft transverse to turntable spindle axis of record changer
184 ..Tone arm position control by sensing of disc (e.g., disc or hole size)
185 ...Disc size sensor on or using tone arm
186 ...Stepped tone arm stop element
187 ...Disc size sensor in feed path
188 ...Disc size sensor at turntable position
189 ..Turntable speed control
190 ...By sensing of disc (e.g., disc or hole size)
191 ..Storage disc fed to and removed from turntable
192 ...Plural disc holder having unitary separating structure
193 ...Grouped removal with sequential feed
194 ...Coplanar storage
195 ...Both sides of disc used
196 ..Separate motors operate turntable and disc change mechanism
197 ..Plural turntables
198 ...Plural tone arms
199 ..Both sides of disc used
200 ...By inverting disc
201 ..Discs sequentially removed from turntable
202 ..Discs sequentially fed to turntable
203 ...Tone arm set down adjustment
204 ...By edge controlled feeding of disc
205 ....With feed cooperating structure on spindle
206 ...By center hold feeding of disc (e.g., spindle drop)
207 ....Support mechanism adapter for large hole records on small hole spindles
208 ....Having specified spindle structure
209 .....Umbrella type
210 .....Having shoulder and ejector lever
211 ......With edge stabilizer
212 ..Auxiliary structure (e.g., shut-off preventer, disc spacer)
213 .Additional motion of storage element support to effect tracking
214 ..Cylindrical storage element
215 .Having power driven transducer assembly
216 ..Having tone arm set-down control
217 ...By disc sensing (e.g., by sensed disc or hole size)
218 ..Having groove engaging driving element
219 ..With drive transverse to storage track during storage or retrieval
220 ...Controlled by transducer assembly support
221 ...With additional drive (e.g., scanning, restoring, or return)
222 ...Having pivoted tone arm
223 ...By lead screw
224 ..With passive linear tracking
225 ..Restoring after passive tracking
226 ...Responsive to transducer support condition (e.g., movement or position)
227 ....Numerical count replay
228 ....Controllable position
229 ...Turntable mounted template
230 ..Power cueing (i.e., engage/disengage)
231 .Mechanism responsive to control structure on storage medium sensed by transducer assembly support (e.g., trip device)
232 ..With turntable braking (e.g., velocity or reverse responsive)
233 .Mechanism condition or storage medium responsive control
234 ..With turntable braking (e.g., tone arm position responsive)
235 ...With stopping of motor
236 ...Adjustable
237 ...With electrical control of brake
238 ...End limit sensor coupled with tone arm
239 ..Speed
240 ...Variable radius compensation (e.g., constant interaction speed)
241 ...Self-responsive (e.g., governor)
242 ..Antiskating
243 ..Energizing circuit
244 .Specific detail of transducer assembly support structure (e.g., tone arm)
245 ..With manual tone arm displacement adjunct (e.g., cueing)
246 ...With viscous limiting of motion (e.g., rate damping)
247 ..Vibration or resonance suppression (e.g., damping)
248 ...By viscous damping
249 ..Having linear guide
250 ..Pivoted arm with tracking path compensation
251 ..Having application of counterbalancing force
252 ...Lateral (e.g., antiskating)
253 ...By resilient force element (e.g., spring)
254 ...Specified weight mounting
255 ..Having specified bearing structure
256 ..Mechanical details of cartridge mounting
257 ..Rest
258 .Specific detail of storage medium support or motion production
259 ..For endless web looped about plural rotatable mounts (e.g., belt)
260 ..For cylinder
261 ..For pliable (e.g., floppy) disc
262 ..With storage medium removal adjunct

DYNAMIC MECHANISM SUBSYSTEM
.Specific detail of storage medium support or motion production
263 ..Mounting structure for support or motion producing assembly (e.g., vibration damping
264 ..Turntable
265 ...With auxiliary turntable
266 ...Driving mechanism
267 ....Speed changing
268 ...Braking
269 ...Bearing structure
270 ...Disc holding or locating (e.g., spindle structure)
271 ....With detail of storage medium contact structure on turntable surface
272 STORAGE MEDIUM STRUCTURE
273 .Combined with diverse art structure
274 .Composite (e.g., package with preview record)
275.1 .Optical track structure (e.g., phase or diffracting structure, etc.)
275.2 ..Erasable, reversible or re-recordable
275.3 ..Track data format/layout
275.4 ..Pit/bubble/groove structure specifies
275.5 ..Protection (e.g., preventing damage to medium, etc.)
276 .Electrical track structure
277 .Special groove (e.g., particular groove shape)
278 ..Groove acts as control system signal
279 ..Guide during storage or retrieval
280 .Specific disc profile
281 ..With interdisc coupling
282 .Specified center hole or locating structure
283 .Layered (e.g., permanent protective layer)
284 ..Radiation beam modified or controlling (e.g., photosensitve, optical track)
285 ...With mask
286 ..Laminated or unified discrete layers
287 .Flexible
288 .Specified material
289 .Adjuncts or adapters
290 ..For central area of disc (e.g., hole size or drive sticker)
291 ..Protectors
292 MISCELLANEOUS

CLASS 370 MULTIPLEX COMMUNICATIONS

DECEMBER 1990

1	OPTICAL
2	.Polarization
3	.Frequency division
4	.Time division
5	PHANTOM
6	CROSS TALK SUPPRESSION
7	AMPLITUDE COMPRESSION/EXPANSION
8	PULSE WIDTH AND PULSE POSITION MODULATION
9	PULSE WIDTH (PULSE DURATION) MODULATION
10	PULSE POSITION MODULATION
125	SIMULTANEOUS TELEGRAPHY AND TELEPHONY
11	PLURAL DIVERSE MODULATION TECHNIQUES
12	PHASE MODULATION
13	TESTING (OTHER THAN SYNCHRONIZATION)
13.1	.Of repeater
14	.Path check
15	.Loopback
16	.Alternate routing in response to failure
16.1	..Loop or ring
17	.Determination of communication parameters
18	CODE WORD MULTIPLEX
19	GENERALIZED ORTHOGONAL OR SPECIAL MATHEMATICAL TECHNIQUES
20	.Quadrature carries
21	.Particular set of orthogonal functions
22	..Walsh functions
23	.Fourier transform
24	DUPLEX
25	.Artificial line
26	.Duplex repeaters/extenders
27	.Differential
28	.Bridge
29	.Time division
30	.Frequency division
31	.Convertible to half duplex
32	.Transmit/receive interaction control
32.1	..Echo suppression or cancellation
33	SEXTUPLEX
34	QUADRUPLEX
35	.Repeaters
36	.Duplex diplex
37	DIPLEX
38	PLURAL USAGE OF COMMON ANTENNA
39	.Common heterodyne stage
40	.Carrier control to prevent interaction among connected devices
41	LOW SPEED ASYNCHRONOUS DATA SYSTEMS (E.G., TELETYPEWRITER SERVICE)
42	.Data switching exchanges
43	.Data assembly or formatting
44	.Transmitting time of transition and logic state
45	.Channels separated in frequency
46	.Rotary distributor
47	..Synchronizers
48	...Start-Stop
49	....Nonmechanical
49.5	TRANSMULTIPLEXERS
50	COMBINED TIME DIVISION AND FREQUENCY DIVISION
51	RESONANT TRANSFER TECHNIQUES
52	RESONANT TRANSFER SUBSTITUTES
53	MULTIPLEX SWITCHING
54	.Pathfinding
55	.Drop channel
56	.Concentrators
57	.FDM Switching (Frequency Division Multiplexing)
58.1	.TDM switching (time division multiplex)
58.2	..Control processing
58.3	...Distributed
59	..T-S (Time-Space) or S-T
60	..Packet or addressed data
60.1	...Combined with circuit switching
61	..Store and forward
62	..Special services with switching (e.g., conference)
63	..TST (Time-Space-Time)
64	..STS (Space-Time-Space)
65	..Folded network
65.5	..Space stage per se
66	..Time only
67	...Bus switch
68	..Time slot interchangers per se
68.1	..With signalling feature
69.1	FREQUENCY DIVISION
120	.Multiple frequency translations
121	.Carrier generation
122	.Angle modulation
123	.Filtering techniques
70	.Digital analysis or synthesis of group
71	.Subscriber carrier
72	..Connecting filters
73	..Program distribution
124	.Bus (distributed stations)
74	.Pilot
75	.Repeaters
76	.Signalling
77	TIME DIVISION
78	.Polarity multiplex
79	.Adaptive systems
80	..Only active channels transmitted
81	...TASI (Time assigned speech interpolation)
82	..Frame length
83	..Byte length
84	..Rate
85.1	.Bus transmission
85.2	..Contention
85.3	...Carrier sense
85.4	...Token passing
85.5	....Loop or ring
85.6	..Priority
85.7	..Variable channel assignment
85.8	...Polling
85.9	..Plural bus
85.11	...With separate control bus
85.12	...Loop or ring
85.13	...Bridge between bus systems
85.14	....Interconnection between ring or loop
85.15	..Loop or ring
91	.Asynchronous and nonsynchronous
92	..Address transmitted
93	...Multiple access, discrete address
94.1	...Packet
94.2	....Combined with synchronous information
94.3	....Star, tree or mesh networks
95.1	.Variable channel assignment
95.2	..Polling
95.3	..Time division multiple access
97	.TDM pulse repeater
98	.Pilot
99	.Byte assembly and formatting
100.1	.Synchronizing
101	..Reference indication consists of a gap
102	..Pulse stuffing or deletion
103	..Mutual (reciprocal) synchronization
104.1	..Moving satellite
105	..Distributed
105.1	..Frame
105.2	..Channel
105.3	..Bit phase or jitter
105.4	..Unique synchronization word
105.5	..Unique synchronization pulse
106	..Plural synchronizing words
107	..Pseudo-random
108	..Including delay device
109	.Time compression or expansion
110.1	.Signalling (ancillary to main information)
110.2	..Digital tone signal generation
110.3	..Digital tone detection

	TIME DIVISION
	.Signalling (ancillary to main information)
110.4	..Superimposed or modulated on principal information
111	..Inserted in gaps in main information
112	.Multiplexers/distributors (hierarchy and level)
113	..Apparatus and techniques for handling low level input signals
114	..Pulse amplitude modulation
115	..Electron beam switcing device
116	.Staircase wave
117	.Magnetic core for switching or storage
118	TRANSMISSION BANDWIDTH CONSERVATION
119	Miscellaneous

CLASS 371 ERROR DETECTION/CORRECTION AND FAULT DETECTION/RECOVERY

1	SKEW DETECTION/CORRECTION
2.1	DATA FORMATTING TO IMPROVE ERROR DETECTION/CORRECTION CAPABILITY
2.2	.Memory access (e.g., address permutation)
3	TESTING OF ERROR-CHECK SYSTEM
4	ERROR/FAULT ANTICIPATION
5.1	ERROR COUNT OR RATE
5.2	.Pseudo-error rate
5.3	.Up-down counter
5.4	.Synchronization control
5.5	.Shutdown or establishing system parameter (e.g., transmission rate)
6	DATA PULSE EVALUATION/BIT DECISION
7	APPARATUS FAULT RECOVERY
8.1	.Replacement with spare device or system
8.2	..Transmission facility or channel
9.1	..Standby data processor or computer
10.1	..Memory
10.2	...Spare location, portion or segment
10.3	....Spare row or column
11.1	.Reconfiguration
11.2	..Transmission facility
11.3	..Data processor or computer
12	.Program restart/operation retry
13	..Storage readout
14	.Fail-safe shutdown
15.1	DIAGNOSTIC TESTING
16.1	.Programmable processor testing
16.2	..Emulator device
16.3	..Watchdog timer (e.g., time-out)
16.4	..Processor within diverse device (microwave, photocopier)
16.5	..Error or fault, logging or tracking
17	..Operator controlled
18	..Dedicated maintenance subsystem
19	.Testing of computer programs
20.1	.Transmission facility testing
20.2	..For channel having repeater
20.3	..By tone signal
20.4	..Test pattern with comparison
20.5	...Loop-back
20.6	..Loop or ring configuration
21.1	.Memory
21.2	..Read-in with read-out and compare
21.3	...Special test patterns (e.g., checkerboard, walking ones)
21.4	..Electrical parameters (e.g., threshold voltage)
21.5	..Arithmetic function of memory contents
21.6	..Error mapping or logging
22.1	.Digital logic testing
22.2	..Programmable logic array (PLA) testing
22.3	..Scan path testing (LSSD)
22.4	..Signature analysis
22.5	..Built-in testing circuit (BILBO)
22.6	..Structural (in-circuit test)
23	.Fault simulation/circuit simulation
24	.Device response compared to input pattern
25.1	.Device response compared to expected fault-free response
26	.Device response compared to fault dictionary/truth table
27	.Including test pattern generator
28	.Determination of marginal operation limits
29.1	.Error or fault, logging or tracking (e.g., status display)
29.5	.Bus fault testing
30	DIGITAL DATA ERROR CORRECTION
31	.Substitution of previous valid data
32	.Request for retransmission
33	..Retransmission if no ACK returned
34	..Feedback to transmitter for comparison
35	..Including forward error correction capability
37.1	.Block code
37.2	..Double error correcting with single error correcting code
37.3	..Error correction during refresh cycle
37.4	..Double encoding codes (e.g., product, concatenated)
37.5	...Cross-interleave reed-solomon code (CIRC)
37.6	..Parallel generation of check bits
37.7	..Error correcting code with additional error detection code (e.g., cyclic redundancy character, parity)
37.8	..Look-up table encoding or decoding
37.9	..Threshold decoding (e.g., majority logic)
38.1	..Random and burst error correction
39.1	..Burst error correction
40.1	..Memory access
40.2	...Error correct and restore
40.3	...Error pointer
40.4	...Check bits stored in separable area of memory
41	..Adaptive error-correcting capability
42	..Synchronization
43	.Convolutional code
44	..Random and burst errors
45	..Burst errors
46	..Synchronization
36	.Majority decision/voter circuit
47.1	ERROR DETECTION FOR SYNCHRONIZATION CONTROL
48	ERROR/FAULT DETECTION TECHNIQUES
49.1	.Parity bit
49.2	..Parity generator or checker circuit detail
49.3	..Even and odd parity
49.4	..Parity prediction
50.1	..Plural dimension parity check
51.1	..Storage accessing (e.g., address parity check)
52	.Constant-ratio code (m/n)
53	.Check character
54	..Modulo-n residue check character
55	.Code constraint monitored
56	..Multilevel coding (n>2)
57.1	.Forbidden combination or improper condition
57.2	..Specified digital signal or pulse count
59	..Two key-down detector
60	..Improper operation sequence
61	..Data timing/clocking
62	..Time delay/interval monitored
63	..Two-rail logic
64	..Noise level
65	..Missing-bit/drop-out detection
66	..Power failure
67.1	.Comparison of data
68.1	..Plural parallel devices of channels
68.2	...Transmission facility
68.3	...Data processor or computer
69.1	..Sequential repetition
70	...True and complement data
71	..Device output compared to input

CLASS 373 INDUSTRIAL ELECTRIC HEATING FURNACES

DECEMBER 1990

1 PLURAL DIVERSE HEATING MEANS
2 .Arc
3 ..With resistance
4 ..With induction
5 .Resistance
6 ..With induction
7 .Induction
8 ENVIRONMENTAL CONTROL
9 .Arc furnace
10 ELECTRON BEAM FURNACE DEVICE
11 .Vaporizing furnace
12 ..Power supply and control circuit
13 ..Gun assembly
14 ...With deflection control
15 .Ingot remelting
16 .With plural beam devices
17 .Zone melting
18 PLASMA FURNACE DEVICE
19 .Indirect heating
20 ..Rotary furnace
21 .Remelting furnace (i.e., ingot remelting)
22 .Direct furnace (i.e., plasma flame impinges on the melt)
23 ..Expanded arc column
24 ..Sidewall mounted plasmatron
25 ..Control system
26 GLOW DISCHARGE FURNACE DEVICE
27 GLASS FURNACE DEVICE
28 .Filament discharge (i.e., bushing)
29 .Joule effect heating
30 ..Furnace body detail
31 ...Multi-chamber
32 ....With heating between chambers
33 ..Charging or discharging
34 ...Including batch pre-heating
35 ...Including discharge area heating
36 ..Electrode assembly
37 ...Protection means
38 ...Holder
39 ..Electrical system
40 ...Regulation
41 ...Electrode arrangement (e.g., array)
42 ELECTROSLAG REMELTING DEVICE
43 .Plural furnace units
44 .Body detail
45 ..Crucible
46 .Start-up
47 .Power supply system
48 ..Conductor arrangement
49 ..Control
50 ...By changing electrode position
51 .Electrode replacement
52 .Electrode support
53 ..Plural electrodes
54 .Electrode
55 ..With protective shield
56 WITH CONDENSATING DEVICE
57 .Including resistance furnace detail
58 ..With open circuit (i.e., charge internal resistance heating)
59 .Including induction furnace detail
60 ARC FURNACE DEVICE
61 .Indirect
62 ..Arc between spaced electrodes
63 ...Charge fed into space
64 ...With arc deflection means
65 ..Arc between electrode and crucible exterior
66 ..Combined with or convertible to direct arc furnace
67 .Ingot remelting
68 ..With internal atmosphere control (e.g., pressure, vacuum, etc.)
69 ..With electrode holder or guide
70 ..With power regulation
71 .Furnace body detail
72 ..Hearth or crucible
73 ..Roof
74 ...With cooling
75 ..Sidewall
76 ...With cooling
77 ..With internal atmosphere control (e.g., pressure, vacuum, etc.)
78 .Plural furnace units
79 .Charging or discharging
80 ..With charge pre-heating
81 ..Top charging
82 ...Through electrode
83 ..Bottom pour
84 ..Discharge by tilting
85 .For manipulation of the charge or melt (e.g., stirring)
86 ..Mechanical
87 ..Crust breaking device
88 .Electrode
89 ..Self-baking (i.e., Soderberg)
90 ..Non-consumable
91 ..Sectional
92 ...With means to join sections
93 ..Composite (e.g., water cooled body with carbon tip)
94 .Electrode support
95 ..Seal
96 ..With electrode shield
97 ..For Soderberg electrode (e.g., casing)
98 ..Mast
99 ...Crosshead
100 ..Slipping holder
101 ..With electrical contact or terminal
102 .Power supply system
103 ..Cable or cable suspension arrangement
104 ..With power regulation
105 ...By changing arc length
106 ....Using a hydraulic or pneumatic device
107 ..With magnetically influenced arc
108 ..D.C. power
109 RESISTANCE FURNACE DEVICE
110 .With internal atmosphere control (e.g., pressure, vacuum, etc.)
111 ..Having tubular charge containing or supporting element
112 ..Vacuum
113 .For cooling
114 ..Terminal
115 .Charging or discharging
116 .For manipulation of the charge or melt (e.g., stirring)
117 .With heating element detail
118 ..Resistance crucible
119 ..Wall contained
120 ..Open circuit (e.g., charge internal resistance heating)
121 ...Salt bath heating
122 ...Including crucible or hearth structure details
123 ...With preheating
124 ....Including starting resistor
125 ...Including terminal detail
126 ....With axial bore
127 ..Having resistance encasement means
128 ..Mounting
129 ...Base
130 ...Side wall
131 ....With resistor element compression
132 ..Non-metallic resistor
133 ...Rod-like
134 ..Including resistor shape detail
135 .Control
136 ..Temperature
137 .Lining
138 INDUCTION FURNACE DEVICE
139 .Zone melting
140 .With internal atmosphere control (e.g., pressure, vacuum, etc.)

INDUCTION FURNACE DEVICE
.With internal atmosphere control (e.g., pressure, vacuum, etc.)
141 ..Vacuum
142 .For charging or discharging
143 ..By tilting
144 .Having plural heating elements
145 .Having condition signaling means
146 .With means for manipulation of the charge or melt (e.g., stirring)
147 .Power supply system
148 ..Regulating
149 .For furnace regulating
150 ..Electrical
151 .Coreless
152 ..Coil
153 ...Support
154 ...Cooling
155 ..Lining
156 ..Crucible
157 ...Conducting (e.g., graphite)
158 ..Cooling
159 .Core-type (i.e., channel)
160 ..Coil
161 ..Channel
162 ...Lining
163 ..Crucible or hearth
164 ..Lining
165 ..Cooling
166 MISCELLANEOUS

1	THERMAL CALIBRATION SYSTEM
2	.By thermal radiation emitting device (e.g., blackbody cavity)
3	.By immersion in liquid having controlled temperature
4	LEAK OR FLAW DETECTION
5	.With heating or cooling of specimen for test
6	DISTANCE OR ANGLE
7	.Thickness, erosion, or deposition
8	FLAMMABILITY TESTING
9	EMISSIVITY DETERMINATION
10	DIFFERENTIAL THERMAL ANALYSIS
11	.Detail of electrical heating control
12	.Detail of sample holder or support therefor
13	..Formed by thermoelectric element
14	THERMAL GRAVIMETRIC ANALYSIS
15	BY APPLYING KNOWN THERMAL GRADIENT (E.G., INDICATION OF RESPONSE BY LOCATION)
16	TRANSFORMATION POINT DETERMINATION (E.G., DEW POINT, BOILING POINT)
17	.By change in optical property (e.g., transmission)
18	..By reflection (e.g., polished surface)
19	...Sensed by instrument (e.g., photocell)
20	....Controlling heating or cooling
21	.By electrical condition of specimen
22	.By change in motion of movable element
23	..Driven element
24	.By change in pressure of flow rate
25	.By thermal arrest (e.g., time-temperature curve)
26	..Of molten metal (e.g., carbon content)
27	.Between gaseous and liquid states
28	..Dew point
29	HEAT FLUX MEASUREMENT
30	.By differential temperature measurement along undisturbed thermal gradient
31	CALORIMETRY
32	.Total radiant energy or power measurement
33	.With control of heat added to or lost from a sample container (e.g., isothermal calorimetry)
34	..With controlled adiabatic shield
35	.Heat absorbing heigh temperature gas probe (e.g., enthalpy or fluid cooled probe)
36	.Heat value of combustion (e.g., 'calorific value')
37	..Having specified control of input of mixture
38	..Having bomb or cartridge ignition chamber
39	.Gain or loss of heat by heat utilizing load in path of heat exchange fluid
40	..Determined by combining flow rate and temperature signals of heat exchange fluid
41	...Signals combined electrically
42	.Throttling calorimeter (e.g., steam quality)
43	DETERMINATION OF INHERENT THERMAL PROPERTY (E.G., HEAT FLOW COEFFICIENT)
44	.Thermal conductivity
45	THERMAL TESTING OF A NONTHERMAL QUANTITY
46	.With loading of specimen (e.g., stress or strain)
47	..Cyclic
48	...Torsional
49	..Tensile
50	...With detail of heating or cooling structure
51	..Compressional
52	..Bending or flexing
53	.Of cure or hardenability
54	.Of fluid volume
55	.Expansion or contraction characteristics (e.g., dilatometry)
56	..Including electrical sensor
57	.Of susceptibility to thermally induced deteriouration, flaw, or failure
100	TEMPERATURE MEASUREMENT (E.G., THERMOMETER)
101	.Composite temperature-related paramenter
102	..Time-temperature relationship (e.g., integral, deterioration, change)
103	...Time-temperature integration performed by particular circuit arrangement
104	...Peak (maximum or minimum) with respect to time
105	....Indicating tube with sensing material return prevention
106	....Permanent visual indication (i.e., irreversible)
107	...Rate of change
108	...Degree-days
109	..Climate related (e.g., wind-chill factor, discomfort index)
110	..Plural spaced temperature function
111	...Highest or lowest of spaced temperatures
112	...Difference or gradient
113	....By thermoelements connected in series opposition
114	....By current modifying elements in circuit (e.g., bridge)
115	...Space average
116	...By single sensor (e.g., elongate or with plural fluid intakes)
117	.By a vibratory effect (e.g., resonant frequency, acoustical)
118	..Resonant frequency by fluid flow
119	..Vibration velocity (e.g., echo timing)
120	.In spaced noncontact relationship to specimen
121	..By thermally emitted radiation
122	...By microwave arrangement
123	...Transparent material measurement or compensation (e.g., spectral line, gas, particulate suspension
124	...With scanning or temperature distribution display
125	...With fluid flow purging device
126	...Having emissivity compensating or specified radiating surface
127	...Having significant frequency limitation or relationship (e.g., peak, ratio)
128	...Having significant signal handling circuitry (e.g., linearizing, emissivity compensation)
129	...Comparison with radiation reference standard
130	...Optical system structure (e.g., lens)
131	....With radiation conducting element
132	...Sensor or mounting temperature control
133	...Ambient temperature compensated (e.g., dummy sensor)
134	..Extrapolation (e.g., simulation, heat flow)
135	..By fluid flow within or to sensor (e.g., convection, heat transfer, differential pressure)
136	.Geophysical (e.g., well bore, underwater)
137	.Temperature distribution or profile
138	.With fluid flow deflector
139	.Of molten metal
140	..Lance (e.g., consumable)

TEMPERATURE MEASUREMENT (E.G., THERMOMETER)

141 .Combined with diverse art device
142 ..With other measuring device
143 ...Pressure
144 ..With combustion engine
145 ...Cooling system
146 ....Radiator cap mounted thermometer
147 ..With fluid carrying conduit (e.g., shower pipe)
148 ...Sensor within conduit
149 ..With cooking compartment or door thereof (e.g., oven)
150 ..With bottle (e.g., nursing)
151 ..With confection or infant pacifier
152 ..With electrical component (e.g., transformer)
153 ..With roll or rotary specimen or support
154 ...With coupling between rotating sensor and stationary electrical circuitry
155 ..With percing element
156 ..With float
157 ..With sampling cup
158 .With removable cover for sensor (e.g., disposable sheath)
159 .Nonelectrical, nonmagnetic, or nonmechanical temperature responsive property
160 ..Melting or softening
161 ..Change of optical property
162 ...Color
163 .By electrical or magnetic heat sensor
164 ..With preheated sensing probe
165 ..With heat exchanger or conductor
166 ..At plural zones
167 ...Scanning
168 ..With self-rebalancing arrangement (e.g., servo-potentiometer, thermal link)
169 ..With thermal lag compensation
170 ..Digital output
171 ...With digital linearizing circuitry
172 ..With compensation for sensor nonlinearity or lead impedance
173 ...By feedback in amplifier circuit or with constant current source in circuit
174 ..By conductive fluid or work function within sensor (e.g., ionization)
175 ..Thermal noise generated in conductor
176 ..Including sensor having hysteresis or cryogenic property (e.g., ferromagnetism, superconductivity)
177 ...Ferroelectric
178 ..By barrier layer sensing element (e.g., semiconductor junction)
179 ..By thermoelectric potential generator (e.g., thermocouple)
180 ...Specimen is part of thermoelectric circuit
181 ...Reference junction compensation
182 ...Reference junction temperature control
183 ..By current modifying sensor
184 ...Reactive element (e.g., capacitive)
185 ...Detail of resistive sensor
186 .With specified recording arrangement
187 .Mechanical (e.g., expansion or contraction of materials)
188 ..Having electrical indication
189 ..Plural zones (e.g., indoor-outdoor)
190 ..Indicating tube type
191 ...With optical element (e.g., magnifying)
192 ...With holder for shaking
193 ...Having specified cross section
194 ...With support or housing
195 ..With detail of motion transmitting mechanism
196 ..One sensing element within another
197 ..With compensation
198 ..With adjustment
199 ...Mechanical loading of sensor
200 ...Adjustment of limit stop
201 ..Expanding fluid
202 ...With distinct pressure transmitting fluid
203 ...Bourdon tube or bellows
204 ..Multiple distinct sensing elements
205 ..Compound sensing element (e.g., bimetallic)
206 ...Coil
207 ....Helix
208 HOUSING, SUPPORT, OR ADJUNCT
209 .Removable probe cover
210 MISCELLANEOUS

CLASS 375 PULSE OR DIGITAL COMMUNICATIONS

1	SPREAD SPECTRUM
3	REPEATERS
3.1	.Testing
4	.Including pulse regeneration or conversion
5	APPARATUS CONVERTIBLE TO ANALOG
6	EARTH OR WATER MEDIUM
7	TRANSCEIVERS
8	.Modems (data sets)
9	..Angle modulation
10	TESTING
11	EQUALIZERS
12	.Automatic
13	..Training period or initial set up
14	..Adaptive
15	...Quadrature channels
16	...Accumulator or up/down counter
17	MULTILEVEL
18	.Partial response
19	.Disparity reduction
20	.Synchronized
21	PULSE NUMBER MODULATION
22	PULSE WIDTH MODULATION
23	PULSE POSITION, FREQUENCY, OR SPACING MODULATION
24	PULSE AMPLITUDE MODULATION
25	PULSE CODE MODULATION
26	.Correcting or reducing quantizing errors
27	.Differential
28	..Single bit (delta)
29	...Nonamplitude delta (area, etc.)
30	...Compand (overload prevention)
31	....Redundancy Removal
32	....Syllabic
33	...Plural feedback loops
34	.Noise or distortion reduction
122	BANDWIDTH REDUCTION OR EXPANSION
35	PULSE TRANSMISSION VIA RADIATED BASEBAND
36	CABLE SYSTEMS AND COMPONENTS
37	SYSTEMS USING ALTERNATING OR PULSATING CURRENT
38	.Plural channels for transmission of a single pulse train
39	..Quadrature amplitude modulation
40	..Diversity
41	.Amplitude modulation
42	..With phase or frequency shift keying
43	..Vestigial or single sideband or suppressed carrier
44	.Angle modulation
45	..Frequency shift keying
46	...Combined with phase shift keying
47	...Minimum shift keying
48	...More than two frequencies
49	...One cycle or less per bit
50	...Vestigial or single sideband, or suppressed carrier
51	...Anti-noise or distortion
52	..Phase shift keying
53	...More than two phases
54	....Quaternary
55	...Biphase (manchester codes)
56	...Differential phase shift keying (diphase)
57	...Antinoise or distortion
58	.Antinoise or distortion
59	TRANSMITTERS
60	.Antinoise or distortion (includes predistortion)
61	.Single or vestigial sideband or suppressed carrier
62	.Frequency shift keying
63	..Antenna tuning with frequency shift
64	..Minimum shift keying
65	..One oscillator
66	..Two or more oscillators
67	.Phase shift keying
68	.Keying circuits
69	..Remote controlled
70	..Automatic
71	..Power or bias voltage supply keying
72	..Key shock or click prevention
73	..Including auxiliary control tube
74	..Modulation by absorption of signal, changing antenna dimension or changing antenna impedance
75	RECEIVERS
76	.Automatic baseline or threshold adjustment
77	.Single or vestigial sideband or suppressed carrier
78	.Angle modulation
79	..Combined phase shift keyed and frequency shift keyed
80	..Particular demodulator
81	...Phase locked loop
82	...Including switching or gating (digital circuits)
83	..Phase shift keying
84	...Differential (diphase)
85	....More than two phases
86	....Plural phase (>2)
87	...Biphase (manchester code)
88	..Frequency shift keying
89	...More than two frequencies
90	...Minimum shift keying
91	...Separate mark and space channels
92	.Interrupted carrier wave
93	..Carrier controlling local generator
94	.Particular pulse demodulator or detector
95	..Locating predetermined portion of pulse
96	..Correlative or matched filter
97	.Automatic frequency control
98	.Automatic gain control
99	.Interference or noise reduction
100	..Diversity (frequency or time)
101	..Intersymbol interference
102	..Plural signal paths in receiver
103	..By filtering (e.g., digital)
104	..Gating, blanking, etc.
105	.With elctromagnetic relay or solenoid
106	SYNCHRONIZERS
107	.Network synchronizing more than two stations
108	.Synchronization failure prevention
109	.Feedback, receiver to transmitter
110	.Self synchronizing signal (self clocking codes, etc.)
111	.Frequency or phase control using synchronizing signal
112	..Synchronization bit insertion into artificially created gaps
113	..Synchronization signals with unique amplitude, polarity, length or frequency
114	..Synchronization word
115	...Pseudo noise
116	...Synchronizer pattern recognizers
117	..Start - stop
118	.Phase displacement, slip or jitter correction
119	..Phase locking
120	...Phase locked loop
121	MISCELLANEOUS

CLASS 376 INDUCED NUCLEAR REACTIONS, SYSTEMS AND ELEMENTS

100 NUCLEAR FUSION
101 .Pellet guidance systems (e.g., pellet injection means)
102 .Inertial confinement (e.g., nuclear explosive)
103 ..Photon beam (e.g., laser) irradiation
104 ...Optics
105 ..Particle beam irradiation (excluding photons)
106 ...Ion beam irradiation
107 .Fusion reaction by plural colliding plasmas or particle beams
108 .Including accelerating particles into a stationary or static target (e.g., Cockcroft-Walton generator type)
109 ..With target replenishing
110 ..With means for modifying the resultant neutron output, e.g., moderator means
111 ..With means to pulsate ion beam
112 ..Cyclotron type acceleration of nuclei
113 ..With electrostatic voltage generating means
114 ..Self-contained neutron sources (e.g., neutron or accelerator tube)
115 ...With cooled electrodes or target
116 ...With ion beam collimator or filtering structure (e.g., extractor electrode)
117 ..With ion beam collimator or filtering structure
118 ..Subterranean sources
119 ..With control circuitry
120 .Including bunched particle beam
121 .Magnetic confinement of plasma
122 ..Plasma formed in situ by laser
123 ..Principal heating by wave energy
124 ...Heating by time varying magnetic field (e.g., by compression)
125 ..Imploding liners
126 ..With enveloping charged particle confinement (e.g., E or P layer)
127 ..With injection of electrically charged or accelerated particles
128 ...Plasma injection
129 ...Negatively charged particle injection
130 ...Neutral particle injection
131 ..Auxiliary heating
132 ...Electromagnetic wave energy
133 ..Toroidal confinement of plasma
134 ...Divertors
135 ....Effuser
136 ...Limiters or liners
137 ...With solid internal conductor
138 ...Bumpy torus
139 ..Linear confinement
140 ...Mirror devices
141 ....Plasma formed or contained between spaced electrodes
142 ..Magnetic structure
143 ..With circuitry
144 .Plasma formed between spaced electrodes
145 ..Plasma focus
146 .Including removal or use of impurities or reaction products (e.g., energy)
147 ..Direct conversion of energy
148 ..Including use of heat or radiation to effect a chemical reaction
149 .Shock wave heating of plasma or gas (e.g., MHD heating)
150 .Chamber structure or material
151 .Fusion targets or pellets
152 ..For inertial confinement
153 DETECTION OF RADIATION BY AN INDUCED NUCLEAR REACTION
154 .By fission
155 .With boron
156 NUCLEAR TRANSMUTATION (E.G., BY MEANS OF PARTICLE OR WAVE ENERGY)
157 .Gamma or charged particle activation analysis
158 .By neutron bombardment
159 ..Neutron activation analysis
160 ...Subterranean
161 ....Specific nuclides
162 .....Metals
163 ......Aluminum, silicon
164 ......Uranium
165 .....Hydrogen, chlorine
166 .....Oxygen, carbon
167 ....With tracer injection
168 ..Halogens
169 ...Iodine
170 ..Actinides
171 ...Breeder or converter reactor structures
172 ....Fertile fuel assembly structure or arrangement
173 .....Having internal fertile regions
174 ....Having particular coolant fluid flow path or pattern within reactor core
175 .....Orifice or fluid control at inlet or outlet of coolant channels
176 ......Hydraulic holddown
177 .....Plural coolant loops or passes through reactor core
178 ....Fuel assembly holddown or support
179 ....Coolant manipulated and used exterior of reactor core
180 ...Formation of uranium isotopes
181 ....Uranium 233
182 ...Formation of plutonium isotopes
183 ..Doping of semiconductors
184 ..Rare earths
185 ..Alkali and alkaline elements
186 ..Molybdenum, technetium
187 ..Lead, polonium, bismuth
188 ..Sulfur, phosphorus
189 ..With reaction product treatment (e.g., recovery, separation)
190 .By charged particle bombardment
191 ..Alpha-neutron sources
192 ..To produce spallation reactions
193 ...To produce fissile isotopes
194 ..Proton bombardment
195 ...With reaction product treatment (e.g., recovery, separation)
196 ..Alpha (helium nucleus) bombardment
197 ...Wherein the reaction product is an actinide or transuranium element
198 ...With reaction product treatment (e.g., recovery, separation)
199 ..Deuteron bombardment
200 ...Wherein the reaction product is an actinide or transuranium element
201 ...With reaction product treatment (e.g., recovery, separation)
202 .Irradiation capsule, holder, or support
203 SEAL ARRANGEMENTS
204 .For nozzle
205 .Between pressure vessel cover and vessel or portion thereof
206 ..Rotating plug-type cover
207 WITH CONTROL OF REACTOR (E.G., CONTROL OF COOLANT FLOW)
208 .Pulsed reactors
209 .Spectral shift
210 .By coolant flow
211 ..Exterior of core (e.g., secondary loop control)
212 .By altering quantity of characteristic of fuel within critical area
213 ..Wherein control element includes a fissile material

WITH CONTROL OF REACTOR (E.G., CONTROL OF COOLANT FLOW)
214 .Reactor start-up
215 .By electronic signal processing circuitry (e.g., plural redundant circuits)
216 ..Plural sensed different conditions or measured variables correlated
217 ...Control programs
218 ....Xenon control
219 .By movement of control element or by release of neutron absorbing material
220 ..Wherein the control element is a reflector or moderator material
221 ...Variable fluent reflector/moderator level or density
222 ....Moderator dump
223 ..Rotatable control elements
224 ..Finger-type control elements (insertable into fuel element positions)
225 ...Including shock absorber
226 ..Wherein control element is driven directly into bed of fuel elements
227 ..Control element movable by means of cable and winch, chains or reels
228 ..Wherein driver or motivating is electric
229 ...Electrofluidic
230 ..Wherein driver or motivating is fluid
231 ...Pneumatic
232 ..By motion transforming means, e.g., rack and pinion
233 ..Releasable coupling
234 ..Including shock absorber
235 ..Means for locking control element in desired position
236 ..Including control rod insertion and removal schemes
237 ...Group movement of control elements
238 ...Setback
239 ..Rod or support carrying plural elements or diverse materials
240 .Sensing or detecting device attached to, embedded in, or integral with control element
241 .Power output control (e.g., load follows with steam dump)
242 .Means to inhibit control rod movement
243 .With cooling of control element
244 .Temperature reactivity control
245 TESTING, SENSING, MEASURING, OR DETECTING A FISSION REACTOR CONDITION
246 .Flowmeters
247 .Temperature or pressure measurement
248 .Optics
249 .Vessel monitoring or inspection
250 .Leak detection
251 ..Fuel element leak detection
252 ...By acoustic or ultrasonic wave energy
253 ...By the detection of fission products external to the fuel element
254 .Flux monitoring
255 ..Directly generating electrical signal (e.g., ion detection)
256 .Gas sensors (e.g., hydrogen detectors)
257 .Fuel assay (e.g., burnup)
258 .Position detection
259 .By particular instrumentation circuitry
260 HANDLING OF FISSION REACTOR COMPONENT STRUCTURE WITHIN REACTOR SYSTEM
261 .Fuel component
262 ..Including handling of a second different, diverse reactor component (e.g., control element, moderator element, vessel cover removal)
263 ...With pressure vessel cover removal
264 ..Charging or discharging of fuel
265 ...Refueling ball-type reactors
266 ....Means for separating low exposure from high exposure elements
267 ...Refueling schemes, patterns, or fuel cycles (e.g., in/out systems)
268 .Refueling machines
269 ..With magazine
270 ..With nonaxial transfer capability
271 ..Upper axial transfer
272 .Storage container systems for new and/or irradiated core elements
273 SUBTERRANEAN REACTOR STRUCTURES (E.G., UNDERGROUND CONTAINMENT, UNDERGROUND EXPLOSIVE)
274 .For minimizing radioactive contamination within an underground chamber or of the material removed therefrom
275 .For extracting materials or energy from the earth
276 ..In the form of heated water or steam
277 REACTOR PROTECTION OR DAMAGE PREVENTION
278 .By minimizing positive coolant void coefficient
279 .Fire extinguishing or prevention
280 .Core catchers
281 .Fluid flow reversal protection
282 .Emergency core coolant systems (e.g., injecting coolant into reactor or pipe systems)
283 .Pressure suppression and relief
284 ..By fusible means (e.g., ice)
285 .Expansion means (e.g., shock absorbers, roller bearings)
286 ..Pipe expansion joints
287 .Shield or barrier between radiation or heat source and object to be protected (e.g., insulation, thermal shield)
288 ..Particular materials
289 ..Thermal insulation
290 ...For liquid metal cooled fast reactors (e.g., insulation for vault roof, or for the vessel walls as by a layer of stagnant or quasi-stagnant coolant)
291 ...Concentric tubes or conduits with insulation
292 ..Concentric tubes or conduits
293 ..Containment structures
294 ...Pressure vessels
295 ....Concrete
296 .....Prestressed
297 .With turbine protection means (e.g., turbine trip or overspeed protection means)
298 .Auxiliary heat removal structure
299 ..Decay heat removal
300 .Recombiners
301 ..Catalytic
302 .Core restraint means
303 ..In-core restraint means
304 ..For moderator structures
305 .Corrosion or damage prevention
306 ..By addition of material to coolant
307 .With pressurizer means
308 FISSION REACTOR MATERIAL (INCLUDING REACTION PRODUCTS) TREATMENT
309 .Post accident impurity or contaminant removal
310 .Impurity removal
311 ..Reprocessing of fuel during reactor operation
312 ..By cold traps or hot traps
313 ..By filters, ion exchangers, or absorbers
314 ...Gas filters (e.g., adsorbers)
315 ...Electrostatic or magnetic filters

FISSION REACTOR MATERIAL (INCLUDING REACTION PRODUCTS) TREATMENT
.Impurity removal
316 ..By pressurized fluid (i.e., blowdown)
317 COMBINED
318 .With propulsion means
319 ..Gaseous core
320 .With direct conversion means
321 ..Thermionic
322 .For storing excess energy
323 .With chemical reaction
324 ..To produce a combustible fuel
325 ...Cracking of hydrocarbons
326 .With laser
327 CONTROL COMPONENT FOR A FISSION REACTOR
328 .Liquid control component
329 ..With vaporization
330 ..Liquid metal control component
331 .Gaseous control component
332 .Telescopic control devices
333 .Wherein concentration of the reactivity affecting material varies radially or axially of the control element
334 ..By utilizing a follower
335 .Flexible control element
336 .Fuse actuated devices
337 ..Particulate type
338 .Particulate type (e.g., balls)
339 .Nonconventional control material
340 REACTOR STRUCTURES WITH TESTING OR IRRADIATION FACILITIES
341 .With material holder or support positioned outside the radiation source
342 .With provision for insertion of material to be irradiated into the radiation means
343 ..Flux trap reactor structures
344 ..By fluid pressure
345 ...Wherein the fluid is a liquid
346 EPI-THERMAL REACTOR STRUCTURES (E.G., INTERMEDIATE NEUTRON SPECTRUM)
347 REACTOR STRUCTURES
348 .Fast thermal composite core
349 .Flux flattening
350 .Moderator component varies in its effective density or materials
351 ..Spaced internal reflectors or moderators
352 .Orifice or fluid control at inlet or outlet of coolant channels
353 .With particular control rod guide structure
354 .Fuel material in contact with and supported by fluid
355 ..Fluidized beds
356 ..Fuel dispersed in liquid moderator, solution, etc.
357 ...Vapor forming, separating, or manipulating
358 ...With particular in situ reconstitution or modification of fuel moderator material
359 ..Fuel in molten state or in molten vehicle
360 ...Fuel in form of fused salt
361 .Circulating fluid within reactor
362 ..Fuel assembly supports
363 ...Suspended fuel assembly
364 ...Fuel assembly holddown or locking means
365 ....Hydraulic or pneumatic
366 ..Plural fluids or a fluid in plural phases circulating within reactor (e.g., pressure tube reactors)
367 ...In heat pipe means
368 ...Including chemically distinct gas
369 ....With formation, separation, or manipulation of a second gas
370 ...With formation, separation, or manipulation of a vapor (e.g., boiling water reactor (BWR) type)
371 ....With vapor-liquid separating means
372 ....With jet pump
373 ....Having specified fluid flow path or pattern within reactor core
374 .....Plural separate coolant loops through reactor core
375 .....With plural, coolant passes through reactor core
376 ......Re-entrant type
377 .....With particular flow directing or diverting means (e.g., flow baffle)
378 ....Vapor manipulated or used exterior of reactor core
379 .....With flow control of fluid within reactor
380 ....Nonaqueous vapor
381 ..Pebble bed reactor
382 ...Having core of separate pebble containers
383 ..Fluid is a gas
384 ...Wherein the gas is steam
385 ...Having specified flow path or pattern within reactor core
386 ....Plural separate loops
387 ....Plural passes through core
388 .....Re-entrant type
389 ....With particular flow directing or diverting means (e.g., flow baffle)
390 .....With core bypass means (e.g., passage along core barrel or through shield structure)
391 ...Manipulated or used exterior of the reactor core
392 ....With jet pump
393 ....With coaxial flow
394 ....With single structure component containment (e.g., pod arrangement)
395 ..Having specified fluid flow path or pattern within reactor core
396 ...Plural separate coolant loops through reactor core
397 ...Plural passes
398 ....Re-entrant type
399 ...With particular flow directing or diverting means (e.g., flow baffle)
400 ....With core bypass means (e.g., passage along core barrel or through shield structure)
401 ...One-fluid-type pressure tube reactor
402 ..Manipulated or used exterior of reactor core
403 ...Including tank, pool, or reservoir (e.g., swimming pool)
404 ....Having reactor core and heat exchanger or pump therein
405 .....With particular heat exchanger structure
406 ...Compact or integral (e.g., heat exchanger, core, pumps in same vessel)
407 ...With jet pumps
408 ...With means or structure to flash coolant into vapor
409 FUEL COMPONENT STRUCTURE
410 .With means to prevent thinning of the cladding (e.g., amoeba effect)
411 .Spherical particles
412 .Encased with nonfuel component
413 ..With internal pressurizer

FUEL COMPONENT STRUCTURE
.Encased with nonfuel component
414 ..Coated, preformed, or impregnated layer or part or adhesively bonded layers or parts
415 ...Lubricating layer
416 ...Multiple or composite cladding-type layers
417 ....Including getter layer or barrier layer
418 ..Getter, fission product retainer of filter
419 ..Burnable poison
420 ..Interpellet spacing or positioning means
421 ..Homogeneously intermixed
422 ...Alloyed fuel
423 ..Moderator or reflector
424 ..Coolant or heat exchange material
425 ..Heat insulating material
426 .Plural fuel segments or elements
427 ..In solid moderator block
428 ..Wherein the fissile content varies radially or axially within the same container (e.g., plural fuel layers)
429 ..Complementary segments within same container
430 ..Spherically shaped segments within same container
431 ..Concentric cylindrical elements
432 ..Plate-type fuel elements
433 ..Stacked (e.g., Candu type reactor fuel components)
434 ..In pack or bundle
435 ...Wherein the fissile content varies radially or axially across the pack or bundle
436 ...Wire-wrapped fuel elements
437 ...Having the fuel element ends positioned on or attached to rails
438 ...Including grid
439 ....With coolant flow path deflecting means
440 ....For ends of fuel elements
441 ....With nonintegral fuel element contacting means
442 ....With fuel element contacting protuberance or projection
443 ...With coolant flow path deflecting means
444 ....With coolant flow bypass means
445 ...With thermal expansion compensating means
446 ...With removable member
447 ...Including separate burnable poison or moderator
448 ...With means for spacing apart adjacent packs or bundles
449 ...Having provision or structure for insertion of control elements therein
450 .With condition sensing or indicating means
451 .Having particular end closure or seal (e.g., weld, plug, cap, etc.)
452 ..With indexing means
453 .Fuel support or covering provided with fins, projections, prongs, etc.)
454 ..With external fins, projections, prongs, etc.
455 .Hollow, annular, or graduated fuel layers or members (e.g., concentric, helical, etc.)
456 .Vented fuel
457 .Nonconventional jacket or can material
458 MODERATOR OR REFLECTOR COMPONENT STRUCTURE FOR A FISSION REACTOR
459 .With means for keying or assembling moderator blocks together
460 ROTATING PLUG-TYPE COVER
461 VESSEL SUPPORT (E.G., CORE VESSEL SUPPORTS)
462 GRIDS
463 MISCELLANEOUS

900 PARTICULAR MATERIAL OR MATERIAL SHAPES FOR FISSION REACTORS
901 .Fuel
902 ..With external lubricating or absorbing material
903 ..Shapes
904 .Moderator, reflector, or coolant materials
905 ..Organic
906 ..Metal
907 ..Dissociative coolants
908 REACTOR GEOMETRY (OR PART THEREOF) DEFINED IN TERMS OF NUMERICAL VALUES
909 MOBILE REACTORS
910 ROTATING REACTORS
911 PLURAL REACTOR SYSTEMS
912 NUCLEAR REACTOR SYSTEMS SITUATED IN THE OCEAN
913 ANTIMATTER DEVICES AND METHODS
914 NUCLEAR EXPLOSIVES
915 FUSION REACTOR FUELS
916 METHODS OF MAKING FUSION FUEL TARGETS
917 UTILIZING DIFFERENT FUELS OR FUELS IN DIFFERENT FORMS, IN DIFFERENT REACTOR REGIONS IN RELATION TO AMOUNTS OF HEAT PRODUCED IN SAID REGIONS
918 ENTIRE REACTOR CORE OF SINGLE INTEGRAL STRUCTURE

CLASS 377 ELECTRICAL PULSE COUNTERS, PULSE DIVIDERS OR SHIFT REGISTERS: CIRCUITS AND SYSTEMS

DECEMBER 1990

1 APPLICATIONS
2 .Control
3 .Counting on an object, areas having alternating physical properties (e.g., counting lines on grid, teeth on gear, windings on coil)
4 .Betting on the outcome of an event; Totalizers
5 .Game or sport
6 .Counting animate or inanimate entities
7 ..Coins
8 ..Flat articles (e.g., sheet, bill, ticket)
9 ..Vehicles
10 ..Field of view contains plural entities or entities scanned plural times (e.g., microscopic particles)
11 ...Including particle size determination variations
12 ...Counting by detecting electrical impedance variations
13 .Registering counts for different categories (e.g., accounting)
14 ..Where the different categories represent monetary amounts (e.g., wages, charges)
15 .Counting based on number of times machine or apparatus operates
16 .Determining machine or apparatus operating time or monitoring machine, apparatus or operation
17 .Position determining
18 ..Of flat flexible strip (e.g., tape)
19 .Measuring or testing
20 ..Time combined with measurement of another parameter
21 ..Fluid flow
22 ..Weight
23 ..Acceleration
24 ..Dimension
24.1 ...Distance and Powered Vehicle (e.g., odometer)
24.2 ...Distance and Human Activity (e.g., pedometer, nonpowered golf carts)
25 ..Temperature
26 .Including memory
27 SYSTEMS
28 .Identifying or correcting improper counter operation (e.g., error checking, monitoring; preventing or correcting improper counter operation)
29 ..Testing or calibrating the counter
30 ..Preventing an inaccurate count as a result of an external condition
31 ...Automatic preset
32 ...Power failure
33 .Using particular code or particular counting sequence
34 ..Minimum change code (e.g., Gray code)
35 ..Excess three code
36 ..Biquinary code
37 .Sequential readout of plural counters or sequential sampling of inputs to a counter
38 .Plug in counter
39 .Comparing counts
40 .Nonsignificant zero elimination
41 .Complementing a count
42 .Converting input or output signal from or to an analogue signal
43 .Having phase shift
44 .Counter controlled counter
45 .Including reversible counter
46 .Including ring counter
47 .Pulse multiplication or division
48 ..Multiplication or division by a fraction
49 .Counter includes circuit for performing an arithmetic function
50 .Compensation for excess or shortage of pulses
51 .Including structure for detecting or indicating overflow condition
52 .With programmable counter (i.e., with variable base)
53 .With photoelectric sensor
54 .Using shift register
55 .Particular input circuit
56 .Particular output circuit
57 CHARGE TRANSFER DEVICE (E.G., ANALOGUE SHIFT REGISTER, CCD, BUCKET BRIGADE DEVICE)
58 .Compensating for or preventing signal charge deterioration
59 .With feedback
60 .Particular input or output means
61 .Direction and/or path flow control (e.g., by clocking or biasing, by charge splitting)
62 ..In charge-coupled device
63 .Charge-coupled device
64 SHIFT REGISTER
65 .Using electromechanical relays
66 .Asynchronous
67 .Multirank (i.e., rows of storage units form a shift register)
68 .Compensating for or preventing signal deterioration
69 .Shift direction control
70 .Particular input circuit
71 ..Pulse shaping
72 ..With feedback
73 ..Including logic circuit
74 ...Field-effect transistor
75 .Particular output circuit
76 ..Sequential output (e.g., tapped delay line)
77 .Particular transfer means
78 ..Phase clocking or synchronizing
79 ...Field-effect transistor
80 ..Parallel clocking
81 ..Logic circuit
82 ELECTROMECHANICAL COUNTER
83 .Counting or dividing chains using relays
84 .Programmable (i.e., with variable base)
85 .Reversible
86 .Particular input means
87 .Particular output means
88 .With resetting
89 .Rotary magnet
90 .Stepping switch
91 .Clutch or escapement
92 .Pawl and rachet
93 WITH SUPERCONDUCTIVE ELEMENT
94 COUNTING OR DIVIDING IN INCREMENTAL STEPS (I.E., STAIRCASE COUNTER)
95 .Charge storage (e.g., capacitor without polarization hysteresis)
96 ..Using auxiliary pulse generator triggered by incoming pulses
97 .Hysteresis storage (e.g., counters using saturable magnetic core elements)
98 .DEVICES HAVING MORE THAN TWO STABLE STATES
99 .Beam type tube (e.g., magnetron, cathode-ray tube)
100 .Multi-cathode gas discharge tubes
101 USING BISTABLE MAGNETIC CORES OR FERROELECTRIC CAPACITORS
102 USING BISTABLE ELECTRO-OPTICAL DEVICES

103 COUNTING OR DIVIDING CHAINS USING GAS-FILLED TUBES
104 PHASED CLOCKING
105 .Field-effect transistor
106 PARTICULAR PARALLEL GATING OR CLOCK SIGNAL
107 STARTING, STOPPING, PRESETTING OR RESETTING THE COUNTER
108 .Counter chains with a radix or base other than the number two raised to an integral power
109 ..Decade
110 ..Programmable (e.g., with mechanical or electromechanical switch means for selecting the count
111 PARTICULAR INPUT CIRCUITS FOR COUNTER
112 INDICATING MEANS
113 .Using glow discharge lamps
114 PARTICULAR OUTPUT CIRCUITS FOR COUNTER
115 PARTICULAR TRANSFER MEANS (E.G., MASTER-SLAVE)
116 .Including logic circuit
117 ..Field-effect device (e.g., JFET, IGFET, MNOS)
118 PULSE COUNTING OR DIVIDING CHAINS
119 .Using bistable regenerative trigger circuits
120 ..Using only semiconductors having at least three electrodes
121 ...Field-effect device (e.g., JFET, IGFET, MNOS)
122 ...Ring counter
123 ...Reversible counter
124 ..Ring counter
125 ..Reversible counter
126 .Ring or reversible counter
127 .Using bistable semiconductors having at least three electrodes or analogous complementary transistor circuits (e.g., avalanche transistor, SCR's)
128 .Using bistable semiconductors having only two electrodes (e.g., tunnel diode, multilayer diode)
129 PULSES CONTINUOUSLY CIRCULATED IN A CLOSED LOOP
130 MISCELLANEOUS

CLASS 378 X-RAY OR GAMMA RAY SYSTEMS OR DEVICES

1	SPECIFIC APPLICATION
2	.Radiation coding
3	.Mossbauer effect
4	.Computerized Tomography
5	..Energy discriminating
6	..Fluorescence or scatter mapping
7	..Scatter compensating
8	..Object responsive
9	..Plural sources
10	..Nonrotating source or detector
11	..Source or detector translation within plane
12	...With electronic scanning
13	...Radial
14	...Fan beam translation
15	..Continuous mechanical rotation
16	..Beam energy or intensity control
17	..Tiltable or nonvertical examination plane
18	..With tissue equivalent material
19	..Beam detection system
20	..Object positioning or aligning
21	.Tomography
22	..With nonphotographic detector
23	..Dynamic tomography
24	..Transverse tomography
25	..Planar tomography
26	...Linear tomography
27	..Nonplanar tomography
28	.Xeroradiography
29	..With real time display
30	..With focussed gap field
31	..With auxiliary electrode
32	..With uniform charging of image receptor
33	..With gap fluid handling
34	.Lithography
35	..Pattern mask
36	.Holography or interferometry
37	.Mammography
38	.Dental panoramic
39	..Moving source and detector
40	...Continuous image
41	.Stereoscopy
42	..Fluoroscopy
43	.Telescope or microscope
44	.Fluorescence
45	..Composition analysis
46	...Plural diverse X-ray analyses
47	...Fluid analyte
48	...With standardization
49	...With spatially dispersive energy analysis
50	..Thickness or density analysis
51	.Absorption
52	..Fluid level measuring
53	..Composition analysis
54	..Thickness or density analysis
55	...With movable source or detector
56	...With standardization
57	..Inspection of closed container
58	..Flaw analysis
59	...Pipe testing
60	....Pipe crawler
61	...Tire testing
62	..Imaging
63	...Combined with non-X-ray imaging
64	..Irradiating
65	...Therapy
66	...Of fluid
67	....With tortuous flow
68	...Including object support or positioning
69	....With object moving
70	.Diffraction, reflection or scattering analysis
71	..Diffractometry
72	...Stress analysis
73	...Crystalography
74	....Topography
75	....Powder technique
76	....Back reflection
77	....Precession
78	....Piezoelectric crystal
79	...Analyte support
80	....With environmental control
81	....Goniometer
82	..Spatial energy dispersion
83	...Composition analysis
84	...Monochromator or focussing device
85	....With plural dispersing elements
86	..Scatter analysis
87	...Imaging
88	...Composition analysis
89	...Thickness or density analysis
90	....Plural diverse X-ray analysis
91	ELECTRONIC CIRCUIT
92	.For plural X-ray sources
93	.For electrode movement
94	..With movement sensing
95	.Object responsive control
96	.Exposure timer
97	..Dose responsive
98	.With display or signaling
99	..Television
100	...Color
101	.X-ray source power supply
102	..Mobile or portable
103	..Energy storage
104	..With specific rectifier
105	..High frequency
106	..With pulse output
107	..With A.C. output
108	..Dose regulated
109	..Current regulated
110	...Automatic
111	..Voltage regulated
112	...Automatic
113	..Electron beam control
114	.With switching means
115	..For selecting
116	...Technique or detector
117	..For safety or protection
118	...Tube overload
119	SOURCE
120	.Nuclear excited
121	.Electron tube
122	..Field emission or cold cathode
123	..Vacuum control
124	..With plural targets or anodes
125	..With movable target
126	...Translation or nutation
127	...Temperature modification
128	....With thermal impedance
129	....With increased emissivity
130	....With cooling fluid
131	...With specific motor means
132	...With specific bearing means
133	....With lubrication
134	..With plural cathodes or heaters
135	..With movable electrode
136	..With specific cathode
137	..With electron scanning or deflecting means
138	..With electron focusing or intensity control means
139	..With potential stress distribution
140	..With X-ray window or secondary radiation screen
141	..With cooling means
142	...With solid heat conductor or shield
143	.Target
144	..Rotary
145	BEAM CONTROL
146	.Scanner
147	.Collimator

BEAM CONTROL
.Collimator
148 ..Plural selectable
149 ..Multiaperture
150 ..Variable
151 ...Automatic
152 ...With linear leaf motion
153 ...With pivotal leaf motion
154 .Antiscatter grid
155 ..With grid moving means
156 .Filter
157 ..Plural
158 ..Single filter with plural elements
159 ..Contoured
160 .Shutter or chopper
161 .Window
162 AUXILIARY DATA ACQUISITION OR RECORDING
163 .Distance or dimension marker
164 ..Coordinate grid
165 .Patient or exposure data
166 ..With light projection
167 PHOTOGRAPHIC DETECTOR SUPPORT
168 .Dental
169 ..Cassette
170 ..With aligning
171 .For roll or strip film
172 .Serial plate or cassette changer
173 .Serial film or film pack changer
174 .For plural films or plates
175 .For plural exposures on single film or plate
176 ..With real time imaging
177 .With object support or positioning
178 ..For seated object
179 ..Pivoted object support
180 ..With object retaining
181 .For movable film or plate
182 .Sheet film cassette
183 ..Self-developing
184 ..Flexible
185 ..With radiation modifying
186 ...With antiscatter means
187 ...With film clamping
188 ..With hinged cover
189 NONPHOTOGRAPHIC DETECTOR SUPPORT
190 .Fluoroscope
191 ..Dental
192 ..Foot or shoe examination
193 SOURCE SUPPORT
194 .Including cable handling
195 .Including object support or positioning
196 ..With movable source
197 .Including movable source
198 ..With mobile support
199 .Source cooling
200 ..Liquid coolant
201 .Shock proofing
202 ..Fluid immersion
203 .Shielding
204 ACCESSORY
205 .Alignment
206 ..With light projection
207 .Testing or calibration
208 .Object holder or support
209 ..Table or couch

901 COMPUTER TOMOGRAPHY PROGRAM OR PROCESSOR

1 DIAGNOSTIC TESTING, MALFUNCTION INDICATION, OR ELECTRICAL CONDITION MEASUREMENT
2 .Including fault responsive disconnection of tested component
3 .Of hybrid, or echo suppressor or canceller
4 .Of repeater
5 .By loopback
6 .By analysis of injected tone signal
7 .For detection of eavesdropping device
8 .With blocking of normal usage
9 .Of centralized switching system
10 ..By automatic testing sequence (e.g., programmable, scanning)
11 ...Routiner
12 ..With dedicated testing line or trunk
13 ..Of call timing or charging equiment
14 ..Of plural exchange network
15 ..Of automatic switching equipment
16 ...Of switching path
17 ...Of switching selector
18 ...By use of call address signal
19 ...Rapid manual connecting structure for test equipment
20 ..Of switchboard element condition (e.g., lamp)
21 .Using portable test set (e.g., handset type)
22 .Of trunk or long line
23 ..Of line signalling
24 ..Electrical parameter measurement (e.g., attenuation)
25 ..Conductor identification or location
26 ..Fault detection or location (e.g., continuity, leakage)
27 .Of subscriber loop or terminal
28 ..Of data transmission instrument
29 ..Terminal arrangement to enable remote testing (e.g., testing interface)
30 ..Loop impedance (e.g., resistance, capacitance)
31 ..Of line signalling generator (e.g., dial, tone code generator)
32 .Indication of nonstandard condition of telephone equipment
33 ..Alarm or emergency (e.g., cut line)
34 SERVICE MONITORING OR OBSERVATION
35 .Listening-in or eavesdropping type
36 FREE CALLING FROM PAYSTATION
37 EMERGENCY OR ALARM COMMUNICATIONS (E.G., WATCHMAN'S CIRCUIT)
38 .Personal monitoring (e.g., for the ill or infirm)
39 .Responsive to sensed nonsystem condition
40 ..Automatic dialing
41 ..Transmission of recorded audio message
42 ..Plural conditions
43 ..Fire
44 ..Intrusion
45 .Central office responsive to emergency call or alarm (e.g., "911", operator position display)
46 .Called line or station condition responsive (e.g., recall if busy)
47 .Plural alarms over single line
48 .Announcement or alarm received at terminal station (e.g., "butt-in", alarm)
49 .Central station with plural substations
50 .By pulse or digital signal
51 .With automatic dialing or transmission of recorded audio message
52 INCLUDING AID FOR HANDICAPPED USER (E.G., VISUAL, TACTILE, HEARING AID COUPLING)
53 WITH CONVERSATIONAL VIDEO COMMUNICATION (I.E., VIDEOPHONE)
54 .Switching control
55 HAVING NEAR FIELD LINK (E.G., CAPACITIVE, INDUCTIVE)
56 HAVING ELECTROMAGNETIC LINK FOR SPEECH OR PAGING SIGNAL (E.G., LIGHT WAVE LINK)
57 .Control of selectively responsive paging arrangement over telephone line
58 .Radio telephone system or instrument
59 ..Zoned or cellular system
60 ...Having zoned/cellular system switching (e.g., handoff)
61 ..Including cordless extension set (i.e., having single subscriber line access)
62 ...With privacy or lockout (e.g., identity verification)
63 ..Including supervisory or control signalling
64 HAVING SINGLE CHANNEL TELEPHONE CARRIER
65 .Including call signalling (e.g., ringing, off-hook, dialing)
66 .Over power line
67 WITH AUDIO MESSAGE STORAGE OR RETRIEVAL
68 .Dynamic audio signal recording or reproduction
69 ..Call originating
70 ..Call intercept or answering
71 ...Consecutive use of recorded phrases or words to form message
72 ...Sequential or repeated announcement during single call initiated cycle
73 ...Plural record carrier channels
74 ...Remote control over telephone line
75 ....Remote dictation
76 ....Announcement selection or replacement
77 ....Control by generated tone
78 ...Acoustic coupling
79 ...With specified call initiated cycle control circuitry
80 ....Voice signal presence responsive
81 ....Call termination responsive (e.g., hang-up)
82 ....Having specified call initiation (e.g., ringing) responsive circuitry
83 ....Structural detail of storage medium drive
84 ...At switching facility (e.g., central office, switchboard)
85 ..Recording of telephone signal during normal operation
86 ...Inductive pickup
87 ..Reproduced signal distributed over telephone line
88 .Stored in digital form
89 ..Subscriber control of central office message storage or retrieval
90 TELEPHONE LINE OR SYSTEM COMBINED WITH DIVERSE ELECTRICAL SYSTEM OR SIGNALLING (E.G., COMPOSITE)
91 .Credit authorization
92 .Polling (e.g., audience survey)
93 .With transmission of a digital message signal over a telephone line
94 ..Including switching station
95 ..Access restricting
96 ..Including terminal for display of digital information
97 ..By voice frequency signal (e.g., tone code)
98 ...By modulated audio tone
99 ...Having acoustic link

TELEPHONE LINE OR SYSTEM COMBINED WITH DIVERSE ELECTRICAL SYSTEM OR SIGNALLING (E.G., COMPOSITE)
100 .To produce visual-graphic copy reproduction (e.g., facsimile)
101 .Audio program distribution
102 .Remote control
103 ..Of entrance or exit lock
104 ..With indication
105 ..From terminal
106 .Remote indication over telephone line (e.g., telemetry)
107 ..Meter reading
108 .Telegraphy
109 ..Over telephone line
110 COMPOSITE SUBSTATION OR TERMINAL (E.G., HAVING CALCULATOR, RADIO)
111 WITH USAGE MEASUREMENT (E.G., CALL OR TRAFFIC REGISTER)
112 .Computer or processor control
113 ..Call traffic recording
114 .Call charge metering or monitoring
115 ..Interexchange operations
116 ...Hardcopy record generating
117 ..Of station on polystation or party line
118 ...Identification of station
119 ..Hardcopy record generating (e.g., ticket printing)
120 ...With line identification or class of service determination
121 ..At central office
122 ...With display
123 ...Paystation (e.g., escrow control)
124 ...Pulse counting or accumulating (e.g., "message metering")
125 ....Local or zone
126 ....Automatic message accounting
127 .....Having line identification (e.g., automatic number identification - "ANI")
128 ....Time of day controlled
129 ...Manually set (e.g., key and lock)
130 ..At subscriber station
131 ...Time controlled
132 ....Paystation (e.g., escrow control)
133 .Call traffic recording or monitoring
134 ..At central station
135 ...With hardcopy record generation (e.g., ticket printing)
136 ...With display
137 ...Trunk usage (e.g., peg count)
138 ....All trunks busy metering
139 ...Counting the number of completed connections
140 ..At subscriber
141 ...Mechanical register
142 WITH CALLING NUMBER DISPLAY OR RECORDING AT CALLED SUBSTATION
143 WITH CHECK OPERATED CONTROL (E.G., PAYSTATION)
144 .Other than coin
145 .Fraud or interference prevention
146 .Coin signalling or control
147 ..Coin box audit or totalizer
148 ..Denomination
149 ..Post-pay coin collection
150 ..Coin disposition (i.e., return or collection)
151 ...Upon connection to called station
152 ...Magnet, electromagnet, or relay controlled from central office
153 ...Paystation (e.g., control by refund key)
154 .At central office
155 .At terminal station (e.g., coin paystation)
156 MULTI-LINE OR KEY SUBSTATION SYSTEM WITH SELECTIVE SWITCHING AND CENTRAL SWITCHING OFFICE CONNECTION
157 .With special service
158 ..Conferencing
159 .With intercom system
160 ..With connection of intercom station to subscriber line
161 .With exclusion or priority feature (e.g., lockout or privacy)
162 .Detail of hold circuitry
163 ..Electronic
164 .Line status indication or call alerting
165 .Switching or supervision feature (e.g., common control, digital)
166 .Detail of line circuit or line card
167 PRIVATE (E.G., HOUSE OR INTERCOM) OR SINGLE LINE SYSTEM
168 .Lockout
169 ..Central power source
170 .With paging
171 .Having plural stations with selective calling (e.g., master)
172 ..With call addressing
173 .With call addressing
174 .Including body or apparel supported terminal (e.g., headgear)
175 ..For underwater use (e.g., in diver's suit)
176 .With central power source
177 POLYSTATION LINE SYSTEM (I.E., PARTY LINE)
178 .Revertive call
179 .Call alerting (e.g., ringing)
180 ..Full selective or tuned (e.g., harmonic)
181 ..Semi-selective (e.g., line side, polarized)
182 .Automatic or unattended
183 ..Station identification
184 ..Lockout
185 .Portable or mobile
186 .Central power source
187 .Connected to central office
188 CALL OR TERMINAL ACCESS ALARM OR CONTROL
189 .Fraud or improper use mitigating or indication (e.g., "blue box", "black box")
190 .Time out
191 ..At switching center
192 ...Of call duration (e.g., conversation timer)
193 ...Of specific equipment
194 .Lockout or double use signalling
195 ..In automatic system
196 .At switching center
197 ..Central office
198 ..PBX
199 .At substation
200 ..Restrictive dialing circuit
201 SPECIAL SERVICES
202 .Conferencing
203 ..Operator control
204 ..Subscriber control
205 ...Conference initiation by single calling station
206 ..At substation
207 .At plural exchanges
208 .Priority override (e.g., butt-in)
209 .Repetitive call attempts (e.g., camp-on-busy, retry)
210 .Call diversion (e.g., call capture)
211 ..Call forwarding
212 ..Call transfer
213 ..Intercept (e.g., dead or changed number)
214 ..Secretarial or answering service
215 .Call waiting

SPECIAL SERVICES
216 .Abbreviated dialing or direct call (e.g., hot line)
217 .Audible paging
218 .Performed by operator (e.g., butt-in, busy verification)
219 PLURAL EXCHANGE NETWORK OR INTERCONNECTION
220 .With interexchange network routing
221 ..Alternate routing
222 .Toll center
223 ..With operator assistance
224 .Tandem switching center
225 .Multi-PBX interconnection
226 .Having a manual exchange
227 ..With an automatic exchange
228 ...Having signalling to operator
229 .Interexchange signalling
230 ..Signalling path distinct from trunk (e.g., CCIS)
231 ..Central office-to-PBX signalling
232 ...PBX trunk groups
233 ...Direct inward dialing
234 ..PBX to central office signalling (e.g., direct outward dialing)
235 ..Voice frequency signalling over trunk
236 ..D.C. signalling over trunk
237 ...Pulse or digital signalling
238 ....Having signalling repeater
239 ....Using register-sender
240 ..Interexchange trunk circuit
241 ...Glare or simultaneous seizure mitigation
242 CENTRALIZED SWITCHING SYSTEM
243 .Class of service determination or transmission
244 ..In common control system
245 .Identification
246 ..Of line or trunk
247 ...With display
248 ...Using matrix
249 ...For nuisance call mitigation
250 .Four-wire switching
251 .With generating of call associated substation signal
252 ..For alerting signal at called station (e.g., ringing)
253 ...Electronic
254 ...Associated with connector
255 ...With interrupter
256 ..Having automatic or through ringing
257 ..For calling station (e.g., status or progress tones)
258 .Switching controlled in response to called station addressing signal
259 ..Including deflected electron beam switching device or mechanical or optical switching control (e.g., fluidic)
260 ..With operator position or completion of call (e.g., dial "O", semiautomatic)
261 ...Operator controlled register-sender
262 ...Call extension by operator
263 ....With call indicator or annoucer
264 ....A to B operator
265 ...Call distribution to operator
266 ....Call queuing
267 ...Operator's console
268 ..Having shared or common switching control
269 ...Distributed control
270 ...In-stage or interstage scanning (e.g., link scanning)
271 ...Having multistage switching
272 ....Path selection or routing
273 .....Alternate routing
274 ......With busy or idle test
275 .....Including marking circuit
276 ......End-to-end marking (e.g., self-seeking)
277 .....With busy or idle test
278 ....Interstage junctor or "trunk"
279 ...Control reliability (e.g., redundancy)
280 ...Including registering or storing device for call address signal
281 ....Conversion between dial pulse and voice frequency signal
282 ....Voice frequency receiver
283 .....Dual tone multifrequency (DTMF) receiver
284 ....With processor
285 ....With magnetic memory
286 ....Signal processing (e.g., dial pulse analysis)
287 ....Electronic
288 ....Register-sender
289 ...Translator
290 ...With time division of Control or supervisory signals
291 ...With detail of crosspoint switching structure (e.g., crossbar)
292 ....Electronic crosspoint (e.g., solid state)
293 ..Having line finder
294 ...Including electronic element (e.g., tube or semiconductor)
295 ...Plural
296 ..With repeater
297 ..Having specified busy-idle test
298 ..Direct control
299 ...Step-by-step system
300 ....Having plural wiper sets
301 ....Having potential control
302 ....Having rotary switch
303 ....Coordinate system (e.g., X-Y)
304 ...All relay type
305 ...Having motor-driven switch
306 ..With crosspoint switch detail
307 ..With power supply
308 .Switching apparatus for connecting calling line to operator's position
309 ..Call distribution or queuing
310 .Divided central (e.g., communication between switchboards
311 ..Having signalling path feature
312 .Having multiple answering jacks for multipled line
313 .Multiple section switchboard
314 ..Auxiliary (e.g., overflow)
315 .With line-signal control
316 ..Spring-jack cut-off
317 ..Relay cut-off
318 ..Central power source
319 .Single switchboard (e.g., cord circuit)
320 ..Switchboard circuit
321 ...Connection to operator's terminal
322 .Power supply
323 ..Power to switching equipment
324 ..Central power source (e.g., common battery, line current feed)
325 .Structure of equipment
326 ..Wire or cable distribution
327 ...Main or intermediate distribution frame
328 ..Equipment mounting or support
329 ...Allowing movement of equipment (e.g., movable, modular)
330 ..Housing
331 .Having protective circuit
332 .Plug and socket
333 CONCENTRATOR OR TRUNK SELECTOR
334 .Concentrator-distributor pair (e.g., line concentrator)
335 .Using crossbar or crosspoint switching

CONCENTRATOR OR TRUNK SELECTOR
336 .With magnet, electromagnet, or relay
337 .With busy-idle test (e.g., idle trunk finder)
338 REPEATER (E.G., VOICE FREQUENCY)
339 .With signal conversion (e.g., dial to DTMF, analog to PCM)
340 .Having line length compensation or equalization
341 .Pulse or tone repeater (e.g., electromechanical relay)
342 ..Electronic (e.g., logic circuitry)
343 .Controlled by a pilot or reference signal
344 .Component processes bidirectional signals
345 ..Including two-to-four wire conversion or hybrid circuit
346 .With frequency discriminator or negative impedance element
347 .With gain or attenuation control
348 .Transmission of power to distant repeater
349 .Having voice frequency transformer
350 SUPERVISORY OR CONTROL LINE SIGNALLING
351 .Signalling integrity protection (e.g., voice signal immunity)
352 .Substation originated
353 ..Conversion of signal form
354 ..With called number display
355 ..Repertory or abbreviated call signal generation
356 ...With dynamic memory
357 ...Insertable control element or circuitry (e.g., card)
358 ...By motor driven dial rotating device
359 ...Pulse signal generating (e.g., dialing)
360 ..Voice frequency band signalling (e.g., reed devices)
361 ...Electronic (e.g., tone generator)
362 ..Pulse signal generator (e.g., rotary dial)
363 ...Control of motor driven dial rotating device
364 ...With nonrotary actuator (e.g., key or slide type)
365 ...Specified switching contact (e.g., contact spring)
366 ...With detail of dial return mechanism (e.g., driving spring, speed governor)
367 ...Finger wheel or mechanical adjunct (e.g., finger stop)
368 ..Plural-switch number input device (e.g., keypad)
369 ..Detail of mounting of switch pad or dial
370 ...In handset
371 ..Magneto signalling
372 .Signal reception at substation
373 ..Incoming call alerting (e.g., ringing)
374 ...With music or audible message generation
375 ...With electronic call sounder (e.g., tone "ringer")
376 ...With visual indication of incoming call
377 .Using line or loop condition detection (e.g., line circuit)
378 ..With current controlling electromagnetic core device (e.g., Hall-effect device)
379 ..With optical link between line and switching system
380 ..By bridge circuit
381 ..Busy test or make busy
382 ..For ring trip or polarity reversal detection
383 ..Of plural lines
384 ...By scanning
385 ..Relayless
386 .Signal receiver (e.g., tone decoder)
387 SUBSTATION OR TERMINAL CIRCUITRY
388 .For loudspeaking terminal
389 ..With circuitry for voice control of transmission direction
390 ..With amplification or attenuation level control
391 .Sidetone control or hybrid circuit (e.g., induction coil)
392 ..Suppression (e.g., antisidetone)
393 .Hold circuit
394 .Impedance matching or line equalizing
395 .Amplifying
396 .Visual signalling (e.g., lamp)
397 .Wire distribution
398 LINE EQUALIZATION OR IMPEDANCE MATCHING
399 SUBSCRIBER LINE OR TRANSMISSION LINE INTERFACE
400 .For line length compensation
401 ..Voltage boosting circuit
402 .Hybrid circuit
403 ..With adjustable balance circuit
404 ...Automatic adjustment
405 ..Electronic noninductive
406 .Echo suppression, antisinging, or reverse path blocking
407 ..Disable or inhibit
408 ..Control by pilot frequency signal
409 ..Having variolosser or attenuator
410 ..Echo cancellation (e.g., phase opposition)
411 ...Having transversal filter
412 .Protective circuit
413 .Power supply (e.g., battery feed)
414 TRANSMISSION LINE CONDITIONING
415 .Reactance neutralizing
416 .Interference suppression
417 ..Anti-crosstalk
418 CALL SIGNAL GENERATING (E.G., RINGING OR TONE GENERATOR)
419 TERMINAL
420 .Having loudspeaking conversation capability (e.g., hands-free type or speakerphone)
421 .Having muting
422 .Switch or switch actuator structure
423 ..Line selection
424 ..Receiver or handset position responsive (e.g., hookswitch)
425 ...With mechanism for latching hookswitch or plunger against motion
426 ...Movable holder for receiver or handset
427 ...Having plunger and lever linkage
428 .Housing or housing component
429 ..Having distinct circuitry support structure (e.g., circuit board)
430 ..Body supported (e.g., headgear)
431 ..Separate housings for earphone and microphone (e.g., candlestick type)
432 ..Loudspeaking set
433 ..Handset structure
434 ..Specified terminal configuration (e.g., novelty type)
435 ..Wall set or convertible type
436 ..Desk set
437 ..Protective structure
438 ...Of cord or connector
439 ...Antiseptic
440 ..Casing or enclosure, per se.
441 TERMINAL ACCESSORY OR AUXILIARY EQUIPMENT

TERMINAL ACCESSORY OR AUXILIARY EQUIPMENT
442 .With circuit connection to terminal
443 .Including coupler (e.g., inductive)
444 ..Acoustic
445 .Locking device
446 .Telephone receiver support
447 .Attachable to terminal housing
448 ..Hookswitch operator
449 ..Handset holder (e.g., shoulder rest)
450 ..Clips onto terminal structure
451 .Protective structure
452 ..Antiseptic, disinfecting or disposable
453 .Hood or enclosure (e.g., booth)
454 .Support or stand
455 ..Handset holder
456 .Dialing tool
457 MISCELLANEOUS

1 CRYPTANALYSIS
2 EQUIPMENT TEST OR MALFUNCTION INDICATION
3 STORED INFORMATION ACCESS OR COPY PREVENTION
4 .Digital data (e.g., software program protection, data encryption)
5 .Video
6 ELECTRIC SIGNAL MASKING
7 .Video
8 .By signal having discrete step amplitude variation
9 ELECTRIC SIGNAL MODIFICATION (E.G., SCRAMBLING)
10 .Video
11 ..Variable time delay modulation of baseband video signal
12 ..Carrier phase shift
13 ..Carrier frequency conversion
14 ..Nonstandard scan of video information
15 ..By modifying synchronizing signal
16 ..Record or coin controlled
17 ..Phase inversion of scan line information
18 ..Facsimile
19 ..Encrypting of accompanying audio signal
20 ..Control coding
21 .Having transmission or distribution of key signal
22 .With magnetic record carrier (e.g., tape, drum)
23 .With user or record actuated authentication
24 ..Electronic funds transfer (e.g., automatic teller)
25 ..Computer
26 .With mechanical control of signal encryption (e.g., cam)
27 ..By perforated record
28 .By particular algorithmic function encoding
29 ..NBS/DES algorithm
30 ..Public key
31 .Plural modulation of single carrier
32 ..Wobbling of carrier
33 .Using plural paths or channels
34 ..Plural carrier frequencies
35 .Variable time delay modulation
36 .Time segment interchange
37 ..Block/data stream enciphering
38 .Frequency shift or inversion
39 ..With plural band pass filters
40 .With plural band pass filters
41 .With quantizing and subsequent normalizing of signal (e.g., reentry telephone circuitry)
42 .Data stream/substitution enciphering
43 ..Key sequence signal combined with data signal
44 ..With particular key generator
45 ...Multiple key level
46 ...Nonlinear (e.g., pseudorandom)
47 ...Plural generators
48 .With particular synchronization or initiation
49 .With digital signal handling (e.g., digital control, digital computer communication)
50 ..Including shift register or memory
51 .With production of printed copy (e.g., printer, typewriter)
52 .Including particular structure or housing (e.g., display, keyboard)
53 ..Audio transducer mounting or structure
54 BY MODIFYING OPTICAL IMAGE (E.G., TRANSMISSIVE OVERLAY)
55 WITH PRODUCTION OF PRINTED COPY (E.G., CRYPTOGRAPHIC PRINTER OR TYPEWRITER)
56 SELECTIVELY MOVABLE ELEMENT HAVING CODE CHARACTERS
57 .Rotatable
58 ..Characters on peripheral surface (e.g., cylinder section)
59 MISCELLANEOUS

CLASS 381 ELECTRICAL AUDIO SIGNAL PROCESSING, SYSTEMS, AND DEVICES

DECEMBER 1990

1	BINAURAL AND STEREOPHONIC
2	.Broadcast or multiplex stereo
3	..FM final modulation
4	...AM subcarrier
5	....Four discrete channels
6	.....Having transmitter
7	....Switch type detector or modulator
8	.....Two diodes
9	.....Four or more diodes
10	....Channel seperation control
11	....Automatic switchover between mono and stereo modes
12	....Stereo indicators (e.g., stereo presence)
13	....Antinoise
14	....Having transmitter
15	..AM or both AM and angle final modulation
16	...Having transmitter
17	.Pseudo stereophonic
18	..Pseudo quadrasonic
19	.Quadrasonic
20	..Matrix
21	...4-2-4
22	....Variable decoder
23	....With encoder
23.1	.Hearing aid
24	.Speaker arrangement
25	..Earphone
26	.Stereo sound pickup device (microphone)
27	.Center channel
28	.Amplifier
29	AUDIO BANDWIDTH COMPRESSION OR EXPANSION
30	.With content reduction encoding
31	.With digital signal processing or transmission
32	..Random access memory
33	.Delay line
34	TIME COMPRESSION OR EXPANSION (E.G., RUN LENGTH CODING)
35	.With content reduction encoding
36	SPEECH ANALYSIS AND SYNTHESIS COMBINED
37	.Using frequency
38	..Pitch
39	..Formants
40	.Using time
41	SPEECH ANALYSIS (E.G., PHONEME RECOGNITION)
42	.Voice recognition
43	.Word recognition
44	..Phonetic typewriters
45	..Frequency domain
46	.Detection of speech in noise
47	.Signal to noise ratio enhancement
48	.Speech parameter display
49	.Speech pitch fundamental frequency
50	.Speech formant frequencies
51	SPEECH SYNTHESIS
52	.Speech from printed matter
53	.Vocal tract model
54	HELIUM SPEECH
55	AUDIO TRANSDUCER PROTECTION CIRCUITRY
56	MONITORING OF SOUND
57	.Amplification control responsive to ambient sound
58	MONITORING/MEASURING OF AUDIO DEVICES
59	.Loudspeaker operation
60	.Testing of hearing aids
61	SOUND EFFECTS
62	.Tremelo or vibrato effects
63	.Reverberators
64	..Mechanical (e.g., reverberation chamber)
65	...Helical spring
66	DEREVERBERATORS
67	STETHOSCOPES, ELECTRICAL
68	HEARING AIDS, ELECTRICAL
68.1	.Directional
68.2	.Frequency control
68.3	.Bone conduction
68.4	.Gain control
68.5	.Spectacle
68.6	.Ear insert
68.7	.Hook over ear
69	.Specified casing or housing
69.1	..Having vacuum tube amplifier
69.2	..Having battery
70	ARTIFICIAL LARYNX, ELECTRICAL
71	ACOUSTICAL NOISE OR SOUND CANCELLATION
72	HEARING PROTECTORS, ELECTRICAL
73.1	SOUND OR NOISE MASKING
74	HEADPHONE CIRCUITS
75	MEGAPHONES
76	LECTERNS
77	ONE-WAY AUDIO SIGNAL PROGRAM DISTRIBUTION
78	.Drive-in
79	.Near field
80	.Multiple channel
81	..With switching
82	.Public address system
83	..Feedback suppression
84	..Spare amplifier substitution
85	..Speaker or channel switching
86	VEHICLE
87	HAVING NON-ELECTRICAL FEATURE (E.G., MOUNTING)
88	.Having enclosure or housing
89	..With loudspeakers driven in given phase relationship
90	..With loudspeaker (e.g., baffle, spatial orientation, etc.)
91	..With microphone
92	DIRECTIVE CIRCUITS FOR MICROPHONES
93	FEEDBACK SUPPRESSION
94	NOISE SUPPRESSION
95	MICROPHONE FEEDBACK
96	LOUDSPEAKER FEEDBACK
97	INCLUDING PHASE CONTROL
98	INCLUDING FREQUENCY CONTROL
99	.Having crossover filter
100	..With active device
101	.Automatic tone control
102	..With amplitude control
103	.Having automatic equalizer circuit
104	INCLUDING AMPLITUDE OR VOLUME CONTROL
105	.Remote
106	.With amplitude compression/expansion
107	.Automatic
108	..Including feedback
109	.With manual volume control
110	VOICE CONTROLLED
111	CIRCUITRY COMBINED WITH SPECIFIC TYPE MICROPHONE OR LOUDSPEAKER
112	.With carbon microphone
113	.With electrostatic microphone
114	.With piezoelectric microphone
115	.With magnetic microphone
116	.With electrostatic loudspeaker
117	.With magnetic loudspeaker
118	WITH MUSICAL INSTRUMENT
119	WITH MIXER
120	WITH AMPLIFIER
121	.Feedback
122	HAVING MICROPHONE
123	SWITCHING
150	ELECTRO-ACOUSTIC AUDIO TRANSDUCER
151	.Body contact wave transfer (e.g., bone conduction earphone, larynx microphone)
152	.Driven diverse static structure (e.g., wall, sounding board)
153	.With acoustic wave modifying structure
154	..Including sound conducting tube
155	..Directional

ELECTRO-ACOUSTIC AUDIO TRANSDUCER
.With acoustic wave modifying structure
156 ..Sound intensifying or spreading element (e.g., horn)
157 ...Mouthpiece
158 ..Absorbing or attenuating element (e.g., baffle, obstruction, damping)
159 ..Enclosure or resonant cavity
160 ..Reflecting element
161 .With mechanical amplifier arrangement
162 .Detail of mechanical vibration coupling to transducer (e.g., tuned vibrating element)
163 .Having bi-directional transducer
164 .Thermal response to, or generation of, sound vibration
165 .By modifying fluid flow
166 .Having a fluid as a conducting element
167 ..Ionized gap, spark, or flame
168 .Microphone
169 ..With mounting or support feature
170 ..Compound
171 ..Micromagnetic
172 ..Light modifying
173 ..Piezoelectric or ferroelectric
174 ..Capacitive
175 ..Semiconductor junction microphone
176 ..Conductive diaphragm (e.g., reed, ribbon)
177 ..Dynamic (e.g., magnetic)
178 ..Vibrating electrical contract
179 ..Resistive
180 ...Granular or carbon
181 ....Differential
182 .Plural or compound reproducers
183 ..Headphone
184 ..Different types of diaphragms
185 ..Having common voice coil
186 ..Plural diaphragms
187 .Having body supported structure (e.g., earphone)
188 .With mounting or support feature
189 .Having protective or sheilding feature
190 .Electrostrictive, magnetostrictive or piezoelectric
191 .Having electrostatic element (e.g., electret, vibrating plate)
192 .Electromagnetic (e.g., dynamic)
193 ..Having feature of edge-supported diaphragm
194 ..Movable voice coil
195 ...Multiple (e.g., double)
196 ...Pattern
197 ...Centering
198 ..Including adjustment mechanism
199 ..Magnetic circuit or core structure
200 ...Armature
201 ...Magnetic configuration (e.g., tubular or U-shaped)
202 ..Specified diaphragm shape or structure
203 ...Flat
204 ...Conical
205 .Electro-acoustical transducer mounting or support
124 MISCELLANEOUS

CLASS 382 IMAGE ANALYSIS

DECEMBER 1990

1 APPLICATIONS
2 .Personnel identification
3 ..Using a signiture
4 ..Using a fingerprint
5 ...Extracting minutiae such as ridge endings and bifurcations
6 .Biomedical applications (e.g., blood cell analysis)
7 .Reading currency or bank checks (e.g., documents bearing E-13B type characters)
8 .Manufacturing
9 IMAGE SEGMENTATION
10 PATTERN RECOGNITION
11 .Limited to specially coded, human-readable characters
12 ..Characters formed entirely of parallel bars (e.g., CMC-7)
13 .On-line recognition of handwritten characters
14 .Adaptive pattern recognizers (e.g., adaline, perceptron)
15 ..Capable of unsupervised learning
16 .Feature extraction
17 ..Multi-spectral features (e.g., color, frequency, phase)
18 ..Feature counting or histogramming
19 ..Local or regional features
20 ...Slice codes
21 ...Directional codes and vectors (e.g., Freeman chains, compass-like codes)
22 ...Pattern boundary and edge measurements
23 ...Point features (e.g., spatial coordinate descriptors)
24 ...Linear stroke analysis (e.g., limited to straight lines)
25 ...Shape and form analysis
26 ....Topological properties (e.g., number of holes in a pattern, connectivity, etc.)
27 ...Neighborhood transforms and matrix operators
28 ..Global features (e.g., measurements on image as a whole, such as area, texture, projections, etc.)
29 ..Waveform analysis
30 .Template matching (e.g., specific devices that determine the best match)
31 ..Spatial filtering (e.g., holography)
32 ..Nonholographic optical mask or transparency
33 ..Electronic mask
34 ...Comparator
35 ...Resistor matrix
36 .Classification
37 ..Sequential decision process (e.g., decision tree structure)
38 ...With a multi-level classifier
39 ..Statistical decision process
40 .Context analysis
41 IMAGE TRANSFORMATION OR PRE-RECOGNITION PROCESSING
42 .Correlation or convolution
43 .Fourier, Hadamard, or Walsh transform
44 .Changing the image coordinates
45 ..To position or translate the image
46 ..To rotate the image
47 ..To change the scale or size of an image
48 .Locating a pattern
49 .Multi-layered image transformations
50 .Adaptive quantization or variable thresholding
51 ..Based on the results of a histogram or count
52 ..Based on a local average
53 ..Based on peak levels
54 .Image enhancement or restoration
55 ..Line thinning or thickening
56 .Data compression or image coding
57 POST-RECOGNITION PROCESSING (E.G., EDITING AND ERROR CHECKING)
58 IMAGE SENSING
59 .Hand-held
60 .Curve tracer
61 .Format control
62 .Multiple scanning
63 ..Pre-scanning
64 .Magnetic
65 .Optical
66 ..Single spot
67 ..Single line
68 ..Full retina
69 MISCELLANEOUS

CLASS 383 FLEXIBLE BAGS

DECEMBER 1990

1 BIODEGRADABLE FEATURE
2 SELECTIVELY ADJUSTABLE VOLUME
3 INFLATABLE
4 CONVERTIBLE
5 TAMPER INDICATING
6 LIFTING OR SUSPENDING ELEMENT (E.G., HANDLE)
7 .Unitary with bag (e.g., element formed by hand hole)
8 ..Loop extending between opposite walls
9 ..Bag material includes aperture for rod-like support
10 ..Bag material includes hand-receiving aperture
11 .Magnetic or adhesive-type element (includes Velcro)
12 .Attached to bag frame
13 .Detachable
14 .With provision for positioning element in nonuse location
15 .Plural interengaging elements
16 .Plural elements located at diverse bag regions (i.e., bag bottom, bag middle and/or bag top)
17 .Including reinforcement or stress distribution means attached to or adjacent element
18 ..Extending across bag bottom
19 ..Extending axially through bag interior to bag bottom
20 ..Additional layer of material at element attachment location
21 .Attached to distinct end wall
22 .Hanging element
23 ..Hook-type
24 ..Closed loop
25 .Single element
26 ..Bag includes opening through bag material to receive element
27 ...Opening extending through fold of folded bag portion
28 ..Secured to bag interior
29 ..Straddles bag mouth
30 ..Secured to folded bag closure
31 ...Closure flap
32 WITH STACKING FEATURE
33 WITH MEANS TO MAINTAIN THE BAG MOUTH IN AN OPEN CONFIGURATION
34 .Hinged mouth stiffeners
34.1 ..Stiffeners include four or more hinged segments
35 WITH MEANS TO FACILITATE MANUAL SEPARATION OF FLATTENED BAG WALLS
36 WITH INTEGRAL FUNNEL
37 PLURAL
38 COMPARTMENTED
39 .Compartment-forming member secured to backing
40 .Including auxiliary compartment
41 WITH PLURAL ACCESS OPENINGS
42 WITH CLOSURE
43 .Self-closing type
44 ..Responsive to content (e.g., valve)
45 ...With vent
46 ...With closure reinforcing or stiffening means
47 ...With means to facilitate opening closure
48 ...With supplemental closing feature
49 ....Resilient
50 ....Reversely folded portion of closure element
51 ....Slit or slot
52 ....Adhesive
53 ...In distinct end wall
54 ....Including separate closure element
55 ...Folded bag corner
56 ....Including separate closure element
57 ...Closure includes inwardly folded bag wall portions
58 ...Overlying access opening in bag material
59 .Including auxiliary means for forming leakproof closure seal
60 ..Annular gasket
61 .Multiple independent closures for single access opening
62 .With provision for positioning closure element in nonuse location
63 .Rib and groove
64 ..With sliding element
65 ..Including means to facilitate disengagement
66 .For access opening in sidewall
67 .For access opening in bag bottom
68 .Elongated clamping elements
69 ..Sliding
70 .Twisted bag mouth
71 .Gathered bag mouth
72 ..Including drawstring-type securing element
73 ...With mouth opening aid
74 ...With means to maintain the securing element in closed configuration
75 ...In bag hem
76 ...Through bag openings
77 ..Securing element consisting of unitary bag portion
78 .Including separate closure element for straddling bag mouth (i.e., overlaps exterior portions of opposed bag walls)
79 ..Including securing element designed to extend through aligned openings in closure element (e.g., stitching)
80 ..Cap-type
81 ..Reusable
82 ...Bag walls designed to be rolled together or folded on common fold line
83 ..Bag walls designed to be rolled together or folded on common fold line
84 .Including closure flap which overlaps sidewall exterior when closed
85 ..Bag walls designed to be rolled together or folded on common fold line
86 ..Reusable
86.1 ...Including fastening element removably extending through aperture in bag material
86.2 ....Aperture extends through closure flap
87 ...Flap side edges permanently secured to bag (e.g., sandwich bag type)
88 .Bag walls designed to be rolled together or folded on common fold line
89 ..With separate securing element for roll or fold
90 ...Element extends substantially 180 degrees or more around roll or fold
91 ....Element extends around side edge
92 .Including securing element designed to extend through aligned openings in bag material (e.g., stitching)
93 .Closure within bag
94 ..Heat seal
95 ..Reusable
96 ...Stopper or plug
97 ...Zipper
98 .Overlapped flaps
99 ..Reusable
100 WITH VENTING OR VENTILATION MEANS
101 .Fluid circulates between bag plies

WITH VENTING OR VENTILATION MEANS
102 .Pervious material
103 .Opening in bag material
104 FREE-STANDING
105 WALL DETAILS
106 .Transparent portion or window
107 .Specified seam structure
108 ..Waterproof
109 .Multi-layer or ply
110 ..Insulated
111 ..Removable ply
112 ..Stretchable layer or ply
113 ..Barrier layer or ply (e.g., waterproof)
114 ..Including specified end structure
115 ...Overlapping extension formed by cuts in bag wall
116 ..Coating or lamination
117 .Woven or mesh-type material
118 .Stretchable
119 .Reinforced
120 .Pleated or gusseted
121 END STRUCTURE (E.G. BOTTOM)
121.1 .Rigid bottom
122 .Seamless
123 .Formed by folding bag walls on common fold line and joining together
124 ..Foldable to form distinct end wall
125 .Overlapping extensions of opposed walls
126 ..Extension formed by cuts in bag wall
127 MISCELLANEOUS

****

CROSS-REFERENCE ART COLLECTIONS

****

901 HOT WATER OR ICE BAG
902 HAVING NONBAG USE
903 STRESS RELIEF
904 FILLING TUBE
905 DEAD FOLD (DUCTILE) CLOSURE ELEMENT
906 DISPENSING FEATURE
907 PECULIAR, PARTICULAR SHAPE
908 MATERIAL HAVING SPECIFIED GRAIN DIRECTION OR MOLECULAR ORIENTATION

1 Vibratory (E.G., piezoelectric or kinetic) bearing
2 Nonjoint, nonrotating fulcrum bearing
3 .Knife-edge fulcrum
4 ..Edges up and down
5 ..Edge up
6 ..Edge down
7 Linear bearing
8 .Witn detection, nonbearing magnetic or hydraulic feature
9 .With temperature, electrical, or orthogonal feature
10 .Tensioned or resilient race or roller member
11 .For crosshead
12 .Fluid bearing
13 .Lubricating
14 ..Bearing for valve stem
15 .Combined with seal or guard
16 ..Annular
17 .For exetension table
18 .Ball bearing for drawer
19 .Roller bearing for drawer
20 .Plain bearing for drawer
21 ..Stop, detent, or lock
22 ..Anchoring or aligning means
23 ..Specified race structure or material
24 .Having relatively movable parts for latera insertion and retention of shaft
25 .Combined plain and antifriction
26 .Plain bearings
27 ..For flush tank
28 ..For valve stem
29 ..Cylindrical outer race
30 ...For die set or stamping mill shaft
31 ...For hand-held drill shaft
32 ...For piston rod
33 ..For elevator
34 ..For seat
35 ..More than two telescoping members
36 ..For structural installation
37 ..Resilient supporting member
38 ..Self-aligning
39 ..Gib
40 ..With adjustment means
41 ..Assembling means
42 ..Specified pad, liner, wear plate or race structure; bearing material
43 .Recirculating
44 ..Roller
45 ..No cylindrical race
46 .Roller bearing for extensive cylinder
47 .Alternating roller; or antifriction bearing for auto seat
48 .Combined ball and roller bearings
49 .Ball bearing
50 .Roller bearing
51 ..Cage configuration
52 ..Cylindrical inner or outer track
53 ..Location of plural roller sets; more than two telescoping members
54 ..Resilient member
55 ..Raceway configuration
56 ..Nonaxle supported roller structure
57 ..Adjustment or self-alignment means
58 ..Roller-on-axle bearing
59 ..Assembling means
91 ROTARY BEARING
92 .Roller drill bit
93 ..Lubricating detail
94 ..Seal detail
95 ..Inserts or bearing surface detail
96 ..Roller cone retaining means
97 .Water lubricated propellor shaft or well shaft
98 ..With elongated strips or staves
99 .Hydraulic or pneumatic bearing support
100 .Fluid bearing
101 ..With antifriction bearing
102 ...Backup
103 ..Flexible member
104 ...Plural ends fixed
105 ...Thrust bearing
106 ...Auxiliary resilient support
107 ..Radial and thrust
108 ...Spherical
109 ....Gas bearing
110 ...Conical
111 ...Outer recess forming fluid pad
112 ...Grooved thrust bearing surface
113 ...Central member recess
114 ..Radial
115 ...Shaft recess
116 ...Half-circular or less outer member
117 ...Pivoted fluid pad
118 ...Outer recess forming fluid pad
119 ...Resilient mounting member or seal
120 ...Circumferential groove in outer member
121 ..Thrust
122 ...Pivoted fluid pad
123 ...Grooved bearing surface
124 ...Resilient mounting member or seal
125 .Resilient bearing surface
126 .Plural bearings one plain and one antifriction
127 ..Roller
128 ...Tapered roller
129 .Plain bearing
130 ..With specified seal
131 ...Fluid actuated
132 ...Fluid barrier
133 ....Magnetic fluid
134 ....Gas
135 ...Centrifugal
136 ....With wick
137 ...And scraper
138 ...Unitary bearing and seal
139 ...Relatively rotatable radially contracting
140 ....Flexible sealing member
141 ....Diaphragm
142 ....Axially translatable member rotatable with shaft
143 ....Plural seals
144 ...Labyrinth
145 ...Arcuate bearing surface
146 ....Axially spaced lip
147 ...Lip seal
148 ....With radially acting bias means
149 ....Radially contained packing with axially acting follower
150 ...Mechanically actuated
151 ...Resilient sealing surface
152 ....O-rings
153 ....Elastomeric
154 ..Rocking type bearing
155 ...Lubricated
156 ...Movable pivot axis
157 ..For plow or colter disk
158 ..Railway car journal
158.1 ...With resilient mounting member
159 ...With guard or seal
160 ...Lubricating
161 ....For thrust bearing
162 ....For brass bearing
163 .....Reservoir fed
164 ......Capillary
165 ....With lower reservoir
166 .....Journal operated feed
167 ......Band
168 ......Centrifugal
169 ......Pump
170 .....Capillary
171 ......With wick biasing means

	ROTARY BEARING
	.Plain bearing
	..Railway car journal
	...Lubricating
	....With lower reservoir
	.....Capillary
	......With wick biasing means
172	.......Metal spring
173	........Coil spring
174	.......Rubber
175	......With capillary material retainer
176	.......Integral with box
177	.....Including roller applicator
178	......Yeildably supported
179	.......Coil spring
180	........Spring under compression
181	....Wick structure
182	...Sheet metal journal box
183	...With journal retainer and guide
184	....Lateral guide
185	.....Mounting feature
186	......Resilient
187	...Interior
188	...Includes thrust bearing
189	...Lid
190	....Mounted for swinging
190.1	.....About pivot at right angle to plane of lid
190.2	.....Spring and cam biased open
190.3	......With roller
190.4	.....Spring biased closed
190.5	....Sliding
190.6	....Lid structure
190.7	.....With latch
191	...Brasses
191.1	....Self aligning
191.2	....Bearing surface liner or inserts
191.3	....Assembling means
191.4	....Mounting structure
192	..Self-adjusting or self-aligning
193	...For vertical shaft
194	....With lower thrust and upper radial bearing
195	....Oscillatory suspension
196	.....Resiliently centered
197	....Oscillating thrust bearing
198	.....Resiliently centered
199	....Shaft balancing means
200	.....Resiliency on radial bearing
201	....Having body and spindle connector
202	...Resilient
203	....Ball and socket
204	.....For electric motor
205	...Fixed pivot axis
206	...Ball and socket
207	....Sheet metal socket
208	....Assembly
209	.....Separable ball retaining member
210	......Lock ring
211	......Of ball
212	......Sectional
213	....With lubricating means
214	.....Having felt or wick
215	..With resilient mounting member
216	...For connecting rod
217	...Lock type
223	...For thrust bearing
224	....Pivoted pad
225	....Helical coil spring
218	...Coil spring
219	....Biased bearing surface segment
220	...Nonmetallic
221	....Laminated
222	....Cylindrical
226	..For vertical shaft
227	...Spinning spindle
228	....With thrust and radial bearing
229	.....Adjustable spindle
230	.....Laterally resilient
231	......Resilient sleeve
232	......Volute coil spring
233	......Helical coil spring
234	......Fluid damping
235	......Rubber
236	.......At fixed end
237	.....With interior dead shaft
238	.....Pivoting spindle
239	....Bolster type bearing
240	....Lower end thrust bearing
241	.....With lubricating means
242	...Base supported table or drum
243	...Lower end thrust bearing
244	....For shaped shaft end
245	.....Spherical shaft end
246	.....Conical shaft end
247	..With adjustment means
248	...For thrust bearing
249	....Threaded member moves axially
250	....For crankshaft
251	....For thrust plate
252	...And support
253	....Simultaneous adjustment
254	....For horse power or sand reel
255	....Eccentric
256	....For roller end support
257	....For suspended shaft
258	.....Screw adjustment
259	......Horizontal and vertical
260	....Rectilinear
261	...Bearing surface
262	....For axle
263	....Adjustable bearing surface segment
264	.....Axial adjustment
265	.....Axially spaced annular segments
266	.....Two opposed bearing surface segments
267	......With wedge adjustment
268	.......For connecting rod
269	........Transverse screw adjustment
270	......For connecting rod
271	....Tapered sleeve
272	.....Split
273	....Split sleeve
274	....Pressure applying
275	..Radial collar and sleeve
276	..Specified sleeve or liner
277	...Insulating
278	...Temperature compensating
279	...Porous metal
280	...Liner on shaft
281	....Removably secured
282	...Bearing surface insert
283	....Groove
284	....Pocket array
285	.....Circular pocket
286	...Lubricant distributing
287	....High speed
288	....For crankshift
289	....For rotary member
290	.....Outer sleeve on shaft
291	....Groove
292	.....Helical or herring bone
293	....Pocket array
294	...For crankshaft
295	...Mounting feature
296	....Radial protrusion or sleeve end flange
297	...Nonmetal
298	....Fabric layer and capillary passages
299	....Nylon
300	....Polytetrafluorethylene (e.g., Teflon®)
301	...Spirally split
302	..Distributed weight
303	...For thrust bearing
304	....Tandem thrust

	ROTARY BEARING
	.Plain bearing
	..Distributed weight
	...For thrust bearing
305	....Grooved
306	....Pivoted pad
307	.....With lubricating means
308	.....Pad mounting structure
309	...Pivoted pad
310	....Noncircumferential
311	....Lubricant supply structure
312	....Pad mounting structure
313	..Cooling by lubricant
314	...Emergency lubrication
315	...Water lubrication
316	...Fluid path
317	..Specified cooling means
318	...Mist
319	...Frozen lubricant
320	...Nonliquid cooling
321	...Coolant path
322	..Lubricating
368	...For thrust bearing
369	....Forced feed
370	....Capillary
371	....For bearing at end of shaft
372	...Fixed shaft
373	....Forced feed
374	....Yoke reservoir
375	....Shaft-supported reservoir
376	.....At end of shaft
377	....Specified external feed
378	.....Spiral groove
379	.....Capillary
380	....Internal feed
381	.....Internal reservoir
382	......Capillary
383	.....Capillary
384	....Clearer and agitator
385	...Reservoir in rotating member
386	....Removable reservoir
387	....Capillary
388	....With feed regulator
389	....Feed to shaft end and center
390	....End feed
391	....Center feed
392	....Including distributing means
393	....Including inward deflector
394	....Including rotary blade
395	....With agitator
396	...Bolt type shaft
397	...For rotary shaft
398	....Forced feed
399	.....Lubricant metering structure
400	....Reservoir external to bearing
401	....Upper reservoir for horizontal shaft
402	.....Capillary
403	....Lower reservoir for horizontal shaft
404	.....Shaft operated elevating means
405	......Band or chain
406	.......Ring type
407	......Roller or ball
408	.....Capillary
409	......With wick biasing means
410	.....With wick retainer
411	......Differing capillary properties
412	......With lubricant impelling means
413	......Wick structure
414	.....Suction or pressure
415	....For vertical shaft
416	..for rotary member
417	...Pulley
418	...Roller
419	....Elongated
420	..Thrust bearing
421	...For pivot of towed vehicle
422	...For pivot of vehicle wheel frame
423	...For railway car side
424	...Axially spaced collars
425	...Including thrust plate at shaft end
426	....Plural end plates
427	....Axially related hub liner
428	..Mounting or support
429	...For crankshaft
430	....Connecting rod
431	....Pedal type crank
432	....Block and cap type
433	.....Engine housing closure
434	...Block and cap type
435	...Lock type
436	....Pivoted
437	.....Having bolt securing means
438	...Machine housing
439	...Mounted in wall aperture
440	...Bearing surface integral with support
441	...Annular support
442	...Single direction
443	....From above
444	....From below
445	.Antifriction bearing
446	..Nonbearing magnetic feature
447	..Elliptical, eccentric, alternating roller, or mass ball features; compensating for nonthermal deformation; centrifugal preload
448	..Sensor or inspection features; liquid metal or shipping protection features; bearing member integral with seal
449	..Outer race integral with wheel
450	..Skew prevention; formular relationship
451	..Recirculating or nonannular path
452	..Radial bearing with separate thrust bearing; radial ball-thrust roller
453	...Radial ball-thrust ball
454	...Radial roller-thrust ball
455	...Radial roller-thrust roller
456	..Radial bearing
457	...For crankshaft
458	....For pedal crank
459	...Railway car journal
460	...Disk plow
461	...Concentric
462	...Lubricating
463	....Solid lubricant feature
464	....Dipping, surface treatment or member versus lubricant density
465	....Centrifugal feature
466	....Jet, baffle or valve
467	....Cooling by lubricant
468	....Oil mist feature
469	....Porous or wick structure
470	....Cage structure
471	....With pressure or suction means
472	....Impeller
473	....Reservoir, filter or lubrication circuit structure
474	....Lubrication port
475	.....In race
476	...With cooling, heating or insulating
477	...With specified seal
478	....Centrifugal loading or slinging; fluid seal
479	....Pressure establishing or loading
480	....Labyrinth
481	....Relatively rotatable radially contacting
482	.....Resilient sliding surface material
483	....Radially contained packing with axially acting follower
484	....Lip seal
485	.....Radially outward lip
486	.....Plural lips
487	....Radially opening U-shaped retainer
488	....Flange small clearance
489	....O-ring or end cap seal

	ROTARY BEARING
	.Antifriction bearing
	..Radial bearing
490	...Ball bearing
491	....Ball structure
492	....Ball or race composition or material
493	....Temperature compensation
494	....Ball and roller bearings
495	....Self-aligning
496	.....Ball to larger spherical surface
497	......Radially outer larger spherical surface
498	.....Conforming spherical surfaces
499	....Split race
500	.....With race adjustment means
501	.....Double split
502	.....Split ring
503	......Fractured split
504	.....Plural rows balls
505	.....One race only split
506	......Inner race split
507	....Slot for ball insertion
508	.....With means for blocking slot
509	......Blocking by cage
510	....Specified means facilitating assembly or disassembly
511	.....Annular opening for ball insertion
512	....Plural axially spaced balls with integral race
513	....Specified bearing race structure
514	.....Strictly conical contact surface
515	.....Including radial race flange
516	.....Ball groove surface detail
517	....Axially biased race
518	.....Coil spring
519	....Adjustment means
520	....Discrete spacing member
521	.....Ball spacer
522	.....Roller spacer
523	....Cage structure
524	.....Including antifriction members
525	.....Wire cage
526	.....Resilient feature
527	.....Material, composition or laminate
528	.....Fully circular aperture for ball
529	......Two circular apertures per ball
530	......Plural elements joined to form an aperture
531	.....U - or C - shaped slot
532	......Unitary uniform strip
533	.....Entirely noncircular or nonconforming pocket
534	.....Unitary member
535	....Resilient support member
536	.....Elastomer or plastic
537	....Assembling means
538	.....Wedge means
539	.....Snap means
540	.....Threaded sleeve
541	.....Radial set screw
542	.....Bolt
543	....Fixed shaft and rotating outer member
544	.....For hub
545	......For bicycle hub
546	.....Outermost member cylindrical
547	.....Outermost member grooved
548	...Roller bearing
549	....Fixed supporting roller
550	....Toothed
551	....Discrete circumferential or axial spacer
552	.....Spaced by balls
553	.....Spaced by rollers
554	......With associated rings
555	......Mating grooves and projections
556	....Hydraulic axial jacking
557	....Temperature compensation
558	....Self-aligning
559	....Means facilitating assembly or disassembly
560	.....By cage or race structure
561	.....By groove and ring
562	.....By threaded member
563	....Axially biased race or roller
564	....Race end structure
565	....Roller structure
566	.....Helical feature
567	.....Hollow
568	.....Curved roller
569	....Race, liner or sleeve
570	.....Split ring
571	.....Tapered race
572	....Cage structure
573	.....Wire, filament, segmented or surface treated
574	.....Projecting into or through roller
575	.....Uniform sheet metal
576	.....Nonmetallic
577	.....Split ring or open slot
578	.....Nonunitary
579	......Bolted, welded or with spring
580	.....Lip on transverse bar
581	.....Resilient support member
582	.....Elastomer or plastic
583	....With adjustment means
584	....Assembling means
585	.....Race fastening means
586	....Fixed shaft and rotating outer member
587	.....Outermost element cylindrical
588	.....Outermost element grooved
589	.....For hub
590	..Thrust bearing
591	...Vehicle center
592	....Ball
593	....Roller
594	...Railway truck center bearing
595	...Railway truck side bearing
596	....Ball
597	....Roller
598	.....Toothed
599	.....With self-adjustment means
600	.....Assembling means
601	.....Contaminent elimination; adjustment means
602	......Adjustment by shim
603	...Spinning spindle
604	...Different size rolling elements; spacers; noncircular array
605	...Temperature compensation
606	...Lubricating
607	...Seals
608	...Concentric rolling members
609	...Ball bearing
610	....Single ball
611	....Resilient feature
612	....Self-aligning
613	....Plural rows balls or tandem thrust
614	....Cage structure
615	....Race structure
616	....Adjustment means
617	....Assembling means
618	...Roller bearing
619	....Roller structure or orientation; plural axially spaced rows or tandem thrust
620	....Resilient feature; adjustment or self-alignment means; assembling means
621	....Race and cage structure
622	....Race structure
623	....Cage structure

900	.Cooling or heating
901	.Floating bushing
902	.Porous member
903	.Retaining ring
904	.Propeller shaft outer bearing
905	.Temperature compensation
905.1	.Cup-shaped bearing
906	.Antirotation key
907	.Bearing material or solid lubricant
907.1	..Jewel, glass, ceramic or carbon
910	..Powders
911	..Including fiber
908	..Nylon or polytetrafluorethylene
909	..Plastic
912	..Metallic
913	..Metallic compounds

CLASS 388 ELECTRICITY, MOTOR CONTROL SYSTEMS

Class 388 is to be considered an integral part of Class 318 wherein subclasses 800-841 of Class 388 follow subclass 300 of Class 318, and subclasses 842-860 of Class 388 follow subclass 383 of Class 318 respectively and follow the schedule hierarchy of Class 318, retaining all pertinent definitions and class lines of Class 318.

800	CLOSED LOOP SPEED CONTROL SYSTEM FOR DC MOTOR WITH COMMUTATOR
801	.Field control, or field and armature control, by digital or combined analog and digital circuitry
803	.Field control, or field and armature control, by analog (only) circuitry
804	..By pulse width or duty cycle modification
805	..By phase or frequency modification
806	..By voltage or current modification
807	...With variable impedance
808	..By selection of windings
809	.Armature control by digital or combined analog and digital circuitry
811	..By pulse width or duty cycle modification
812	..By phase and frequency modification
813	..By phase modification
814	..By frequency modification
815	..By voltage or current modification
816	.Analog armature control
819	..By pulse width or duty cycle modification
820	..By phase or frequency modification
821	..By voltage and current modification
822	..By voltage modification
823	..By current modification
824	..By variable impedance (e.g., potentiometer)
825	OPEN LOOP SPEED CONTROL SYSTEM FOR DC MOTOR WITH COMMUTATOR
826	.Field control, or field and armature control
827	..With plural selectable speeds (e.g., manual switch)
828	.Armature control by digital or combined analog and digital circuitry
829	..By pulse width or duty cycle modification
830	.Analog armature control
831	..By pulse width or duty cycle modification
832	..By frequency modification
833	..By voltage or current modification
834	..By selection of windings
835	..By control of motor structure
836	...Position or number of brushes
837	..By periodic mechanical switch
838	..With plural selectable speeds (e.g., with manual switch, potentiometer
839	...By selecting impedance
840	....Resistive
841	....Inductive
842	CLOSED LOOP ACCELERATION CONTROL SYSTEM FOR DC MOTOR WITH COMMUTATOR
843	.Field control, or field and armature control
844	.Armature control
847	..By voltage or current modification
848	OPEN LOOP ACCELERATION CONTROL SYSTEM FOR DC MOTOR WITH COMMUTATOR
849	.Field control, or field and armature control
850	..By transformer or inductive device
851	..By patterned switch
852	..By insertion of resistance
853	.Armature control
854	..By voltage or current modification
855	..By selectable or variable impedance
856	...By insertion of resistance or shorting of circuit
857	....With relay
858	.....Time delay relay
859	....With patterned switch
860	...Manual

CROSS-REFERENCE ART COLLECTIONS

****

NOTE: No paper files exist for these art collections. They are to be used for APS searching. An effective way to use them is to cross search an art collection with a range of subclasses in the schedule of this class, (e.g., Use the search statement "S 388820/CCLS AND 388902/CCLS" to find closed loop analog speed control by frequency modification combined with compensation for voltage fluctuations).

900	SPECIFIC SYSTEM OPERATIONAL FEATURE
901	.Sample and hold
902	.Compensation
903	.Protective (e.g., voltage or current limit)
904	.Stored velocity profile
905	.Armature and field windings connected in series (i.e., series motor)
906	.Proportional-integral system
907	SPECIFIC CONTROL CIRCUIT ELEMENT OR DEVICE
907.2	.Bridge circuit
907.5	.Computer or microprocessor
908	.Frequency to voltage converter
909	.Monitoring means
910	.Operational/differential amplifier
911	.Phase locked loop
912	.Pulse or frequency counter
913	.Saturable reactor, space discharge device, or magnetic amplifier
914	..Thyratron or ignitron
915	.Sawtooth or ramp waveform generator
916	.Threshold circuit
917	.Thyristor or SCR
918	..Trigger by unijunction transistor
919	..Triggered by resistor or capacitor
920	..Chopper
921	.Timer or time delay means
922	.Tuned or resonant circuit
923	SPECIFIC FEEDBACK CONDITION OR DEVICE
924	.Centrifugal device (e.g., governor)
925	..Including contacts which open and close motor circuit
926	..Which controls a vacuum tube or solid-state device in motor circuit
927	..Which varies resistance of motor circuit
928	..Which controls position of commutator brushes
928.1	.Counter or back EMF (CEMF)
929	.Fluid/granular material flow rate, pressure, or level
930	.Load or torque
931	..Electric generator or magnet as auxiliary load
932	..With reverse torque (e.g., braking)

	SPECIFIC FEEDBACK CONDITION OR DEVICE
933	.Radiant energy responsive device
934	.Thermal condition
935	SPECIFIC APPLICATION:
936	.Food preparation equipment
937	.Hand tool

CLASS 392 ELECTRIC RESISTANCE HEATING DEVICES

DECEMBER 1990

CLASS 392 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 219 (AFTER SUBCLASS 270) AND FOLLOWS THE SCHEDULE HIERARCHY RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 219.

	HEATING DEVICES (CLASS 219 SUBCLASS 200)
301	.Borehole type
302	..With heat exchange fluid
303	..With vapor generator
304	..Heating element surrounding delivery pipe
305	..Suspended by cable in well
306	..Plural separate heating devices
307	.Combined with nonelectric heating means (e.g., gas, etc.)
308	..For heating liquid
309	..Hot plate
310	..Oven type
311	.Fluid-in-circuit type heater
312	..Method
313	..Portable
314	..Continuous flow of fluid being heated
315	...With means to adjust current path between electrodes
316	....Responsive to condition of fluid
317	....Movable dielectric means
318	...Current control means
319	...With discharge member for line or tank
320	...Tube or pipe forms flow path
321	....Pipe forms at least one electrode
322	..With reservoir or tank
323	...With means to adjust current path between electrodes
324	..Steam or vapor generator
325	...Line connected boiler
326	....Control of electrode immersion level
327	.....By electrode current
328	.....By pressure
329	....With means to adjust current path between elctrodes
330	.....Movable dielectric means
331	....Electrode arrangement
332	.....Water jet electrode
333	...Manually filled tank or container
334	....With means to adjust current path between electrodes
335	....With supply interlock means
336	....Separate electrode compartment
337	.....Electrode compartment removable from tank
338	..Electrode details
339	.With heat storage means
340	..Method
341	..For fluid heating (e.g., gas or liquid, etc.)
342	..For vaporization
343	..For subsequent heating by radiation
344	..For subsequent heating by convection
345	..Means to control heating accumulating medium
346	..Heat accumulating medium details
347	.Convection space heater
348	..Artificial fire
349	..Central heating type
350	...With air delivery duct
351	..Floor furnace type
352	..Baseboard type
353	...With baffle
354	..With intermediate heat absorber
355	...Heated by radiant source
356	....With fan blower
357	...With fluid heat absorber
358	....By fan blower
359	....Wall mounted
360	..Forced air type
361	...Heating attachment for fan
362	...Fan with heated blades
363	...Wall mounted
364	...Ceiling mounted
365	...Portable
366	....With fan position adjusting means
367	....Multi-direction air outlet
368	....With baffle
369	.....Counterflow
370	..Wall mounted
371	...In wall cavity
372	..Mounted in or on window or door
373	..Portable
374	...With baffle
375	..Combined with radiation
376	...With reflector
377	...With heat exchange fluid
378	....In plural sections
379	.Concentrated heated air stream (i.e., blast)
380	..For drying body part
381	...Wall mounted
382	..With support
383	..Portable
384	...With handle
385	....Pistol-grip type
386	.Vaporizer
387	..Method
388	..For metal vapor deposition
389	...With crucible
390	..With disposable evaporant cartridge or container
391	..By radiant heat source
392	..Wall mounted
393	..By light bulb heat source
394	..Liquid evaporant (e.g., water, etc.)
395	...With wick
396	...In continuous flow line connected heater
397	....Pipe or tube forms flow path
398	.....With internal heating element
399	...Flash chamber
400	...In-line connected closed tank (i.e., pressurized)
401	....With internal heating element
402	...In-line connected open tank or container (i.e., nonpressurized)
403	...Container with self-contained evaporant supply
404	....Hand-held
405	....With separate heating chamber
406	.....Removable
407	.Radiant heater
408	..With filter or diffuser for radiant energy
409	..Hand-held
410	...With air or gas circulation
411	..Lamp banks (i.e., array of plural lamps)
412	...Adjustable lamps position
413	....Adjustable individual lamp position
414	...Lamp banks form arch
415	...Lamp banks movable relative to stationary work during use
416	..With chamber
417	..For heating moving strand, web or sheet
418	..With support for workpiece
419	..Focussed radiant beam
420	...Plural reflectors
421	...Elliptical or ellipsoidal reflector
422	..With reflector
423	...Elongated reflector
424	....Heating element in transparent tubular envelope

HEATING DEVICES (CLASS 219 SUBCLASS 200)
.Radiant heater
..With reflector
...Elongated reflector
425 ....With exposed radiant heating element
426 ...Bowl-shaped reflector
427 ....Annular heating element concentric with reflector axis
428 ....Linear heating element aligned with reflector axis
429 .....Coiled on core
430 ...Wall mounted
431 ...Collapsible or foldable reflector
432 ..Radiant extended surface type heater
433 ...With exposed radiant heating element
434 ....On ceramic support structure
435 ...With heat radiating panel
436 ....Wall or ceiling mounted
437 ....Plural panels
438 ....Heating element formed as coating on radiating panel surface
439 .....Nonmetallic panel
440 ..Multi-direction radiant heat output
441 .Tank or container type liquid heater
442 ..Pour-in displacement discharge type tank
443 ..Flexible container (e.g., water bottle, etc.)
444 ..Portable container or tank
445 ...Plural compartments
446 ...With agitator
447 ...With internally positioned heating element
448 ....Removably inserted through fill opening
449 ..Line connected tank
450 ...Plural serially connected compartments
451 ...With immersion heating element
452 ....With baffle or guard
453 ....Removably insertable into tubular receptacle in tank
454 ....Plural heating zones
455 ....With heating element mounting arrangements
456 ....With heat exchange fluid
457 ....With protecting means against galvanic corrosion
458 ...With external heater
459 ....Clamped or secured to tank wall
460 ....Producing radiation
461 ....With externally mounted circulation-type heater
462 .....Laterally disposed (i.e., side-arm type)
463 ...With timer controlled energization
464 ....Off-peak power
465 .Continuous flow type fluid heater
466 ..Method
467 ..With hot plate
468 ..Pipeline tracing
469 ...Skin effect heater type (e.g., S.E.C.T., etc.)
470 ..Disposable cartridge, tube or bag forms heated flow path (e.g., blood bag, etc.)
471 ..Combined liquid flow heater and pump unit
472 ..Flexibe (e.g., hose, etc.)
473 ..Fluid heater carried on discharge member
474 ...With flow control valve (e.g., faucet, etc.)
475 ....Valve turns heating element on and off
476 ...Hand-held discharge member
477 ....With storage container for fluid to be heated
478 ..Fluid conveying tube or pipe comprising resistive heating element
479 ..Externally heated line connected section
480 ...Pipe or tube forms flow path
481 ....Coiled
482 ...Plural pipes or tubes form flow path
483 ...Heating element producing radiation
484 ...Block forms flow path
485 ..Heated line section with heating element internal of flow path
486 ...Plural pipes or tubes form flow path
487 ...With jacket for heating element
488 ...Pipe or tube forms flow path
489 ....With jacket for heating element
490 ...Plural heated line sections (e.g., series or parallel, etc.)
491 ...With baffle-defined flow path
492 ....Producing counterflow circulation
493 .....Heating element integral with baffle
494 ...Block forms flow path
495 ..Plural different fluids simultaneously heated
496 ..With heat exchange fluid
497 .Immersion heater details
498 ..With thermostatic control means
499 ..Buoyant in liquid
500 ..With plural heating elements
501 ..With particular mounting means
502 ..Having positive temperature coefficient
503 ..Particular sheath or jacket composition

CLASS 400 TYPEWRITING MACHINES

1 INCLUDING JUSTIFICATION OR QUADDING OF PRINT-LINE
2 .Including quadding of print-line
3 .By programmed-control-system
4 ..On auxiliary-record-program (e.g , tape, card, etc.)
5 ...Magnetic record
6 ...With error-correcting storage register
7 ...Including artificial or end-of line hyphen
8 .By using "no-print" device
9 .By interword or intercharacter spacing
10 ..Variable carriage-feed mechanism
11 ..Carriage slidable relative to its carriage-rack
12 ..By interword spacing only
13 ...Including plural space-bars for different spacings
14 .By typing line on stretchable medium
15 .Including justification indicator
16 FOR TYPING OR FORMING CONTINUOUS OR DISCONTINUOUS LINE (E.G., BY "LINER")
17 .Including programmed-control-system
18 .By scriber (e.g., pen, pencil, etc.) or with scriber guide
19 ..For writing in script
20 ..Rotatable disc scriber
21 .Responsive to carriage movement
22 .Underscoring concurrently with character imprinting
23 FOR TYPING ON FLAT RECORD-MEDIUM OR AGAINST FLAT PLATEN
24 .For typing on a book
25 ..Including a type-head (e.g., cylinder, disc, etc.)
26 ..Against cylindrical backing
27 ..Including adjustment of typewriter relative to book (e.g., to compensate for book thickness)
28 ..Including adjustment of book support relative to typewriter (e.g., for top or bottom of book, etc.)
29 .For typing on flat blueprint or drawing (e.g., "platenless" typewriter)
30 .For typing on carton or package
31 .By multidirectional movement of typewriter structure (e.g., "Elliot-Fisher" structure)
32 .Bottom-strike typewriter including type-bar action or bar platen or anvil platen
33 .Top-strike typewriter including pivoted type-bar
34 .Including carriage-return mechanism
35 .Including case-shift by shifting platen
36 .Including ribbon-feed mechanism
37 .For typing on manifold set (e.g., with type-die, etc.)
38 ..Including feeding of wide carbon paper transverse to feed of record-medium
39 ..Including spool for roll of carbon paper
40 ..Including clamp or guide for carbon paper
41 ..Including adjustment of platen perpendicular to its surface
42 ..Including aligning and feeding manifold set
43 .Including feed of tally strip
44 .Including line-spacing mechanism
45 ..Platen shifted for line-spacing
46 ..Including adjustment of line-space distance or increment
47 ..Including disengagement of line-spacing mechanism
48 .Work support (e.g, sheet or card holddown or guide, sheet-size platen, etc.)
49 .Collating-table attachment
50 INCLUDING DELAY MEANS FOR PREVENTING MALFUNCTION IN POWERED TYPEWRITER
51 .Delay of sequential character rate in programmed-control typewriter
52 .Delay by storage of next character to be imprinted
53 INCLUDING ADJUSTMENT MEANS TO COMPENSATE FOR WEAR
54 SAFETY SWITCH OR CONDITION-RESPONSIVE-CUTOFF SWITCH FOR ELECTRICALLY POWERED TYPEWRITER
55 INCLUDING ADJUSTMENT FOR OPTIMUM PRINTING PLANE
56 .Responsive to thickness of record-medium
57 .In accordance with the number of sheets of record-medium
58 .By adjustment of platen relative to carriage
59 .By adjustment of carriage (e.g, carriage-guide rollers)
60 ..Via adjustment of case-shift linkage
61 INCLUDING CONTROL OF FORMAT AND SELECTION OF TYPE-FACE BY PROGRAMMED-CONTROL-SYSTEM (E.G., INPUT TYPEWRITER)
62 .Including means for responding to input program or incoming signals and providing output program or signals representing typing operations, (e.g, output typewriter)
63 .Including editing or revision system
64 .Including right-hand margin control system
65 .Including typing of graphical representations
66 .Including baseplate attachment with electromagnets for input or output operations
67 .Separate interrelated programs
68 ..Including message writing (e.g, address program, form-letter program, etc.)
69 .Type-face selection via magnetic program tape
70 INCLUDING SELECTION OF TYPE-FACE BY PROGRAMMED-CONTROL-SYSTEM OR BY REMOTE CONTROL
71 .Plural typewriters coupled for simultaneous operation (e.g., "master-slave" relationship)
72 .Including character-selection latches (e.g., for type-face selection)
73 .Including particular reader structure and operation
74 .Including error detection
75 .Including type-bar selection using mechanical program
76 INCLUDING CONTROL OF FORMAT BY PROGRAMMED-CONTROL-SYSTEM
77 TYPEWRITER CONTROLS OTHER INFORMATION RECORDER
78 .Typewriter controls apparatus used for accounting function
79 ..And a tape-punch or card-punch apparatus
80 .Typewriter (e.g, output typewriter) controls tape-punch or card-punch apparatus
81 ..And imprints the character represented by the punched code on the tape or card

82 INCLUDING PLURAL, INDEPENDENTLY SUPPORTED KEY-BOARDS, PLATENS, OR TYPE-SET-ASSEMBLAGES
83 DISPLAYING TYPEWRITER-FORMED REPRESENTATION OF PRINT-LINE
84 .By projecting typed image on screen
85 ..Including transparent or transluscent record-medium
86 OPERATING BY SOUND
87 FOR OPERATION BY HANDICAPPED USER
88 POCKET TYPEWRITER
89 KEY REASSIGNMENT
90 .Electrically powered
91 STENOGRAPHIC TYPEWRITER
92 .Using common-letter type-face
93 ..Including plural type-faces mounted on carrier and movable for selection of type-face
94 .Electrically powered
95 LOGOTYPE TYPEWRITER (E.G., WORD TYPING)
96 .Including date-stamp type-face
97 .Including signature type-face
98 .Actuation of single key types plural characters
99 ..Characters typed simultaneously
100 PLURAL-KEY-ACTUATED TYPEWRITER (E.G., PERMUTATIVE KEY-BOARD)
101 .Having type-faces disposed on pivotable type-bars
102 .Having type-faces disposed on rotatable type-head
103 CODE-PRINTING TYPEWRITER (E.G., FOR PRINTING A PATTERN OR MARK)
104 .For typing and encoding
105 ..Including magnetic encoding
106 .Including coded ink (e.g., phosphorescent or color-coded ink, etc.)
107 .For coding by conductive mark
108 .For marking laundry
109 FOREIGN LANGUAGE TYPEWRITER
110 .Including Oriental lanugage
111 .Including Semitic language
112 ANNULAR TYPEWRITER (E.G., FOR TYPING AROUND CIRCUMFERENCE OF PLATEN)
113 .Including vertically disposed platen
114 .Platen axis horizontal and extending front-to-rear
115 .Powered Actuated
116 MUSIC-ROLL OR MUSICAL-NOTATION TYPEWRITER
117 .Musical-notation typewriter
118 TYPING BY OTHER THAN TYPE-FACE OR TYPE-DIE
119 .Electrographic or elelctromagnetic typing
120 .Thermal or hot-stamp typing (e.g, via gold ribbon)
121 .Character formed by plural-type components (e.g., "matrix" printer)
122 ..Multiple-point embossed character for blind "reader" (e.g., "Braille" character)
123 ..With means for exposing last-typed character
124 ..Wire-end components (e.g., dot-printer)
125 ..Line components
125.1 ...Character formed by parallel print bars
126 .Character formed by ink jet
127 TYPING TO PRODUCE EMBOSSED CHARACTER
128 .Character embossed or typed on nonplanar article (e.g., golf ball, toothbrush, etc.)
129 .By type-die mounted on carrier movable for selection of character
130 ..Including programmed-control-system
131 ..Electrically powered
132 ..Type-die reciprocable on carrier
133 ..On endless-band carrier
134 ..On rotatable carrier
134.1 ...Actuated by key-board control
134.2 ....Including type-die movable relative to carrier
134.3 .....With magazine for supply of record-medium plates
134.4 ...On manually held embosser
134.5 ....Including web supply of record-medium
134.6 ...Including web supply of record-medium
135 TYPING TO PRODUCE PIERCED CHARACTER
136 .Cutout character for stencil
137 .Check-protection character
138 ..By type-die mounted on carrier movable for selection of character
138.1 ...Electrically powered
138.2 ...On rotatable carrier (e.g., for scarifying elements, etc.)
138.3 ....Actuated by key-board control
138.4 ....Including plural-character type-die
138.5 .....And rotating contact with platen
138.6 ....For type-die including piercing or cutting elements
139 INCLUDING TYPE-SET-ASSEMBLAGE MOUNTED ON CARRIER AND RELATIVELY MOVABLE FOR SELECTION AND FOR IMPACT OF TYPE-FACE
140 .Including type-faces movable relative to type-face-carrier
141 ..Slidable type-faces mounted on reciprocable carrier
141.1 ...On rotatable or oscillatable carrier reciprocable along its axis
142 ..Slidable type-faces on rotatable carrier
143 ..Rotatable type-face carrier including type-faces on pivotable arms
144 ..Type-face-carrier including type-faces on flexible arms
144.1 ...Rotatable or oscillatable carrier
144.2 ....Carrier having coplanar flexible arms (e.g., "daisy" wheel, etc.)
144.3 .....Continuously rotated carrier
144.4 .....Manually rotated carrier
145 ..Type-faces on deformable type-face-carrier
145.1 ...Rotatable carrier
145.2 ....Cylindrical carrier
146 .Including endless-band carrier for type-faces
147 .Type-faces arranged in rectilinear row and selected by reciprocable movement
148 ..On rotatable carrier having plural rectilinear rows
149 .Plural type-heads mounted for selective individual type-head-imprinting movement
150 ..Type-heads arranged for selective individual imprinting movement away from coaxial rest position
151 ..Turret carrier for type-heads
151.1 ...Axis of turret carrier parallel to platen axis
152 .Type drum having multiple type-set-assemblages
153 .Imprint by movement of record-medium against type-face
154 ..By hammer impacting record-medium against type-face on type-head (e.g., type shuttle, etc.)
154.1 ...Including selection of type-face
154.2 ....Via pully and cord arrangement (e.g., summing displacements)
154.3 ....By shortest peripheral path

INCLUDING TYPE-SET-ASSEMBLAGE MOUNTED ON CARRIER AND RELATIVELY MOVABLE FOR SELECTION AND FOR IMPACT OF TYPE-FACE
.Imprint by movement of record-medium against type-face
..By hammer impacting record-medium against type-face on type-head (e.g., type shuttle, etc.)
...Including selection of type-face
154.4 ....Via coded disc in electric or magnetic circuit (e.g, photoelectric)
154.5 ....Via stepping motor responsive to selection
155 ....Via electrical or electromagnetic means
155.1 .....Including plural-function actuation by electromagnet(s)
156 ....Via helical arrangement of projections
156.1 ....Via mechanically permutated bar(s), disc(s) or plate(s)
156.2 ....Via planetary gear arrangement
156.3 .....Including latch means
157 ...Including type-faces arranged along helical path(s)
157.1 ...Including particular structure of hammer(s)
157.2 ....Electromagnetically actuated
157.3 ....For variable impression (e.g., impact control)
157.4 ....Hammer(s) mounted on endless belt or in helical array
158 ..Including platen for moving record-medium against type-face and mechanism for feeding record-medium
158.1 ...Including moving and feeding by platen
159 ..Including platen for moving record-medium against type-face and mechanism for inking type-face
160 .Imprint by pivoting of type-head-carrier and type-head against record-medium
161 ..Type-head-carrier movable on movable carriage
161.1 ...Including selection of type-face (e.g., on "golf ball" type-head)
161.2 ....Via gear train
161.3 .....Gears mounted on type-head and type-head-carrier
161.4 .....Including gear (e.g., rack) reciprocated by transmission mechanism
161.5 ....Via multiple cam surfaces
162 ..Type-head movable for selection of type-face
162.1 ...Via pulley and cord arrangement
162.2 ...Via shortest peripheral path
162.3 ...Via coded disc in electric or magnetic circuit (e.g., photoelectric)
163 ...Via stepping motor responsive to selection
163.1 ...Via electrical or electromagnetic means
163.2 ....Including electromagnetically actuated type-head movement toward record-medium
163.3 ....Including plural-function actuation by electromagnet(s)
164 ...Via helical arrangement of projections
164.1 ...Via pneumatic actuation
164.2 ...Via setting elements actuating selector-command member(s)
164.3 ...Control arm connectd to selection gear and movable to engage key-lever-actuated abutment
164.4 ...Via stop pins actuatable by key-board
164.5 ...Toothed member connected to selection gear and slidable by key-lever movement
164.6 ...Selection gear rotated by key-lever movement
165 ...Simultaneous rotation and translation of type-head by manually powered actuation (e.g., helical shift)
165.1 ...Via manually powered actuation other than by key-board (e.g, stylus selection)
165.2 ....Includinng type-head movable to print-point by actuator common to all type-faces
165.3 .....Selection by rotatable dial
166 ..Including impact control
167 ..Including rebound control
168 ..Articulated-support joint
169 ..Detenting to fix type-head for imprinting
170 ..Including movable printing anvil within type-head
171 .Plural type-set-assemblages selectively movable from a storage station to a printing station
172 .Type-faces mounted on type chips and removable from storage for printing
173 .With means for exposing last-typed character
174 .Type-head per se
175 ..Detachable from carrier (e.g., interchangeable)
176 HAVING FLUID-PRESSURE POWER DRIVE
177 .Including pneumatic decoder for perforated tape
178 .For producing typewriter-control tape (e.g., perforated tape, etc.)
179 .For type-face selection or choice
180 ..Including key-board driven by external pneumatic source
181 ..By pneumatic actuation of type-face or type-bar
182 .For movement of carriage or platen
183 ..Including line-spacing
184 HAVING TYPEWRITER-CONTROLLED RECIPROCABLE ELECTROMAGNETIC DRIVE FOR PLURAL FUNCTIONS IN SAME TYPEWRITER
185 HAVING POWER-DRIVEN OPERATOR FOR PLURAL FUNCTIONS
186 .Via continuously rotated power roll selectively connected to operate
187 .Usable selectively (e.g., for powered or manual operation, alternative usable functions, etc.)
188 FOR TYPING ON REVERSE SURFACE OF RECORD-MEDIUM
189 .By simultaneous use of both surfaces of same ribbon
190 .By use of "carbon paper"
191 INCLUDING INTERPOSED INKING DEVICE (E.G., RIBBON) FOR RECORD-MEDIUM
192 .Moved by continuously rotating power drive intermittently applied
193 .Inking device handheld during typing
194 .Endless ribbon or cartridge therefor
195 ..Mobius strip
196 ..Including storage (e.g., in cartridge, etc.) of ribbon
196.1 ...Having ribbon stored in pleated form
197 .Renovation of used ribbon
198 ..With ink heater (e.g., for melting solid ink)
199 ..By discrete auxiliary band movable with ribbon

	INCLUDING INTERPOSED INKING DEVICE (E.G., RIBBON) FOR RECORD-MEDIUM
	.Renovation of used ribbon
200	..Selectively actuatable re-inker
201	..Of multicolor ribbon
202	..Renovator attachable to typewriter for replenishing ribbon ink
202.1	...Attached to ribbon spool
202.2	...And includes refillable chamber (e.g., reservoir) for liquid ink
202.3	....And conveyor of discrete drops of ink
202.4	....And re-inking roller
203	.Ribbon disposed within platen
204	.For typing plural copies simultaneously with ribbon(s) (e.g., duplicate typing)
205	..Including holder for short length of ribbon
205.1	...Holder movable to inoperative position on typewriter
206	..Using plural ribbons (e.g., additional ribbon(s)
206.1	...Including "carbon paper" ribbon
206.2	...And ribbon holder movable to inoperative position on typewriter
206.3	...On plural coaxial spools
206.4	...On single spool
207	.Package for ribbon facilitating mounting of ribbon on typewriter (e.g., ribbon cartridge)
208	..Package attached to typewriter
208.1	...And includes separable assemblage of spools
209	.For bottom-strike typewriter
210	.For boldface typing
211	.Including mechanism for shifting ribbon laterally at print-point
212	..Via electrically powered actuator
213	..For impact of successive type-faces on one field of ribbon in path not parallel to longitudinal extent of ribbon (e.g., "zigzag", oblique, etc.)
213.1	...Via ribbon vibrator
214	..Plural ribbons shiftable laterally (e.g., by duplicate vibrators)
215	..By ribbon vibrator
215.1	...Including vibrator shiftable during use of nonfeed character key (e.g., for typing accent mark, etc.)
215.2	...With retardation of vibrator return after type-face impact (e.g., with dashpot)
215.3	...With elevation and holding of vibrator above print-point (e.g., to facilitate ribbon insertion)
215.4	...With inactivation of vibrator (e.g., for cutting a stencil)
216	...Including variable throw of vibrator
216.1	....For diverse-field (e.g., plural-color) ribbon
216.2	.....With typewriter-controlled change of field
216.3	.....By movement parallel to print-line
216.4	.....Vibrator throw controlled via alternate pins selectively inserted in slots
216.5	.....Field selection by selectively positioned stop faces to limit vibrator movement
216.6	.....To compensate for case-shift
217	..To shift impact path (e.g., during ribbon reversal)
217.1	...By adjustable ribbon guide spaced from supply spool
218	.Ribbon-reversing mechanism
219	..Including means responsive to depletion of ribbon supply
219.1	...Including an electric switch
219.2	...Including lever retained in spool by wound ribbon
219.3	...Including senser for diameter of wound ribbon
219.4	....Senser received in depression in core of spool
219.5	...Including projection from ribbon
220	..Alternative pawl-and-ratchet drive including ratchet directly connected to spool or spindle
220.1	...Including a common pawl member (e.g., double-toothed pawl)
220.2	...Including member interposed in pawl drive path
221	..Alternative gear drive including gear directly connected to spool or spindle
221.1	...And gears mounted on ends of axially shiftable common shaft
221.2	...And gears mounted on ends of pivoted common shaft
222	..Alternative clutch drive including clutch member directly connected to spool or spindle
223	.Ribbon-feeding mechanism
224	..For feeding ribbon angularly to print-line at print-point
224.1	...Ribbon fed perpendicular to print-line at print-point
224.2	....Ribbon is full-page wide
225	..Including electrically powered drive means (e.g., solenoid, stepping motor, etc.)
226	..For feeding ribbon partial character-space before impact and partial character-space after impact
227	..For narrow carbon ribbon (e.g., carbon ink, "single use", etc.)
227.1	...Ribbon destroyed after use
227.2	...Or for alternatively used fabric ribbon
228	..Including pin-feed-engaging ribbon
229	..Mounted with movable type-face-carrier or type-head-carrier
230	..With fast rewind of ribbon
231	..With prevention of ribbon feed (e.g., for nontype operation, etc.)
232	..Including feed at particular feed rate (e.g., "creep" feed)
233	..Ribbon feed from supply only during carriage return
234	..Including ribbon tensioner
235	..Drive applied by means directly engaging ribbon in advance of takeup
235.1	...Drive applied by pinch-roller couple
236	..Drive applied directly to spool or spool spindle
236.1	...By a pawl driving a ratchet on the spool or spindle
236.2	...By a gear driving a gear on the spool or spindle
237	.Ribbon per se
238	..Having leader portion (e.g., for threading, etc.)
239	..With ribbon-reversing indicator or device on ribbon
240	..Including differently pigmented fields
240.1	...Including correction-material field
240.2	...With prevention of bleeding between adjacent fields
240.3	...Including fields arranged transversely to elongated dimension of ribbon
240.4	...Including more than two fields
241	..Particular ribbon material

INCLUDING INTERPOSED INKING DEVICE (E.G., RIBBON) FOR RECORD-MEDIUM
.Ribbon per se
..Particular ribbon material
241.1 ...Synthetic material
241.2 ....Wherein ink is entrapped in ribbon material (e.g., microcapsules, micropores, etc.)
241.3 ...Particular weave pattern
241.4 ...Including ink-impervious backing for ribbon
242 .Ribbon spool or mount therefor
243 ..Universally adaptable
244 ..Including ribbon-reversing indicator or device on spool or mount
245 ..Including magnetic retainer
246 ..Spool for full-page-wide ribbon
247 .Means auxiliary to ribbon mechanism (e.g., shield, guide, etc.)
248 ..Including guide for ribbon
248.1 ...Ribbon guide opening expandable to facilitate ribbon insertion
248.2 ....And typewriter-actuated closing of guide
248.3 ...Including electrical, magnetic, or pneumatic guide means
249 ..Including indicator for depletion of ribbon (e.g., bell, sign, etc.)
250 ..Including tool for inserting ribbon
251 CASE-SHIFT MECHANISM
252 .Including programmed-control system
253 .Including electronic control or code-bar control
254 .Controlled by typewriter-actuated mechanism
255 .Including plural case-shift mechanisms (e.g., for simultaneous or selective use)
256 .Actuated by toggle-linkage
257 .For case-shift by type-head (e.g., spherical type-head) movement
258 .Power-operated mechanism (e.g., for locking shift key)
259 ..For shifting platen
260 ..For shifting type-bar-segment
261 .Multiple-shift mechanism (i.e., for type-bar having three or more type-faces thereon)
262 ..For shifting type-bar-segment
263 ..For shifting type-bar or type-face on type-bar
263.1 ...By pivoting type-face relative to type-bar
263.2 ...By rotating type-face relative to type-bar
264 .For shifting platen
265 ..Fore-and-aft (e.g., for top-strike or bottom-strike typewriter)
266 ..Mounted on pivotally movable platen carrier
266.1 ...With movement of platen out of typing position
266.2 ...Including adjustable counterbalance spring
266.3 ...Including a yieldable link (e.g., spring, etc.)
267 ..By depression of space-bar
268 .For shifting type-face or type-bar
269 ..By shifting type-bar or type-face on type-bar
269.1 ...By pivoting type-face relative to type-bar
270 ..Mounted on type-bar support (e.g., guide pin, type-bar-segment, etc.)
270.1 ...Ring hanger support
270.2 ...Including ball-bearing support
270.3 ...Including pivoted-lever support (e.g., cantilever spring, etc.)
271 .By choosing from one of a plurality of type-bars operated by a single key
272 .Including key attachment for case-shift
273 ..Operated by user's leg, (e.g., foot, knee, etc.)
274 .For locking case-shift mechanism in position (e.g., rebound lock, cam, etc.)
275 ..For locking platen in fore-and-aft position (e.g., by overcenter spring, etc.)
276 ..For locking shift-key lever in depressed position
276.1 ...By toggle-linkage
276.2 ...By means pivoted on shift-key lever
277 .Including limit stop (e.g., block, chain, etc.)
278 ..Including limit screw
279 CONTROL OF PRINT POSITION ALONG PRINT-LINE BY SIGNAL GENERATED BY PROGRAMMED-CONTROL-SYSTEM
280 .Program is indicia on auxiliary member
281 ..Member is punched tape or card
282 .Program is indicia on record-medium
283 CARRIAGE OR CARRIAGE-MOVING OR MOVEMENT-REGULATING MECHANISM
284 .For stopping carriage in tabular position (e.g., column-set positions)
285 ..In denominational positions
285.1 ...And column-set positions
285.2 ....Tab-rack stop intercepted by denominational-stop
285.3 .....Tab stops grouped in stepped fashion
285.4 ...With control of zero or space for decimal point
285.5 ...With reverse-direction movement of carriage
285.6 ...Helically mounted denominational-stop(s)
286 ...Shiftable denominational-stop(s)
286.1 ....Step-shaped denominational- or tab-stop(s)
286.2 ....Engaging movable tab-rack means
286.3 ...With latch or lock means
287 ..Column set by control of mutilated carriage-rack
288 ..Column set by control of tab-rack
289 ..Column set by control of tab stops or column stops or counter stops
289.1 ...Tab-stops grouped in stepped fashion
290 ..Forward or reverse tabulation
291 ..With impact cushion or rebound check
292 ..With control of carriage velocity
293 ..By multiple-pitch tab-racks or mutilated gear
294 ..Stop-setting or stop-clearing mechanism
294.1 ...With stop magazine (i.e., for suppl1y of stops)
294.2 ...With key-locking mechanism
294.3 ...Drum-mounted tab stops
295 ...Stop setting by linear shift of tab stop or counter stop
295.1 ....Stop shifts horizontally from tab-rack
295.2 ....Stop shifts laterlly along tab-rack
296 ...Stop setting by movement of tab-rack
296.1 ....Tab-rack rotates about its axis
296.2 ....Plural tab-racks
297 ...Stop setting by partial rotation of tab stop relative to tab-rack
297.1 ...Stop setting by pivoting pawlike stop
298 ..Tab-stop or tab-rack structure per se
299 .With rotatable type wheel for repeat printing in response to carriage movement

CARRIAGE OR CARRIAGE-MOVING OR MOVEMENT-REGULATING MECHANISM

300	.Key-actuated mechanism for nonfeed of carriage (e.g., "silent" key, locking carriage, etc.)
301	..By disabling carriage-escapement mechanism
302	..By key actuated independently of carriage feed
303	.For varying carriage feed
304	..For kerning or overlap imprinting
305	..By force-feed or screw-feed mechanism
306	..Proportional to variable widths of imprinted characters
306.1	...By settable elements (e.g., pins, bars, slides)
306.2	...By ratchet-wheel and controlled pawl
306.3	....Including multiple pawls
306.4	.....And multiple wheels
307	...By ratchet rack and controlled pawl
307.1	....Including multiple pawls
307.2	...By cooperating toothed members (e.g., gear, segment, rack, etc.)
308	.Carriage backspace mechanism
309	..Backspace proportional to variable width of imprinted characters
310	..Including powered drive means
311	..Including pawl and escapement wheel
312	..Including pawl and escapement rack
313	.Carriage-return mechanism
314	..With concurrent line-spacing
314.1	...Using electromagnetic drive
314.2	...For selected number of line-spaces
314.3	...With disconnection of return by margin-stop
314.4	...Initiated by user's leg or foot
314.5	...Initiated by actuator adjacent key-board
314.6	...By return-clutch means
315	..Responsive to carriage position
316	..Partial return (e.g., for start of paragraph, etc.)
317	..Including power drive (e.g., electric, spring, etc.)
317.1	...For bidirectional drive
317.2	...By spring-driven motor
317.3	...Powered via engagement of a clutch
318	..Initiated by actuator adjacent key-board
319	.Carriage-feed mechanism (e.g., escapement, etc.)
320	..For carriage on which a type-head-carrier is mounted
320.1	...With concurrent movement of carriage for record-medium and carriage for type-head-carrier
321	..With repeat spacing
322	..By electric or magnetic power
323	..Carriage-feed in two directions (e.g., continuous typing in two directions)
323.1	...In selected direction (e.g., for Semitic language, etc.)
324	..Word-space concurrent with typing of last character of word
325	..By space-bar mechanism (e.g., separate connection to escapement) or paragraph-indentation key
326	..With compensator for tilt of typewriter
327	..For diagonal print-line
328	..By force-feed or screw mechanism (e.g., direct drive, screw-biasing carriage, etc.)
328.1	...Including pawl and toothed rack
329	..Carriage escapement controlled by pawl
329.1	...Means to ensure engagement of pawl at start of print-line (i.e., overbanking control)
329.2	...Carriage-feed initiated and completed during depression of character key (e.g., "speed" or "reverse" escapement)
329.3	...Pawl rocker spring regulating device
330	...Via ratchet wheel connected to pinion and carriage-rack
330.1	....And plural pawls
330.2	.....For half-drop escapement
330.3	.....Mounted on pivotable pawl carrier or rocker
330.4	......Including pawl(s) fixed to rocker
330.5	.......And slidable pawl
330.6	.......Including pawl pivoted about axis parallel to rocker axis
330.7	.....Mounted on movable (e.g., rotatable, slidable) pawl carrier
330.8	.....Including particular structure of pawl (e.g., pivoted, unitary, with roller, etc.)
331	....Including plural ratchet wheels
331.1	....Including particular structure of ratchet wheel
331.2	....Including cushioned escapement support (e.g., rocker, pawl buffer, etc.)
331.3	....Including particular structure of mount for ratchet wheel (e.g., bearing, clutch, etc.)
332	...Via toothed rack
332.1	....And plural pawls
332.2	.....Mounted on pivtable pawl carrier or rocker
332.3	.....Mounted on movable (e.g., rotatable, slidable) pawl-carrier
332.4	.....Including particular structure of pawl (e.g., slidable, pivoted, unitary, etc.)
332.5	....Including plural toothed racks (e.g., pivoted, etc.)
332.6	....Including particular structure of rack (e.g., toothed, slidable, etc.)
333	..Universal-bar or actuator therefor
333.1	...Connected to actuator for another function
333.2	...Adjustable
333.3	...Actuated by type-bar or type-bar action
334	..Carriage-feed-release mechanism
334.1	...By disengagement of clutch between ratchet wheel and pinion
334.2	...By disengagement of escapement pawl(s)
334.3	....From carriage-rack
335	..With particular connection to carriage (e.g., gear train, pulley and strap, etc.)
336	..Spring-biasing carriage for feed
336.1	...Torsion spring in rotatable barrel
337	.Carriage-retarder mechanism
338	..Including governor responsive to speed or momentum
338.1	...Using centrifugal force
338.2	...Using inertial force retarder (e.g., flywheel, weight, etc.)
339	..Using fluid or fluent-material retarder
340	..Using frictional retarder (e.g., strap, disc, drum, etc.)
341	..Carriage-buffer stop or rebound control
342	.Margin-regulator (e.g., adjustable margin-stop) mechanism
343	..With intermediate margin-stop
344	..With other typewriter function controlled by margin-stop (e.g., signal, line-space)

	CARRIAGE OR CARRIAGE-MOVING OR MOVEMENT-REGULATING MECHANISM
	.Margin-regulator (e.g., adjustable margin-stop) mechanism
	..With other typewriter function controlled by margin-stop (e.g., signal, line-space)
345	...Carriage-arrest function (e.g., "overbank")
346	...Print-line locking function
347	..With multiple-pitch selector
348	..With release of margin-stop
349	..Conjointly set or centrally spring biased
350	..On record-medium table or paper-finger
351	..Margin-stop structure per se
352	.Carriage per se or guideway therefor
353	..Including auxiliary carriage
354	..Guideway or bearings for carriage
354.1	...Guideway cooperating with ball bearings or roller bearings
354.2	....Including bearing holder geared to carriage
354.3	....Including respositionable guideway
355	.Means for repositioning carriage or platen thereon
356	..To nonprint position
357	..To detach carriage
358	..To detach platen
359	HAVING TYPEWRITER-CONTROLLED RECIPROCABLE ELECTROMAGNETIC DRIVE FOR TYPE-BAR ACTUATION IN SAME TYPEWRITER
360	.Including electromagnetic return of universal actuator
361	.Including actuator to complete depression of selected key or key lever
362	.Including universal actuator to actuate selected type-bar action
363	..And individual solenoids to connect the type-bar action to be actuated
364	.Including individual solenoids to actuate the selected type-bar action
365	HAVING ROTATED POWER DRIVE INTERMITTENTLY APPLIED FOR TYPE-BAR ACTUATION
366	.Including jam-release means
367	.Interposed components driven by filter shaft
368	.For repeat-type action
369	..With prevention of repeat typing
370	.Via continously rotated power roll
371	..And oscillatable cam
372	..And rotatable cam (e.g., single-lobe cam)
373	...Including double-lobe cam
374	..And friction leg (e.g., other than by cam)
375	..Snatch roll
375.1	...Including plural coaxial snatch disc
375.2	...With control of impact force
375.3	...With electromagnetic control of pawl
375.4	...And star wheel
376	..With control of impact force
377	.Via limited-rotation clutch
378	..Plural cams clutched to drive shaft
379	.Via spring drive (e.g., spring-driven snatch roll)
380	..Including individual spring for each type-bar action
381	..Including reciprocable common actuator
382	.Via reciprocating common actuator
383	TYPE-BAR-ACTION MECHANISM OR TYPE-FACE ON TYPE-BAR OR TYPE-FACE INKER
384	.Spring drive for type-bar action
385	.With added-motion mechanism for type-bar near print-point
386	..Including toggle-linkage
387	..Including momentum accumulator
388	..Including hammer, roller, or presser mechanism
388.1	...Type-bar pivotable to vicinity of print-point
389	..With power assist for mechanism
390	.With end-thrust mechanism for type-bar
391	..Type-bar slidable on flat support
391.1	...Driven by gear means
391.2	...Driven by cam means
391.3	...Driven by toggle-linkage
391.4	...With power assist for mechanism
392	..Including momentum accumulator
393	..For top-strike or bottom-strike typewriter
394	.With type-bar pivot travelling during typing movement of type-bar
395	..Type-bar pivot on longitudinally movable carriage in top-strike typewriter
396	..With ink pad on type-bar rest
397	.With disconnection of type-bar action during movement thereof
398	.With accelerated (e.g., motion amplifying)type-bar action
399	..By rolling contact between links
399.1	...By key-lever rolling on fulcrum
400	..By cam-engaging link
401	..By breaking and straightening toggle-linkages
402	..By breaking toggle-linkage (e.g., to pull type-bar to print-point)
403	..By straightening toggle-linkage (e.g., to push type-bar to print-point)
404	..Including adjustment of toggle-linkage anchor position
405	..By type-bar connecting link
405.1	...Including gear connection
406	..By pin and slot connection
407	..Including type-bar starter means
408	.For bottom-strike typewriter
409	..Including simultaneous actuation of plural type-bars for simultaneous imprinting
410	..With pivotally mounted platen carrier (e.g., for access, etc.)
411	..Type-bar actuated by rack and gear
412	..Including type-bar mounting arrangement
413	..With type-face inker (e.g., ink-pad rest)
414	..Including key or key-lever arrangement
415	.For top-strike typewriter
416	..Including type-bars pivoted on both sides of, or above and across, platen axis
417	..With type-face inker (e.g., ink pad, roller, etc.)
418	..Type-bar pivoted by gear connection
419	..Type-member or type-bar pivoted and rotatable (e.g., for selection of type-face)
420	..Type-bar pivoted by push link
421	..Type-bar pivoted by cam
422	.Type-bar action
423	..Including selectively disengageable type-bar action to render action inoperable
424	..With type-face pivoted on type-bar for rolling contact with platen
425	..Including jam-release means
426	..Including type-bar return before release of key lever
427	..Including yieldable link in type-bar action
428	..Including means to limit type-bar movement

TYPE-BAR-ACTION MECHANISM OR TYPE-FACE ON TYPE-BAR OR TYPE-FACE INKER
.Type-bar action
429 ..Type-bar pushed or pulled by hooklike cam
430 ..Bar pulled to print-point
430.1 ...By cam means (e.g., slotted cam, helix, etc.)
430.2 ...By toggle-linkage
430.3 ...With movable type-bar-segment
431 ..Type-bar moved to print-point by gear drive
432 ..Type-bar moved to print-point by cam means
433 ..Type-bar moved to print-point by toggle-linkage
434 ..Including connecting link or joint
434.1 ...Adjustable (e.g., in length, etc.)
434.2 ...Flexible (e.g., spring, strap, etc.)
434.3 ...Including connecting element (e.g., joint, etc.)
435 .Type-bar rebound preventer (e.g., via latch, brake, linkage, etc.)
436 .Type-bar return spring connectd to type-bar-action linkage
437 ..For impact control
438 ..With adjustment means (e.g., for "touch" control, ect.)
438.1 ...Including an indicator
439 ..Attached to type-bar or universal-bar
440 ..Attached to key lever (e.g., tension spring)
440.1 ...Compression spring
440.2 ...Cantilever spring (e.g., torsion, hairpin, etc.)
441 .Type-bar pivot support
442 ..For plural groups of type-bars
442.1 ...Having type-bars disposed on plural ring supports
442.2 ...Including type-bars pivoted on vertical pivot(s) (e.g., moved in horizontal plane)
443 ..Ring support
444 ..Type-basket laterally movable relative to platen and key-board
445 ..Type-bar-segment (e.g., wire journal)
445.1 ...With guide for movement of segment
445.2 ...Including hanger for individual type-bar
445.3 ....And bearing for type-bar
445.4 ...Interchangeable (i.e., easily removable) segment
445.5 ...With type-bar anvil
446 ..Interconnected (e.g., nested) support bearings
447 ..Ball-and-socket bearing for type-bar (e.g., universal joint)
448 ..Roller bearing or ball bearing for type-bar
448.1 ...Including plural bearings for each type-bar
449 ..Adjustable bearing for type-bar
450 ..Pin support for type-bar
451 ..Wire support for type-bars
452 .Type-bar structure
453 ..With type-face movable in plane of type-bar movement
454 .Type-bar rest or rest support
455 ..Including metallic material
456 .Type-bar or type-member guide structure
457 ..Including resilient means for energy absorption or kickback
458 ..Mounted on platen-carriage
459 ..For thrusted type-bar
460 ..Guide adjacent print-point
460.1 ...Including rollers or balls
460.2 ...Including pin or collar
461 ..Adjustable guide
462 .Type-member structure
463 ..Removable type-member
464 ..Rotatable on type-bar
465 ..Pivotable on type-bar
466 ..Type-face or type-die configuration (e.g.,reverse image, boldface, piercing, etc.)
467 .Dust guard for type-bar action mechanism
468 ..For type-bar bearing (e.g., shield on type-bar-segment)
469 .Attachment to type-bar for imprinting extra character
470 .Ink-impregnated type-face or inker for type-face
471 ..Including stationary ink pad for inking type-face directly
471.1 ...And a wick for feeding pad from reservoir
472 KEY-BOARD OR KEY LEVER-ACTUATING MECHANISM
473 .Including mechanism (e.g., auxiliary key-board) for activating keys
474 ..Electromagnetic key-board-drive mechanism
475 ..Operated by user's leg (e.g., foot, knee, etc.)
476 ..For actuating function key only
477 .Including means generating a signal for type selecting or other typing function
478 ..Via slidable code bars
479 ..Via electrical component (e.g., switch, stylus, etc.) in or with key-board
479.1 ...Capacitance-responsive switch
479.2 ...Electromagnetic-responsive switch
480 .Including control of key action (e.g., buffer, etc.)
481 ..By regulating key force or movement (e.g., key dip or stroke)
482 .For stenographic typewriter
483 .For Braille typewriter
484 .For foreign-language typewriter
485 .Key-board having multiple-character, multiple-movement keys
486 .Key-board arranged according to character location
487 ..Color-coded key-board
488 .Key-board including row of keys having different heights
489 .Key-board including keys grouped to facilitate positioning of typist's fingers
490 .Key-Cap or key-stem structure
491 ..Including cushioning means (e.g., yieldable surface)
491.1 ...Including underlying air cushion
491.2 ...Including spring supporting key cap or key stem
491.3 ....With sensory indicator (e.g., sound, tactile response, etc.)
492 ..Adjustable in plane of key(s) (e.g., to facilitate reach, rotatable, etc.)
493 ..Including character-bearing disc on key cap
493.1 ...Secured by encircling ring member
493.2 ....With slot for exchanging disc
494 ..Having raised or recessed character
495 ..Including means for mounting key cap or key stem
495.1 ...By spring means
496 .Key lever or space-bar mounting structure (e.g., dust guard, buffer, pivot, etc.)

497 WITH CONTROL OF "CARBON PAPER" FOR TYPING PLURAL SIMULTANEOUS COPIES BY SINGLE IMPRESSION (E.G., ON "MANIFOLD SET")
498 .Including prevention of full imprint on "carbon copy" record-medium
499 .On record-medium wound around platen together with carbon paper
500 .With means for causing slack in web of manifold set
501 ..By arcuate movement of carbon paper carrier
502 ..By clamp on carbon paper carrier
503 .By use of other than rectangular sheet carbon paper (e.g., disc, etc.)
504 ..Endless-band carbon paper
505 .By multicolor carbon paper
506 .With means to prevent creep (e.g., relative movement) between record-media
507 .Including means for creep feed of carbon paper
508 .Including spool or support for roll of carbon paper
509 ..Including a flat roll or core therefor
510 ..And guide for changing feed direction
510.1 ...Spool support shiftable to and from platen
511 ..Feed mechanism for feed from roll of carbon paper
511.1 ...Responsive to return of carriage
511.2 ...With retraction of carbon paper for reuse thereof (e.g., by slidable carrier)
511.3 ....Carbon paper rewound for retraction
511.4 .....By driving carbon paper roll directly from platen (e.g., by endless band)
512 ..And support for roll of record-medium
513 .Including relative movement between carbon paper and record-medium
514 ..Including positioning of auxiliary record-medium
515 ..Including front insertion of carbon paper or record-medium
516 ..By simultaneously advancing record-medium and retracting carbon paper
517 ..By means to arrest advance of carbon paper
518 ..Carbon paper carrier(s) respositionable relative to platen
518.1 ...Plural carriers disposed side by side for selective use singly or simultaneously
518.2 ...Plural carries for serial retraction of plural carbon papers
518.3 ...With means to imprint selectively on one or more media (e.g., by holding selected media away from print-line)
518.4 ...Including retraction of carbon paper and record-medium and subsequent advance of record-medium
519 ...Carbon paper carrier movable rectilinearly
519.1 ....With means to hold record-medium against retraction
519.2 ....Including means to reduce binding of carbon paper during retraction
519.3 .....Including lifting of platen for retraction of carrier
519.4 .....With guard over settable parts (e.g., denominational jacks, etc.)
519.5 .....With relative movement betweem record media (e.g., for condensed-billing, etc.)
519.6 ....With support or guiding or positive-driving structure for carrier (e.g., table, adjustable stop, etc.)
519.7 ...Carbon paper carrier on endless member
520 .Carbon paper holder (e.g., loading board, etc.)
521 FOR TYPING ON CARD IN CARD HOLDER
522 .Flexible holder fed around platen with single card
523 .On card pierced or indented to aid holding
524 .Holder movable responsive to case-shift
525 .Card holder carrier by platen
526 ..And actuated in response to platen rotation
527 ..With platen surface modified for card
527.1 ...Including card gripper on platen
527.2 ...Including axially extending slot or hollow in platen
528 ..Holder attached via detachable arms at ends of platen
529 ..Holder attached via pins on holder or via adhesive attachment
530 ..Holder attached via element (e.g., band) gripping platen periphery
531 .Including line-spacing of holder or card
532 ..Variable line-spacing (e.g., platen creep)
533 ..In a curvilinear path
534 ..By pinion and rack
535 .Including support engaging bottom edge of card
536 .Card holder mounted on typewriter frame
537 ..Including means enabling movement of card relative to holder
538 ..Transparent card holder
539 ..Including finger movable away from holding position
540 ...Spring urged to holding position
541 .Including a feed-roller
542 .Card holder mounted on platen-carriage frame
543 .Including gripper or means urging card against platen
544 .Backing for stencil cutting (e.g, celluloid strip, etc.)
545 FOR LINE-SPACING BY INCREMENTAL ROTATION OF PLATEN
546 .To facilitate condensed billing (i.e., by determining a desired limit or amount of retrograde or advance platen movement)
547 ..Including stop structure (e.g, traveling stop, etc.)
547.1 ...For arresting platen at limit of both retrograde and advance movement
547.2 ....By stop travelling in a rectilinear path
547.3 ....By lever or push-rod drive for platen
547.4 .....Via gear drive
547.5 ......Including lever on axis transverse to platen axis
547.6 ......Including relatively adjustable coaxial gear segments
547.7 .....Via pawl and ratchet wheel drive
547.8 ......With spring motor
548 ..With graduated scale (e.g., on drum periphery)
549 .Actuated by key on key-board
550 .For multi-incremental rotation (e.g., "platen sweep")
551 .For line-spacing in forward or reverse direction
552 .With "floating" platen

FOR LINE-SPACING BY INCREMENTAL ROTATION OF PLATEN
553 .Via line-space / carriage-feed-release actuator
554 .For facilitating even wear of platen surface (e.g., by irregular increments, etc.)
555 .By irregular increments of platen rotation (e.g., for adjustment of platen relative to its actuator, etc.)
556 ..Including disconnecting ratchet wheel from platen (e.g., declutching ratchet, etc.)
556.1 ...Via relatively displaceable pin and slot members
556.2 ...Via toothed ring and locking member(s)
556.3 ....Including pivotable locking member(s)
556.4 ....Including radially displaceable locking member(s)
557 ...Via ball or roller clutching member(s)
558 ...Via binding jaws gripping annular flange between jaws
559 ...Via friction plate members engageable by axial displacement (e.g., pressure plate, etc.)
559.1 ....Friction members have cooperating conical surfaces
560 ...Via frictional engagement of periphery of cylindrical member
560.1 ....Friction member(s) acting on inner periphery of drum
560.2 .....Pivotable member(s)
561 .....Expandable band or split ring
562 ..Including settable stops
563 ..Including plural detents selectively engageable with ratchet wheel
564 ..Including a drive member engageable with line-space ratchet wheel
564.1 ...Via displaceable detent
565 ..Detent-release structure
566 ...With friction brake for platen
566.1 ...With simultaneous disengagement of drive pawl
567 ..Including gear (e.g., differential gear, etc.) structure
568 .By electric-power drive
569 .By gear train (e.g., including a clutch)
570 .By double-cam drive
571 .By friction drive (e.g., including regulation of increments)
572 .By pawl and ratchet wheel drive
573 ..Including rectilinearly movable pawl
573.1 ...And resilient drive
574 ..Including pawl carrier coaxial with ratchet wheel
574.1 ...And means to regulate pawl engagement or drive
575 ..Including means to regulate pawl engagement or drive
575.1 ...By movable ratchet-wheel shield
575.2 ...By stop adjustable to limit movement of actuator
576 .Via foldable line-space actuator
577 .With means to prevent reverse rotation or ensure full increment (e.g., for "backlash" prevention)
578 SHEET OR WEB (E.G., RECORD-MEDIUM FEEDING MECHANISM
579 .Including skew correction responsive to position of sheet or web
580 .Including forming indicia on record-medium during typing to find next line to be typed
581 ..To find last-produced slit or hole or notch in sheet
582 .Including programmed-control-system for record-medium feed (e.g., on auxiliary record)
583 ..For web record-medium
583.1 ...Program on auxiliary-record tape
583.2 ...Program is indicia on rotatable disc or drum
583.3 ...Program is indicia on record-medium
583.4 ...Including plural speed record-medium feed
584 .Including feed of plural record media arranged side by side (e.g., fed independently of platen)
585 ..By divided platen
585.1 ...With positive clutch for simultaneous rotation of platen sections
586 .Including feed of tally strip record-medium (e.g., plural tally strips)
587 ..And feed of endless transfer medium
588 ..On plural-platen (e.g., divided platen) typewriter
589 ..With locking or interlocking mechanism (e.g., line lock, etc.)
590 ..Including feed varied for amount of tally strip on spool
591 ..Including tally-strip feed transverse to feed of main record-medium
592 ..Including feed independent of platen
593 ..With cutting or spring tensioning of tally strip
594 ..Including structure or mounting or adjustment of tally-strip roll
594.1 ...And roll for transfer-medium
595 .Including insertion of sheet from front of platen (e.g., for "condensed-billing", via sheet guide, etc.)
596 ..Including feed responsive to presence of sheet
597 ..With subsequent line-spacing independent of platen
598 ..With digitally selected, typewriter-actuated feed to selected line to be typed (e.g., via "dialing" disc, etc.)
599 ..Insertion of sheet relative to other record-medium
599.1 ...With sheet-associating attachment (e.g., collating-table, etc.)
600 ..Via feed throat having gate (e.g., actuated by power, etc.)
600.1 ...With platen repositioned for sheet insertion
600.2 ...With feed-roller repositioned for sheet insertion
600.3 ....And sheet feed by additional feed-roller couple
600.4 ....Coincident to pivoting of sheet guide
601 ..With laterally movable sheet holder (e.g., having concurrent feed movement)
602 ..With sheet ejector
603 ..Via chute(s) or feed-roller couple (e.g., plural chutes)
603.1 ...Pivotable chute
604 ..Attachment to typewriter for converting to condensed-billing operation
605 .For feeding plural record media concurrently or selectively
606 ..Plural webs superimposed and aligned to each other during typing
607 ..Including movement of one record-medium relative to another

	SHEET OR WEB (E.G., RECORD-MEDIUM FEEDING MECHANISM
	.For feeding plural record media concurrently or selectively
	..Including movement of one record-medium relative to another
607.1	...In lateral direction (e.g., lateral shift of web or sheet carrier)
607.2	...By insertion of additional record-medium
607.3	...With concurrent feed-roller and line-spacing control
608	...With clamp for holding one record-medium stationary
608.1	....Selectively engageable feed-rollers of feed-roller brakes
608.2	...By auxiliary feed-roller or platen section (e.g., separate feed of sheets)
608.3	...By retrograde movement of one record-medium
608.4	...Including differential movement by separate drive means
609	..Mount for plural web rolls
610	..Including sheet-associating attachment (e.g., pin band-encircling platen)
610.1	...With table or frame (e.g., collating-table)
610.2	....Front collating-table with sheet-holding means (e.g., clamps)
610.3	.....Including pin-holding means
610.4	.....Including indicator
611	.For feeding web record-medium
612	..Feeding web or sheet in perpendicular directions
613	..With web supply or takeup or mount therefor (e.g., web cartridge, etc.)
613.1	...Including insertion of leading edge of web
613.2	...For folded or creased web (e.g., fan-fold web)
613.3	....With web smoother
613.4	....Holder for fan-folded web mounted to move with carriage
614	...Including web rewind
614.1	....Connected to platen drive
615	...Mounted on typewriter having transversely moving carriage
615.1	....Mounted to move with carriage
615.2	...For feeding tape in direction of print-line (i.e., transverse feed)
616	..By pin-feed means (e.g., reciprocating pin, etc.)
616.1	...Including laterally adjustable bands (e.g., tractor feed, etc.)
616.2	...Pin feed on endless band
616.3	...Pin wheel (e.g., on platen cylinder)
617	..By friction-feed means (e.g., reciprocating finger or gripper or pinch roller, etc.)
618	..With web tensioning or braking
619	..Including web guiding or aligning (e.g., laterally, relative to print-line, etc.)
620	..Including web shifting to view print-line
621	..With web cutter (e.g., tear bar, wire tool, etc.)
621.1	...For longitudinal cut
621.2	...And guage for tear-off length
622	.With holder for single sheet (e.g., clip, backing sheet, etc.)
623	..Mounted on carriage (e.g., for extra-wide sheet, cylindroidal holder, etc.)
624	.For feeding sheet from stack or pack holder
625	..And delivering to sheet receiver (e.g., by roller couple)
626	..By engaging between flap and body of envelope
627	..By pneumatic means
628	..By reciprocating of oscillating member
629	..By endless-band or rotating (e.g., feed-roller) member
630	.Including aligning of sheet edge prior to typing
631	..Aligner moved to operate concurrently with disengagement of feed means
632	..Including leading-edge aligner located past print-point
632.1	...Adjustable leading-edge aligner
633	..Side-edge aligner (e.g., adjustable, etc.)
633.1	...On rear sheet table or apron
633.2	....Adjustable aligner (e.g., with lock)
634	.Including friction-feed means (e.g., band)
635	..By endless-feed band
636	..By roller couple (e.g., rotatable pinch rollers, etc.)
636.1	...With typewriter-actuated control of feed-roller position
636.2	...Including intermediate drive means (e.g., gears) connecting feed-roller to platen
636.3	...Including feed-roller having equalizing or pressure-adjusting means
637	...Including lower feed-roller(s) (e.g., pressure roller, etc.)
637.1	....Including concurrent control for disengagement of upper and lower feed-rollers
637.2	....Mounted on apron
637.3	....Mounted on plural roller carriers
637.4	.....Including plural parallel carrier pivots
637.5	.....Including single carrier pivot intermediate front and rear lower feed-rollers
637.6	....Mounted on single carrier having pivot intermediate front and rear lower feed-rollers
638	...Including feed or pressure roller mounted on "paper-finger"
639	...Including upper feed-roller(s) (e.g, pressure roller, etc.)
639.1	....Mounted on "paper bail"
639.2	.....Disengaged from platen by compound movement of bail (e.g., on double-pivoted mount)
640	...With cooperating scale
641	...Feed-roller structure or brake or spacer therefor
642	.Including sheet guide (e.g., for sheet insertion, etc.)
643	..Platen-encircling band
644	..Sheet stripper (e.g., for preventing reentry)
645	..Sheet holddown member (e.g., "paper-finger", end-of-page holddown, etc.)
645.1	...With aperture or notch (e.g., for typing therethrough, etc.)
645.2	...On or with erasing plate or signal or indicator
645.3	...Movably mounted on movable finger carrier
645.4	...Pivotally mounted holddown
645.5	...Mounted in front of platen axis
646	..Sheet table at delivery side of platen
647	..Movable sheet table or apron (e.g., detachable, extensible, etc.)
647.1	...Pivotable (e.g., fingerlike support)

648 PLATEN OR PLATEN-MOVING MECHANISM
649 .For movement of platen other than for line-spacing
650 ..Cylindrical platen adjustable to facilitate compactness
651 ..Cylindrical platen axially adjustable
652 ..Platen movment conjointly with type-face movement
653 ..By eccentric mounting for platen
654 .Character-size platen (e.g., anvil, disc, etc.)
655 ..Mounted on movable carrier
656 .Bar (i.e., line size) platen
657 ..Mounted on cylindrical member
658 .Semicylindrical platen
659 .Cylindrical platen
660 ..Detachably secured to platen carriage
660.1 ...By axially displaceable supporting shaft
660.2 ...By pivoted member overlying platen shaft
660.3 ...By disengageable platen sectors
661 ..With sound-muffling means
661.1 ...Including plural layers of varying hardness
661.2 ...Including cylinder containing fluent (e.g., fluid, etc.) material
661.3 ...Including cylindrical sections or rings (e.g., of character-space width)
661.4 ...Including a wound member
662 ..Including particular surface characteristic (e.g., translucent, pigment yielding, corrugated, of varying hardness, etc.)
663 LOCKING OR INTERLOCKING MECHANISM
664 .For interlocking plural functions or mechanisms
665 ..Plural carriage-moving mechanisms (e.g., escapement, tabulation, etc.)
666 ..Plural keys or key linkages (e.g., for type-face selection, etc.)
667 .Key-board lock using interlock mechanism
668 .Locking means actuated in response to a condition
669 ..Failure of power supply
670 ..End-of-page lock (e.g., responsive to preset condition)
670.1 ...Responsive to end-of-page sensor
670.2 ...Including lock for platen or line-space
670.3 ....By cam groove and follower
671 ..End of maximum typed line
671.1 ...Actuated by space-bar
671.2 ...Universal-bar lock (e.g, pivoted latch, slidable latch, etc.)
671.3 ....Actuated by paper-finger
671.4 ....Interposed component
672 ...Escapement lock
672.1 ...Type-bar lock
672.2 ...Key-lever lock (e.g., by hook on key-lever)
673 ..Coin-controlled lock (e.g., responsive to print-lines, time, etc.)
674 .For locking carriage in centered position (e.g., with shipping support)
675 ..And disengaging case-shift lock
676 .Key-board security lock (e.g., cover plate, etc.)
677 .For locking selected group(s) of keys
678 .For locking key in actuated position (e.g., to remove type-face from ink pad)
679 MEANS AUXILIARY TO TYPEWRITING FUNCTION
680 .Means for collapsing typewriter or support for record-medium or copy
681 ..By tilting typewriter (e.g., via collapsible legs, etc.)
682 ..By moving key-board relative to frame (e.g., into plural operating positions, etc.)
683 ..By moving carriage relative to frame
684 ..By moving type-bars relative to frame
685 ..Including typewriter built into carrying case
686 .Buffer (e.g., dashpot, of particular material, etc.) for movable typewriter element
687 ..Having non-impact movement
688 .Means for increasing typewriter noise
689 .Means for muffling typewriter noise
690 ..By sound-barrier enclosure for typewriter (e.g., by sound-absorbing material)
690.1 ...With viewing window (e.g., having reflection eliminator)
690.2 ....And externally protruding (e.g., key-board, etc.) operating means
690.3 ...With externally protruding operating means
690.4 ...Including means facilitating opening of enclosure
691 .Frame, casing, or support for typewriter
692 ..Having means facilitating interchange of parts
693 ..Housing structure
693.1 ...For ink-ribbon spool (e.g., spool cover, etc.)
694 ..Made of particular material (e.g., plastic, etc.)
695 .Means for correcting typing errors (e.g., by abrasive eraser, etc.)
696 ..By laser beam or adhesive-surface ribbon or chemical eradicator
697 ..By overprinting (e.g, with coated material) to cancel error
697.1 ...With drive for ribbon having coating thereon
698 ..With erasing table
699 ..With receptacle for refuse
700 ..With means for rubbing eraser over surface of record-medium
701 .Means for cleaning, or facilitating cleaning of, type-face
702 ..By contacting type-face (e.g., via type-face cleaner, brush, etc.)
702.1 ...Including means for moving brush
703 .Indicator means
704 ..For indicating typist's skill or needed adjustment
705 ..For indicating position of carriage along print-line
705.1 ...Of carriage for type-head-carrier
705.2 ...With word counter
705.3 ...By means driven from carriage (e.g., for indicating end of print-line, etc.)
705.4 ...Scale for facilitating tabulation
705.5 ...Scale for facilitating centering of print-line
706 ..For indicating position of line or end-of-page
706.1 ...By scale mounted on paper table
707 ...By means driven from platen cylinder
707.1 ....Drive initiated by detector of record-medium
707.2 ....Including relatively movable pointer and scale (e.g., rotatable or rectilinearly movable pointer)
707.3 .....Scale rotated by gear drive
707.4 .....Rotatable scale coaxial with platen cylinder
707.5 ....With line numbering

	MEANS AUXILIARY TO TYPEWRITING FUNCTION
	.Indicator means
	..For indicating position of line or end-of-page
708	...Including detector of record-medium
708.1	....Having electrical contacts separated by record-medium
709	..For aligning record-medium with print-point or print-line (e.g., for facilitating correction of error, etc.)
709.1	...By transparent indicator
709.2	...For indicating print-line alignment
710	..Including page counter
711	..Including a light
712	..Including means producing an audible sound (e.g., plural tones, etc.)
713	.Attachment for shielding or screening record-medium or typewriter (e.g., against wind, etc.)
714	..For screening key-board
715	.Attachment for guiding fingers or hands of typist (e.g., hand rest)
716	.Attachment for illuminating or viewing (e.g., prism, etc.)
717	.Attachment for holding an article (e.g., pencil, eraser, etc.)
718	..Copyholder
718.1	...Actuated by typewriter (e.g., to simulate line-spacing, for web copy, etc.)
718.2	....With adjustment of line-spacing

CLASS 401 COATING IMPLEMENTS WITH MATERIAL SUPPLY

DECEMBER 1990

1	WITH MEANS TO IMPART HEAT TO MATERIAL
2	.At discharge portion of implement
3	INCLUDING HEAT-INSULATING HANDLE
4	WITH MEANS TO AGITATE MATERIAL IN RESERVOIR
5	INCLUDING MEANS TO REGULATE COATING THICKNESS
6	WITH MEANS TO ATTACH OR CONFORM TO BODY OF USER
7	.Hand-or finger-receiving pocket
8	.Hand-or finger loop or strap
9	INCLUDING TOOL(S) FOR CURVED OR PLURAL WORK SURFACE(S)
10	.Confronting tool faces
11	.Concave tool face
12	..For buttering ear corn
13	WITH MEANS TO WITHDRAW MATERIAL FROM WORK SURFACE INTO STORAGE
14	WITH SURFACE-PROTECTING BUMPER
15	WITH SPLASH GUARD OR DRIP CATCHER
16	DIVERSE COATING TOOLS
17	.Each with individual supply
18	.Separable for independent use
19	.Including solid material for rubbing contact
20	..Pencil and bifurcate nib pen
21	.Including ball, roller or endless-belt tool
22	.Simultaneously operative along same path
23	.Including porous tool through which material flows
24	..And brush, broom, or mop
25	.Including blade-like, pad-like, or apertured tool
26	..Apertured tool
27	..Including means for dispensing material directly to work surface
28	MULTIPLE-TIP MULTIPLE-DISCHARGE TOOL (E.G., MASSAGE TOOL)
29	PLURAL TOOLS INCLUDING PROJECTABLE AND RETRACTABLE TOOL
30	.Single actuator for simultaneous projection of one tool and retraction of another
31	.Including individual actuators
32	.Selective individual projection by single actuator
33	..With retraction spring
34	PLURAL EXPOSED TOOLS EACH WITH INDIVIDUAL SUPPLY
35	.Side-by-side
36	INCLUDING MEANS FOR SUPPLYING MATERIAL ALTERNATIVELY TO EACH OF PLURAL TOOLS
37	PLURAL TOOLS WITH SUPPLY TO LESS THAN ALL
38	.Including supply container and independent applicator
39	.Brush, broom or mop
40	CONCENTRATED MATERIAL AND LIQUID CARRIER
41	.Concentrated material in or adjacent reservoir outlet or feeder
42	..Including conduit supply means for liquid carrier
43	...And bypass for liquid carrier
44	SEPARATE FEED FROM PLURAL SUPPLY MEANS TO TOOL OR TO WORK
45	.Selective feed
46	..Including conduit supply means
47	.Diverse materials supplied
48	WITH MEANS SUPPORTING OR STABILIZING IMPLEMENT IN USE
49	SOLID MATERIAL FOR RUBBING CONTACT OR SUPPORT THEREFOR
50	.With means for severing portion of sheath or for shaping tool (e.g., pencil sharpener)
51	..Orbiting blade
52	.Combined
53	.Including means to limit tool projection
54	.Cushioned tool
55	.Including means to advance material
56	..Including means to selectively replenish guide
57	..Including means to sequentially replenish guide
58	..With reinforcement for tool
59	..Inter-related with movable closure
60	...Closure-actuated advancing means
61	..Including removable cap for inactivating advancing means
62	..And additional means to retract from operative position
63	..And means to eject piece from advancing means
64	...Including screw-feed means for both carrier and ejector
65	..Step-by-step
66	...Rack and pawl mechanism
67	...Alternately grasping chucks
68	..Screw feed
69	...Compound screw
70	...With means to disengage screw-feed members
71	...Oppositely oriented helices
72	...Material utilized as threaded advancing element
73	...Breech loading implement
74	...With retrograde-movement retarder
75	...Including means to positively transmit rotation to sliding screw-feed member
76	....Keyed blade-like or eye-headed screw member
77	....By pin and slot coupling
78	.....Including carrier for piece of material
79	...Directly actuatable cam members
80	..With resilient braking means
81	..By spring pressure
82	..Including manual actuator
83	...And latch
84	...And retrograde-movement preventer
85	..With storage chamber for additional piece(s)
86	..Including specific element-coupling or retaining means
87	..Including specific carrier or guide
88	.Including holder
89	..With storage chamber for additional material
90	...Including means to selectively or sequentially replenish guide
91	..Expendable sheath and use-condition point-protector
92	..Including chuck
93	...And annular clamp for chuck jaws
94	....Spring-urged clamp
95	..Including means to increase effective length
96	..Expendable sheath
97	...Sectional, scored or weakened
98	..And removable cap for tool
99	PROJECTABLE AND RETRACTABLE TOOL
100	.Magnetically projected, retracted, or latched
101	.With means to apply force on material in reservoir
102	.Retraction by application of removable closure cap
103	.Tip-pressure projection
104	.Clasp (e.g., Pocket Clip) associated with project-retract means or with latch

	PROJECTABLE AND RETRACTABLE TOOL
	.Clasp (e.g., Pocket Clip) associated with project-retract means or with latch
105	..Clasp passage blocked when tool is projected
106	...By reception of clasp within implement wall recess
107	.With movable closure or gate
108	..Interrelated with tool moving means
109	.Including retraction spring and projected-position retainer
110	..Retainer guided in orbital path (e.g., rotary indexing)
111	...And mechanical-movement actuator
112	..Including laterally or circumferentially movable keeper
113	...And separate release member
114	....For releasing flexibly-biased keeper
115	.Projection by movement of implement
116	.By screw mechanism
117	.Manually reciprocable sleeve
118	SUPPLY CONTAINER AND INDEPENDENT APPLICATOR
119	.Applicator provided with material receiver
120	.Barometric reservoir
121	.With means for removing surplus material from tool
122	..Straddling or encircling tool during withdrawal from supply
123	.Tool supported out of communication with supply
124	..With removable cap for tool
125	..Including compartment for tool
126	.Applicator includes container closure or overlies material
127	..Applicator movable axially relative to closure
128	..Rod-like or spoon-like solid applicator
129	..Brush applicator
130	..Blade-like or pad-like applicator
131	WITH MEANS TO SUPPORT OR STABILIZE IMPLEMENT WHEN NOT IN USE
132	INCLUDING RUPTURABLE MEANS OR SEALED-CARTRIDGE RECEIVER
133	.Sealed-cartridge receiver with flow-establishing means
134	..By piercing cartridge
135	...Implement includes vent, flow-regulator or force-applying means
136	INCLUDING MEANS FOR DISCHARGING MATERIAL ALTERNATIVELY TO TOOL OR TO WORK SURFACE
137	INCLUDING MEANS FOR DISPENSING MATERIAL DIRECTLY TO WORK SURFACE
138	.Reservoir on elongated handle
139	.Blade-like or pad-like tool
140	RESERVOIR SEPARABLY MOUNTED ON ELONGATED HANDLE
141	INCLUDING FLOATING FOLLOWER IN RESERVOIR
142	.Fluid follower
143	INCLUDING MEANS TO APPLY MATERIAL-MOVING FORCE
144	.Including filling tube extensible beyond tool
145	.Including means to flex diaphragm within rigid reservoir
146	.In or at feeder
147	..Actuated by work-contacting roller or ball
148	..Actuated by pressure of tool on work surface
149	..Inflexible solid means
150	...Piston in cylinder
151	.Intercommunicable reservoirs or reservoir sections in series
152	.Including means to collapse flexible wall
153	..Accordion fold wall
154	..By axial twisting
155	..By translatory movement along wall
156	..Resilient wall or wall portion
157	...Wall deformed by gas pressure
158	...Presser bar means
159	....Actuated by clasp or closure cap
160	....Pivoted on fixed axis
161	....Including fixed guide
162	....Resilient
163	....Including mechanical-movement actuator
164	.....Screw
165	.....Lever
166	......Including latch
167	......Including spring
168	....Including actuator and disabling latch
169	...Movable axially of reservoir or chamber
170	.By telescoping cylinder means in continuous communication
171	.Piston-provided reservoir
172	..Movable by screw means
173	...On piston and reservoir wall
174	...On piston and manual actuator
175	....Screw means through piston
176	..Slidable piston
177	...In reservoir having enlarged bore portion
178	...Including flow-regulator through piston
179	...Including mechanical-movement actuator
180	...Spring pressed
181	...Including flexible or pivoted actuator
182	...Including disengageable or extensible operating rod
183	.Manually engageable resilient wall or wall portion
184	..Rigid reservoir with resilient wall portion
185	...Squeeze bulb
186	..Including flow-regulator
187	.By compression or suction of gas in reservoir
188 R	..By one-way means for adding gas to reservoir (e.g., pump)
188 A	....Pens
189	..By one-way means for removing gas from reservoir
190	.Including pressurized reservoir (e.g., Aersol)
191	MATERIAL-CARRYING TOOL MOVABLE AWAY FROM SUPPLY MEANS
192	TRANSPARENT OR TRANSLUCENT WALL
193	WITH WORK-ENGAGING GUIDE
194	WITH SIGNAL OR INDICATOR
195	COMBINED
196	MATERIAL FLOWS THROUGH POROUS TOOL
197	.Hollow roller
198	.Wick feed from within reservoir to tool
199	..Wick separate from tool
200	.Particulate fluent material
201	.Including compartment for soluble solid material
202	.With removable cap for tool
203	.Couplable to external source
204	..With flow-regulator
205	.With flow-regulator
206	..Resiliently biased
207	.Tool or tool unit separable from reservoir

208 INCLUDING BALL, ROLLER OR ENDLESS-BELT TOOL
209 .Ball
210 ..Adjustable-length reservoir
211 ..Magnetic ball-retainer
212 ..Ball-bearing mounting
213 ..With sealing cap
214 ..Elastic ball-mounting
215 ..Specific ball
216 ..Specific ball-retainer
217 ..With means to vent reservoir
218 .Engageable with feed roller
219 .With flow-regulator
220 ..By movement of roller
221 BIFURCATE POINTED NIB TOOL (E.G., FOUNTAIN PEN)
222 .Including reservoir and feeder
223 ..Including capillary material-retainer filling reservoir
224 ..Including filamentary conductor for material or air
225 ..Including overflow receiver
226 ...Hooded tool
227 ...Transverse overflow-receiving grooves or slots
228 ...Laterally exposed
229 ...In or contiguous to feed path
230 ..Intercommunicable reservoir sections in series
231 ..Means regulating nib slit width or flexure
232 ..With flow-regulator
233 ...By adjusting gap between broad-face tool elements (e.g., ruling pen)
234 ...Actuated by protective cap for tool
235 ...By pressure of tool on work surface
236 ...For adjusting feeder channel
237 ....Apertured flow-regulator part
238 ..Feeder overlying tool
239 ...With additional feed element underlying tool
240 ..Angulated or curved feed path
241 ..Feeder extending into reservoir
242 ..Distinct air passage in feeder
243 ..Including removable cap for tool
244 ...And latch
245 ...Cap includes means for sealing feeder or air passage
246 ...Cap shoulder abutting outer end of pen section
247 ...Composite cap
248 ..Hooded tool
249 ..Tool and feeder specifically related
250 ...Integral or interlocked
251 ..Specific joint or connection
252 .Attached coating material retainer feeding directly to tool
253 ..Transversely grooved or slotted
254 ..Cooperating with tool to form pocket
255 ...Overlying tool
256 .Broad face, adjustable gap tool (e.g., ruling pen)
257 ..Pivotally related tool elements
258 INCLUDING STYLUS
259 .Axially movable by pressure on work surface
260 ..Resiliently biased outwardly
261 INCLUDING TOOL WITH BLADE-LIKE, PAD-LIKE, OR APERTURED WORK-CONTACTING END
262 .With removable cap for tool
263 .With flow-regulator
264 ..By pressure of implement on work surface
265 .Apertured tool
266 ..Blade-like or pad-like
267 .Supply-means at tool only (e.g., lettering pen)
268 BRUSH, BROOM, OR MOP
269 .With removable cap for tool
270 .With flow-regulator
271 ..Actuated by material supply
272 ..Actuated by telescoping of tool or by pressure of tool on work surface
273 ...Resiliently biased to closed position
274 ..Responsive to movement of implement
275 ..Actuated by movable implement handle
276 ..Vent-regulating means
277 ..Having operating screw
278 ..Resiliently biased
279 ...Including mechanical-movement actuator
280 ..Apertured movable part
281 ...Rotatable or revoluble
282 .Including feeder
283 ..Porous feeder
284 ..Material directed to periphery of tool
285 ..Elongated perforated tube transverse of tool elements
286 ..Feeder terminates among tool elements
287 ...Plural feeder terminals
288 ...Encompassed by confining means for tool elements
289 ..Attached or attachable to conduit supply means
290 ..Including specific retaining means for tool
291 ..Perforated support

DIG 3 Point Shape

CLASS 402 BINDER DEVICE RELEASABLY ENGAGING APERTURE OR NOTCH OF SHEET

DECEMBER 1990

1 SHEET RETAINER WITH SEPARATE APERTURE MAKING DEVICE (E.G., PAPER PUNCH, ETC.)
2 SHEET RETAINER WITH LOCK AND DISCRETE KEY OPERATED RELEASE MEANS
3 BINDER WITH VISUAL IDENTIFICATION MEANS
4 COMBINED
5 PIVOTAL LINK TYPE SHEET RETAINER
6 .With means to apply tension thereto
7 SHEET RETAINER ALSO SERVES TO INSERT BINDER STRAND THROUGH SHEET
8 PLIANT, DEFORMABLE SHEET RETAINER (E.G., CORD, BAND, STRAP, ETC.)
9 .With means to apply tension thereto
10 ..Reel type
11 ..Rack or screw type
12 .Endless
13 .Flaccid retainer secured by knotted, intertwined or wedge portion
14 .Secured by folded portion thereof
15 ..Cooperating with holder therefor
16 ...Pivoted holder
17 ...Slidable holder
18 ..With depository attaching means
19 RESILIENT SHEET RETAINER REQUIRING DEFLECTION FOR SHEET REMOVAL
20 .Opposed sheet retainers
21 .Releasably attached to keeper
22 ..One end permanently secured
23 ...On discrete hinge pin
24 SHEET RETAINER INCLUDING SHEET GUIDE MEANS
25 SHEET RETAINER WITH MEANS TO FORCE SHEET THEREON
26 SHEET RETAINER TRAVELS ARCUATE PATH
27 .Coplanar with axis of rotation
28 ..Preceded by a rectilinear travel
29 .Travel in plane perpendicular to axis of rotation
30 ..Preceded by rectilinear travel
31 ..Opposed sheet retainers (e.g., ring binders, etc.)
32 ...Spacing of adjacent retainers adjustable
33 ...Opening between retainers adjustable in predetermined increments
34 ...Stationary retainer with traveling opposed retainer
35 ....Spring biased
36 ...Hinged on spaced axes
37 ....Toggle-type arrangement
38 .....With actuator to open or close retainers
39 .....Including abutting mated components
40 ......Toggle and adjacent retainers of one-piece rod
41 ....With actuator to open or close retainers
42 ...Rotatable on discrete hinge pin
43 ....Plural pairs of opposed retainers independently operable
44 ....Offset retainers
45 ..Opposed keeper cooperating therewith
46 OPPOSED SHEET RETAINERS INVOLVING RELATIVE RECTILINEAR TRAVEL
47 .With or including separable sheet transfer means
48 .Telescopic retainers with means to telescopically drive and/or secure
49 ..Pivoted linkage system
50 ..Remote from retainer
51 ...Screw threaded means
52 ..Notched or grooved means
53 ...Screw threaded
54 ..Wedge type securing means
55 .Travel from aligned to offset position
56 .Travel from aligned to aligned, spaced position
57 COILED SPRING TYPE SHEET RETAINER
58 SEGMENTAL SHEET RETAINER
59 .With keeper
60 SHEET RETAINER WITH RELEASABLE KEEPER (E.G., HOLD DOWN, ETC.)
61 .Keeper cooperating with retainer of varying cross-section
62 ..Apertured retainer
63 ..Notched or grooved retainer (e.g., screw threaded, etc.)
64 .Keeper including wedge type securing means
65 ..Skew locked
66 ...Spring wedge element
67 ..With screw threaded wedge driving means
68 .Keeper including apertured or recessed sheet retainer receiving component
69 ..Spring biased
70 SHEET RETAINER WITH BASE OR DEPOSITORY
71 .With sheet retainer guard
72 .Collapsible on base
73 DEPOSITORY (E.G., BINDER COVER, ETC.)
74 .Face member with back member
75 ..Including means to attach sheet retainer or binder device
76 ..Back member including hinged portions
77 ..Hinged at juncture
78 .Face member
79 SHEET
80 R MISCELLANEOUS
80 L ..Sheet lifters
80 P ..Plastic

500 BINDER WITH TAB OR FASTENER FOR SECURING SHEET
501 SHEET RETAINER CONTINUOUS WITH PERIPHERY OF SHEET NOTCH
502 CONTAINER WITH SHEET RETAINER
503 BINDER DEVICE, SHEET OR DEPOSITORY INCLUDING MAGNETIC MATERIAL

CLASS 403 JOINTS AND CONNECTIONS

DECEMBER 1990

1 SELECTIVELY ENGAGEABLE HUB TO SHAFT CONNECTION
2 INCLUDING FRANGIBLE COMPONENT
3 SELECTIVELY ASSEMBLED, E.G., CONVERTIBLE, ETC.
4 .Selective orientation
5 INFLATABLE CONNECTOR
6 WITH OPENING FOR ACCESS TO CONNECTOR OR OPERATOR
7 .To threaded component
8 ..Transverse to thread axis
9 .To biased component
10 CLOSURE OR PLUG SPACED FROM JOINT
11 WITH ADJUNCTIVE PROTECTOR, BROKEN PARTS RETAINER, REPAIR, ASSEMBLY OR DISASSEMBLY FEATURE
12 .Holding means or protector functioning only during transportation, assembly or disassembly
13 .Position or guide means
14 ..Related to joint component
15 .Utilizing fluid pressure
16 .Back-off means, e.g., separator, etc.
17 .Handle or handwheel
18 ..Actuates retainer or blocker
19 .Tool-engaging or accommodating means or with tool
20 ..For latch or retainer
21 .Releasably captive nut or bolt
22 .Means to lock bolt or nut when other is turned
23 WITH ADJUNCTIVE SHIELD
24 STRUCTURALLY INSTALLED IN DIVERSE ART DEVICE
25 .Head or base
26 COUPLING SUPPORTED BY INDEPENDENT BEARING
27 WITH INDICATOR OR INSPECTION MEANS
28 UTILIZING THERMAL CHARACTERISTIC, E.G., EXPANSION OR CONTRACTION, ETC.
29 .Interposed material of intermediate coefficient of expansion
30 .Members having different coefficients of expansion
31 WITH FLUID PRESSURE RESPONSIVE COMPONENT
32 WITH AMBIENT CONDITION RESPONSIVE CONTROL MEANS
33 WITH INDEPENDENT HANDLE OR OPERATOR
34 WITH DISTINCT FLUID OR ARTICLE HANDLING OR DIRECTING FEATURE
35 .External reservoir
36 .Pressure fitting
37 .Including port or reservoir communicating with joint
38 ..Articulated member
39 ...At joint interface
40 NON-ADHERING FLUENT MATERIAL AT JOINT
41 WITH STRAIN-LIMITING MEANS
42 COMBINED
43 ROTARILY CONNECTED, DIFFERENTIALLY TRANSLATABLE MEMBERS, E.G., TURN-BUCKLE, ETC.
44 .Having tool-engaging means or operating handle
45 .Having operating mechanism
46 .Having locking means
47 .Differential pitch, similar hand
48 .Externally threaded actuator
49 LATERALLY RELATED MEMBERS CONNECTED BY LATCH MEANS
50 FLEXIBLE DIAPHRAGM OR BELLOWS
51 .With additional connection or packing
52 ARTICULATED MEMBERS
53 .Plural distinct articulation axes
54 ..Three or more parallel axes
55 ..Single adjustment for plural axes
56 ..Plural ball and socket
57 ..Universal
58 ...Non-coplanar axes
59 ..Angular and linear
60 ...Screw and swivel
61 ...Pivot stud slidable in elongated opening
62 ..Parallel rotary
63 ..Plural translating connections
64 .Branched
65 .Member pivoted at rigid corner
66 .Including static joint
67 ..Trunnion assembly to side of rod
68 ..One member is plate or side
69 ...Secant, i.e., rod extending through plate
70 ...Plate or side forms bearing surface
71 ...Bearing component clamped to plate or side, e.g., bolted, etc.
72 ..Articulate joint intermediate end joints
73 ...Variable angle
74 ....Universal
75 ..Angled or offset members
76 ..Articulate joint is ball and socket
77 ...With threaded joint
78 ..Articulate joint is a swivel
79 ..Articulate joint comprises pivoted clevis or channel bar
80 ..Articulate joint is a slide
81 .Including operator
82 .Arcuate shank moves in complementary guide
83 .Lockable at fixed position
84 ..At selected angle
85 ...Movable brace between members
86 ...Members rotatable about oblique axes
87 ...Clamping screw traverses sliding complementary arcuate bearing surfaces
88 ...Securing yoke or ring spaced radially from locking means
89 ....Eyebolt
90 ...Ball and socket
91 ...Including pivot stud
92 ....Including radially spaced detent or latch component
93 .....Engaging notch or recess in outer periphery of component
94 .....Side of rod engages recess in radial face
95 .....Pivoted detent
96 .....Engaging recess in radial face
97 ....Including radial interengaging tongue and slot or serrations
98 ....Radially spaced arcuate slot engages fastener
99 ....Locked by plural motions of one member
100 ....Including bridging keeper
101 ....Locked by nesting parts
102 ....Members locked in axial alignment
103 ...Plural distinct positions
104 ..Plural distinct positions
105 ...Unidirectional movement, e.g., ratchet, etc.
106 ...At least one discrete position
107 ....Step-by-step adjustment
108 .....Retainer extends through aligned recesses
109 ..Telescoping members
110 ..Clamped members
111 .Rotatable members resiliently biased to one position
112 .Including limit means
113 ..For pivotal motion
114 ...Ball and socket with restricted movement about one axis
115 ....Ball stud passes through confining opening

	ARTICULATED MEMBERS
	.Including limit means
	..For pivotal motion
116	...Pin and slot
117	...Opposed stops on one member
118	.Threaded interface
119	.Pivoted
120	..Including circumferential biasing or damping means
121	..Rocking or rolling contact
122	..Universal ball and socket
123	...Including internal tie means
124	...Plural concave surfaces with diverse curvature
125	....Interposed concavo-convex component
126	....Outer surfaces
127	...Swiveled ball parts or seat
128	...Composite ball
129	....Spring biased segments
130	....Nonmetallic part
131	....Stud extends into ball
132	...Elastomerically biased or backed components
133	...Elastomeric seat
134	...Externally packed
135	...Including liner, shim, or discrete seat
136	....Spring acts through wedging surfaces
137	....Variably preloaded
138	....Spring-biased seat opposite ball stud
139	....Porous
140	....Completely spacing the members
141	...Divided socket-type coupling
142	...Bifurcated socket
143	...Separable socket sections
144	...Spring-biased
145	..Including tension or take-up means
146	...Interposed spring means coaxial with pivot
147	...Acting through tapered surface on bearing component
148	...Manually variable
149	...External of bearing assembly, e.g., antirattler, etc.
150	..T-pivot, e.g., wrist pin, etc.
151	...Floating pin
152	...Pin is integral with or secured to inner member
153	...Expanded pin or end
154	...Including distinct pin retainer
155	....Unitary clip or plug
156	....Threaded pin end
157	...Fork and tongue
158	....With interposed antifriction means
159	....Oppositely laterally movable tines
160	..On oblique interface
161	..Transverse pin or stud
162	...Traverses interposed facing component
163	...Attached to or integral with one member
164	.Rotatable
165	..Rod in socket
166	.Axially spring-biased coaxial members
167	TRANSVERSE ROD TO SPACED PLATE SURFACES
168	.Retainer utilizes or abuts plural plates
169	BRANCHED
170	.Three or more radiating members
171	..Polyhedral
172	...Unilateral of plane
173	..Plural pairs of axially aligned members
174	..Coplanar
175	...Additional rod held by encompassing means
176	.Polyhedral
177	.Parallel rods
178	.Coplanar
179	DIVERSE MATERIAL COUPLING MEMBER
180	THREE OR MORE SERIAL JOINTS, AT LEAST ONE DIVERSE
181	.Nonaligned axes
182	.Separable intermediate joint
183	..Axially acting connector
184	..Screw or cam
185	JOINT INVOLVING PLURAL LAYERS OF SINGLE ROD
186	LATERALLY RELATED RODS INDEPENDENTLY JOINED TO TRANSVERSE SURFACE
187	ROD TO MEMBER TO SIDE, E.G., PLATE, ROD SIDE, ETC.
188	.Rod side to member to side
189	.Unilateral of side
190	.Arcuate or multiplanar side
191	..Encompassed side
192	.Intermediate member includes tubular part
193	..Side or tubular part deformed in situ
194	..Intermediate member extends through side
195	...Split or divided tubular part and coacting compressor
196	...Transverse clamp secures rod and tubular part
197	...Rod also extends through side
198	..Oblique rod
199	..Intermediate member secured to side by radial flange
200	..Internally threaded tubular part
201	.Intermediate member extends completely through side
202	RADIALLY SPACED MEMBERS JOINED BY INDEPENDENT COUPLING
203	.Flexible intermediate member
204	COACTING CONNECTION BETWEEN INNER MEMBER AND PLURAL PARTS OF OUTER MEMBER
205	RIGID ANGLE COUPLING, E.G., ELBOW OR U, ETC.
206	AXIALLY CURVED OR BENT PORTION OF ROD IS JOINT COMPONENT
207	.Interfitted crossing rods
208	.Joined to laterally related transverse surface at axially spaced points
209	.Reversely bent portion
210	..Around eye-forming thimble
211	..With wedge clamp
212	..Held by crimped collar
213	..Open U
214	.Intertwisted ends
215	.End of rod is deflected laterally within connector
216	.Plural rods distorted by single component
217	THREE OR MORE MEMBERS CONNECTED AT SINGLE LOCUS
218	.All encompassed
219	.Mutually contacting
220	FLEXIBLY CONNECTED RIGID MEMBERS
221	.Rigid sleeve encompasses flexible bushing
222	..Longitudinally divided sleeve
223	.Flexible sleeve-type coupling
224	.Connecting pin traverses radially interposed elastomer
225	.Elastomer interposed between radially spaced members
226	..Elastomer encompasses shoulder on inner member
227	..Including axially acting compressing means
228	..Composite bushing with elastomeric component
229	.Helical spring type coupling
230	ROD END TO TRANSVERSE SIDE OF MEMBER
231	.Corner joint

ROD END TO TRANSVERSE SIDE OF MEMBER
232.1 .Stirrup
233 .Structure attached to rod end encompasses side
234 ..Clamped saddle
235 ..Yoke or ring
236 ...Having radial screw at bight
237 .Including saddle
238 .Gland type
239 ..Rod and side gripped simultaneously by single actuation
240 .Rod clamped to hole edge
241 .Rod to open edge of side, e.g., wrap-around connection
242 .Rod and side deformingly interlocked
243 .Radially interposed, side-engaging shim or bushing
244 .Socket formed by shaping or deforming side
245 .Integral transverse projection on side, e.g., necked, etc.
246 ..From rod side
247 .Utilizing opposite sides of member
248 ..Rod is expanded by component inserted from distal side
249 ...Separate and deformable component
250 ...Plural contacting components
251 ...Barbed component
252 ..Inserted, blind-side-engaging, retaining portion on rod
253 ..Stepped or tapered recess in side
254 ...Terminal, rod-attached retainer engages distal side
255 ....Inserted into rod
256 ..Clamped member
257 ...Clamping component engages recessed side
258 ...Bolted to rod
259 ...Between rod shoulder and terminal nut
260 ...Bolted through member
261 ...Coaxial collar or shoulder or rod is clamp element
262 .Flange on rod bolted to side
263 .Rod received in recessed side, e.g., socket or tapered opening, etc.
264 .Utilizing internal rod structure
265 MOLDED JOINT
266 .And independent connection
267 .Including mechanical interlock
268 .Socket or open cup for bonding material
269 .Member cast in situ
270 .Fusion bond, e.g., weld, etc.
271 ..Metallic fusion material
272 ...Added bonding material, e.g., solder, braze, etc.
273 SHRUNK FIT
274 MEMBER DEFORMED IN SITU
275 .Separating element between strands of member
276 .Interposed deforming element contacts socket bottom
277 .Inner member is expanded by longitudinally inserted element
278 .By separate, deformable element
279 .Deformation occurs simultaneously with action of separate, diverse function, joint component
280 .Deforming component is inserted section
281 .Separate deforming means remains with joint assembly
282 .Deformation occurs simultaneously with assembly
283 .By piercing
284 .Diverse resistance to lateral deforming force
285 .Both members deformed
286 BRIDGED BY DIVERSE CONNECTOR
287 INCLUDING SPACED, DIVERSE CONNECTIONS
288 INCLUDING DISTINCT PACKING
289 SPLIT END WITH LATERALLY MOVABLE OPPOSED PORTIONS
290 .With separate force-applying means
291 FLEXIBLE MEMBER IS JOINT COMPONENT
292 MEMBER ENDS JOINED BY INSERTED SECTION
293 .Externally bridged
294 .Laterally inserted section
295 .Angle section
296 .Section threaded to member
297 .Expansible section
298 .Fluted or splined section
299 THREAD ADAPTOR
300 DISTINCT END COUPLER
301 .Diverse serial connections
302 ..Axially cleft coupler
303 .Single actuator for plural connections
304 ..Axially biased end portions
305 .Plural opposed sockets
306 .Separate screw or pin-type connections
307 .Continuous thread
308 .Having separable end caps or plugs
309 .Interrupted periphery, e.g., split or segmental, etc.
310 ..Axially divided segments
311 ...Interfitting
312 ...Bolted
313 ..Split
314 .Including member wedging or camming means
315 INCLUDING ANCILLARY MEANS BLOCKING DISCONNECTION OF JOINT
316 .Blocker for assembled joint retainer
317 ..Blocker keeper
318 ..Blocked key
319 .Blocker is catch or key
320 .Cam or thread lock
321 MANIPULABLE LATCH
322 .Having operating mechanism
323 .Swiveled bolt
324 .Transversely sliding pin
325 .Spring biased manipulator
326 BIASED CATCH OR LATCH
327 .By separate spring
328 ..Radially sliding catch
329 .Leaf spring
330 .Pivoted
331 SIDE SLIDE: ELONGATED CO-LINEAR MEMBERS
332 ANNULAR RECESS IS JOINT COMPONENT
333 CONVERGENT INTERFACE
334 .Tapered
335 INTERCONNECTED FLANGES OR SHOULDERS
336 .Separate flange or shoulder
337 .Axially bolted or riveted
338 .Clamped
339 SCARF
340 .Mirror images
341 INTERFITTED MEMBERS WITH EXTERNAL BRIDGING PIECE
342 THIMBLE: SCREW OR CAM
343 SCREW OR CAM
344 AXIALLY SPLIT OR SEPARABLE MEMBER
345 INTERFITTED MEMBERS
346 .Crossed rods
347 ..One rod is encompassed by the other
348 .Lugged member, rotary engagement
349 ..Bayonet joint
350 .Rotary binding cam or wedge
351 ..Radially interposed shim or bushing
352 ...Arcuate slip
353 .Assembled by plural manipulations of member
354 .Diametric end slot is joint component
355 .Including separably interposed key
356 ..Axially extending
357 ...Resilient
358 ...Longitudinally stepped or tapered
359 .Longitudinally splined or fluted rod

	INTERFITTED MEMBERS
360	.Externally shouldered or headed rod
361	.Socket
362	.Including set screw
363	.Interfitted angle or channel bars
364	.Interdigitated ends
365	.Radially interposed shim or bushing
366	..Biased by distinct radially acting means
367	..Wedging or camming
368	...Engaged by axial movement
369	....Plural, circumferentially related shims between members
370	....Threaded actuator
371	....Split or slotted bushing
372	..Resilient
373	.Clamped members
374	..By wedge or cam
375	.Peripheral enlargement, depression, or slot on one member is joint component
376	.Including discrete retainer
377	..For telescoping members
378	...Transverse pin
379	....Traversing member
380	..For interfitted side faces
381	.Enlarged head in complementary recess, e.g., dovetail, etc.
382	.Rigid angle
383	.Non-circular rod section is joint component
384	ROD SIDE TO PLATE OR SIDE
385	.Connected by double clamp
386	.Shackle is integral with or independently attached to proximate side of plate or other side
387	.Flanged or grooved rod
388	.Traversed by connector
389	.Laterally spaced rods
390	..By separable shim or bushing in connector
391	..Plural channels in connector
392	.Connected by flexible tie
393	.Lapped rod ends
394	.Diagonal connector
395	.One rod held between bight and other rod extending through aperture in leg of connector
396	.Two rods encompassed by single connector
397	.Resilient clip
398	.Yoke or ring-type connector
399	..Rod received in open channel
400	.Crossed rods
401	MITER JOINT
402	.Connector bridges inner or outer periphery
403	RIGID ANGLE
404	PARTICULAR CONFIGURATION OR MATERIAL OF MEMBER
405.1	SEPARATE CONNECTOR, FASTENER OR RETAINER
406.1	.Independently attached to one member
407.1	..Separable part independently attached to other member
408.1	.Extending through openings in plural members
409.1	.Cam or wedge
410	MISCELLANEOUS

CLASS 404 ROAD STRUCTURE, PROCESS AND APPARATUS

DECEMBER 1990

1 ROAD SYSTEM (E.G., ELEVATED, INTERCHANGE)
2 DRAIN OR GUTTER
3 .With conduit support means
4 .Street or curb inlet for surface drainage
5 ..Separately attached curb box
6 TRAFFIC GUIDE OR BARRIER
7 .Curb
8 ..With rim or edge protector
9 TRAFFIC DIRECTOR
10 .Yielding
11 ..Distinct biasing means recessed in roadway
12 .Attenuated lane marker type
13 ..Discrete interfitted element
14 ..Impregnated with reflective material
15 .Vibration inducing member
16 ..Including reflector
17 PAVEMENT
18 .Combined sheet and preformed module
19 .Anti-slip surface
20 ..Abrasive impregnated
21 ..Including metal
22 .Including light admitting means
23 ..With removable lens
24 ..Concrete frame
25 .Vault cover-closure
26 ..Elevation or level adjustment
27 .Including bed
28 ..Having preformed element layer
29 ...Blocks
30 ...Having irregular aggregate module
31 ..Plural layers
32 .Rubber or rubber-like
33 ..Integral key to base
34 .Modules or blocks (preformed)
35 ..Portable mat type
36 ...Foraminous traffic surface
37 ..Including spacer means
38 ...Integral
39 ....Bevel or incline edge
40 ..With separate interlocking member
41 ..Interfitting
42 ..Patterned
43 ..Supported by footing or beam
44 ..Composite or compound
45 ..Reinforced
46 ..Wood
47 .Including joint means
48 ..With transitory core, cap, screed or installation means
49 ..With internal cavity for deformable filler
50 ..With offset or keyed slab ends
51 ...Plus bridge or dowel means
52 ..With articulated dowel means
53 ..With underlying bridge for adjacent slab ends
54 ...And overlying bridge means
55 ...Janus-faced angle member
56 ..With mid-slab bridge means
57 ...Sliding plate pair
58 ....Horizontal slide plane
59 ...End cushioned or lubricated dowel
60 ...Sleeved or telescoped at joint
61 ...Cantilevered dowel or only filler support
62 ...Supported dowel end
63 ....And supported dowel end
64 ..Preformed non-metallic only
65 ...Externally profiled
66 ...Encased, laminated or composite
67 ..Compound or composite
68 ..Strip or filler plus supporting bracket
69 ..Sealing cap or filler support
70 .Reinforced structure
71 MISCELLANEOUS ROAD STRUCTURE
72 PROCESS
73 .Handling or treating preformed modular unit
74 .Providing expansion joint
75 .In situ treatment of earth or roadway
76 ..Dust fixation or soil stabilization
77 ..Heating
78 ..Raising sunken pavement
79 .Heating
80 ..Including separate handling of different sized aggregate
81 .Separate handling of different sized aggregate
82 .Sequential construction of diverse layers
83 APPARATUS
84 .Automatic control
85 .With means for alternative ground support by tool or transport means
86 ..Tool attachment type
87 .Means to install or form joint
88 ..And means to hold or position dowel
89 ..Means to form groove in plastic or uncured roadway
90 .With means, for comminuting of earth or road surface in situ
91 ..Including removal and redepositing means
92 .With means for in situ material preparation, e.g., mixing
93 .With surface marking
94 ..Applied to existing hard surface
95 .With means for heating earth or road surface
96 .With means for profile shaping, e.g., crown
97 ..Manually propelled
98 ..Curb or gutter
99 .Block laying
100 .Reinforcement material placing, laying or positioning
101 .Material distribution means
102 ..Including dynamic means to compact material
103 ...Roller
104 ..Shoulder paving or surface widening
105 ..With material supply to self-contained side forms, e.g., slip-forms
106 ..With material supply to unit-supporting rail type side forms
107 ..Joint or crack filling
108 ..Including material supply
109 ...Boom and bucket type
110 ...Portable spreader box
111 ...Liquid supply
112 .Tool rotating in horizontal plane
113 .Means to agitate material
114 ..Mounted on screed
115 ..Material immersed agitating means
116 ...Individual element, vertically oriented
117 ..Roller with vibrating or impact means
118 .Screed or drag
119 ..Supported on rail type side forms
120 ..Reciprocating
121 .Sheep foot roller
122 .Rotating drum, roller or tire
123 ..Three tandem rollers
124 ..Roller periphery characteristics
125 ..Plural roll axes angularly shiftable
126 ..Plural roll axes relatively shiftable
127 ..Specific to slope, trench or shoulder application
128 ..Attachment or combined
129 ..With means to lubricate, scrape or clean roller surface
130 ..Shiftable or variable ballast

APPARATUS
.Rotating drum, roller or tire
131 ..Manually propelled, e.g., lawn roller
132 ..Plural rolls with common axes
133 .Tamping means
134 REINFORCEMENT STRUCTURE PER SE
135 .With road chair
136 ROAD CHAIR PER SE

CLASS 405 HYDRAULIC AND EARTH ENGINEERING

DECEMBER 1990

1 MARINE VESSEL PORTAGE, LAUNCHING, OR REMOVING
2 .Rail mounted carrier
3 .Lifting
4 .Dry dock
5 ..Fabrication
6 ..Gate
7 ..Vessel support (e.g., bilge or keel block)
8 PRESSURIZED CAISSON
9 .Having lifting cable
10 .Movable relative to mobile support
11 MEANS TO EXPOSE A NORMALLY WETTED SURFACE,E.G., COFFERDAM, ETC.
12 .Contoured to wetted surface, e.g., side hung ship caisson
13 .Having transport, placement, or dislodgement means
14 .Connectable sections
15 BANK, SHORE, OR BED PROTECTION
16 .Revetment
17 ..Revetment laying
18 ..Continuous concrete or concrete filled bag
19 ..Mattress
20 ...Hinged concrete sections
21 .Wave or flow dissipation
22 ..Fluid application
23 ..Floatable dissipator submerged at site
24 ..Artificial seaweed
25 ..Bed supported subsurface dissipator
26 ..Floating
27 ...Openwork
28 ..Flexibly suspended from or pivoted to support
29 ..Polypod
30 ..Openwork or concave face
31 ...Associated with solid wall
32 ...With fabric
33 ...Interfitted or interleaved members
34 ...Jetty
35 ...Spaced members
36 DRAINAGE OR IRRIGATION
37 .Control means responsive to sensed condition
38 .Including subsurface moisture barrier
39 .Having regulation of flow through channel
40 ..At outlet or intake
41 ...Riser or standpipe outlet or intake
42 .End cap
43 .Porous or apertured pipe, flume, or tileway
44 ..Uniform discharge
45 ..Porous
46 ..Earthen bottom
47 ..Flow through joint
48 ..Open seam or shielded outlet
49 ..Corrugated
50 .Porous waterway, e.g., sand drain, etc.
51 .Branched flow
52 FLUID CONTROL OR TREATMENT
53 .Fluid storage in earthen cavity
54 ..With indicator or alarm means
55 ..Cavity construction
56 ...Including cooling or heating of material surrounding cavity
57 ...Earth treatment
58 ....Dissolving earth
59 ..Supply or recovery of stored fluid by separate fluid
60 .Floatable matter control
60.5 ..Logging device for guiding logs
61 ..Ice
62 ..Barrier formed by fluid
63 ..Floating barrier
64 ...Submergible
65 ...With means to seal space between barrier and fixed structure
66 ...With barrier storage or deployment feature
67 ....Quick release float
68 ....Inflatable or deflatable
69 .....Self-inflating
70 ...Having joint detail
71 ....Having hinged joint between rigid sections
72 ...With reinforcing feature
73 .Erosive scouring
74 .Settling of suspended matter or removal of settled matter
75 .Extracting power from moving fluid
76 ..Wave or tide
77 ...With flow restrictor or ramp
78 ..Associated with dam
79 .Wave generation or enhancement
80 .Flow control
81 ..Fishway
82 ...Elevator
83 ...Closed channel
84 ..Navigable canal
85 ...Having lock
86 ....Movable lifting member
87 ..Water gate or adjustable weir
88 ...Center flow
89 ...Uniform discharge
90 ...Removable
91 ....Flexible
92 ...Condition responsive
93 ....To weight of liquid separated from a main body
94 ....To pressure on pivoted water gate
95 .....With latch for closed position
96 ....Float
97 .....Having separate float chamber
98 ...Roller or flexible
99 ...Swinging
100 ....About horizontal axis
101 .....Overflow
102 ......Collapsible
103 ...Sliding
104 ....Vertical
105 .....Gate unseating
106 .....With lift mechanism or latch
107 ..Artificial water barrier (e.g., dam, levee, etc.)
108 ...Having spillway
109 ...Having impervious core
110 ...Hollow or buttressed
111 ....With ballast compartment or cavity
112 ....Vertical wall buttress
113 ...Tension stayed
114 ...Connectable sections
115 ...Flexible
116 ...In situ construction
117 ....Earthen
118 ..Open channel
119 ...Flume
120 ....Elbow or tee
121 ....Joint
122 .....Including U-clamp
123 ......With crossbar
124 ..Culvert
125 ...Terminal or head
126 ...Serially connected segments
127 ..Intake
128 WASTE DISPOSAL IN SOIL
129 .Landfill
130 TEMPERATURE MODIFICATION OR CONTROL OF EARTHEN FORMATION
131 .Heating
132 UNDERGROUND PASSAGEWAY, E.G., TUNNEL
133 .Vertical
134 .Sectional
135 ..Seal or joint

	UNDERGROUND PASSAGEWAY, E.G., TUNNEL
136	.Subaqueous
137	..Below bed
138	.Boring
139	..With auxiliary tunnel
140	..By axially overlapped members
141	..Shield
142	...With transverse force application feature
143	...Direction control
144	...Door or bulkhead
145	...Discrete independently advanceable earth supporting segments
146	...Lining installation
147	...Seal
148	..Work platform
149	.Cut and cover
150	.Lining
151	..Panel
152	...With sealing feature
153	...With separate fastening means between adjacent panels
154	PIPE OR CABLE LAYING, RETRIEVING, OR UNDERWATER MANIPULATION
155	.Cast in situ
156	.With forming or cutting of pipe or cable
157	.With protection or indication of pipe or trench
158	.Submerging, raising, or manipulating line of pipe or cable in or from marine environment
159	..Entrenched or buried
160	...Condition responsive
161	...Entrenching or burying apparatus guided by pre-positioned pipe or cable
162	....With apparatus buoyancy control
163	....With bottom fluidizing means
164	...By towing submerged sled with attached plow and pipe or cable guide
165	....With means to forcibly feed or to control tension in pipe or cable
166	..Facilitated by extension from line-laying vessel
167	...Articulated segments
168	..With causing or controlling the deformation of a line
169	..With assembling of ling structure
170	...By joining successive sections of line
171	..By control of buoyancy
172	..With anchoring of line
173	..With raising of line from marine floor
174	.By means advancing along terrain and guiding pipe or cable into subterranean position
175	..Condition responsive
176	..Tape or strip
177	..With positive feed or means to vary tension in pipe or cable
178	..Simultaneous laying of plural parallel pipes or cables
179	..With backfill or bedding material conveying or dispensing means
180	..Including trench forming plow with pipe or cable guide
181	...With depth adjustment
182	...With plow vibrating or oscillating means
183	...Guide integral with or rigidly fixed to plow
184	.Advancing subterranean length of pipe or cable
185	DIVING
186	.Suit or accessory therefor
187	..Rigid element
188	.Underwater docking or mooring
189	..With communication between inhabitable enclosures
190	.Remote control
191	..From surface
192	.With air lock
193	.With pressure equalization
194	.With continuous surface access
195	MARINE STRUCTURE OR FABRICATION THEREOF
196	.With work deck vertically adjustable relative to floor
197	..Sectional leg
198	..Longitudinally extending projections or recesses
199	..Frictional gripper
200	..By buoyancy control
201	.With horizontally movable work deck
202	.With pivotal connection between work deck and base
203	.Floatable to site and supported by marine floor
204	..With assembly of sectional supporting structure at site
205	..With ballasting means to sink or position structure at site
206	...Detachable from structure
207	...Compartment in base
208	....And leg depending from base
209	..Separable transport means
210	.Storage container
211	.Structure protection
212	..Fender
213	...Roller type
214	...Having coil spring
215	...Resilient block
216	..Sleeve or coating
217	.In or on frozen media
218	.Dock
219	..Floating
220	..Hinged
221	..Vertically adjustable
222	.Cast in situ
223	..Installing means
224	.With anchoring of structure to marine floor
225	..By grouting preformed structure
226	..Including floor modifying means
227	..By pile extending through sleeve in structure
228	..Pile driving
229	FOUNDATION
230	.Underpinning
231	.Columnar structure (e.g., pier, pile)
232	..Process or apparatus for installing
233	...Casting in situ hardenable fluent material
234	....With heating, cooling, or explosion
235	....With subsequent moving
236	....Subsurface dispensing of material for flow toward surface
237	....Forming subsurface enlargement
238	.....Preformed enlargement cavity
239	....Providing embedded metallic reinforcement
240	....Dispensing fluent material while withdrawing dispenser
241	.....Dispensing auger
242	.....Driven dispenser with separable tip
243	....Withdrawing form structure
244	...With anchoring of structure
245	...Driving removable wall supporting core
246	....Diametrically retractable core
247	.....Fluid pressure actuated
248	...With subsurfacr fluid discharge
249	...Caisson or hollow shaft

	FOUNDATION
	.Columnar structure (e.g., pier, pile)
250	..Comprising series of connected longitudinal sections having diverse compositions
251	..With joint or connection between sections of similar material
252	...Between concrete sections
253	..With driving or cutting tip
254	...Longitudinally ribbed
255	..With end cap
256	..Concrete
257	...With form or casing
258	EARTH TREATMENT OR CONTROL
259	.Rock or earth bolt or anchor
260	..With grouting feature
261	...Breaking canister or packet
262	..With retaining wall
263	.Chemical
264	..Organic
265	...Bituminous
266	..Cementitious (e.g., grouting)
267	...Filling substerranean cavity (e.g., underground wall)
268	...Lining
269	...Injector
270	.Impermeabilization
271	.Compaction
272	.Shoring, bracing, or cave-in prevention
273	..Cribbing
274	..Sheet piles
275	...Concrete
276	...Metal
277	....C or I sections
278	....Head and claw interlock
279	....With separate fastening, reinforcing or sealing means
280	....Cellular
281	....Bulb and socket interlock
282	..Trench shoring
283	...Shield type
284	..Retaining wall
285	...Pile and panel
286	...Concrete
287	....Cast in situ
288	..Roof support
289	...Inflatable
290	...Jack
291	....Mobile
292	.....Position restoring
293	.....With canopy extension
294	......Telescoping
295	.....Cantilevered
296	.....With rubble shield
297	.....With contour following feature
298	.....Under load advanceable
299	.....Self-advanceable
300	......Paired
301	.......Nested
302	.....Control system

CLASS 406 CONVEYORS, FLUID CURRENT

DECEMBER 1990

1 SELECTIVE DELIVERY
2 .Destination controlled by operator at remote site
3 .Destination controlled by sensed condition
4 ..Controlled by coded load
5 ...Magnetic material on load
6 ...Electrical contact on load
7 ...Adjustable or changeable code on load
8 ...Presence or size of recess or protrusion on front of load
9 ....Protrusion
10 WITH MEANS TO CONTROL CONVEYING FLUID OR MOVEMENT OF LOAD IN RESPONSE TO SENSED CONDITION
11 .Responsive to obstacle in system
12 .Control of conveying fluid
13 ..Reversing of fluid current in single tube system
14 ..Responsive to velocity or pressure change in conveying fluid
15 ...To initiate or terminate fluid current
16 ....In response to introduction or discharge of load
17 .....Discharge and introduction
18 .....With timer to terminate fluid current
19 ..Responsive to presence or absence or quantity of load
20 ...With stepped reset for each load article introduced at intake
21 ...With load detector at outlet to terminate fluid current
22 ...With timer to terminate current
23 ...Level or weight of load in receptacle
24 ....At intake
25 .....And control of load input to receptacle
26 ..Responsive to movement of gate to initiate or terminate fluid current
27 ...To closure of intake gate to initiate fluid current
28 .Control of load input or output
29 ..Input
30 ...Responsive to pressure or velocity change of conveying fluid
31 ...Responsive to presence, absence, or quantity of load
32 ....Level or weight of load in receptacle
33 .....In receptacle at discharge
34 WITH SIGNAL, INDICATOR, OR INSPECTION MEANS
35 .Audible
36 .With load motion observing means
37 .Coded carrier
38 AMBULANT OR PORTABLE
39 .Vehicle mounted
40 ..Plural vehicles
41 ..Towed vehicle
42 ..Power takeoff
43 ..With storage means on vehicle for fluid conveyor components
44 ..With auxiliary supporting means
45 WITH MEANS TO PREVENT PIPELINE SLUMPING
46 WITH ADJUNCTIVE SUBSTANCE ADDED
47 .Liquid
48 ..Water
49 .Solid
50 SLUG CONVEYING
51 WITH DIVERSE POWER-DRIVEN CONVEYOR
52 .Rotary
53 ..Screw
54 ...With material recirculating screw
55 ...Including means to fluidize material
56 ...Feeding to fluid conveyor inlet
57 ....Feeds to inlet of blower or pump
58 .....Screw axis coaxial with axis of rotary blower or pump
59 .....Plural screws
60 ....With check valve between screw and fluid current conveyor
61 ....Fluid jet at conveyor inlet
62 ..Successively registering pockets
63 ...Input to fluid conveyor
64 ....With venting of pockets
65 ....Having radial blades
66 .....Rotatable about vertical axis
67 .....Fluid flow discharges pockets
68 ....Peripheral pockets formed on rotating member
69 ..Brush
70 ..Roller
71 ..Thrower
72 .Magazine
73 .Reciprocating or oscillating
74 ..With pocket
75 ..Vibrating
76 ..Pusher
77 .Endless
78 ..Permeable belt
79 ..At inlet to fluid conveyor
80 ...Feeds to intake of blower or pump
81 ...Pushers, buckets, or tines
82 ..At outlet to fluid conveyor
83 WITH LOAD BRAKING OR RETARDING MEANS
84 .Utilizing a fluid
85 PULSING FLUID CURRENT
86 HAVING MEANS FOR MAINTAINING LOAD IN SUSPENSION ALONG FLOW PATH
87 .With load orienting means
88 .By load supporting jets
89 .Including permeable member
90 ..In receptacle
91 ...Permeable member surrounding discharge opening or conduit
92 .By fluid whirling action
93 HAVING MEANS TO INTRODUCE BOOSTER FLUID INTO CONVEYOR
94 .Plural booster inputs
95 ..With parallel fluid supply conduit
96 BLOWER OR PUMP HAVING LOAD INTAKE OPENING IN HOUSING
97 .Including load or blower protecting means
98 .Having separate opening in housing for conveying fluid input
99 .Rotary
100 ..Having radially extending blades
101 ...Mounted on axial face of a disc
102 ...With load receptacle feeding to intake of blower or pump
103 ....Blower or pump housing movably mounted relative to receptacle
104 ....Plural blowers or pumps
105 HAVING LOAD BY-PASS AROUND BLOWER OR PUMP
106 ENDLESS FLUID CURRENT PATH
107 MATERIAL-BACKFLOW DISCHARGE
108 INTAKE TO FLUID CURRENT CONVEYOR
109 .Combined intake and discharge
110 ..With terminal
111 ...Captive carrier
112 ...Single inlet-outlet
113 .Movable inlet
114 ..Follows load level
115 ..Reciprocating or swinging
116 ...Having telescoping intake
117 .Conveyor having plural intakes
118 ..From receptacle
119 ...Having plural compartments
120 ...Plural receptacles
121 .With sifter
122 .Load receptacle type
123 ..Having inlets to separate conveyors

	INTAKE TO FLUID CURRENT CONVEYOR
	.Load receptacle type
124	..Plural receptacles in series
125	...With gate valve between receptacles
126	...With conical plug valve between receptacles
127	..With valve between receptacle and fluid conveyor
128	...Reciprocating, rotating, or swinging
129	....Rotatable hollow cylinder type
130	....Gate type
131	.....Pivotable
132	....Vertically movable
133	.....Sleeve or conduit
134	..With means to agitate load in receptacle
135	...Rotary
136	...Fluid
137	....Jet
138	....Passed through permeable member
139	..Blower or pump carried by receptacle
140	...Plural blowers or pumps
141	..Inlet conduit extending downwardly inside receptacle
142	...With conduit supplying lifting fluid to interior of receptacle
143	....Fluid supplying conduit extends to inlet conduit
144	..Conveying fluid velocity altered at load input
145	..Having connection for external suction or pressure source
146	..Conveying fluid introduced under pressure to interior of receptacle
147	.Terminal type
148	..Intake gate
149	...With gate lock
150	...Serially arranged gates
151	.Upstream of suction source
152	..Including specific intake nozzle structure
153	..Suction induced by pressure stream
154	FLUID CURRENT CONVEYOR OUTLET MEANS
155	.Conveyor having plural outlets
156	..Feeding plural receptacles
157	.Deflector
158	..Telescoping
159	..Pivoted
160	...Adjustable
161	....From remote location
162	..Rotatable
163	..Carried by receptacle
164	.Movable outlet
165	..Horizontally swinging
166	...And vertically swinging
167	..Telescoping
168	.With material separating receptacle
169	..Having air lock
170	..Having plural inputs
171	..Having filter
172	...And means to clean filter
173	..Cyclone separator
174	..Conveyor outlet conduit extending upwardly inside receptacle
175	..And upstream pressure source
176	.Having terminal
177	..With gate and means to open gate prior to article or carrier arrival
178	...Serially arranged gates
179	..Upward delivery
180	..Discharge gate
181	LOAD FLOW DIVERTER, DIVIDER, OR COMBINER
182	.Movable conduit section
183	.Movable valve in conduit
184	CARRIER
185	.Wheeled
186	.Having side opening
187	.Having end opening
188	..With closure for end opening
189	...Removable
190	.With conduit engaging seal or bumper structure
191	CONDUIT
192	.With fluid valve or load spacer
193	.With wear protection means
194	.Having fluid nozzle
195	.Having changing cross section
196	.Flexible
197	PROCESSES
198	MISCELLANEOUS

CLASS 407 CUTTERS, FOR SHAPING

DECEMBER 1990

1 INCLUDING NONCUTTING WORK MODIFYING MEANS
2 INCLUDING CHIP BREAKER, GUIDE OR DEFLECTOR DETACHABLE FROM TOOL AND TOOL HOLDER
3 .Adjustable relative to cutting edge
4 ..Including adjusting means
5 .Attached to or integral with tool clamping jaw
6 .Chip breaker
7 FREELY MOVABLE CUTTING EDGE
8 YIELDABLE TOOL
9 .Resiliently mounted tool
10 ..Including yield stress or flexure limit adjusting means
11 WITH MEANS TO APPLY FLUID TO CUTTING TOOL
12 ROTARY BROACH
13 RECTILINEAR BROACH
14 .Hollow tool for surrounding workpiece
15 .Including holder having seat for inserted tool
16 ..Annular tool
17 ..Including single tooth
18 .Plural tooth groups
19 .Including sequentially acting teeth of stepped cutting width
20 GEAR CUTTING TOOL
21 .Face mill gear cutting tool
22 ..Adjustable teeth
23 .Hob
24 ..Thread cutting
25 ..Including holder having seat for inserted tool
26 ..For cutting involute gear tooth
27 .Rotary, gear shaving cutting tool
28 .Gear generating, revolving shaper cutting tool
29 .Rotary, tooth form cutting tool
30 ROTARY CUTTING TOOL
31 .Gang
32 .Composite body of diverse material
33 .Including holder (i.e., head) having seat for inserted tool
34 ..Face or end mill
35 ...Plural simultaneously usable separable tools in common seat or common clamp actuator for plural simultaneously usable tools
36 ...Tool adjustable relative to holder
37 ....Radially
38 .....And axially
39 ......Selectively
40 ...With separate means to fasten tool to holder
41 ....Wedge clamp element
42 ...Specified tool shape
43 ..Plural simultaneously usable separable tools in common seat or common clamp actuator for plural simultaneously usable tools
44 ..Tool adjustable relative to holder
45 ...Radially
46 ..With means to fasten tool seat to holder
47 ..With separate means to fasten tool to holder
48 ...Apertured tool
49 ...Wedge clamp element
50 ....Resilient clamp jaw
51 ..Peripherally spaced tools
52 ...Sectional support
53 .Face or end mill
54 ..With cutting edge entirely across end of tool (e.g., router bit, end mill, etc.)
55 .Compound tooth arrangement
56 .Having peripherally spaced teeth
57 ..Axially tapering tool
58 ..Circumferentially staggered
59 ...Plural teeth spaced about a helix
60 ..Varying in cutting edge profile
61 ..Specified tooth shape or spacing
62 ...Arcuate cutting edge
63 ....Helical tooth
64 PROFILED CIRCULAR TOOL
65 ARC SEGMENT TOOL
66 INCLUDING HOLDER HAVING SEAT FOR INSERTED TOOL
67 .Plural spaced seats and common holder
68 ..Relatively adjustable seats
69 ..Simultaneously usable
70 .Plural simultaneously usable separable tools in common seat or common clamp actuator for plural simultaneously usable tools
71 ..Adjustable tool
72 .With tool ejector
73 .With separate means to adjust tool to and fro relative to holder
74 ..With indicator
75 ..Plural provisions for adjustment
76 ..By moving tool seat
77 .Tool adjustable relative to holder
78 ..With indicator
79 ..Plural provisions for adjustment
80 ...Plural interfering seats
81 ...Including pivotable seat or tool
82 ....With detent
83 ....Pivoted seat
84 .....And pivotable tool
85 ..By adjustable or replaceable stop
86 ...Adjustable
87 ....Screw
88 ..By movement of seat relative to holder
89 ...Pivoted seat
90 ..Pivoted tool
91 ..Resiliently biased tool clamping jaw
92 ..Rectilinearly
93 ...Including rotatable cam clamp element
94 ...Including wedge clamp element
95 ....And guide or detent
96 ...Including detent
97 ...Tool gripped directly by set screw
98 ...Slidable jaw
99 .Holder adapted for tools of different shape
100 .With chip breaker, guide or deflector
101 .With separate means to fasten tool seat to holder
102 .With separate means to fasten tool to holder
103 ..Apertured tool
104 ...With means projecting through aperture to force tool laterally against reaction surface
105 ....Tilting clamp element and separate means to tilt same
106 ..Rotatable cam clamp element
107 ..Including tool holding clamp and clamp actuator
108 ...Wedge clamp element
109 ...Resiliently biased clamp jaw
110 ....Integral with holder
111 ...Pivoted jaw
112 ...Slidable jaw
113 INCLUDING TOOL HAVING PLURAL ALTERNATIVELY USABLE CUTTING EDGES
114 .With integral chip breaker, guide or deflector
115 WITH CHIP BREAKER, GUIDE OR DEFLECTOR
116 .Comprising concave surface in cutting face of tool
117 INCLUDING CUT OFF TOOL
118 COMPRISING CUTTING EDGE BONDED TO TOOL SHANK

119 COMPRISING TOOL OF SPECIFIC CHEMICAL COMPOSITION
120 MISCELLANEOUS

CLASS 408 CUTTING BY USE OF ROTATING AXIALLY MOVING TOOL

DECEMBER 1990

1 R PROCESSES
1 BD ..Bit detachable
2 WITH MEANS TO WEIGH OR TEST WORK OR PRODUCT
3 WITH MEANS TO REGULATE OPERATION BY USE OF TEMPLET, TAPE, CARD, OR OTHER REPLACEABLE INFORMATION SUPPLY
4 WITH INTERLOCK BETWEEN MACHINE ELEMENTS
5 WITH RANDOMLY-ACTUATED STOPPING MEANS
6 .Responsive to condition of tool or tool-drive
7 .Responsive to condition of work or product
8 WITH CONTROL MEANS ENERGIZED IN RESPONSE TO ACTIVATOR STIMULATED BY CONDITION SENSOR
9 .To control tool rotation
10 .To control infeed
11 ..Responsive to tool
12 ..Responsive to work
13 .To control relative positioning of tool and work
14 WITH STOPPING UPON COMPLETION OF PRESCRIBED OPERATION
15 .Responsive to condition of work or product
16 WITH SIGNAL, INDICATOR, ILLUMINATOR OR OPTICAL MEANS
17 INCLUDING MEANS TO CAUSE TOOL TO PROGRESSIVELY VIBRATE TOWARD WORK
18 WITH MEANS TO CONDITION TOOL
19 WITH MEANS TO DEFORM WORK TEMPORARILY
20 CONVERTIBLE CUTTING MEANS
21 .Utilizing common cutting tool
22 COMBINED CUTTING MEANS
23 .Including tool operating on rotating work
24 .Plural other type cutting means
25 ..Including plural rotating tools
26 .Including rotating cutter other than rotating, axially moving tool
27 ..Crystalline cutter
28 ..Utilized in cutting work or product to length
29 ...Adapted to cut entire thickness of work at one pass
30 .Including plunging (single stroke) cutter
31 MACHINE INCLUDING PLURAL TOOLS
32 .Axes of tools moving with work during operation
33 ..Including means to infeed tool and means to infeed work or including coaxial tools
34 ..Plural work stations
35 .Turret of tools
36 .Coaxial tools
37 ..Coaxial, opposed tools
38 ...With additional, converging tool
39 ...Plural pairs of coaxial, opposed tools
40 ...With means to sequentially feed tools toward work
41 ...With interconnected means to simultaneously feed tools
42 .Plural, simultaneously operational tools
43 ..With plural simultaneously operational work stations
44 ...Successively acting on workpiece
45 ....Pivotally mounted, work-advancing, work-supporting means, pivot-axis parallel to tool-axis
46 ..With provision for adjustment of relationship of axes
47 ..At least one tool driven by orbiting wrist plate
48 ..At least one tool including flexible drive connection
49 ..With work-infeed
50 ..With means to advance work relative to tool
51 ..With presser-foot
52 ..With tool-opposing, work-engaging surface
53 .Rotatable about parallel axes
54 WITH RADIALLY OUTER LIMIT OF CUTTING EDGE MOVING TO DEFINE CYLINDER PARTIALLY, BUT NOT ENTIRELY ENCIRCLED BY WORK
55 AXIS OF TOOL MOVING WITH WORK DURING OPERATION
56 WITH MEANS TO APPLY TRANSIENT, FLUENT MEDIUM TO WORK OR PRODUCT
57 .Including tool with duct
58 ..And means to move gaseous fluid by application of vacuum
59 ..Conducting channel extending to end of tool
60 ..Including nozzle
61 .Including nozzle
62 WITH WORK-INFEED MEANS
63 .Driven by fluid motor
64 .Driven by means having sliding engagement therewith
65 .Driven by lever or connecting link
66 .And gear to drive infeed means
67 WITH PRODUCT HANDLING OR RECEIVING MEANS
68 .Ejector
69 WITH WORK ADVANCING OR GUIDING MEANS
70 .Means to intermittently advance work
71 ..Rotary, work-supporting means
72 R WITH WORK-ENGAGING STRUCTURE OTHER THAN TOOL OR TOOL-SUPPORT
72 B ..Bushing
73 .With means actuated by work to release tool from fixed position in tool-support
74 ..Adapted to engage work at tool-axis
75 .Centering means adapted to be replaced by tool
76 .Magnetic or suction means
77 .Tool supporting wheel
78 ..Wheel-axis parallel to tool-axis
79 .Frictionally engaging sides of opening in work
80 ..Opening coaxial with tool
81 ...Engaging sides of opening being enlarged by tool
82 ....Engaging surface axially advanced of tool-action
83 ....Engaging surface subsequent to tool-action on that surface
83.5 ...Valve fitting
84 .Funnel like work-engaging surface cooperating with protuberance on work
85 .Adapted to "form" recession in work
86 ..Recession at tool-axis
87 .Having tool-opposing, work-engaging surface
88 ..Tool having shiftable tool-axis
89 ..Angularly adjustable surface
90 ...Adjustable about axis that is parallel to tool-axis
91 ..Laterally adjustable surface
92 ..Flexible or concatenated member
93 ..Connected to tool through opening being enlarged by tool
94 ...Plural, coaxially opposing, work-engaging means
95 ..With presser foot
96 ...Encompassed by tool during cut
97 ...Including tool-guide (or bushing)
98 ...Base supported machine

	WITH WORK-ENGAGING STRUCTURE OTHER THAN TOOL OR TOOL-SUPPORT
	.Having tool-opposing, work-engaging surface
99	..With means to move tool relative to other work-engaging structure along tool-axis
100	...Having sliding engagement therewith
101	....Screw coaxial with tool
102	..Tool having screw-thread engaging frame to cause infeed
103	.Work-gripping clamp
104	..Adapted to coaxially grip round work
105	...Oppositely moving lateral clamps
106	....Three or more moving clamps
107	...Base supported clamp
108	..Oppositely moving lateral clamps
109	..Adjustable relative to tool-axis
110	.Movable relative to tool along tool-axis
111	..Including means to move tool
112	..With means to bias tool away from work
113	.Axially fixed to tool
114	..Work-engaging surface parallel to tool-axis
115 R	.Adjustable, tool-guiding jig
115 B	...Guide bushing
116	TOOL-SUPPORT WITH MEANS TO RECEIVE TOOL-POSITION INDICATOR
117	PLURAL TOOL-ASSEMBLAGES
118	.Coaxial
119	..Spring biased
120	TOOL OR TOOL-SUPPORT WITH TORQUE-APPLYING RATCHET
121	.With thrust applying means
122	..Reversible ratchet
122.5	..Double-acting ratchet
123	.Reversible ratchet
124	MEANS TO DRIVE TOOL
125	.With specific tool structure
126	.Friction gearing
127	.Universal or flexible drive connection to rotate tool
128	.Belt and pulley
129	.Including means to move tool along tool-axis
130	..Fluid means
131	..Laterally adjustable tool
132	..With clutch means
133	...Including plural speed drive
134	...Actuated by tool movement
135	..Rack and pinion
136	..Manually moved lever
137	..Screw coaxial with tool
138	TOOL OR TOOL-SUPPORT WITH THRUST-APPLYING MACHINE-ENGAGING SCREW
139	TOOL OR TOOL-SUPPORT WITH TORQUE-APPLYING CLUTCH
140	.Friction clutch
141	TOOL OR TOOL-SUPPORT WITH TORQUE-APPLYING SPLINE
142	.Relative motion of splined shaft and tool-support causing release of tool from operating position
143	TOOL-CARRIER WITH VIBRATION-DAMPING MEANS
144	TOOL OF SPECIFIC DIVERSE MATERIAL
145	TOOL HAVING CRYSTALLINE CUTTING EDGE
146	TOOL-SUPPORT WITH MEANS TO MOVE TOOL RELATIVE TO TOOL-SUPPORT
147	.To move radially
148	..With tool releasing trigger
149	...And separate tool setting means
150	..To move eccentrically mounted tool
151	...Tool-support including plural, adjustable sections
152	..Moving means including pinion engaging rack-like surface of tool
153	..Moving means including wedge, screw or cam
154	...With resiliently urged tool
155	....With spring retainer
156	....Resilient tool or tool-support
157	...Including oppositely moving, diverging tools
158	...Axially slidable moving-means
159	....Tool pivotally mounted on support
160	....Having axially spaced shoulders
161	....Screw driven wedge or cam
162	.....Screw with axis radially spaced from tool-axis
163	.....Annular wedge-collar
164	......Axially spaced tool-retaining collars
165	.......With travelling wedge
166	.......Tool having axially facing, collar-receiving groove
167	.......Including two-piece collar
168	.....Traveling wedge
169	......Interfitting, tool-retaining wedge
170	.......Including separable interfitting element
171	......Having externally threaded shank connected to tool-support
172	....Annular wedge-collar
173	...Rotary cam
174	....Scroll plate
175	.....Volute scroll
176	.....With means to rotate scroll
177	.....With adjustable means to limit scroll movement
178	....Coaxial with tool-axis
179	...Wedge moving perpendicular to tool-axis
180	...Pivotable tool-support
181	...Screw extending perpendicular to tool-axis
182	....Plural tools moved by diametrically opposed screws
183	.....Screws mounted on common shaft
184	....Tool having pitch-stabilizing ridge
185	....With tool-holding clamp and clamp actuator
186	TOOL-SUPPORT WITH MEANS TO PERMIT POSITIONING OF THE TOOL RELATIVE TO SUPPORT
187	.Pivotable tool
188	..With multiple cutting positions
189	.Tool having stepped cutting edges
190	..Including means to permit both radial and axial positioning of edge
191	..Including means to permit relative axial positioning of edges
192	...With work-engaging structure other than cutting edge
193	...Including central tool axially movable relative to support
194	..Including inverse cutting edge
195	.Including means to "form" depression in work
196	.Including central-lead
197	.Including tool-holding clamp and clamp actuator
198	..Movable along tool-axis
199	TOOL OR TOOL WITH SUPPORT
200	.With work-engaging structure detachable from cutting edge
201	..Removable central lead
202	..Depth-limiting member
203	..Adjustable
203.5	.Hollow milling tool
204	.Having axial, core-receiving central portion
205	..With lateral outlet
206	..And having stepped cutting edges
207	.Having product-receiving chamber

TOOL OR TOOL WITH SUPPORT
.Having product-receiving chamber
208 ..And central lead-screw
209 ..And central lead
210 .Helical ribbon tool
211 .Having inversely angled cutting edge
212 ..And axially extending peripheral cutting spur
213 .Having axially extending peripheral cutting spur
214 .Having central lead-screw
215 .With pitch-stabilizing ridge
216 ..And radially spaced cutting edge
217 ..Including cutting teeth of different width
218 ...And different root circles
219 ..Including tapered section
220 ...And relieved cutting edge
221 ...Including work-embracing cutting edges
222 ..Extending outwardly from tool-axis
223 .Having stepped cutting edges
224 ..Axially spaced
225 ...With central lead
226 .Including detailed shank
227 .Having peripherally spaced cutting edges
228 ..Each formed by a pair of axially facing facets
229 ..With axially extending relief channel
230 ...Spiral channel
231 ..With means to retain tool to support
232 ...Wedge means
233 ...Screw driven means
234 MACHINE FRAME
235 .With counterweight mechanism
236 .Including pivotally mounted tool-carrier
237 ..Including laterally movable tool-carrier
238 TOOL-SUPPORT
239 R .With tool-retaining means
239 A ...Tool adapter
240 ..Clamping jaws
241 R MISCELLANEOUS
241 B ..Drill bushings
241 G ..Drill guide
241 S ..Adjustable stop

DIG 1 Bowling ball drill

CLASS 409 GEAR CUTTING, MILLING, OR PLANING

1 GEAR CUTTING
2 .With regulation of operation by use of templet, card, or other replaceable information supply
3 ..Including follower for templet
4 .And burnishing simultaneously
5 .With compensation for backlash in drive means
6 .With work or product advancing
7 ..Utilizing transfer arm
8 .Gear chamfering or deburring
9 ..Using relatively reciprocating or oscillating cutter
10 .Gear tooth shape generating
11 ..Hobbing
12 ...Process
13 ....Generating tooth for bevel gear
14 ...Including means to shift hob between cutting passes
15 ...With control means energized in response to activator stimulated by condition sensor
16 ...Plural hobs
17 ...Including infeed means
18 ....To infeed along axis of work rotation
19 .....Infeed of cutter
20 ......And infeed radially of axis of work rotation
21 ......Vertically
22 ....To infeed radially of axis of work rotation
23 .....Infeed of cutter
24 ......And infeed tangentially of work axis
25 ..Milling with radial faced tool
26 ...Process
27 ...Adapted to cut bevel gear
28 ....With means to continuously rotate work and means to co-form all teeth of gear
29 ....Bevel gear having nonparallel opposing tooth flanks
30 ....Including rotary cutter cradle
31 ..By relative axial movement between synchronously indexing or rotating work and cutter
32 ...Crowning
33 ...Displacing cutter axially relative to work (e.g., gear shaving, etc.)
34 ....Using gear shaper-cutter
35 .....Plural distinct cutting edges
36 .....Cutting rotating work, the axis of which lies in a plane intersecting the cutter axis
37 ..Gear shaving
38 ..Using rotary cutter
39 ...Having axially directed cutting edge
40 ...Plural rotary cutters
41 ...On reciprocating carriage
42 ..Using reciprocating or oscillating cutter
43 ...Bevel gear cutting
44 ....Dual cutters
45 ....Double acting cutter
46 ...Rectilinearly reciprocating cutter
47 ....Cutter comprising a rack
48 ..Making a noncircular gear, worm, rotor, or a planar-faced gear
49 .Gear shaving
50 .Using rotary cutter
51 ..Process
52 ..End mill
53 ...Radially faced
54 ....Using plural, selectively usable tools
55 ..Plural rotary cutters
56 ..Cutting action along work axis
57 ...Cutting action intersecting work axis
58 .Using reciprocating or oscillating cutter
59 ..Broach
60 ..Including circumferentially disposed cutting edges
61 .Work dividing or checking of work position or division
62 .With work clamping
63 WITH FURBISHING OF CUTTER
64 MILLING
65 .Thread or helix generating
66 ..Process
67 ..With means to regulate operation by use of templet, card, or other replaceable information supply
68 ...Complete cycle
69 ...To regulate cutting depth (e.g., relief, taper, etc.)
70 ...To regulate rate of motion (e.g., stopping, etc.)
71 ..With nonthread or nonhelix generating, milling cutter
72 ..With means to advance work or product
73 ..Plural cutters or work holders
74 ..With planetary cutter
75 ..Work means to move work axially and means to interrelate work movement with cutter rotation
76 ..With means to rotate work and means to interrelatedly infeed the work relative to the cutter
77 ...Means to infeed the cutter
78 ..With means to circumferentially adjust the position of the cutter with respect to the work
79 .With regulation of operation by templet, card, or other replaceable information supply
80 ..With sensing of numerical information and regulation without mechanical connection between sensing means and regulated means (i.e., numerical control)
81 ..To cut lock key
82 ...Using templet other than a key
83 ...Complete cycle
84 ..Process
85 ..Reproducing means
86 ...Including pantograph cutter-carrier
87 ....And means to move work at work station
88 .....About work axis
89 ....Pivotally supported for vertical movement
90 ....And means to counterbalance carrier
91 ....Including plural cutters
92 ...By use of pivotally supported tracer
93 ...Duplicating means
94 ....With means for operation without manual intervention
95 .....To make a double curvature foil
96 .....Including means to sense optical or magnetic image
97 .....With means to support templet above or under work
98 .....Including tracer adapted to trigger electrical energy
99 ......To actuate electrically driven work or tool moving means
100 ......To actuate fluid driven work or tool moving means
101 .....Including tracer adapted to trigger fluid energy
102 ......To actuate fluid driven work or tool moving means
103 ....Including cutter and tracer fixed to move laterally together

MILLING
.With regulation of operation by templet, card, or other replaceable information supply
..Reproducing means
...Duplicating means
....With means for operation without manual intervention
104 .....And provision for circumferential relative movement of cutter and work
105 ......Including plural cutters
106 .....Including plural cutters
107 .....Including cross-slide tool carrier
108 ....Including plural cutters
109 ....Including cross-slide tool carrier
110 ....With means to support templet above or under work
111 ....With provision for circumferential relative movement of cutter and work
112 ...With provision for circumferential relative movement of cutter and work
113 ....And means for operation without manual intervention
114 .....Including tracer adapted to trigger electrical or fluid energy
115 ...For using planar templet in cutting profile (e.g., contour map from planar map, etc.)
116 ...Including means for operation without manual intervention
117 ..Including means for operation without manual intervention
118 ...Including simultaneously usable plural tracers or including tracer adapted to simultaneously use plural templets
119 ....To make a double curvature foil
120 ...To make a double curvature foil
121 ...Including cutter and tracer fixed to move together
122 ...With provision for circumferential relative movement of cutter and work
123 ..And provision for circumferential relative movement of cutter and work
124 ..Including cutter and tracer fixed to move together
125 .Templet, tracer, or cutter
126 ..Tracer
127 ...Adapted to trigger electrical energy
128 ....Photocell
129 ...Adapted to trigger fluid energy
130 ..Templet
131 .Process
132 ..Including infeeding
133 .With means to weigh or test work or product
134 .With means to protect operative or machine (e.g., guard, safety device, etc.)
135 .With means to control temperature or lubricate
136 ..Cutter or work
137 .With means to remove chip
138 .Means to trim edge
139 .Means to remove scale or raised surface imperfection
140 ..Means to remove flash or burr
141 .With means to dampen vibration
142 .Means to mill epitrochoidal shape
143 .Means for internal milling
144 .With detachable or auxiliary cutter support to convert cutting action
145 .Including means to infeed work to cutter
146 ..With compensation for backlash in drive means
147 ..With control means energized in response to activator stimulated by condition sensor
148 ...In response to cutter or cutter carriage
149 ...In response to work or work carriage
150 ....To control rate of infeed or return
151 ....To control limit of infeed
152 .....Adapted to hydraulically or pneumatically stimulate control
153 .....Adapted to electrically stimulate control
154 ...To control rate of infeed or return
155 ...To effect stopping of infeed
156 ..With means to change rate of infeed
157 ..Means to mill indeterminate length work
158 ..Multiple work stations
159 ..With means to advance work or product
160 ...Vertically
161 ...Endless or orbital work or product advancing means
162 ..To reciprocate or oscillate work
163 ..With work holder
164 ...And means to selectively position work
165 ...Including means to support work for rotation during operation
166 ....And including means to infeed cutter toward work axis
167 ....With linear movement of work
168 ....With angular movement of work
169 ..Including friction gearing drive
170 ..Including fluid drive
171 .With means to effect stopping upon completion of operation
172 .With means to advance work or product
173 ..Endless or orbital work or product advancing means
174 .With means to precisely reposition work
175 .Randomly manipulated, work supported, or work following device
176 ..For machining commutator
177 ..For cutting longitudinal groove in shaft (e.g., keyway, etc.)
178 ..With work supported guide means
179 ...To guide tool to move in arcuate path
180 ..With work follower
181 ..Randomly manipulated
182 ...End mill (e.g., router, etc.)
183 .Including means to infeed rotary cutter toward work
184 ..With means to limit penetration into work
185 ..Axially
186 ...With infeed control means energized in response to activator stimulated by condition sensor
187 ....In response to cutter condition
188 ....In response to work condition
189 ...With work holder
190 ...And laterally
191 ....Simultaneously
192 ...Plural cutters
193 ..With infeed control means energized in response to activator stimulated by condition sensor
194 ...In response to cutter condition
195 ...In response to work condition
196 ..With means to change rate of infeed
197 ..With work holder
198 ...Indexable
199 ..Machining arcuate surface
200 ...With means to move cutter eccentrically
201 ..Angularly adjustable cutter head

	MILLING
	.Including means to infeed rotary cutter toward work
202	..Including gantry-type cutter-carrier
203	..Plural cutters
204	.Including means to adustably position cutter
205	..With work holder or guide
206	..Linear adjustment
207	...With control for adjustment means responsive to activator stimulated by condition sensor
208	....Responsive to position of cutter
209	....And means to clamp cutter support in adjusted position
210	...With position indicator or limit means
211	...And angular adjustment
212	...Including gantry-type cutter-carrier
213	...Plural cutters
214	..With position indicator or limit means
215	..With right angle cutter drive
216	..Compound angular adjustment
217	..Plural cutters
218	.With limit means to aid in positioning of cutter bit or work (e.g., gauge, stop, etc.)
219	.Work support
220	..With position indicator or stop
221	..Indexable
222	...Including dividing head
223	....Multiple row dividing head
224	..With angular adjustment
225	..With work holder or guide
226	...Including cutter limited to rotary motion
227	..With means to adjust work support vertically
228	.Including cutter limited to rotary motion
229	..Cutter turning about vertical axis
230	.Detachable or repositionable tool head
231	.Cutter spindle or spindle support
232	..With cutter holder
233	...And draw bar
234	.With cutter holder
235	.Machine frame
236	..Overarm harness structure
237	..Including counterbalancing means
238	..Including means to compensate for deformation
239	...Deflection of cutter spindle
240	..Convertible from lathe
241	..Including relatively movable components and means to relatively immobilize these components
242	.Tailstock
243	BROACHING
244	.Process
245	.With control means energized in response to activator stimulated by condition sensor
246	..Responsive to condition of work or product
247	.With means to distribute cutter infeed force
248	.With means to select cutter or to select or modify cutter drive
249	.With means to clean, lubricate, or modify temperature of work or cutter
250	.With product handling means
251	..Between plural broaching stations
252	..Means to eject broached product
253	..Chip removal means
254	.With means to protect operative or machine (e.g., guard, safety device, etc.)
255	..With safety means for overload or safety interlock
256	.With work immobilizer and means to activate work immobilizer interrelated with cutter infeed, work infeed, or work advance
257	.With work infeed or advancing means and means to clamp the work thereto, which clamping means is interrelated with work or cutter infeed
258	.Means to remove flash or burr
259	.Means for cutting groove
260	..Arcuate groove in cylindrical surface
261	...Rifling
262	.Orbital carrier for cutter
263	.Orbital carrier for work
264	.With means to cyclically manipulate cutter or cutter support
265	..To reorient, introduce, or remove cutter
266	..Cutter released to interim support at termination of cutting stroke
267	..To remove and return cutter to cutter support
268	.With plural cutters
269	.With means to advance, infeed, or manipulate work
270	..Interrelated with cutter infeed
271	...Including means supporting work and additional means opposing infeed force
272	...Including work indexing means for sequential cutting of different surfaces of a single workpiece
273	...Including work indexing means for sequential cutting of surfaces of different workpieces
274	...With means to retract work from path of tool's idle return stroke
275	..To infeed work past cutter
276	.With means to hold work during cutting
277	..Including work clamping means
278	..With means to adjust or facilitate adjustment of work or work holder
279	..With means on work or work holder to guide cutter during infeed
280	.Cutter infeed means
281	..Imparting rectilinear motion to cutter
282	...And rotary motion to cutter
283	...Fluid powered means
284	...Rack means
285	...Screw means
286	.Machine frame
287	.Cutter support or guide
288	PLANING
289	.With regulation of operation by templet, card, or other replaceable information supply
290	..Including use of tracer adapted to trigger electrical or fluid energy
291	...Including provision for circumferential relative movement of cutter and work
292	..Including provision for circumferential relative movement of cutter and work
293	.Process
294	.With means to lubricate
295	.With product handling means
296	.Randomly manipulated, work supported, or work following device
297	.Means to remove flash or burr
298	..Elongated work
299	...Flash or burr inside hollow work
300	...Transverse burr
301	..Flat work
302	.Of commutator

PLANING
303 .Means for trimming edge (e.g., chamfering, scarfing, etc.)
304 .Means for cutting groove
305 ..Arcuate groove
306 ...For rifling
307 ..Inside hollow work
308 .Means for shaving by blade spanning work surface
309 ..Concave work surface (e.g., bearing, stereotype printing plate, etc,)
310 ..Circumferential surface
311 ..Including rack driven infeed means
312 ..Including roller infeed means
313 .Means for cutting arcuate surface
314 ..Cycloidal surface
315 ..With work infeed and means to arcuately reposition the cutter
316 ..With work infeed and means to arcuately reposition the work
317 .With means to relatively infeed cutter and work
318 ..And means to rotate work and cutter at same rate about converging axes
319 ..With plural sequentially acting cutters or with double acting cutter
320 ..And means to vary rate of infeed
321 ..Reciprocating work infeed means
322 ...With fluid-driven bed
323 ...With rack-driven bed
324 ...With screw-driven bed
325 ...And means to permit repositioning of cutter laterally
326 ..Reciprocating cutter infeed means
327 ...Reciprocating cutter horizontally
328 ....With work support and lead screw to reposition work support
329 ....With fluid-powered means to drive cutter
330 ....With pivoting link to drive cutter
331 .....Link driven by crank
332 ....With rack to drive cutter
333 ....With screw to drive cutter
334 ...With link or cam to drive cutter
335 ...With rack to drive cutter
336 ..Including means causing return stroke
337 .Machine frame
338 ..Means to permit repositioning of cutter
339 ...Laterally
340 ....Plural independently positioned cutters
341 ....Including clutch
342 ....Including repositioning means and means to effect stopping thereof
343 ..Including relatively movable components and means to relatively immobilize these components
344 ..Work table
345 .Tool head
346 ..With selectively usable cutting edges
347 ..With means to permit repositioning of cutting for idle return stroke
348 ...Comprising pivotable cutter or cutter support

CLASS 410 FREIGHT ACCOMMODATION ON FREIGHT CARRIER

DECEMBER 1990

A word which is defined in the definitions for this class is identified by an asterisk.

Where a term consisting of a group of words is defined in the definitions, parentheses are used to identify the beginning and end of the term; and this is followed by an asterisk.

1	INCLUDING TURNTABLE FOR LOAD, E.G., FOR SEMITRAILER
2	PARTICULAR ARTICLE ACCOMMODATION
3	.Wheeled vehicle
4	..Four-wheeled vehicle accommodation
5	...Overturned or on-edge vehicle arrangement
6	....Ramp becomes vehicle sustainer
7	...Vehicle retainer*
8	....Multipositionable; i.e., along array strip or track
9	.....Wheel, hub, or axle retainer*
10	......Tiedown*
11	.....Tiedown*
12	......Including force-multiplying takeup or tensioning means
13	....In arrangement in which the vehicle end, at least, is raised to hood section height
14	.....Elevatable deck suspended from hoist line
15	......Lift simultaneously erects pivoted prop
16	.....Including wheel-straddling member which is a retainer* or retainer* adjunct
17	.....Including suspended retainer* member or prop
18	.....Retainer* arm or prop extending from freight carrier wall
19	....For wheel, hub, or axle shaft
20	.....Wheel wraparound*
21	.....(Load lashing retainer)*
22	.....Hub or axle shaft retainer*
23	....Tiedown*
24	...Raised vehicle arrangement
24.1	....Including above-cab stowage
25	....Interrupted or recessed wheel support
26	....Multilevel deck; i.e., four-wheel support
27	.....Including interdeck transfer way
28	......On dropped-center car
28.1	.....On dropped section freight carrier
29	.....Vertically swingable from hinge at freight carrier wall
29.1	.....Higher level deck positioned, then sustained by power cylinder
30	...Wheel cradle, chock, or well
31	.Grouped
32	..Group of articles which are, predominantly, regularly contoured; i.e., are rodlike, panel shaped, blocks, or analogous forms
33	...Articles with protuberance or flange
34	...Grouped by load binder or press means
35	....Grouped together with on-and-off base
36	....Cylindrical article group
37	.....Log load
38	....Press
39	.....Including spacer
40	......Between groups
41	....Including angle overlay, e.g., corner guard
42	...Cylindrical article group
43	..Vehicle body part group
44	.Accommodation of article which is massive relative to freight carrier
45	..Stowed as bridge between trucks or across cars or on drop-center (schnabel type) car
46	.On supporting on-and-off base
47	.Cylindrical article accommodation
48	..Rigid retainer* acting as, or retentively contacting a core or hub
49	..Cradle or chock
50	...And wraparound* lashing
51	DRAFT (INCLUDING PUSHED) FREIGHT CARRIER, E.G., WAGON, HAND TRUCK
52	LOAD BEARER ACCOMMODATION
53	.Stowed as bridge between trucks
54	.Diverse load accommodation, e.g., convertible between semitrailer and container accommodation
55	..Retainer including load lashing anchor capability
56	.Semitrailer accommodation
57	..Fore-and-aft accommodation
58	..Collapsible and erectable stand
59	...Tractor operated
60	....Cushioned
61	...Jack screw erected
62	...(Fore-and-aft direction slide cushioning means)*
63	...Cushioned cylinder strut
64	...King pin latch
65	..Accommodation means conforms to wheel sidewall during guidance or rest condition, e.g., rub rail or wheel well
66	.Wheeled load bearer accommodation
67	..Including wheel guide
68	.Accommodation of rigid wall container for bulk material
69	.Load bearer tripped retainer*
70	..Retainer* mounted on (corner pedestal)*
71	.Corner pedestal
72	..Vertically displaceable, e.g., on horizontal axis
73	...Including male-female retainer*
74	....Mounted on pedestal which is also slidable along track
75	...And slidable along track
76	..Including male-female retainer*
77	.Retainer
78	..Multiunit retainer
79	...Oppositely directed latch pair to retain contiguous load bearers
80	..Load bearer understructure retention, e.g., leg engaging
81	...By insertion of completely separable retainer, e.g., bolt, through aligned apertures
82	..Twist lock
83	...Project-retract mounting
84	..Load bearer mounts active retainer received by static freight carrier keeper
85	..Load bearer (load lashing retainer)*
86	..Including load bearer cushioning means
87	.Cushioned accommodation
88	..(Fore-and-aft direction slide cushioning means)*
89	.Wall-to-wall socket-entering load bearer
90	.Load bearer accommodation by underside socketing

LOAD BEARER ACCOMMODATION
.Load bearer accommodation by underside socketing
91 ..Pin-socket accommodation
92 .Rollerway
93 .Drop side car, side converts to ramp
94 .Load bearer abutment
95 ..Between load bearer units
96 LOAD LASHING RETAINER OR LOAD LASHING ADJUNCT
97 .Wraparound
98 ..Method
99 ..Including angular surface guard, e.g., edge-around
100 ..Including tightener or tensioner
101 .Anchor
102 ..Multipurpose, e.g., combined, convertible
103 ..Including winch or tensioner
104 ..Track-guided anchor
105 ...Anchor-admitting cross-slotted track
106 ..Mounted on exposed and bordering structural member
107 ...Project-retract (tie piece)*
108 ...In exposed array therealong
109 ....And inboard-mounted anchor, e.g., recessed in car facing
110 ....Atop wall of open top freight carrier, e.g., bulb-angle mounted
111 ..Project-retract (tie piece)*
112 ..Recessed in car facing
113 ...Recessed anchor array
114 ....Of attached (tie pieces)*, e.g., welded
115 ..Array strip or formation
116 ..Including mounting means for facile assembly or removal of (tie piece)*
117 YIELDABLE BRACE
118 .Panel
119 ..Inflated or inflatable
120 RIGID MEMBERS RETAINER, E.G., WRAPAROUND TYPE
121 LOAD BRACING MEANS
122 .Bifacial brace
123 ..Squeeze
124 ...Powered or pressurized
125 ....Intervening squeeze bag
126 ...Track guided
127 .Brace panel with wall-to-lading adjustment means
128 ..Forcing, e.g., motorized, pressurized, or adjusted by force-multiply means
129 .Panel or frame, wall-to-wall
130 ..Track mounted
131 ...Wall-to-wall pair, oppositely swinging
132 ...Including pin-in-aperture latch
133 ....Track is apertured to define both (a) a sprocket wheel rack, and (b) a series of latch pin receivers
134 .....Gang-operated latch pins
135 ....Panel movable to out-of-way position
136 .....Winched
137 ....Gang-operated latch pins
138 .....Including pin which latches into track aperture
139 ....Track is apertured to receive latch pin
140 ..Deployed structure or comprising individually installed parts
141 ...Latched to side wall aperture or slot
142 ..Having aperture-entering latch pin
143 .Brace bar, wall-to-wall
144 ..Aperture-entering wall-to-wall connection at the end
145 ...Axially adjustable toward wall, e.g., telescopic
146 ....Axially adjustable end fitting, with pivoted aperture-entering part
147 .....Aperture-entering duo
148 ....Axially adjustable end fitting has integral aperture-entering part and pivotally mounted cooperating latch part
149 ....Spring biased
150 ..Track mounted, for slidable adjustment along the car wall
151 ..Wall-to-wall force fit; or having wall piercing end
152 ..Brace bar receiver
153 .Brace post
154 .Honeycomb
155 .Edge-around dunnage brace
156 MISCELLANEOUS

CLASS 411 EXPANDED, THREADED, DRIVEN, HEADED, TOOL-DEFORMED, OR LOCKED-THREADED FASTENER

1 TORQUE RESPONSIVE NUT OR BOLT DRIVING CONNECTION
2 .Frangible connection
3 ..Between concentric elements
4 ...Shear pin connecting means
5 ...Axially displaced
6 .Resilient connection
7 ..Ratchet
8 WITH MEANS TO INDICATE APPLICATION OF PREDETERMINED STRESS-STRAIN
9 .Axially deformable member or portion
10 ..Deformable washer
11 ...Resilient
12 ....Coil spring
13 .Color indicator
14 .Including gauge means
15 HAVING SEPARATE EXPANDER MEANS
16 .Helical anchor
17 ..Mates with mandrel thread
18 ..With wedge-shaped expander
19 .Fluent pressure actuated
20 ..Explosive
21 .Having securing element projecting through aperture in sleeve
22 ..Deformable element
23 ...Flowable mass
24 .Oppositely acting double wedge expander means
25 ..Outwardly moving
26 ..Both wedges provided with thread cooperating means
27 ..Having rotation preventing means
28 ...Groove and follower
29 .With hole forming means
30 ..Formed on expansible sleeve
31 ...Serrated end
32 .Plural expansible segments or sections
33 ..Identical segments
34 .Bulged by axially contracting ends
35 ..Having wedge-shaped section acting in slot
36 ..Twistable sleeve
37 ..Bulged portion having additional gripping means
38 ..Bulged portion including bend line or reduced section
39 .Frangible member
40 ..Frangibly connected expander
41 ...Projecting outwardly from head
42 ..Sleeve including weakened portion
43 ..Frangible mandrel
44 .Including sleeve and tapered expander
45 ..And means to captively retain expander
46 ...Follower captive within groove
47 ...Bridge-type retainer
48 ...Tongue-type retainer
49 ..Relative rotation preventing means
50 ...Guide and follower
51 ....Splines
52 ....Follower defined by corners of polygonal element
53 ....Expander type
54 ..Expansible element moved relative to stationary expander
55 ..Expander threadedly engaged by mover
56 ..Stepped expander
57 ..Slotted sleeve
58 ...Both ends slotted
59 ...Slot spaced from ends
60 ...Throughout longitudinal extent of sleeve
61 ....Folded blank type
62 ....Slot angularly related to sleeve axis
63 ..Plural-sectioned sleeve
64 ...Having section retainer
65 ....Ring or sleeve type
66 .....Destructible
67 ....Bight type
68 ....Tongue and groove
69 ..Expander or sleeve extruded during expansion
70 ..Expander having integral pull stem
71 ..Sleeve having external gripping means
72 ...Circumferential rib
73 ....And longitudinal rib
74 ...Struck from sleeve
75 .Relatively sliding wedge surfaces
76 ..Wedge received in transverse slot in holding device or anchor
77 ...Double-faced wedge
78 ..Having wedge retainer means
79 ..Wedge surfaces act in single lateral direction
80 ..Including discrete activating means for wedge
81 THREADED FASTENER AND MEANS FOR RESTRICTING ROTATION THEREOF RELATIVE TO COACTING SUBSTRUCTURE
82 .Including settable material
83 .Including movable, separable, or nondistortably connected restricting member
84 ..Prefabricated assembly comprising strip or sheet member carrying plural, similar fasteners
85 ...Including element for holding fasteners against separation from member
86 ..Including a series of elements, one element restricting two fasteners of a plurality, and the remainder each restricting one fastener
87 ..Elongate member extending between and interlocking plural bolts or nuts
88 ...Member engages inwardly facing surface and a flat side of bolt head or nut
89 ..Member extending between plural fasteners and restricting the rotation thereof in one direction more than the other (e.g., pawl and ratchet)
90 ..Member extending between and engaging flat formed on side of each of a plurality of bolts or nuts (e.g., side lock)
91 ...And element on opposite face of substructure restricting rotation of a cooperating nut or bolt
92 ...Having plural openings or notches engaging a bolt or nut on two sides
93 ....Having plural parts, one of which engages the inwardly facing surface of a bolt head or nut
94 .....Special fishplate engaging inwardly facing surface
95 .....Elastically or plastically deformable part
96 ....Having plural parts, one comprising a keeper
97 ....Unitary member, deformable in whole or in part
98 ...And engaging the inwardly facing surface of the bolt heads or nuts
99 ...Including separable keeper for member
100 ...Including element spacing member from substructure
101 ..Member engages the inwardly facing surface of a plurality of bolt heads or nuts
102 ..Series of elements, each restricting a single fastener, cooperating to restrict a series of fasteners

THREADED FASTENER AND MEANS FOR RESTRICTING ROTATION THEREOF RELATIVE TO COACTING SUBSTRUCTURE
.Including movable, separable, or nondistortably connected restricting member
103 ..Member preassembled with substructure at through-passage or recess for holding single bolt or nut in coaxial relation therewith
104 ...Through-passage or recess having laterally extending entry for inserting member and nut
105 ...And a second substructure and means for capturing a complementary nut or bolt thereto
106 ...Having means for coupling a bolt to a nut (e.g., thread lock)
107 ...Member anchors bolt in substructure with threaded portion exposed (e.g., stud bolt)
108 ...Nut-encompassing sleeve member engaged within through-passage or recess
109 ...Locking ring coaxially related to an elongated, externally threaded nut
110 ...Member comprises a longitudinal key
111 ...Member includes elastically or plastically deformable portion
112 ....Having elastically deformable portion for attaching member to substructure
113 ....Plastically deformable portion
114 ..Recessed or toothed member receiving movable pawl carried by bolt head or nut
115 ...Having discrete, reciprocably movable pawl
116 ..Fastener, or coaxial adjunct therefor, having sidewardly facing flat or formation engaged by portion of member (e.g., side lock)
117 ...Adjunct carried flat or formaton
118 ...And thread lock coupling complementary fasteners
119 ...Member having opening or notch engaging a bolt head or nut on two sides
120 ....And element maintaining member in operative engagement with bolt head or nut
121 ....Member elastically or plastically deformable for attaching it to bolt head or nut
122 ...Member having portion (e.g., tab) deformable in situ into engagement with flat or formation
123 ....And having specific structure to coact with substructure
124 .....Projection on member and coacting formation in substructure
125 ...Sheet metal member having resilient pawl distorted therefrom
126 ....Member includes means which attempt to penetrate substructure
127 ....Member abuts coacting part on substructure
128 ...Member, or portion thereof, comprises movable pawl
129 ...Member engages inwardly facing surface of bolt head or nut
130 ....And is formed from plural, cooperating parts
131 ....And has specific structure to coact with substructure
132 ..Member or portion thereof located between substructure and inwardly facing surface of bolt head or nut
133 ...Member fixed to bolt shank, and member or bolt fixed to substructure
134 ...Means holding member to bolt, nut or substructure prior to use
135 ....By discrete element
136 ...Member comprises looplike element (e.g., washer) interlocked with additional element, one of them engaging substructure or surface in other than planar, face to face contact
137 ....Two looplike elements interlocked by laterally introduced key
138 ....Pawl element, movably carried by looplike element, coacts with ratchet on surface
139 ....Laterally introduced key locks looplike element to surface
140 ...Elongate member moves in longitudinally extending opening in bolt head or nut to enter substructure
141 ...Locking dog or pawl carried by bolt head or nut and engaging substructure
142 ...Key introduced laterally at juncture of surface and substructure
143 ...Formations on either member or surface, and cooperative, restricting means on the other
144 ....Formations on surface, means on member, one of which presents a sharp edged configuration
145 .....Formations comprise ramplike teeth, means comprises a movable pawl
146 ......And substructure accommodation for member portion
147 ...Member comprises washer formed as closed loop or apertured plate or as split ring
148 ....Engaging side wall of counterbore in substructure
149 ....Plural, axially adjacent washers, or plural part washer
150 .....Having one washer, or washer part, of a more yieldable nature than another washer, or part
151 ....Split ring having radially outwardly extending end
152 ....Ends of split ring overlap in stressed condition
153 .....Overlap of at least 180 degrees (e.g., coil)
154 ....Apertured plate of uniform thickness having undulating contact surfaces
155 ....Apertured plate having arched sectional configuration (e.g., concavo-convex)
156 .....Arched configuration circumscribes aperture
157 ....Split ring having opposed ends offset axially
158 .....Contact surface contains a plurality of generally radially extending ridges or grooves removed from the ends
159 .....Cross section other than rectangular
160 ....Closed loop having plural variations in the profile of a contact surface or a peripheral edge thereof

THREADED FASTENER AND MEANS FOR RESTRICTING ROTATION THEREOF RELATIVE TO COACTING SUBSTRUCTURE

.Including movable, separable, or nondistortably connected restricting member

..Member or portion thereof located between substructure and inwardly facing surface of bolt head or nut

...Member comprises washer formed as closed loop or apertured plate or as split ring

....Closed loop having plural variations in the profile of a contact surface or a peripheral edge thereof

161 .....Variations comprise generally radially extending ridges or grooves

162 .....Variations comprise circumferentially spaced projections or recesses inset from both peripheries

163 .....Variations are teeth located along a periphery

164 ......Both peripheries

165 ....Each twisted about its radial axis

166 .Restricting means comprises structure of fastener or substructure

167 ..And bolt to nut thread lock

168 ..By or including bolt to substructure thread lock

169 ..Mass of bolt head or nut offset radially to resist loosening

170 ..Nut and apertured spacer formed in single strip of material and folded into axial alignment

171 ..Bolt or nut adapted to be fused directly to substructure (e.g., weld nut)

172 ..Nut, and means to engage substructure on its opposite faces for retaining nut at aperture therein, formed as unitary component

173 ...Means to engage extends through aperture

174 ...Means to engage grasps an edge of substructure

175 ....And has projection contacting periphery of aperture

176 ..Structure includes region which is deformable or produces deformation or both

177 ...Nut assembled to substructure utilizing cooperating regions on both

178 ....Nut is externally and internally threaded cylinder

179 ....Nut penetrates substructure and anchors itself thereto (e.g., pierce nut)

180 ....Nut deforms wall of preformed opening in substructure during assembly

181 ....Both cooperating regions deformed

182 ....Nonmetallic nut, resiliently deformed during assembly

183 ...Nut assembled to substructure by plastically deformable region on nut

184 ...Region on inwardly facing surface of bolt head or nut

185 ....Surface extends radially beyond flat sides of bolt head or nut

186 .....And includes resilient flange

187 ....Having axially directed projection or recess

188 .....Plural, radially extending, and generally equally spaced

189 ....Surface deforms resiliently

190 THREADED BOLT AND NUT AND MEANS FOR COUPLING THEM AGAINST RELATIVE ROTATION

191 .By locking member contacting side flat on nut or bolt and engageable with other fastener element

192 ..Member also engages side flat on other element

193 ...Utilizing a resilient characteristic of the member, or of a discrete element

194 ....With a discrete, resilient element

195 ...Other element is a bolt, and member includes opening configured to engage side flat thereon

196 ....And further includes spaced, axially extending legs for engaging side flats on the nut

197 ..Locking member contacts nut

198 ...Utilizing a resilient characteristic of the member, or of a discrete element

199 ....Member comprises key movable laterally into engagement with threaded elements

200 ...Member comprises key movable laterally into engagement with threaded elements

201 ...Member includes plastically deformable portion

202 ..Utilizing a resilient characteristic of the member, or of a discrete element

203 ...With a discrete, resilient element

204 .By locking member coacting with an axially outwardly facing portion of nut

205 ..Member comprises key swingable (e.g., pivotal) into engagement with threaded elements

206 ...Utilizing a resilient characteristic of the key, or of a discrete element

207 ....With a discrete, resilient element

208 .....And key engageable with aligned formations (e.g., grooves) in axially outwardly facing portion of each threaded element

209 ..Member comprises key movable laterally into engagement with threaded elements

210 ...Utilizing a resilient characteristic of the key, or of a discrete element

211 ....With a discrete, resilient element

212 ...Including plastically deformable portion

213 ....Comprising an elongated element divided longitudinally (e.g., a cotter pin)

214 ..Member comprises a screw, and bolt includes a generally axially extending, internally threaded bore for receiving the screw

215 ...With an additional member between screw and axially outwardly facing portion

216 ..And the member including, as a substantial part thereof, an elongated, axially disposed key

217 ...Key coacts with bolt by occupying an axially extending recess formed in the radially outward surface thereof

THREADED BOLT AND NUT AND MEANS FOR COUPLING THEM AGAINST RELATIVE ROTATION

.By locking member coacting with an axially outwardly facing portion of nut

..And the member including, as a substantial part thereof, an elongated, axially disposed key

...Key coacts with bolt by occupying an axially extending recess formed in the radially outward surface thereof

218 ....And includes a portion adapted to extend into a transverse opening provided in the bolt

219 ....And includes a portion adapted to engage a substantial part of the periphery of the bolt

220 ....And includes a region plastically deformable into engagement with the axially outwardly facing portion

221 ..Member interlocks with an axially extending recess or slot in the bolt and a recess in the axially outwardly facing portion of the nut

222 ..Internally threaded locking member (e.g., jam nut)

223 ...Including means associated with at least one of the nuts for restricting rotation therebetween

224 ....Key received in part in each of the nuts

225 .....Including a plastically deformable portion

226 .....Received in axially extending passages or recesses

227 ....Comprising one or more discrete members serving as a pawl and ratchet

228 .....Inherently resilient pawl

229 ....Axially directed, resiliently biased detent means

230 ....Canted element

231 ....With means resiliently biasing the nuts apart

232 ....Side lock

233 .....Integral deformable means

234 .....By a discrete element

235 ......Periphery encompassing means (e.g., a sleeve)

236 ......Including plastic deformation (e.g., bending) of the discrete element

237 ....Having a part of one of the nuts extending into a circular, axially directed recess of the other, and further including, in the region of the recess, formations cooperating to restrict relative rotation

238 .....At least one of the formations comprises a surface eccentric to the longitudinal axis of the nuts

239 ....Including cooperating formations on the axially opposing portions of the nuts

240 .....Comprising teeth of the ramp and buttress type

241 .....Comprising surfaces of a curvilinear nature

242 ....Plastic deformation of at least one of the nuts

243 ....Reversed internal and external threads on one of the nuts

244 ....Oppositely threaded

245 .....Intersecting threads on the bolt

246 ..By thread-gripping locking element

247 ...Resilient grip

248 ....Split ring

249 .....Including structure interfitting within a thread for less than a full turn thereof

250 ...Wire structure

251 ....Helically coiled wire

252 .....Including a free end in nonrotational engagement with the threaded element

253 ...Gripping member includes a tapered section adapted to be axially depressed to cause radial movement of a portion thereof

254 ...Gripping member is moved radially into engagement with the threads

255 ....Including discrete means to move or to lock the gripping member relative to the externally threaded element

256 ...Gripping member is moved tangentially into engagement with the threads

257 .Including material in the nature of (1) a metallic coating, (2) a quantity of fusible metal or (3) a discrete member formed of ductile metal

258 .Including settable material

259 .Comprising a thread lock

260 ..Including a distortable metallic washer or sleeve

261 ...In the nature of a dished washer

262 ..Including a coil spring

263 ..Differential thread means

264 ..Rocking thread section on the externally threaded element

265 ..Including a tapered (e.g., a conical) surface for wedging the internally threaded element against the externally threaded one

266 ...Segmented internally threaded element

267 ....Discrete segments carried within a housing

268 ....Including a discrete, threaded member carrying the tapered surface and threadedly engaging one of the threaded elements

269 .....Engaging a threaded exterior provided on the segmented element

270 ....Including a sleeve or washer type member for carrying the tapered surface and surrounding the segmented element

271 ..Externally threaded element includes an axially extending opening in its free end for receiving an expander member

272 ..Including camming surfaces on the threaded elements or on an additional member

273 ...With a camming member having an eccentrically arranged recess for receiving the internally threaded element

274 ..Having an element, or with a discrete member, adapted to cant the assembly

275 ...With a discrete, canting member (e.g., a washer)

276 ..Having the internally threaded element distorted

277 ...Radially inward distortion

278 ....With discrete means carried by the element for producing the distortion

279 .....Threaded means

	THREADED BOLT AND NUT AND MEANS FOR COUPLING THEM AGAINST RELATIVE ROTATION
	.Comprising a thread lock
	..Having the internally threaded element distorted
	...Radially inward distortion
280	....Of cantilevered segments (e.g., castellated end)
281	....Of circumferentially spaced areas of continuous periphery
282	.....Defining a smooth curving, noncircular thread section (e.g., elliptically shaped)
283	.....Impacted areas
284	......Located on the flats of a polygonally shaped element
285	...Axial distortion
286	....With discrete means carried by the element for producing the distortion
287	....By axially directed impacted areas
288	....Of axially spaced threaded sections
289	.....Coiled spring
290	....Including a region displaceable generally axially relative to another part of the element
291	.....Having at least one region formed by a cut, slot, etc., across at least one sidewall of the element and extending generally radially into the element
292	..Including a longitudinal locking member
293	...Having a toothed surface
294	..Including a radial locking member
295	...Threadedly received in the internally threaded element
296	..Side clutch
297	...Roller
298	...Ball
299	...Spring
300	..Tangential locking member
301	..Elastic gripping action
302	...Elastic insert
303	....Disposed in a counterbore in the internally threaded element
304	....Disposed within an interruption of a threaded surface
305	..Externally threaded element adapted to be compressed radially inwardly
306	...Resilient element
307	..Having threads of different pitch, or a thread of varying pitch
308	..Involving dissimilarities in the sectional configuration of the threads
309	...Resulting in the deformation of one thread by the other
310	....By integral, interference-producing deviations from a standard thread shape
311	.....Located in the vicinity of the crest or the root of the thread
312	..Including means biasing the threads in axially opposed directions
313	.Washer having a deformable portion engageable with a threaded element
314	..Resiliently deformable portion
315	.With a member in the nature of a rotation preventing key movable laterally into engagement with the threaded elements
316	..And utilizing a resilient characteristic of the key, or of a discrete element
317	...With a discrete, resilient element
318	....Comprising a spring of the coiled type
319	..And including a plastically deformable portion
320	...Comprising an elongated element divided longitudinally (e.g., a cotter pin)
321	.With an elongated member in the nature of a rotation preventing key disposed axially of the threaded elements
322	..And utilizing a resilient characteristic of the key, or of a discrete element
323	..And including a plastically deformable portion
324	.Elastic gripping action
325	.Externally threaded element includes an axially extending opening in its free end for receiving an expander member
326	.Pawl and ratchet
327	..Pawl carried by the internally threaded element
328	...Pivoted pawl
329	...Resilient pawl
330	..Washer carried pawl
331	...Resilient
332	.Including teeth of the ramp and buttress type on the axially inwardly facing portion of the internally threaded element
333	.By deformation of a threaded element
334	..Plastic deformation
335	...Of an internally threaded element
336	....Into an interruption in the thread of the externally threaded element associated therewith
337	HEADED FASTENER ELEMENT WITH NUT, WASHER, SECURING MEANS OR CAP
338	.Lap bolt or fastener
339	..Interference fit type
340	.Securing means pivotable about axis transverse to fastener axis, e.g., toggle bolt, etc.
341	..And biasing spring
342	...Spring engaging securing means
343	...Spring at opposite end from securing means
344	..And discrete manual actuating means
345	..And pivoted retention means
346	..Channel shaped securing means
347	.Headed fastener element with securing means and biasing spring
348	..Ball detent securing means
349	..Securing means rotatable about fastener element or rotatably engageable by tool-rotatable headed fastener element
549	...Outwardly extending projection cooperates with socket member having ramp engagement means
550	....Including means providing axial adjustment
551	.....Threaded adjustment
552	....And discrete biasing spring
553	....Similar, opposed ramp surfaces
554	...Helically slotted securing means having cooperating engaging portion on socket member
555	....Through-slot for engagement with crossbar
350	...Securing means rotatable and axially movable, e.g., wear takeup means, etc.
351	.Draw bar or draft key fastener
352	.Metallic resilient securing means
353	..Retainer ring
354	.Wedge-securing means

HEADED FASTENER ELEMENT WITH NUT, WASHER, SECURING MEANS OR CAP
.Wedge-securing means
355 ..And apertured bolt
356 .Penetrating pin securing means
357 ..Longitudinally inserted
358 ...Outwardly deflected
359 ....Bifurcated
360 .Deformable securing means
361 ..Swageable collar
362 ..Securing means deflecting a portion of fastener end
363 ...Plural end legs
364 ....Cotter pin fastener
365 ....Circular deflector
366 .Threaded fastener and nut
367 ..Having stay bolt spacer sleeve
368 ..Having washer
369 ...Including sealing means
370 ....Stay bolt bearing washer
371 .Washer or cap
372 ..And separate attaching or retaining means
373 ..Attachable cap structure
374 ...By screw means
375 ...Crimpable
376 ...Weldable metal
377 ...Moldable
378 EXTERNALLY THREADED FASTENER ELEMENT, E.G., BOLT, SCREW, ETC.
379 .Stay bolt
380 ..Having spherical head
381 ...And telltale bore
382 ..Having telltale bore
383 .Multipart
384 ..Axially adjustable
385 ..Comprising longitudinal side-by-side sections
386 .Pilot end having means enhancing fastening or installation
387 ..Drill tip
388 .Double-ended
389 ..Both ends threaded
390 .Single element having means facilitating or effecting separation
391 ..By fluent pressure
392 .Resiliently flexible
393 .Set screw
394 .Drive screw
395 .Having bore therethrough
396 .Separate head element
397 ..Threadedly attached to shank
398 .Head eccentric with respect to fastener axis
399 .Head having counter-sinking means
400 .Hook head, e.g., J-bolt, etc.
401 .Elongated head, e.g., hanger bolt, etc.
402 .Head driving structure
403 ..Socket or slot
404 ...Orthogonally arranged slots, e.g., Phillips head, etc.
405 ...Opposed open ended plural slots, e.g., spanner, etc.
406 ...Dovetail
407 ...Having driver retaining means
408 ..Frictional engagement
409 ..Wing structure
410 ..Plural diverse driving structures
411 .Thread or shank structure
412 ..Plural threads on single shank
413 ...Of different pitch
414 ..Buttress thread
415 ..Of varying thread pitch
416 ..Lobular thread
417 ..Circumferentially interrupted thread
418 ...By longitudinal slot
419 ....Shank bifurcated by slot extending entirely therethrough
420 ....Inclined slot
421 .....Helically oriented
422 ...By transversely extending bore
423 ..Truncated thread
424 ..Shank structure
425 ...Twisted
426 ...Tapered
427 INTERNALLY THREADED FASTENER ELEMENT, E.G., NUT, ETC.
428 .Including lubricating means
429 .Having cap
430 ..Cap crimped onto nut
431 ..Resiliently retained
432 .Multipart
433 ..Including movable threaded segments
434 ...Moved by fluent pressure
435 .Wing
436 .Thread structure
437 ..Interrupted
438 ..Coil spring
439 IMPACT DRIVEN FASTENER, E.G., NAIL, SPIKE, TACK, ETC.
440 .Having means to facilitate explosive driving
441 ..Discrete guide or centering means
442 .Plural attached fasteners
443 ..Integral strip
444 ..Laterally attached only at head or bridge
445 ..Attached end-to-end
446 .Including integral locking means
447 ..Comprising deformable portion
448 ...Expansible on impact
449 ....Axially collapsible section
450 ..Having means engageable on underside of member being secured by fastener
451 ..Comprising protrusion or recess means on shank
452 ...Longitudinal rib
453 ....Spiral rib
454 .....Defined by twisted shank
455 ...Circumferential rib
456 ...Barb
457 .Multiple prong, e.g., nailing plate, staple, etc.
458 ..Oppositely disposed prongs
459 ...Having plural prongs on one end
460 ...Having identical ends
461 ..Of sheet metal
462 ...Including stiffening means
463 ....Rib
464 .....Entire fastener having corrugations parallel to driving direction
465 ......Having sawtooth penetrating edge
466 ...Prongs cut and formed from body portion
467 ....Plural prongs from single opening
468 .....Including opposed prongs defining mirror image of each other
469 ..Multipart
470 ..Having prongs of different length
471 ..Each prong bevelled from a single side toward its opposite side
472 ...Bevel located on outerside of prong
473 ..Having distinct driving head
474 ...Plural heads
475 ..Having means to limit penetration short of bridge portion
476 ..Having frangible portion
477 .Of sheet metal
478 ..Folded or twisted
479 ..Hollow fastener
480 .Separately attached head
481 .Head having central recess
482 .Plural axially aligned heads

	IMPACT DRIVEN FASTENER, E.G., NAIL, SPIKE, TACK, ETC.
483	.Wire formed head
484	.Domed head
485	.Hook head
486	.Head forms segment of disk
487	.Shank or penetrating end structure
488	..Flat-sided shank
489	...Tapered
490	..Stepped shank
491	..Oval or lobular shank
492	..Angular shank portion
493	..End structure
494	...Pyramidal point
495	...Slotted end
496	...Chisel point
497	...Stepped end
498	...Conical point
499	...Having a curved surface
500	HEADED FASTENER ELEMENT
501	.Having plastically flowable or deflectable end, e.g., rivet, etc.
502	..Plural end legs
503	...Sheet metal type
504	..Solid end type
505	...Stay bolt
506	...Bolt head and end flowable
507	....Domed head
508	.Having resilient securing structure on shank
509	..Concentric ridge or flange
510	...Plural ridges or flanges
511	FASTENER SECURING ELEMENT
512	.Having elastomeric material
513	.Cotter pin
514	..Having deformed resilient middle portion
515	..Having folded back leg
516	.Resilient metallic
517	..Retainer ring
518	...Having gripper holes
519	...Plural radial sectioned
520	..Sheet metal
521	...Circular
522	...Parallel legs, e.g., U-shaped, etc.
523	....Folded leg having fastener aperture or recess
524	.....Plural folds
525	...Having plural longitudinal slits
526	....And slit coincident with element axis
527	....And helically inclined tongues, e.g., speed nut, etc.
528	...Having longitudinal slit coincident with element axis
529	...Having longitudinal slot forming fastener engaging slide
530	..Wire or rod formed
531	WASHER STRUCTURE
532	.Including release means
533	.Including means for retaining washer to fastener
534	.Including antifriction means
535	.Including adjustable thickness means
536	..Wear or lost motion compensating means
537	.Having leveling means
538	..Inclined planar face
539	.Radially positionable
540	..Pivotally hinged sections
541	..Secured by plastic deformation
542	.Sealing
543	.Wire formed
544	.Axially resilient
545	.Corrugated
546	.Spacer
547	..Of folded sheet material

CLASS 412 BOOKBINDING: PROCESS AND APPARATUS

1 PROCESS
2 .Of making multiple books from a single book
3 .Of making a case
4 .Of applying a cover to a book
5 ..Casing in
6 .Of edge fastening
7 ..Marginally perforated sheet
8 .Of adhesive binding
9 APPARATUS
10 .Padding press
11 .With control means responsive to sensed condition
12 ..And randomly actuated stopping or disabling means
13 .With programmed, cyclic, or time responsive control means
14 .With measuring, testing, or inspection means
15 .Repair means
16 .With cutter
17 .Case maker
18 .Finishing apparatus
19 ..Cover applier
20 ...And means simultaneously binding edge
21 ...Means for casing-in
22 ..Presser or creaser
23 ...Press board
24 ..Jacketing means
25 .Book working apparatus
26 ..Reinforcement applying means
27 ...Lining or crash applying means
28 ..End sheets attaching means
29 ..Smashing or nipping means
30 ..Backing means
31 ..Headbanding means
32 ..Free edge finishing means, e.g., marbling, gilding, etc.
33 .Edge binding apparatus
34 ..Deformable strip applier
35 ..Sewing means
36 ..Lace, ribbon, or adhesive tape applier
37 ..Adhesive applier
38 ..Perforated sheet binder
39 ...Wire comb applier
40 ...Plastic comb applier
41 ....And heat sealer
42 ...Singular ring or ringlike element applier
43 ...Singular or postlike element applier

900 ACTIVATING PREVIOUSLY APPLIED ADHESIVE
901 PRESSURE SENSITIVE ADHESIVE
902 HEATING AND PRESSING

CLASS 413 SHEET METAL CONTAINER MAKING

DECEMBER 1990

1 METHOD
2 .Assembling receptacle with closure
3 ..Including work feeding
4 ..End joint forming
5 ...Metal to nonmetal
6 ...Rolling
7 ...Applying sealant
8 .Forming or treating metallic closure
9 ..By joining with preformed gasket or liner
10 ..Forming means to deter or detect tampering (e.g., child proof cap)
11 ..Reshaping previously used crown cap
12 ..Fabricating or assembling member having frangible portion (e.g., tear tab forming)
13 ...Forming user lip guard
14 ...Assembling pull tab (e.g., ring) to tear tab
15 ...Forming discontinuous frangible fracture line (e.g., push-in type with hinged tear tab)
16 ....Having pull tab and hinged tear tab
17 ....Scoring to form fracture line
18 ..Coating
19 ...Applying liquid to form gasket or liner
20 ....By spraying
21 ..Solder applying
22 ..Making or applying pouring spout or conical neck
23 ..Forming thread
24 ..Forming lug (e.g., twist-off cap)
25 .Making pull tab-gripping means (ring end)
26 APPARATUS APPLYING CLOSURE TO RECEPTACLE
27 .Seamer
28 ..No workpiece no seam type
29 ..With lubricating means
30 ..Progressive seaming stations
31 ..Roller die
32 ...Irregular can
33 ....Pattern cam
34 ...Gasket or seal applying means
35 ...Lid feeding means
36 ...Rectilinear movement of seam head
37 ...Can holder or lock
38 ...Portably mounted or attached seamer
39 ...Hand actuated
40 ...Roller spreader
41 ....Cam actuated
42 ..Fluted chuck
43 ..Reciprocating die
44 ..Geneva drive mechanism
45 .Closure or receptacle feed
46 ..Magnetic feed
47 ..Storage means (e.g., magazine)
48 ...Dropper type
49 ....And pusher
50 ....And turret
51 ...Including pusher
52 ..Closure and receptacle feed
53 APPARATUS FORMING POURING SPOUT OR ASSEMBLING SPOUT WITH CONTAINER
54 APPARATUS UNITING KEY TO CONTAINER OR CLOSURE
55 APPARATUS SCORING CONTAINER BODY
56 APPARATUS TO FORM CONTAINER CLOSURE (LID)
57 .Having means to apply solid solder
58 .Having means to apply seal or liner
59 ..Having heating means
60 ..By means contacting closure with liquid
61 ...By spraying
62 ..And metal deforming means
63 ..With seal cutting means
64 ...And means to feed a web of material
65 ..Means ejecting seal or closure
66 .Having means uniting pull tab to closure
67 .Having means forming frangible zone on closure
68 ..By means inserting ripper means into closure
69 APPARATUS FOR CAN BODY MAKING
70 .Blank feed
71 ..With bending
72 ...With seaming
73 ....With body deforming (beading, flanging)
74 ..With seaming
75 ...With body deforming
76 ..Body deforming
77 .With side seaming
78 MISCELLANEOUS

CLASS 414 MATERIAL OR ARTICLE HANDLING

DECEMBER 1990

1	ARTICLE MANIPULATOR MOVES ANALOGOUS WITH HUMAN HAND, FINGER, OR ARM MOVEMENT
2	.Motion of hand, finger, or arm member multiplied or reduced in its transmission to article manipulator means
3	.Having means to transmit motion through an imperforate barrier
4	.Electric or fluid motor drive for manipulator
5	..Having means to transmit feedback signal from manipulator means to hand, finger, or arm
6	..For grip force amplification
7	.Having flexible motion transmissiion means
8	.Having sealing or radiation shielding means
9	HUMAN BODY OPERATED EATING AID
10	APPARATUS FOR MOVING MATERIAL TO A POSITION IN THE ERECTION OR REPAIR OF A BUILDING
11	.Flat wall or ceiling member manipulating means
12	.Box-like building module manipulating means
13	LAUNDRY HANDLING DEVICE
14	STOCK PULLING OR PUSHING
15	.With means ejecting stock remnant
16	.Witn additional diverse motion of stock
17	.With fluid pressure actuated pushing or pulling means
18	.Stock end face pushers
19	..For sheet stock
20	.Sheet stock lead end pullers
21	WITH WEIGHING
22.51	WELL PIPE OR ROD RACKING MECHANISM
22.52	.With slope change
22.53	..For nonvertical drilling
22.54	..Horizontal to/from vertical
22.55	...Boom pivoting about horizontal axis
22.56	....Pivoting derrick
22.57	...Guided skate or pusher
22.58	...Pipe or rod guide
22.59	..Guided skate or pusher
22.61	..Pipe or rod guide
22.62	.Horizontal rack
22.63	.Vertical rack
22.64	..Compensating for support shift, e.g., ship roll
22.65	..Pivotal carriage
22.66	...Carousel
22.67	...Pivotal derrick
22.68	..With laterally guided pipe or rod support
22.69	...On inclined derrick mounted track
22.71	...Both upper and lower pipe or rod holding and guiding means
23	POLE OR TREE HANDLERS
24	GLASS CYLINDERS
24.5	ROUND HAY BALE HANDLING
24.6	.Unrolling
25	HAY DISTRIBUTORS
26	TOBACCO STRINGERS OR UNSTRINGERS
27	APPARATUS FOR STRINGING ARTICLES ON A SUPPORT IN ABUTTING RELATION
788	APPARATUS FOR MOVING INTERSUPPORTING ARTICLES INTO, WITHIN OR FROM FREESTANDING, ORDERLY LAYERED, OR MUTUALLY STABILIZING ORDERLY GROUP
788.1	.Stack forming apparatus
788.2	..Stacking tapered or nestable articles
788.3	...And varying orientation of tapered article in stack
788.4	..Takes articles for stack from another group
788.5	...And turns article about horizontal axis
788.6	...And turns plural articles as a unit about vertical axis
788.7	...And transport articles through working, treating, or inspecting station located therebetween
788.8	..Including separate unstacking means
788.9	..With means vertically aligning stack being formed
789	...And acting as discharge gate
789.1	...Powered means (e.g., jogger, etc.)
789.2	..Forms layered stack or row and then upends it
789.3	...Tiers or layers formed and sequentially added to stack prior to upending
789.4	....Includes means for crossing articles in layer
789.5	..Inserts separator into stack
789.6	..Plural article sources
789.7	..Includes means on or linked with transporting vehicle for forming and discharging stack
789.8	..Creates single stack by juxtaposing separately formed tiers
789.9	..With means for removing completed stack from stacking location
790	...Interfingers with stack support moving vertically relative to removing means
790.1	....Article received and stack discharged at interfingering location
790.2	...Includes stack gripping device
790.3	...Pusher
790.4	...Includes carrier having distinct supports each successively receiving a stack thereon
790.5	...Includes gravity unloaded movable support
790.6	....And conveyer for receiving unloaded stack
790.7	...Includes driven conveyor whereon continuously supported stack is formed
790.8	...With temporary support for incoming articles during discharge of stack
790.9	..Stacks articles on different supports
791	...And combines into single stack
791.1	...Includes conveyor for feeding articles to sequentially formed stacks
791.2	..Offsets or crosses adjacent articles in single article wide stack
791.3	..Articles inverted in adjacent levels or layers
791.4	...Layers
791.5	..Formed with sloped or stepped side
791.6	..Sequentially forms or adds completed layers
791.7	...Offsets circular articles within adjacent rows of layer
791.8	...Leaves void between articles in layer
791.9	....To facilitate insertion of handling means
792	...Crosses articles in adjacent layers
792.1	....Includes swingable pusher for turning article shoved to layer
792.2	....With rotating stack support
792.3	.....Rotated between addition of completed layers
792.4	....Turns completed layer about vertical axis before stacking
792.5	...Offsets articles within parallel adjacent superposed rows
792.6	...Adds rows of articles to layer
792.7	..Positions lowest article of stack first

APPARATUS FOR MOVING INTERSUPPORTING ARTICLES INTO, WITHIN OR FROM FREESTANDING, ORDERLY LAYERED, OR MUTUALLY STABILIZING ORDERLY GROUP

.Stack forming apparatus

..Positions lowest article of stack first

792.8 ...Includes horizontally shiftable, article elevating device

792.9 ....With article gripping means

793 ...Includes suction-type article gripping means

793.1 ....And endless belt for transporting

793.2 ...Includes magnetic-type article gripping means

793.3 ....And endless belt for transporting

793.4 ...Includes support vertically alignable with stack then shiftable from beneath article

793.5 ....Support carried or formed by endless belt conveyer

793.6 .....With belt and article moving vertically together above discharge

793.7 ......And additional noncoaxial endless belt coacting therewith to support article above discharge

793.8 ....Support adjust vertically as height of stack increases

793.9 ....Support revolves around central axis during shifting and return

794 ....Support swings during shifting and return

794.1 ....Support travels vertically spaced paths during shifting and return

794.2 ....Plural coacting supports shifting in opposite directions

794.3 ....And movable stop engaging article during shifting of support

794.4 ...Includes endless belt for delivering

794.5 ....Having discharge vertically shiftable

794.6 ...Having discharge vertically shiftable as stack grows

794.7 ...Includes pusher conveyer for delivering

794.8 ...Includes roller conveyer for delivering

794.9 ..Positions highest article of stack first

795 ...Includes rotary deliverer

795.1 ....Coacting screws

795.2 ...Includes means for raising highest article and lowering it upon newly delivered article

795.3 ...Includes means raising article up to stack

795.4 .Unstacking apparatus

795.5 ..Utilizes fluid blast to remove article

795.6 ..Unstacking tapered or nestable articles

795.7 ..With means vertically aligning stack

795.8 ..With means replacing depleted stack

795.9 ..Removes complete tier from multitier stack

796 ..Separates stack into smaller stacks

796.1 ...Removes smaller stack from bottom

796.2 ..Removes layer as unit

796.3 ...And changes position or orientation of articles within layer

796.4 ..With means for reorienting article after unstacking

796.5 ..Removes highest article first from stack

796.6 ...With means offsetting highest article prior to removal

796.7 ...With stack elevating means

796.8 ....Pusher separates article from stack after elevation

796.9 ...Includes article gripping device

797 ....By suction

797.1 ....By magnetic force

797.2 ...Includes endless belt article separator

797.3 ...Includes rotary article separator

797.4 ..Removes lowest article first from stack

797.5 ...Includes means for elevating remainder of stack therefrom

797.6 ...Includes endless belt article separator

797.7 ...Includes rotary article separator

797.8 ...Includes article separator with gripping device

797.9 ...Includes pusher article separator

798 ...Includes movable stack support for gravity unloading article

798.1 ....And means for temporarily holding remainder of stack

798.2 .Positions intersupporting article into row

798.3 ..Takes article therefor from another spaced group

798.4 ..Tapered or nestable articles positioned

798.5 ..Includes revolving or swinging handler

798.6 ...And pusher conveyer for delivering

798.7 ..Includes pusher conveyer for delivering

798.8 ..Includes nonpowered guide for delivering

798.9 .Removes intersupporting article from row

111 VEHICLE-CARRIED BALE ACCUMULATOR

132 HAY STACK SHAPERS

133 COAL STORAGE TYPE

137.1 MARINE LOADING OR UNLOADING SYSTEM

137.2 .Loading or unloading aircraft under marine conditions

137.3 ..Underwater loading or unloading

137.4 .With weather cover

137.5 .Marine vessel to/from well

137.6 .Marine vessel to/from air vessel

137.7 .Marine vessel to/from water

137.8 ..Marine vessel to/from lighter to/from water

137.9 .Marine vessel to marine vessel

138.1 ..With means to effect relative vertical movement of marine vessel

138.2 ..With means to compensate for relative marine vessel movement

138.3 ...Including means to sense position of marine vessel

138.4 ...Line tension control

138.5 ..Marine vessel to/from lighter to/from marine vessel

138.6 ...By use of endless belt conveyer

138.7 ..Marine vessel to/from lighter to/from shore

138.8 ...With marine vessel holding or moving device

138.9 ...Serial marine vessels supporting conveyer

139.1 ...By use of endless belt conveyer

139.2 ..One marine vessel towing the other

139.3 ..By use of endless belt conveyer

139.4 .Marine vessel to/from shore

139.5 ..Personnel loading or unloading

139.6 ..With means to compensate for marine vessel movement

139.7 ...Including means to sense vertical position of marine vessel (e.g., draft)

139.8 ..With marine vessel holding or moving device

MARINE LOADING OR UNLOADING SYSTEM
.Marine vessel to/from shore
139.9 ..Marine vessel to/from land or rail vehicle distinct from system
140.1 ...By use of marine vessel to/from shore gangway for land or rail vessel
140.2 ...By use of endless belt conveyer
140.3 ...By use of laterally moving crane
140.4 ...By use of swinging crane
140.5 ...By use of conveyer chute
140.6 ..By lifting marine vessel or by changing water level
140.7 ..By use of screw conveyer
140.8 ..By use of endless belt conveyer
140.9 ...For "bulk" (e.g., granular) cargo
141.1 ....Including orbiting bucket
141.2 ....With grab bucket
141.3 ..By use of laterally moving crane
141.4 ...Having swinging portion
141.5 ...On marine vessel
141.6 ..By use of swinging crane
141.7 ..By use of hoist line
141.8 ..By use of conveyer chute
141.9 .By use of screw conveyer on marine vessel
142.1 .By use of endless belt conveyer on marine vessel
142.2 ..For "bulk" (e.g., granular) cargo
142.3 ...Belt extending parallel to marine vessel beneath cargo hold
142.4 ....Sequential endless belts
142.5 ...Including orbiting bucket
142.6 .By use of laterally moving crane on marine vessel
142.7 .By use of swinging crane on marine vessel
142.8 .By use of hoist line
142.9 ..Scoop or scraper on marine vessel
143.1 .By use of conveyer chute
143.2 .Stowage arrangement on marine vessel
146 CHARGING OR DISCHARGING MEANS ADAPTED FOR USE IN A RADIOACTIVE ENVIRONMENT
147 CHAMBER OF A TYPE UTILIZED FOR A HEATING FUNCTION AND MATERIAL CHARGING OR DISCHARGING MEANS THEREFOR
148 .With alarm, indicator, or signal
149 .Driven, rotatable chamber
150 .Including driven device and/or inclined flow path to carry or convey material into, within, and out of chamber
151 ..In helical or tortuous path
152 ..With means outside of chamber to carry or guide material to, or from, device or path
153 ..With driven means within chamber to manipulate or transfer material
154 ..Including track-guided, wheeled vehicle
155 ...Having means to support material suspended therebelow
156 ..Including reciprocating or vibratory conveyer
157 ..Including endless conveyer (e.g., apron, pusher type, etc.)
158 ..Including screw, rotary, or rotating pusher, conveyer
159 ..Including roller conveyer
160 .Charging of chamber
161 ..With control system responsive to condition in chamber
162 ..Through plural ports in top of chamber
163 ...From vehicle-carried hopper located above port
164 ....With closures for ports and means on vehicle to manipulate them
165 ..By depositing material onto surface of glass melt
166 ...With pushing device to move material therealong
167 ..By driven device for transporting material to a stationary, at least in part, accumulating means for subsequent release into chamber by gravity
168 ...Receptacle moved back and forth along inclined way (e.g., skip)
169 ....Accumulating means includes serially arranged closures
170 .....Each comprising bell of bell and hopper type accumulating means
171 ...Conveyer
172 ..By driven device for transporting material to and/or into, or into and within, chamber
173 ...Plural, successive, driven devices
174 ....Thrower and at least one feeder conveyer therefor
175 .....Including screw conveyer
176 .....Including pusher conveyer
177 ....Two or more conveyers, one traversing open top, or opening in top of, chamber
178 ...Receptacle moved back and forth along inclined way (e.g., skip)
179 ...Movably mounted conveyer traverses open top, or opening in top of, chamber
180 ...Including apparatus to advance a material-supporting element to a point within chamber, release material, and retract element
181 ....With driven means to eject material from element
182 ....Element comprises tiltable, material underlying support
183 .....Receptacle separable from apparatus (e.g., for refilling)
184 .....Receptacle tiltable about axis parallel to direction of apparatus advance
185 ....Element comprises receptacle having bottom outlet
186 ....Element comprises grab
187 ...Material accumulating and holding structure, and driven conveyer therein serving to move (e.g., eject) material from structure to chamber
188 ....Including wheeled carriage for supporting the structure
189 ....Driven conveyer comprises rotatable, pocketed gate
190 ....Screw conveyer
191 ...Traversing hoist having material-underlying support or material attracting or gripping means
192 ...Carrier-mounted, tiltable receptacle
193 ...Thrower
194 ....Reciprocating or oscillating
195 ....Rotary
196 ...Conveyer
197 ....Screw
198 ....Reciprocating pusher or reciprocating conveying surface
199 ..By material supporting structure movable, or having a movable component, to release material into chamber by gravity
200* ...Including serially arranged closures
201 ....At least one comprising bell of bell and hopper type supporting structure
202 .....With means to improve seal between mating surfaces

	CHAMBER OF A TYPE UTILIZED FOR A HEATING FUNCTION AND MATERIAL CHARGING OR DISCHARGING MEANS THEREFOR
	.Charging of chamber
	..By material supporting structure movable, or having a movable component, to release material into chamber by gravity
	...Including serially arranged closures
	....At least one comprising bell of bell and hopper type supporting structure
203	.....Having bell and/or hopper mounted for rotation
204	...Bell and hopper
205	....With means to distribute material after release from structure
206	...With means to distribute material after release from structure
207	...Comprising a tiltable material containing member
208	..By inclined flow path
209	.Discharging of chamber by driven device
210	..With means beyond chamber exit to move or guide material discharged therefrom by the device
211	...Means comprises endless or rotary conveyer
212	...Means comprises portable (e.g., vehicle mounted), material receiving chute
213	..Device comprises screw conveyer
214	..Device comprises pushing or pulling mechanism
215	...Mechanism repositionable for serving plural chambers
216	.Discharging of chamber by gravity, and means beyond exit thereof to guide, move, or stop material
217	APPARATUS FOR MOVING MATERIAL BETWEEN ZONES HAVING DIFFERENT PRESSURES AND INHIBITING CHANGE IN PRESSURE GRADIENT THEREBETWEEN
218	.Including screw conveyer
219	.Including trap chamber having horizontal axis of rotation
220	..With means for changing pressure in trap chamber
221	.Including serially arranged valves in path having a vertical component (e.g., airlocks)
222	APPARATUS FOR CHARGING A LOAD HOLDING OR SUPPORTING ELEMENT FROM A SOURCE, AND MEANS FOR TRANSPORTING THE ELEMENT TO A WORKING, TREATING, OR INSPECTING STATION
223	.Supply source includes member capable of 360 degrees revolution
224	.Supply source includes a chute
225	.Load holding or supporting element includes gripping means
226	..Including pivoted jaw
227	APPARATUS PARTICULARLY ADAPTED FOR CHARGING OR DISCHARGING A FACILITY COMPRISING ONE OR MORE SITES FOR THE PARKING OF WHEELED VEHICLES
228	.Facility includes structure (e.g., ramp, angularly related successive locations for a vehicle, etc.) necessitating self-propellability or steerability of vehicle
229	..Upwardly inclined, pivotable parking site for receiving driven vehicle
230	...Caused to pivot by advancing vehicle
231	.With control system responsive to changeable operating instructions
232	.With means to sense condition of site
233	.Including one or more movable sites
234	..Vehicle assigned to particular supporting member (e.g., platform, dolly, cage, etc.) having some degree of independence either as to means, time or direction of movement
235	...Supporting member separable from endless, member-transporting carrier, or disengageable from endless drive means, and movable away therefrom for receiving, discharging or storing vehicle
236	...Plurality of supporting members moved in recirculating fashion by succession of driving devices
237	....Path of moving member describes generally rectangular loop
238	.....Successive devices each include endless, member-driving element (e.g., belt, cable, chain, etc.)
239	...One or more separate supporting members and means to impart independent, linear or partly linear, movement thereto
240	....Member moving from particular location to discharge and/or receive vehicle, and returning thereto
241	...With means to transfer vehicle to or from supporting member
242	..On driven, plural-site carrier initially receiving vehicle
243	...With loading means, external to carrier, at facility entrance
244	...Serving also movable site on subsequent driven carrier, or fixed site
245	....By moving linearly in a horizontal direction
246	.....And moving vertically (e.g., laterally shiftable elevator)
247	....By moving linearly in vertical direction or orbiting in vertical plane
248	.....Endless carrier having sites attached thereto (e.g., suspended therefrom)
249	...Moving linearly in vertical direction or orbiting in vertical plane
250	....Revolving about single, horizontal axis
251	....Endless carrier having sites attached thereto (e.g., suspended therefrom)
252	.With vehicle storage or retrieval system responsive to manual designation of destination
253	.With means to transfer, or facilitate transfer of, vehicle from carrier to site or vice versa
254	..Including sets of intermeshing support elements having relative vertical movement
255	..By exerting upward, in addition to generallly horizontal, force
256	...And forming sole support for vehicle
257	..Complementary, driven, vehicle-supporting conveyers on carrier and site
258	..Tiltable or inclined means for supporting vehicle on carrier or site
259	..By exerting generally horizontal force
260	...Comprising component of carrier having both horizontal and vertical paths of travel
261	.Carrier-facility-site relationship
262	..Route to site utilizes plural carriers

APPARATUS PARTICULARLY ADAPTED FOR CHARGING OR DISCHARGING A FACILITY COMPRISING ONE OR MORE SITES FOR THE PARKING OF WHEELED VEHICLES
.Carrier-facility-site relationship
263 ..Sites arranged radially of carrier rotatable in whole or in part
264 ..Sites arranged in superposed, longitudinal rows and in confronting relationship to carrier in intervening aisle
265 GUIDED, WHEELED DEVICE FOR TRANSPORTING MAIL AND EXTERNAL MEANS COOPERATING THEREWITH FOR LOADING OR UNLOADING THE DEVICE
266 PLURAL, STATIC STRUCTURES FOR SUPPORTING DISCRETE LOADS AND CHARGING OR DISCHARGING MEANS THEREFOR
267 .Load-underlying members (e.g., racks, receptacles (or a compartmented receptacle), shelves, troughs, etc.)
268 ..With means for selectively charging a plurality of receptacles from a single source, or selectively discharging a plurality of receptacles to a single destination
269 ...Charging a plurality of receptacles
270 ....Condition responsive
271 ....By driven conveyer having gated discharging locations spaced therealong
272 ....By conveyer movable (e.g., pivotable) to reposition outlet thereof
273 ..With control system responsive to changeable operating instructions
274 ...With means on charging or discharging means to determine status of member
275 ...With means to detect obstruction and alter movement of charging or discharging means
276 ..Inclined members
277 ..Charging or discharging means includes load sustaining surface and device to transfer load, with horizontal component of movement, from or to surface or member
278 ...Device comprises one or more conveyers of driven roller or endless apron type
279 ...Device includes self-powered, track-guided car
280 ...Device includes push-pull mechanism
281 ..Charging or discharging means includes elevating device, movable in horizontal direction (e.g., portable), having load-sustaining surface
282 ...Including additional means to move surface horizontally relative to device
283 ....Pivotably or rotatably
284 ...With detachably associated auxiliary carrier for transporting device during portion of its horizontal travel
285 ..Charging or discharging means comprises plural endless conveyers or plural runs of single endless conveyer
286 ..With load-supporting pallet
287 STATIC RECEPTACLE OF A MATERIAL CONDITIONING TYPE AND MEANS TO MOVE, OR FACILITATE MOVEMENT OF, MATERIAL TO, WITHIN, OR FROM THE RECEPTACLE
288 STATIC RECEPTACLE AND MEANS FOR CHARGING OR DISCHARGING, OR FACILITATING THE CHARGING OR DISCHARGING OF, THE RECEPTACLE
289 .With alarm, indicator, or signal
290 .Receptacle contains liquid in which charge is submergibly sealed
291 .With means to handle (e.g., recirculate, remove, etc.) dust
292 .With means to seal receptacle in vicinity of entrance for charging or discharging means
293 .Charging or charge-distributing means
294 ..Condition responsive
295 ...Position of charging means controlled by level of material in receptacle
296 ...Drive means of charging conveyer controlled by level of material in receptacle
297 ..With means to ream or cut, or with collapsible means to form, vertical discharge passage in material during charging
298 ..Serving also to discharge receptacle
299 ..Terminal portion of means comprises gravity flow path (e.g., chute)
300 ..Having charge distributing means of driven type
301 ...Rotary type
302 ....Having one or more conveyers rotatable about a vertical axis at an end thereof
303 ..Charging a static receptacle by gravity flow from a portable load carrier
304 .Nongravity discharging means
305 ..Including at least one discharge assistant of the compound motion type
306 ...Having compound motion assistant located proximate to bottom of receptacle and displaceable generally parallel thereto
307 ....Condition responsive
308 ....Assistant separable from receptacle
309 ....Pivotably displaceable assistant and member for shielding its fixed end
310 ....Comprising screw conveyer
311 .....Including means for loosening packed material
312 .....Having receptacle-reacting element of displaceable-movement drive means located on conveyer
313 ...Having compound motion assistant operating on top of material
314 ....Including wall cleaning means
315 ....Condition responsive
316 .....To maintain material surface horizontal
317 ....Route of material being discharged includes vertical segment through remainder of charge
318 ....With conveyer extending to discharge opening in sidewall of receptacle
319 ....Screw-type pickup conveyer
320 .....Including plural screw elements
321 .....Including means for loosening packed material
322 ....Means for displacing assistant involves driven, wheel-like, support member rolling on surface of material
323 ..Condition responsive
324 ..Including flail
325 ..Including one or more driven conveyers located within or partly within receptacle for making initial pickup of material

STATIC RECEPTACLE AND MEANS FOR CHARGING OR DISCHARGING, OR FACILITATING THE CHARGING OR DISCHARGING OF, THE RECEPTACLE
.Nongravity discharging means
..Including one or more driven conveyers located within or partly within receptacle for making initial pickup of material
326 ...At least one of screw type
327 ...At least one of endless type
328 .Gravity discharge of a gated, static receptacle to one or more vehicle-mounted receivers
329 ..Located on moving vehicle
331 MOVABLE RACK HAVING SUPERPOSED, CHARGE-SUPPORTING ELEMENTS, AND EXTERNAL MEANS FOR CHARGING OR DISCHARGING THE ELEMENTS
332 RECEPTACLE HAVING CHARGING OR DISCHARGING MEANS AND ADAPTED FOR RELOCATION FROM ONE TO ANOTHER OF A PLURALITY OF SITES OF INTERIM USE
333 LOADING OR UNLOADING A RAILWAY CAR BY UTILIZING THE TRACTOR OF A TRACTOR-TRAILER, LOAD-TRANSPORTING TYPE VEHICLE TO MANEUVER THE TRAILER, OR A PART THEREOF, ONTO OR OFF THE CAR
334 MOVING, WHEELED, LOAD-TRANSPORTING TYPE VEHICLE AND LOADING OR UNLOADING DEVICE THEREFOR, SUPPORTED AT LEAST IN PART INDEPENDENTLY OF THE VEHICLE AND TRAVELING THEREWITH DURING TRANSFER OF LOAD THEREBETWEEN
335 .Loading device having capability for controlling direction of output therefrom
336 .Suspendedly supported device
337 WHEELED, LOAD-TRANSPORTING TYPE VEHICLE UTILIZES ITS UNINTERRUPTED, FORWARD MOTION TO CAUSE AN EXTERNAL, LOAD-ENGAGING STRUCTURE TO REMOVE ITS LOAD
338 WHEELED, LOAD-TRANSPORTING TYPE VEHICLE UTILIZES ITS UNINTERRUPTED, FORWARD MOTION TO CAUSE AN EXTERNALLY SUPPORTED LOAD TO BE TRANSFERRED TO IT
339 WHEELED, LOAD-TRANSPORTING TYPE VEHICLES FORMING A TRAIN, AND LOADING OR UNLOADING MEANS THEREFOR, LOCATED AT LEAST IN PART THEREON
340 WHEELED, LOAD-TRANSPORTING TYPE VEHICLES AND MEANS FOR TRANSFERRING, OR ENABLING TRANSFER OF, LOAD FROM ONE VEHICLE TO ANOTHER
341 .By additional load-supporting vehicle for moving with load from one load-transporting type vehicle to the other
342 ..Additional vehicle comprises overhead traversing hoist
343 .With means on each vehicle cooperating to effect, or facilitate, transfer of load
344 .With driven load engaging device, supported at least in part externally of the vehicles, for moving load therebetween
345 .Means is confined to one of the vehicles
346 ..Means comprises tiltable load-supporting portion
347 ..Means comprises elevatable load-supporting portion traveling in path including vertical, rectilinear movement
348 ...Having portion suspended from vehicle on overhead way
349 WHEELED, LOAD-TRANSPORTING TYPE VEHICLE HAVING DRIVEN MEANS THEREON FOR REPOSITIONING LOAD SUPPORTING PORTION OF VEHICLE TO CAUSE OR FACILITATE MOVEMENT OF LOAD TO OR FROM AN EXTERNAL COOPERATING MEANS
350 .Load supporting portion pivotable about horizontal axis
351 .Cooperating means comprises or includes a conveyer
352 WHEELED, LOAD-TRANSPORTING TYPE VEHICLE HAVING DRIVEN MEANS THEREON FOR ENGAGING AND MOVING LOAD HORIZONTALLY, OR WITH HORIZONTAL COMPONENT, TO OR FROM AN EXTERNAL COOPERATING MEANS
353 .Cooperating means comprises or includes a conveyer
354 WHEELED, LOAD-TRANSPORTING TYPE VEHICLE AND EXTERNAL MEANS FOR SUPPORTING VEHICLE IN TOTO AND REORIENTING IT INTO LOAD-RELEASING ATTITUDE
355 .With driven carrier for receiving released load
356 ..Endless-type conveyer
357 .Vehicle of rail-guided type and track section having rails configured to tilt or invert vehicle as result of moving thereonto or progressing therealong
358 .Vehicle-holding member rollable along underlying support (i.e., axis of pivot of vehicle travels laterally)
359 .Vehicle-holding framework rotatable about fixed axis passing through framework and parallel to longitudinal axis of vehicle
360 ..Including movable element to clamp vehicle to framework
361 ...With rotation responsive moving means
362 .Pivotably movable structure, at least initially in underlying relation to vehicle
363 ..With means to agitate vehicle or its load
364 ..With means for shifting axis of pivot or tilt of structure in vertical direction
365 ...With means to affect exit of load from vehicle
366 ...Axis of pivot parallels longitudinal axis of vehicle
367 ..With means to retard or stop vehicle approaching structure
368 ..With means to guide departing load toward vehicle exit
369 ..With means to operate vehicle-mounted closure member
370 ..With nonaligned paths for approach and departure of vehicle
371 ..Axis of pivot or tilt of structure parallels longitudinal axis of vehicle thereon
372 ...With movable element to clamp vehicle to structure
373 LOAD-TRANSPORTING TYPE VEHICLE AND EXTERNAL MEANS COOPERATING IN THE LOADING OR UNLOADING THEREOF
374 .Means decelerates moving, wheeled vehicle, load continues to move and leaves vehicle
375 .Means agitates, shakes or vibrates wheeled vehicle or load therein to loosen load for departure from vehicle
376 .Involving movement of load by gravity from wheeled vehicle

LOAD-TRANSPORTING TYPE VEHICLE AND EXTERNAL MEANS COOPERATING IN THE LOADING OR UNLOADING THEREOF
.Involving movement of load by gravity from wheeled vehicle
377 ..Means initiates unloading of vehicle of type having load body, or other load holding means, suspended therefrom
378 ...Bottom unloading body
379 ....Bucket-like body having horizontal, reciprocable movement, and flexible strand means for driving it in at least one direction
380 .....Flexible strand means serves also as initiating means
381 ...Tilting body
382 ....About axis parallel to direction of vehicle travel
383 ..Means cooperates with motion of vehicle to reorient load body, relative to wheels, into load releasing attitude
384 ...By pivoting body about axis parallel to longitudinal axis of vehicle to unload from side
385 ..Means comprises driven device for raising one end of vehicle upwardly relative to other end thereof
386 ..Means comprises driven device for engaging and moving pivotable load body relative to remainder of vehicle
387 ..Means comprises device or structure for cooperating with motion of vehicle to initiate relocation of body component (e.g., floor or floor section, gate, etc.) thereof
388 ...Component comprises oppositely swinging, operatively interconnected gates
389 .Means comprises structure for cooperating with a maneuvering, wheeled vehicle to engage and acquire a load therefrom or to give up a load thereto
390 .Of driven type, for unloading a wheeled vehicle
391 ..Including load raising or lowering device
392 ...Having means for also moving load laterally
393 ....With flexible, load-underlying element or surface
394 ....With bucket or scoop-type holder
395 ..Including load pushing or pulling device
396 ...With additional means for aligning vehicle and an external load support
397 .Means comprises repositionable supporting and/or guiding structure (e.g., chute) for conducting load moving by gravity to a wheeled vehicle
398 .Power-driven conveyer for loading a wheeled vehicle
399 .Raising or lowering device of driven type for loading a wheeled vehicle
400 .Pushing or pulling device for loading a wheeled vehicle by exerting a generally horizontal force on load
401 .Means serves to align wheeled vehicle and load receiving or relinquishing structure
402 .Means comprises stationary guide or fixed anchor for cooperating with loading or unloading means located, at least in part, on wheeled vehicle
403 DEVICE FOR EMPTYING PORTABLE RECEPTACLE
404 .For emptying contents thereof into portable receiving means
405 ..By inverting both receptacle and receiving means in order to transfer contents from one to other
406 ..Having receiving means mounted on wheeled vehicle
407 ...With closure for receiving means and receptacle-responsive operating means for closure
408 ...Device includes vertically swinging arm and receptacle support pivotably attached thereto
409 ...Device includes track-guided, receptacle-supporting carrier
410 ...Device includes haulage cable
411 .With container opening means
412 ..Rupturing or cutting type
413 .Successive dumping from conveyed stack
414 .With gate or closure-type discharge control means
415 .With jarring means
416 .Nongravity type
417 ..Ejector
418 .Orienting endless, roller or gravity conveyer
419 .Rotary cradle
420 ..Nonfixed pivot
421 ..Oscillated
422 .Elevator type
423 ..Differentially operated cables
424 ..Coacting catch or support
425 .Upending, e.g., rocking or tilting about end
799 APPARATUS FOR POSITIONING PLURAL ORDERLY ARTICLES ONTO PALLET
426 WHEEL AND WHEEL-TYPE ARTICLE HANDLER AND TRANSPORTER
427 .Elevator-type engaging means
428 .Vertically swinging article engager
429 .Opposed horizontally reciprocable engaging elements
430 .Ramp-type truck
431 ARTICLE ENGAGED BETWEEN ENDS FOR ROTATION AND ADVANCEMENT
432 .Driven, canted roll or ring
433 ARTICLE ROTATOR, ROLLER TYPE
434 MOTION OR DRAFT RESPONSIVE LOAD HANDLER AND TRANSPORTER
435 .Movably connected vehicle sections, e.g., articulated
436 ..Vertically swinging
437 .Ground engageable means
438 ..Lifting leg type
439 ..Wheel operated
440 ...Locked to wheel
441 ...Elevator type
442 ...Vertically swinging support
443 ....Cable and drum actuated
444 TILTING VEHICLE-TYPE HANDLER, I.E., PORTABLE GRAPPLE
445 .Article actuated engaging means
446 .Separable load rack
447 .Successive engaging means
448 .With band-type engager
449 .Flexible strand attached load gripper
450 .Opposed movable jaw grippers
451 ..Slidable
452 ..Toggle-type operator
453 .Single movable jaw gripper
454 ..With operating means
455 ..Adjustable
456 ...Slidable

	TILTING VEHICLE-TYPE HANDLER, I.E., PORTABLE GRAPPLE
457	.Rigid-type grapple engaging means, e.g., hooks
458	OPPOSED SHELF-TYPE ELEVATOR AND TRANSPORTER
459	.Load bridging vehicle
460	LOAD BRIDGING VEHICLE
461	.Removable transverse load support
462	VEHICLE ATTACHED AUXILIARY CARRIERS
463	.For rim, tire, or wheel
464	..Plural
465	..Movement about spaced pivot axes
466	..Simple arcuate or rectilinear movement
467	SELF-LOADING OR UNLOADING VEHICLES
468	.With load-receiving portion comprising horizontally disposed, rotatable cylinder
469	.With load-receiving portion, or significant section thereof, pivotable relative to horizontal
470	..Having axis of pivot parallel to longitudinal axis of vehicle for side loading or unloading
471	..Elevatable type
472	..Discharge gate-carried loading means
473	..Interrelated movements or drives for load body and loading means
474	..By adjustably attaching element of running gear (e.g., wheel, axle, etc.) to load-receiving portion, or support member (e.g., chassis, frame, etc.) therefor, to enable relative movement therebetween
475	...Element shiftable linearly toward front or rear of vehicle
476	...Pivotably
477	..Load-receiving portion also shiftable longitudinally
478	...With driven means to move load relative to portion
479	....Means serves also to shift portion in at least one direction
480	..Load-receiving portion includes means which extends longitudinally therefrom to form ramp when portion pivots
481	..Trailer-type vehicle and adjustable or removable tow-engaging structure associated therewith enabling lowering of forward end of vehicle for loading
482	..Trailer-type vehicle having load-receiving portion pivotable relative to at least one other component of vehicle
483	...About joint or other connection in structure (e.g., drawbar, frame, etc.) normally extending linearly, or planarly, from tow-engaging end of vehicle to axis of wheels of vehicle, and relative to said end
484	...About axis located between or adjacent to wheel sets of vehicle having plural, tandemly arranged sets of rear wheels, and relative to tow-engaging end of vehicle
485	...About axis of wheels of vehicle having two wheels, and relative to tow-engaging end of vehicle
486	..With means to raise load above load-receiving portion for deposit thereon or therein
487	...Including receptacle-like (e.g., bucket, scoop, etc.) holder for load
488	...Comprising driven conveyer
489	..With driven conveyer to receive load departing from pivoted load-receiving portion
490	..Two wheel, manually propelled vehicle pivotable about axis of wheels (e.g., hand truck) and provided with attendant-operated, load-handling means
491	..With driven means to move load relative to load-receiving portion
492	...Including pusher element
493	....Pivotably mounted element
494	...Including haulage cable
495	.Having elevating load body
496	..With traversing hoist
497	..With reciprocating conveyer, e.g., ejector type
498	.Separable load rack
499	..Conveyer operated
500	..Cable operated
501	.Successive handling means
502	..Power-driven conveyers
503	...Movably mounted
504	....Universally
505	....Pivotally
506	.Winch and idler-pulley-traversing haulage cable for ejecting load from vehicle
507	.Conveyer
508	..With worker support
509	..Comprising load-engaging element reciprocably movable parallel to generally horizontal load-supporting component of vehicle for ejecting load therefrom
510	...Three-dimensional load-receiving portion includes movable load-underlying surface, and element comprises upright member attached to surface
511	...Pusher moved by ram movable to different positions along load-supporting platform
512	...Plural pushers on same vehicle
513	...Pusher guide means
514	...Pusher moved by flexible means
515	....Connected to winch
516	....Connected to ram actuated by fluid pressure
517	...Pusher moved by ram actuated by fluid pressure
518	..Power-driven with cooperating handling means
519	..With gate means
520	...Multiple gates
521	..With movable upright plate
522	..Laterally movable rigid platform type
523	..Shiftable or removable conveyer unit
525.1	..Reciprocating type
525.2	...Compactor vehicle including compacting plate
525.3	....Reverse-flow ejection
525.4	.....Sequentially acting compacting plates or with closure over compacting plate
525.5	.....Compacting plate movable along controlled arc
525.51	......Including moving compacting plate pivot
525.52	.......Plate pivot moves rectilinearly
525.53	........With pivot-effecting hydraulic cylinder carried on pivot
525.54	.......Pivot carried by arm turning about fixed second pivot
525.55	....Sequentially acting compacting plates or with closure over compacting plate

SELF-LOADING OR UNLOADING VEHICLES
.Conveyer
..Reciprocating type
...Compactor vehicle including compacting plate
525.6 ....Rectilinearly reciprocating compacting plate
525.7 ...Vibratory
525.8 ....Detachable vibrator
525.9 ...Walking beam
526 ..Screw type
527 ..Flexible conveyer type
528 ...Endless
529 ..Load-engaging roller or rollerway
530 ...With means for locking roller against rotation
531 ...With separate means movable vertically between load supporting and retracted positions
532 ...Shiftably or removably supported on vehicle
533 ....Roller connected to support pivotally mounted on vehicle base
534 .....Support pivotal about horizontal axis
535 ....Vertically shiftable
536 ...With means for preventing movement of load relative thereto
537 ..Skidway
538 ...With haulage means (e.g., cable)
539 .Loading or unloading by other carrier or mover means, and the load movement thereof
540 ..Raising or lowering of load or load holder includes vertical, rectilinear movement
541 ...And carrier or mover includes means enabling additional movement having horizontal component
542 ....Hoist having traversing (i.e., horizontal) movement
543 .....Having boom pivotable about a vertical axis
544 ....Elevator with laterally shiftable guides
545 ...Carrier comprises movable component of load-receiving portion (e.g., tailgate, section of floor, etc.)
546 ..Raising or lowering of load or load holder includes curvilinear movement
547 ...Pivotable, telescopic arm imparts path of plural radii
548 ...Unloader actuated by gravity-influenced load
549 ...Carrier or mover includes means enabling additional movement of a rectilinear nature in a direction other than vertical
550 ...Carrier or mover includes means enabling additional movement about a vertical axis
551 ...Load holder located relative to vehicle in such manner as to accrue load during travel of vehicle
552 ....Carrier or mover pivots about axis parallel to longitudinal axis of vehicle
553 ....Load holder or portion thereof has additional axis of pivot relative to swinging arm-type carrier or mover
554 ....Load holder pivotable about lower edge of opening in end of load-receiving portion
555 ...With means to grasp load
556 ...Carrier comprises movable component of load-receiving portion
557 ....Tailgate
558 ...Carrier movable to storage position beneath vehicle
559 ..Loading by haulage cable imparting principally horizontal movement to load or load holder
560 TRAVERSING HOIST TYPE
561 .Traveling crane
562 ..Switch system
563 .Tow truck type
564 HOIST OR ELEVATOR AND ENDLESS OR ROTARY CARRIER
565 VERTICALLY SWINGING SHOVEL AND AUXILIARY CARRIER
566 .Vertically swinging shovel having an orbital path
567 VERTICALLY SWINGING LOAD SUPPORT AND ENDLESS OR ROTARY CARRIER
568 .For handling bottles
569 VERTICALLY SWINGING LOAD SUPPORT AND HOIST OR DRAG LINE
570 ENDLESS OR ROTARY CARRIER AND DRAG LINE SCOOP
571 SKIDWAY WITH HOISTING ROPE
572 LOAD-TRANSPORTING TYPE VEHICLE TO BE LOADED OR UNLOADED, OR EXTERNAL MEANS FOR THE LOADING OR UNLOADING, OR FOR COOPERATING THEREWITH, OF SUCH A VEHICLE
573 .Means includes driven carrier for receiving a load from a vehicle at an unloading station
574 ..Endless apron-type conveyer
575 .Means comprises device for changing the attitude of a vehicle, or its load body, relative to the horizontal for unloading by gravity
576 ..Framework for holding a vehicle, pivotable about fixed axis through framework parallel to longitudinal axis of vehicle
577 ..Pivotably movable structure for supporting a vehicle in toto, positioned, at least initially, in underlying relation thereto
578 ...With means for adapting structure to accomodate more than one length of vehicle
579 ...With fluid or mechanical friction brake to regulate movement of structure
580 ...With means for limiting longitudinal movement of vehicle on structure
581 ...Having axis of pivot parallel to longitudinal axis of vehicle
582 ..By raising one end of a vehicle relative to other end thereof
583 ...Including a vertically swinging, lifting member
584 .Means comprises device or member for moving or causing movement of either a vehicle or a load receiving or relinquishing structure for an alignment purpose
585 .Means includes a load-engaging surface or element for pushing load from vehicle
586 DEVICE OR ELEMENT ASSOCIATED WITH THE HANDLING OR MOVING OF A CHARGE FOR A HEATING-TYPE CHAMBER
587 .Charge leveler
588 ..Of rotary type
589 LOAD SUPPORT HAS LINEAR VERTICAL MOVEMENT AND ADDITIONAL MOVEMENT FOR ALIGNING AND MOUNTING LOAD AT A SPECIFIC LOCATION
590 .Additional movement is rotational

591	GUIDED HOIST WITH LOAD-SUPPORTING GRAB MEANS MOVABLE HORIZONTALLY BY MEANS WHICH SWINGS HORIZONTALLY OR MOVES LINEARLY
592	ELEVATOR OR HOIST AND LOADING OR UNLOADING MEANS THEREFOR
593	.Mail
594	.Load lowering, automatic return
595	.Inclined track
596	..Ditching type
597	...Pivoted track
598	..Tilting carrier
599	...Tilting track section
600	...Running out from base
601	....Return, buffer, or counterweight feature
602	...Return, buffer, or counterweight feature
603	...Skeleton or fork
604	..Outhaul feature
605	..Carrier running out from base
606	.Magnet and grab
607	.Convertible attachment
608	.Separable rack
609	.With external cooperating movable feeding or discharging means
610	..Elevator carrier movement responsive
611	...Vehicle handling
612	...Loading means
613	....Flow control mechanism (i.e., volume)
614	.....Trap chamber type
615	....Movable to feeding position over carrier
616	...Valved carrier
617	..Adjustably mounted discharge guide
618	.Grab
619	..Cantilevered type (e.g., industrial truck)
620	...Movable about horizontal axis
621	...Movable rigid jaw clamping type
622	....Horizontal support with coacting element or holddown
623	....Multiple article or rack type
624	..Clamshell
625	...Guided
626	..Suspended
627	..Suction gripper type
628	.Elevator wherein means comprises guide mounted for relative movement, and tiltable carrier thereon
629	..Portable (e.g., vehicle-mounted) elevator
630	.Elevator wherein means comprises guide mounted for relative movement
631	..Portable (e.g., vehicle-mounted) elevator
632	...Having one or more axes of pivotable movement
633	....Including vertical axis
634	....Single axis, horizontal and fixed
635	.....With fluid drive for movement thereabout
636	......And means for limiting the movement
637	..Having one or more axes of pivotable movement
638	...Single axis, horizontal and fixed
639	.Tilting carrier
640	..With operator-controlled tilting means
641	...Portable (e.g., vehicle-mounted) elevator
642	....Tiltable about axis perpendicular to direction of travel of portable elevator (e.g., forwardly tiltable)
643	..Sectional platform type
644	..Valved
645	..Latch release
646	...With carrier engaging cam means
647	...Cantilevered carrier
648	..Camming trackway
649	...Adjustable
650	...Yoke suspended carrier
651	..Tethered type
652	..Abutment or limit stop
653	...Swinging
654	...Engageable upon reversal or lowering of carrier
655	....Cantilevered carrier
656	...Carrier and guide supported cooperating elements
657	.Valved
658	..Cam or abutment operated
659	.Comprising device on carrier to move or carry load laterally thereto or therefrom
660	..Device raises load relative to carrier prior to moving it laterally
661	..Push-pull device
662	.Comprising means enabling additional movement of carrier or portion thereof relative to its support
663	..On portable (e.g., vehicle-mounted) elevator
664	...Carrier comprises spaced, elongated, horizontally coplanar, load-supporting members, at least one being movable
665	....Pivotable in horizontal plane
666	.....And otherwise movable therein
667	....Shiftable in horizontal plane perpendicularly to axis of elongation
668	..Carrier comprises spaced, elongated, horizontally coplanar, load-supporting members, at least one being movable
669	...Pivotable in horizontal plane
670	....And otherwise movable therein
671	...Shiftable in horizontal plane perpendicularly to axis of elongation
672	..Carrier comprises swingable or rotatable, load-underlying surface
673	.Return, buffer, or counterweight feature
674	.Automatic stop
675	COUNTING AIDS
676	ARTICLE SUPPORTED BY AIR AND MOVED BY MECHANICAL OR MANUAL MEANS
677	FEED TABLES FOR SHEARING MACHINES
678	LAND VEHICLE OR BOAT TILTING AND LIFTING DEVICES
679	VEHICLE WITH LOAD-RECEIVING PORTION AND MEANS FOR RELOCATING A LOAD THEREALONG OR THEREWITHIN
680	VERTICALLY SWINGING LOAD SUPPORT
681	.Track-supported rocker
682	..Horizontally swinging
683	.Cement mixer loader
684	.Coil handler
684.3	.Door removers
685	.Shovel or fork type
686	..With means to facilitate attachment of boom to vehicle
687	..Horizontally swinging
688	...Vertically adjustable
689	...Trolley supported pivoted handle
690	...Reciprocating handle
691	....Link supported
692	....Tilting
693	....Single cable for crowding and hauling
694	...Handle pivoted to boom
695	....Adjustable horizontal swing axis

	VERTICALLY SWINGING LOAD SUPPORT
	.Shovel or fork type
	..Horizontally swinging
	...Handle pivoted to boom
695.5	....Linear cylinder
695.6	....Flexible connector
695.7	....Rack and pinion
695.8	....Rotary motor
696	..Guided
697	..Tilting
698	...Including indicator
699	...Control means responsive to sensed condition
700	....To maintain pitch during swinging
701	....To stop tilting at selected angle
702	...Overshot type
703	...Swinging member attached to rear mounted draft member
704	...Including load ejector, striker, or retainer
705	...Laterally tiltable or shiftable shovel or fork
706	...During swinging to stabilize pitch
707	....On link mounted swinging support
708	....By hydraulic compensation
709	....By tensioned flexible connector
710	....By linkage pivoting on base support
711	.....Yoke mounted shovel or fork
712	.....Linkage extensible for other tilting
713	......Swinging support mounted linkage
714	...Induced by swing of swinging support
715	...By extensible link between load engager and swinging support
716	...Holdable in different pitch positions during loading
717	...On unlatching from swinging support
718	..Extensible support
719	..Return, buffer, or counterweight feature
720	...Spring
721	..Hay retainers
722	..Shovel, rake, handle, or boom structure
723	...With means to facilitate attachment of shovel or rake to handle or boom
724	...Handling device releasably attached to bucket or rake
725	...Means for ejecting load from shovel
726	...Shovel forming members pivoted relative to each other to dump load
727	...Handle body structure
728	.With rectilinear translation
729	.Grab
730	..Programmable or condition responsive means controls grab operation
731	..With auxiliary support for load
732	..Grab movable relative to its supporting arm
733	...Grab orientation maintained during supporting arm manipulation
734	....Grab suspended to swing freely
735	...Grab has swinging movement in plural planes
736	..Movable grab support has plurality of grabs attached thereto
737	..Grab is a suction or magnetic article engaging means
738	..Grab supported and moved by a pivotably mounted member
739	...Grab has pivoted jaw member
740	....With fixed jaw member
741	...Grab has reciprocating jaw member
742	.Nonfixed pivot
743	.Tilting carrier
744.1	HORIZONTALLY SWINGING LOAD SUPPORT
744.2	.Swinging about pivot
744.3	..And moving vertically
744.4	..Moving pivot
744.5	...Pivot swinging about second pivot
744.6	..And moving load support radially with respect to pivot
744.7	..And vertically reorienting load support
744.8	..With means to actuate load gripper
745.1	CYLINDRICAL BAR HANDLING DEVICE
745.2	.Vertical cylindrical bar
745.3	.Heat exchanger tube bundle handling device
745.4	.Pipe laying
745.5	..Vehicle having supporting wheel or wheel substitute
745.6	...Side boom supported hoist line
745.7	.Sequentially acting, diverse handling devices
745.8	..Changing orientation of cylindrical bar
745.9	..Including ramp and elevator means
746.1	...Oscillating or reciprocating elevator
746.2	....Oscillating
746.3	..Including means to rotate or allow rotation of bar about its axis
746.4	.Including ramp and retractable stop or ejector
746.5	.Engaging interior surface of pipe
746.6	.Comprising walking beam
746.7	.Comprising roller or endless belt
746.8	.Comprising carriage
749	HORIZONTAL LINEAR MOVEMENT
750	.Having indexing means
751	.Having gripper means
752	..By suction
753	..Gripper has pivoted jaw
754	ARTICLE REORIENTING DEVICE
755	.Article reoriented by contact with fluid means
756	.Article reoriented by flexible sling means
757	.Article frictionally engaged and rotated by relatively movable means (e.g., disc, endless belt, etc.)
758	.Article inverting means (i.e., 180 degrees turnover)
759	..Plural, driven turning means coact sequentially to invert single article
760	...Article slidably traverses sloping surfaces on a plurality of pivotally mounted turning means
761	..Inverter has plural means for receiving articles
762	...Having article inserting or discharging means
763	...Having article gripping means
764	..Encircling means inverts article
765	...Having article inserting or discharging means
766	...Having securing means movable into engagement with the article
767	...Encircling means moves about its transverse axis
768	..Article turned about one end supported by a fixed or rotatable abutment or by a surface frictionally retarding movement of the supported end
769	...Article turned about a rotatable abutment
770	...Article turned about a fixed abutment means
771	..Including coacting opposed movable arms
772	..Article moved about perpendicular axes
773	..Article received at one point and discharged at a different point

ARTICLE REORIENTING DEVICE
774 .Plural article turning members coact sequentially to reorient single article
775 ..Article deposited on stationary supporting surface intermediate sequential turning members
776 .Arm for orienting article is swingable about its transverse axis and is rotatable about its longitudinal axis
777 .Roller means circumferentially engages and supports orienter for rotation thereon
778 .Article support means rockable on fixed surface
779 .Article support means rotates about a shiftable pivot point
780 .Fixed member provides support for article reoriented while in contact therewith
781 .Article reoriented while fully supported by stationary supporting surface
782 .Article supporting carriage moved over fixed guideway to reorient article
783 .Orienter has article gripping means
784 .Orienter having article-supporting surface movable relative to article
785 LOAD-ENGAGING STRUCTURE OF ELEVATOR OR HOIST-TYPE DEVICE
786 PROCESSES
787 MISCELLANEOUS

CROSS-REFERENCE ART COLLECTIONS
****
922 ASSOCIATED WITH FORMING OR DISPERSING GROUPS OF INTERSUPPORTING ARTICLES (E.G., STACKING PATTERNS)
903 .With article-supporting fluid cushion
923 .Including support for group
924 ..Vertically shiftable
925 ...Shifted by change in weight thereon
926 ...Shifted by article repsonsive means
927 .Including means for supplying pallet or separator to group
928 ..Recirculates emptied pallet or separator
929 .Including means for collecting emptied pallet or separator
930 .Manual step utilized
931 .Bricks
932 .Audio or video cassettes
933 .Group formed or dispensed by reversible apparatus
934 .Nonconforming article diverted
900 .Adjust to handle articles or groups of different sizes
901 .Including article counter
902 .Including control for pattern of group
904 .With means to apply adhesive to article
905 .Having geneva drive for apparatus
906 .With article flap deflector
907 .Including means pressing against top or end of group
908 PERFORATED ARTICLE HANDLING
909 REMOTE CONTROL HANDLERS
910 HOLLOW CYLINDER HANDLERS
911 ROLL HANDLERS
912 COMBINED OR CONVERTIBLE IMPLEMENTS
913 HANDLERS WITH SPRING DEVICES
914 HANDLING VEHICLES WITH OVERHEAD GUARD FOR OPERATOR
915 HANDLER-TYPE TOYS
916 SHAFT MUCKING MACHINES
917 HANDLERS UTILIZING PARALLEL LINKS
918 TRANSMISSION-LINE GUIDE FOR A SHIFTABLE HANDLER
919 VEHICLE-CARRIED STORAGE MEMBER (E.G., PORTABLE SILO) AND MEANS FOR ERECTING MEMBER FROM ATTITUDE DURING TRANSPORT TO POSITION OF INTENDED USE
920 HANDLING DEVICE ON TRACTOR UNIT

CLASS 415 ROTARY KINETIC FLUID MOTORS OR PUMPS

DECEMBER 1990

1 METHOD OF OPERATION
2.1 WITH MEANS FOR CONTROLLING CASING OR FLOW GUIDING MEANS IN RESPONSE TO NATURAL FLUID CURRENT FORCE OR DIRECTION
3.1 .Having specific features for water current
4.1 .Natural fluid current force responsive
4.2 ..Vertical runner axis
4.3 ..Axial flow runner
4.4 .Vertical runner axis
4.5 .Axial flow runner
5 ENDLESS FLEXIBLE RUNNER (E.G., CHAIN, ETC.)
6 CYCLICALLY DIPPING, LIQUID RETAINING, ELEVATING AND DISCHARGING RECEPTACLE OR CONDUIT
7 FLOAT SUPPORTED OR BUOYANT RUNNER
8 DRIVEN, FLUID IMMERSED RUNNER WITH VANE IN UNCONFINED FLUID STREAM (E.G., TROLLING PLATE, ETC.)
9 INCLUDING DESTRUCTIBLE, FUSIBLE, OR DEFORMABLE NON-REUSABLE PART
10 WITH CONTROL MEANS RESPONSIVE TO MOTION DEVELOPED FLUID EDDY, ELECTRICAL, OR MAGNETIC EFFECT
11 WITH PUMP RECIRCULATION PASSAGE CONTROL RESPONSIVE TO WORKING FLUID CONDITION OR CHARACTERISTIC
12 WITH BIMETALLIC BLADE, VANE, OR ADJUSTMENT MEANS THEREFOR
13 WITH CONTROL MEANS RESPONSIVE TO NON-CYCLIC CONDITION SENSING, CENTRIFUGAL ACTUATION OR TORQUE
14 .Casing, runner, or shaft position or extent of motion responsive
15 .With input signal of independent condition
16 .With testing means for speed control
17 .Plural diverse condition responsive (e.g., temperature and pressure, speed and level, etc.)
18 .Control of clutch or brake surface
19 .Including control of starting motor or runner blade starting position
20 .Control of working fluid and diverse apparatus part
21 ..Diverse part is runner portion or connection to shaft
22 ...Runner bypass from inlet controlled
23 .Responsive to working fluid discharge angle from blade or vane
24 .Responsive to liquid level or weight
25 .Centrifugally initiated valve controlling fluid flow in shaft or runner
26 .Responsive to moving member developed fluid force, current or pressure
27 ..Of relief valve in branched pump discharge line
28 ..Of valve bypassing runner stage
29 ..Motor and upstream working fluid flow control
30 .By shaft speed or torque responsive means
31 ..Helix or screw runner
32 ..Including reset or manual adjustment
33 ..Of adjustable runner, blade, shaft or bearing
34 ...Axially shifted runner, shaft or bearing
35 ..Of movable deflector intermediate jet discharge and runner
36 ..Of working fluid valve or vane
37 ...Including valve in interstage or re-entry passage
38 ...Plural passages with sequential or reverse fluid control
39 ....Inlet and relief or bypass valves
40 ....Fluid motor operated valve
41 ...With latch means for valve actuator
42 ...Actuated by runner or separate motor
43 ....Fluid servo-motor and speed responsive means actuated pilot valve
44 ...Multiple working fluid inlets to runner
45 ....On same radial plane with blade
46 ...Downstream of runner
47 .Temperature or fluid force responsive member
48 ..For adjustment of runner, shaft, vane or blade
49 ..Fluid force responsive member controls working fluid
50 ...For a plurality of runners
51 WITH INDEPENDENTLY OPERATED TIMER OR PROGRAMMER ACTUATOR FOR WORKING FLUID CONTROL
52.1 WITH MEANS FOR RE-ENTRY OF WORKING FLUID TO BLADE SET (E.G., RE-ENTRY TYPE DEVICE, PASSAGE, ETC.)
53.1 .Cross flow runner
53.2 ..Having vane or deflector within runner blade set
53.3 ..Having selectively adjustable vane or working fluid control means
54.1 .To opposite face of blade
55.1 .Turbine regenerative pump
55.2 ..Having specific means to deflect working fluid in regenerative passage
55.3 ...Means extends parallel to passage
55.4 ...Positioned at passage end (e.g., stripper seal, etc.)
55.5 ..Having plural, rigidly related blade sets
55.6 ...Acting serially but nonalternating (e.g., multistage, etc.)
55.7 ...In separate regenerative passages
56.1 .Pump priming means
56.2 ..Vertical runner shaft
56.3 ..Having plural and arcuately arranged vanes around runner
56.4 ..Re-entry through working fluid discharge passage for runner
56.5 ..Re-entry working fluid joins inlet working fluid upstream of runner
56.6 ..Walled pumping chamber positioned within liquid separation chamber
57.1 .Plural, independent, serially acting re-entry means
57.2 ..Having additional blade set in re-entry path
57.3 ..Re-entry from opposite sides of blade face
57.4 ..Re-entry into blade in radial plane of blade
58.1 .Having additional blade set in re-entry path
58.2 .Radial flow runner portion guides re-entry working fluid (e.g., hub, back plate, etc.)
58.3 ..Runner inlet shroud
58.4 .Re-entry working fluid joins inlet working fluid upstream of runner
58.5 ..Axial flow runner
58.6 .Open recirculation from and to blade set
58.7 .Axial flow runner
59.1 .Plural blade sets
60 PLURAL RUNNERS SUPPORTED FOR RELATIVE MOTION OR ON SEPARATE SHAFTS
61 .With means for selective runner operation or drive shaft connection

	PLURAL RUNNERS SUPPORTED FOR RELATIVE MOTION OR ON SEPARATE SHAFTS
62	.Diverse type runners, blade systems or working fluid paths in runners
63	..Including internally passaged runner with reaction type jet discharge nozzle
64	.Radial flow through concentric radially spaced blade rows
65	.Interdigitated, oppositely extending, coaxial, axially spaced blade rows
66	.Serially spaced in working fluid flow path
67	..With initial fluid flow path to each runner
68	..Coaxial runners
69	...One runner support surrounds another
70	RUNNER HAS PLANETARY MOTION OR ROTATES AROUND OBLIQUE OR CONSTANTLY MOVING AXIS
71	RUNNER HAS SPIRALLY ARRANGED BLADE OR FLUID PASSAGE
72	.Extending along runner axis (i.e., axial flow)
73	..Fluid conducting passage
74	..With additional impingement means in fluid flow path
75	..Motor runner
76	FLUID FLOW BETWEEN PLURAL SINUOUS RUNNER SURFACES
77	AXIAL FLOW RUNNER WITH BLADES EXTENDING RADIALLY INWARD AND OUTWARD FROM COMMON ANNULUS
78	.With means selecting only one blade row for working fluid flow
79	.Serial flow through inward and outward extending blade rows
80	MOTOR RUNNER MOTIVATED BY REACTION TYPE JET DISCHARGE NOZZLE FROM INTERNAL WORKING FLUID CONDUIT
81	.With additional rotary, fluid impinged blades
82	.With control of runner speed or direction
83	RUNNER WITH ANNULAR BLADE ROWS OR FLUID CHANNELS SPACED ON COMMON RADIAL PLANE
84	.Including peripheral blade row
85	.With means for reversing runner rotation
86	.Blades projecting axially from plural transverse runner faces
87	..From opposed faces of common central disc
88	PUMP HAVING ROTATING INLET END OR SCOOP IMMERSED IN LIQUID
89	CENTRIFUGAL BOWL PUMP
90	SMOOTH RUNNER SURFACE FOR WORKING FLUID FRICTIONAL CONTACT (E.G., UNBLADED RUNNER, ETC.)
91	ANNULAR RUNNER WITH INWARDLY PROJECTING BLADE
92	MOTOR RUNNER HAVING WORKING FLUID TRAPPING POCKET
93	AXIALLY OPPOSED WORKING FLUID PATHS TO OR FROM RUNNER (E.G., END BALANCE, ETC.)
94	.With working fluid regulation or control means
95	..For fluid motor
96	.With additional shaft connected end balancing fluid force reactor surface
97	.Pump impeller means
98	..Impeller blades extending from opposite sides of common central support
99	..Plural axially spaced impellers
100	...Serially arranged in working fluid path
101	.Plural, separate, parallel, simultaneous flow paths
102	..Towards each other and common exhaust
103	..Plural, axially spaced blades in each path
104	WITH SHAFT CONNECTED FLUID FORCE SUBJECTED THRUST BALANCING SURFACE
105	.In separate chamber having non-system fluid inlet
106	.Fluid force on opposite face of blade or blade support member
107	.Motor shaft
108	CASING AND SPACED HOUSING WITH SPACE VENTED TO WORKING FLUID
109	WITH SHAFT CONNECTED FLUID ABUTMENT MEMBER IN SEALING FLUID FILLED CHAMBER
110	WITH LUBRICATING, SEALING, PACKING OR BEARING MEANS HAVING INTERNAL WORKING FLUID CONNECTION (E.G., FLUID OR FLUID BIASED SEAL, ETC.)
111	.For shaft sealing, packing, lubricating or bearing means
112	..With inlet and outlet connections
113	..Fluid biased, movable or resilient portion
114	WITH CHANGING STATE CONFINED HEAT EXCHANGE MASS
115	WITH PASSAGE IN BLADE, VANE, SHAFT OR ROTARY DISTRIBUTOR COMMUNICATING WITH WORKING FLUID
116	WITH DIVERSELY ORIENTED INLET OR ADDITIONAL INLET FOR DIVERSE FLUID (E.G., HEATING, COOLING OR MIXED WORKING FLUID, ETC.)
117	.Diverse fluids to motor
118	WITH INSPECTION, SIGNALING, INDICATING OR MEASURING MEANS
119	WITH SOUND OR VIBRATORY WAVE ABSORBING OR PREVENTING MEANS OR ARRANGEMENT
120	CENTRIPETAL PUMP
121.1	WITH CUTTER OR COMMINUTOR FOR DEBRIS IN WORKING FLUID
121.2	WITH SEPARATING MEANS OR GUARD FOR SOLID MATTER IN WORKING FLUID (E.G., DEBRIS, ETC.)
121.3	COMBINED
122.1	INCLUDING SHAFT TRANSMISSION TRAIN, BRAKE, CLUTCH, OR ATTENDANT ACTUATED DRIVE MEANS
123	.Brake or clutch
124	.Hand or foot operated crank, pedal or traction wheel
124.1	.Runner supported portion engages shaft transmission train (e.g., peripheral gear drive, etc.)
124.2	.Shaft transmission train having flexible means or coupling
125	INCLUDING MEANS TO CAUSE CYCLICAL MOVEMENT OF A PART (E.G., BLADE, VALVE, ETC.)
126	INCLUDING CASING PART SELECTIVELY MOVABLE RELATIVE TO FIXED SUPPORT
127	.Circularly around fixed runner axis
128	.Separate liner portion
129	RUNNER OR BLADE SELECTIVELY ADJUSTABLE RELATIVE TO CASING
130	.Relatively angularly adjustable plural blades or runners
131	.Axially adjusted
132	..Shaft end supported on movable bearing
133	.Radially adjusted or centered shaft
134	INCLUDING THERMAL EXPANSION JOINT
135	.Resilient
136	.Radially sliding
137	..Stator vane in shroud ring opening
138	..And axial or circumferential expansion
139	.Circumferentially spaced nozzle or stator segments

140	RESILIENT OR MOVABLY MOUNTED BLADE PORTION OR AXIALLY MOVABLE RUNNER OR SHAFT
141	.Yieldingly or pivotedly mounted or flexible blade
142	SHAFT BEARING COMBINED WITH OR RETAINED BY ARM OR VANE IN SURROUNDING WORKING FLUID SPACE
143	PLURAL RUNNERS HAVING DIFFERENT TYPE FLOW PATHS
144	WORKING FLUID BYPASS
145	.Selectively adjustable vane or working fluid control for bypass
146	INCLUDING WORKING FLUID FORCE RESPONSIVE VANE OR FLOW CONTROL
147	.Upstream of runner
148	SELECTIVELY ADJUSTABLE VANE OR WORKING FLUID CONTROL MEANS
149.1	.Separate means upstream and downstream of blade set
149.2	..Including axial flow blade set
149.3	...Means to reverse flow through blade set
149.4	...Plural, selectively adjustable, alternating vane assemblies and blade rows (A,B,A,B)
150	.Runner, shaft, or separate motor operated
151	.Upstream of runner
152.1	..Motor runner with selective inlet paths for reversible rotation
152.2	...Runner includes radial flow blade set
153.1	...Separate runner blade set acted upon for reverse rotation
153.2	....Axial flow blade set
154.1	...Plural inlets simultaneously discharging working fluid onto single blade set
154.2	....Axial flow blade set
154.3	...Including axial flow blade set
155	..Plural, independently adjustable
156	..Deformable, resilient or resiliently biased
157	..Single, axially movable cylinder or plate
158	...Movable to position surrounding blade
159	..Plural and arcuately or circularly arranged around runner axis
160	...Individually pivoted vanes
161	....And fixed vane
162	....Plural, selectively adjustable vane sets
163	....Pivoted parallel to runner axis
164	.....Vanes and blade in same radial plane
165	...On same radial plane with blade
166	....Circumferentially movable around shaft
167	..Movable pipe or nozzle
167.1	..Convertible series-parallel pump
168.1	INCLUDING MEANS FOR HANDLING WORKING FLUID LEAKAGE
168.2	.Leakage through seal between runner or shaft and static part
168.3	..Screw type pumping seal
168.4	..Means specific to axial flow runner
169.1	INCLUDING MEANS FOR HANDLING PORTION SEPARATED FROM WORKING FLUID
169.2	.Moisture or liquid separated from gaseous working fluid e.g., condensate removal, etc.)
169.3	..Vane having specific moisture or liquid directing surface
169.4	..Axial flow blade set and area for collecting moisture or liquid thrown radially outward
170.1	BEARING, SEAL, OR LINER BETWEEN RUNNER PORTION AND STATIC PART
171.1	.Dynamically created seal
172.1	.Means to seal radial flow pump runner inlet from outlet
173.1	.Between blade edge and static part
173.2	..Selectively adjustable
173.3	..Resilient, flexible, or resiliently biased
173.4	..Erodable or permanently deformable
173.5	..Labyrinth seal
173.6	.Between blade supported radial tip ring and static part
173.7	.Between axial flow runner and vane or vane diaphragm structure
174.1	.Selectively adjustable
174.2	.Resilient, flexible, or resiliently biased
174.3	..Seal lies against axial face of runner hub
174.4	.Erodable or permanently deformable
174.5	.Labyrinth seal
175	INCLUDING ADDITIONAL MEANS CAUSING OR CONTROLLING FLUID FLOW FOR HEAT EXCHANGING, LUBRICATING OR SEALING
176	.Means subjected to or is working fluid
177	INCLUDING HEAT INSULATION OR EXCHANGE MEANS (E.G., FINS, LAGGING, ETC.)
178	.Working fluid on at least one side of heat exchange wall
179	..Interstage heat exchanger
180	.Cooling fluid contacts shaft, seal or bearing
181	MEANS, DISPOSITION OR ARRANGEMENT FOR CAUSING SUPERSONIC WORKING FLUID VELOCITY
182.1	WORKING FLUID PASSAGE OR DISTRIBUTING MEANS ASSOCIATED WITH RUNNER (E.G., CASING, ETC.)
183	.Plural distributing means immediately upstream of runner
184	..Inlet scrolls, or distributors within inlet scroll
185	..Arcuately or circularly arranged around runner axis
186	...On radial plane with runner blade
187	....Plural, axially spaced sets of distributors
188	....Radially inward of blade
189	...Removably secured or mounted in casing
190	....Axially arranged securing or mounting means
191	...Vanes
192	....Differentially twisted about radial axis
193	....Plural, axially spaced vane sets
194	.....Diverse size or spacing in different spaced vane sets
195	....Varied spacing between vanes in same set
196	.Passage or casing attached removable liner or wear member
197	..Nonmetallic material
198.1	.Plural rigidly related blade sets
199.1	..Including serial radial flow blade sets and intermediate stationary flow diverter(s)
199.2	...Wherein the diverter includes divider vane(s) between the blade sets
199.3	....Including spirally configurated vane(s)
199.4	..Including an axial-flow blade set
199.5	...Plural serial axial-flow blade sets with intermediate stationary flow diverter(s)
199.6	...And radial-flow blade set in series therewith
200	.Specific casing or vane material

WORKING FLUID PASSAGE OR DISTRIBUTING MEANS ASSOCIATED WITH RUNNER (E.G., CASING, ETC.)
201 .Access opening through portion of casing or cover
202 .Nozzle discharging onto motor runner
203 .Casing having tangential inlet or outlet (i.e., centrifugal type)
204 ..Scroll-type casing
205 ...Inlet scroll
206 ..Axially directed inlet and tangential outlet
207 .Pump outlet or casing portion expands in downstream direction
208.1 .Vane or deflector
208.2 ..Plural and arcuately or circularly arranged in radial plane around runner axis
208.3 ...Plane intersects with runner blade
208.4 ....Plural, radially spaced vane sets
208.5 ....Nonradial flow runner
209.1 ...Plural, axially spaced vane sets acting successively or having specific spacing means
209.2 ...Having means for mounting diaphragm or plural vane holder to casing
209.3 ...Having specific vane mounting means
209.4 ....Vane fixed between radially separate surfaces
210.1 ...Fixed between radially separate surfaces
211.1 ..In radial plane with runner blade
211.2 ..Downstream of runner
212.1 .Scroll or helical type casing with specific exit nozzle
213.1 .Casing with mounting means
214.1 .Casing having multiple parts releasably clamped (e.g., casing seal, etc.)
215.1 .Casing having multiple parts welded, cemented, or fused
216.1 .With runner shaft of specific shape or material
217.1 .With runner having corrosion resistant or nonmetallic portion
218.1 .With runner having conical hub including small diameter facing upstream
219.1 .Casing with axial, conical flow runner
220 .Casing with axial flow runner
221 ..Having specific features for liquid flow
222 ..Pump with casing narrowing to runner
223 ..Having runner in orifice of radially extending partition or casing element
224 .Casing with nonradial flow runner (e.g., circumferential flow, etc.)
224.5 .Radial flow casing having vaneless annulus diffuser
225 .Exit chamber in radial plane axially offset from runner (e.g., sludge pump, etc.)
226 .Annular exit chamber outward of runner
227 .Runner having flow confining continuous passage
228 .Runner having full circular shroud for blades
229 BEARING, SEAL, OR LINER BETWEEN SHAFT OR SHAFT SLEEVE AND STATIC PART
230 .Seal
231 ..Resiliently biased

900 ROTARY BLOOD PUMP
901 DRILLED WELL-TYPE PUMP
902 ROTARY PUMP TURBINE PUBLICATIONS
903 WELL BIT DRIVE TURBINE
904 TOOL DRIVE TURBINE (E.G., DENTAL DRILL, ETC.)
905 NATURAL FLUID CURRENT MOTOR
906 .Having specific features for water current
907 .Vertical runner axis
908 .Axial flow runner
909 AIR STACK OR SHAFT HAVING NATURAL FLUID CURRENT MOTOR
910 REVERSIBLE BETWEEN PUMP AND MOTOR USE
911 PUMP HAVING REVERSIBLE RUNNER ROTATION AND SEPARATE OUTLETS FOR OPPOSING DIRECTIONS OF ROTATION
912 INTERCHANGEABLE PARTS TO VARY PUMPING CAPACITY OR SIZE OF PUMP
913 INLET AND OUTLET WITH CONCENTRIC PORTIONS
914 DEVICE TO CONTROL BOUNDARY LAYER
915 PUMP OR PORTION THEREOF BY CASTING OR MOLDING
916 PERPETUAL MOTION DEVICES

CLASS 416 FLUID REACTION SURFACES (I.E., IMPELLERS)

DECEMBER 1990

1 METHOD OF OPERATION
2 HAVING FRANGIBLE OR FUSIBLE PART OR CONNECTION
3 ACTUATION DIRECTLY RESPONSIVE TO MAGNETIC OR ELECTRICAL EFFECT
4 ROTARY SKIN FRICTION TYPE (E.G., MAGNUS ROTOR, ETC.)
5 WITH ILLUMINATION MEANS
6 DRIVEN BY PULSATING OR DIVERSE WORKING FLUID
7 WORKING MEMBER SUPPORTED ON ENDLESS FLEXIBLE CARRIER
8 .Feathering blades
9 WITH MEANS POSITIONING FLUID CURRENT DRIVEN IMPELLER RELATIVE TO FLOW DIRECTION
10 .Offset relative to flow direction
11 ..Upstream pivotal mounting
12 ..Responsive to folding or feathering of flow-aligned vane
13 ..Horizontal deflection relative to flow-aligned vane
14 ...With impeller brake or stop
15 ...And responsive to transverse vane
16 ...Biased to position by weight of parts
17 .Feathering cycle related to flow direction
18 WITH GYROSCOPIC REFERENCE MEANS FOR ROTOR CONTROL
19 SINGLE BLADE ROTARY IMPELLER WITH COUNTERBALANCE
20 R DRIVE BY FLUID REACTION JET ON WORKING MEMBER
20 A ..Articulated or flexible connection
21 .Combustion chamber carried by member
22 ..Air-ingestion rotor tip unit
23 WITH MEANS MOVING WORKING FLUID DEFLECTING WORKING MEMBER PART DURING OPERATION (E.G., AILERON, ETC.)
24 .Cyclic movement of member or part
25 INTERRELATED CONTROLS FOR IMPELLER AND DRIVE MEANS
26 .Pitch adjustment related to drive brake or clutch operation
27 .Pitch adjustment and throttle regulation with condition sensing means
28 ..Temperature responsive control
29 ..Drive engine intake air responsive control
30 ..Electrical control or sensing means
31 WITH CONTROL MEANS RESPONSIVE TO NON-CYCLIC CONDITION SENSING, CENTRIFUGAL ACTUATION, TORQUE OR THRUST
32 .Control of drive brake or clutch
33 .Plural distinct impellers having related control
34 ..Synchronizing
35 .With electrical means comparing and reducing error related to preset datum
36 .Plural diverse condition responsive
37 ..Relative ambient condition sensing (e.g., temperature, density, wind force, etc.)
38 ..Drive engine condition excluding shaft speed or torque
39 .Temperature or icing condition responsive
40 .Responsive to relative working fluid velocity
41 ..Natural fluid current
42 .Pressure or altitude responsive
43 .Responsive to condition of torque or thrust of device or driving or driven means or mechanism
44 .Impeller rotation speed responsive
45 ..Valve element directly movable by centrifugal force
46 ..Including pitch lock or adjustable stop
47 ..Control by means of separate motor
48 ...Motor carried by impeller
49 ..Including reset or manual override of control
50 ...Of centrifugal weight governor
51 ..Centrifugal mass moved along guided or lineal path
52 ..Centrifugal mass coaxial with impeller
53 ...Pivot axis parallel to rotation axis
54 OPERATED BY ART DEVICE
55 .Vehicular device
56 .Runner supported rocking device
57 ..Inertial actuation
58 ..Continuous impeller rotation
59 .Pivot supported swinging device
60 .Integral with or directly attached to rotary device or part (e.g., flywheel, pulley, etc.)
61 WITH MEASURING, TESTING, SIGNALLING OR INSPECTION MEANS
62 REMOVABLE AUXILIARY ATTACHMENT TO WORK SURFACE
63 AMBULANT, BODY SUPPORTED OR WITH CARRYING HANDLE
64 TRANSLATORY REACTION MOTION
65 .And concurrent rotary reaction motion
66 .Flexible or relatively movable working member or part
67 ..Valve type
68 ..Complemental pivoted surfaces
69 OPERATOR SUPPORTED MANUALLY ACTUATED TYPE
70 R .Operation solely by direct hand manipulation
70 A ...Fans
71 ..Simulation or having indicia, ornamentation or combined feature
72 ..Relatively movable portions
73 ...Arcuate planar folding of working surface
74 .Fulcrum support type (e.g., oar, scull, etc.)
75 .Reciprocatory pin-slot actuator
76 .Rotary hand crank (e.g., egg beater, etc.)
77 ..Intermeshing or interdigitated working members
78 CRANK TYPE DIPPING OR STIRRING MOTION
79 OSCILLATORY REACTION MOTION
80 .With pendulum, counterbalance or inertial weight
81 .Flexible working member
82 .Relatively movable working member portions
83 .Compound motion (e.g., feathering, undulating, etc.)
84 BUOYANT OR INFLATABLE WORKING MEMBER
85 FLOAT SUPPORTED
86 .Buoyant hub or rim
87 RADIALLY EXTENSIBLE OR RETRACTIBLE ROTOR WORKING MEMBER
88 .Variable work surface or non-rigid connection
89 .Having pitch adjustment
90 R WITH FLUID PASSAGE IN WORKING MEMBER COMMUNICATING WITH WORKING FLUID
90 A ..Air and watercraft propellers
91 .Both inlet and outlet to working fluid
92 .Discharge solely at periphery normal to rotation axis
93 R AMBIENT FLUID OR EXHAUST GAS DIRECTED THROUGH HUB, FAIRING OR HOUSING
93 A ..Water or marine propellers
94 .Aircraft spinner or cowling

95	WITH HEATING, COOLING OR THERMAL INSULATION MEANS
96 R	.Changing state mass within or fluid flow through working member or carrier
96 A	...Blade inserts
97 R	..Flow exhausted to working fluid
97 A	....Laminated or porous skin
98	SUSTAINED ANCILLARY MOVEMENT OF ROTARY WORKING MEMBER (E.G., CYCLIC FEATHERING, ETC.)
99	.Intermounted rotary members
100	.Continuous rotor oscillation
101	.Cyclic radial movement
102	.Responsive to carrier tilt
103	.Lead-lag type rotor blade movement
104	..And additional correlated blade movement (e.g., pitch change, etc.)
105	..Positive means effecting lead-lag movement
106	..With movement restraining means (i.e., damping)
107	...Resilient bias or limit stop
108	.By actuator eccentric to rotation axis
109	..Stationary eccentric guide or track
110	.Continuous rotation about plural axes
111	..Motion about parallel axes
112	.Responsive to fixed actuator (e.g., cam or trip, etc.)
113	..Axial cam
114	...Selectively adjustable
115	....Plural impellers
116	..Stationary cam track or guide surface
117	.Responsive to gravity or working fluid force
118	..Having manual control or adjustment
119	..Motion about parallel axes
120	PLURAL IMPELLERS HAVING RELATIVE MOVEMENT OR INDEPENDENT SUPPORTS
121	.Shiftable support
122	.Intersecting or interdigitated paths of operation
123	.Divergent rotation axes
124	.Coaxial rotation
125	..Individual prime mover
126	..Concentric working members
127	..Concurrent adjustment
128	..Oppositely rotating impellers
129	...Engine driven
130	.Differential or independent adjustment
131	ARTICULATED, RESILIENTLY MOUNTED OR SELF-SHIFTING IMPELLER OR WORKING MEMBER
132 R	.Sectional, staged or nonrigid working member
132 A	...Flexible sheet or plate
132 B	...Windmills
133	.Axially displaceable rotary carrier (e.g., hub, etc.)
134 R	.Nonmetallic resilient mounting
134 A	...Aircraft rotors
135	.Resilient bias or mount
136	..Rotary working member pivotable solely about radial axis
137	...Convolute spring coaxial with impeller shaft
138	..With manual control means
139	.Including weight bias means
140	.Including movement limit stop or damping means
141	.Plural articulation
142	WORKING MEMBER FOLDABLE, PIVOTABLE OR COLLAPSIBLE TO NON-USE POSITION
143	.Member movement in rotation plane
144	WITH WEIGHT-BALANCING MEANS
145	.Self-shifting or selectively adjustable mass
146 R	COMBINED OR CONVERTIBLE
146 A	..Hub lubrication or seal
147	HAVING POSITIVE MEANS FOR IMPELLER ADJUSTMENT
148	.Tiltable carrier (e.g., hub, etc.)
149	.Shiftable carrier support
150	..Rectilinear motion
151	.Power derived from impeller shaft
152	..By brake application or release
153	.Having pitch lock or adjustable stop
154	..Fluid motor for impeller adjustment
155	.Motor bodily rotatable with impeller hub or shaft
156	..Fluid motor
157 R	...Coaxial with impeller shaft
157 A	.....Rotary fluid motor
157 B	.....Plural blade units
158	...Working member mounted or housed
159	.Power or manual actuator on non-rotatable part
160	..Planetary gearing connecting rotatable and non-rotatable parts
161	..Axially movable impeller
162	..Having motor
163	..Adjustment rod through entire impeller shaft
164	..Reciprocating sleeve or collar on or rod in impeller shaft
165	...Reciprocated by coaxial screw
166	...Rack-pinion connection to working member
167	...Pin-slot or cam-slot connection to working member
168 R	...Link connection to working member
168 A	.....Turbo-machine
169 R	HAVING CLUTCH OR BRAKE MEANS
169 A	..Engine cooling fans
170 R	SPECIFIC DRIVE OR TRANSMISSION MEANS
170 HM	..Hand mixers
171	.Impeller driven by fluid motor
172	.Alternating rotation
173	.Manual powered means
174	HAVING LUBRICATING, SEALING, PACKING OR SPECIFIC BEARING MEANS BETWEEN IMPELLER OR SHAFT AND STATIC PART
175	DIVERSE IMPELLERS OR WORKING MEMBERS
176	SPIRAL BLADE OR FLOW PASSAGE (360 DEGREE)
177	.Flow confining casing, shroud or passage
178	PERIMETRIC BLADING EXTENDING AXIALLY BETWEEN ANNULAR MEMBERS (E.G., SQUIRREL CAGE TYPE, ETC.)
179	ROTOR HAVING FLOW CONFINING OR DEFLECTING WEB, SHROUD OR CONTINUOUS PASSAGE
180	.Blades projecting axially from concavo-convex annular web
181	.Apertured or foraminous web or shroud
182	.Radially extending web or end plate
183	..Circumferentially or radially angulated or discontinuous blades or sections (e.g., stepped, etc.)
184	..Spaced intermediate ends of opposed axial flow impeller
185	..Circumferentially and radially continuous web or end plate
186 R	...Having opposed annular surface between adjacent blades
186 A	.....Adjustable blade or part
187	.....Angularly spaced, axially elongated blades (i.e., squirrel cage type)
188	...Conical web
189	.Axially extending shroud ring or casing
190	..Vibration inhibiting or expansion-contraction structure
191	..Segmental shroud
192	..Having radial flange
193 R	..Spaced inwardly of impeller periphery

	ROTOR HAVING FLOW CONFINING OR DEFLECTING WEB, SHROUD OR CONTINUOUS PASSAGE
	.Axially extending shroud ring or casing
	..Spaced inwardly of impeller periphery
193 A	....Root platforms
194	LASHING BETWEEN WORKING MEMBERS OR EXTERNAL BRACING
195	.Peripheral
196 R	.Connecting adjacent work surfaces
196 A	...Non-turbo machine (windmills)
197 R	CUPPED REACTION SURFACE NORMAL TO ROTATION PLANE
197 A	..Air and water motors (natural fluid current)
197 B	..Pelton wheels (impulse wheels)
197 C	..Torque converters
198 R	MULTIPLE AXIALLY SPACED WORKING MEMBERS
198 A	..Turbo machine
199	.Opposed axial flow
200 R	.Circumferentially offset
200 A	...Turbo machine
201 R	.Differing radii
201 A	...Non-turbo machine
202	PROJECTING BLADE AXIS OFFSET FROM ROTATION AXIS
203	UNSYMMETRICAL IMPELLER OR DISSIMILAR WORKING MEMBERS
204 R	SPECIFIC WORKING MEMBER MOUNT
204 A	..Turbo machine
205	.Adjustable
206	..Spring biased detent
207	..Blade releasably clamped
208	...Split impeller hub
209	..Thimble or sleeve fixed on impeller blade
210 R	.Distally supported on radial arm
210 A	...Turbo machine
211	..Axially extending blade
212 R	.Interlocking blades
212 A	...Turbo machine
213 R	.Welded, cemented or fused
213 A	...Non-turbo machine
214 R	.Blade held between separable surfaces
214 A	...Turbo machine
215	.Blade received by continuous circumferential channel
216	..Radially spaced ribs or grooves
217	..Divided blade root
218	..Having circumferentially extending binder
219 R	.Blade received in well or slot
219 A	...Non-turbo machine
220 R	..Having blade locking means
220 A	....Non-turbo machine
221	...Resilient or deformable
222	.Blade straddles carrier
223 R	SPECIFIC BLADE STRUCTURE (E.G., SHAPE, MATERIAL, ETC.)
223 A	..Turbo machine
223 B	..Radial flow devices
224	.Having wear liner, sheathing or insert
225	.Having spanwise compression means
226	.Formed with main spar
227 R	.Openwork (e.g., lattice, looped, etc.)
227 A	...Propeller and non-mixers
228	.Tined or irregular periphery
229 R	.Laminated, embedded member or encased material
229 A	...Turbo machine
230	..Wire, fiber, strand or fabric
231 R	.Apertured or permeable
231 A	...Mixers or agitators
231 B	...Slotted blade
232	.Hollow
233	..Having brace means bridging cavity
234	.Integrally shaped or blended into hub
235	.Irregular, flanged or channel forming blade surface
236 R	..Ribbed or grooved
236 A	....Concentric or circular ribs
237	..Angular or offset
238	.Cantilever blade
239	.Blade cuff or shank construction
240	.Flexible
241 R	.Coating, specific composition or characteristic
241 A	...Plastic or synthetic material
241 B	...Ceramic material
242	.Reverse curve surface
243	.Concave surface
244 R	SUPPORT MOUNTING, CARRIER OR FAIRING STRUCTURE
244 A	..Turbo machine
244 B	..Water or marine propellers
245 R	.Spinner or fairwater cap
245 A	...Water or marine propellers
246	.Selectively adjustable impeller mount
247 R	PROTECTIVE SCREEN OR GUARD
247 A	..Water or marine propellers
248	MISCELLANEOUS (E.G., BLADE ROOT OR ROOT BLOCK, ETC.)

DIG 9	Savonius

1 CONDITION RESPONSIVE CONTROL OF PUMP DRIVE MOTOR
2 .Plural pumps having separate drive motors, supply sources, or delivery destinations
3 ..Pumps in parallel flow paths with common inflow or outflow
4 ...Having means sensing condition in common inflow or outflow line
5 ....With control of plural pump drive motors
6 .....With additional means sensing condition of one pump or path
7 .....Sequential starting or stopping of pumps
8 ......Alternating sequences
9 .By stopping pump in response to leakage into or from system
10 .By controlling starter motor for internal combustion engine
11 .By controlling free piston internal combustion engine
12 .Having timer or delay means
13 .Responsive to pump lubricant, sealant, or coolant condition
14 .Having ambient condition responsive means
15 .With control of pump drive transmission
16 .With plural separate drive motors for single pump unit
17 .With plural separate drive motor controlling elements
18 .Single motor control element responsive to means sensing diverse conditions
19 ..Sensing both inlet and outlet conditions
20 ..One condition is rate of flow to or from pump
21 ..One is motive fluid condition of fluid drive motor
22 ..One condition is speed of pump
23 ...With common element sensing diverse condition to control motor and pump fluid valve
24 ...Speed sensor comprises auxiliary pump or electric generator
25 .Relatively movable elements sensing same system pressure for single control element
26 .With condition responsive control of pump fluid valve
27 ..Having independent means for delaying valve actuation
28 ..Fluid and motor controls have common sensing element
29 ..Fluid and motor controls separately responsive to diverse conditions
30 ...Liquid accumulation controlled discharge valve downstream of motor controller sensing means
31 ....Motor controller responsive to liquid pressure
32 .Responsive to pump or pump fluid temperature
33 .Pump stop control means requiring manual reset
34 .By controlling internal combustion drive engine
35 .By controlling wind motor in response to liquid accumulation
36 .Responsive to accumulation of pumped liquid in receiver
37 ..By movable liquid receptacle
38 ..By liquid pressure sensor
39 ..With motive fluid supply communicating with liquid receiver
40 ..By float
41 ...Controlling motive fluid or drive motor
42 .In response to pump speed
43 .Responsive to change in rate of pump fluid flow
44 .By control of electric or magnetic drive motor
45 ..By changing electrical characteristic of motor or motor circuit
46 .By controlling drive motor motive fluid
47 ..Rotary nonexpansible chamber type motor
48 ELECTRICAL OR GETTER TYPE
49 .Ionic with gettering
50 .Electromagnetic
51 .Getter heating, vaporizing, or regeneration
52 EXPANSION AND CONTRACTION OF PUMP FLUID
53 PROCESSES
54 .Of pumping one fluid by contact or entrainment with another
55 ..Specific motive fluid
56 DRILLED WELL FREE PISTON TYPE PUMP
57 .Having condition or position responsive control of pump discharge flow path
58 .Having condition or position responsive control of motive fluid supply
59 .Radially expansible piston portion controls pump and motor chamber intercommunication
60 .Mechanically actuated valve carried by piston
61 BUOYANTLY SUPPORTED
62 ALTERNATE SERIES OR PARALLEL OPERATION OF PLURAL PUMPS
63 WITH SIGNAL, INDICATOR, OR INSPECTION MEANS
64 GAS PRESSURE EXCHANGER USING ROTARY CELLULAR CONVEYER
65 ONE FLUID PUMPED BY CONTACT OR ENTRAINMENT WITH ANOTHER
66 .Contact or entrainment within rotary impeller
67 ..Passage in impeller shaft for pumped or motive fluid
68 ..Liquid ring
69 ...With diverse pump
70 ..Peripheral motive fluid inlet
71 ..Axial inlet for pumped fluid
72 ...Peripheral pumped fluid outlet
73 .By ignition of motive fluid
74 ..With pumped fluid condition responsive ignition means
75 ..With fluid momentum utilizing means
76 .Jet pump with motive fluid generating pump
77 ..Recirculation of separated motive fluid
78 ..Entrainment at exit of impeller
79 ..Jet delivers back to generating pump
80 ...Rotary nonexpansible chamber-type generating pump
81 ....Multiple-stage rotary pump
82 ....Changeable jet location (e.g., deep or shallow well)
83 ....Jet within rotary pump casing
84 ..Rotary nonexpansible chamber-type generating pump
85 .Diverse pumps
86 ..Including pneumatic displacement
87 ..Including jet pump
88 ...Diverse pump motor exhaust is jet motive fluid
89 ...With rotary nonexpansible chamber type
90 ..Including aerated column
91 ...Diverse pump motor exhaust is aeration fluid

	ONE FLUID PUMPED BY CONTACT OR ENTRAINMENT WITH ANOTHER
92	.Liquid piston
93	..Moving contracting chamber
94	...Helical chamber
95	...Movement of chamber cyclically controls flow of liquid into chamber for cyclic operation
96	...Liquid supporting chambers move liquid to pump fluid
97	...Relatively movable chambers
98	...Reciprocating
99	..Mercury piston
100	..Tide or wave
101	..Piston level responsive control for cyclic operation
102	...Plural chambers
103	..Plural chambers
104	..Momentum piston
105	.By condensation of motive fluid
106	..Plural alternating pumps
107	..With condition responsive control means
108	.Aerated column
109	..Valved gas inlet
110	...With pumped fluid velocity or flow responsive valve operating means
111	...Plural serially actuated valves
112	...With flexible pressure responsive sensing element (i.e., bellows, diaphragm, etc.)
113	....Sensing element controls pilot valve
114	...With pilot valve
115	...Valve member actuated responsive to absolute gaseous motive fluid pressure or flow rate
116	...Controlled by means responsive to liquid level accumulation in column
117	...Valve biased open by static pressure of pumped fluid
118	.Liquid pumped by supplying or exhausting gaseous motive fluid to or from pumping chamber
119	..Motive fluid pumped by contact with a liquid
120	..With condition responsive control of motive fluid vacuum or pressure generating means
121	..Serially connected pumping chambers
122	..Alternate pumping from plural pumping chambers
123	...Motive fluid in one chamber controlled by condition in second chamber
124	....Responsive to weight of pumped fluid
125	....Responsive to liquid level of pumped fluid
126	..With float actuated control means
127	...Plural floats in single pumping chamber
128	...With intermediate pilot valve
129	...With intermediate electrical actuating means
130	...Control of motive fluid inlet (e.g., atmosphere, etc.)
131	....With control of motive fluid outlet
132	.....With control of pumped fluid outlet
133	.....With overcenter valve actuator means
134	...Control of motive fluid outlet
135	....With control of pumped fluid outlet
136	....With control of pumped fluid inlet
137	..Cyclic pumping
138	...Control by liquid level sensing means
139	...Control by condition of pumped fluid
140	....Movable pumping chamber
141	....Responsive to flow of pumped fluid
142	....Responsive to pumped fluid pressure
143	...Motive fluid supply or exhaust valve responsive to motive fluid pressure
144	...Correlated motive fluid valve and pressure or vacuum generating means
145	...Correlated supply - exhaust of motive fluid or vacuum generating means
146	....With pilot valve
147	....Unitary supply - exhaust valve
148	..With vacuum generator
149	...With pressure generator
150	.Gravity flow motive fluid
151	.Jet
152	..Vapor condensation vacuum diffusion type
153	...With cooling or heat insulation means
154	...Vertical stack from generator with reverse flow nozzle
155	..Flue type
156	...With spark arrester
157	...Regulation
158	..With motive fluid generator
159	...Internal-combustion engine motive fluid source
160	..Cleaning by separate fluid or diverted motive fluid
161	..Radial disc-type motive fluid jet
162	..Interrelated overflow and motive fluid valves
163	..Successive introduction of motive fluid
164	...With interstage cooling
165	...Individually controlled motive fluid flows
166	....Sequential
167	...Central and peripheral motive fluid supply
168	...One motive fluid flow surrounds nozzle tube of another
169	...Laterally spaced parallel motive fluid flows
170	...In-line motive fluid flows
171	..Tangential motive fluid supply (i.e., vortex type)
172	..Concentric reverse flow motive fluid and discharge conduits
173	..With cooling
174	..Successive entrainment of pumped fluid
175	..With priming or overflow removal jet
176	..Parallel entrainments with separate combining tubes
177	..Annular motive fluid stream entrains pumped fluid outside and inside
178	..Selectively usable flow confining members (e.g., nozzles, combining tubes, etc.)
179	..Plural motive fluid jets or sources for single entrainment
180	...Individual or relative control
181	..Faucet or flexible hose attached
182	..Regulation
182.5	...Liquid level responsive
183	...By position of nozzle relative to combining tube
184	....Pressure controlled
185	...With main line downstream control
186	...By bypassing motive fluid from nozzle
187	...By controlling motive fluid
188	....Interrelated with pumped fluid control
189	....Pressure controlled
190	...Pumped fluid inlet valve
191	....Pressure controlled
192	...Pressure controlled overflow
193	....By movable conduit or conduit wall (e.g., combining tube)
194	..With means to whirl pumped fluid
195	..Specific material

ONE FLUID PUMPED BY CONTACT OR ENTRAINMENT WITH ANOTHER
.Jet
196 ..Expressed mathematically or dimensionally
197 ..Peripheral motive fluid supply
198 ..Specific motive fluid nozzle
199.1 DIVERSE PUMPS
199.2 .Priming and venting
200 .Priming with liquid level responsive control
201 .Including rotary nonexpansible chamber type
202 ..Diverse pump controlled by rotary pump condition
203 ..Preceding diverse pump
204 .Moving partition or cylinder of rotary pump forms or actuates reciprocating pump
205 .Series
206 ..Rotary expansible chamber type precedes reciprocating
207 BY HEATING OF PUMPED FLUID
208 .Vapor generator type
209 ..With inlet valve
210 PUMP FLUID BIASED OVERCENTER LOAD EQUALIZER
211 INERTIA-TYPE PUMPING MEMBER OR DRIVE MEANS
211.5 LIQUID LEVEL RESPONSIVE CONTROL OF DISPLACEMENT, VOLUMETRIC CAPACITY OR DRIVE TRANSMISSION
212 CONDITION RESPONSIVE CONTROL OF DRIVE TRANSMISSION OR PUMP DISPLACEMENT
213 .Having condition responsive pumped fluid control
214 .Having means to hold or resist movement of pumping element
215 .By changing phasing of plural pistons in single chamber
216 .Plural pumps with individual or relative control
217 .Reversible flow pump
218 .Adjustable cam or linkage
219 ..Radially adjustable stator
220 ...Rotary expansible chamber pump
221 ..Radial cam or eccentric
222 ..Axial cam
223 .Disconnectable drive element (e.g., clutch, belt, shifter, etc.)
225 INTENSIFIER
226 .Ram type
227 ..Multiple drive pipe
228 WITH CONDITION RESPONSIVE CONTROL OF COOLANT OR LUBRICANT
229 OPERATED BY ART DEVICE
230 .Chair
231 .Vehicle mounted or attached
232 ..Scoop type
233 ..Wheel or axle
234 AMBULANT, BODY SUPPORTED, OR WITH CARRYING HANDLE
235 .Pump driven by traverse movement
236 CONVERTIBLE TO APPARATUS OF A DIFFERENT CLASS
237 .Motor and pump
238 CHANGEABLE BY ASSEMBLY OR DISASSEMBLY
239 .For reverse drive or flow
240 INERTIA LIQUID PISTON (E.G., MOMENTUM, ETC.)
241 .Movable confining means
242 POSITION RESPONSIVE BYPASS BETWEEN PLURAL PUMP CHAMBERS
243 WITH INTERCOOLER
244 SUCCESSIVE STAGES
245 .Fluid motor for one stage supplied from another stage
246 .Stages driven by relatively movable motor working members
247 ..Rotary
248 .Parallel stages to or from single stage
249 .Prior stage delivers to atmospheric chamber
250 .With interstage intake or additional inlet to latter stage
251 .With interstage discharge or additional discharge from former stage
252 ..Pressure responsive interstage discharge
253 .Condition responsive control of fluid
254 .Reciprocating rigid stages
255 ..Crankcase forms stage or interstage flow path
256 ..Stages comprise oppositely moving valved pumping members
257 ...Aligned
258 ..Reciprocating cylinder and piston
259 ..Including valved piston
260 ...Piston forms or carries inlet and outlet valve for one stage
261 ...Serial interstage distributors in piston
262 ...Valve in piston is first stage inlet valve
263 ...With additional pumping member in parallel flow path
264 ...Fluid motor driven
265 ..Relatively movable
266 ..Three or more
267 ..Series double acting
268 ..Unidirectionally acting rigidly connected pumping members
269 THREE OR MORE CYLINDERS ARRANGED IN PARALLEL, RADIAL, OR CONICAL RELATIONSHIP WITH ROTARY TRANSMISSION AXIS
270 .Condition responsive fluid control
271 .Motor driven
272 .Continuous unidirectional fluid bias on reciprocating member
273 .Radial cylinders
274 CONDITION RESPONSIVE VARIABLE VOLUMETRIC CAPACITY EXPANSIBLE CHAMBER PUMP (I.E., CLEARANCE CONTROL)
275 .Valved clearance chamber
276 ..Connectable clearance chambers of opposed pump chambers
277 ..Plural chambers connected to single pump chamber
278 EXTERNAL CONDITION RESPONSIVE PUMPED FLUID CONTROL
279 WITH CONDITION RESPONSIVE PUMPED FLUID CONTROL
280 .Responsive to pump created drive motor condition
281 .Lubricant condition responsive
282 .Plural separate sensing means for a single fluid controller
283 .Bypass or relief valve controls venting by movable pump chamber part
284 .Bypass or relief valve carried by movable pumping member
285 .Valve passage directly connecting concurrently contracting and expanding non-rotary pump chambers
286 .Plural pump units with individual or relative control
287 ..Diverse capacity pumps
288 ..Sequentially operated separate relief or bypass passages
289 .Variable cutoff or pumping member controlled port
290 .Having timer or delay means for fluid controller

WITH CONDITION RESPONSIVE PUMPED FLUID CONTROL
291 .Reversibly driven pump having bypass active in either flow direction
292 .Pumped fluid temperature responsive
293 .Driven pump part speed responsive
294 ..Centrifugally actuated
295 .Inlet throttle or stop valve
296 .Bypass or relief valve part carried by or carries distributor part
297 .Expansible chamber pump distributor operation modified
297.5 ..Liquid level responsive
298 ..Inlet valve
299 .Normally open bypass or relief passage closed by increased pressure or flow
300 .Fluid flow rate responsive
301 .Inlet pressure increase opens bypass from pump inlet to discharge
302 .Plural paths having individual condition responsive control means
303 ..Sequentially opened main line and bypass or relief paths
304 ..Plural bypass or relief paths
305 .Manual actuation of condition responsive valve
306 .Pump inlet or pump chamber vented to ambient (e.g., vacuum breaker)
307 .Pressure responsive relief or bypass valve
308 ..Having additional relief or bypass valve
309 ..Responsive to pump inlet condition
310 ..Rotary expansible chamber pump
311 ..Adjustable spring loaded valve
312 WITH MUFFLER ACTING ON PUMP FLUID
313 COMBINED
314 SINGLE ACTING CHANGEABLE TO OR FROM DOUBLE ACTING
315 REVERSE FLOW WITH UNIDIRECTIONAL DRIVE OR UNIDIRECTIONAL FLOW WITH REVERSE DRIVE
316 CORRELATED PUMP AND MOTOR OR CLUTCH CONTROL
317 .Pump distributor control
318 ..Mechanically interconnected pump and fluid motor distributors
319 INCLUDING DISENGAGEABLE ROTARY OR FRANGIBLE DRIVE CONNECTION
320 SERIALLY FORMED PUMPING CHAMBERS (E.G., ENDLESS)
321 MOTOR DRIVEN
322 .Magnetostrictive chamber
323 .Pump motor or starter driven by pump fluid
324 .Pump operated as motor to start prime mover drive
325 .Reversely rotated for starting
326 .Including means for selectively varying motor speed or rotary motor direction
327 .Reaction motor
328 .Spring or weight motor
329 ..Fluid weight (e.g., gravity vessel)
330 .Tide or wave motor
331 ..Float
332 ...Pivoted
333 ...Guided
334 .Fluid current motor
335 ..Including alternate drive
336 ..Rotary parallel axis type
337 .Buoyant motor
338 .Relatively movable pumping members driven by relatively movable working members
339 ..Nonrotary pumping and fluid motor working members
340 ...Common expansible chamber for oppositely movable working members
341 ....Mechanically interconnected
342 ...Including closed fluid interconnection between working members
343 ...Including mechanical interconnection to cause relative motion
344 ...Position of one working member controls motive fluid valve for another
345 ....Control by single member responsive to position of each of plural working members
346 ....Independently operated valve for each working member
347 ...Single member controls motive fluid for each working member
348 .Common rotary pumping and fluid motor working member
349 .Common pump and motor chamber
350 .Motor rotor intermediate coaxial pump rotors
351 .Pump rotor intermediate coaxial motor rotors
352 .Motor within rotary pumping member
353 ..Armature within pumping member
354 ...Stator within armature
355 .Pump within rotary working member
356 ..Pump within armature
357 .Pump fluid communicates with sealed chamber containing armature
358 .Pump - motor unit raised in vertical conduit by pressure fluid applied below unit
359 .Adjustable motor and pump rotor unit or relatively adjustable aligned pump and motor rotary shafts
360 .Including means for facilitating assembly or disassembly of pump to or from motor or fixed support
361 .Pump and motor unitarily adjustable relative to fixed support
362 .Pump and motor interconnected by endless flexible transmission element
363 .Resiliently mounted pump or motor
364 .Internal-combustion engine
365 .Axial thrust balancing means for rotary pump and motor
366 .Including means utilizing pump fluid for augmenting cooling, lubricating, sealing, or cleaning of motor
367 ..Heat exchange means between pump fluid and secondary motor contacting fluid
368 ..Including additional means for motivating fluid flow to or from motor (e.g., auxiliary pump, pump fluid induced flow path, etc.)
369 ..Pump fluid directed to motor via downstream branched flow path
370 ...Recirculated through pump
371 ..Pump fluid flows serially from motor through pump
372 .Interrelated or common lubricating or cooling means for pump and motor
373 .With means to prevent heat transfer between pump and motor
374 .Including manual, mechanical, or diverse drive
375 .Fluid motor
376 ..Steam motor discharge into pump fluid
377 ..Serial flow fluid from pumping chamber through motor working chamber
378 ...Pulsator type
379 ..With motive fluid generator
380 ...Internal-combustion engine
381 ...Combustion products generator for motor

	MOTOR DRIVEN
	.Fluid motor
	..With motive fluid generator
382	...Plural pumping members; one additionally supplying motive fluid for second
383	...Pulsator or fluid link
384	....Pneumatic
385	....With means to supply or vent pulsator fluid
386	.....Working member position responsive
387	.....Pulse piston position responsive
388	.....Pressure responsive
389	....Plural collapsible walls
390	...Fluid pump
391	..Motor discharge into or upstream of pumping chamber
392	..Common pumping and motor working member
393	...With additional unitary common pumping and motor working member
394	...Collapsible common member
395	....Diaphragm
396	..Rectilinearly reciprocating motor working members coaxial with intermediate unitary pumping member
397	..Rectilinearly reciprocating pumping members coaxial with intermediate unitary motor working member
398	..Rectilinearly reciprocating cylinder and piston-type motor
399	...Rectilinearly reciprocating cylinder and piston-type pump
400	....Interconnected moving cylinder and piston
401	....Integral pump and motor pistons
402	.....Constantly applied force in education stroke direction
403	.....Double acting motor piston
404	......Double acting pump piston
405	..Rotary motor
406	...Unitary pump and motor rotors
407	....Overhung from central support
408	....Axial flow motor and pump
409	....Axial flow motor and centrifugal pump
410	.Electric or magnetic motor
411	..Including electric power generating or storage means
412	..Collapsible wall pump
413	...Diaphragm type
414	..Internal - external pressure balancer
415	..Reciprocating rigid pumping member
416	...Reciprocating motor
417	....Unitary pump and motor working member
418	.....Opposed pumping member faces (e.g., double acting)
419	...Relatively movable pumping members
420	..Pump magnetically coupled to rotary drive
421	..Trapped air motor seal (i.e., diving bell type)
422	..Sealed service conduit
423.1	..Rotary motor and rotary nonexpansible chamber pump
423.2	...Vacuum cleaner
423.3	...Submersible type
423.4	...Turbomolecular pump
423.5	...Plural units
423.6	...Having nonflexible means to transmit power between motor shaft and pump shaft
423.7	...With specific motor details
423.8	...Having additional means to remove heat from pump or motor
423.9	...Having means to prevent debris from entering pump
423.15	...Having means to mount pump and motor in working position
423.11	...Having means to prevent fluid leaking between pump and motor
423.12	...Having bearing
423.13	....With lubricator
423.14	...With specific housing details
424.1	...Supported for rotation on vertical axis
424.2	....Motor mounted below pump
425	SEPARATE MANUAL AND POWER DRIVEN PUMPING MEMBERS
426	PLURAL PUMPS WITH INDIVIDUAL OR RELATIVE CONTROL
427	.Distributor adjustment
428	.Bypass control
429	.Adjustment with respect to common drive
430	INCLUDING MEANS TO (1) AGITATE PUMP FLUID, OR (2) PREVENT FOREIGN MATERIAL SETTLING FROM PUMP FLUID
431	.By application of separate fluid
432	INCLUDING APPLICATION OF SEPARATE FLUID TO PUMP VALVE
433	.Liquid pool seal for gas pump valve
434	INCLUDING SEPARATE PORT ON NON-CYCLIC VALVE FOR DRAINING PUMP PORTION
435	INCLUDING SEPARATE PORT ON NON-CYCLIC VALVE FOR VENTING OR FILLING PUMP PORTION
436	TRANSVERSELY MOVABLE IMPELLING MEMBER (E.G., PADDLE)
437	EXPANSIBLE CHAMBER TYPE
438	.Liquid coolant introduced into gas pump chamber or inlet
439	.Having additional chamber intake connection from nonpumping space
440	.Having separate noncyclic valve (e.g., bypass, etc.)
441	..For serial control of pump fluid (e.g., throttle valve)
442	.Selectively usable plural inlet or outlet distributors for single chamber
443	.Pressure responsive distributor opened responsive to pumping member position
444	..Distributor in piston
445	...Including means to open distributor in fixed chamber wall
446	.Having means for holding pressure responsive distributor open
447	.Pressure responsive distributor continuously biased open
448	.Pump mounted in vertical tubular flow conduit removable as unit by driving rod manipulation
449	..Removable unit having piston normally fixed in conduit
450	..With latching or anchoring means released by rod movement
451	.Valve element mounted in fixed chamber wall removable with pumping member
452	..By separable engageable connecting elements
453	...Threaded connecting elements
454	.Including valve assembly, disassembly, or inspection facilitating means
455	.Having valve parts relatively moved for nonvalving function
456	.Relatively movable serial distributors
457	..Including distributor formed by moving cylinder or liner
458	..Plural pressure responsive distributors
459	...Located within piston (e.g., valved piston)
460	.Moving cylinder
461	..Cylinder rotates or oscillates about longitudinal axis

	EXPANSIBLE CHAMBER TYPE
	.Moving cylinder
462	..Unidirectionally rotating cylinder
463	...Having second cylinder unitary with piston of first
464	..Cylinder oscillates about axis transverse to longitudina axis
465	...Inlet or discharge controlled by cooperating ports in cylinder or piston and fixed member
466	..Inlet or discharge controlled by cooperating port in reciprocating cylinder and fixed member
467	..Relatively movable cylinders
468	..Having integral pump piston or external pumping face
469	..Cylinder and piston reciprocate on common axis
470	.Biasing means effects induction stroke of abutment driven, vacuum producing pumping member
471	.Biasing means effects eduction stroke of abutment driven, pressure producing pumping member
472	.Bellows-type chamber
473	..Plural bellows
474	.Elongated flexible chamber wall progressively deformed
475	..Plural chambers
476	..Deformation by rolling or sliding engagement member
477	...Plural spaced engagement members or member portions
478	.Inlet and discharge distributors at opposite ends of tubular flexible wall pumping chamber
479	.Distributor formed from integral portion of flexible wall pumping member
480	.Valve in collapsible wall pumping member
481	.Oscillating pumping member
482	..Inlet distributor in abutment wall for pumping member
483	...Having discharge distributor in pumping member
484	..Distributor in pumping member
485	.Delivery to different ports on successive strokes
486	.Plural pumping members in single pump chamber
487	..Coaxial reciprocating pumping members
488	...Form opposite chamber walls
489	.Control by withdrawal or tilting of pump piston relative to cylinder
490	.Pumping member position controlled port
491	..Common pumping member controls inlet or discharge for plural chambers
492	...Control by movement of pumping member about axis
493	..Including plural controlled inlet or outlet flow paths
494	...Having means to selectively effect control at different positions of pumping member stroke
495	...Pumping member comprises valved piston
496	..Having serial control of inlet or discharge flow path
497	..Pumping member controlled end wall port
498	..Longitudinally spaced inlet and discharge sidewall ports
499	..Having means to effect control at different positions of pumping member stroke
500	..Control by movement of pumping member about axis
501	..Having coextensive distributor opposite pumping member end face
502	.Multiple cyclic outlet paths
503	.Multiple cyclic inlet paths
504	.Plural outlet paths to single discharge line acting under different conditions
505	.Electrically or magnetically actuated distributor
506	.Distributor movement adjustable
507	.Distributor moved by separate fluid responsive surface
508	..Including mechanical actuation
509	.Distributor part forms traversed movable pump chamber wall portion
510	.Mechanically actuated distributor
511	..Piston carried distributor, one frictionally engages chamber wall, drive rod integral with other (e.g., piston driven by valve element through lost motion connection, etc.)
512	...Unitary distributor element controls inlet or discharge for plural chambers
513	...Conical engagement
514	..Distributor in piston
515	..Plural pumping chambers
516	...Common element forms inlet or discharge distributor for plural chambers
517	....Element forms both inlet and discharge distributor
518	..Common element forms inlet and discharge distributor
519	...Element moves about axis
520	..Distributor abutted by or frictionally engaged with pumping member
521	.Plural pumping chambers
522	..Discharge conduit for first chamber communicates with nonpumping portion or second pumping member
523	..Including valved piston
524	...Unitary or interconnected elements form inlet or discharge distributors for plural chambers
525	...Common piston includes valves for plural axially aligned chambers
526	....Common inlet or discharge conduit mounted on piston
527	....Fluid conduit for one chamber extends through portion of another
528	...Fluid conduit for one chamber extends through portion of another
529	...Parallel laterally spaced relatively movable pistons
530	...Including nonvalved piston
531	..Unitary or interconnected elements form inlet or discharge distributors for plural chambers
532	...Unitary element movable about an axis
533	..Common discharge conduit interposed between spaced parallel chambers
534	..Chambers formed at opposite ends of rectilinearly moving pumping member
535	...All discharge distributors positioned laterally of pumping member path
536	....Inlet and discharge distributors positioned laterally of pumping member path
537	.....All distributors positioned on same side of pumping chamber
538	..Inlet and discharge distributors at adjacent end of aligned chambers
539	..Parallel laterally spaced relatively movable pumping members
540	.Having pulsation dampening fluid receiving space

	EXPANSIBLE CHAMBER TYPE
	.Having pulsation dampening fluid receiving space
541	..Space formed on pumping member
542	..Inlet and discharge spaces
543	..Direct contact with confined compressible fluid
544	...Manually operated pump
545	.Valved piston
546	..Piston contains inlet and outlet valves
547	..Fluid conduit fixed to piston
548	..Having rigidly attached imperforate wall member
549	..Having separate means biasing valve closed
550	..Flexible
551	..Hinged
552	..Reciprocating
553	...Annular
554	...Ball type
555.1	.Fluid serially moved to opposite side of pumping member
555.2	..Well swabs
556	..Control by movable rigid piston side wall
557	.Pump chamber in constant communication with inlet or discharge conduit
558	.First distributor includes passage controlled by second distributor (i.e., inlet and outlet)
559	.Having pumping chamber pressure responsive distributor
560	..Single unitary element forms inlet and discharge distributor
561	..Pumping member position responsive stop for distributor
562	..Having means on pumping member for accommodating distributor portion
563	..Similar inlet and discharge distributors of different size or material
564	...Annular-type distributors
565	..Hinged inlet and discharge distributors in aligned conduits
566	..Nonmetallic inlet or discharge distributor
567	..Inlet and discharge distributors in coaxial ports
568	...Transverse to axis of pumping member
569	..Distributor positioned opposite pumping member end face
570	...Distributor coextensive with pumping member end face
571	...Inlet and discharge distributors

CLASS 418 ROTARY EXPANSIBLE CHAMBER DEVICES

DECEMBER 1990

1 METHODS
2 WITH SIGNAL, INDICATOR OR TRANSPARENT INSPECTION MEANS
3 DIVERSE ROTARY EXPANSIBLE CHAMBER DEVICES
4 WORKING MEMBER OR CYLINDER SURFACE HAS ALTERNATE LINEAR AND CURVILINEAR MOVEMENT (E.G., ENDLESS)
5 MULTISTAGE
6 .One working chamber stage encircles another
7 .Successive stages alternately produce work
8 .Working fluid engages working member serially in circumferentially spaced working chambers
9 .Interengaging rotary members
10 ..Three or more
11 .Sliding abutment
12 .Swinging abutment
13 .Sliding vane
14 WITH DELAYED LOAD
15 WITH PLURAL WORKING FLUID INLET OR OUTLET PASSAGES
16 WITH CHANGEABLE WORKING CHAMBER MAGNITUDE
17 .Speed controlled
18 .Intermittently accelerated and receding members rotate in same path (alternating piston type)
19 .Intermeshing rotary members
20 ..Three or more
21 ..Movable member moved axially
22 .Axially or radially spaced working chambers
23 .By adjustably limiting vane or abutment movement
24 .Spring or fluid biased movable member
25 ..Positively biased in opposite directions
26 ...With working fluid bias
27 ..Spring
28 .By axial movement of movable member
29 .Rotating inner working or reacting member repositioned relative to cylinder
30 .By cylinder or cylinder portion pivotal movement
31 .Cylinder or cylinder portion moved linearly and radially
32 SELF-ACTING UNIDIRECTIONAL FLOW WITH REVERSE ROTATION OR REVERSE FLOW WITH UNIDIRECTIONAL ROTATION
33 INTERMITTENTLY ACCELERATED AND RECEDING MEMBERS ROTATE IN SAME PATH (ALTERNATING PISTON TYPE)
34 .Moving cylinder
35 .Each a working member
36 ..Working member movement controlled by interengaging rotating members
37 ..Working member movement controlled by member rotating about parallel axis
38 ..Cam controlled working member movement
39 CONVERTIBLE OR CHANGEABLE BY ASSEMBLY OR DISASSEMBLY
40 SPEED CONTROLLED
41 .Rotating weight valves working fluid passage
42 .Rotating weight positioned on or within inner rotating member
43 .Weight rotates about axially extending axis
44 ..Other than working member axis
45 COLLAPSIBLE PROGRESSIVELY DEFORMED WORKING CHAMBER WALL
46 WITH REMOVAL OR ACCOMMODATION OF SOLID FOREIGN MATERIAL IN WORKING FLUID
47 .With filter
48 UNLIKE HELICAL SURFACES ON RELATIVELY WOBBLING ROTATING MEMBER AND ENCOMPASSING CYLINDER (E.G., MOINEAU TYPE)
49 NUTATING WORKING MEMBER
50 .Non-metallic working member or working chamber portion
51 .With mechanical sealing
52 .Working member common to plural working chambers
53 ..Axially spaced working chambers
54 WORKING MEMBER HAS PLANETARY OR PLANETATING MOVEMENT
55.1 .Helical working member, e.g., scroll
55.2 ..Having specific wrap or end plate, e.g., shape, material, coating
55.3 ..With specific rotation preventing or rotation coupling means
55.4 ..With mechanical sealing
55.5 ..With biasing means, e.g., axial or radial
55.6 ..With lubricant, liquid seal or nonworking fluid separation
56 .Non-metallic working member, cylinder or partition
57 .Adjustable or resiliently biased working member
58 .Plural working members or chambers
59 ..Radially spaced working chambers
60 ..Axially spaced working members
61.1 ..Circumferentially spaced working chambers
61.2 ...Rotor has one more lobe than cylinder (i.e., Wankel type)
61.3 ...Rotor has one less lobe than cylinder (i.e., Gerotor type)
62 .Partition pivotally connected to working member and cylinder
63 .With relatively movable partition member
64 ..Slidable in working member
65 ..Having working fluid passage
66 ..Integral with working member
67 ..Pivoted to working member
68 ROTATING INTERNAL MEMBER ROTATES AND OSCILLATES OR RECIPROCATES
69 WITH FRANGIBLE DRIVE CONNECTION OR CLUTCH
70 WITH RAPID DISASSEMBLY FEATURE (I.E., WITHOUT TOOLS)
71 PRESSURE FLUID RADIALLY BALANCES WORKING OR ROTATING ABUTMENT MEMBER
72 .With counterbalancing fluid passage through rotating member
73 .Counterbalancing fluid directed to rotating member shaft bearing
74 .Counterbalancing fluid directed to intertooth spaces or spaces between adjacent vanes
75 GROOVED ABUTTING CYLINDER-ROTATING MEMBER END SURFACES
76 .Non-working fluid directed to groove
77 .Grooved working member surface
78 .Working fluid portion fills intertooth spaces or spaces between adjacent vanes
79 .Radial groove
80 .Radially spaced grooves
81 .Annular groove or recess completely encircles rotation axis
82 .Groove communicates with vane slot
83 HEAT EXCHANGE OR NON-WORKING FLUID LUBRICATING OR SEALING
84 .With condition responsive control of non-working fluid
85 .With heat exchange means for non-working fluid

	HEAT EXCHANGE OR NON-WORKING FLUID LUBRICATING OR SEALING
86	.Heat exchange by diverted incoming or outgoing working fluid
87	.Valve regulated non-working fluid
88	.With pump for non-working fluid
89	.With filter for non-working fluid
90	.Wick or absorbent material feed
91	.Non-working fluid passage in inner working or reacting member
92	..With non-working fluid passage in partition
93	..Non-working fluid biases vane
94	..With non-working fluid passage in drive shaft
95	.Vent or non-seal means prevents working and non-working fluid intermix
96	.Outer cylinder member immersed or submerged in non-working fluid
97	.Non-working and working fluids intermix in working chamber
98	..Non-working fluid initially directed to shaft bearing
99	..Non-working fluid initially directed to working member
100	.Intermixed incoming working and non-working fluids
101	.With coolant air impelling means or finned cylinder surface
102	SHAFT OR TRUNNION LUBRICATION OR SEALING BY DIVERTED WORKING FLUID PORTION
103	WORKING MEMBER PERIPHERAL SURFACE COMPRISES RELATIVELY CIRCUMFERENTIALLY MOVABLE SEGMENTS
104	WITH MECHANICAL SEALING
105	.Abutment position adjustment
106	.Vane position adjustment
107	.By changing working member or cylinder relative position
108	..Radially adjustable
109	...Adjustable working member
110	.By axially relatively moving working member sections
111	.By axially relatively moving vane or abutment sections
112	.Seal on working member periphery separates inlet and outlet ports
113	..Seal on working member peripheral projection engages cylinder working chamber surface (e.g., apex seals)
114	...Adjustable or expandable peripheral projection
115	...Weight balanced or adjustable seal
116	...Ring seal or arcuate seal portion
117	...With plural circumferentially spaced peripheral seals
118	...Swinging seal
119	...Integral peripheral and depending side seal
120	...With axially movable side seal
121	....Spring biased
122	...Spring biased
123	....Fluid biased
124	...Fluid biased
125	.Seal on cylinder engaging rotary member separates inlet and outlet ports
126	..Engages plural rotary members
127	..Adjustable
128	...With resilient interposed member
129	..With resilient biasing means
130	.Cup shaped cylinder axially movable to abut cylinder side
131	.Axially movable end wall or end wall portion
132	..Progressively biased from inlet to outlet
133	..Surface abutting working member abuts another coplanar cylinder surface portion
134	..Adjustable end wall
135	..Spring biased
136	.Seal element between working member and vane
137	..Mounted on working member
138	...Oscillating
139	.Seal element between abutment and cylinder or working member
140	.Seal element between working member and cylinder
141	..Labyrinth
142	..On working member
143	...On working member circumferential periphery
144	..Between adjacent cylinder and working member sides
145	.Seal element between vane and cylinder
146	..On vane side
147	..Movable seal on vane
148	...Positively urged to engage cylinder
149	.Seal element between stationary cylinder parts
150	WORKING CHAMBER SURFACE EXPRESSED MATHEMATICALLY
151	WEIGHT BALANCED WORKING MEMBER OR PARTITION
152	NON-METALLIC WORKING MEMBER, CYLINDER OR PARTITION
153	.Resilient
154	..Partition integral with working member
155	...Extending from working member side
156	RESILIENT WORKING MEMBER, CYLINDER OR PARTITION
157	SHOCK OR PRESSURE RELIEVING YIELDABLE PERIPHERAL WORKING MEMBER OR CYLINDER SURFACE PORTION
158	MAGNETICALLY BIASED VANE OR ABUTMENT
159	ADJUSTABLE WORKING CHAMBER PERIPHERAL WALL CONTROLS WORKING FLUID FLOW
160	MOVING CYLINDER
161	.Rotating
162	..With axially movable partition member
163	...Cylinder and internal member rotate about non-parallel axes
164	..Rotary internal reacting member
165	...Cylinder engages plural internal reacting members
166	...Intermeshing peripheral surfaces
167	....With intake or exhaust passage in internal member
168	....Cylinder periphery comprises alternate tooth and passage portions (e.g., cage type)
169	.....With filler element (e.g., crescent)
170	....With filler element (e.g., crescent)
171	....Inner member has five or more teeth
172	...With movable partition member
173	....Partition radially slidable in internal member
174	....Partition radially slidable in cylinder
175	..Moving partition on stationary member
176	..Swinging partition
177	..Sliding partition
178	WITH WEAR SURFACE TREATMENT OR INTEGRALLY PLATED WEAR LAYER
179	SPECIFIC MATERIAL
180	APERTURED BYPASS TO PRESSURIZE OR RELIEVE WORKING CHAMBER ZONE OF INTERMEDIATE PRESSURE
181	COMBINED
182	RELATIVELY MOVABLE WORKING MEMBER AND DRIVE SHAFT AXES

183	WITH SUPPLY OR EXHAUST PASSAGE IN WORKING MEMBER
184	.Passage includes vane slot
185	.Controlled by working member carried valve
186	.Supply and exhaust passages in working member
187	..Passage extending through working member center of rotation
188	.Supply or exhaust passage through working member center of rotation
189	TRAPPED FLUID RELIEF
190	.With tooth modification
191	INTERENGAGING ROTATING MEMBERS
192	.With movable partition
193	..Axially moving
194	.Each tapered
195	.Non-parallel axis
196	.Three or more
197	..Helical or herringbone
198	.Intermittent rotation
199	.Multiple units
200	..With axially spaced working members
201.1	.Helical or herringbone
201.2	..With valve
201.3	..Having specific tooth shape
202	..Each member having opposed axially spaced helices
203	..Axially counterbalanced
204	.Eccentrically mounted
205	.Like rotary members
206	..Having each radial protuberance of like dimension
207	RELATIVELY MOVING WORK TRANSMITTING BARRIERS MOVE IN SEPARATE INTERSECTING CHAMBERS
208	MOVABLE INTERMEDIATE PARTITION ENGAGES PERIPHERIES OF PLURAL SPACED WORKING MEMBERS
209	PLURAL WORKING CHAMBERS
210	.Axially spaced rotating members rotate on common axis
211	..With axially moving vane or abutment
212	..Intermediate member separates and engages plural working members
213	...Plural intermediate members
214	...Interconnected abutments
215	.Axially spaced working chambers
216	..Helical working member or working member portion
217	..Axially moving abutment or vane
218	...Moving about non-parallel axis
219	...Vane
220	HELICAL WORKING MEMBER
221	MOVING ABUTMENT AND VANE
222	SEPARABLE ABUTMENT
223	WITH SECONDARY VANE OR ABUTMENT MOVING MEANS
224	VALVED VANE OR ABUTMENT
225	VANE OR ABUTMENT COMPRISES ROTATABLE ELEMENT
226	.Rotates about non-parallel axis
227	.Positively rotated
228	AXIALLY MOVING VANE OR ABUTMENT
229	.Sliding
230	..Positively biased
231	...In opposite directions
232	....Spring or fluid bias
233	.Radially pivoted vane
234	TAPERED VANE OR ABUTMENT (E.G., WEDGE SHAPED)
235	WEAR ELEMENTS OR ANTIFRICTION MEANS IN VANE OR ABUTMENT SLOT
236	NON-RADIALLY POSITIONED SLIDING VANE OR ABUTMENT
237	.Arc shaped
238	.Positively biased
239	ALTERNATELY USABLE VANE OR ABUTMENT STRUCTURE FOR REVERSE WORKING MEMBER ROTATION
240	INTERCONNECTED ABUTMENTS
241	ABUTMENT OR VANE HAS CONCURRENT ROCKING AND RADIALLY SLIDING MOVEMENT
242	SPACED OSCILLATING ABUTMENT PORTIONS ENGAGE WORKING MEMBER
243	POSITIVELY ACTUATED ABUTMENT
244	.Cam actuated
245	..In opposite directions
246	..Spring or fluid biased in opposite direction
247	.In opposite directions
248	.Spring biased
249	.Fluid biased
250	..Winged abutment
251	..With working fluid passage in abutment
252	WITH PROVISION FOR QUICK VANE REPLACEMENT
253	INTERCONNECTED VANES
254	.Integrally connected
255	..Diametrically aligned
256	.Encompassing moving member interconnects plural vanes
257	.Interposed movable member interconnects plural vanes
258	..Spring
259	POSITIVELY ACTUATED VANE
260	.Cam actuated
261	..In opposite directions
262	...With pivoted interposed lever
263	...With spring or fluid bias
264	...With roller
265	.In opposite directions
266	.Spring biased
267	..With fluid bias
268	.Fluid biased
269	..Constantly interposed pressure fluid spreads plural vanes

DIG 1	NON-WORKING FLUID SEPARATION

CLASS 419 POWDER METALLURGY - PROCESSES

1 POWDER METALLURGY PROCESSES WITH HEATING OR SINTERING
2 .Making porous product
3 .Making articles of indefinite length
4 ..Filaments or fibers
5 .Making composite or hollow article
6 ..Powder next to powder
7 ...One or more components not compacted
8 ..Powder next to solid
9 ...Powder not compacted
10 .Metal and nonmetal in final product
11 ..Nonmetal is elemental carbon
12 ..Boride containing
13 ..Nitride containing
14 ..Carbide containing
15 ...Complex or multiple carbides
16 ....With another binary nonmetal
17 ...Single carbide
18 ....Tungsten carbide
19 ..Oxide containing
20 ...Rare earth oxide
21 ...Silver metal with metal oxide
22 ...Copper oxide
23 .Powder shape or size characteristics
24 ..Filaments or fibers
25 .Controlled cooling after sintering
26 .Post sintering operation
27 ..Impregnation
28 ..Subsequent working
29 ..Subsequent heat treatment (e.g., annealing, etc.)
30 .Powder pretreatment (prior to consolidation or sintering)
31 ..Heat treatment of powder
32 ..Mechanical blending
33 ..Comminuting
34 ..Chemical blending
35 ..Coating
36 ..Addition of fugitive material
37 ...Additional material is solid
38 .Consolidation of powder prior to sintering
39 ..Specific pressure or lack or pressure recited
40 ...Slip or slurry
41 ..Extruding
42 ..Isostatic or Hydrostatic
43 ..Rolling
44 .Pretreatment of consolidated powders
45 .Sintering which includes a chemical reaction
46 .Alloying occurs during sintering
47 .Liquid phase sintering
48 .Heat and pressure simultaneously to effect sintering
49 ..Hot isostatic pressing (HIP)
50 ..Hot rolling
51 ..Multiaxial (Not HIP)
52 ..Heating by electrical means other than radiant energy
53 .Plural heating steps including sintering
54 ..Different temperatures
55 ..Additional operation between heating steps
56 .Special medium during sintering
57 ..Special atmosphere
58 ...Hydrogen or hydrogen plus nitrogen (Nitrogen per se in 57)
59 ...Hydrocarbon or derivative (e.g., CH4, etc.)
60 ...Vacuum
61 FORMING ARTICLES BY UNITING RANDOMLY ASSOCIATED METAL PARTICLES
62 .Powder pretreatment
63 ..Includes a chemical reaction
64 ..Includes coating of particles
65 ..Includes adding a binder material
66 .Consolidation of powders
67 ..Extrusion
68 ..Isostatic/Hydrostatic pressing
69 ..Rolling

CLASS 420 ALLOYS OR METALLIC COMPOSITIONS

1	RADIOACTIVE
2	.Actinide base; singly or in combination
3	..Uranium base
4	.Iron base
5	.Magnesium base
6	.Nickel or cobalt base
7	.Aluminum base
8	FERROUS (I.E., IRON BASE)
9	.1.7 percent or more carbon containing
10	..Six percent or more total group IV, V or VI transition metals containing
11	...Eight percent or more chromium containing
12	....Molybdenum, tungsten or vanadium containing
13	..2.7 percent or more carbon equivalent containing (i.e., cast iron)
14	...Boron containing
15	...Chromium containing
16	....Nickel containing
17	.....Molybdenum containing
18	...Processes of adding magnesium
19	....Adding magnesium as a liquid, vapor or as a solid agent entrained by gas (e.g., fluidized)
20	....Flowing molten iron alloy onto solid magnesium containing agent, or adding solid magnesium containing agent to molten stream of iron alloy
21	....Mechanically plunging magnesium containing agent below surface of iron alloy melt
22	....Separate addition of plural agents, at least one containing magnesium
23	....Magnesium containing agent is coated, impregnated, or compacted (e.g., briquetted, coated particles)
24	....Magnesium present in agent only as a compound with a nonmetal
25	....In agent also containing silicon, rare earth, or alkaline earth metal
26	...Copper containing
27	...Nickel or molybdenum containing
28	...Over .1 percent aluminum containing
29	...Processes
30	....Adding rare earth or alkaline earth metal
31	....Adding sulfur, selenium or tellurium
32	....Adding vanadium, titanium, niobium, or zirconium
33	....Adding silicon
34	.Nine percent or more chromium containing
35	..Noble metal containing
36	..Cobalt containing
37	...Molybdenum or tungsten containing
38	....Nickel containing
39	....Copper containing
40	..Rare earth containing
41	..Lead, bismuth, antimony, calcium, selenium or tellurium containing
42	..Over 0.05 percent sulfur, over 0.04 percent phosphorus or sulfur or phosphorus added in any amount to promote machinability
43	..Eight percent or more nickel containing
44	...Over 2 percent manganese containing
45	....Copper containing
46	....Molybdenum or tungsten containing
47	.....Group IV or V transition metal containing
48	....Group IV or V transition metal containing
49	...Copper containing
50	...Over 1.5 percent silicon containing
51	....Group IV or V transition metal containing
52	...Molybdenum containing
53	....Group IV or V transition metal containing
54	...Group IV or V transition metal containing
55	...Over 0.1 percent carbon containing
56	..Eight percent or more total nickel plus manganese containing
57	...Molybdenum or tungsten containing
58	...Copper containing
59	...Over 0.20 percent nitrogen containing
60	..Copper containing
61	...Molybdenum or tungsten containing
62	..Over 0.1 percent aluminum containing
63	...Molybdenum or tungsten conaining
64	..Boron containing
65	..0.25 percent or more nitrogen containing
66	...Group IV or V transition metal containing
67	..Molybdenum or tungsten containing
68	...Titanium, zirconium or hafnium containing
69	...Vanadium, niobium or tantalum containing
70	..Group IV or V transition metal containing
71	..Processes
72	.Eight percent or more manganese containing
73	..Nickel containing
74	..Chromium containing
75	..Titanium containing
76	..Copper containing
77	.Four percent or more aluminum containing
78	..Over 2 percent silicon containing
79	..Chromium containing
80	..Nickel or cobalt containing
81	..Zirconium, vanadium or titanium containing
82	.Noble metal containing
83	.Rare earth metal containing
84	.Lead, bismuth, selenium, tellurium or calcium containing
85	..Processes
86	...Adding lead
87	.Over 0.05 percent sulfur, over 0.04 percent phosphorus or sulfur or phosphorus added in any amount to promote machinability
88	..Processes of making or treating alloy containing over 0.04 percent phosphorus
89	.Copper containing
90	..Chromium containing
91	...Nickel containing
92	..Nickel containing
93	..Vanadium, zirconium, titanium or molybdenum containing
94	.Over 10 percent nickel containing
95	..Cobalt containing
96	..Molybdenum containing
97	..Chromium containing
98	..Over 1 percent silicon containing
99	.One percent or more carbon containing, but less than 1.7 percent
100	..Chromium containing
101	...Molybdenum containing
102	....Cobalt containing
103	.Over 0.1 percent aluminum containing, but less than 4 percent
104	.Chromium containing, but less than 9 percent
105	..Molybdenum containing

FERROUS (I.E., IRON BASE)
.Chromium containing, but less than 9 percent
..Molybdenum containing
106 ...Boron or beryllium containing
107 ...Cobalt containing
108 ...Nickel containing
109 ....Vanadium, titanium or zirconium containing
110 ...Titanium, zirconium or niobium containing
111 ...Vanadium containing
112 ..Nickel containing
113 ...Tungsten containing
114 ..Tungsten containing
115 ..Processes
116 ...Including reducing a chromium compound
117 .Two percent or more silicon containing
118 ..Titanium, molybdenum, tungsten or vanadium containing
119 .Nickel containing, but 10 percent or less
120 .1.5 percent or more manganese containing, but less than 8 percent
121 .Boron containing
122 .Tungsten containing
123 .Molybdneum containing
124 ..Vanadium, tantalum or titanium containing
125 .Zirconium containing
126 .Titanium containing
127 .Vanadium, tantalum or niobium containing
128 .Nitrogen containinig
129 .Processes
400 ALKALI METAL BASE
401 BERYLLIUM BASE
402 MAGNESIUM BASE
403 .Silver containing
404 ..Manganese containing
405 .Lanthanide containing
406 ..Zirconium containing
407 .Aluminum containing
408 ..Zinc containing
409 ...Manganese containing
410 ..Manganese containing
411 .Zinc containing
412 ..Manganese containing
413 .Manganese containing
414 .Zirconium containing
415 ALKALINE EARTH METAL BASE
416 RARE EARTH METAL BASE SINGLY OR IN COMBINATION
417 TITANIUM BASE
418 .Aluminum containing
419 ..Tin containing
420 ..Vanadium containing
421 .Chromium or molybdenum containing
422 ZIRCONIUM OR HAFNIUM BASE
423 .Copper containing
424 VANADIUM BASE
425 NIOBIUM BASE
426 .Titanium, zirconium, or hafnium containing
427 TANTALUM BASE
428 CHROMIUM BASE
429 MOLYBDENUM BASE
430 TUNGSTEN BASE
431 .Carbon, boron or nitrogen containing
432 .Rhenium or noble metal containing
433 RHENIUM BASE
434 MANGANESE BASE
435 COBALT BASE
436 .Chromium containing
437 ..Aluminum containing
438 ...Titanium containing
439 ..Titanium containing
440 ..Iron containing
441 NICKEL BASE
442 .Chromium containing
443 ..Rare earth, magnesium or alkaline earth metal containing
444 ..Noble metal containing
445 ..Aluminum containing
446 ...Titanium containing
447 ....Tantalum, niobium, vanadium, or hafnium containing
448 .....Molybdenum or tungsten containing
449 ....Zirconium or boron containing
450 ....Molybdenum or tungsten containing
451 ..Titanium containing
452 ..Iron or manganese containing
453 ...Molybdenum or tungsten containing
454 ....Cobalt containing
455 .Rare earth containing
456 .Noble metal containing
457 .Copper containing
458 ..Iron containing
459 .Iron or manganese containing
460 .Aluminum containing
461 OSMIUM OR IRIDIUM BASE
462 RUTHENIUM OR RHODIUM BASE
463 PALLADIUM BASE
464 .Copper containing
465 .Platinum containing
466 PLATINUM BASE
467 .Rhodium containing
468 .Nickel containing
469 COPPER BASE
470 .Tin containing
471 ..Aluminum containing
472 ..Phosphorus containing
473 ..Iron, manganese or nickel containing
474 ..Lead containing
475 ...Zinc containing
476 ..Zinc containing
477 .Zinc containing
478 ..Aluminum containing
479 ...Nickel containing
480 ...Manganese containing
481 ..Nickel containing
482 ..Manganese containing
483 ..Noble metal containing
484 ..Refractory metal containing
485 .Nickel containing
486 ..Aluminum containing
487 ..Iron or manganese containing
488 ..Refractory metal containing
489 .Aluminum, gallium, indium, or thallium containing
490 .Silicon containing
491 .Lead containing
492 .Titanium, zirconium or hafnium containing
493 .Manganese containing
494 .Beryllium, magnesium, or alkaline earth metal containing
495 .Other refractory metal containing
496 .Iron or cobalt containing
497 .Noble metal containing
498 .Cadmium, or mercury containing
499 .Phosphorus, arsenic, antimony, or bismuth containing
500 .Sulfur, selenium, or tellurium containing
501 SILVER BASE
502 .Copper containing
503 ..Other noble metal containing
504 ..Zinc, or cadmium containing
505 .Other noble metal containing
506 .Zinc, or cadmium containing
507 GOLD BASE
508 .Palladium containing
509 ..Platinum containing
510 .Platinum containing

GOLD BASE
511 .Silver containing
512 .Iron, cobalt, or nickel containing
513 ZINC BASE
514 .Aluminum containing
515 ..Copper containing
516 ...Mangesium containing
517 ...Tin containing
518 ...Manganese, iron, cobalt, or nickel containing
519 ..Magnesium containing
520 ..Manganese, iron, cobalt, or nickel containing
521 .Copper containing
522 ..Manganese, iron, cobalt, or nickel containing
523 .Cadmium containing
524 .Tin containing
525 CADMIUM BASE
526 MERCURY BASE
527 .Silver containing
528 ALUMINUM BASE
529 .Copper containing
530 ..Tin containing
531 ..Zinc containing
532 ...Magnesium containing
533 ..Magnesium containing
534 ...Silicon containing
535 ....Titanium, zirconium, hafnium, vanadium, niobium, or tantalum containing
536 ....Cadmium, lead or bismuth containing
537 ..Silicon containing
538 ..Iron, cobalt, or nickel containing
539 ..Silver containing
540 .Zinc containing
541 ..Magnesium containing
542 .Magnesium containing
543 ..Titanium, zirconium, hafnium, vanadium, niobium, or tantalum containing
544 ...Silicon containing
545 ...Chromium containing
546 ..Silicon containing
547 ..Iron, cobalt, or nickel containing
548 .Silicon containing
549 ..Alkali, or alkaline earth metal containing
550 .Iron, cobalt, or nickel containing
551 ..Titanium, zirconium, hafnium, vanadium, noobium or tantalum containing
552 .Titanium, zirconium, hafnium, vanadium, niobium, or tantalum containing
553 ..Manganese containing
554 .Cadmium, lead, or bismuth containing
555 GALLIUM, INDIUM, OR THALLIUM BASE
556 GERMANIUM BASE
557 TIN BASE
558 .Lead containing
559 ..Antimony, or bismuth containing
560 .Copper containing
561 ..Antimony, or bismuth containing
562 .Antimony, or bismuth containing
563 LEAD BASE
564 .Alkali, alkaline earth metal or magnesium containing
565 ..Tin containing
566 .Silver containing
567 .Arsenic containing
568 ..Tin containing
569 ...Antimony containing
570 .Tin containing
571 ..Antimony containing
572 .Antimony containing
573 .Copper containing
574 .Zinc containing
575 .Cadmium containing
576 ANTIMONY BASE
577 BISMUTH BASE
578 SILICON BASE ALLOY CONTAINING METAL
579 ARSENIC BASE OR SELENIUM OR TELLURIUM BASE ALLOY CONTAINING METAL
580 CONTAINING OVER 50 PER CENT METAL BUT NO BASE METAL
581 .Iron containing
582 ..Copper containing
583 ..Chromium containing
584.1 ...Nickel containing
585 ....Cobalt containing
586 .....Titanium, or zirconium containing
586.1 ....Molybdenum containing
587 .Copper containing
588 .Chromium containing
589 .Tin containing

CLASS 422 PROCESS DISINFECTING, DEODORIZING, PRESERVING OR STERILIZING, AND CHEMICAL APPARATUS

DECEMBER 1990

1 PROCESS-DISINFECTING, PRESERVING, DEODORIZING, OR STERILIZING
2 .Step of warning or decreasing hazard of process
3 .Process control in response to analysis
4 .A gas is substance acted upon
5 .Deodorizing
6 .Affecting structure, article, etc., submerged in marine environment
7 .Maintaining environment nondestructive to metal
8 ..Using protective article (e.g., antitarnish fabric, etc.)
9 ..Using gaseous preservative, preservative added to gaseous phase of environment, or maintaining gaseous phase nondestructive
10 ...Manipulating gaseous environment for preservative purpose
11 ...Steam environment
12 ..Aqueous acid environment
13 ..Aqueous alkali environment
14 ..Essentially pure water environment
15 ...Using organic compound having phosphorus
16 ...Using organic nitrogen compound other than ammonium salt
17 ...Using organic carboxylic acid or salt thereof
18 ...Using inorganic silicon or phosphorus compound
19 ...Using heavy metal or compound thereof
20 .Using sonic or ultrasonic energy
21 .Using microwave energy
22 .Using direct contact with electrical or electromagnetic radiation
23 ..In atmosphere other than air
24 ..Ultraviolet
25 .Including additional step of preventing damage to sealed container
26 .Using direct contact steam to disinfect or sterilize
27 ..And additional disinfecting or sterilizing agent
28 .Using disinfecting or sterilizing agent
29 ..In situ generation of agent other than aldehyde or glycol
30 ..And removing the agent by chemical reaction or sorption
31 ..And recovering or reusing the agent
32 ..Treating bulk material
33 ..With positive pressure or vacuum
34 ..Using alkylene oxide
35 ..Using cyanide
36 ..Using aldehyde
37 ..Using halogen or halogen-containing compound
38 .Using fluent heat transfer medium other than air
39 .By sudden release of pressure
40 .Process of storage or protection
41 ..Of liquid
42 ...By preventing evaporation
43 ....Of water

Note: See subclass 900 for art collection pertaining to subclasses 1-43

44 BLOOD TREATING DEVICE FOR TRANSFUSIBLE BLOOD
45 .Oxygenator
46 ..Including integral heat-exchange means
47 ..Bubble or foam producing
48 ..Membrane
49 INCLUDING MEANS FACILITATING PART REPLACEMENT OR REPAIR OTHER THAN SOLID, EXTENDED SURFACE, FLUID CONTACT MEANS
50 ANALYZER, STRUCTURED INDICATOR, OR MANIPULATIVE LABORATORY DEVICE
51 .Calorimeter
52 .Chemiluminescent
53 .Corrosion tester
54 .Flame ionization detector
55 .Structured visual or optical indicator per se
56 ..Having reagent in absorbent or bibulous substrate
57 ..Having coated reagent
58 ..In holder or container having special form
59 ...Column
60 ....Having plural-layered material
61 .Test package or kit
62 .Automatic analytical monitor and control of industrial process
63 .Sample mechanical transport means in or for automated analytical system
64 ..Means is turntable (circular)
65 ..Means is conveyor and rack
66 ..Means is moving tape or band
67 ..With specific analytical program control means
68.1 .Means for analyzing liquid or solid sample
69 ..Sorption testing
70 ...Liquid chromatograhpy
71 ...With radioactive material
72 ..Including centrifuge
73 ..With coagulometer for agglutination, clotting, or prothrombin, or for particle (e.g., cell etc.) counting, or volume or characteristics determination
74 ..Dairy tester
75 ..Including titrator
76 ...Conductiometric type
77 ....With integrating or differentiating means
78 ..Including means for pyrolysis, combustion, or oxidation
79 ...Biological, chemical, or total oxygen demand (i.e., BOD, COD, TOD)
80 ...And means directly analyzing evolved gas
81 ..Automated system with sample fluid pressure transport means
82 ...And means segmenting fluid material
82.01 ..Measuring electrical property
82.02 ...Resistance or conductivity
82.03 ...Ion selective electrode
82.04 ....Dissolved gas
82.05 ..Measuring optical property by using ultra-violet, infra-red or visible light
82.06 ...Optode or optrode
82.07 ....Fluorescence
82.08 ...Fluorescence
82.09 ...Absorbance or transmittance
82.11 ...Waveguides
82.12 ..Measuring temperature
82.13 ..Measuring pressure
83 .Means for analyzing gas sample
84 ..Breath tester
85 ...Based on color change
86 ..Including means reacting gas with color indicator
87 ...Strip indicator
88 ..Including means for adsorbing or absorbing gas into or onto liquid or solid media

ANALYZER, STRUCTURED INDICATOR, OR MANIPULATIVE LABORATORY DEVICE
.Means for analyzing gas sample
..Including means for adsorbing or absorbing gas into or onto liquid or solid media
89 ...Gas chromatography
90 ...With conductiometric detector
91 ...With photometric detector
92 ...With volumetric detector
93 ..Including means dividing sample stream into plural parallel segments having diverse treating means and the analytical result compared or combined
94 ..Combustible gas detector
95 ...With thermoelectric detector
96 ....Wheatstone bridge
97 .....With specific coating on bridge element
98 ..Analysis based on electrical measurement
99 .Miscellaneous laboratory apparatus and elements per se
100 ..Pipette or other volumetric fluid transfer means
101 ..Including means for separating a constituent, e.g., filter, condenser, extractor, etc.
102 ..Container
103 ..Valve or connector structure
104 ..Holder, support, housing, or hood
105 CONTROL ELEMENT RESPONSIVE TO A SENSED OPERATING CONDITION
106 .Responsive to liquid level
107 .Control element directly mechanically linked to separate sensor
108 .Control element responds as a function of a variable signal from a sensor
109 ..Controls heat transfer
110 ..Controls flow rate of a material to or from a contact zone
111 ...Material is an input to contact zone
112 .Control element is fluid pressure sensitive
113 ..Pressure-relief valve (e.g., pop-off valve) or check valve
114 .Control element is a binary responsive valve
115 ..Valve diverts flow from a contact zone
116 .Sensed condition is operating time and control is operation sequencer
117 WITH SAFETY FEATURE
118 .Preventing opening of closure of pressurized apparatus at unsafe pressure
119 WITH INDICATING, SIGNALLING, RECORDING, SAMPLING, OR INSPECTION MEANS
120 FOR DEODORIZING OF, OR CHEMICAL PURIFICATION OF, OR GENERATION OF, LIFE-SUSTAINING ENVIRONMENTAL GAS
121 .With means exposing gas to electromagnetic wave energy or corpuscular radiation
122 .Including solid, extended surface, fluid contact reaction means (e.g., Raschig rings, particulate or monolithic catalyst, etc.)
123 .Including means adding material into environmental gas
124 ..And mechanical means creating forced draft at addition site
125 ..With material-heating means
126 ...Material is combusted
127 SHOCK OR SOUND WAVE
128 .Including super or ultra sonic energy generation means
129 CHEMICAL REACTOR
129.1 .Soap making
130 .Bench scale
131 .Organic polymerization
132 ..Closed loop
133 ..Generating foamed plastic
134 ..Including plural sequential reaction stages
135 ..Including reactant agitating means in reaction chamber
136 ...And means rotatably mounting reaction chamber
137 ...Horizontal reaction chamber with screw or worm agitator
138 ..With heat exchanger for reaction chamber or reactants located therein
139 .Fluidized bed
140 ..With liquid present
141 ..Plural reaction beds
142 ...Sequentially arranged
143 ..Including specific wind box or particulate matter support grid
144 ..Including means to strip reaction mass from, or to regenerate, the particulate matter (including fluidized bed regenerators per se)
145 ..And means providing flow of particulate matter into or out of reaction chamber
146 ..With heat exchange means affecting reaction chamber or reactants located therein
147 ..And means mechanically separating and removing particulate bed material from fluid effluent
148 .Ammonia synthesizer
149 .With means simultaneously carrying out conjugated reactions within single reactor
150 .Pigment or carbon black producer
151 ..With means injecting quench stream into reaction chamber downstream of reaction site
152 ..With particulate product collecting surface and means mechanically removing product therefrom
153 ...Moving collecting surface
154 ....Rotary collecting surface
155 .....Disk or plate
156 ..With plural sequential reaction zones or chambers
157 ...With movably or removably mounted plug means for converting reactor from (N) to (N+1) reaction stages
158 ..Vapor phase reaction type
159 .For radioactive reactant or product
160 .Inorganic sulfur acid or anhydride producing type
161 ..Acid is final product
162 .Inorganic hydrator
163 .Explosives synthesizer
164 .Solid reactant type (i.e., absence of fluid reactants)
165 ..Including ignition means for reactant
166 ...Electrically actuated
167 ..Including reactor cooling means surrounding reactor
168 .Waste gas purifier
169 ..Including means providing sequential purification stages
170 ...Plural chemical reaction stages
171 ....Solid, extended surface, fluid contact type
172 ....And means downstream of a stage for injecting a reactant into waste gas for interreaction in subsequent stage

CHEMICAL REACTOR
.Waste gas purifier
173 ..With heat exchanger for reaction chamber or reactants located therein
174 ...Electrical type
175 ...Regenerative heat sink
176 ..Including waste gas flow distributor upstream of reaction site and within reaction chamber modifying velocity profile of gas
177 ..Including solid, extended surface, fluid contact reaction means, e.g., inert Raschig rings, particulate absorbent, particulate or monolithic catalyst, etc.
178 ...And contact regenerating means or means for cleaning an internal surface of the reaction chamber
179 ...Fixed bed with resilient or differential thermal expansion compensating bed support means
180 ...Unitary (i.e., nonparticulate) contact bed (e.g., monolithic catalyst bed, etc.)
181 ...Fixed annularly shaped bed of contact material and means directing gas therethrough substantially perpendicular to longitudinal axis of bed
182 ..Including means injecting combustion fuel into reaction chamber in direct contact with waste gas
183 ...And means mixing combustion fuel with waste gas upstream of reaction site
184 .For chemically destroying or disintegrating solid waste, other than burning alone
185 .For chemical recovery of chemicals from waste paper making liquor
186 .With means applying electromagnetic wave energy or corpuscular radiation to reactants for initiating or perfecting chemical reaction
186.01 ..Magnetic
186.02 ...Object protection
186.03 ...With electrical discharge
186.04 ..Electrostatic field or electrical discharge
186.05 ...Treating surface or solid substrate
186.06 ....Surface in metal
186.07 ...Ozonizers
186.08 ....With preparatory or product-treating means
186.09 .....With drying means
186.1 .....With filtering or particle removal means
186.11 .....With cooling, compression, condensation, or liquefying means
186.12 ....With subsequent use means
186.13 ....With electrode moving means
186.14 ....With fluent reactant flow control means
186.15 ....With current control or special electrical supply means
186.16 .....With pulse generating means
186.18 ....Cylindrical electrode
186.19 .....With heating or cooling means
186.2 ....With heating or cooling means
186.21 ...Arc or spark discharge means
186.22 ....With electrode or reaction space heating or cooling means
186.23 ....With preparatory or product-treating means
186.24 .....With nitrogen fixation means
186.25 .....With cooling or pressurizing means
186.26 ....With electrode moving means
186.27 .....With current control means
186.28 ....With current control means
186.29 ...With RF input means
186.3 ..With ultraviolet radiation generating means
187 .Combined
188 .Including plural reaction stages
189 ..And means providing discrete sequential reaction stages, e.g., train, etc.
190 ...Plural solid, extended surface, fluid contact reaction stages each containing, e.g., inert Raschig rings, particulate sorbent, particulate or monolithic catalyst, etc.
191 ....Superimposed reaction stages in single reaction chamber
192 ....At least one reaction stage formed of fixed, annularly shaped bed of contact material and means directing reaction stream therethrough substantially perpendicular to longitudinal axis of bed
193 ...Reaction stages located within single reaction chamber
194 ....And means downstream of a stage for internally injecting a reactant into a reaction stream for interreaction in a subsequent stage, or injecting an internal quench stream into reaction stream passing between stages
195 ....Means within reaction chamber redistributing reaction stream as it passes between adjacent stages
196 ..Including plural parallel reaction stages with each stage in form of a reaction tube
197 ...Tubular stages in single reaction chamber
198 .Including heat exchanger for reaction chamber or reactants located therein
199 ..Electrical type
200 ..Indirect heat-exchange tube within reaction chamber with a nonreactant heat-exchange fluid passing therethrough
201 ...Tube and shell type
202 ..Heat-exchange jacket surrounding reaction chamber
203 ...Including fluid-transfer means connecting chamber to heat-exchange jacket
204 ...Means associated with jacket providing combustion gas as heat-exchange medium
205 ...Including baffle or stirring means disposed within jacket or chamber, the baffle means within chamber connected directly to wall thereof
206 ..Regenerative heat sink
207 ..Means injecting internal quench stream into reaction stream downstream of reaction stage
208 ..Apparatus operates at positive pressure
209 .Including means rotating reaction chamber during use
210 ..And means wiping or scraping interior surface of reaction chamber
211 .Including solid, extended surface, fluid contact reaction means, e.g., inert Raschig rings, particulate absorbent, particulate or monolithic catalyst, etc.

CHEMICAL REACTOR

.Including solid, extended surface, fluid contact reaction means, e.g., inert Raschig rings, particulate absorbent, particulate or monolithic catalyst, etc.

212 ..With means removing and recovering product from extended surface contact material

213 ..Particulate contact material type and means providing flow of particulate material into or out of reaction chamber with reactants or products

214 ...Transfer line type reaction chamber

215 ...And internal mixing means

216 ..Compact bed of particulate, fluid contact material and means providing gravity flow of material within bed

217 ..And means upstream of extended surface, fluid contact means removing particulate impurities from reactant stream

218 ..Fixed annularly shaped bed of contact material and means directing reactant therethrough substantially perpendicular to longitudinal axis of bed

219 ..And means loading contact material into, or unloading contact material from, reactor or means providing internal contact material reservoir

220 ..And reactant flow distributor upstream of contact means and within reaction chamber modifying velocity profile of reactant flow

221 ..Fixed contact bed type with resilient or differential thermal expansion compensating bed support means

222 ..Unitary (i.e., nonparticulate) contact bed, (e.g., monolithic catalyst bed, etc.)

223 ..With contact material regenerating means per se or combined with reactor

224 .Including internal mixing or stirring means

225 ..Mechanical type stirring means

226 ...In positive pressure reactor

227 ...Including a draft tube for internal recirculation

228 ...Including flow directing baffle attached directly to reaction chamber wall

229 ...Longitudinally extending spiral stirring means

230 ..Thermosyphon or differential density mixing means, e.g., means internally recycling reaction mass via differential density pumping, etc.

231 ...Gas sparger type mixing means submerged in liquid reactant

232 .Including solid reactant and means charging solids into, or dischanging solids from, reaction chamber

233 ..Having both charge and discharge means along with means conveying solids therebetween located within reaction chamber

234 .Including external recycle loop

235 ..And means heating or cooling loop or reaction mass located therein

236 .Including means separating reaction chamber into plural reactant-containing compartments and means moving reactant therebetween

237 ..Movably mounted container type separating means and means moving same

238 ..Solid reactant containing perforated or porous container type separating means

239 .Reaction chamber includes at least one perforated, porous, or semipermeable wall and is adapted for holding solid reactant

240 .Including specific material of construction

241 ..Reactor liner

242 .Positive pressure type

243 PHYSICAL TYPE APPARATUS

244 .Including serially disposed vaporizing heating means and solid material deposition means maintained at a temperature lower than said heating means

245 .Crystallizer

246 ..Including shaping surface

247 ..Particulate feed source spaced from the substrate

248 ..Including crucible

249 ...Seed puller

250 ..Crucible-free zone refining

251 ..Including means separating and conveying crystals to a melting zone

252 ..Hydraulic classifier with crystallizer

253 ..Including feed compartment for introducing nutrient

254 ..Movable crystallizer or scraping means

255 .Means separating or dissolving a material constituent

256 ..Liquid-liquid contact means

257 ...Including pulsator, adjustable plates, or plural inlets, e.g., spraying, etc.

258 ...Including rotating chamber or rotating member within chamber, e.g., mixer-settler, etc.

259 ....Having rotating member within chamber

260 ...Including heating and cooling means

261 ..Liquid-solid contact means

262 ...Sulfur extraction

263 ...Including monolithic nonporous body of solute

264 ...Including means restricting solvent contact to one end of body of solute

265 ...Buoyant holder

266 ...Manual or mountable holder, e.g., soap holder, etc.

267 ...Including means to remove solids from a filter

268 ...Conveyor support for solid material during contact, e.g., bucket, etc.

269 ...Including rotating member

270 ....Member is container

271 .....Including internal rotating member

272 .....Partitions divide container

273 ....Member conveys material into and out of container, e.g., screw propeller, etc.

274 ...Including perforated member which is nonlinear or inclined with respect to the major axis of container

275 ...Including parallel perforated members perpendicular to, or parallel to, major axis of container

276 ...Side wall of holder perforated

277 ....Perforations of holder form inlet for solvent

PHYSICAL TYPE APPARATUS
.Means separating or dissolving a material constituent
..Liquid-solid contact means
278 ...Including plural orifice inlet, or deflector adjacent inlet for solvent flow
279 ....Having inlet submerged within body of a solid solute
280 ...Solvent vapor condenser
281 ...Means recirculating solvent
282 ...Including bypass
283 ...Including dip tube for inlet or outlet of fluid solvent
284 ...Internal heater, e.g., steam coil, etc.
285 ..And heating means
286 ...Including mechanical comminuting or conveying means
287 ....Within treating vessel
288 ...Including means removing vapor from treated material
289 ....And direct contact heating fluid means within separating or dissolving chamber vessel
290 ....And indirect contact heating fluid means in separating or dissolving chamber
291 .Combined
292 .Apparatus for treating solid article or material with fluid chemical
293 ..Fluid having simultaneous diverse function
294 ..Including flexible or collapsible treating chamber
295 ..Including pressure treating chamber (above ambient)
296 ...Fluid pressure maintains closure or seal
297 ...And rack, support or handling means
298 ...And vaporizer, e.g., boiler, etc.
299 ....Constituting treating chamber
300 ..Including rack, support or handling means
301 ...Apparatus closure operates means immersing article or material in liquid chemical
302 ...For treating container or covers therefor
303 ....Container is inverted
304 ....Including endless conveyor
305 .Including gas generating means
306 .Including means for adding a material to a gas
307 .Heat treating vessel with heating means
308 ..Including multiple stages
309 ..Including comminuting, kneading, or surface-wiping means interior or vessel
310 ELEMENTS OR ADJUNCTS
311 .Bed support means (e.g., support grid or plate for supporting particulate bed of contact material, etc.)
312 .Tube element containing extended surface contact reaction means (e.g., a tube internally coated or packed with a catalyst, etc.)

CROSS-REFERENCE ART COLLECTIONS

* * *

901 POLYMER DISSOLVER
902 SODIUM CHLORIDE AND POTASSIUM CHLORIDE DISSOLVER
903 RADIOACTIVE MATERIAL APPARATUS
904 NITROGEN FIXATION MEANS
905 MISCELLANEOUS LIQUID STERILIZATION MEANS
906 PLASMA OR ION GENERATION MEANS
907 CORONA OR GLOW DISCHARGE MEANS

1 TREATING MIXTURE TO OBTAIN METAL CONTAINING COMPOUND
2 .Radioactive metal (At. No. 84+ or radioactive isotope of another metal)
3 ..Actinide series metal (At. No. 89+)
4 ...Removing cladding or coating from fuel element
5 ...Fusing
6 ...Ion exchanging or sorbing
7 ....Organic synthetic resin
8 ...Liquid-liquid extracting
9 ....Organo-nitrogen solvent
10 ....Organo-phosphorus solvent
11 ...Forming insoluble substance in liquid
12 ....By co-precipitating with carrier
13 .....Carrier contains bismuth
14 .....Carrier contains lanthanum
15 ....Forming compound containing plural metals or metal and ammonium
16 ....Forming peroxide (e.g., UO4, etc.)
17 ....Carbonate leaching
18 ....Acid leaching
19 ...Volatizing
20 ...Acid leaching
21.1 .Rare earth metal (At. No. 21, 39, or 57-71)
21.5 ..Ion exchanging or liquid-liquid extracting
22 .Platinum group metal (Ru, Rh, Pd, Os, Ir, or Pt)
23 .Group IB metal (Cu, Ag, or Au)
24 ..Ion exchanging or liquid-liquid extracting
25 ..Sorbing or magnetic separating
26 ..Flotation
27 ..Leaching, washing, or dissolving
28 ...Specified particle size
29 ...With a cyanide compound
30 ....And pressurizing
31 ....And agitating
32 ...With ammonia or ammonium containing compound
33 ....Specified temperature
34 ...Forming insoluble substance in liquid
35 ....Forming oxide or carbonate
36 ....Sulfating
37 ....Sulfiding
38 ...Halogenating
39 ....Specified temperature
40 ....With chlorine gas or chlorinated water
41 ...Sulfating
42 ..Forming insoluble substance in liquid
43 ...Specified pH
44 ..Volatizing copper, silver, or gold
45 ..Sulfating
46 ..Halogenating
47 ..Desulfurizing or de-arsenating
48 ..Forming sulfide or matte
49 .Group VIIB metal (Mn, Tc, or Re)
50 ..Forming insoluble substance in liquid
51 ...Halogenating
52 ...Sulfating
53 .Group VIB metal (Cr, Mo, or W)
54 ..Ion exchanging or liquid-liquid extracting
55 ..Forming insoluble substance in liquid
56 ...Ammoniating or nitrating
57 ...Sulfating
58 ...Forming compound containing plural metals
59 ..Volatizing
60 ...As a compound containing chlorine
61 ..Forming compound containing plural metals
62 .Group VB metal (V, Nb, or Ta)
63 ..Ion exchanging or liquid-liquid extracting
64 ..From organic liquids
65 ..Forming insoluble substance in liquid
66 ...Hydroxylating or hydrating
67 ...Ammoniating or sulfating
68 ..Leaching, washing, or dissolving
69 .Group IVB metal (Ti, Zr, or Hf)
70 ..Ion exchanging or liquid-liquid extracting
71 ..Forming compound containing plural metals
72 ...Halogen containing
73 ..Separating Group IVB metals from each other
74 ..Utilizing fluidized bed
75 ..Volatizing
76 ...Titanium, zirconium, or hafnium
77 ....Removing undesirable matter from vapor
78 ....Specified physical form of feed solids
79 ....Contacting feed solids with chlorine gas
80 ..Chemically converting for physical solid-solid separation
81 ..Treating with nitrogen or nitrogenous compound
82 ..Treating with sulfur or halogen containing acid
83 ...Forming metallic iron or insoluble iron containing compound
84 ..Treating with compound containing alkali metal or alkaline earth metal
85 ..Forming insoluble compound containing Group IVB metal
86 ..Dissolving or leaching of iron
87 .Group VA metal or arsenic (Sb, Bi, or As)
88 ..Volatizing
89 .Group IVA metal (Ge, Sn, or Pb)
90 ..Detinning
91 ...Treating with free halogen or hydrogen halide
92 ..Forming insoluble substance in liquid
93 ...Pressurizing or agitating during reaction
94 ...Halogenating
95 ...Nitrating or sulfating
96 ..Volatizing germanium or tin
97 ..Volatizing lead
98 ..Leaching, washing, or dissolving
99 .Group IIB metal (Zn, Cd, or Hg)
100 ..Ion exchanging or magnetic separating
101 ..Forming insoluble substance in liquid
102 ...Agitating during reaction
103 ...Halogenating
104 ...Hydroxylating or hydrating
105 ...Carbonating
106 ...Sulfating
107 ..Volatizing zinc, cadmium, or mercury
108 ...Mixture contains lead
109 ..Leaching, washing, or dissolving
110 ..Desulfurizing
111 .Group IIIA metal or beryllium (Al, Ga, In, Tl, or Be)
112 ..Ion exchanging or liquid-liquid extracting
113 ..Magnetic separating
114 ..Forming compound containing ammonium and metal
115 ..Forming compound containing plural metals
116 ...And halogen
117 ...And sulfur
118 ...Aluminosilicate
119 ...Alkali metal aluminate
120 ....From alunite
121 ....From bauxite
122 ..Forming insoluble substance in liquid

TREATING MIXTURE TO OBTAIN METAL CONTAINING COMPOUND
.Group IIIA metal or beryllium (Al, Ga, In, Tl, or Be)
..Forming insoluble substance in liquid
123 ...Subjecting mixture to pressure, vacuum, or steam
124 ...Agitating during reaction
125 ...Nitrating
126 ...Halogenating
127 ...Hydroxylating or hydrating
128 ...Sulfating
129 ...Carbonating
130 ..Destroying or separating organic impurity
131 ..Leaching, washing, or dissolving
132 ...With acid
133 ..Volatizing
134 ...Beryllium
135 ...Group IIIA metal
136 ....Utilizing elemental halogen as reactant
137 ..Utilizing carbon as reducing agent
138 .Iron group metal (Fe, Co, or Ni)
139 ..Ion exchanging or liquid-liquid extracting
140 ..Forming insoluble substance in liquid
141 ...Subjecting mixture to pressure, vacuum, or steam
142 ...Agitating during reaction
143 ...Utilizing or forming nitrogenous compound
144 ....Carbonating, hydroxylating, or hydrating
145 ....Sulfating
146 ...Sulfating
147 ....Halogenating, hydroxylating, or hydrating
148 ..Utilizing fluidized bed
149 ..Volatizing iron, nickel, or cobalt
150 ..Leaching, washing, or dissolving
151 ..Converting metal to magnetic form
152 ...At specified temperature
153 ..Desulfurizing
154 ...At specified temperature
155 .Alkaline earth metal (Mg, Ca, Sr, or Ba)
156 ..Magnetic separating
157 ..Ion exchanging or liquid-liquid extracting
158 ..Forming insoluble substance in liquid
159 ...Subjecting mixture to pressure, vacuum, or steam
160 ...Agitating during reaction
161 ...Specified particle size used or made
162 ...Nitrating or ammoniating
163 ...Halogenating
164 ...Hydroxylating or hydrating
165 ...Carbonating
166 ...Sulfating
167 ..Treating phosphate rock or asbestos
168 ..Mixing fuel with starting mixture
169 ..Separating magnesium and calcium from each other (e.g., treating dolomite, etc.)
170 ..Treating impure sulfate (e.g., barite, etc.)
171 ...Calcining gypsum
172 ....With steam or at specified temperature
173 ..Treating impure carbonate (e.g., oyster shells, etc.)
174 ...Forming calcium carbide
175 ...Calcining
176 ....Utilizing vacuum or steam
177 ....With agitating or at specified temperature
178 ..Mixture contains halogen or sulfur
179 .Alkali metal (Li, Na, K, Rb, or Cs)
179.5 ..Lithium
180 ..Decomposing amalgam or other alloy
181 ..Ion exchanging or liquid-liquid extracting
182 ..Regenerating solution
183 ...Hydroxide solution
184 ..Forming insoluble substance in liquid
185 ...Fluorinating or defluorinating
186 ...Carbonating
187 ....Utilizing or forming nitrogenous compound
188 ....Subjecting mixture to pressure, vacuum, or steam
189 ....Utilizing carbon dioxide as reactant
190 .....Mixture contains metal chloride
191 ....Halogenating
192 ....Hydroxylating or hydrating
193 ....Sulfating
194 ...Utilizing or forming nitrogenous compound
195 ...Subjecting mixture to pressure, vacuum, or steam
196 ...Agitating during reaction
197 ...Halogenating
198 ...Hydroxylating or hydrating
199 ...Sulfating
200 ..Volatizing an alkali metal
201 ..Agitating during heating or reaction
202 ..Treating with acid or acid salt
203 ..Subjecting mixture to pressure, vacuum, or steam
204 ...Mixture contains organic impurity
205 ...Leaching or forming water soluble substance
206 R ..Mixture contains organic or carbonaceous impurity
206 T ....Alkali carbonate from trona
207 ...Burning the impurity
208 ..Water leaching or forming water soluble substance
209 ..Carbonating
210 MODIFYING OR REMOVING COMPONENT OF NORMALLY GASEOUS MIXTURE
210.5 .Direct contact with molten material
212 .Mixture is exhaust from internal-combustion engine
213.2 ..Utilizing as solid sorbent, catalyst, or reactant a material containing a transition element
213.5 ...Group VIII element
213.7 ...Including successive stage treatments to modify or remove a different component in each stage
219 .Molecular oxygen or ozone component
220 .Carbon dioxide or hydrogen sulfide component
221 ..Utilizing thionate or thiosulfate as reactant
222 ..Reacting mixture with sulfur dioxide, sulfite or bisulfite
223 ..Utilizing reactant containing arsenic, phosphorus or boron
224 ..By oxidizing or burning component
225 ..By suspension of metal oxide or hydroxide particles in liquid
226 ..Utilizing organic reactant
227 ...Phenolate or phenolic type
228 ...Amine
229 ....Ethanolamine
230 ..Utilizing solid sorbent, catalyst or reactant
231 ...Iron oxide or hydroxide
232 ..Utilizing carbonate as reactant
233 ...And regenerating reactant by incoming actifying gas
234 ..Utilizing ammonium or metal hydroxide solution

	MODIFYING OR REMOVING COMPONENT OF NORMALLY GASEOUS MIXTURE
235	.Nitrogen or nitrogenous component
236	..Component also contains carbon (e.g., cyanogen, hydrogen cyanide, etc.)
237	..Ammonia
238	...Utilizing liquid as reactant
239	..Utilizing solid sorbent, catalyst or reactant
240	.Halogenous component
241	..Free halogen
242	.Sulfur or sulfur containing component
243	..Utilizing liquid reactant having organic portion
244	..Utilizing solid sorbent, catalyst or reactant
245.1	.Organic component
245.2	..Utilizing liquid reactant
245.3	..By burning or catalytically combusting component
246	.Carbon monoxide component
247	..Utilizing solid sorbent, catalyst or reactant
248	.Hydrogen component
215.5	.Solid component
249	RADIOACTIVE (AT. NO. 84+ OR RADIOACTIVE ISOTOPE OF ANOTHER ELEMENT)
250	.Transuranium compound
251	..Plutonium containing
252	.Thorium compound
253	.Uranium compound
254	..Binary compound
255	...Hydrogen containing
256	...Carbon containing
257	...Chlorine containing
258	...Fluorine containing
259	....Tetrafluoride
260	...Oxygen containing
261	....Dioxide
262	INERT OR NOBLE GAS OR COMPOUND THEREOF
263	RARE EARTH COMPOUND (AT. NO. 21, 39, OR 57-71)
264	CHANGING COLOR CHARACTERISTIC OF IMPURITY
265	WITH ADDITIVE
266	.For stabilizing crystal size or shape
267	.Including anti-caking or anti-hygroscopic function
268	..Additive contains organic portion
269	.Including corrosion inhibitor
270	.For sulfur trioxide
271	..Additive contains metal, boron or silicon
272	.For hydrogen peroxide
273	..Additive contains metal, boron or silicon
274	.Coating or binder
275	.Additive contains metal, boron or silicon
276	BORON OR COMPOUND THEREOF
277	.Oxygen containing
278	..Binary compound
279	..Ternary compound containing metal or ammonium
280	...Utilizing dissolved or liquid reactant
281	....Peroxide
282	...Carbon containing
283	...Ternary compound containing hydrogen
284	.Nitrogen and hydrogen containing
285	..Ternary compound
286	.Hydrogen and metal or ammonium containing
287	..Utilizing halogen containing reactant
288	..Utilizing oxygen containing reactant
289	.Binary compound (e.g., boride, etc.)
290	..Nitrogen containing
291	..Carbon containing
292	..Halogen containing
293	...Fluorine
294	..Hydrogen containing
295	...By reacting metal hydride or organic derivative thereof
296	...By reacting free hydrogen
297	..Refractory metal containing (Ti, V, Cr, Zr, Nb, Mo, Hf, Ta, or W)
298	.Elemental boron
299	PHOSPHORUS OR COMPOUND THEREOF
300	.Halogen containing
301	..Fluorine
302	.Nitrogen containing
303	.Sulfur containing
304	.Oxygen containing
305	..Metal or ammonium containing
306	...Plural metal or metal and ammonium containing
307	...Hydrogen containing
308	....Orthophosphate
309	.....Utilizing phosphoric acid or its anhydride as reactant
310	......And ammonia
311	...Orthophosphate
312	....Alkali metal or ammonium containing
313	.....Utilizing phosphoric acid as reactant
314	...Metaphosphate
315	...Triphosphate or tetraphosphate
316	..Ternary compound containing hydrogen
317	...Orthophosphoric acid
318	....Utilizing reactant containing silicon or carbon
319	....Reacting an acid and phosphate rock
320	.....Sulfuric acid
321 R	....Purification or recovery
321 S	......Organic solvent extraction
322	.Elemental phosphorus
323	..Utilizing a phosphate as reactant
324	SILICON OR COMPOUND THEREOF
325	.Oxygen containing
326	..Metal containing (i.e., silicate)
327	...Aluminum containing
328	....Aluminosilicate
329	.....By precipitating or gelling
330	......Utilizing a sulfate as reactant
331	...Alkaline earth metal containing (Mg, Ca, Sr, or Ba)
332	...Alkali metal containing (Li, Na, K, Rb, or Cs)
333	....By precipitating or gelling from silicate solution
334	....By heat treating silica and the alkali metal
335	..Silica
336	...By hydrolyzing vapor phase silicon compound
337	...By oxidizing volatile silicon compound (e.g., combustion, etc.)
338	...By gelling
339	...By precipitating
340	...By purifying sand
341	.Halogen containing
342	..Halogenated silane
343	..Volatizing a solid
344	.Binary compound (e.g., silicide, etc.)
345	..Of carbon (i.e., silicon carbide)
346	...By reacting vapor phase silicon compound with carbon or carbon containing compound
347	..Of hydrogen (e.g., silane, etc.)
348	.Elemental silicon
349	..From silicon containing compound
350	...Utilizing reducing substance
351	NITROGEN OR COMPOUND THEREOF (EXCEPT AMMONIUM SALT OF NON-NITROGEN ACID)
352	.Ammonia or ammonium hydroxide
353	..From nitride of metal or silicon

	NITROGEN OR COMPOUND THEREOF (EXCEPT AMMONIUM SALT OF NON-NITROGEN ACID)
	.Ammonia or ammonium hydroxide
354	..And producing inorganic carbon and nitrogen containing compound
355	..By hydrolyzing inorganic carbon and nitrogen containing compound
356	..From ammonium compound
357	...Utilizing calcium compound
358	..From organic material containing nitrogen
359	..From elemental hydrogen and nitrogen
360	...With exchanging heat between catalyst and synthesis or effluent gas
361	...Utilizing plurality of catalyst beds or portions
362	...Utilizing metal containing catalyst
363	....Alkali or alkaline earth metal
364	.Carbon containing
365	..And oxygen containing (e.g., fulminate, cyanate, etc.)
366	..And sulfur containing (e.g., thiocyanate, etc.)
367	..And iron containing (e.g., ferrocyanide, etc.)
368	..Cyanamide radical containing
369	...And hydrogen containing
370	...Utilizing carbide as reactant
371	..Ternary compound
372	...Hydrogen cyanide
373	....Employing formamide or formate as reactant
374	....Utilizing nitric oxide or free nitrogen as reactant
375	....Employing ammonia as reactant
376	.....And using catalyst
377	....Utilizing metal cyanide as reactant
378	...Using cyanamide as reactant
379	...Utilizing hydrogen cyanide as reactant
380	...Utilizing free nitrogen as reactant
381	....And using catalyst
382	....Utilizing carbon reactant from specified source
383	..Halogen containing
384	..Binary (e.g., cyanogen, etc.)
385	.Oxygen containing
386	..Halogen containing
387	..Hydrogen containing
388	...Sulfur containing
389	....Sulfamic acid
390	...Nitric acid
391	....By reacting a salt and an acid
392	....Utilizing ammonia as reactant
393	....Utilizing nitrogen oxide as reactant
394	.....Nitrogen peroxide
395	..Nitrate
396	...Ammonium containing
397	...Utilizing ammonium or metal nitrate as reactant
398	...Utilizing halogen containing reactant
399	....And nitric acid reactant
400	..Binary compound (oxide of nitrogen)
401	...Utilizing nitrosyl chloride as reactant
402	...Utilizing catalyst
403	....And ammonia as reactant
404	.....Catalyst is metal oxide
405	...Nitric oxide (NO)
406	.Binary compound
407	..Hydrazine or hydrazine hydrate
408	...Utilizing halogen or sulfur as reactant
409	..Metal or ammonium containing
410	...Azide
411	...Titanium or zirconium containing
412	...Aluminum containing
413	.Hydrogen containing (e.g., amide, imide, etc.)
414	CARBON OR COMPOUND THEREOF
415 R	.Oxygen containing
415 P	...Percarbonate compounds
415 A	...Carbon monoxide
416	..Carbonyl
417	...Metal containing
418	....Utilizing organic compound as reactant
419 R	..Carbonate or bicarbonate
419 P	....Plural metal containing
420	...Ammonium containing
421	...Alkali metal containing (Li, Na, K, Rb, or Cs)
422	....Hydrogen containing (bicarbonate)
423	.....By carbonating ammoniated brine
424	.....By reacting halogen containing compound
425	.....Sesquicarbonate
426	....Densifying soda ash
427	....By reacting a bicarbonate
428	....By reacting sulfur containing compound
429	....By reacting halogen containing compound
430	...Alkaline earth metal containing (Mg, Ca, Sr, or Ba)
431	....By reacting sulfur or halogen containing compound
432	....By reacting oxide or hydroxide of the metal
433	...Lead containing
434	....By reacting compound containing sulfur or a halogen
435	....By reacting lead acetate or acetic acid
436	.....And utilizing metallic lead as reactant
437	..Carbon dioxide or carbonic acid
438	...From a carbonate
439	.Binary compound (e.g., carbide, etc.)
440	..Refractory metal containing
441	..Calcium containing
442	...By reacting carbon and inorgnic calcium containing compound
443	..Disulfide
444	...By reacting free carbon
445	.Elemental carbon
446	..Diamond
447.1	..Fiber, fabric or textile
447.2	...Product
447.3	...From gaseous reactants
447.4	...Prior treatment before carbonization (except with gaseous oxygen)
447.5	....With metal, metal compound or phosphorus compound
447.6	...Including reaction with gaseous oxygen
447.7	...In specific atmosphere (other than vacuum or air)
447.8	...Controlling varying temperature or plural heating steps
447.9	...Carbonizing cellulosic material
448	..Graphite
449	..Process of manufacturing
450	...Directly from fluid hydrocarbon only
451	....Rapid and discontinuous oxidation
452	....Including flame impinging on cool surface
453	....By contacting with catalyst or hot solid surface
454	.....Hot particulate bed or reaction zone lining or refractory
455	....Specified injection velocity
456	....Specified injection angle (e.g., helical, tangential, etc.)
457	.....At least one radial inlet

CARBON OR COMPOUND THEREOF
.Elemental carbon
..Process of manufacturing
...Directly from fluid hydrocarbon only
458 ....Gas or vapor only as infeed to process
459 ...From carbon monoxide infeed to process
460 ..Treating carbon
461 ..Recovery or purification
462 HALOGEN OR COMPOUND THEREOF
463 .Plural metal or metal and ammonium containing
464 ..Including fluorine
465 ...Including aluminum
466 .Plural diverse halogens containing
467 .Sulfur containing
468 ..Ternary compound containing oxygen
469 ..Binary compound
470 .Ammonium halide
471 ..Recovery or purification
472 .Ternary compound
473 ..Hypohalite or hypohalous acid
474 ...Calcium hypochlorite
475 ..Halogenate (e.g., chlorates, etc.)
476 ..Perhalate or perhalic acid
477 .Chlorine dioxide
478 ..By reacting a chlorate
479 ...And a nitrogenous or carbonaceous compound
480 ...And sulfur dioxide
481 .Hydrogen halide
482 ..By reacting alkali metal salt with sulfuric acid
483 ..Hydrogen fluoride
484 ...From impure starting material
485 ....Fluorspar
486 ..Utilizing an element as reactant
487 ...Reacting elemental hydrogen and elemental halogen
488 ..Recovery or purification
489 .Binary fluorine containing compound
490 ..Alkali or alkaline earth metal containing
491 .Binary compound containing metal
492 ..Refractory metal (Ti, Zr, Hf, V, Nb, Ta, Cr, Mo or W)
493 ..Iron group metal or copper (Fe, Co, Ni or Cu)
494 ..Group IVA metal (Ge, Sn or Pb)
495 ..Group IIIA metal or beryllium (Al, Ga, In, Tl or Be)
496 ...Utilizing carbon or carbon containing compound
497 ..Alkaline earth metal (Mg, Ca, Sr or Ba)
498 ...Anhydrous magnesium chloride
499 ..Alkali metal (Li, Na, K, Rb or Cs)
500 .Elemental halogen
501 ..Ion exchanging or liquid-liquid extracting
502 ..Oxidizing catalytically
503 ..Sorbing
504 ..From mixture containing alkali metal or alkaline earth metal
505 ...Forming insoluble substance in liquid
506 ..By reacting alkali metal halide with sulfur compound
507 ..By reacting hydrogen halide or ammonium halide
508 SELENIUM OR TELLURIUM OR COMPOUND THEREOF
509 .Binary compound
510 .Elemental selenium or tellurium
511 SULFUR OR COMPOUND THEREOF
512 R .Oxygen containing (e.g., sulfite, etc.)
512 A ...Sulfite
513 ..Persulfate
514 ..Thiosulfate
515 ..Dithionite
516 ...Employing amalgam as reactant
517 ..Metal and ammonium containing
518 ..Plural metal containing
519 ..Bisulfite
520 ..Bisulfate
521 ..Ternary compound containing hydrogen
522 ...Sulfuric acid
523 ....Nitrogenous impurity or utilizing nitrogenous catalyst or reactant
524 .....Lead chamber process
525 ....Starting material includes organic or carbonaceous impurity
526 .....Utilizing pressure or vacuum on mixture
527 .....Adding organic compound to mixture
528 .....Contacting mixture with gas, steam or vapor
529 ....Subjecting reactants to pressure, vacuum or steam
530 ....Utilizing metal sulfate
531 ....Purifying acid or reactant
532 ..Sulfur trioxide
533 ...Utilizing catalyst in reaction
534 ....Promoter or successive diverse catalysts
535 ....Catalyst contains oxygen, vanadium, and another metal
536 ....Platinum catalyst
537 .....With sulfate or asbestos carrier
538 ....Oxygen containing catalyst
539 ..Sulfur dioxide
540 ...From acid sludge or waste
541 R ...Utilizing ammonium or metal sulfate as reactant
541 A .....Ammonium salt
542 ...Burning or roasting a sulfur compound
543 ...Burning sulfur
544 ..Sulfate
545 ...Ammonium containing
546 ....Utilizing thiocyanate as reactant
547 ....Employing sulfite or bisulfite as reactant
548 ....Using metal sulfate as reactant
549 ....Employing sulfuric acid as reactant
550 .....Ammonia from waste gas
551 ...Alkali metal containing (Li, Na, K, Rb, or Cs)
552 ....Utilizing chloride as reactant
553 ....Dehydrating
554 ...Alkaline earth metal containing (Mg, Ca, Sr, or Ba)
555 ....Calcium
556 ...Aluminum containing
557 ...Copper containing
558 ...Iron containing
559 ...Lead containing
560 .Ternary compound containing hydrogen and metal (e.g., hydrosulfide, etc.)
561.1 .Binary compound
562 ..Polysulfide
563 ..Hydrogen sulfide
564 ...By catalytic reaction
565 ..Utilizing free sulfur as reactant
566 ..Utilizing sulfate or sulfuric acid as reactant
566.1 ..Sulfide of Cd, Zn, or Hg
566.2 ..Sulfide of alkali metal
566.3 ..Sulfide of alkaline earth metal
567 R .Elemental sulfur
567 A ...From liquid or solid sulfur compound
568 ..Chlorinating
569 ..Reducing sulfur dioxide by carbon containing material
570 ...Catalytic reaction
571 ..Reacting a sulfide
572 ...With steam to form hydrogen sulfide

SULFUR OR COMPOUND THEREOF
.Elemental sulfur
..Reacting a sulfide
573.1 ...Hydrogen sulfide
574 R ....With sulfur dioxide
574 L ......In inorganic liquid
575 .....Utilizing organic solvent or absorbent
576 .....Utilizing promotor containing silica or aluminum
576.2 ....With specified procedure for sulfur recovery or specified conditions for producing sulfur in more recoverable form
576.4 ....By reacting gaseous feed stream with liquid aqueous mixture
576.5 .....Transition metal-containing mixture
576.6 ......Chelated or sequestered transition metal
576.7 .....Organic compound-containing
576.8 ....By reacting gaseous feed with gas containing free oxygen
577 ...Reacting metal sulfide with sulfur dioxide
578 R ..Purifying crude sulfur
578 A ....From ores
579 OXYGEN OR COMPOUND THEREOF
580 .Water (e.g., heavy water, etc.)
581 .Superoxide or ozone
582 .Peroxide
583 ..Alkaline earth metal (Mg, Ca, Sr, or Ba)
584 ..Hydrogen
585 ...From persulfuric acid or persulfate
586 ...From inorganic peroxide
587 ...From organic reactant
588 ....By oxidizing hydroquinone or anthraquinone
589 .....Including dissolving reactant in eater containing solvent
590 .....Including dissolving reactant in alcohol containing solvent
591 ....By oxidizing alcohol or hydrocarbon
592 .Metal containing
593 ..Plural metals or metal and ammonium
594 ...Iron, cobalt, or nickel (e.g., ferrite, etc.)
595 ...Chromium (e.g., chromate, etc.)
596 ....And alkali metal, alkaline earth metal or ammonium containing
597 .....Dichromate
598 ...Titanium (e.g., titanate, etc.)
599 ...Manganese (e.g., manganate, etc.)
600 ...Aluminum (e.g., aluminate, etc.)
601 ...Arsenic (e.g., arsenite, etc.)
602 ....Arsenate
603 .....And lead containing
604 ..Group IB metal (Cu, Ag, or Au)
605 ..Group VIIB metal (Mn, Tc, or Re)
606 ..Group VIB metal (Cr, Mo, or W)
607 ...Chromium
608 ..Group IVB metal (Ti, Zr, or Hf)
609 ...Titanium monoxide or sesquioxide
610 ...Titanium dioxide
611 ....Utilizing titanium halide as reactant
612 .....Titanium tetrahalide
613 ......Reacting with oxiding gas
614 ....In fluidized bed
615 ....Utilizing titanium sulfate as reactant
616 .....And utilizing acid
617 ..Group VA metal or arsenic (Sb, Bi, or As)
618 ..Group IVA metal (Ge, Sn, or Pb)
619 ...Lead
620 ....Utilizing metallic lead as reactant
621 .....Molten
622 ..Zinc
623 ...Volatizing zinc
624 ..Group IIIA metal or beryllium (Al, Ga, In, Tl, or Be)
625 ...Aluminum
626 ....Utilizing acid
627 ....Reacting metallic aluminum with water or water vapor
628 ....Forming catalyst, sorbent activated, or narrow pore alumina
629 ....Hydroxide
630 ....Utilizing carbon or compound thereof as reactant
631 ....Utilizing nitrogenous compound as reactant
632 ..Iron
633 ...Ferric oxide
634 ....Gamma form
635 ..Alkaline earth metal (Mg, Ca, Sr, or Ba)
636 ...Process of manufacturing
637 ....Utilizing carbonate as reactant
638 ....By reacting a sulfur containing compound
639 ....By reacting a nitrogenous or halogenous compound
640 ....By hydrating lime
641 ..Alkali metal (Li, Na, K, Rb, or Cs)
642 ...By reacting sulfur containing compound
643 ...By reacting a nitrogenous or halogenous compound
644 HYDROGEN OR COMPOUND THEREOF
645 .Binary compound
646 ..Alkali metal containing (Li, Na, K, Rb, or Cs)
647 ..Alkaline earth metal containing (Mg, Ca, Sr, or Ba)
647.7 .Deuterium-containing
648.1 .Elemental hydrogen
649 ..Ortho-para conversion
650 ..By decomposing hydrocarbon
651 ...Catalytic reaction
652 ....Including decomposing water
653 .....Catalyst substance contains nickel
654 ......And another metal
655 ..By reacting water with carbon monoxide
656 ...Utilizing metal oxide catalyst
657 ..By reacting water or aqueous solution with metal or compound thereof
658 ...Iron
658.2 ..By direct decomposition of binary compound, e.g., chemical storage, etc.
658.3 ..By reaction of impurities in a stream containing elemental hydrogen
658.5 EXTRACTING, LEACHING, OR DISSOLVING
659 MISCELLANEOUS PROCESS

DIG 19	Geothermal steam purification
DIG 20	Hazardous or toxic waste destruction or containment

CLASS 424 DRUG, BIO-AFFECTING AND BODY TREATING COMPOSITIONS

DECEMBER 1990

1.1	RADIOACTIVE INGREDIENT CONTAINING
2	TESTING, MEASURING, IDENTIFICATION OR SAFETY FEATURE
3	.Animal histology aid (e.g., for microscopic examination, etc.)
4	.X-ray contrast
5	..Halogenated organic compound containing
6	.Printed or embossed unitary dosage form
7.1	.Color or color change (e.g., Ph indicator, fluorescence, etc.)
9	.In vivo testing or diagnosis (at least part of reaction in living animal body)
10	.With taste indicator, emetic, irritant or detoxicant
11	.Blood typing (e.g., A, O, Rh, etc.)
40	COMBUSTIBLE OR CHEMICALLY REACTIVE TO PRODUCE A SMOKE, MIST OR AEROSOL
41	.Elemental sulfur containing
42	.Nitrate containing
400	PREPARATIONS CHARACTERIZED BY SPECIAL PHYSICAL FORM
401	.Cosmetic, antiperspirant, dentifrice
402	.Apparel, fabric, cloth
403	..Insect repellent or moth proofed
404	..Anti-fugial or bacterial
405	.Biocides; animal or insect repellents or Attractants e.g., disinfectants, pesticides etc.
406	..Ingredients for reducing the noxious effect of the active substances to organisms other than pests, e.g., toxicity reducing coingredients for reducing the noxious effect of te active substances to organisms other than pests, e.g., toxicity reducing compositions, self-destructing compostions
407	..Containing material to enhance the sticking of the active ingredients
408	..Capsule or pelleted or tablet
409	..Solid as carrier or diluent
410	...Impregnated or coated food or edible simulative of food e.g., bait, poison, etc.
411	...Impregnated or coated nominal articles e.g., flea collars, etc.
412	....Packaging, cordage building material or container
413	.....Cellulosic material or building material
414	...Impregnated or coated paper or foil
415	....Wrapping paper
416	....Insecticidal paper or foil
417	...Coated particulate form e.g., liposme, etc.
418	....Protein or derivative or polysaccharide orderivative
419	....Natural or synhetic resin
420	....Waxes, fatty acids, etc. e.g., liposomes, etc.
421	....Inorganic particle
422	.Implant or Insert
423	..Surgical implant or material
424	...Membrane or diffusion barrier
425	....Diffusion barrier is matrix
426	...Errodable, resorbable or dissolving
427	..Ocular
428	...Bioerrodable, resorbable or dissolving
429	...Contact lens
430	..Vaginal, urethral, uterine
431	...Tampon
432	...IUD or ring
433	...Depot, pellet, matrix or suppository
434	..Mucosal e.g., nasal, etc.
435	...Mouth
436	...Anal, rectal e.g., suppositories, etc.
437	..Otic
438	.Specially adapted for ruminant animal
439	.Food or edible as carrier for pharmaceutical
440	..Candy, candy coated or chewing gum
441	..Chewable talet or wafer
442	..Animal food
443	.Web, sheet or filament bases; compositionsof bandages, or dressings with incorporated medicaments
444	..Resorbable by the body
445	..Dressings
446	...Medicated gauze pads
447	..Bandages with incorporated medicaments
448	...Pressure sensitive adhesive means
449	...Transdermal or percutaneous
450	.Liposomes
451	.Capsules, e.g., of gelatin, of chocolate, etc.
452	..With claimed designated perfecting feature in contents, e.g., excipient, lubricant, etc.
453	..Telescoping two piece
454	...With tamperproof, locking, or sealing feature
455	..Containing emulsions, dispersions or solutions
456	..Gelatin
457	..Sustained or differential release
458	...Containing discrete coated particles pellets, granules or beads
459	....Organic coatings
460	.....Containing proteins or derivatives thereof, e.g., gelatin, etc.
461	.....Contaning polysaccharide, e.g., cellulose sugars, etc.
462	.....Containing solid synthetic polymers
463	..Coated capsules
464	.Tablets, lozenges or pills
465	..With claimed perfecting feature in contents, e.g., excipient, lubricant,etc.
466	..Effervescent
467	..Printed, embossed, grooved, or perforated
468	..Sustained or differential release type
469	...Discrete particles in supporting matrix
470	....Where particles are granulated
471	...Plural concentric cores
472	...Layered unitary dosage forms
473	....With porous, perforated, apertured, or sieved layer e.g., dalyzing layer, microporous layer, etc.
474	..Coated pills or talets
475	...Organic coatings
476	....Containing waxes, higher fatty acids, higher fatty alcohols, or derivatives thereof, e.g., chocolate
477	....Containing proteins or derivatives thereof
478	.....Gelatin containing
479	....Containing polysaccharide, e.g., sugar, etc.
480	.....Cellulose or derivative
481	....Containing natural gums or resins
482	....Containing solid synthetic polymers
483	...Ion - exchange resins
484	.Matrices
485	..Natural gums, resin or latex
486	..Synthetic polymer
487	...Acrylic acid and derivatives
488	..Polysaccharides, e.g., cellulose, etc.

	Preparations characterized by special physical form
489	.Particulate form, e.g., powders, granules, beads microcapsules and pellets
490	..Coated e.g., microcapsules
491	...Containing proteins and derivatives
492	....Gelatin
493	...Containing polysaccharides e.g., sugars
494	....Cellulose derivatives
495	.....Ethyl cellulose
496	...Containing nat'l gums/resins
497	...Containing solid synthetic polymers
498	...Containing waxes, higher fatty acids higher fatty alcohols or derivatives thereof
499	..Contains proteins or derivative or polysaccharides or derivative
500	..Contains natural gums and resins
501	..contans solid synthetic resin
502	..contains waxes higher, fatty acids, higher fatty alcohols
43	EFFERVESCENT OR PRESSURIZED FLUID CONTAINING
44	.Gas produced in situ by chemical reaction
45	.Organic pressurized fluid (e.g., Freons, etc.)
46	..Powder or dust containing
47	..Topical live body grooming or adorning aid (e.g., hair spray, antiperspirant, etc.)
48	CHEWING GUM TYPE
49	DENTIFRICES (includes mouth wash)
50	.Ferment containing (e.g., enzymes, bacteria, etc.)
51	.Iodine or iodine compound containing
52	.Fluorine or fluorine compound containing
53	.Oxygen or chlorine releasing compound containing
54	.Ammonia, amine or derivative thereof (e.g., urea, etc.)
55	.Hydroxy carboxylic acid or derivative thereof (e.g., methyl salicylate, etc.)
56	.Organic sulfate or sulfonate containing
57	.Phosphate compound containing
58	.Plant extract of undetermined constitution
59	TOPICAL SUN OR RADIATION SCREENING, OR TANNING PREPARATIONS
60	.Aromatic acid or derivative containing (e.g., aminobenzoic acid or methyl salicylate, etc.)
61	MANICURE OR PEDICURE COMPOSITIONS
62	BLEACH FOR LIVE HAIR OR SKIN (E.G., PEROXIDES, ETC.)
63	LIVE SKIN COLORANT CONTAINING
64	.Lip
65	ANTI-PERSPIRANTS OR PERSPIRATION DEODORANTS
66	.Zirconium compound containing
67	.Zinc compound containing
68	.Aluminum compound containing
69	FACE OR BODY POWDERS FOR GROOMING, ADORNING OR ABSORBING
70	LIVE HAIR OR SCALP TREATING COMPOSITIONS (NON-THERAPEUTIC)
71	.Hair shaping
72	..Sulfur-containing carboxylic acid or derivative thereof (e.g., thiogycollic acid, etc.)
73	.Shaving preparation
74	.Plant extract of undetermined constitution
75	EMBALMING OR UNDERTAKING COMPOSITIONS
76.1	DEODORANTS (NON-BODY)
76.2	.Deodorizing substance is evaporatable, sublimable or gas, e.g., deodorization of air, aerosol spray compositions, etc.
76.21	..For chemical reaction with odor producing material or gas evolving composition
76.3	..From a gel or solid matrix, e.g., retarded vaporization compositions, etc.
76.4	...With odor masking substances, e.g., perfumes, etc.
76.5	.Deodorization of waste, refuse or sewage
76.6	..Waste includes fecal material or urine, e.g., feed lot or cage waste, pet litter, etc.
76.7	...For toilet or urinal, e.g., recirculating toilet fluid, etc.
76.8	.With bio-affecting material, i.e., biocide or biostat
76.9	..Inorganic only or containing plant or animal extract
77	ADHESIVE TRAPPING COMPOSITIONS
78	SOLID SYNTHETIC ORGANIC POLYMER CONTAINING
79	.Ion exchange type
80	.Polyvinyl pyrrolidone per se
81	.From acrylic acid or derivative only
82	.From aldehyde
83	.Hydrocarbon only (e.g., polyethylene, ethylenepropylene copolymer, etc.)
84	BAITS, ATTRACTANTS, OR LURES (NON-FOOD)
85.1	LYMPHOKINE
85.2	.Interleukin
85.4	.Interferon
85.5	..Gamma or immune
85.6	..Beta or fibroblast
85.7	..Alpha or leukocyte
85.8	ANTIBODY
85.9	.Sex selection or contraceptive
85.91	.Conjugates with cytotoxic agent e.g., antibody-ricin conjugate containing compositions, etc.
86	.Virus induced antibody
87	.Bacteria induced antibody
88	ANTIGEN CONTAINING
89	.Virus
90	..Irradiated
91	.Dust or pollen
92	.Bacteria
93	WHOLE LIVE MICROORGANISM OR VIRUS CONTAINING
94.1	ENZYME OR COENZYME CONTAINING
94.2	.Multienzyme complexes or mixtures of enzymes
94.21	..Pancreatin
94.3	.Stabilized enzymes or enzymes complexed with nonenzyme, e.g., liposomes, etc.
94.4	.Oxidoreductases (1.) e.g., catalase, dehydrogenases, reductases, etc.
94.5	.Transferases (2.), Lyase, (4.), Isomerase (5.), Ligase (6.)
94.6	.Hydrolases (3.) e.g., urease, lipase, asparaginase, muramidase, etc.
94.61	..Acting in glycosyl compounds, e.g., glycossidases (3.2) lysozyme, nucleosidases, cellulase, etc.
94.62	...Hyaluronidase or mucinase (3.2.1.35, 3.2.1.36)
94.63	..Acting on peptide bonds (3.4) e.g., urokinease, etc.
94.64	...Serene proteinases (3.4.21) e.g., trypsin, chymotrypsin, plasmin, thrombin, elastase, kallikrein, fibrinolysin, streptokinease, etc.

	ENZYME OR COENZYME CONTAINING
	.Hydrolases (3.) e.g., urease, lipase, asparaginase, muramidase, etc.
	..Acting on peptide bonds (3.4) e.g., urokinease, etc.
94.65	...Sh-proteinases (3.4.22) e.g., papain, chymopapain, bromelains, ficin etc.
94.66	...Acid proteinases (3.4.23) e.g., pepsin, renin, chymosin, etc.
94.67	...Metalloproteinases (3.4.24) e.g., collagenase, snake venom zinc proteinase, etc.
520	EXTRACT, BODY FLUID, OR CELLULAR MATERIAL OF UNDETERMINED CONSTITUTION DERIVED FROM ANIMAL IS ACTIVE INGREDIENT
522	.Separated animal oil or solidified form thereof derived from animal flesh and other than from liver or dairy type
523	..Fish oil or solidified form thereof
524	..Whale or porpoise oil or solidified form thereof
525	..Skunk, musk, or mink oil or solidified form thereof
526	..Lard, rind or tallow
528	.Bile, bile acid, bile salt, amniotic fluid, or ascitic fluid
529	.Blood
530	..Plasma
531	..Serum
532	..Platelet
533	..Erythrocyte
534	..Leucocyte
535	.Milk or colostrum, e.g., butter, whey, etc.
537	.Body fluid, or exudate, or transudate other than snake venom, feces, urine, or semen, e.g., lymph, saliva, honey, royal jelly, digestive juice, etc.
538	.Derived from arthropod, e.g., insect, spider, crustacea, etc.
539	..Bee
541	..Cantharide
542	.Derived from snake, e.g., venom, etc.
543	.Waste or feces, e.g., slaughterhouse offal, chicken feet, horn, hair, hide, urine, etc.
545	..Urine
546	...Sex hormone
547	.Derived from mollusk
548	.Derived from musculoskeletal system, other than cardiac muscle, e.g., cartilage, muscle, etc.
549	..Skeleton, e.g., bone, teeth, etc.
550	.Digestive system, e.g., salivary gland, etc.
551	..Gastrointestinal system, e.g., intestine, stomach, gall bladder, etc.
553	...Liver
554	....Fish liver oil or solidified form thereof
555	.....Cod liver oil or solidified form thereof
556	...Pancreas
557	.Respiratory system, e.g., lung, etc.
558	.Urogenital system, e.g., kidney, etc.
559	..Genitalia, e.g., ovary, uterus, prostate, testis, etc.
561	..Germ cell, e.g., ovum, spermatozoa, etc.
562	.Endocrine system, other than the thymus gland, e.g., parathyroid gland, etc.
563	..Adrenal gland
565	..Pituitary gland
568	..Thyroid gland
569	.Cardiovascular system, other than umbilical artery or vein, e.g., blood vessel, heart, cardiac muscle, etc.
570	.Nervous system, e.g., brain, nerve, etc.
571	.Sense organ, e.g., eye, taste bud, etc.
572	.Tissue, other than lymphoid tissue, e.g., connective, etc.
573	..Neoplastic, tumor, or cancer
574	..Adipose or epithelium
577	.Hemic or immune system, e.g., hematopoietic system, bone marrow cells, etc.
578	..Lymphoid tissue, e.g., adenoid, lymph node, etc.
579	...Spleen
580	...Thymus gland
581	.Egg enclosed in shell or a part thereof, e.g., eggshell, egg yolk, etc.
582	.Embryonic structure, e.g., embryo or fetus, etc.
583	..Placenta or umbilical cord
114	PLURAL FERMENTATES OF DIFFERENT ORIGIN (E.G., MIXTURES OF ANTIBIOTICS, ETC.)
115	FERMENTATE OF UNKNOWN CHEMICAL STRUCTURE
116	.Having a known elemental analysis (e.g., antibiotic, etc.)
117	..Sulfur containing
118	..45-55% carbon
119	..Over 55 to 58% carbon
120	..Over 58 to 60% carbon
121	..Over 60 to 62% carbon
122	..Over 62% carbon
123	.Processes of making, purifying or recovering (non-fermentation)
124	..Ion exchange or chromatography
125	FREE CARBON CONTAINING
126	WITH CORROSION INHIBITOR
600	INORGANIC ACTIVE INGREDIENT CONTAINING
601	.Phosphorus or phosphorus compound
602	..Calcium containing
603	...Pyrophosphate
604	..Heavy metal containing
605	..Phosphorus acid
606	..Sodium containing or fluorine containing
607	.Hydrogen metal cyanide, cyanide, cyanate or thio analog thereof
608	..Heavy metal containing (e.g., nitroprusside, etc.)
609	...Thiocyanates
610	..Potassium or lithium containing
611	..Sodium containing
612	..Hydrocyanic acid
613	.Peroxide or compositions of or releasing gaseous oxygen or ozone
614	..Zinc containing
615	..Sodium containing
616	..Hydrogen peroxide
617	.Heavy metal or compound thereof
618	..Silver
619	...Nitrite
620	..Arsenic
621	...With organo-arsenate (e.g., paris green, etc.)
622	...Copper compound of arsenic
623	...Oxygen compound of arsenic
624	...Sodium compound of arsenic
625	...Manganese containing arsenic compound or with added manganese compound
626	...Chromium containing arsenic compound or with added chromium compound
627	...Lead compound of arsenic
628	...Calcium compound of arsenic
629	...With added organic compound
630	..Copper

	INORGANIC ACTIVE INGREDIENT CONTAINING
	.Heavy metal or compound thereof
	..Copper
631	...With cellulose-sulfur compound or lignin
632	...Halogen containing
633	...Hydroxide
634	...Carbonate
635	...Oxide
637	...Sulfur containing
638	...With added organic compound
639	..Manganese
640	...Potassium permanganate
641	..Zinc
642	...For topical application
643	...Orally assimilable or injectable composition
644	..Mercury
645	...Chlorine containing
646	..Iron, cobalt, nickel, vanadium, molybdenum, or palladium
647	...Ferric
648	...Ferrous
649	..Gold or platinum
650	..Tin, gallium, germanium, indium, or tellurium
651	..Antimony
652	..Lead
653	.Bismuth
654	..Cadmium
655	..Chromium
656	...Potassium dichromate
657	.Boron
658	..Borax
659	..Boric acid
660	..Borates
661	.Elemental chlorine or elemental chlorine releasing inorganic compound (e.g., chlorties, hypochlorites, etc.)
662	..Chlorate
663	..Chloride
664	...Ammonium chloride
665	..Alkali metal or alkaline earth metal
666	.Hydrochloric acid
667	.Elemental iodine or iodine compound
668	..Iodate
669	..Iodide
670	...Potassium iodide
671	...Sodium iodide
672	..Iodophors
673	.Elemental fluorine or fluorine compound
674	..Silicofluoride
675	..Calcium containing
676	..Sodium containing
677	.Alkali or alkaline earth chloride (e.g., barium or lithium chloride, etc.)
678	..Calcium chloride
679	..Potassium chloride
680	..Sodium chloride
681	..Magnesium chloride
682	.Aluminum, calcium or magnesium element or compound containing
683	..Magnesium silicate
684	..Aluminum silicate
685	..Aluminum chloride or bromide
686	..Carbonate or bicarbonate
687	...Calcium carbonate
688	..Oxide or hydroxide
689	...With stabilizer or suspending agent
690	...Aluminum hydroxide
691	...Aluminum oxide
692	...Magnesium hydroxide or oxide
693	...Calcium hydroxide
694	....Characterized as lime or slaked lime
695	...Lime-sulfur
696	..Calcium containing sulfur compound, (e.g., calcium sulfate, etc.)
697	...Magnesium sulfate, (e.g., epson salts, etc.)
698	..Alum or burnt alum
699	.Carbon disulfide, monoixde or dioxide
700	..Carbon dioxide
701	..Carbon disulfide
702	.Selenium or compound thereof
703	.Elemental sulfur, or compound thereof
704	..With inorganic siliceous material
705	..Sulfur, per se
706	..Sulfide
707	...Disulfides
708	...Hydrogen sulfide
709	..Sulfate
710	...Ammonium sulfate
711	..Sulfites or thiosulfates
712	..Sulfur dioxide
713	..With added organic compound
714	...Plant extract of undetermined constitution
715	.Carbonate
716	..Ammonium carbonate
717	..Bicarbonate
718	.Nitrates or nitrites or nitric acid or nitrogen oxides
719	.Ammonia or ammonium compound containing
720	..Ammonium chloride
721	..Aqueous ammonia containing
722	.Alkali metal or alkaline earth containing
723	.Elemental bromine or bromine compound containing
724	.Silicon dioxide containing
195.1	PLANT EXTRACT OR PLANT MATERIAL OF UNDETERMINED CONSTITUTION
196.1	.Pine oil, tar, gum, or resin.
197.1	.Tobacco or tobacco extract

CLASS 425 PLASTIC ARTICLE OR EARTHENWARE SHAPING OR TREATING: APPARATUS

1 MEANS UTILIZING FORCE FROM EXPLOSIVE OR THERMIC COMPOSITION
2 SHAPING MEANS EMPLOYING ANATOMICAL BODY OR PORTION THEREOF (I.E., ANIMAL OR PLANT)
3 WITH DIRECT APPLICATION OF MAGNETIC FORCE TO MANIPULATE SHAPING MEANS OR WORK
4 R WITH MECHANICAL MEANS FORMING OR EXPANDING PORES (E.G., FOAMING, ETC.)
4 C ..Continuously
5 MEANS ENCAPSULATING NORMALLY LIQUID MATERIAL
6 MEANS MAKING PARTICULATE MATERIAL DIRECTLY FROM LIQUID OR MOLTEN MATERIAL
7 .By means applying fluid jet or blast to unconfined liquid material
8 .By slinger or rotating liquid comminutor
9 ..Cotton candy maker
10 .And distinct means applying congealing fluid to formed particles
11 PRODUCT OR PREFORM REPAIR OR RESTORING MEANS
12 .Hand manipulable tool
13 .Means feeding fluent stock under pressure
14 .Shape conforming sleeve or deformable pressure wrap means
15 .Tire segment engaging channel box coacting with pressure surface or rim
16 ..Adjustable sidewall channel box
17 .Tire recapping, rebeading or sidewall replacing means
18 ..Simultaneously on plural tires
19 ..Including carcass or tread mold aligning means
20 ..Band or channel type recapping mold
21 ...Including axially supported bead spreading means
22 ...Including sidewall pressure platens
23 ...Means applying pressure to carcass interior
24 ....Means applying fluid pressure directly
25 ...Diametrically separable mold sections coacting with tire carcass
26 .Means for supporting only a portion of a tire
27 ..Expansible internal support
28.1 RESHAPING, RESIZING OR VULCANIZING MEANS FOR TIRE, TIRE TUBE, OR DRIVE BELT
29 .Control means responsive to condition sensing means
30 .Control means responsive to independently operated timer
31 .Means shaping drum shaped preform to tire casing shape
32 ..Mold or housing encasing preform
33 ...And means inserting pressurizing diaphragm into mold or housing
34.1 .Plural female molds for plural preforms
34.2 ..Forming belts (e,g., drive, transmission, endless)
34.3 ..Within separate vulcanizing chamber
35 .Toroidal or annular female shaping means and coacting means holding preform thereagainst
36 ..Including distinct means to engage tire-type bead
37 ..Including core pins forming transverse voids in solid tire portion
38 ..Including means placing preform in mold or removing product from mold
39 ..Female mold surface is expansible
40 ..Including heating or cooling means
41 ...Electrical
42 ...Within cavity of hollow preform
43 ..Coating holding means is expansible structure
44 ..Means to directly apply fluid pressure to preform
45 ...Inner tube type including valve stem feature
46 ..Including removable tire tread shaping portion
47 .Sectional female mold including locking or clamping assembly means
48 .Interior holding means or curing bag inserter, releaser, or remover
49 .Internal mold, form or support for toroid
50 ..Including heating or cooling means
51 ..Expansible surface
52 ...Fluid pressure actuated diaphragm type
53 ....Including valve stem
54 ..Sectional
55 ...Removable portion
56 ....Annular assembly clamping ring
57 ....Internal support held in assembly by cam or wedge means
58 ..Bead clamping means, air bag support means or means sealing tire opening
58.1 .Post cure inflator
59 UTILIZING SUBTERRANEAN FEATURE AS SHAPING MEANS
60 BOOM MOUNTED DEPOSITING AND FORMING MEANS OF THE CARROUSEL TYPE
61 WITH SHIP OR BOAT LAUNCHING MEANS OR DRYDOCK
62 WITH TRANSPORTATION DEVICE FOR RELOCATING MOLDING APPARATUS TO DIFFERENT SITE (E.G., LAND VEHICLE, ETC.)
63 BUILDING FORMS OR CONSTRUCTION ENGINEERING TYPE MOLD WITH REPOSITIONING MEANS FOR PROGRESSIVE MOLDING
64 .Including mold charging means
65 .Means penetrating or embedded in previously formed section to support mold
66 CONTINUOUS FILAMENT FORMING OR FILM CASTING MEANS WITH STRETCHING MEANS COMPRISING PRODUCT ADVANCING MEANS
67 IMMERSED SHAPING ORIFICE DISCHARGING DIRECTLY INTO LIQUID BATH OR SHOWER MEANS
68 .Additional downstream means for treating product by fluid
69 .Shaping orifice and bath or shower means mounted for relative movement
70 .Means directing product through tubular conduit within bath or shower means
71 INCLUDING MEANS ADVANCING CONTINUOUS LENGTH WORK THROUGH DOWNSTREAM LIQUID BATH OR SHOWER MEANS
72.1 SHAPING ORIFICE AND DOWNSTREAM WORK CONTACTING GASEOUS TREATING MEANS
72.2 .Orifice for filaments or fibers (e.g., spinneret)
73 INCLUDING VENTILATING TYPE HOOD OR CHAMBER ENCASING A MATERIAL HANDLER
74 .Recovering or recycling gas or vapor
75 .Material handler is endless casting surface
76 MEANS IMPARTING IRREGULAR DENIER TO FILAMENTS
77 ULTRA HIGH PRESSURE GENERATING DEVICE
78 MEANS FOR MOLDING POWDERED METAL
79 .Continuous length product formation
80.1 AIR FELTING TYPE SHAPING MEANS

AIR FELTING TYPE SHAPING MEANS
81.1 .Means forming stratified products
82.1 .With particle liberating means (e.g., cutting, carding, etc.)
83.1 .Means forming running length product
84 WITH FORAMINOUS OR ABSORBENT MEANS FOR REMOVAL OF VEHICLE OR COMPONENT IN LIQUID FORM DURING OR AFTER SHAPING
85 .Vacuum means
86 INCLUDING HANDLING MEANS OR FEATURE FOR TREATING LIQUID OR VEHICLE LIQUID, OR CONDENSATE
87 HAND MOVABLE, SUBSTRATE TRAVERSING, PLURAL DIMENSION SHAPING MEANS INCLUDING MOLDING MATERIAL SUPPLY
88 WITH FACTORY STRUCTURE FEATURE
89 WITH INTERPOSED NON-ADHERING WEB OR SHEET TYPE PARTING MEANS
90 WITH MEANS APPLYING COATING (E.G., PARTING, ETC.) MATERIAL TO WORK OR WORK CONTACT MEANS
91 .Plural diverse type applicators
92 .Plural spaced applying means applying material to work and work contact means
93 .Immersion type
94 .Means contacting work downstream of shaping member
95 .By means attached to or within male shaping member
96 .Separate means applying material directly to shaping means, dough divider trap chamber, or between work and shaping means
97 ..By means injecting material into extrusion head or nozzle
98 ..To female mold or dough divider trap chamber
99 ...Orbital or conveyor mounted mold
100 ....By spray means or pneumatic conveyor type applicator
101 ..To endless surface type shaping means
102 .To work contact means upstream of shaping means
103 ..By spray means or pneumatic conveyor type applicator
104 .To work downstream of shaping means
105 ..By means striping or applying a definite pattern
106 ..With reshaping or cutting means downstream of coating means
107 WITH MEANS LUBRICATING COOPERATING APPARATUS PARTS
108 ROD END TO ROD END SPLICING OR JOINING TYPE
500 PREFORM ASSEMBLY MEANS AND MEANS FOR BONDING OF PLURAL PREFORMS INVOLVING PREFORM RESHAPING OR VULCANIZING
501 .Vulcanizing or curing means including a conforming preform support
502 ..With means to release or remove product from support
503 .Reshaping means utilizing fluid pressure directly contacting work
504 ..Vacuum or suction
505 .Means forming indefinite length product
506 .With treatment means other than assembling, bonding, shaping or reshaping means
507 ..Means to modify temperature of work or product
508 ...Heating
509 ....And cooling
510 ..Severing means
511 ...And means for forming preform from bulk material
512 ...Plural distinct severing means
513 ....Diverse
514 ...Downstream of bonding means
515 .With additional shaping means to form or reshape preform upstream of bonding means
516 ..Extrusion
517 .Means press fitting or forcibly embedding one preform into another preform
518 .Plural reshaping means
519 ..Opposed, registering, coacting mold cavities
520 .Opposed coacting press members
521 ..Male shaping member and female mold
110 DISTINCT MEANS TO FEED, SUPPORT OR MANIPULATE PREFORM STOCK AND MEANS FOR SHAPING FLUENT OR BULK STOCK TO FORM UNITED PRODUCT
111 .And means to apply stress to preform and uniting in stressed condition
112 .And means to form or reshape preform
113 .Extrusion shaping means
114 ..Means to feed or support plural preforms to or at extrusion means
115 .Endless surface means to shape fluent material
116 .Opposed registering coacting female molds
117 .Female mold type means
118 ..Including hand manipulatable support for edible receiver (e.g., ice cream cone, etc.)
119 ..Shoe last type support for preform
120 ..Plural sources feeding the fluent material
121 ..Means to feed or support common preform to or at spaced female molds
122 ..Means to continuously feed indefinite length preform
123 ..Means to support plural preforms in spaced relation in or at common female mold
124 ...Washer type preform
125 ..Female mold or preform support vertically movable
126.1 ..Means to convey preform to female mold
126.2 ...Stick inserter
127 ..Preform stock acting as reaction shaping surface cooperating with recessed fluent stock shaping means
128 ..Coacting pressure means
129.1 ..Means to charge fuent stock under pressure
129.2 ...Shoe or boot
130 MEANS FEEDING FLUENT STOCK FROM PLURAL SOURCES TO COMMON SHAPING MEANS TO FORM COMPOSITE PRODUCT
131.1 .Extrusion shaping means
131.5 ..Comprising spinnerette
132 ..Intermittent feed
133.1 ..Concentric
133.5 ..For extruding film
134 .Traveling female mold type shaping means
135 CONTROL MEANS RESPONSIVE TO OR ACTUATED BY MEANS SENSING OR DETECTING A CONDITION OR MATERIAL TRIGGERED
136 .Means responsive to abnormal condition completely stop operation of machine
137 ..Means responsive to material remaining in mold from previous molding operation
138 ..Means responsive to improper mold position
139 .Article ejector or stripper control
140 .Control means responsive to product weight or dimension

CONTROL MEANS RESPONSIVE TO OR ACTUATED BY MEANS SENSING OR DETECTING A CONDITION OR MATERIAL TRIGGERED
.Control means responsive to product weight or dimension
141 ..Thickness
142 .Cutter control
143 .Temperature control
144 ..Of mold cavity or fluent material to shaping or discharging orifice
145 .Feed control of material en route to shaping area
146 ..By pressure actuated valve
147 ..By stopping or adjusting flow responsive to material level in collector or mold
148 ..By means responsive to weight of feed material
149 .Molding pressure control means responsive to pressure at shaping area (e.g., injection or press mold, etc.)
150 .Mold motion or position control
151 WITH SAFETY FEATURE
152 .Plural starting buttons or mold operating means dependent upon position of a machine element
153 .Secondary means to prevent accidental motion, (e.g., mold closing, etc.) or means to relieve gaseous pressure
154 .Means to alter operation due to presence of foreign matter or overload
155 WITH CONTROL MEANS RESPONSIVE TO INDEPENDENTLY OPERATED TIMER
156 .For timing period mold is closed or period molding pressure is maintained
157 ..In press mold cycle
158 ...With timer for molding material preheat period
159 .For timing mold filling means
160 .For timing heating or cooling means
161 INTERLOCKED DIVERSE FUNCTION ELEMENTS
162 WITH ELECTRICAL CONTROL SYSTEM
163 .Of diverse shaping means or sequential contact of work with different shaping elements
164 .For severing product from shaped mass
165 .Of product removal from molding surface
166 .Of intermittent delivery of fluent charges to shaping surface
167 .Of ram or platen reciprocation in press molding cycle
168 WITH MEANS ADJUSTING SYNCHRONIZATION OR COMPENSATING FOR WEAR
169 WITH INDICATOR, SIGNAL, RECORDER, ILLUMINATOR, OR INSPECTION MEANS
170 .For molding temperature or pressure
171 .For determining, observing, or recording position of adjustable element
172 ..Element is means determining product size
173 .Means permitting visual inspection by operator
174 MEANS APPLYING ELECTRICAL OR WAVE ENERGY DIRECTLY TO WORK
174.2 .Sonic or supersonic wave energy
174.4 .Radiated energy
174.6 .Electrical energy conducted through work
174.8 R .Electro-static or inductive field
174.8 E ...Electro-static
175 MEANS FORMING A MOLD; OR FLASK, PER SE
176 .Including means to separate subsequently molded product from formed mold (e.g., destructible starch type, etc.)
177 .Press means to form mold
178 .Including ram type feed of molding material or means to break bond between flask and contents
179 .Including, structurally integral fastening means
180 .Three part flask
181 CONVERTIBLE
182 WITH APPARATUS ASSEMBLY OR DISMANTLING MEANS OR WITH IDLE PART
183 .Plural wear or shaping surfaces mounted for alternative use
184 .Shaping and severing means mounted for alternative use
185 .Means permitting removal or substitution of elements during apparatus operation
186 .Including support or guide means for disassembled element
187 .Means excavating from bulk with simultaneous shaping (e.g., ice cream scoop or plugger, etc.)
188 .Pivotally joined housings or housing sections enclosing removable element
189 .By handle or handwheel means
190 .For extrusion or injection type shaping means
191 ..Threaded die or die housing
192 R ..Including securing means retaining separable elements
192 S ....Spinnerets
193 .For press shaping surface
194 ..Calender roll or roll face
195 ..Female mold
196 .Blade type harvesting means or severing means
197 WITH UPSTREAM SCREEN OR PERFORATED PLATE FOR STRAINING, HOMOGENIZING, OR MIXING MATERIAL TO BE SHAPED
198 .Upstream of multi-orifice shaping die
199 .Plural screens or plates
200 WITH SEPARATE AND DISTINCT UPSTREAM AGITATING OR KNEADING MEANS
201 .Mixing roll type (e.g., rubber mills, etc.)
202 .With cutting, severing or comminuting means
203 .With separate and distinct gas withdrawal chamber
204 .Plural means being diverse, or parallel and intermeshing or concentric
205 .Serially arranged chambers each housing a kneading or mixing means
206 .Within or at forming means
207 .Within pressurizing chamber
208 ..By modified screw helix
209 .Agitator or kneader comprises means rotating about a horizontal axis
210 WITH MEANS CLEANING AND PURIFYING ATMOSPHERE SURROUNDING MOLDING DEVICE
211 WITH SOUND MUFFLING OR DAMPENING MEANS
212 WITH MEANS TO RESET OPERATION CYCLE
213 WITH PERSONNEL SUPPORT MEANS
214 WITH MEANS TO RETARD OR STOP MOVING ELEMENT (E.G., BRAKE, ETC.)
215 WITH MEANS TO GATHER EXCESS OR REJECTED STOCK MATERIAL
216 .Dynamic gatherer
217 ..Recycling type
218 FEMALE MOLD AND COOPERATING STOCK SMOOTHING MEANS OR EXCESS STOCK REMOVING MEANS
219 .Means carried by or attached to feeder

FEMALE MOLD AND COOPERATING STOCK SMOOTHING MEANS OR EXCESS STOCK REMOVING MEANS
220 .Conveyor or roll mounted mold with stationary smoothing or removing means
221 .For means excavating from bulk source with simultaneous shaping (e.g., ice cream scoop or plugger, etc.)
222 TUMBLING TYPE AGGLOMERATING MEANS FOR PARTICULATE MATERIAL
223 ENDLESS CASTING SURFACE AND COOPERATING HARVESTING MEANS
224 MEANS CASTING FLUENT STOCK OPERABLY ASSOCIATED WITH SHAPING SURFACE TO FORM INDEFINITE LENGTH PRODUCT
225 WITH SEPARATE APPARATUS CLEANING MEANS
226 .Coacting with diverse apparatus elements
227 .Coacting with forming means or dough divider type trap chamber
228 ..Reciprocating cleaner moving across a plunger face
229 ..Cleaner moving into working engagement
230 ..Cleaner coacting with endless surface press forming means or film forming casting surface
231 ..Cleaner coacting with traveling former
232 .Coacting with work contact means (e.g., conveyor or cutter, etc.) downstream of former
233 SETS OF PRESS COUPLES COMPRISING REGISTERING FEMALE MOLD CAVITIES
234 .Stacked
235 .Coacting cutting; edges on female mold sections
236 .Including positive means to eject product
237 .Mounted on rolls
238 DOUGH DIVIDER TYPE INCLUDING TRAP CHAMBER
239 .Including positive discharge assistant in supply hopper
240 .Reciprocating ram feeding to rotating trap chamber
241 .Rotating trap chamber pickup
522 FEMALE MOLD AND MEANS TO SHAPE PARISON DIRECTLY BY INTERNAL FLUID PRESSURE, (E.G., BLOW MOLD, ETC.)
523 .Utilizing laminated parison
524 .With filling means
525 .Forming baffle, bottleneck, or handle
526 .With heating or cooling means
527 .With means to sever product
528 .Including means to prepare parison
529 ..Parison stretching means
530 ...Comprising staged inflation means
531 ..Parison severing means
532 ..Parison forming extruder
533 ..Parison forming injection mold
534 ..Parison transfer means
535 .Including blowing medium supply means
536 ..Needle
537 .Including product ejector
538 .Plural female molds and means to shape parison at each directly by internal fluid pressure
539 ..With means to support molds for movement with continuously moving work
540 ..With rotary support for molds
541 .Including means to close or lock blow mold
542 FEMALE MOLD AND CHARGER TO SUPPLY FLUENT STOCK UNDER PRESSURE THERETO IN FLUID-TIGHT RELATIONSHIP (E.G., INJECTION MOLD, ETC.)
543 .Molding of thermosetting or cross-linking stock
544 ..Means for transfer molding
545 .To make slide fastener element
546 .With means to evacuate mold or provide controlled environment
547 .With means to heat or cool
548 ..Plural distinct means
549 ..Including heated or cooled nozzle
550 ..Including heated or cooled plasticizer
551 ..Including heated or cooled material supply hopper
552 ..Cooling means for female mold
553 .With preform severing means movable relative to mold
554 ..And product ejector
555 .With shrinkage compensation means
556 .With product ejector
557 .With accumulator, trap chamber, or serially arranged valves between charger and mold
558 ..Changeable volume accumulator
559 ..Accumulator with check valve supplying fluent thereto
560 ..Including valve to alternatively direct fluent stock to accumulator or mold
561 ..Accumulator with plunger of charger acting as valve
562 .With means between charger and mold to cut off flow of fluent stock (e.g., needle valve, baffle, etc.)
563 ..Biased, pressure responsive means
564 ..Nozzle valve
565 ...Mold actuated
566 ...Flush with or entering mold cavity
567 .With coupling between charger and mold
568 ..Including sepcific nozzle
569 ...And means to connect nozzle to mold
570 ...Plural nozzles
571 ...Flush with or entering into mold cavity
572 ..Supplying fluent stock to plural mold cavities
573 ..Including plural passages to single mold cavity
574 .With means to cause relative movement between mold and charger
575 ..Means to move mold
576 ...Rotary mold support
577 .Mold having movable core or movable pin
578 .With normally open stock chamber (e.g., hopper, etc.)
579 ..Charger including a shaping surface (e.g., Briquetting means, etc.)
580 ..And feeder to supply granular fluent stock to charger
581 ...Including plural molds
582 ...Rotary feeder
583 ...Reciprocating feeder
584 ...Air or vacuum utilized to feed stock
585 .Including feeder to supply stock to charger
586 ..Means to feed measured charge
587 ..Screw feeder
588 .Plural mold cavities
589 .With means to close mold
590 ..Varying pressure and/or speed closing
591 ..Common fluid pressure closes mold and performs injection
592 ..Including articulated link
593 ...Toggle
594 ..Charger and closing means on same side of mold
595 .With means to lock mold in closed position

253 FEMALE MOLD, PALLET HANDLING MEANS AND MEANS TO CHARGE FEMALE MOLD
254 .Including magazine type pallet supply means
255 .Pallet supported within mold sidewalls by vertically movable stripper
256 FEMALE MOLD AND MEANS TO FEED MEASURED CHARGE OF FLUENT MATERIAL THERETO
257 .Plural separate and distinct feeders
258 .Means to move feed means to female mold
259 ..Traveling female mold
260 ..Drawer type feed coacting with mold having movable bottom
261 .Means to sequentially move female mold
262 MEANS WITHDRAWING TROWEL TYPE SHAPING MEMBER FROM WITHIN OPEN ENDED MOLD TO SHAPE MATERIAL THEREIN
263 POTTERY WHEEL TYPE SUPPORT AND PROFILE
264 .Including separate and distinct male plunger
265 .Plural profile tools of diverse configuration
266 .Plural female molds or preform supports
267 .Rotatable profile tool
268 .Externally engaging profile tool
269 DIPPING TYPE SHAPING MEANS
270 .Mounted on moving support
271 ..Including means to infect or withdraw gas from internal portion of shaping means
272 ..Means causing diverse motion of shaping means (e.g., rotating during dipping, etc.)
273 ..Means moving immersion bath
274 ..Including stripper means
275 .Dipping form per se
276 MEANS EXCAVATING FROM A BULK SOURCE WITH SIMULTANEOUS SHAPING (E.G., ICE CREAM SCOOP OR PLUGGER, ETC.)
277 .Means includes enclosure for fluids of high specific heat
278 .Including means to arrange shaping surface during penetration of bulk
279 .Including means to aid separation of shape product from bulk
280 .Rotating or oscillating means to aid penetration of bulk
281 .Shaping surface having serrated or cutting edge
282 .Including product release means
283 ..Segmented or expansible shaping surface
284 ..Movable blade
285 ...Pivoted to rim
286 ..Ejector
287 FORMER OF THE DIE EXPRESSING TYPE MAKING DOUGHNUT SHAPES
288 .Relatively movable concentric internal and external members coacting with orifice means
289 PREFORM SEVERING MEANS
290 .Severing means is perforator
291 ..With scoring or diverse severing means
292 .Cutter guided by or cooperating with peripheral edge of female mold
293 ..And crimper
294 .Rotating means comprising circumferentially extending cutting and shaping channels coacting with a roll or platen having complementary channels
295 .Cutter guided by a template or a pattern
296 .Means for forming from bulk material, means for severing and means for reshaping
297 ..Severing means preceding reshaping means
298 .Configuration of cutting implement providing shaping cavity
299 ..Including surface deformation means
300 ..Honeycomb type cutters coacting internally of female mold or mold sidewalls
301 .Diverse severing means
302.1 .Serially arranged with preform reshaping means
303 ..Corrugating reshaper
304 ..Separate and distinct surface deformation means
305.1 ..Severing means preceding shaping means
306 .Plural distinct cutters
307 ..Cutters downstream of former
308 .Means forming from bulk and downstream severing means
309 ..Cutter operated by means extending from within shaping orifice
310 ..Utilizing former as cutter reaction surface
311 ...Moving cutter, stationary former
312 ....Cutter mounted on flexible endless conveyor
313 ....Single assembly plural cutting elements
314 ...Stationary cutter, plural forming
315 ..Utilizing product handler downstream of former as cutter aid
316 ...Single assembly plural cutting elements
317 COMBINED
318 HAND MANIPULABLE SHAPING COUPLE
319 MEANS TO FORM PREFORM FROM BULK AND MEANS TO CONVOLUTE OR TWIST THE PREFORM
320 .Convoluting means includes an endless surface
321 ..Convoluting means includes two or more endless surfaces
322 ..Convoluting means includes a roll
323 PRETZEL BENDING TYPE
324.1 DIVERSE DISTINCT TYPE SHAPING MEANS
325 .Shaping orifice and either a downstream preform reshaping means or vulcanizing means including conforming preform support
326.1 ..Utilizing a fluid pressure differential as a reshaping means
327 ..Reshaping or vulcanizing means is a press
328 .Roll means and diverse press means
329 THREE OR MORE ENDLESS SURFACES COOPERATING TO DEFINE A SHAPING APERTURE
330 THREE OR MORE PLATENS MOVABLE ON INTERSECTING PATHS TO DEFINE A SHAPING CAVITY
331 TRAVERSING ROLL PRESSURIZING MEANS OPERABLY ASSOCIATED WITH DOWNSTREAM PERFORATED PLATE
332 MEANS IMPARTING ROLLING ACTION TO DISCRETE CHARGE OF STOCK TO FORM A BALL
333 .Molding means having material shaping guideway providing arcuate path
334 SETS OF CONVOLUTING OR TWISTING MEANS
335 SETS OF SHAPING COUPLES COMPRISING AN ENDLESS SURFACE FOR PRESS FORMING, RESHAPING (PLURAL STAGE OR PASS) OR VULCANIZING
336 .Corrugating means for running length work
337 .Including intermediate chute, conveyor or guide means

338	GANG-PRESS, PLURAL PARALLEL LEAVES OR PLATENS
339	.Reshaping or vulcanizing means including conforming preform support
340	PLURAL RESHAPING MEANS OR PLURAL VULCANIZING MEANS INCLUDING CONFORMING PREFORM SUPPORT
341	.Including plural feeding means for preforms
342.1	.Including means for contacting work by fluid pressure
343	.Spaced reshaping or vulcanizing means acting on a single preform
344	PLURAL SETS EACH COMPRISING A FEMALE MOLD AND OPPOSED COAXIAL DYNAMIC PRESS MEMBERS
345	.Molds or press members traveling transversely to molding motion
346	SETS OF MALE-FEMALE PRESS MOLDS
347	.Traveling female mold
348 R	..Orbiting
348 S	....Split female mold
349	...Reciprocable mold, non-reciprocable plunger
350	...Including positive downstream ejection means
351	.Including positive means to eject product
352	FEMALE MOLD AND OPPOSED COAXIAL DYNAMIC PRESS MEMBERS
353	.Mold or press member traveling transversely to molding motion
354	.Opposed press members simultaneously moving in the same direction
355	.Opposed press members each moving one at a time toward the other
356	PLURAL SHAPING PLUNGERS OR ROLLS COACTING WITH A SINGLE FEMALE MOLD
357	PLURAL FEMALE MOLD CAVITIES COOPERATING WITH SINGLE PRESS MEMBER
358	.Male-type press member
359	..Transversely traveling female mold cavities
360	...Orbiting about horizontal axis
361	...Orbiting about vertical axis
362	.Roll press member coacting with endless surface having product forming shape imparting cavities
363	PRESS FORMING MEANS, PRESS RESHAPING MEANS, OR VULCANIZING MEANS IS ENDLESS SURFACE TYPE
364 R	.Endless belt coacting with stationary platen or with reciprocating shaping means
364 B	...Bagel
365	.Roll mounted within cooperating drum
366	.Cooperating rolls having nonparallel axes
367	.Including means to adjust relative position of a roll
368	.Expansible roll type
369	.Means corrugating a preform
370	..Endless belt
371	.Cooperating endless belts
372	..Including speed differential means
373	.Roll and coacting endless belt press member
374	.Roll and coacting stationary shaping surface
375	PATTERN CONTROL OF TRAVEL FOR A FORMING MEANS (E.G., DEPOSITING, ETC.)
376.1	STOCK PRESSURIZING MEANS OPERABLY ASSOCIATED WITH DOWNSTREAM SHAPING ORIFICE
377	.Including product handling means
378.1	.Including heating or cooling means
378.2	..Spinneret
379.1	..Plural spaced
380	.Including auxiliary shaping means (e.g., mandrel, etc.) associated with molding orifice
381	..Movable orifice or movable mounted inner mandrel within orifice
381.2	.Centripetal elastic melt extruder type
382 R	.Plural orifices
382 N	...Netting
382.2	..Spinneret type
382.3	.Including additional rotating means downstream of the primary pressurizing means
382.4	.Including restriction upstream of shaping orifice and downstream of primary pressurizing means
383	PREFORM RESHAPING OR RESIZING MEANS: OR VULCANIZING MEANS INCLUDING A CONFORMING PREFORM SUPPORT
384	.Including both heating and cooling means
385	.Surface deformation means only
386	..Sealing wax type
387.1	.Including shaping means comprising fluid pressure contacting work directly
388	..Vacuum or suction means
389	.By fluid pressure actuated flexible diaphragm
390	..Opposed, registering, coacting mold cavities
391	.Convoluting or twisting means
392	.Rod or tubular preform
393	..Mandrel to interiorly support work and means urging work against mandrel
394	.Coacting shaping surfaces (e.g., pressure surfaces, etc.)
395	..Opposed, registering, coacting mold cavities
396	..Corrugating platens or dies
397	..Including particular handling means for preform
398	..Relatively reciprocating plunger and female mold
399	...Stationary plunger and reciprocating female mold
400	...Including means positioning or centering work
401	...Including sprue or vent
402	.Utilizing rotary motion of work
403	.Shaping surfaces per se (e.g., mandrel, etc.)
403.1	.Including product handling means
404	SHAPING MEANS AND SUBSEQUENT PRODUCT TREATMENT MEANS
405.1	MEANS TO CREATE A VACUUM OR APPLY FLUID PRESSURE WITHIN A PRESS FORMING MOLD
405.2	.Isostatic type
406	PRESS FORMING APPARATUS HAVING OPPOSED PRESS MEMBERS
407	.Including both heating and cooling means
408	.Opposed, registering, coacting mold cavities
409	.Pressure applying member mounted for arcuate motion
410	.Periphery of female mold limiting the movement of a dynamic press member
411	.Opposed press shaping members insertable between opposed pressure applying means
412	.Male shaping member and female mold
413	..Including pallet handling means
414	..Including means to insert or remove core

	PRESS FORMING APPARATUS HAVING OPPOSED PRESS MEMBERS
	.Male shaping member and female mold
415	..Female mold movably associated with opposed press surfaces position therein
416	..Male shaping member penetrating superposed mold
417	..Expansible male shaping member
418	..Means rotating male shaping members
419	..Including means varying pressure of male shaping member during pressing
420	..Including provision to remove entrained gas
421	..Including vibrator or tamper
422	..With positive means to remove or eject product
423	..Female mold moving into a mating relationship with a male shaping member
424	FEMALE MOLD VIBRATOR OR TAMPER, AND PRODUCT RELEASE MEANS
425	FEMALE MOLD INCLUDING TAMPING MEANS OR MEANS UTILIZING MOLD MOTION TO DISTRIBUTE OR COMPACT STOCK THEREIN
426	.Relatively moving female type shaping member and internal (e.g., trowel, etc.)shaping member
427	..Moving internal shaping member, stationary female-type member
428	..Including tamper
429	.Including means imparting diverse motion
430	..Plural female molds
431	.Including tamper
432	.Means to vibrate shaping surface
433	.Peripherally supported for rotation on endless belt
434	.Plural female molds
435	.Means to rotate female mold about horizontal axis
436 R	SHAPING SURFACE INCLUDING MEANS TO RELEASE OR REMOVE PRODUCT FROM SHAPING SURFACE
436 RM	..Removal-Miscellaneous
437	.By differential gas pressure ejecting means
438	.By means releasing article from interiorly placed shaping surface
439	.By means inverting mold
440	.By means flexing or deforming the mold
441	.By movable mold sections
442	..Hinged mold sections
443	..Sections relatively movable vertically
444	.By movable ejector means entering mold cavity
445	MEANS TREATING SHAPED WORK
446	.In or on work confining surface
447	FORMING SURFACE AND MEANS FEEDING FLUENT STOCK THERETO
448	.Trap measuring compartment (e.g., feed drawer, etc.)
449	.Utilizing positive charging means
450.1	MOLD OPENING AND CLOSING MEANS AND SEGMENTED FEMALE MOLD
451	.Including traveling mold carrier or support
451.2	.Varying pressure and/or speed closing
451.3	.Rack and pinion
451.4	.Rotary cam
451.5	.Articulated link
451.6	..Toggle
451.7	.Wedge or screw
451.9	SEGMENTED FEMALE MOLD AND MOLD CLAMPING MEANS
452	FEMALE MOLD AND PALLET HANDLING MEANS

453	DYNAMIC SUPPORT OR DYNAMIC CARRIER AND FEMALE MOLD
454	.Means to raise or lower mold
456	VIBRATING MEANS (E.G., TAMPING ROD OR JARRING MEANS, ETC.) INCLUDING MECHANICAL MOVEMENT OR POWER MEANS
457	DYNAMIC MALE SHAPING MEANS INCLUDING MECHANICAL MOVEMENT OR POWER MEANS
458	HAND MOVABLE, SUBSTRATE TRAVERSING, PLURAL DIMENSION SHAPING MEANS
459	PROFILE, JIGGER TOOL OR POTTER'S WHEEL PER SE
460	SHAPING MEMBER FOR TRAVERSING THE INTERIOR SURFACE OF HOLLOW WORK
461	MEANS PROVIDING A SHAPING ORIFICE
462	.Plural distinct feed inlets
463	..Plural distinct shaping orifices
464	.Single inlet, plural shaping orifices
465	.Including means forming products with distinct portions of varying cross section
466	.Adjustable shaping orifice or shape imparting insert member (e.g., core, etc.)
467	.Core, pin or insert member
468	CORE AND POSITIONING MEANS THEREFOR
469	TAMP ROD, PLUNGER OR MALE SHAPING MEMBER
470	SHAPING OR CASTING SURFACE (E.G., PLASTERING OR GUNITE TYPE, ETC.)
471	.Endless shaping surface
472	MISCELLANEOUS

CLASS 426 FOOD OR EDIBLE MATERIAL: PROCESSES, COMPOSITIONS AND PRODUCTS

DECEMBER 1990

1 BAIT, ATTRACTANT, OR PROCESS OF PREPARATION
2 TREATMENT OF LIVE ANIMAL
3 NORMALLY NONINGESTIBLE CHEWABLE MATERIAL OR PROCESS OF PREPARATION
4 .Low-adhesive type
5 .Packaged, structurally defined, or coated
6 .Containing addition type polymer
7 FERMENTATION PROCESSES
8 .In package
9 .In presence of biocide or biostat
10 .With glucose oxidase
11 .Alcoholic beverage production or treatment to result in alcoholic beverage
12 ..Addition of enzyme containing material to alcohol containing beverage to stabilize, purify, or prevent turbidity formation
13 ..Multiple different fermentations
14 ..Including removal of alcohol from fermented substrate or fermentation of de-alcoholized substrate
15 ..Of fruit or fruit material
16 ..Of malt wort
17 .Preparation of vinegar
18 .Of farinaceous cereal or cereal material
19 ..Preparing or treating a hydrated wheat flour system containing Saccharomyces cerevesiae involving the combining of diverse material, or using permanent additive
20 ...Including additional enzyme, enzyme producing material, or microorganism
21 ...Including plant tissue other than wheat derived
22 ...Peroxide
23 ...Amino acid, separated peptide linkage or derivative
24 ...Carboxyl containing ester other than triglyceridic
25 ...Carboxylic acid or salt thereof, e.g., vinegar, etc.
26 ...Inorganic compound containing other than NaCl
27 ..Treating a hydrated wheat flour system containing Saccharomyces cerevesiae
28 ..Fermentation of cereal malt, or of cereal by malting, or treating cereal with amylolytic or diastatic enzyme
29 ...Preparation of beverage, beverage mash, or beverage wort
30 ....Movement of fermenting substrate through successive fermenting zones
31 ..Of bran, husk, or by-product, e.g., distillers residue, etc.
32 .Egg white per se, gelatin, collagen or blood
33 .Isolated triglyceride other than milk derived
34 .Of milk or milk product
35 ..With lipase
36 ..Preparation or treatment of cheese curd or cheese
37 ...With fungi or yeast
38 ...Treatment of curd with ferment material
39 ...Including addition of acid or acidic material
40 ...Including addition to, or treatment of milk prior to fermentation
41 ..Treatment of whey
42 ..Including addition of enzyme, enzyme producing material, or microorganism
43 ...Including addition of bacterial culture
44 .Of isolated seed, bean or nut, or material derived therefrom
45 ..Coffee or cocoa, e.g., coffee extract, etc.
46 ..Legume
47 .Of whole egg or yolk
48 .Of isolated carbohydrate
49 .Of plant or plant derived material
50 ..With pectase enzyme
51 ..Preparation of or treament of fruit or vegetable juice or water soluble extract other than tea
52 ..With added enzyme material or microorganism
53 ...Animal feed
54 ..Preparation of animal feed
55 .Material is mammal or fowl derived
56 ..With added enzyme, or added enzyme producing material or microorganism
57 ...Treatment or preparation of casing
58 ...Injection or pressure treatment
59 ...Material is comminuted, ground, or in finely divided form
60 .Of or with yeast or mold
61 DORMANT FERMENT CONTAINING PRODUCT, OR LIVE MICROORGANISM CONTAINING PRODUCT OR ONGOING FERMENTING PRODUCT, PROCESS OF PREPARATION OR TREATMENT THEREOF
62 .Yeast containing
63 .Proteolytic enzyme containing, e.g., papain, ficin, bromelin, trypsin, pepsin, rennin, etc.
64 .Malt, malt extract, or diastatic enzyme
66 POTABLE WATER OR ICE COMPOSITIONS OR PROCESSES OF PREPARING SAME
67 .Having incorporated gas
68 ICE COATING AND COATED PRODUCT
69 CONTAINING NON-PROTEINACEOUS NITROGEN SOURCE CONVERTIBLE TO AVAILABLE NITROGEN OR PROCESS OF PREPARATION
71 PRODUCT FOR PROMOTING THE EFFECT OF AN ALIMENTARY CANAL MICROORGANISM
72 PRODUCT WITH ADDED VITAMIN OR DERIVATIVE THEREOF FOR FORTIFICATION
73 .Vitamin is A or D
74 PRODUCT WITH ADDED PLURAL INORGANIC MINERAL OR ELEMENT FORTIFICATION
75 PRODUCT HAVING SAFETY FEATURE IN USE
76 FRANGIBLE FOOD HAVING DEFINED SCORE LINE OR WEAKENED PORTION
77 FORAMINOUS MATERIAL INFUSION TYPE, OR FORAMINOUS CONTAINER PER SE
78 .Having diverse soluble or dispersible material
79 .Multiple compartment
80 .Having flow compeller means, e.g., compressor, etc.
81 .Tapered gathered closure
82 .Having defined support or handle means
83 ..Nonrigid tethered type
84 .Chemically defined infusor material
85 PRODUCT WITH DRINKING TUBE
86 CUP HAVING SOLUBLE CHARGE THEREIN
87 PRODUCT WITH DEFINED INDICATING MEANS, E.G., INDICIA, ETC.
88 .Temperature responsive
89 SURFACE COATED, FLUID ENCAPSULATED, LAMINATED SOLID COMPOSITE OF SELF-SUSTAINING DISSIMILAR EDIBLE MATERIAL
90 .Having inedible feature
91 ..Stick feature
92 .Animal meat derived component

	SURFACE COATED, FLUID ENCAPSULATED, LAMINATED SOLID COMPOSITE OF SELF-SUSTAINING DISSIMILAR EDIBLE MATERIAL
93	.Isolated whole seed, bean or nut, or material derived therefrom
94	..Dough or batter type
95	...Containing frozen material
96	.Dry flake, dry granular, or dry particulate material
97	..Having mineral or inorganic substrate
98	..Encapsulated, or coated triglyceridic material
99	..Triglyceridic material film former
100	.Frozen material
101	..Ice cream type
102	.Readily identifiable fruit or vegetable derived
103	.Sugar or carbohydrate containing
104	IMITATED, SIMULATED, ORNAMENTAL, THREE-DIMENSIONAL PRODUCT OR CONFECTIONARY PRODUCT HAVING CHILD-ORIENTED UTILITY
105	MEAT FILLED CASING, SAUSAGE TYPE
106	PACKAGED OR WRAPPED PRODUCT
107	.Having specific electrical or wave energy feature
108	.Multiple discrete packages containing same material
109	.Having heat exchange material
110	.Having package attached support means
111	.Having telescoping feature to increase or decrease package dimension or having packaging structure cooperating with food expansion
112	.Having consumer oriented diverse utility
113	..For cooking or heating food
114	...Meal type
115	..For dispensing or serving
116	...Aerosol type
117	...Baby bottle type
118	.Packaging structure cooperating with food generated gas
119	.Having nonedible spacer to segregate all units of multiunit food product
120	..Diverse food
121	.Lapped multiplanar unit, i.e., shingled
122	.Having destructive type opening along scored or perforated line
123	.Having destructive type opening utilizing tearing appendage
124	.Package containing separate noncoated or laminated interior inedible solid material
125	.Food is surface coated with peelable or strippable nonedible film former
126	.Three or more layered diverse packaging materials having at least one metal layer
127	.Three or more layered packaging materials
128	.Packaged product is dough or batter or mix therefor
129	.Packaged product is animal flesh
130	.Packaged product is lacteal derived
131	.Canned
132	PRODUCT WITH ADDED INEDIBLE FEATURE OTHER THAN THAT WHICH CONSTITUTES A PACKAGE
133	.Having food preserving agent
134	.Stick feature
135	.Feature is casing
138	EDIBLE CASING OR CONTAINER
139	.For frozen material
140	.Animal derived
143	PRODUCT HAVING OPEN-ENDED CAVITY
144	PRODUCT IS GROOVED OR CORRUGATED
231	MEASURING, TESTING, OR CONTROLLING BY INANIMATE MEANS
232	.Involving packaged product or preparation thereof
233	.Preparing solid product in final form by heating
234	TREATMENT OF PACKAGED PRODUCT BY ELECTRICAL OR WAVE ENERGY
235	APPLICATION OF A GAS, MIST, SMOKE OR VAPOR TO A FOOD MATERIAL UNDER THE INFLUENCE OF ELECTRICAL OR WAVE ENERGY
236	INVOLVING TREATMENT OF A GAS BY ELECTRICAL OR WAVE ENERGY AND SUBSEQUENT CONTACT OF SAID TREATED GAS WITH A FOOD MATERIAL
237	DIRECT APPLICATION OF ELECTRICAL OR WAVE ENERGY TO FOOD MATERIAL
238	.Involving wave energy of the sonic or pulsating type
239	.Movement of material by an applied electromotive force, e.g., electrodialysis, etc.
240	.Involving ionizing radiation, e.g., beta rays, X-rays, gamma rays, etc.
241	.Heating by electromagnetic wave
242	..Product dry in final form
243	..To cook
244	.Involving dielectric heating or passage of electric current through food material
245	.Including step of shaping in mold to form final desired configuration
246	..Material treated is meat
247	..Material treated is fluent
248	.Treatment with ultraviolet or visible light
249	PREPARATION OF FROZEN OR SHAPED PRODUCT WHEREIN THE PRODUCT IS OF VARIOUS EXTERNAL COLORS, E.G., VARIEGATED, ETC.
250	.ADDITION OF DYE OR PIGMENT, INCLUDING OPTICAL BRIGHTENER
251	.To whole nut or bean
252	.To whole citrus fruit
253	REMOVING NATURAL COLOR BY CHEMICAL REACTION, E.G., BLEACHING, ETC.
254	.With preliminary noncolor removal treatment with acid, base or salt
255	.In plural steps with diverse color removers
256	.Including pressure application or defined movement of material during color removal
257	.By organic color remover
258	..Peroxy organic compound
259	.By sulfur compound
260	.By nitrogen compound
261	.By heavy metal compound or peroxide
262	PRESERVING OR MODIFYING COLOR BY USE OF DIVERSE ADDITIVE
263	.Utilizing gaseous medium
264	.Red heme, i.e., meat pigment
265	..Additive is organic compound
266	...Including inorganic nitrogen compound
267	.Additive containing calcium
268	.Additive is or contains organic compound of known structure
269	..Is or contains sulfur
270	.Plant derived tissue containing other than potato
271	INVOLVING ION EXCHANGE, SEQUESTERING OR CHELATING MATERIAL
272	ADHESION OF FOODS BY A BASE SUPPLIED CONSTITUENT OTHER THAN A DRY PRODUCT
273	COATING OF NONDRY FOOD OTHER THAN ANIMAL FLESH BY A BASE SUPPLIED CONSTITUENT

274 ASSEMBLING PLURAL EDIBLE PREFORMS HAVING EXTRANEOUS BINDER, RELEASE AGENT OR DIVERSE FOOD INTERPOSED BETWEEN PREFORMS
275 .Dough is preform
276 SHAPING BY EXTRUDING INTO CHEMICALLY REACTIVE FLUID
277 .Forming edible packaging material, e.g., casing, etc.
278 NONTRANSITORY CHEMICAL ADDITION TO EDIBLE ANIMAL DERIVED PACKAGING MATERIAL
279 CREATING CAVITY BY DISPLACEMENT OF MOLD-HELD FLUENT OR PLASTIC EDIBLE, AND FILLING FORMED CAVITY WITH DIVERSE EDIBLE
280 .Cavity formed by shape of inedible internal mold member
281 INTERNAL APPLICATION OF NONTRANSITORY FLUENT MATERIAL TO SOLID EDIBLE BY INJECTING, ARTIFICIAL PORE FORMATION OR EXTERNAL PRESSURE
282 FILLING CAVITY IN EDIBLE SOLID PREFORM WITH EDIBLE MATERIAL
283 .Dough type preform
284 .Preform is tubular
285 BUILDING UP UNITS FROM DIVERSE EDIBLE PARTICULATE MATERIAL TO FORM DRY PRODUCT, E.G., AGGLOMERATING, TABLETING, ETC.
286 REMOVAL OF PESTICIDAL RESIDUE
287 INVOLVING REMOVAL OF EXTERIOR PORTION ONLY OF PLANT MATERIAL BY CHEMICAL ADDITION
288 .Material is nut or seed
289 APPLYING DIVERSE EDIBLE PARTICULATE SOLID TO COAT OR IMPREGNATE A SOLID CORE, I.E., SURFACE COATING OR IMPREGNATION
290 .Including subsequent liquefaction of particulate solid
291 .Liquid surface coating subsequent to application of particulate solid
292 .Sequentially applied particulate solid
293 .Including surface coating with liquid or plastic
294 .Suspension of particulate solid in gaseous medium
295 .Embedding, rolling or tumbling of particulate solid in core
296 .Subsequent cooking
297 COATING OR SPREADING PLASTIC ON AN EDIBLE PREFORM AND SUBSEQUENTLY SHAPING THE PREFORM
298 TREATING UNSHELLED EGG
299 .Removal or puncture of shell
300 .By fluent material
301 ..Material is unctuous
302 SURFACE COATING OF A SOLID FOOD WITH A LIQUID
303 .Plural distinct steps of coating
304 ..By same composition
305 .Including subsequent specified treatment of coating
306 .By chocolate or Theobroma cocoa derived
307 .By application of molten material
308 .Of natural shell or rind
309 .Of whole isolated seed or bean
310 .Preserving
311 INCLUDING VITAMIN PROCESSING
312 CONTACTING FOOD IN LIQUID OR SOLID STATE WITH EXTERIORLY PRODUCED GAS
313 .Gas is hydrogen, e.g., hydrogenation, etc.
314 .Applied material formed by combustion or is product of combustion
315 ..Animal flesh material
316 .Including packaging of contacted food or treatment of material in package
317 .Lacteal material
318 .Applied material contains a halogen atom
319 .Applied material contains nitrogen compound or contains sulfur atom
320 .Applied material is biocidal or disinfecting
321 INHIBITING CHEMICAL OR PHYSICAL CHANGE OF FOOD BY CONTACT WITH A CHANGE INHIBITING CHEMICAL AGENT OTHER THAN AN ANTIOXYGEN AGENT
322 .Treatment with heavy metal or compound thereof
323 .Chemical agent is impregnated in or coated on nonedible material
324 .Including step of packaging
325 ..Subsequent heat treatment of package
326 ..With biocidal or disinfecting chemical agent
327 .Including step of lowering temperature to or below 32 degrees F. or treatment at or below 32 degrees F.
329 .Foam stabilization or inhibiting foaming or gushing or inhibiting the decompo sition of a foamed product
330 .Treating liquid material
330.1 ..Egg material is basic ingredient
330.2 ..Lacteal material is basic ingredient
330.3 ..Beverage or beverage concentrate
330.4 ...Alcohol containing
330.5 ...Fruit and vegetable juice
330.6 ..Triglyceridic oil is basic ingredient
331 .Animal flesh, citrus fruit, bean or cereal seed material
332 ..Animal flesh
333 ..Citrus fruit
334 .Lacteal derived containing
335 .Biocidal or disinfecting chemical agent
530 RENOVATING BUTTER
531 PRODUCTS PER SE, OR PROCESSES OF PREPARING OR TREATING COMPOSITIONS INVOLVING CHEMICAL REACTION BY ADDITION, COMBINING DIVERSE FOOD MATERIAL, OR PERMANENT ADDITIVE
532 .With biocide or biostat
533 .Reaction flavor per se, or containing reaction flavor improver of unknown or undefined chemical constitution
534 .Flavor per se, or containing flavor or flavor improver of identifiable organic chemical constitution
535 ..Sulfur containing
536 ..Heterocyclic
537 ...Hetero-N-atom
538 ..Carbocyclic
539 .Bleach per se or composition containing same
540 .Specific dye or pigment per se or compositions containing same
541 .Containing antioxidant or antioxidant per se
542 ..Of plant or animal matter of unknown chemical structure
543 ...Cereal
544 ..Organic active chemical containing
545 ...Heterocyclic atom containing
546 ...Composed solely of carbon, hydrogen, oxygen, and salts thereof
547 ...Phosphorus or sulfur
548 .Noncarbohydrate sweetener or composition containing same
549 .Basic ingredient is starch based batter, dough product, etc.
550 ..Noncereal base
551 ..Having chemical gas producer

	PRODUCTS PER SE, OR PROCESSES OF PREPARING OR TREATING COMPOSITIONS INVOLVING CHEMICAL REACTION BY ADDITION, COMBINING DIVERSE FOOD MATERIAL, OR PERMANENT ADDITIVE
	.Basic ingredient is starch based batter, dough product, etc.
	..Having chemical gas producer
552	...Batter type
553	....Triglyceride material containing
554	.....Dry mix
555	..Dry mix
556	..Pastry type
557	..Alimentary paste
558	..Egg containing
559	..Puffed
560	..Flakes, chips, filaments, sheets, or pellets
561	.Gas or gas generating agent per se
562	..Baking powder
563	...Phosphorus containing
564	.Foam or foamable type
565	..Frozen
566	...Containing carboxylic acid ester other than a triglyceridic ester
567	...Containing carbohydrate other than sugar
568	..Egg derived
569	..Beverage or mix
570	..Dairy cream or topping
571	..Marshmellow or chiffon
572	..Cream filler, fondant, frosting, icing or confection
573	.Gels or gelable composition
574	.Meat, meat extracts, or meat analog
575	..Seaweed type
576	..Gelatin or derivatives
577	..Pectin
578	..Starch or derivatives is gel former
579	...Puddings
580	.Basic ingredient lacteal derived other than butter substitute in emulsion form
581	..Butter is the basic ingredient
582	..Cheese or cheese type product
583	..Buttermilk, yogurt, sour cream, whey
584	..Containing cocoa or flavored beverage
585	..Containing fat or oil other than lacteal derived
586	..Cream or butterfat
587	..Liquid condensed or evaporated milk
588	..Powdered milk
589	.Soup, sauce, gravy or base
590	.Beverage or beverage concentrate
591	..Dry effervescent
592	..Alcohol containing
593	..Chocolate or cocoa
594	..Coffee and substitutes therefor
595	...Whole or ground, including additive other than extractive type
596	...Coffee substitute
597	..Tea and substitutes therefor
598	..Bean, nut or seed type
599	..Fruit and vegetable juice
600	.Hop derived ingredient, including hopping of wort
601	.Fat or oil is basic ingredient other than butter in emulsion form
602	..Aqueous emulsion
603	...Butter substitute, e.g., margarine, etc.
604	....Having emulsifier or antispattering, antiweeping or antileaking agent
605	...Egg containing, e.g., mayonnaise, etc.
606	..Fluid, formulated added hard stock containing type, e.g., fluid shortening, etc.
607	..Mixed formulated triglycerides per se, e.g., margarine oil, hard butter, etc.
608	..Animal derived triglyceride material as sole triglyceride, e.g., lard, etc.
609	..Particulate or antistick compositions, e.g., pan grease, etc.
610	..With defined preservative, e.g., crystallization inhibitor, etc.
611	..Having ester other than triglyceridic carboxylic
612	...Liquid
613	..Having lacteal or egg ingredient or sugar or flavor
614	.Poultry egg is basic ingredient
615	.Plant material is basic ingredient other than extract, starch or protein
616	..Citrus derived
617	..Coconut containing
618	..Cereal material is basic ingredient
619	...Breakfast type
620	....Ready to eat
621	.....Flake or puffed
622	...Flour or meal type
623	...Animal food
624	....Distiller's or brewer's residue
625	...Puffed or flaked
626	...Acid or base treatment
627	...Single source
628	..Cream style vegetable
629	..Bean, seed or nut product
630	...Animal feed
631	...Cocoa
632	...Nut, including peanut
633	....In butter form
634	...Legume
635	..Animal food
636	...Grasses or straw
637	..Potato
638	..Spice, herb, or condiment thereof
639	..With added sugar
640	..Dried
641	.Animal derived material is an ingredient other than extract or protein
642	..Shroud effecting treatment
643	..Seafood
644	..Poultry
645	..Single source
646	..Comminuted
647	..Blood containing
648	.Nutritional or dietetic supplement, including table salt
649	..Sodium chloride or substitute therefor
650	.Flavor or flavor adjunct, acidulant or condiment
651	..Oleoresin or essential oil
652	.For use with meat, poultry or seafood
653	.For use with batter, dough or baked goods
654	.Stabilizing or preserving agent or emulsifier other than organophosphatide
655	.Extract
656	.Protein, amino acid, or yeast containing
657	..From animal
658	.Carbohydrate containing
659	..Fondant, fudge, icing or frosting
660	..Confection
661	..Carbohydrate is starch
662	.Organophosphatide

663	PREPARING OR TREATING LACTEAL BUTTER OR LACTEAL BUTTER SUBSTITUTE
664	.Lacteal butter
665	PROCESSES
383	.Applying indicia or ornamentation, or the treatment of article having indicia or ornamentation
384	.Freeze drying or freeze concentrating
385	..Product is solid in final form
386	.Separating volatile essence and combining the separated volatile essence with a food material
387	..Volatile essence derived from a liquid
388	.Combining material from single source without a previous food separation step of the different materials
389	.Per se removal of food product from mold, container or receptacle
390	.Preparing or treating food having diverse utility
391	..Dough or batter product, e.g., pie crust, etc.
392	.Packaging or treatment of packaged product
393	..Involving temperature 32 degrees F. or less
394	..In container having diverse utility, e.g., dispensing, etc.
395	..In container having structure cooperating with food material generated gas
396	..By covering rigid receptacle or support with flexible wrap or container
397	..In rigid liquid impermeable container, e.g., can, bottle, etc.
398	...Container wall has plural layers or package contains interior nonintegral solid inedible material
399	...Including delivery of pasteurized or sterilized food material to container, e.g., aseptic, etc.
400	....Including prior concentration of food material
401	....And subsequent heat treatment of sealed package
402	...Including water addition to or removal from normally solid food material
403	...Including heating of vented container containing food material
404	...Exteriorly applying reduced pressure to eliminate air or to effect a package having reduced air content
405	...With agitation of sealed container
406	....By rolling container on its horizontal axis
407	...Heat treatment of package, e.g., pasteurization, sterilization, etc.
408	....By heat exchange medium other than water per se, air, carbon dioxide, or other inert gas
409	....Lacteal material
410	..In flexible wrapper or container
411	...And exterior rigid receptacle
412	...Heat treatment of encased food
413	...Utilizing preformed container
414	...With molding or cutting
415	...Utilizing specified wrapping material
416	.Combined
417	.Preparing or treating triglyceridic fat or oil, or processes of separating triglyceridic fat or oil from a starting material, e.g., rendering, etc.
418	.Storing solid material under controlled condition
419	..Natural plant material
420	.Treating or preparing food material having nonedible feature in final product, e.g., interleaving, etc.
421	..Wherein feature is rigid handle member
422	.Treatment of liquid with nongaseous material other than water per se
423	..Inorganic silicon containing material, e.g., clay, etc.
424	..Liquid contact to effect a separation
425	.Extraction utilizing liquid as extracting medium
426	..Removing water from solid using nonglyceridic liquid
427	..Removing caffein or tannin
428	...Utilizing organic liquid
429	..Liquid is organic
430	...Of tissue containing seed or bean material
431	..Liquid is aqueous
432	...Coffee
433	....Preparation of ready to use beverage, i.e., brewing
434	....Extracting at different temperature
435	...Tea, i.e., Camellia senesis
436	...Cereal or treated cereal material
437	...Animal flesh material
438	.Heat treatment of food material by contact with glyceridic fat or oil, e.g., potato chip frying, etc.
439	..Farinaceous cereal dough or batter product, e.g., doughnut, etc.
440	...To puff or form pore
441	..Including water treatment
442	.Treatment of food material by addition of material other than water, air, carbon dioxide, nitrogen or inert gases, or mixtures thereof
443	.Preparation of product which is dry in final form
444	..With temperature reduction 32 degrees F. or less
445	..Size increase by puffing, or pore forming of solid material by heating
446	...Dough product
447	...By sudden pressure release from exteriorly applied pressurized zone
448	....From extrusion zone using mechanical pressure
449	....Of cereal
450	...Of cereal material
451	..Alimentary paste, e.g., macaroni, spaghetti, noodles, etc.
452	..Cereal filament or filament composite
453	..Building up units from initially dry material, e.g., agglomerating, etc.
454	...By compressing, e.g., tabletting, briquetting, pelleting, etc.
455	..Including treatment with aqueous material, e.g., hydration, etc.
456	...And subsequent heat treatment of dehydration
457	....To form flake product
458	....Of cereal dough or cooked cereal dough
459	....Of isolated cereal seed or bean material
460	.....Whole seed or bean material
461	......By steam
462	......Cereal
463	.....Cereal material, e.g., flour, meal, bran, etc.
464	....With size reduction, e.g., mashing, cutting, etc.
465	..Including heating or dehydration
466	...By roasting, toasting, or browning

PROCESSES
.Preparation of product which is dry in final form
..Including heating or dehydration
...By roasting, toasting, or browning
467 ....With fluid current conveying or suspensions of treated material
468 ....With compressing or use of exteriorly applied pressure
469 ....With separation of unwanted solid component
470 ...Of prior foamed or gasified material
471 ...Of liquid or liquefied material, e.g., spray drying, etc.
472 ...With separation of a constituent
473 ...With size reduction, e.g., mashing, cutting, etc.
474 .Including gas-liquid contact
475 ..Separating, including gas contact
476 ...Gas is steam
477 ..Preparing carbonated or effervescent liquid
478 .Separating a starting material into plural different constituents
479 ..Removing of solid part from solid material
480 ...From mammal or fowl material
481 ...From plant material
482 ....Outer covering, e.g., shell, husk, etc.
483 .....By abrading
484 ....Seed, pit, stem, or core
485 .....Pit
486 ..Removal of air, unwanted gas, or unwanted odoriferous material
487 ...From liquid
488 ....To deodorize
489 ..Removal of desired liquid from solid plant material
490 ..Starting material is liquid
491 ...Lacteal liquid, e.g., milk, cream, etc.
492 ...Including vaporization, e.g., distillation, concentration-evaporation, etc.
493 ....Of alcohol containing stock
494 .....Recovery of vaporized fraction, e.g., distillate
495 ...Separating solid from liquid material
496 .Treatment or preparation of farinaceous dough, batter, or pastry product, e.g., pie, etc.
497 ..Treatment of cooked product
498 ..Including incorporation of air or gas into dough material
499 ..Food product having an open-ended cavity, e.g., pretzel, etc.
500 ..Including coiling or twisting
501 ...Coiling sheet material
502 ..Including sheeting, laminating, or folding
503 ..Including dough dividing, slitting or incising
504 ..Including mixing or kneading
505 ..Heating utilizing a foraminous or coated support, or container
506 .Treatment with aqueous material, e.g., hydration, etc.
507 ..Of isolated whole seed or bean material
508 ...Cooking, blanching or gelatinizing
509 ..Cooking or blanching
510 ...By steam
511 ..By steam
512 .Molding, casting, or shaping
513 ..Of animal flesh
514 ..Forming hollow, tubular, or open-ended cavity
515 ..From liquid state, e.g., casting, freezing, etc.
516 ..Extruding through restricted orifice to give desired final shape
517 ..Forming rod, strand, sheet, or filament
518 .With cutting, or mechanically subdividing solid material, e.g., slicing, comminuting, slitting, etc.
519 .With mixing or agitating, e.g., homogenizing, etc.
520 .Heating above ambient temperature
521 ..Pasteurizing or sterilizing
522 ...Of lacteal material
523 ..Cooking, e.g., broiling, baking, etc.
524 .Cooling, freezing, or treating cooled or frozen product, e.g., thawing, etc.

CLASS 427 COATING PROCESSES

1	BODY MEMBER PRINTING (E.G., FINGERPRINTING, ETC.)
2	MEDICAL OR DENTAL PRODUCT PRODUCED
3	.Tablets, pills, pellets or capsules coated
4	PLANT MEMBER OR ANIMAL SPECIMEN COATING
5	RADIOACTIVE BASE OR COATING
6	.Particles or nuclear reactor fuel elements coated
7	FRAUD OR TAMPER DETECTING
8	MEASURING, TESTING OR INDICATING
9	.Thickness or uniformity of thickness determined
10	..Electrical or optical
11	FRICTIONAL APPLICATION (I.E., RUBBING SOLID COATING MATERIAL ON BASE)
12	DIRECT APPLICATION OF ELECTRICAL, MAGNETIC OR WAVE ENERGY
13	.Electrostatic charge utilized
14.1	..Nonuniform coating
25	..Solid particles transported from support to base by electrostatic force
26	..Particles aligned by electrostatic force
27	..Coating applied as solid particles or atomized liquid
28	...Coating applied to inside of hollow article
29	...Coating applied to preheated base
30	...Atomizing step includes utilizing electrostatic force
31	....Liquid atomized from external thin edge of rotating member
32	...Running or indefinite-length base
33	...Discrete articles sequentially conveyed past coating station
34	.Spraying involving plasma coating agent
35	.Electron irradiation, electric discharge, gas ionization, gamma rays or X-rays utilized
36	..Gamma rays, X-rays or atomic radiation
37	..Arcing or sparking
38	..Gas ionization or ion bombardment
39	...Corona or glow discharge
40	....Organic base
41	....Organic coating
42	..Coating material supply irradiated
43.1	..Pattern or selected areas irradiated
44	..Resin, resin precursor, rubber or hardenable oil containing coating
45.1	.Dielectric or induction heating or utilizing radio or microwave
46	..Metal base heated
47	.Magnetic field utilized
48	..Magnetic recording device formed
49	.Resistance heating
50	..Vapor deposition
51	...Semiconductor or silicon coating
52	...Wire or filament coated
53.1	.Laser or visible light
54.1	.Ultraviolet light
55	.Infrared energy or radiant heat (excluding vaporizing coating material)
56.1	..Nonuniform coating
57	.Sonic or ultrasonic
58	ELECTRICAL PRODUCT PRODUCED
59	.Welding electrode
60	..Post-treating with solid treating member
61	..Metal coating or Group IIA metalic compound containing coating
62	.Superconductor
63	..Nonuniform coating
64	.Fluorescent or phosphorescent base coating (e.g., cathode ray tube, luminescent screen, etc.)
65	..X-radiation properties
66	..Electroluminescent lamp
67	..Fluorescent lamp
68	..Multicolor or mosaic (e.g., color T.V. tube, etc.)
69	..Vapor deposition
70	...Nonmetallic coating formed by vapor deposition
71	..Particles applied
72	..Rotating the base
73	..Settling out of liquid
74	.Photoelectric
75	..Mosaic or nonuniform coating
76	..Coating is selenium, tellurium or compound thereof
77	.Electron emissive or suppressive (excluding electrode for arc)
78	..Vapor deposition or spraying
79	.Condenser or capacitor
80	..Electrolytic or barrier layer type
81	..Vacuum or pressure utilized
96	.Integrated circuit, printed circuit or circuit board
97	..Coating hole walls
98	..Immersion metal plating from solution (e.g., electroless plating, etc.)
99	..Vapor deposition
100	.Piezoelectric properties
101	.Resistor for current control (excludes heating element)
102	..Nonuniform coating
103	..Applying superposed diverse coatings or coating a coated base
104	.Motor stator or core for winding
105	.Hollow article
106	..Glass (e.g., light bulb, etc.)
107	...Vapor deposition
108	.Transparent base
109	..Vapor deposition
110	..Spraying
111	.Filament for lamp or tube
112	..Carbon filament
113	.Carbon base
114	..Brushes
115	.Fuel cell part
116	.Coil or winding
117	.Wire conductor
118	..Applying superposed coatings or coating a coated base
119	..Foam, cellular or natural rubber coating
120	..Heat utilized
121	.Cellulosic or fibrous base (e.g., wood, paper, etc.)
122	.Carbon coating
123	.Metal coating
124	..Vapor deposition or utilizing vacuum
125	..Silver, gold, platinum or palladium
126.1	.Metallic compound coating
126.2	..Glass or ceramic base or coating
126.3	..Metal oxide, peroxide, or hydroxide coating
126.4	...Metal is Al
126.5	...Metal is Au, Ag, Pt, Pd, Ru, Rh, Os, Ir
126.6	...Metal is Ni, Fe, or Co
127	MAGNETIC BASE OR COATING
128	.Magnetic coating
129	..With pretreatment of base
130	..With post-treatment of coating or coating material
131	..Applying superposed diverse coating or coating a coated base
132	..Metal coating
133	MOLD COATING
134	.Sand mold
135	.Metal mold

136 COATING PAVEMENT OR THE EARCH (E.G., ROADMAKING, ETC.)
137 .Striping, marking or increasing reflectivity
138 .Asphalt, bitumen, oil or tar containing coating
139 ..Rolling
140 RESTORING OR REPAIRING
141 .Carbon paper or inked ribbon
142 .Metal article
143 STENCIL BLANK MAKING
144 HECTROGRAPHIC OR COPYING SURFACE MAKING
145 LATENT IMAGE FORMED OR DEVELOPED
146 TRANSFER OR COPY SHEET MAKING
147 .Decal or embossing foil type (i.e., continuous film transfers)
148 ..Heat sensitive
149 ..Fluid releasable
150 .Reactive components
151 ..Heterocyclic organic compound component
152 .Coating opposite sides or forming plural or nonuniform coats
153 .Carbon paper type
154 REMOVABLE PROTECTIVE COATING APPLIED
155 .Organic base
156 .Metal base
157 FLUORESCENT OR PHOSPHORESCENT COATING
158 .Optical brightening
159 INCANDESCENT MANTLE PRODUCED
160 COATING HAS X-RAY, ULTRAVIOLET OR INFRARED PROPERTIES
161 TRANSPARENCY OR TRANSLUCENCY INCREASED (E.G., MAKING WINDOW ENVELOPES, ETC.)
162 OPTICAL ELEMENT PRODUCED
163 .Polarizer, windshield, optical fiber, projection screen or spherical reflector
164 .Transparent base
165 ..Glass
166 ...Vapor depositing
167 ....Silicon compound coating (e.g., quartz, etc.)
168 ...Spraying
169 ...Immersion
170 DELUSTERING FABRIC OR YARN
171 WITH STRETCHING OR TENSIONING
172 .Running lengths
173 ..Lateral stretching
174 ..Particles or fibers applied
175 ..Cord, thread, yarn or wire
176 ..Textile fabric
177 WITH WINDING, BALLING, ROLLING, OR COILING
178 .Metal or glass base (e.g., wire, etc.)
179 .Paper or felt base
180 SOLID PARTICLES OR FIBERS APPLIED
181 .Interior or hollow article coating
182 ..Fluidized bed utilized
183 ..Rotating the base
184 .Nonuniform speed or nonrectilinear base motion
185 .Fluidized bed utilized
186 .Roofing produced
187 ..With cutting
188 ..Localized different areas produced
189 .Uniting particles to form continuous coating with nondiscernible paticles
190 ..Metallic compound particles
191 ..Metal particles
192 ...Aluminum, copper or zinc particles
193 ..Vitrifiable particles
194 ..Roller utilized
195 ..Synthetic resin particles
196 .Plural direction application of coating materials or simultaneously applying particles and binder from different sources
197 .Localized different areas produced (e.g., printing, etc.)
198 ..Deforming the base or coating or removing part of the coating
199 ..Silicon compound, metal or metallic compound containing particles applied
200 ..Flock or fibers applied
201 .Plural particulate materials applied
202 .Applying superposed diverse coatings or coating a coated base
203 ..Coating over the applied coating of particles
204 ..Silicon compound containing particles (e.g., sand, etc.)
205 ..Metal or metallic compound containing particles
206 ..Flock or fibers applied
207.1 COATING REMAINS ADHESIVE OR IS INTENDED TO BE MADE ADHESIVE
208 .Application to opposite sides of base
208.2 .Heat sensitive adhesive
208.4 .Pressure sensitive adhesive
208.6 ..Nonuniform coating (e.g., perforated, etc.)
208.8 ..Applying superposed diverse coatings or coating a coated base
209 APPLICATION TO OPPOSITE SIDES OF SHEET, WEB OR STRIP (EXCLUDING PROCESSES WHERE ALL COATING IS BY IMMERSION)
210 .Nonuniform coating
211 .Roller applicator utilized
212 PARTICLES, FLAKES OR GRANULES COATED OR ENCAPSULATED
213 .Fluidized bed utilized
213.3 .Solid encapsulation process utilizing an emulsion or dispersion to form a solid-walled microcapsule
213.31 ..With post-treatment of encapsulant or encapsulating material, e.g., further coating, hardening, etc.
213.32 ...Hardening
213.33 ....Using crosslinking agent
213.34 ..Solid-walled microcapsule formed by in situ polymerization
213.35 ..Solid-walled microcapsule formed from gelatin or derivative thereof
213.36 ..Solid-walled microcapsule formed from preformed synthetic polymer
214 .Applying superposed diverse coatings or coating a coated base
215 .Inorganic base
216 ..Metal base
217 ..Metal coating
218 ..Pigment containing coating
219 ...Silicon compound containing coating
220 ..Organic coating
221 ...Resin, rubber or hardenable oil containing coating
222 .Resin base
223 FLAME CONTACT
224 .After coating
225 .Metal coating
226 HEAT DECOMPOSITION OF APPLIED COATING OR BASE MATERIAL
227 .Base material decomposed or carbonized
228 .Coating decomposed to form carbide or coating carbonized
229 .Coating decomposed to form metal
230 INTERIOR OF HOLLOW ARTICLE COATING
231 .Rotating the article
232 ..Removing excess coating material
233 ..Spraying
234 ..Metal base
235 .Removing excess coating material
236 .Spraying
237 .Coating by vapor, gas, mist or smoke
238 .Vacuum or pressure utilized

INTERIOR OF HOLLOW ARTICLE COATING
239 .Metal base
240 CENTRIFUGAL FORCE UTILIZED
241 .Metal coating
242 RUMBLING OR TUMBLING
243 FORAMINOUS PRODUCT PRODUCED
244 .Filter, sponge or foam
245 .Microporous coating (e.g., vapor permeable, etc.)
246 ..Coagulating or jelling the coating
247 .Metal base
248.1 COATING BY VAPOR, GAS, OR SMOKE
249 .Carbon or carbide coating
250 .Metal coating
251 ..Moving the base
252 ..By decomposing metallic compound (e.g., pack process, etc.)
253 ...Halogen containing compound
254 .Wood base
255 .Base includes inorganic silicon or metal containing compound (e.g., glass, ceramic, brick, etc.)
255.1 .Mixture of vapors or gases utilized
255.2 ..The resultant coating is a mixture or a compound formed from the mixture utilized
255.3 ...The mixture utilized contains oxygen
255.4 .Base supplied constituent
255.5 .Moving the base
255.6 .Organic coating applied by vapor, gas, or smoke
255.7 .Plural coatings applied by vapor, gas, or smoke
256 NONUNIFORM COATING
257 .Wrinkled or crackled coating
258 .Applying superposed diverse coatings or coating a coated base
259 ..Including a masking coating
260 ..Hand-held brush or absorbent applicator utilized
261 ..Final coating nonuniform
262 ...Variegated surface produced (e.g., mottled, stippled, wood grained, etc.)
263 ....Marbleized
264 ...Deforming the base or coating or removing a portion of the coating
265 ...Plural nonuniform coatings
266 ....Glass or ceramic base
267 ..Variegated surface produced (e.g., mottled, stippled, wood grained, etc.)
268 ...Marbleized
269 ..Glass or ceramic base
270 ..Deforming the base or coating or removing a portion of the coating
271 .Deforming the base or coating or removing a portion of the coating
272 ..Mask or stencil utilized
273 ..Fluid treating the coating (e.g., vapor treating, etc.)
274 ..Variegated surface produced (e.g., stippled, marbleized, mottled, wood grained, etc.)
275 ..Deforming the base
276 ...Simultaneously deforming the coating
277 ..Solid treating member contacts coating
278 ...Roller treating member
279 .Vitreous coating
280 .Variegated surface produced (e.g., mottled, wood grained, etc.)
281 ..Marbleized
282 .Mask or stencil utilized
283 .Crystalization or precipitation coating
284 .Edge or border coating
285 ..Paper or textile base
286 .Striping (i.e., forming stripes)
287 .Metal, glass or ceramic base)
288 .Paper or textile base
289 WITH CUTTING, HOLDING, SEVERING OR ABRADING THE BASE
290 .Prior to coating
291 ..Wood base (e.g., injecting, etc.)
292 ..Inorganic base
293 .Rectilinear cutting to length
294 VACUUM UTILIZED PRIOR TO OR DURING COATING
295 .Metal base
296 .Organic base
297 ..Wood base
298 ...Creosote, wax, oil, asphalt or bitumen coating
299 WITH PRETREATMENT OF THE BASE
300 .Shielding or spacing
301 .Preapplied reaction promoter or hardener (e.g., catalyst, etc.)
302 ..Resin, rubber or hardenable oil containing coating
303 ...Cellulosic base
304 ..Metal coating (e.g., electroless deposition, etc.)
305 ...Nickel, copper, cobalt or chromium coating
306 ....Organic base
307 .Etching, swelling or dissolving out part of the base
308 ..Cellulosic base
309 ..Inorganic base
310 .Fluxing
311 ..Supernatant flux (floating)
312 ...Lead or tin coating
313 ..Lead or tin coating
314 .Heating or drying pretreatment
315 ..Steam utilized
316 ..Organic base
317 ...Wood base
318 ..Metal base
319 ...Metal coating
320 ....Aluminum coating
321 ....Zinc or spelter coating (e.g., galvanizing, etc.)
322 .Organic base
323 ..Natural protein containing base (e.g., silk, wool, leather, etc.)
324 ..Cellulosic base
325 ...Wood base
326 ...Paper base
327 .Metal base
328 ..Metal coating
329 ...Molten metal bath utilized
330 ..Vitreous coating
331 WITH POST-TREATMENT OF COATING OR COATING MATERIAL
332 .Deodorizing
333 .Plural film forming coatings wherein one coating contains a chemical treating agent for the other
334 .Oil or wax treatment of coating
335 .Solvent vapor treatment of coating
336 .Swelling agent or solvent applied to treat coating
337 .Chemical agent applied to treat coating
338 ..Proteinaceous coating
339 ..Cellulosic coating
340 ..Resin, resin precursor, rubber or hardenable oil containing coating
341 ...Inorganic treating agent
342 ...Textile or cellulosic base
343 ..Inorganic coating
344 ...Silicon compound containing coating
345 .Coating material recirculation or regeneration
346 .Movement of work treats coating (e.g., vibrating, tilting, etc.)
347 ..Metal coating

	WITH POST-TREATMENT OF COATING OR COATING MATERIAL
348	.Gas jet or blast mechanically treats coating
349	..Metal coating
350	.Vacuum or reduced pressure utilized
351	..Wood base
352	.Liquid extraction of coating constituent or cleaning coating
353	..With water
354	...Drying subsequent to washing
355	.Solid treating member or material contacts coating
356	..Die, blade or sharp-edged tool
357	...Metal coating
358	...Organic coating
359	..Roller, drum or cylinder
360	...Metal coating
361	...Paper base (e.g., calendering, etc.)
362	....Cast coating
363	....Wax or oil containing coating
364	....Casein or starch containing coating
365	...Treating between rollers (e.g., calendering, etc.)
366	....With heating (e.g., heated roller, etc.)
367	..Metal coating
368	..Brushing
369	..Pressure treatment of coating (e.g., squeezing, etc.)
370	...With heating (e.g., hot ironing, etc.)
371	..Organic base
372.2	.Heating or drying (e.g., polymerizing, vulcanizing, curing, etc.)
373	..Cells, foam or bubbles formed
374.1	..And cooling
374.2	...Heating after cooling
374.3	....Without intervening coating step
374.4	...Fused or molten coating cooled
374.5	....Liquid or solid cooling medium
374.6	....Vacuum, vapor, or gas other than air utilized
374.7	....Vitreous or glazed coating
375	..Fusion or softening of coating
376.1	...Inorganic coating
376.2	....Metal oxide- or silicon-containing coating (e.g., glazed, vitreous enamel, etc.)
376.3	.....Metal-containing coating (e.g., cermet, etc.)
376.4	.....Metal base
376.5	......Ferrous base
376.6	....Metal-containing coating
376.7	.....Coating consists of metal
376.8	......Metal base
377	..Modified condition of atmosphere (e.g., steam, air movement, etc.)
378	...Movement of atmosphere
379	..Plural heating or drying steps
380	...Metal or metallic compound containing coating
381	...Textile or cellulosic base
382	....Paper or natural cellulose base
383.1	..Metal coating
383.3	...Inorganic base
383.5	....Fused oxide-containing base (e.g., ceramic, glass, etc.)
383.7	....Metal base
383.9	.....Coating material diffuses into base or forms alloy with base
384	..Organic coating
385.5	...Resin, resin precursor, rubber, or hardenable oil-containing coating
386	....Epoxy or polyepoxide containing coating
387	....Silicon compound containing coating
388.1	....Metal base
388.2	.....Cross-linked or infusible coating
388.3	......Aldehyde-containing precursor
388.4	.....Water-containing coating (i.e., aqueous dispersion, emulsion or solution)
388.5	.....Nonaqueous dispersion
389	....Proteinaceous base (e.g., wool, leather, etc.)
389.7	....Glass base
389.8	.....Fiberglass base
389.9	....Textile or cellulosic base
391	.....Paper base
392	.....Natural cellulose base
393	......Wood base
393.1	.....Antistatic properties increased
393.2	.....Wrinkle resistance of crease holding properties increased
393.3	.....Flame resistance increased
393.4	.....Antisoiling or water repellency increased
393.5	....Resin, rubber, or elastomer base
393.6	....Asbestos, ceramic, concrete, or masonry base
394	...Textile or cellulosic base
395	....Paper base
396	....Natural cellulose base
397	.....Wood base
397.7	..Inorganic silicon-containing coating
397.8	...Alkali silicate
398.1	.Cooling
398.2	..Utilizing solid member contacting base or coating (e.g., cooling roller, etc.)
398.3	..Liquid utilized (e.g., quenching, spraying, etc.)
398.4	..Vacuum, vapor, or gas other than air utilized
398.5	..Movement of atmosphere
399	BASE SUPPLIED CONSTITUENT
400	.Resin or rubber base
401	COMBINED
402	APPLYING SUPERPOSED DIVERSE COATING OR COATING A COATED BASE
403	.Settable inorganic coating (e.g., cement, etc.)
404	.Metal coating
405	..Metal base
406	...Zinc coating
407.1	.Synthetic resin coating
407.2	..Glass base
407.3	...Fiberglass base
408	..Wood base
409	..Metal base
410	...Epoxy or polyepoxide containing coating
411	..Paper base
412	..Textile or leather base
412.1	..Nonfibrous organic base
412.2	...Cellulose derivative base
412.3	...Polyolefin base
412.4	...Halogen-containing resin base
412.5	...Polyester or alkyd resin base
413	.Natural rubber or derivative containing coating
414	.Protein or derivative containing coating (e.g., casein, glue, gelatin, etc.)
415	.Cellulosic coating
416	.Wax containing coating
417	.Natural resin, oil or fat containing coating
418	..Metallic compound containing coating
419.1	.Metallic compound-containing coating
419.2	..Oxide-containing coating
419.3	...Superposed diverse oxide coatings
419.4	....Vitreous coating
419.5	...Organic coating
419.6	...Vitreous coating

	APPLYING SUPERPOSED DIVERSE COATING OR COATING A COATED BASE
	.Metallic compound-containing coating
419.7	..Boride, carbide, nitride, phosphide, silicide, or sulfide-containing coating
419.8	..Organometallic or metal salt of organic compound-containing coating
420	FALLING CURTAIN OF COATING MATERIAL UTILIZED (I.E., CURTAIN COATING)
421	SPRAYING
422	.Heated coating material
423	..Flame spraying
424	.Moving the base
425	..Rotating or inverting
426	.Ingredients supplied separately
427	.Inorganic coating material
428	ROLLER APPLICATOR UTILIZED (E.G., PADDING, ETC.)
429	BRUSH OR ABSORBENT APPLICATOR UTILIZED
430.1	IMMERSION OR PARTIAL IMMERSION
431	.Molten metal or fused salt bath
432	..Inert gas or nonoxidizing atmosphere utilized
433	..Lead, zinc or tin coating (e.g., galvanizing, etc.)
434.2	.Running lengths
434.3	..Coating applied at surface of bath only
434.4	..Base treated by solid member in bath (e.g., scraped, squeezed, etc.)
434.5	..Coating material moved (e.g., agitated, circulated, etc.)
434.6	..Cord, thread, yarn, wire, or rod
434.7	...Extending through bath-containing wall
435	.Metal base
436	..Metal coating
437	...Chemical compound reducing agent utilized (i.e., electroless deposition)
438	....Nickel coating
439	.Cellulosic base
440	..Wood base
441	...Creosote, wax, oil, asphalt or bitumen containing coating
442	..Wax, oil, asphalt or bitumen containing coating
443	.Wax, oil, asphalt or bitumen containing coating
443.1	.Chemical compound reducing agent utilized (i.e., electroless deposition)
443.2	.Inorganic base
444	PRETREATMENT PER SE, OR POST-TREATMENT PER SE (WITHOUT CLAIMED COATING)
445	MISCELLANEOUS

CLASS 428 STOCK MATERIAL OR MISCELLANEOUS ARTICLES

1 LIQUID CRYSTAL
3 RELIGIOUS ARTIFACT (E.G., CRUCIFORM, ETC.)
4 BOW, POMPOM OR ROSETTE
5 .Looped type
6 PLUME
7 SPECIAL OCCASION ORNAMENT
8 .Knockdown
9 .Collapsible
10 .Wreath type
11 .Ball, bell, or star-shaped
12 COLLAPSIBLE ARTICLE (E.G., JOINTED, ELASTIC, ETC.)
13 DISPLAY IN FRAME OR TRANSPARENT CASING; OR DIORAMA INCLUDING OR IMITATIVE OF A REAL OBJECT
14 .Peripheral enclosure or frame
15 THREE DIMENSION IMITATION OR "TREATED" NATURAL PRODUCT
16 .Fauna
17 .Flora
18 ..Tree
19 ...With article holder or ornament
20 ...Knockdown
21 ..Artificial fruit or garnishing leaf display strip
22 ..Including naturally occurring article
23 ..Cluster or with holder
24 ..Flower or flower petal
25 ...Of filamentary or filamentary-openwork type
26 ...Of cloth, paper, or chemically plastic matter
27 ..Framework with or therefor
28 FINIAL OR PENDANT TYPE ARTICLE
29 ARTICLE HAVING LATENT IMAGE OR TRANSFORMATION
30 .Striated for iridescence
31 VEHICLE BODY ORNAMENT
544 ALL METAL OR WITH ADJACENT METALS
545 .Component of composite having metal continuous phase interengaged with nonmetal continuous phase
546 .Having metal particles
547 ..Having composition or density gradient or differential porosity
548 ..Composite, i.e., plural, adjacent, spatially distinct metal components, e.g., layers, etc.
549 ...Fiber, asbestos, or cellulose in or next to particulate component
550 ...Porous component
551 ...Nonmetal component
552 ....Entirely inorganic
553 ...Nonparticulate metal component
554 ....Plural nonparticulate metal components
555 .....Next to each other
556 ......Nonmetal in particulate component
557 ....Plural particulate metal components
558 ....Nonparticulate component encloses particles
559 ....Particles discontinuous
560 .....Separated by nonmetal matrix or binder, e.g., welding electrode, etc.
561 ......Nonparticulate component has Ni-, Cu-, or Zn-base
562 ......Nonparticulate component has Fe-base
563 ....Next to Fe-containing particles
564 ....Nonmetal particles in particulate component
565 ...Nonmetal particles in a component
566 ..Interconnected void structure, e.g., permeable, etc.
567 ..Continuous interengaged phases of plural metals, or oriented fiber containing
568 ...Nonmetal containing
569 ...Mo or W containing
570 .Composite powder, e.g., coated, etc.
571 .Having marginal feature for indexing or weakened portion for severing
572 ..For severing perpendicular to longitudinal dimension
573 .Width or thickness variation or marginal cuts repeating longitudinally
574 ..Variation in both width and thickness
575 ..Marginal slots, i.e., deeper than wide
576 .Shaped configuration for melting, e.g., package, etc.
577 .Intermediate article, e.g., blank, etc.
578 ..Panel having nonrectangular perimeter
579 ...Disk
580 ...Symmetrical
581 ....Only one plane of symmetry
582 ..Having outward flange, gripping means or interlocking feature
583 ..Having discrete fastener, marginal fastening, taper, or end structure
584 ...Same structure at both ends of plural taper
585 ...Single taper, e.g., ingot, etc.
586 .Workpiece with longitudinal passageway or stopweld material, e.g., for tubular stock, etc.
587 .Workpiece mimicking finished stock having nonrectangular or noncircular cross section
588 .Workpiece of parallel, nonfastened components, e.g., fagot, pile, etc.
589 ..Arranged to avoid lateral displacement
590 ..Composite
591 .With provision for limited relative movement between components
592 .Helical or with helical component
593 .Honeycomb, or with grain orientation or elongated elements in defined angular relationship in respective components, e.g., parallel, intersecting, etc.
594 .Plural layers discontinuously bonded, e.g., spot-weld, mechanical fastener, etc.
595 .Nonplanar, uniform-thickness material having symmetrical channel shape or reverse fold, e.g., making acute angle, etc.
596 .Having aperture or cut
597 ..Struck-out portion type
598 .Having member which crosses the plane of another member, e.g., T or X cross section, etc.
599 .Defined configuration of both thickness and nonthickness surface or angle therebetween, e.g., rounded corners, etc.
600 .Having variation in thickness
601 ..Discontinuous surface component, e.g., printed circuit
602 ..Longitudinally smooth and symmetrical
603 .Nonplanar uniform thickness or nonlinear uniform diameter, e.g., L-shape
604 ..Intersecting corrugations or dimples not in a single line, e.g., waffle form, etc.
605 .Mass of only fibers
606 .Foil or filament smaller than 6 mils
607 ..Composite
608 .Embodying fibers, interengaged or between layers, e.g., paper, etc.

ALL METAL OR WITH ADJACENT METALS
609 .Macroscopically anomalous interface between layers
610 .Having composition, density, or hardness gradient
611 .Having magnetic properties, or preformed fiber orientation coordinate with shape
612 .Microscopic interfacial wave or roughness
613 .Porous, e.g., foamed, spongy, cracked, etc.
614 .Laterally noncoextensive components, e.g., embedded, etc.
615 .Composite, i.e., plural, adjacent, spatially distinct metal components, e.g., layers, joint, etc.
616 ..Deflectable by temperture change, e.g., thermostat element
617 ...More than two components
618 ...One component Cu-based
619 ...Both components Fe-based with more than 10% Ni
620 ..Semiconductor component
621 ..With additional, spatially distinct nonmetal component
622 ...More than one such component
623 ....Adjacent to each other
624 ...Organic component
625 ....Elastomer
626 ....Synthetic resin
627 ...Boride, carbide or nitride component
628 ...Component contains compound of adjacent metal
629 ....Oxide
630 ...Noncrystalline silica or noncrystalline plural-oxide component, e.g., glass, etc.
631 ....Film, e.g., glaze, etc.
632 ...Oxide-containing component
633 ....Plural oxides
634 ...Free carbon containing component
635 ..Four or more distinct components with alternate recurrence of each type component
636 ..Adjacent, identical composition, components
637 ...Group VIII or IB metal-base
638 ....Fe, containing 0.01-1.7% carbon, i.e., steel
639 ..O, S, or organic compound in metal component
640 ...Oxide of transition metal or Al
641 ..Ge- or Si-base component
642 ..Ga-, In-, Tl- or Group VA metal-base component
643 ..Pb- and Sn-base components: alternative to or next to each other*
644 ...And next to Cu- or Fe-base component
645 ..Pb-base component
646 ..Sn-base component
647 ...Next to Group IB metal-base component
648 ...Next to Group VIII metal-base component
649 ..Group IIA metal-base component
650 ..Al-base component
651 ...Next to refractory (Group IVB, VB, or VIB) metal-base component
652 ...Next to Group VIII or IB metal-base component
653 ....Fe
654 ...Next to Al-base component
655 ..Transition metal-base component
656 ...Alternative base metals from diverse categories*
657 ...Group IIB metal-base component
658 ....Zn-base component
659 .....Next to Fe-base component, e.g., galvanized
660 ...Refractory (Group IVB, VB, or VIB) metal-base component
661 ....Diverse refractory group metal-base components: alternative to or next to each other*
662 ....Group VB metal-base component
663 ....Group VIB metal-base component
664 .....Alternative to or next to each other*
665 .....W-base component
666 .....Cr-base component
667 ......Next to Co-, Fe-, or Ni-base component
668 ...Group VIII or IB metal-base component
669 ....Group IB metal-base component alternative to platinum group metal-base component, e.g., precious metal, etc.*
670 ....Platinum group metal-base component
671 ....Cu-base component alternative to Ag-, Au-, or Ni-base component*
672 ....Au-base component
673 ....Ag-base component
674 ....Cu-base component
675 .....Next to Co-, Cu-, or Ni-base component
676 .....Next to Fe-base component
677 ......Fe-base has 0.01-1.7% carbon, i.e., steel
678 ....Co-, Fe-, or Ni-base components, alternative to each other*
679 ....Co- or Ni-base component next to Fe-base component
680 ....Ni-base component
681 ....Fe-base component
682 .....Next to Fe-base component
683 ......Both containing 0.01-1.7% carbon, i.e., steel
684 .....Containing 0.01-1.7% carbon, i.e., steel
685 ......Containing more than 10% nonferrous elements, e.g., high alloy, stainless
686 ..Adjacent functionally defined components
687 .Surface feature, e.g., rough, mirror
2 COMPACTED TRASH OR REFUSE BUNDLE
32 ARTICLE HAVING ORNAMENTAL WOUND OR WOVEN STRANDS
33 PLURAL PARTS WITH EDGES OR TEMPORARY JOINING MEANS EACH COMPLEMENTARY TO OTHER
34 LIGHT TRANSMISSIVE SHEETS, WITH GAS SPACE THEREBETWEEN AND EDGE SEALED (E.G., DOUBLE GLAZED STORM WINDOW, ETC.)
34.1 HOLLOW OR CONTAINER TYPE ARTICLE (E.G., TUBE, VASE, ETC.)
34.2 .Paper containing (e.g., paperboard, cardboard, fiberboard, etc.)
34.3 ..Bag or tubular film (e.g., pouch, flexible food casing, envelope, etc.)
34.4 .Glass, ceramic, or sintered, fused, fired, or calcined metal oxide or metal carbide containing (e.g., porcelain, brick, cement, etc.)
34.5 ..Contains fabric, fiber, particle, or filament made of glass, ceramic, or sintered, fused, fired, or calcined metal oxide or metal carbide or other inorganic compound (e.g., fiber glass, mineral fiber, sand, etc.)
34.6 ..Multilayer (continous layer)

HOLLOW OR CONTAINER TYPE ARTICLE (E.G., TUBE, VASE, ETC.)
.Glass, ceramic, or sintered, fused, fired, or calcined metal oxide or metal carbide containing (e.g., porcelain, brick, cement, etc.)
..Multilayer (continous layer)
34.7 ...Polymer or resin containing (i.e., natural or synthetic)
34.8 .Flexible food casing (e.g., sausage type, etc.)
34.9 .Shrinkable or shrunk (e.g., due to heat, solvent, volatile agent, restraint removal, etc.)
35.1 ..Single layer (continuous layer)
35.2 .Nonself-supporting tubular film or bag (e.g., pouch, envelope, packet, etc.)
35.3 ..Elemental metal containing
35.4 ..Contains vapor or gas barrier, polymer derived from vinyl chloride or vinylidene chloride, or polymer containing a vinyl alcohol unit
35.5 ..Single layer (continuous layer)
35.6 .Cellular material derived from plant or animal source (e.g., wood, cotton, wool, leather, etc.)
35.7 .Polymer or resin containing (i.e., natural or synthetic)
35.8 ..Elemental metal containing (e.g., substrate, foil, film, coating, etc.)
35.9 ...Three or more layers (continuous layer)
36.1 ..Textile, fabric, cloth, or pile containing (e.g., web, net, woven, knitted, mesh, nonwoven, matted, etc.)
36.2 ...Textile, fabric, cloth, or pile is sandwiched between two distinct layers of material unlike the textile, fabric, cloth, or pile player
36.3 ..Fiber or fibers wound around each other or into a self-sustaining shape (e.g., yarn, braid, fibers shaped around a core, etc.)
36.4 ..Randomly noninterengaged or randomly contacting fibers, filaments, particles, or flakes
36.5 ..Foam or porous material containing
36.6 ..Contains vapor or gas barrier, polymer derived from vinyl chloride or vinylidene chloride, or polymer containing a vinyl alcohol unit
36.7 ...Vapor or gas barrier, polymer derived from vinyl chloride or vinylidene chloride, or polymer containing a vinyl alcohol unit is sandwiched between layers (continuous layer)
36.8 ..Natural or synthetic rubber or rubber-like compound containing
36.9 ..Open-ended, self-supporting conduit, cylinder, or tube-type article
36.91 ...Multilayer (continuous layer)
36.92 ..Single layer (continuous layer)
37 SPIRALLY FLAT-WOUND STRAND OR STRIP (E.G., BRAIDED RUG, ETC.)
38 MASS TRANSMISSIVE OF LIGHT THROUGH ALL LAYERS AND HAVING OPAQUE BORDER (E.G., STAINED GLASS, WIRED GLASS, ETC.)
39 COLLAGE REPRESENTATIVE OF REAL OBJECT
40 LAYER OR COMPONENT REMOVABLE TO EXPOSE ADHESIVE
41 .Sectional layer removable
42 ..Adhesive is on removable layer
43 SHEET, WEB, OR LAYER WEAKENED TO PERMIT SEPARATION THROUGH THICKNESS
44 TWO DIMENSIONALLY SECTIONAL LAYER
45 .With frame, casing, or perimeter structure
46 .Transparent or translucent layer or section
47 .Next to unitary web or sheet of equal or greater extent
48 ..Continuous two dimensionally sectional layer
49 ...Glass, ceramic, or metal sections (e.g., floor or wall tile, etc.)
50 ...Cellulosic sections (e.g., parquet floor, etc.)
51 ..Nonrectangular
52 .Sections connected flexibly with external fastener
53 THREE OR MORE COPLANAR INTERFITTED SECTIONS WITH SECURING MEANS
54 LONGITUDINALLY SECTIONAL LAYER OF THREE OR MORE SECTIONS
55 .Next to unitary sheet of equal or greater extent
56 ..Continuous sectional layer
57 SHEETS OR WEBS EDGE SPLICED OR JOINED
58 .Sheets or webs coplanar
59 ..Double faced corrugated sheets or webs connected
60 ..Beveled, stepped, or skived in thickness
61 ..With noncoplanar reinforcement
62 ...Pile or nap surface sheets connected
63 PATCHED HOLE OR DEPRESSION
64 CIRCULAR SHEET
65 .With axial aperture
66 .Edge structure
67 NONPARTICULATE ELEMENT EMBEDDED OR INLAID IN SUBSTRATE AND VISIBLE
68 SHEET INCLUDING COVER OR CASING
69 .Filled with gas other than air; or under vacuum
70 .Encased layer derived from inorganic settable ingredient
71 .Foamed or expanded material encased
72 .Including elements cooperating to form cells
73 ..Honeycomb type cells extend perpendicularly to nonthickness layer
74 .Noninterengaged fibered material encased (e.g., mat, batt, etc.)
75 ..Metal cover or casing
76 .Complete cover or casing
77 SHEET FACING AND LONGITUDINALLY NONCOEXTENSIVE WITH WEB OR OTHER SHEET
78 .Sheet smaller in both length and width
79 ..Smaller sheet has decorative outline
80 NONRECTANGULAR SHEET
81 PERIMETER OR CORNER STRUCTURE OF SHEET (EXCLUDING MERE RECTANGULAR)
82 .Pile or nap type surface
83 .Channel or U-shaped perimeter
84 .Paper sheet
85 PILE OR NAP TYPE SURFACE OR COMPONENT
86 .Interlaminar
87 .With particles
88 .Edge feature or configured or discontinuous surface
89 ..Differential pile length or surface
90 .Flock surface
91 .Nap type surface
92 .Particular shape or structure of pile
93 ..U-, V-, or W-shaped or continuous strand, filamentary material
94 ...Continuous strand with adhesive bond to backing
95 .Particular backing structure or composition
96 .With coating, impregnation, or bond
97 .Composition of pile or adhesive

98 STRUCTURALLY DEFINED WEB OR SHEET (E.G., OVERALL DIMENSION, ETC.)
99 .Including fastener for attaching to external surface
100 ..Hook or barb
101 .Superposed movable attached layers or components
102 .Including stitching and discrete fastener(s), coating or bond
103 ..Discontinuous or differential coating, impregnation, or bond
104 ...Coating, impregnation, or bond in stitching zone only
105 .Including grain, strips, or filamentary elements in respective layers or components in angular relation
106 ..Wood grain
107 ..Strand or strand-portions
108 ...Nonlinear strands or strand-portions
109 ...With additional layer(s)
110 ....On each side of strands or strand-portions
111 .....Including mechanically interengaged strands, strand-portions or strand-like strips
112 ...Oblique to direction of web
113 ..Fibers
114 .Including grain, strips, or filamentary elements in different layers or components parallel
115 .Including fringe
116 .Honeycomb-like
117 ..Filled honeycomb cells (e.g., solid substance in cavities, etc.)
118 ..Hexagonally shaped cavities
119 .Including sheet or component perpendicular to plane of web or sheet
120 ..Inward from edge of web or sheet
121 .Fold at edge
122 ..Channel-shaped edge component (e.g., binding, etc.)
123 ..With strand(s) or strand-portion(s) between layers (e.g., upholstery trim, etc.)
124 ..Acute or reverse fold of exterior component
125 ...Embedded in body of web
126 ...At opposed marginal edges
127 ....Annular cover
128 .....One piece
129 ......Abutted or lapped seam
130 ..Particular fold structure (e.g., beveled, etc.)
131 .Including aperture
132 ..Struck out portion type
133 ...Embedded or interlocked
134 ..Noncircular aperture (e.g., slit, diamond, rectangular, etc.)
135 ...Diamond or hexagonal
136 ...Slit or elongated
137 ..Composite web or sheet
138 ...Including nonapertured component
139 ....Keyed
140 .....From both sides
141 .Continuous and nonuniform or irregular surface on layer or component (e.g., roofing, etc.)
142 ..With transparent or protective coating
143 ..Particulate matter
144 ...Coated
145 ....Silicon containing coating
146 ...Carbohydrate
147 ...Polymer or resin (e.g., natural or synthetic rubber, etc.)
148 ...Metal or metal compound
149 ...Silicon containing
150 ....Sand, clay, or crushed rock or slate
151 ..Artificial wood or leather grain surface
152 ..Wrinkled, creased, crinkled or creped
153 ...Paper
154 ....Plural paper components
155 ..Crackled, crazed or slit
156 .Including variation in thickness
157 ..Differential nonuniformity at margin
158 ..Foamed or cellular component
159 ...Component comprises a polymer (e.g., rubber, etc.)
160 ....Polyurethane
161 ..With component conforming to contour of nonplanar surface
162 ...And conforming component on an opposite nonplanar surface
163 ...Parallel ribs and/or grooves
164 ...Containing metal or metal compound
165 ...Including cellulosic or natural rubber component
166 ..Interlaminar spaces
167 ..Parallel ribs and/or grooves
168 ...With particulate matter
169 ...Oblique to longitudinal axis of web or sheet
170 ..And varying density
171 ...Fiber containing component
172 ..Composite web or sheet
173 ...With partial filling of valleys on outer surface
174 .Nonplanar uniform thickness material
175 ..Embodying mechanically interengaged strand(s), strand-portion(s) or strand-like strip(s), (e.g., weave, knit, etc.)
176 ...With folds in parallel planes
177 ..Differential nonplanarity at margin
178 ..Forming, or cooperating to form cells
179 ..Aligned or parallel nonplanarities
180 ...Waffle-form
181 ...Pleats or otherwise parallel adjacent folds
182 ...Parallel corrugations
183 ....With locally deformed crests or intersecting series of corrugations
184 ....Plural corrugated components
185 .....With corrugations of respective components intersecting in plane projection
186 .....With planar component
187 ..Ornamental design or indicia
188 .Longitudinal or transverse tubular cavity or cell
189 .Laterally noncoextensive components
190 ..Fabric, cloth or textile component
191 ..Cellulosic
192 .Edge feature
193 ..Including layer embodying mechanically interengaged strands, strand-portions or strand-like strips (e.g., weave, knit, etc.)
194 ..Comprising discontinuous or differential impregnation or bond
195 .Discontinuous or differential coating, impregnation or bond, e.g., artwork, printing, retouched photograph, etc.
196 ..Including layer of mechanically interengaged strands, strand-portions or strand-like strips
197 ...Knitted, with particular or differential bond sites or intersections
198 ..Spot bonds connect components
199 ..Including developable image or soluble portion in coating or impregnation (e.g., safety paper, etc.)

	STRUCTURALLY DEFINED WEB OR SHEET (E.G., OVERALL DIMENSION, ETC.)
	.Discontinuous or differential coating, impregnation or bond, e.g., artwork, printing, retouched photograph, etc.
200	..With heat sealable or heat releasable adhesive layer
201	..Intermediate layer is discontinuous or differential
202	...With outer strippable or release layer
203	...Translucent outer layer
204	....Intermediate layer contains particulate material (e.g., pigment, etc.)
205	....Translucent layer comprises natural oil, wax, resin, gum, glue, gelatin
206	..Including particulate material
207	...Including coloring matter
208	...Free metal or mineral containing
209	..Including metal layer
210	..Including ceramic, glass, porcelain or quartz layer
211	..Including paper layer
212	.Including components having same physical characteristic in differing degree
213	..Thickness (relative or absolute)
214	...Of adhesive layers
215	...Absolute thicknesses specified
216	....No layer or component greater than 5 mils thick
217	..Hardness
218	..Density or compression of components
219	.Weight per unit area specified
220	.Physical dimension specified
221	WEB OR SHEET CONTAINING STRUCTURALLY DEFINED ELEMENT OR COMPONENT
222	.Embodying intertwined or helical component(s)
223	.Including interlaminar mechanical fastener
224	.Textile, cloth or fabric (woven, knitted, etc., or nonwoven, but not paper)
225	..Embodying mechanically interengaged strands, strand-portions or strand-like strips (e.g., weave, knit, etc.)
226	...Including strand-like strips
227	...Intertangled strands or strand-portions
228	....Glass strands or strand-portions
229	...Including structurally modified or defined strand
230	...Elastic
231	....Including elastic strands
232	...With parallel strips or strands not interengaged with other strands
233	...With paper or other fiber-containing layer or component
234	....Needled
235	.....And coated, impregnated or adhered
236	....Coated, impregnated or adhered
237	.....Including particulate material
238	.....Strand-type component within layer or between layers
239	......With or between fiber-containing layer(s)
240	...With particulate material
241	....Silicon containing particles (e.g., glass, talc, quartz, ceramic, etc.)
242	....Metal or metal compound particles
243	....Cellulosic particles (e.g., cork, etc.)
244	....Free carbon particles (e.g., graphite, etc.)
245	...With coating, impregnation or bond
246	....Three or more layers
247	.....Including netted or open mesh strand, filament or strip
248	.....Cellulosic layer
249	......Plural such layers
250	.....Natural rubber layer
251	.....Interengaged strand component includes silicic or free metal material (e.g., asbestos, glass, etc.)
252	.....Interengaged strand component includes synthetic fiber or filament
253	....Knitted strand, filament, portion or strip
254	.....Impregnation on single layer only
255	....Netted or open mesh strand, filament, portion or strip
256	.....Metal
257	....Particular or differential weave
258	.....Warp differs from weft
259	......Materials differ
260	....Coated or impregnated base
261	.....Adhesive coating or impregnation
262	.....Coating on surface of base
263	......Metal or compound thereof or natural rubber in coating
264	......Base is cellulosic material
265	......Base comprises synthetic strands, fibers or filaments
266	.......Silicone, silane or siloxane in coating
267	.......Polyamide or polyimide (e.g., nylon, etc.) strands
268	.......Glass fibers, filaments or strands
269	......Keyed by penetration of interstices
270	.....Wool substrate impregnated
271	.....Asbestos fiber base impregnated
272	.....Synthetic filament base impregnated
273	......Glass
274	.....Cellulosic monolayer impregnated
275	......Impregnation contains metallic compound or free element
276	......Phosphorous containing impregnant
277	.......With halogen
278	.....Aldehyde or ketone condensation product
279	.....Quaternary ammonium compound in impregnant
280	..Felt fabric
281	...With particulate matter
282	...At least three layers
283	..With particulate matter
284	..Fabric with plural layers
285	...At least one metal or glass
286	...At least one synthetic resin or polymer
287	....Polyester, polyamide or polyimide
288	..Bonded or coated fibers
289	..Fabric has impregnation and/or single coating
290	...Synthetic resin or polymer in impregnation or coating
291	...Comprising bitumen, tar, natural gum, natural oil, resin or wax in coating or impregnant
292	.Including noninterengaged strand(s) or strand-portion(s)
293	..With or in fiber layer
294	..Parallel
295	...With coating, impregnation or bond of rubber or elastomeric material
296	.Autogeneously bonded fibers

	WEB OR SHEET CONTAINING STRUCTURALLY DEFINED ELEMENT OR COMPONENT
297	.Including a second component containing structurally defined fibers
298	..Plural fiber layers
299	...Intertangled and/or interfitted
300	....Needled
301	....With coating, impregnation or bond
302	...With coating, impregnation or bond
303	..Physical dimension specified
304.4	.Composite having voids in a component, e.g., porous, cellular, etc.
305.5	..With chemically effective material, or specified gas other than air, N or carbon dioxide in void-containing component
306.6	..Void-containing component partially impregnated with adjacent component
307.3	...Void-containing component is inorganic
307.7	....Inorganic impregnant
308.4	...Void-containing component is synthetic resin
308.8	...Void-containing component is wood or paper
309.9	..With internal element bridging layers, nonplanar interface between layers, or intermediate layer of commingled adjacent foam layers
310.5	..With gradual property change within a component
311.1	..Void-containing component has a continuous matrix of fibers only, e.g., porous paper, etc.
311.3	...And a force disintegratable component, e.g., stencil sheet, etc.
311.5	...Fibers of defined composition
311.7	....Cellulosic
311.9	.....Plural cellulosic components
312.2	..Inorganic matrix in void-containing component
312.4	...Of hydraulic-setting material
312.6	...Of silicon-containing material, e.g., glass, etc.
312.8	...Of metal-containing material
313.3	..Preformed hollow element-containing
313.5	...Resin or rubber element
313.7	...Mineral element
313.9	...Metal- or silicon-containing element
314.2	..Void shape specified, e.g., crushed, flat, round, etc.
314.4	..Voids specified as closed
314.8	...Specified thickness of void-containing component (absolute or relative), numerical cell dimension or density
315.5	..Voids specified as micro
315.7	...Specified thickness of void-containing component (absolute or relative) or numerical cell dimension
315.9	...Composite has more than two layers
316.6	..Plural void-containing components
317.1	..With component specified as adhesive or bonding agent
317.3	...As outermost component
317.5	...Adhesive or bonding component contains voids
317.7	...Composition of adhesive or bonding component specified
317.9	..Void-containing component contains also a solid fiber or solid particle
318.4	..With nonvoid component of specified composition
318.6	...Of about the same composition as, and adjacent to, the void-containing component
318.8	....Integrally formed skin
319.1	...Inorganic
319.3	...Synthetic resin
319.7	....Linear or thermoplastic
319.9	.....Hydrocarbon polymer
320.2	.Composite having a component wherein a constituent is liquid or is contained within preformed walls, e.g., impregnant-filled, previously void-containing component, etc.
321.1	..Constituent is in liquid form
321.3	...Ink in pores
321.5	...Encapsulated liquid
322.2	..Indefinite plurality of similar impregnated thin sheets, e.g., "decorative laminate" type, etc.
322.7	..Differentially filled foam, filled plural layers, or filled layer with coat of filling material
323	.Including a second component containing structurally defined particles
324	..Mica
325	..Glass or ceramic (i.e., fired or glazed clay, cement, etc.), (porcelain, quartz, etc.)
326	..Cellulosic (e.g., wood, paper, cork, rayon, etc.)
327	..Polymeric or resinous material
328	..Heavy metal or aluminum or compound thereof
329	...Iron oxide or aluminum oxide
330	..Alkali metal or alkaline earth metal or compound thereof
331	..Silicic material
332	.Physical dimension specified
333	..In terms of molecular thickness or light wave length
334	..Coating layer not in excess of 5 mils thick or equivalent
335	...Up to 3 mils
336	....1 mil or less
337	..Of base or substrate
338	..Monolayer with structurally defined element
339	..Including synthetic resin or polymer layer or component
340	.Weight per unit area specified (e.g., gms/sq cm, lbs/sq ft, etc.)
341	..Of coating
342	...Cellulosic substrate
343	.Adhesive outermost layer
344	..Next to metal
345	..Including irradiated or wave energy treated component
346	..Heat or solvent activated or sealable
347	...Heat sealable
348	....Wax containing
349	....Synthetic resin or polymer
350	...Water activated
351	..Including moisture or waterproof component
352	..With release or antistick coating
353	..Including a primer layer
354	..Three or more layers
355	..Adhesive composition
356	...Including metal or compound thereof or natural rubber
357	COATED OR STRUCTUALLY DEFINED FLAKE, PARTICLE, CELL, STRAND, STRAND-PORTION, ROD, FILAMENT, MACROSCOPIC FIBER OR MASS THEREOF
358	.Channel shape
359	.Staple length fiber
360	..Plural and with bonded intersections only
361	..With coating or impregnation
362	..Nonlinear (e.g., crimped, coiled, etc.)

COATED OR STRUCTUALLY DEFINED FLAKE, PARTICLE, CELL, STRAND, STRAND-PORTION, ROD, FILAMENT, MACROSCOPIC FIBER OR MASS THEREOF
363 .Mica flake
364 .Rod, strand, filament or fiber
365 ..Including textile, cloth or fabric
366 ..Including boron or compound thereof (not as steel)
367 ..Including free carbon or carbide or therewith (not as steel)
368 ...In coating or impregnation
369 ..Nonlinear (e.g., crimped, coiled, etc.)
370 ...Composite
371 ...Helical or coiled
372 ..Including structurally defined particulate matter
373 ..Bicomponent, conjugate, composite or collateral fibers or filaments (i.e., coextruded sheath-core or side-by-side type)
374 ...Fibers or filaments nonconcentric (e.g., side-by-side or eccentric, etc.)
375 ..Coated or with bond, impregnation or core
376 ...Discontinuous or tubular or cellular core
377 ...Wound or wrapped core or coating (i.e., spiral or helical)
378 ...Coating on discrete and individual rods, strands or filaments
379 ...Including metal or compound thereof (excluding glass, ceramic and asbestos)
380 ....Plural coatings
381 .....Free metal in coating
382 .....Natural rubber in coating
383 .....Synthetic resin or polymer in plural coatings, each of different type
384 .....Glass, ceramic or metal oxide in coating
385 ....Metal with weld modifying or stabilizing coating (e.g., flux, slag, producer, etc.)
386 .....Titanium compound in coating
387 .....Silicic material in coating
388 ....Glass or silicic fiber or filament with metal coating
389 ....Metal or metal compound in coating
390 ....Rubber, cellulosic or silicic material in coating
391 ...Silane, silicone or siloxane in coating
392 ...Artificial fiber or filament
393 ....Cellulosic
394 ....Synthetic resin or polymer
395 .....Polyamide, polyimide or polyester
396 ...Impregnation
397 ..Particular cross section
398 ...Tubular or cellular
399 ...Longitudinally varying
400 ...Surface characteristic
401 ..Physical dimension
402 .Particulate matter (e.g., sphere, flake, etc.)
402.2 ..Microcapsule with liquid core
402.21 ...Solid-walled microcapsule from synthetic polymer
402.22 ....Addition polymer from unsaturated monomers only
402.24 ..Microcapsule with solid core
403 ..Coated
404 ...Silicic or refractory material containing (e.g., tungsten oxide, glass, cement, etc.)
405 ....Silane, siloxane or silicone coating
406 ....Glass particles or spheres
407 ...Including synthetic resin or polymer
408 SELF-SUSTAINING CARBON MASS OR LAYER WITH IMPREGNANT OR OTHER LAYER
409 SURFACE PROPERTY OR CHARACTERISTIC OF WEB, SHEET OR BLOCK
410 .Surface modified glass (e.g., tempered, strengthened, etc.)
411.1 COMPOSITE (NONSTRUCTURAL LAMINATE)
412 .Of polycarbonate
413 .Of epoxy ether
414 ..As intermediate layer
415 ...Next to glass or quartz
416 ...Next to metal
417 ..Next to glass or quartz
418 ..Next to metal
419 .Of polythioether
420 .Including interfacial reaction product of adjacent layers
421 .Of fluorinated addition polymer from unsaturated monomers
422 ..Addition polymer is perhalogenated
422.8 .Of polyisocyanurate
423.1 .Of polyamidoester (polyurethane, polyisocyanate, polycarbamate, etc.)
423.3 ..Next to second layer of polyamidoester
423.4 ..Next to animal skin or membrane
423.5 ..Next to polyamide (nylon, etc.)
423.7 ..Next to polyester (polyethylene terephthalate, etc.)
423.9 ..Next to natural rubber
424.2 ..Next to addition polymer of ethylenically unsaturated monomer
424.4 ...Ester monomer type (polyvinylacetate, etc.)
424.6 ...Halide monomer type (polyvinyl chloride, etc.)
424.7 ...Nitrile monomer type (polyacrylonitrile, etc.)
424.8 ...Hydrocarbon polymer (polyethylene, polybutadiene, etc.)
425.1 ..Next to cellulosic
425.3 ..Next to aldehyde or ketone condensation product (phenol-aldehyde, etc.)
425.5 ..Next to silicon-containing (silicone, cement, etc.) layer
425.6 ...Quartz or glass
425.8 ..Next to free metal
425.9 ..Particulate metal or metal compound-containing
426 .Of quartz or glass
427 ..Next to a boron containing layer
428 ..Next to another silicon containing layer
429 ...As silicone, silane or siloxane
430 ...Next to polyester (e.g., alkyd)
431 ...Cross-linked polyester (e.g., glycerol maleate-styrene, etc.)
432 ..Next to metal or compound thereof
433 ...Alloy or free metal
434 ....Noble metal containing
435 ..Next to polyamide or polyimide
436 ..Next to aldehyde or ketone condensation product
437 ...Next to acetal of polymerized unsaturated alcohol (e.g., formal butyral, etc.)
438 ..Next to cellulosic
439 ...Cellulosic ester
440 ..Next to natural rubber, gum, oil, rosin, wax, bituminous or tarry residue
441 ..Next to addition polymer from unsaturated monomers
442 ...Ester, halide or nitrile of addition polymer

COMPOSITE (NONSTRUCTURAL LAMINATE)

443	.Of asbestos
444	..With metal layer
445	..With cellulosic layer
446	.Of silicon containing (not as silicon alloy)
447	..As siloxane, silicone or silane
448	..As intermediate layer
449	...Paper as both adjacent layers
450	..Next to metal
451	..Next to addition polymer from unsaturated monomers, or aldehyde or ketone condensation product
452	..Next to cellulosic
453	...Sodium silicate
454	..Sand, clay or mica (silica excluded)
455	.Of cork
456	..Including natural oil or gum or rosin (e.g., linoleum, etc.)
457	.Of metal
458	..Next to polyester, polyamide or polyimide (e.g., alkyd, glue, or nylon, etc.)
459	...Natural source polyamide (e.g., casein, gelatin, etc.)
460	..Next to aldehyde or ketone condensation product
461	..Next to addition polymer from unsaturated monomers
462	...Including polyene monomers (e.g., butadiene, etc.)
463	...Ester, halide or nitrile of addition polymer
464	..Next to cellulosic
465	..Next to natural rubber
466	...With natural rubber next to second layer of natural rubber
467	..Next to natural gum, natural oil, rosin, lac or wax
468	..Next to bituminous or tarry residue
469	..Next to metal salt or oxide
470	...Organo-metallic salt
471	...Alkali or alkaline earth metal oxide
472	...Refractory metal salt or oxide
472.1	....Formed in situ
472.2	...Aluminium or iron salt or oxide formed in situ
472.3	...Phosphorus containing metal salt formed in situ
473	.Of animal membrane or skin
473.5	.Of polyimide
474.4	.Of polyamide
474.7	..Next to second layer of polyamide
474.9	...At least one layer is nylon type
475.2	..Next to polyester
475.5	..Nylon type
475.8	...Next to addition polymer from unsaturated monomer(s)
476.1	....Polymer of monoethylenically unsaturated hydrocarbon
476.3	..Next to addition polymer from unsaturated monomer(s)
476.6	...Natural source-type polyamide
476.9	...Polymer of monoethylenically unsaturated hydrocarbon
477.4	..Next to aldehyde or ketone condensation product
477.7	..Inorganic-containing or next to inorganic-containing
478.2	..Natural source-type polyamide, e.g., casein, gelatin, etc.
478.4	...Next to cellulosic
478.8	....Paper
479.3	..Next to cellulosic
479.6	...Paper or wood
480	.Of polyester (e.g., alkyd, etc.)
481	..Next to cellulosic
482	..Of cross-linked polyester
483	..Next to addition polymer from unsaturated monomers
484	.Of wax or waxy material
485	..Next to cellulosic
486	...Cellulosic is paper
487	....Glassine paper
488.1	....With pigment or dye (e.g., carbon paper, hectograph paper, etc.)
488.4	.....Having layer over transferable material or on carrier opposite transferable material layer
489	.Of bituminous or tarry residue
490	..Next to cellulosic
491	...Paper
492	.Of natural rubber
493	..Next to second layer of natural rubber
494	..Next to aldehyde or ketone condesation product or addition polymer from unsaturated monomers
495	...Including polyene monomers
496	..Next to cellulosic
497	.Of natural gum, rosin, natural oil or lac
498	..Next to cellulosic
499	...Natural oil
500	.Of addition polymer from unsaturated monomers
501	..Next to an aldehyde or ketone condensation product
502	...Melamine-aldehyde
503	....Impregnated or coated cellulosic material
504	...Amide-aldehyde
505	....Urea or modified urea-aldehyde
506	...Phenol-aldehyde
507	..Next to cellulosic
508	...Regenerated or modified cellulose
509	....Addition polymer of hydrocarbon(s) only
510	....Where addition polymer is an ester or halide
511	...Paper or wood
512	....Addition polymer of hydrocarbon(s) only
513	.....Monoethylenically unsaturated
514	....Ester, halide or nitrile of addition polymer
515	..Next to second addition polymer from unsaturated monomers
516	...Monoolefin polymer
517	....Next to polyene polymer
518	....Next to vinyl or vinylidene chloride polymer
519	...Including polyene monomers
520	...Ester, halide or nitrile of addition polymer
521	..Polyene monomer-containing
522	..Ester, halide or nitrile of addition polymer
523	..Polymer of monoethylenically unsaturated hydrocarbon
524	.Of aldehyde or ketone condensation product
525	..Next to second aldehyde or ketone condensation product
526	..Next to cellulosic
527	...Modified or regenerated cellulose
528	...Wood
529	....Phenoplast
530	...Paper
531	....Phenoplast
532	.Of carbohydrate
533	..Of cellulosic next to another carbohydrate
534	...Cellulosic next to another cellulosic
535	....Wood or paper
536	....Regenerated or modified
537.1	..Of wood

	COMPOSITE (NONSTRUCTURAL LAMINATE)
	.Of carbohydrate
537.5	..Of paper
537.7	...Next to layer of metal salt, e.g., plasterboard, etc.
688	.Of inorganic material
689	..Metal-compound-containing layer
690	...Fluorescent, phosphorescent or luminescent layer
691	....Halogen-containing
692	...Defined magnetic layer
693	....Next to second metal-compound-containing layer
694	....Dynamic recording medium
695	.....With lubricant in or on layer
696	...Halogen-containing
697	...Layer contains compound(s) of plural metals
698	...Carbide-, nitride-, or sulfide-containing layer
699	...Next to second metal-compound-containing layer
700	....Single crystal
701	....O-containing metal compound
702	...O-containing
703	....Water-settable material, e.g., gypsum, etc.
704	.Of B, N, P, S or metal-containing material
539.5	METAL CONTINUOUS PHASE INTERENGAGED WITH NONMETAL CONTINUOUS PHASE
540	IMPREGNATED NATURALLY SOLID PRODUCT (E.G., LEATHER, STONE, ETC.)
541	.Wood timber product (e.g., piling, post, veneer, etc.)
542.2	DECORATIVE ARTICLE
542.4	.Trophy or memento, e.g., preserved artifact, etc.
542.6	.Constructed from filamentary or flat sheet material
542.8	ARTICLE OF INTERMEDIATE SHAPE, E.G., BLANK, PARISON, PREFORM, ETC.
543	MISCELLANEOUS (E.G., TREATED SURFACES, ETC.)
	******************************

908	IMPRESSION RETENTION LAYER (E.G., PRINT MATRIX, SOUND RECORD, ETC.)
908.8	WEAR-RESISTANT LAYER
909	RESILIENT LAYER (E.G., PRINTER'S BLANKET, ETC.)
910	PRODUCT WITH MOLECULAR ORIENTATION
911	PENETRATION RESISTANT LAYER
912	PUNCTURE HEALING LAYER
912.2	MIRROR
913	MATERIAL DESIGNED TO BE RESPONSIVE TO TEMPERATURE, LIGHT, MOISTURE, ETC.
913.3	DECORATIVE ARTICLE FOR VIEWING FROM ONE SIDE ONLY, E.G., PLAQUE, ETC.
914	TRANSFER OR DECALCOMANIA
915	.Fraud or tamper detecting
916	FRAUD OR TAMPER DETECTING
917	ELECTROLUMINESCENT
918	MATERIAL ABNORMALLY TRANSPARENT
919	CAMOUFLAGED ARTICLE
920	FIRE OR HEAT PROTECTION FEATURE
921	.Fire or flameproofing
922	STATIC ELECTRICITY METAL BLEED-OFF METALLIC STOCK*
923	.Physical dimension
924	..Composite
925	...Relative dimension specified
926	...Thickness of individual layer specified
	.Special properties
927	..Decorative informative
928	..Magnetic
929	..Electrical contact feature
930	..Electric superconducting
931	..Components of differing electric conductivity
932	..Abrasive or cutting feature
933	..Sacrificial component
	.Product by special process
934	..Electrical process
935	...Electroplating
936	..Chemical deposition, e.g., electroless plating, etc.
937	..Sprayed metal
938	..Vapor deposition or gas diffusion
939	..Molten or fused coating
940	..Pressure bonding, e.g., explosive, etc.
941	..Solid state alloying, e.g., diffusion, to disappearance of an original layer

CLASS 429 CHEMISTRY, ELECTRICAL CURRENT PRODUCING APPARATUS, PRODUCT, AND PROCESS

DECEMBER 1990

1 HAVING POLARITY SAFETY FEATURE
2 HAVING LIVING MATTER, E.G., MICROORGANISM, ETC.
3 HAVING PULSE FEATURE
4 WITH SONIC OR ULTRASONIC FEATURE
5 RADIO ACTIVE MATERIAL CONTAINING
6 WITH PRESSURE EQUALIZING MEANS FOR LIQUID IMMERSION OPERATION
7 WITH NONBATTERY ELECTRICAL COMPONENT ELECTRICALLY CONNECTED WITHIN CELL CASING OTHER THAN TESTING OR INDICATING COMPONENTS
8 HAVING DISPARATE NONELECTRICAL FUNCTION
9 HAVING DIVERSE CELLS OR DIVERSE REMOVABLE CELLS IN A SUPPORT MEANS
10 HAVING MAGNETIC FIELD FEATURE
11 CURRENT PRODUCTION DEPENDENT UPON TEMPERATURE DIFFERENTIAL BETWEEN A PAIR OF ELECTRODES
12 FUEL CELL, SUBCOMBINATION THEREOF OR METHODS OF OPERATING
13 .Process of operating
14 ..Circulating or feeding electrolyte
15 ...Active material in electrolyte
16 ..Fused or molten electrolyte
17 ..Generating, regenerating or recycling reactant
18 .Plural cells having means to reduce ionic short circuit
19 .Having means for active material generation or regeneration
20 ..By heating or cooling
21 ..By electrical current
22 .Automatic control means
23 ..Electrical output dependent
24 ..Temperature dependent
25 ..Pressure dependent
26 .Having heat exchange means
27 .Active material electrode-type cell or subcombination thereof
28 ..Envelope cathode-type or subcombination thereof
29 ..And chemically specified electrolyte material
30 .Solid electrolyte
31 ..Tubular
32 ..Plural disc or modules
33 ..Electrolyte composition chemically specified
34 .Housing member, seal, spacer or fluid distributing or directing means
35 ..Having sealing feature
36 ...Having bonded seal, e.g., welded, adhesive, molded in situ, etc.
37 ....Having clamping means
38 ...Having support or spacers with fluid distribution means
39 ....And fluid directing means
40 .Catalytic electrode structure or composition
41 ..Having electrolyte matrix or barrier layer
42 ..Having organic constituent as part of the electrode
43 ...Organic catalyst
44 ..Having an inorganic matrix, substrate or support
45 ...Of sintered particles
46 .Chemically specified electrolyte
47 HAVING EARTH FEATURE
48 PRESERVING CELL IN STORAGE FEATURE
49 REGENERATING, SALVAGE OR REPAIR FEATURE OTHER THAN ONLY ADDITION OF ELECTROLYTE TO CELL OR ELECTRICALLY CHARGING PER SE
50 PROCESS OF CELL OPERATION
51 .Electrolyte circulation
52 .Activation of inactive cell
53 MEANS EXTERNALLY RELEASING INTERNAL GAS PRESSURE FROM CLOSED CELL, I.E., VALVE ETC.
54 .Elastic, resilient or spring biasing valve means
55 ..Elastic band or O-ring valve member
56 .Blowout type
57 SEALED CELL HAVING GAS PREVENTION OR ELIMATION MEANS
58 .Prevention means controlling an auxiliary device
59 .Prevention or elimination means is one of the cell electrodes or is electrically connected to an electrode
60 ..Electrodes having different total capacity or one electrode with charge or discharge reserve
61 WITH CONTROL MEANS RESPONSIVE TO BATTERY CONDITION SENSING MEANS
62 .Temperature control
63 .Electrolyte feeding control from reserve supply
64 ..Having valve in control
65 TERMINAL PROTECTOR OTHER THAN SEAL THROUGH CASING
66 HAVING MEANS TO ACCOMMODATE ELECTRODE EXPANSION
67 HAVING MOVABLE MECHANICAL MEANS TO PROVIDE RELATIVE MOTION BETWEEN ELECTRODE AND ELECTROLYTE
68 .Means moves electrode
69 ..Rotary motion
70 .Means moves electrolyte externally of electrode chamber
71 WITH SYSTEM HAVING MEANS TO MOVE VENTILATING FLUID
72 HAVING SPECIFIED VENTING, FEEDING OR CIRCULATION STRUCTURE (OTHER THAN FEEDING OR FILLING FOR ACTIVATING DEFERRED ACTION-TYPE BATTERY)
73 .Single filling opening and means to equalize fluid level in plural cells
74 .Having means to control electrolyte level when liquid is added, other than a visual reference point
75 ..For different levels
76 ..Float valve
77 ..By establishing an air lock
78 ...Liquid seal only
79 ...Movable valve structure supported within the filler opening
80 .Having (manual) electrolyte storage feeding a device
81 .Having nonmovable means providing motion between electrolyte and electrodes, i.e., circulation
82 .Venting structure
83 ..Separate ventilating inlet and exhaust openings
84 ..Nonspill fluent electrolyte type other than gas diffusive type
85 ...Weight actuated valve type
86 ..Reactive, absorbable or diffusive type
87 ..Gang type
88 ...Having manifold
89 ..Other stopper, cap or plug type
90 WITH MEASURING, TESTING, OR INDICATING MEANS
91 .For charge or liquid level
92 ..Having electrical circuitry
93 ...External type
94 PLURAL CONCENTRIC OR SINGLE COILED ELECTRODE

95 HAVING MEANS FOR DRAINING OR REMOVING ELECTROLYTE FROM A CELL OTHER THAN FILLER OPENING
96 CELL SUPPORT FOR REMOVABLE CELL
97 .Having switch or interlock means
98 .Having disparate support structure, e.g., eyeglass temple, etc.
99 .For plural cells
100 .Support or holder per se
101 FLUID ACTIVE MATERIAL OR TWO-FLUID ELECTROLYTE COMBINATION HAVING AREAS OF NONMIXTURE
102 .Active material in molten state
103 ..With fused electrolyte, i.e., molten
104 ..With solid-state electrolyte
105 .Active material in solution
106 ..Copper sulfate solution
107 ..Iron containing material
108 ..Nitrogen containing material
109 ..Chromium containing material
110 DEFERRED ACTION TYPE
111 .Responsive to light
112 .Responsive to heat
113 .Responsive to movement of electrode on contained electrolyte
114 ..Activated by spin or set back
115 ..Activated by explosive charge
116 ..Frangible separation means
117 ..By orientation of the cell
118 .Responsive to addition of liquid
119 ..Activated by immersion, e.g., sea water type
120 WITH HEAT EXCHANGE FEATURE
121 ADJUNCTS IN COMBINATION WITH OR FOR CONNECTION TO AN EXTERNAL ELECTRICAL ELECTRIC CURRENT CARRYING MEMBER OF A BATTERY OTHER THAN TERMINAL PROTECTORS, E.G., TERMINAL ADAPTER, CAPS, LIFTERS, ETC. AND CONNECTORS PER SE
122 CURRENT PRODUCING CELL, ELEMENTS, SUBCOMBINATIONS AND COMPOSITIONS FOR USE THEREWITH AND ADJUNCTS
123 .Having means to interchangeably connect plural individual cells or means to conectively support cell to current seeking apparatus
124 .Printed cell type
125 .Standard cell or counter emf type
126 .Cell with protective layer on electrolyte
127 .Tape or flexible-type cell including tape fuel cells or subcombination thereof
128 .Electrode or plural tablets, pellets or discs
129 .Separator, retainer or spacer insulating structure (other than a single porous flat sheet, or either an impregnated or coated sheet not having distinct layers)
130 ..Insulator structure is only spacer of the rod, button, strip, or frame type
131 ..Having electrode enclosing feature
132 ...Separating material in bulk form about electrode
133 ...Cylindrical unit cell type, flat unit cell type or porous cup type
134 ....Paste or gel
135 .....With layer of material or spacing means
136 ...Envelope type
137 ....Coating on electrode
138 ....Having support frame or cover
139 ....Having edge bond or seal
140 ...Tubular type
141 ....Having plural layers of diverse material
142 ..Having plural distinct components
143 ...Ribs or projections attached to sheet material
144 ...Plural layers
145 ....Having defined porosity either functional or by size (i.e., semipermeable, permselective, ionpermeable, microporous, etc.)
146 ..Having electrode spacing projections
147 ...Projections are deformed portions, of a sheet material, i.e., corrugations, etc.
148 .Plural housing having spacing means or channels for air circulation and short prevention
149 .Plural cells
150 ..With integral switch means
151 ..Casing having interlocking structure
152 ..Individual cells connected in repeating contiguous layered units
153 ...Having unit enclosing housing
154 ....Having sectional component
155 .....Of tray, cup or dish shape in nested or telescopic relationship
156 ..Complete cells
157 ...In end-to-end contact, e.g., stacked button-type cell, etc.
158 ...Having intercell connector
159 ....And common external casing, tray or clamp means
160 ..Having intercell connector
161 .Intracell assembly having cell electrode connector
162 .Flat-type unit cell and specific unit cell components
163 .Cell enclosure structure, e.g., housing, casing, container, cover, etc.
164 ..Cylindrical unit cell type, e.g., cup container electrode, tubular electrode, casing, etc.
165 ...Having centrally located anode, i.e., "inside-out" type cell
166 ...Reactive metallic can, cup or tubular electrode
167 ....Having outer nonreactive housing, casing, or jacket
168 .....Having metallic or conductive outer casing
169 ......Outer casing electrically connected to reactive electrode
170 .....Electrical contact terminal plate or cap clamped to or embedded in a portion of the housing
171 ....Having seal
172 .....Mechanical clamping pressure seal
173 ......And sealing mass or compound
174 ...Having seal material
175 ..Cover only
176 ..Container only
177 ..Housing or casing with plural covers
178 ..Having terminal
179 ...On or through a side of housing
180 ...Sealing sleeve embedded or molded in cover
181 ...And terminal seal
182 ....Means to stop rotational movement between cover and terminal
183 ....Having threaded compression means
184 ....Sealing mass or compound
185 ..Having seal feature
186 ..Having cell assembly support feature
187 ..Having handle or lifting device
188 .Include electrolyte composition chemically specified and method

CLASS 429 CHEMISTRY, ELECTRICAL CURRENT PRODUCING APPARATUS, PRODUCT, AND PROCESS

DECEMBER 1990

	CURRENT PRODUCING CELL, ELEMENTS, SUBCOMBINATIONS AND COMPOSITIONS FOR USE THEREWITH AND ADJUNCTS
	.Include electrolyte composition chemically specified and method
189	..Precursor compostion
190	..Gelled
191	..Solid
192	...Organic
193	...Metal oxide component
194	..Nonaqueous solvent
195	...With water
196	...Inorganic solvent
197	...Plural nonaqueous system
198	..Having organic solute component
199	..Halogen containing
200	...Hydrogen containing
201	....Ammonium
202	..Chromium containing
203	..With acid containing N or P constituent
204	..Sulphuric acid
205	...Sulphate containing
206	..Alkaline
207	...With salt or acid component
208	.Electrode support for suspending or holding an electrode in a battery
209	.Electrode
210	..Bipolar type
211	..Having connector tab
212	..Having active material with organic component
213	...Organic component is active material
214	...Organic component is an antioxidant
215	...Organic component is an expander or addition agent for improving electrode capacity or plating characteristics
216	....Dendrite or "tree" forming inhibitor
217	...Organic component is a binder
218	..Having inorganic active material chemically specified
219	...Silver component is active material
220	...Copper component is active material
221	...Iron component is active material
222	...Cadmium component is active material
223	...Nickel component is active material
224	...Manganese component is active material
225	...Lead component is active material
226	....Alloy
227	....Metal sulphate or carbonate
228	....Lead oxide
229	...Zinc component
230	....With mercury
231	....Zinc oxide
232	..Having inorganic binder or conductive filler
233	..Grid or holder for active material
234	...Grid or holder has nonconducting component portion thereof
235	...Having particulate or fibrous porous mass including a sintered mass
236	....Having coating in the pores
237	....Having support or reinforcing member
238	...Having longitudinal electrically conducting tubes or cores
239	...Having conductive receptacle or mechanical locking means for the active material
240	....Locking means being bendable tabs
241	...Open mesh or perforated plate
242	....Expanded metal
243	....Having members in a face plane of the grid being offset from members in the plane of the opposite face
244	.....Distinct elements or members intermediate the face members
245	...Materials chemically specified
246	..With insulating separator, spacer or retainer means
247	.Separator, retainer, spacer or materials for use therewith
248	..Having additive for effecting the charge capacity, life, etc., of a cell
249	..Organic material
250	...And wetting agent or surface acting agent
251	...And inorganic material
252	....Silicon containing
253	...Phenolic or thermosetting resin
254	...Rubber or thermoplastic resin
255	...Natural or treated plant materials

CLASS 430 RADIATION IMAGERY CHEMISTRY - PROCESS, COMPOSITION OR PRODUCT

1 HOLOGRAPHIC PROCESS, COMPOSITION, OR PRODUCT
2 .Composition or product or process of making the same
3 USE OF SOUND OR NONDIGITAL COMPRESSIVE FORCE
4 RADIATION MODIFYING PRODUCT OR PROCESS OF MAKING
5 .Radiation mask
6 .Screen other than for cathode-ray tube
7 ..Color
8 MICROGRAPHY, PROCESS, COMPOSITION, OR PRODUCT OTHER THAN MICROELECTRONIC DEVICE MANUFACTURE
9 IMAGED PRODUCT
10 .Antifraud or antitampering
11 .Structurally defined
12 ..Nonuniform or non-coextensive layer added to finished imaged product
13 .Image contained within transparent base
14 .Multilayer
15 ..Plural image layers
16 .Deposited metal coating on image
17 .Nonsilver image
18 .Including resin or synthetic polymer
19 ERASABLE IMAGING
20 LIQUID CRYSTAL PROCESS, COMPOSITION, OR PRODUCT
21 RETRIEVING IMAGE MADE USING RADIATION IMAGERY
22 REGISTRATION OR LAYOUT PROCESS OTHER THAN COLOR PROOFING
23 PRODUCING CATHODE-RAY TUBE OR ELEMENT THEREOF
24 .Using specific control or specific modification of exposure, i.e., by manipulation of radiation source or exposure through elements other than shadow mask
25 .With light-absorbing matrix on faceplate
26 .With faceplate of phosphoric stripes
27 .With filter material on finished faceplate
28 .Using specified radiation-sensitive composition other than a nominal sensitized polyvinyl alcohol
29 .Using specified post-imaging process composition
30 INCLUDING CONTROL FEATURE RESPONSIVE TO A TEST OR MEASUREMENT
31 ELECTRIC OR MAGNETIC IMAGERY, E.G., XEROGRAPHY, ELECTROGRAPHY, MAGNETOGRAPHY, ETC., PROCESS, COMPOSITION, OR PRODUCT
32 .Electrophoretic imaging, process, composition, or product
33 ..Post treatment process to fix or transfer image, or collect or remove electric radiation sensitive pigment
34 ..Pretreatment process to change the physical properties of electrophoretic suspension or specified imaging feature exposure
35 ..Specified electric field applied or electric charging step
36 ..Manipulation of electrode
37 ..Electric radiation sensitive pigment
38 ..Material used to modify electrophoretic suspension response
39 .Magnetic imaging
40 .Manifold imaging, process, composition, or product
41 .Migration imaging, process, composition, or product, e.g., electrosolography, etc.
42 .To produce a color reproduction, i.e., color named, or more than one color specified
43 ..Color correction
44 ..Manipulation of color separation image to obtain a multicolor image in registration
45 ..Identified developing composition or identified developing feature
46 ..Identified radiation-conductive element or composition
47 ..Identified receptor or named image transfer feature
48 .Electrostatic image transfer
49 .To produce printing surface
50 .Deformation imaging, e.g., frost imaging, etc.
51 .Persistent internal polarization imaging
52 .Electrolysis imaging
53 .Using ion or particle flow modulation
54 .To produce multiple image on medium or plural radiant energy exposures of medium, e.g., image intensification using two images, or two exposures of same image, etc.
55 .Charging simultaneous with imaging
56 .Radiation-sensitive composition or product
57 ..Multiple radiation conductive layers
58 ...Charge transport layer
59 ....Amino or substituted amino group containing
60 ..Product having layer between radiation-conductive layer and base or support
61 ...Sensitizing layer
62 ...Conductive layer
63 ....Inorganic containing
64 ...Blocking or barrier layer
65 ....Inorganic containing
66 ..Product having overlayer on radiation-conductive layer
67 ...Electrically insulating overlayer
68 ..Including radiation-conductive screen
69 ..Including conductive base or support
70 ..Radiation-conductive composition contains carbocyclic ring only
71 ...Polycyclo ring system
72 ....Substituted
73 ...Containing amino or substituted amino group
74 ....Alkyl amino group
75 ..Radiation-conductive composition contains hetero ring
76 ...The hetero ring has at least nitrogen as a ring hetero atom
77 ....Additional diverse ring hetero atom in the hetero ring
78 ....Polycyclo ring system having the hetero ring as one of the cyclo systems
79 .....Carbazole
80 ......Polymer or synthetic resin only
81 ......Sensitized or doped
82 ....Dye or pigment
83 ..Sensitized or doped organic radiation conductor
84 ..Inorganic radiation conductive composition
85 ...Alloy
86 ....Having more than two consituents
87 ...Zinc containing
88 ....And other radiation-conductive material
89 ....And nonsensitizing additive other than binder

	ELECTRIC OR MAGNETIC IMAGERY, E.G., XEROGRAPHY, ELECTROGRAPHY, MAGNETOGRAPHY, ETC., PROCESS, COMPOSITION, OR PRODUCT
	.Radiation-sensitive composition or product
	..Inorganic radiation conductive composition
	...Zinc containing
90	....Sensitized or doped
91	.....Dye or pigment
92	......Intercyclic-acyclic -CH= or intercyclic-acyclic chain which contains -CH=
93	.......Cyanine dye
94	...Cadmium containing
95	...Sensitized or doped
96	..Binder for radiation-conductive composition
97	.Post imaging process, finishing, or perfecting composition or product
98	..Fixing image by pressure only
99	..Fixing image by heated metal roller
100	..Reversal development
101	..Impression development
102	..Selective toner release
103	..Using developer electrode
104	..Finishing or perfecting composition or product
105	...Developing composition or product
106	....Identified colorant, i.e., dye, dye former, pigment, etc.
106.6	....Magnetic or iron-containing component
107	....Dry powder
108	.....Identified carrier
109	.....Identified toner
110	.....Identified adjuvant, i.e., charge control agent, etc.
111	.....Identified structure, i.e., size, shape of carrier or toner particle, etc.
112	....Liquid
113	.....Multiple phase liquid carrier medium, i.e., emulsion
114	.....Identified toner, i.e., identified resin coated pigment, etc.
115	.....Identified adjuvant, i.e., surfactant, etc.
116	.....Identified liquid carrier
117	..Liquid development
118	...Wetting development
119	...Charged solid particles deposited out of insulating liquid carrier
120	..Dry powder developing
121	...Cascade
122	...Using magnetic brush
123	...Using fur brush
124	..Fixing image
125	..Cleaning radiation conductive surface
126	..Transfer of image to different surface
127	.Process of making radiation-sensitive product
128	..Coating by vacuum deposition
129	..Extrusion coating
130	..Thermal or energy treatment of radiation-sensitive layer, e.g., by fusing or annealing, or solvent aftertreatment of radiation-sensitive layer, etc.
131	..Applying subbing layer
132	..Applying overlayer
133	..Applying radiation-sensitive layer
134	...Heterogeneous
135	.Process of making radiation-sensitive composition
136	..Utilizing high temperature, e.g., by fusing, etc.
137	.Process of making developing composition
138	MICROCAPSULE, PROCESS, COMPOSITION, OR PRODUCT
139	LUMINESCENT IMAGING
140	PRODUCT HAVING SOUND RECORD OR PROCESS OF MAKING
141	DIAZO REPRODUCTION, PROCESS, COMPOSITION, OR PRODUCT
142	.Process producing multiple image
143	..Color proofing, colloid transfer, or pigment development
144	.Powder development of tacky surface
145	.Photomechanical dye image prepared
146	.Diazo-type process, i.e., producing dye image by reacting the diazo or the imaged reaction product of the diazo
147	..Negative image prepared
148	..To make diazo-type intermediate, black-line image, or continuous-tone image
149	..Liquid development, e.g., aqueous solution with coupler, etc.
150	..Gaseous development, e.g., ammonia vapor, etc.
151	..Heat development
152	.Vesicular process
153	.Physical development
154	.Composition or product which contains radiation sensitive compound having moiety of nitrogen double or triple bonded directly to nitrogen other than chromophore moiety, e.g., triazene containing product, etc., process of making, and composition or product used to finish or develop a diazo reproduction
155	..Product with at least two named layers
156	...At least two radiation-sensitive layers
157	...Diazonium compound containing layer
158	....Including subbing layer
159	.....Silicon, nitrogen or sulfur compound containing subbing layer
160	.....Polymer containing subbing layer
161	.....Acid, salt, or ester moiety ingredient containing subbing layer
162	....Including overlayer or backing layer
163	....Diazonium salt with anion specified
164	...Diazo-N-sulfonate containing layer
165	...Quinone diazide containing layer
166	....Including additional layer
167	...Azide containing layer
168	..Process of making diazo product
169	...Using specific adjuvant other than radiation-sensitive diazo compound
170	..Radiation-sensitive composition
171	...Diazonium compound containing
172	....At least two diverse diazonium compounds
173	....At least two couplers
174	.....Includes additional adjuvant other than acidic stabilizer
175	....Polymeric diazonium compound
176	....Polymeric mixture
177	....Processing ingredient other than coupler or carboxylic acid compound
178	.....Metal salt ingredient
179	.....Nitrogen atom containing organic ingredient
180	....Naphthol coupler included
181	....Phenol coupler included

DIAZO REPRODUCTION, PROCESS, COMPOSITION, OR PRODUCT
.Composition or product which contains radiation sensitive compound having moiety of nitrogen double or triple bonded directly to nitrogen other than chromophore moiety, e.g., triazene containing product, etc., process of making, and composition or product used to finish or develop a diazo reproduction
..Radiation-sensitive composition
...Diazonium compound containing
182 ....Aceto-aceto or heterocyclic coupler included
183 ....P-amino or p-thio benzene diazonium compound
184 .....2,3 substitution of benzene nucleus
185 .....Additional substituent on benzene nucleus
186 .....P-substituent is p-heterocyclic amine
187 .....2,5 substitution of benzene nucleus
188 ...Diazo-N-sulfonate containing
189 ...Quinone diazide containing
190 ....Polymeric quinone diazide
191 ....And monomeric processing ingredient
192 ....Polymeric mixture
193 ....O-quinone diazide
194 ...Azide containing
195 ....Polymeric azide
196 ....And monomeric processing ingredient
197 ....Polymeric mixture
198 VISIBLE IMAGING INCLUDING STEP OF FIRING OR SINTERING
199 TRANSFER PROCEDURE BETWEEN IMAGE AND IMAGE LAYER, IMAGE RECEIVING LAYERS, OR ELEMENT CONTAINING AN IMAGE RECEIVING LAYER OR AN INGREDIENT FOR FORMING AN IMAGE RECEIVING LAYER
200 .Imagewise heating, element or image receiving layers therefor or imagewise vapor and gas transfer process, element or image receiving layer therefor
201 ..Imagewise vapor or gas transfer process, element or image receiving layer therefor
202 .Diffusion transfer process, element, or identified image receiving layers therefor
203 ..By uniform application of heat, element, or image receiving layer therefor
204 ..Making printing plate
205 ...Including imagewise removal of image receiving layer or portion thereof
206 ..Web processing of radiation-sensitive layer or imbibition of image receiving layer or image receiving element with processing composition prior to contact with the radiation sensitive element or layer
207 ..Element structurally defined other than containing nominal processing composition container or trap, or containing processing composition container or trap made of identified material
208 ...Having specified processing composition retaining means
209 ...Having specified trap
210 ...Having separable carrier sheet with processing composition container or trap permanently attached thereto
211 ..Element or identified image receiving layers for dye image formation
212 ...Element containing silver salt sensitizer or either element or image receiving layer for use therewith
213 ....Having either an identified dye mordant or image receiving layer binder other than nominal gelatin
214 ....Having either a nonradiation sensitive scavenger layer, or an ingredient for forming scavenger or barrier layer, or an identified developing agent scavenger
215 ....Identified synthetic polymeric binder contained in nonradiation sensitive processing composition permeable layer other than an image receiving or neutralization layer
216 ....Identified neutralizing layer or ingredient containing or dye stabilizer containing
217 ....Silver halide identified-grain, identified emulsion binder other than nominal gelatin, or identified sensitizer or identified desensitizer containing
218 ....Identified nondye image forming developing agent, silver halide development accelerator or retarder, or dye image forming accelerator or retarder containing
219 .....Silver halide developing retarder or antifoggant
220 ....Identified light absorbing, whitening, brightening, or reflecting agent other than nominal TiO2
221 .....pH sensitive
222 ....Identified dye image forming compound other than colorless color developer or dye mordant containing or identified organic solvent for an incorporated ingredient
223 .....Redox cleavable dye or dye precursor releaser
224 .....Dye developer or leuco dye developer
225 ......Azo
226 .....Coupler with coupling-off ballast, dye or dye precursor moiety
227 ..Element or image receiving layers for silver salt or silver complex transfer
228 ...Having lenticular or color screen
229 ...Permanent laminate
230 ...Identified silver halide grain, silver halide emulsion, binder other than nominal gelatin, or silver halide sensitizer or desensitizer containing
231 ...Identified precipitation nuclei or image receiving layer binder containing other than nominal gelatin
232 ....Identified organic polymeric image receiving layer binder other than nominal gelatin
233 ...Identified toning or silver transfer image stabilizing ingredient containing
234 ...Identified developing agent or silver salt complexing agent containing
235 ..Dye image formation process
236 ...Using silver salt sensitizer

TRANSFER PROCEDURE BETWEEN IMAGE AND IMAGE LAYER, IMAGE RECEIVING LAYERS, OR ELEMENT CONTAINING AN IMAGE RECEIVING LAYER OR AN INGREDIENT FOR FORMING AN IMAGE RECEIVING LAYER
.Diffusion transfer process, element, or identified image receiving layers therefor
..Dye image formation process
...Using silver salt sensitizer
237 ....Using identified neutralization layer or ingredient or separate post transfer treatment of dye image
238 ....Using identified dye mordant or binder other than nominal gelatin
239 ....Using identified nondye image forming developing agent, silver development accelerator or retarder, or dye image formation accelerator or retarder
240 .....Development retarder or antifoggant
241 ....Using identified dye forming compound other than colorless color developer or dye mordant or using identified organic solvent
242 .....Redox cleavable dye or dye precursor releaser
243 .....Dye developer or leuco dye developer
244 ..Silver salt transfer process
245 ...Exposing through color filter element
246 ...Processing permanent laminate
247 ...Having identified precipitation nuclei or identified image receiving binder other than nominal gelatin
248 ...Including silver transfer image toning or stabilizing or separate post transfer treatment of element or layer containing silver image
249 ...Developing with an identified silver halide developing agent
250 ....Hydroxylamine
251 ...Processing with identified silver or silver salt complexing agent
252 .Image layer portion transfer and element therefor
253 ..Separating exposed areas from unexposed or underexposed areas of image layer by transfer, or element or image receiving layers therefor
254 ...Transfer process with uniform heat application and element therefor
255 ...Using silver salt sensitizer and element therefor
256 STRIPPING PROCESS OR ELEMENT
257 .Forming composite image, e.g., multiple stripped image layers, etc.
258 .Forming nonplanar image
259 .Element
260 ..Stripping layer having radiation polymerizable or cross-linkable composition
261 ..Strippable between two radiation sensitive layers
262 ..Stripping layer containing specified synthetic nonradiation sensitive polymer
263 ...From ethylenically unsaturated monomer
264 SILVER HALIDE COLLOID TANNING PROCESS, COMPOSITION, OR PRODUCT
265 .Process using lithographic infectious developer
266 ..And polymer or nonpolymer condensation reaction product
267 ..And heterocyclic additive
268 .Infectious developer composition
269 IMAGING AFFECTING PHYSICAL PROPERTY OF RADIATION SENSITIVE MATERIAL, OR PRODUCING NONPLANAR OR PRINTING SURFACE - PROCESS, COMPOSITION, OR PRODUCT
270 .Radiation sensitive composition or product or process of making
271 ..Identified backing or protective layer containing
272 ...Silicon containing backing or protective layer
273 ...Identified overlayer on radiation-sensitive layer
274 ...And radiation-sensitive chromium compound
275 ...Metal as backing or protective layer
276 ....And another backing or protective layer other than aluminum oxide
277 ....Copper
278 ....Aluminum
279 ....Zinc or magnesium
280 ..Radiation sensitive composition comprising oxirane ring containing component
281 ..Radiation sensitive composition comprising ethylenically unsaturated compound
282 ...N-vinylidene
283 ...Amide
284 ....Urethane
285 ...Polyester
286 ...Resin or prepolymer containing ethylenical unsaturation
287 ....Ethylenic unsaturation within the side chain component
288 ...Plural, terminal unsaturation
289 ..Radiation sensitive chromium compound
290 .Light scattering or refractive index image formation
291 .Post imaging treatment with particles
292 .Readily visible image formation
293 ..Color proofing or multicolor image formation
294 ..By solvent removal
295 ..Making ornamental design
296 .Electron beam imaging
297 .Simultaneous radiation imaging and etching of substrate
298 .Simultaneous radiation imaging and deposition of material on substrate
299 .Simultaneous developing a resist image and etching a subtrate
300 .Making printing plate
301 ..Multicolor
302 ..Lithographic
303 ...Driography
304 ...Coating over colloid image and removal of colloid image to leave reversed image in coating, i.e., deep etch
305 ...Continuous tone or collotype
306 ..Relief
307 ..Intaglio or gravure
308 ..Stencil
309 ..Post imaging process
310 ...Including etching of substrate
311 .Making electrical device
312 ..Including multiple resist image formation
313 ..With formation of resist image, and etching of substrate or material deposition
314 ...Etching of substrate and material deposition
315 ...Material deposition only

IMAGING AFFECTING PHYSICAL PROPERTY OF RADIATION SENSITIVE MATERIAL, OR PRODUCING NONPLANAR OR PRINTING SURFACE - PROCESS, COMPOSITION, OR PRODUCT
.Making electrical device
..With formation of resist image, and etching of substrate or material deposition
316 ...Multiple etching of substrate
317 ...Insulative or nonmetallic dielectric etched
318 ...Metal etched
319 ..Named electrical device
320 .Making named article
321 ..Optical device
322 .Forming nonplanar surface
323 ..Including etching substrate
324 ..Including material deposition
325 ..Post image treatment to produce elevated pattern
326 ...Pattern elevated in radiation unexposed areas
327 .Processing feature prior to imaging
328 .Post imaging radiant energy exposure
329 .Removal of imaged layer
330 .Including heating
331 .Finishing or perfecting composition or product
332 DYE IMAGE FROM RADIATION SENSITIVE DYE OR DYE FORMER BY DRY PROCESSING, COMPOSITION, OR PRODUCT
333 .Multiple image formation, multiple image exposure, or simultaneous radiant energy exposure
334 .Positive image formation from radiation sensitive dye former
335 .Pretreatment processing before imaging, e.g., overall radiant energy exposure, etc.
336 .Developing latent image using radiant energy or heat
337 .Fixing or stabilizing image
338 .Composition or product
339 ..Radiation sensitive bleachable dyestuff
340 ..Identified sensitizer containing
341 ...Metal salt or complex
342 ...Sulfur compound
343 ...Heterocyclic
344 ...Halogen compound
345 ..Spiropyran dye or dye former
346 VISIBLE IMAGING USING RADIATION ONLY OTHER THAN HEATING BY SURFACE CONTACT OR CONVECTION
347 COMBINED
348 THERMOGRAPHIC PROCESS
349 .Heat applied before imaging
350 .Heat applied after imaging
351 ..Color development
352 ..During stabilization
353 ..During dry development
354 ...Including generation of vapor, moisture, etc.
355 ..During solvent development
356 ACHROMATIC IMAGE PRODUCED FROM CHROMATIC REPRODUCTION IMAGE
357 COLOR IMAGING PROCESS
358 .Color proofing
359 .Color correcting
360 ..Correcting by silver image
361 ..Correcting by color image produced by oxidizing bath treatment
362 ..Correcting by interimage effect
363 .Laser or radiation exposure other than visible light
364 .Forming combined chromatic and achromatic images
365 .Forming multicolor image in single layer
366 .Resensitizing
367 .Chromatic image produced from achromatic reproduction image
368 ..Blue or brown print forming
369 ..Viewing through either a colored filter or a colored light
370 ..Toning
371 .Mordanting
372 .Stabilizing
373 .Intensifying
374 .Using identified radiation sensitive composition in the formation of color image
375 ..Silver compound sensitizer
376 ...And coupler
377 ....And binder, coating aid, solvent, emulsifier, hardener, chemical sensitizer, or optical sensitizer
378 ....Direct positive process
379 .....Reversal process
380 ....And developer other than or in addition to p-phenylenediamine or derivative thereof
381 ....Polymeric or bis coupler
382 ....And either developing or dye inhibition
383 ....Forming multicolor image
384 ....Identified cyan dye color
385 .....Substituted at coupling position with other than hydrogen
386 ....Identified magenta dye color
387 .....Substituted at coupling position with other than hydrogen
388 ....Identified yellow dye color
389 .....Substituted at coupling position with other than hydrogen
390 ...And dye
391 ....Forming multicolor image
392 ....And dye catalyst
393 ...Silver bleach or bleach-fix
394 PLURAL EXPOSURE STEPS
395 USING REFLECTED RADIATION, E.G., REFLEX COPYING, ETC.
396 EFFECTING FRONTAL RADIATION MODIFICATION DURING EXPOSURE, E,G., SCREENING, MASKING, STENCILING, ETC.
397 .Involving motion during exposure, e.g., dodging, etc.
398 REGENERATING IMAGE PROCESSING COMPOSITION
399 .Developer
400 .Bleach-fix
401 POST IMAGING PROCESSING
402 .Achromatic image from organic compound
403 .With structural limitation
404 .Using web or gel
405 .Containing developer in element
406 .Positive
407 ..Reversal
408 ..Photosolubilization
409 ..Emulsions fogged during processing
410 ...Identified nucleating or fogging agent
411 ..Using fogged emulsion
412 ...Identified electron acceptor or desensitizer containing
413 .Physical developing
414 ..Amplifying
415 ..With processing ingredient in element
416 ..Silver halide as radiation sensitive medium

POST IMAGING PROCESSING
.Physical developing
417 ..Radiation reducible metal compound directly produces catalytic metal nuclei in image area
418 .Disparate function simultaneous process step
419 ..Develop-fix
420 ..Develop-harden
421 .Using plural sequential baths of same type
422 .Treating with processing composition prior to imaging and then developing
423 .Treating with processing composition after imaging prior to developing
424 ..Desensitizing
425 ..Sensitizing
426 ..Prehardening
427 .Treating with process composition between standard develop and fix-wash
428 .Stabilizing
429 ..Containing additive
430 .Bleaching
431 ..Using silver and dye bleach
432 .Including post developing step
433 .Developing in acid medium
434 .Developing
435 ..Using identified developer
436 ...Plural identified developers
437 ....Three or more identified developers
438 ....Containing hydroquinone
439 .....And amino substituted carbocyclic compound
440 ...Heterocyclic
441 ...Carbocyclic
442 ....Amino substituent on carbocyclic ring
443 ...Having developer releasing compound
444 ..Using polymer or condensation reaction product
445 ..Using mercapto or thione compound
446 ..Using heterocyclic compound
447 ..Using inorganic or organometallic complex
448 ..Using processing ingredient in element
449 NONRADIATION SENSITIVE IMAGE PROCESSING COMPOSITIONS OR PROCESS OF MAKING
450 .Process of preparing composition from plural preformed concentrates
451 .Hardener
452 ..Develop-harden
453 ..Fix-harden
454 .Shortstop
455 .Fixer
456 ..And developer
457 ...Forming dye image
458 ..Dry or concentrated
459 ..Plural fixers
460 ..And bleach
461 .Bleach or intensification
462 ..Dye bleach for color image
463 .Wash or aftertreat
464 .Developer
465 ..Solid or dry
466 ..Concentrated or viscosity increasing agent containing
467 ..Color developer
468 ...Additional developer containing
469 ...Including developing accelerator
470 ..Coupler containing
471 ...And additional reactive compound containing
472 ...Substituted at coupling position with other than hydrogen
473 ...Phenol or naphthol coupler
474 ...Pyrazolone coupler
475 ...Open-chain keto methylene coupler
476 ...Heterocyclic coupler
477 ..Reducible metal compound including reducing agent i.e., physical developer
478 ..Plural developer agents containing
479 ...Heavy metal organic or inorganic
480 ...Heterocyclic developer
481 ....And hydroquinone
482 ...Methyl-p-aminophenol and dihydroxy benzene
483 ..Heterocyclic developer
484 ..Amine developer
485 ..Hydroxy developer
486 ..Processing additive containing
487 ...Accelerator
488 ...Antisludgant
489 ...Antifoggant
490 ...Stabilizer-preservative
491 ...Sequestrant
492 ...Buffer
493 ...Surfactant, emulsifier, or solvent
494 INCLUDING EXPOSURE STEP OR SPECIFIED PRE-EXPOSURE STEP PERFECTING EXPOSURE
495 RADIATION SENSITIVE PRODUCT
496 .Structurally defined
497 ..With processing ingredient container or trap
498 ...Container or trap intended to remain in finished product
499 ...With feature to control spreading of processing ingredient
500 ...Roll film
501 ..Roll film
502 .Two or more radiation-sensitive layers containing other than that characterized by the composition of a single sensitive layer
503 ..Layers sensitive to different spectral regions
504 ...Ingredient for color compensation or correction containing
505 ...Developing inhibitor or processing ingredient containing
506 ...And containing plural layers sensitive to the same spectral region
507 ...Filter layer containing
508 ..Sensitive to portion only of visible spectrum or of widened spectral response
509 ..Sensitive layers differ in speed
510 .Antihalation or filter layer containing
511 ..Filters differing spectral regions in different areas of the filter, e.g., color screen
512 ..Filters ultraviolet radiation
513 ..Dissolvable or removable
514 ...Synthetic resin containing
515 ...Carbohydrate or derivative containing
516 ....Contains carboxyl groups
517 ..Organic dye or pigment containing
518 ...And mordant
519 ...Azo
520 ...Triarylmethane
521 ...Anthraquinone or quinhydrone
522 ...Intercyclic methine or azomethine and cyclic ring containing
523 .Identified backing or protective layer containing
524 ..Metal
525 ...And another backing layer other than aluminum oxide
526 ...Aluminum
527 ...Antistatic agent containing
528 ...Ammonium salt
529 ...Organic carboxylic, sulfur or phosphorus acid or salt

RADIATION SENSITIVE PRODUCT
.Identified backing or protective layer containing
..Antistatic agent containing
530 ...Elemental metal or metal salt
531 ..Synthetic resin or cellulose derivative containing
532 ...Subjected to radiation, flame, or corona discharge
533 ...Polyester or polycarbonate
534 ....Next to polymer of unsaturated monomer
535 .....Polymer of unsaturated ester or halide
536 ...Polymer of unsaturated monomer
537 ....In nonradiation-sensitive layer including gelatin
538 ..Fibrous, e.g., paper, textile, etc.
539 ..Gelatin other than radiation sensitive type
540 .Iron compound sensitizer containing
541 .Identified radiation sensitive composition with color producing substance
542 ..Silver compound sensitizer
543 ...Coupler containing
544 ....And development inhibitor or development inhibitor releasing agent
545 ....And identified binder
546 ....And solvent or emulsifier or coating aid
547 ....Direct positive
548 ....Polymeric or bis coupler
549 ....Mixture of couplers
550 ....And chemical or optical sensitizer
551 ....And antifoggant or color stabilizer
552 ....Phenol or naphthol coupler
553 .....Substituted at coupling position with other than hydrogen
554 ....2-pyrazolin-5-one coupler
555 .....Substituted at coupling position with other than hydrogen
556 ....Open chain keto- methylene coupler
557 .....Substituted at coupling position with other than hydrogen
558 ....Heterocyclic coupler
559 ...Dye containing
560 ....And optical sensitizer
561 ....Azo dye
562 .....Monoazo
563 .....Diazo
564 .Silver compound sensitizer containing
565 ..Achromatic image forming organic compound
566 ..Developing or fixing agent containing for liquid processing
567 ..Silver compound having specified crystal form, habit, particle size or particle size distribution
568 ...Having particle size of 100 millimicrons or less, e.g., Lippmann type, etc.
569 ..Including manipulative emulsification step
570 ..Spectral sensitizing
571 ...Mixed grain
572 ...Multiple sensitizers or supersensitizing
573 ....Polyheteronuclear sensitizer
574 ....Two or more cyanine sensitizers
575 ....Inorganic material containing
576 ....Cyanine sensitizer
577 .....Merocyanine compound
578 ...Polyhetero nuclear containing at least three hetero nuclei
579 ....Four or more distinct hetero nuclei
580 ...Styryl sensitizer
581 ...Cyanine sensitizer
582 ....Methine linked six-membered heterocyclic rings
583 ....Containing odd number of methine groups
584 .....Five or more methine groups
585 .....Three methine groups, i.e., carbocyanines
586 ......Linking six-membered hetero to five-membered hetero
587 ......Hetero ring bridged or fused to hetero ring
588 ......Hetero rings bridged or fused to carbocyclic rings
589 ....Direct positive
590 ......Only one hetero ring fused or bridged to carbocyclic ring
591 ...Two or more separate ring structures
592 ....Intercyclic methine chain sensitizer
593 .....Methine linked hetero ring with hetero group bridged or fused thereto
594 .....One or both methine linked rings carbocyclic
595 .....Odd number of carbons in acyclic methine chain
596 ..Fogged direct positive
597 ...Identified desensitizer or electron acceptor containing
598 ..Fogging or nucleating agent containing
599 ..Hypersensitizing or latensifying ingredient containing
600 ...Heterocyclic N, O, S, Se, or Te compound containing
601 ...Phosphorus compound
602 ...Polyoxyalkylene compound
603 ...S, Se, or Te or compound thereof
604 ...Heavy metal or compound thereof
605 ....Noble metal or compound thereof
606 ..Desensitizing ingredient containing
607 ..Stabilizing or fog inhibiting ingredient containing
608 ...Inorganic material
609 ...Synthetic organic polymer
610 ...Phosphorus compound
611 ...Mercaptan, thioether, thione, disulfide or organic bisulfite
612 ...Organic metal compound
613 ...Heterocyclic compound
614 ....Polyhetero atom ring
615 .....Polyhetero atom ring fused to another ring having polyhetero atoms
616 ..Composition for visible imaging by radiation only
617 ..Silver compound other than halide per se or composition for thermographic process
618 ...Organic silver compound containing
619 ....And inorganic silver compound
620 ....Silver salt of organic acid
621 ..Hardening ingredient containing
622 ...Vinylidene compound
623 ...Heterocyclic compound
624 ....Epoxide, i.e., oxirane
625 ....Aziridine
626 ....Triazine including hydrogenated triazine
627 ..Resin or synthetic polymer containing
628 ...Protein or other natural colloid or derivative containing
629 ...Sulfur or sulfur compound containing
630 ...Heterocyclic compound containing, e.g., heterocyclic monomer, etc.

RADIATION SENSITIVE PRODUCT
.Silver compound sensitizer containing
631 ..Film or film coating improvement ingredient containing, e.g., wetting agent, coating aid, plasticizer, antistatic agent, etc.
632 ...Rosin acid or derivative
633 ...Higher fatty acid or derivative
634 ...Polycarboxylic or polysulfoxy acid or derivative
635 ...Carboxylic acid or derivative
636 ...Sulfoxy compound or derivative
637 ...Polyglycidol, polyglycol, polyoxyalkylene oxide, or ether or ester thereof
638 ...Alkyl or cycloalkyl alcohol or ether or ester thereof
639 ..Carbohydrate or derivative containing
640 ...Gelatin or derivative containing
641 ...Cellulose or derivative, e.g., regenerated cellulose, etc.
642 ..Gelatin or derivative containing
643 ..Casein or derivative containing

1 COMBUSTION BURSTS OR FLARE-UPS IN PULSES OR SERIAL PATTERN
2 PROCESS OF COMBUSTION OR BURNER OPERATION
3 .Decarbonizing, cleaning or purging
4 .Feeding flame modifying additive
5 .Burning waste gas, e.g., furnace gas, etc.
6 .Starting or shutdown procedure
7 .In a porous body or bed, e.g., surface combustion, etc.
8 .Flame shaping, or distributing components in combustion zone
9 ..Whirling, recycling material, or reversing flow in an enclosed flame zone
10 ..Oxidizer added to region of incomplete combustion
11 .Heating feed
12 .Controlling or proportioning feed
13 WITH INDICATOR OR INSPECTION MEANS
14 .Correlated with action of condition responsive burner control
15 ..Shutdown or aborted start attempt indicated
16 ...Responsive to gas leakage, overflow, abnormal pressure or electrical component malfunction
17 .Burner component position indicator
18 TIMER, PROGRAMMER, RETARDER OR CONDITION RESPONSIVE CONTROL
19 .Responsive to combustion chamber pressure
20 .Of or by exhaust damper or exhaust pump
21 .By combustion destructible element, e.g., fusible plug, etc.
22 .By sensing of gas leakage, flashback or escaped flame
23 .Of means protecting burner component from combustion heat
24 .With test circuit checking or analyzing flame sensing circuit for malfunction
25 ..Utilizing unidirectional electrical conducting effect of flame
26 ..Test circuit activated, then inactivated in starting
27 .Providing repeated start attempts prior to shutdown upon failure to establish combustion
28 .Actuation sequence of electric feed heater and feed flow controller or igniter
29 .Control of purger, of scavenger or of combustion start-up delay period
30 ..Of scavenging or purging pump
31 ...Scavenging or purging period started by combustion demand
32 .Of cleaning means
33 .Of extinguishing means
34 ..Wick cover actuated in response to tilting of burner
35 ..By candle length or fuel quantity
36 .Of or by burner feed supply heating structure
37 ..By controlling admittance of feed to structure
38 ...By pressure of feed in structure
39 ...By level of liquid feed in structure
40 ...By linear expansion of feed holder
41 ..Supply of heat to heating structure controlled
42 .Sensor of first burner controls second burner, e.g., pilot and main, etc.
43 ..With electrical igniter
44 ...Igniter deenergized by fuel pressure variation in start effort
45 ...Igniter deenergized by timer, programmer or retarder
46 ...Igniter deenergization responsive to first burner ignition
47 ...With manual igniter actuation
48 ..Sensor of second burner controls third burner
49 ..And an igniting burner for first burner
50 ..Sensing of flame at both burners required for continued operation of second burner
51 ..Both burners cut off upon sensed extinguishment of first burner
52 ...First burner manual reset valve cut off
53 ....Single valve cuts off branched flow
54 .....Reset includes structure preventing feed to second burner prior to sensed combustion at first burner
55 ....Burners independently controlled by reset valves
56 ...Having cut-off valve by-pass or additional supply to first burner
57 ..Manual reset of second burner required upon first burner extinguishment
58 ..Sensor controls diaphragm motor of second burner valve
59 ..Electrical or magnetic sensor controls second burner
60 .Of sequential operation of plural burners, e.g., pilot and main, etc.
61 ..By fuel feed pressure variation
62 .Of diverse feed or feed rate in starting, e.g., enriching fuel mixture in starting, etc.
63 ..Combustion sensor establishes "run" feed
64 .Level responsive means controls fuel level in wick pot or pot type burner
65 .Fuel feed cut off by collected fuel over-flow
66 .Sensor of electrical condition or temperature of electrical igniter controls fuel feed
67 .Igniter heat up and fuel feed sequence controlled by timer or retarder
68 .Sensing of hot combustion zone condition blocks restart attempt
69 .Shutdown by sensed absence of flame in proving period
70 ..Recycle through proving period on sensing of failure of established flame
71 ..Igniter cut off when flame establishment proved
72 .Of igniter and feed controlled sequence
73 ..By timer or retarder
74 ..Combustion zone sensor controls igniter
75 .By combustion or combustion zone sensor
76 ..Combustion product composition sensor
77 ..Of shutdown by response to sensed combustion failure or overheat
78 ...By electrical control circuit
79 ....Photoelectric sensor
80 ....Thermoelectric generator sensor
81 ...Manual setting means for biased valve released upon sensed combustion
82 ...With fuel feed means downstream of shutdown valve
83 ...Sensor movement losses means holding shutdown valve open against bias
84 ....Held by latch, latch released by sensor
85 .....Expanding fluid sensor
86 .By manually started timer or retarder, or by time of day device
87 ..Of combustion initiating means, e.g., match striker, etc.

TIMER, PROGRAMMER, RETARDER OR CONDITION RESPONSIVE CONTROL
88 .By tilting, jarring, or mechanical damage
89 .By condition of burner feed or feed means
90 ..Sensor of one feed controls another feed
91 PROJECTOR AND IGNITER FOR LIQUID OR GELLED FUEL SLUG OR ROD, E.G., FLAME THROWER, ETC.
357 ILLUMINATING FLASH DEVICE, E.G., PHOTOGRAPHIC BULB, ETC.
358 .Fuel charge within sealed transparent casing, e.g., bulb
359 ..Plurality of bulbs associated for sequential ignition
360 ..Coated casing
361 ..Percussive ignition means ignites charge
362 ..Electrically ignited primer ignites charge
363 .Having fuel charge feeding means
364 .Having protective shield
365 .Electrical means ignites charge
99 MAGNESIUM STRIP
100 INCANDESCENT MANTLE
101 .Resiliently supported
102 .Wick feeds vapor to mantle
103 .Heated feed line section
104 ..Discrete flame holder heats section, e.g., auxiliary jet, etc.
105 ..Within mantle
106 ..Above upwardly fed mantle
107 ..Heated by downwardly fed mantle
108 .Distinct means increases pressure at mantle
109 .Depends below downwardly facing fuel discharger
110 .Supported above upwardly facing fuel discharger
111 .Supporting or protecting means external of mantle
112 ..Extending within mantle
113 ..On upwardly opening mantle
114 WITH MEANS ATTENUATING SOUND OR PULSATION
115 COMBUSTION PRODUCTS RETURN STRUCTURE
116 .Recirculation about mixing or combustion chamber wall or baffle
117 WITH EXTERNAL DRAIN FOR SURPLUS LIQUID FUEL DISCHARGED INTO VAPORIZATION OR COMBUSTION ZONE
118 .Drained collecting basin spaced from zone
119 WITH DRIP OR LEAKAGE COLLECTOR
120 WITH WICK TRIMMING, TREATING, INSERTING, OR REMOVING MEANS
121 WITH APPARATUS CLEANING, PURGING OR SCAVENGING MEANS
122 .Scraping or clearing member
123 ..Feed orifice penetrating
124 WITH RESERVE FLINT HOLDER
125 WITH SIMULATION FEATURE
126 WITH ORNAMENTATION OR FLAME COLORING ADDITIVE
127 BURNER ASSEMBLY INCLUDES IGNITER ELEMENT AND REMOVABLE HAND MANIPULATABLE TORCH
128 .Electrical igniter
129 BURNER HEAD COVER OPERATIVELY INTERRELATED WITH IGNITER
130 .Interconnected with valve in fuel feed passage
131 ..By movably mounted burner nozzle
132 .Electrical igniter
133 .Solid ignition charge dispenser and striker
134 .Actuation of ignition member releases biased open cover
135 .Cover, latched closed, biased open; igniter actuated on release
136 ..Abrasive wheel moves with cover about a common axis
137 .Cover actuator cocks and releases abrasive member drive
138 .Common axis for cover and abrasive wheel
139 ..Actuator (e.g., finger piece) engaged with cover for relative movement
140 ...Gear drive between cover and actuator
141 .One way drive means between cover and abrasive wheel
142 BURNER HEAD OR IGNITER REMOVABLY SECURED TO FUEL TANK BY ENCIRCLING FRAME OR CASING
143 .Burner head on tank and igniter on frame or casing
144 BURNER CAP, COVER OR EXTINGUISHER
145 .Fluid
146 .Movably or removably mounted cover for flame holder
147 ..Cover bars oxidizer from catalyst
148 ..Connected to lamp chimney or its support
149 ..And distinct snuffer within cover
150 ..Cover operatively interconnected with feed controller or feed pump
151 ..And windshield within covered zone
152 ..Pivotally mounted
153 CORRELATION OF FUEL OR POWER SUPPLY WITH COMPONENT MOVEMENTS IN A DISABLING AND ENABLING SEQUENCE
154 WITH REPAIR, ASSEMBLY OR DISASSEMBLY ADJUNCT
155 .Slide or roller
156 CONVERTIBLE
157 MEANS AT CHAMBER OUTLET ESTABLISHING COMBUSTION PRESSURE DISTINCT FROM AMBIENT
158 .Chamber outlet forms jet nozzle
159 FUEL DISPERSER INSTALLED IN FURNACE
160 .Disperser cooled by fluid additional to furnace feed
161 .Furnace heated feed line section
162 ..Distinct sections feeding disparate fluids to furnace
163 ..Section feeds steam to disperser
164 ..Section feeds oxidizer through furnace wall opening spaced from that for disperser
165 ...Oxidizer fed at spaced points along combustion path
166 ..Section feeds oxidizer to disperser or through disperser furnace wall opening
167 ...Section is furnace wall cavity leading to disperser
168 .Rotary disperser projects at surrounding flange surface
169 ..Mixing ring or group of deflectors overhangs flange surface
170 .Disperser feeds into permeable mass, e.g., checkerwork, etc.
171 .With discrete flame directing baffle
172 ..Baffle means forms flame ring around combustion chamber
173 .Feed projected tangential to wall of circular combustion chamber
174 .Spaced fuel dispersing orifices within furnace
175 ..Intersecting fuel streams
176 ...Opposed rows of streams of radially directed streams in a common plane

	FUEL DISPERSER INSTALLED IN FURNACE
	.Spaced fuel dispersing orifices within furnace
177	..Annular arrangement with fuel directed on surrounding combustion chamber wall
178	..Row with parallel discharge through combustion chamber wall
179	...Longitudinally adjacent rows
180	..Row across combustion chamber
181	.Plural feed means extending to common wall opening of furnace
182	..Duct with air whirling means surrounds disperser
183	...Row of stationary blades coaxial with disperser whirls air
184	....Pivotally adjustable blades
185	..Feed whirling means at wall
186	..Shiftably mounted disperser; or flame shaper
187	..Feeds discharged coaxially
188	...Air chamber with inlet control surrounds disperser at wall
189	.Disperser adjustably mounted for movement relative to furnace wall opening
190	.Water, air or steam feeder spaced from disperser
191	BURNER IGNITED BY FLASH FLAME THROUGH CONDUIT
192	.Conduit feed means spaced from ignited burner
193	.Unique burner manifold orifice feeds conduit
194	..Nipple forms orifice and anchors conduit
195	FUEL DISTRIBUTOR UNDERLYING COMBUSTION ANNULUS HAVING AIR FEEDING PERFORATIONS
196	.With pilot burner, primer, or electric combustion starter
197	.Annulus movably mounted for access to distributor
198	.Distributor annulus feeds combustion annulus through coaxial throat or row of orifices
199	.Distributor receives heated fuel from annulus heated line section
200	.Coaxial combustion chambers with intermediate air space
201	.Structure surrounding annulus guides combustion air to perforations
202	STRUCTURAL INSTALLATION
203	FLAME HOLDER MOUNTED ON HEATED SINGLE CHARGE FUEL TANK
204	.Fuel jet from heated tank traverses wick burner
205	.Priming cup heats tank
206	.Having heat conductor between spaced flame holder and tank
207	HEATED LINE SECTION FEEDS FLAME HOLDER
208	.Electrically heated section
209	.Section and its heat source mounted for relative movement, e.g., to vary thermal effect, etc.
210	.Heated section supplied by separate diverse feeds, e.g., water and fuel, etc.
211	..One feed heated before being fed to section
212	...Another feed heated before being fed to section
213	.Air from section discharged downwardly toward fuel surface
214	..Fuel surface is film descending from elevated structure
215	.Distinct exhaust products line heats feed line
216	.Lines for diverse feeds heated
217	..With mixing upstream of combustion zone
218	.Basin for burning liquid fuel heats feed line section
219	..Heated line feeds steam to fuel basin area
220	..Separate basin and flame holder fuel lines
221	...Valved branch of flame holder feed line feeds basin
222	..Basin receives fuel from terminus of heated fuel line
223	...With selective deflector directing fuel to basin
224	...Horizontally extending cavity of basin forms heated section
225	...Basin mounted on valve housing
226	...Heated fuel drum above basin
227	...Basin encompasses vertical heated line section
228	....Line passes through basin to surrounding, descending discharge structure
229	....Elongated basin parallel to fuel line
230	.Auxiliary burner heats wick within heated section
231	.Fuel container having means feeding gas to a separate line heating burner and liquid to heated section
232	.Section heated by distinct flame holders, one fed by heated section
233	.Heated line supplies its heater and an external structure, e.g., flame holder
234	..One of a group of similar burners heats section
235	..Heated line supplies generated gas to main of distributing system
236	.Section heated by auxiliary burner
237	..Main fuel line branch feeds auxiliary burner
238	.Unheated fuel supply to flame holder
239	..Heated feed aspirates or atomizes fuel
240	.Insert in heated fuel line, e.g., packing, etc.
241	..Lifts fuel from tank to heated section by capillary action
242	.Housing encloses heated section and flame area
243	.Flame enclosure comprises, or conducts heat to heated section
244	.Discrete jet section of flame holder heats its fuel line
245	.Unheated oxidizer supply to line between heated section and feed discharger
246	..Feed discharger wall cavity forms heated section
247	.Fuel conduit within flame or combustion products zone
248	..Distinct baffle directs flame at or around conduit
249	WITH FEATURE FOR ACCESS TO OR EXPOSURE OF FLAME HOLDER
250	.With match scratching surface within enclosure
251	.Enclosure movably mounted for access
252	WITH ADJUNCTIVE MEANS TO EXTEND OR DEFLECT FLAME BY AIR BLAST OR ASPIRATION
253	COMBINED
254	ELECTRICAL OR MECHANICAL IGNITER CORRELATED WITH BURNER FEED
255	.Having electric current producer
256	.Switch or electrode of igniter moved by valve element or operator

ELECTRICAL OR MECHANICAL IGNITER CORRELATED WITH BURNER FEED
.Switch or electrode of igniter moved by valve element or operator
257 ..Make and break electrode moved
258 BURNER HAVING ELECTRICAL HEATER OR IGNITER
259 .Igniter and separate heater
260 .Adjacent exposed liquid fuel surface on fuel support
261 ..Capillary fuel holder
262 ...Resistance type heater or igniter
263 .Igniter in shelter chamber
264 .Spark electrode in front of or adjacent fuel discharger
265 ..Gun type burner with electrode supported in air blast conduit
266 ..Spark circuit includes feed terminus
267 FRICTIONAL, CHEMICAL OR PERCUSSIVE TYPE IGNITER
268 .Catalytic
269 .Cap, match or pellet igniting charge holding and firing means
270 ..Externally accessible operator fires charge within flame enclosure
271 ..Plural charge holder with presenting structure
272 ...Serially connected charges
273 .Spark projecter, e.g., flint and abrasive striker, etc.
274 ..Mechanical movement operated abrasive member
275 ...Stored energy actuated; detent, latch or overcenter release
276 ..Advancing type flint holder
277 ..Mounted on fuel tank adjacent flame holder
278 SEPARATELY SUPPLIED OR CONTROLLED, PHYSICALLY RELATED FLAME HOLDERS, E.G., DIVERSE FUELS, PILOT AND MAIN, ETC.
279 .Relatively movable
280 .By multiway valve
281 .Correlated controls
282 .Adjustable wick
283 .Three mounted in cross igniting relationship
284 .Coaxial
285 .Having common flame chamber or shield means
286 DISCRETE MEANS TRANSMITTING FLAME BETWEEN SEPARATE FLAME HOLDING SECTIONS
287 HAVING COMBUSTION STARTING ASSISTANT
288 CANDLE, E.G., TAPER, ETC.
289 .Having structure additional to wax and wick
290 ..Height adjuster or maintained flame level
291 ..Fuel body totally within casing, e.g., vigil light, etc.
292 ..Melt handler or receiver
293 ...Follower cap
294 ...Drained or openwork candle grip mounted on melt receiver
295 ..Holder for plural candles
296 ..Hook, clamp or spike supported candle holder
297 ..Candle mounting attachment for socket type support
298 FIBROUS WICK TYPE FLAME HOLDER
299 .Having feeder or holder for disparate fluid
300 .Means forcing air into flame area
301 .Wick movement limiting structure
302 .Tubular wick having central supporting and air supplying structure
303 ..Having lateral air inlet passage through wick
304 ..Having wick raiser
305 ...Screw thread on wick carrier
306 ...Rotatable threaded rod and follower
307 ...Rack and pinion
308 ...Reciprocated bar
309 ..Having air guide or distributor
310 .Having air or flame director, air distributor, or windguard
311 ..Transparent director surrounding wick support or guide
312 ..Director passageways, each surrounding wick or flame zone
313 ..Director passageways leading to flame zone
314 ..Air annulus leads to flame zone
315 .Having adjustable wick exposure, position, or porosity setting structure
316 ..Rotatable projection means engages wick
317 ...Transmission mechanism rotates means
318 ...Opposed rotatable wick engaging means
319 .Having distinct fuel line between reservoir and wick guide or support means
320 .Liquid fuel container carries wick guide or support
321 ..Having distinct container filling or venting structure
322 ..Means supporting displaced wick guide or support on fuel container
323 ..Having absorbing, baffling or additional wick supporting structure in container
324 ..Detachable closure securing guide to container
325 .Coated, impregnated, layered, coupled or reinforced wick
326 POROUS, CAPILLARY, PARTICULATE OR SIEVELIKE FLAME HOLDER, E.G., RADIANT SURFACE BURNER, ETC.
327 .Capillary mass having handle
